THE ADVANCE OF REVELSTOKE

THREE IMPORTANT ANNOUNCEMENTS

Land and Timber Reorganisation Dates From To-day: What It Means

NATIONAL PARK PROJECT PROGRESSING

New Post Office: Tenders to be Invited Very Shortly

It is with the greatest pleasure that we make public three items of news of deep interest and fraught with promise for the future of Revelstoke.

The first and most important as regards immediate good effects is that from to-day the Land and Timber Office for the Kootenays is to be located at Revelstoke. This is a welcome recognition, not only of the importance of Revelstoke, but of the fact that the powers that be strongly realize the right of Revelstoke to be regarded as the centre for the district for the transaction of this important branch of Dominion affairs, and have seen to it that Revelstoke has come into her own.

The second announcement is in connection with the long expected New Post Office. Tenders will be called for in the very near future for the erection of a building which will adequately serve the purposes and at the same time prove a valuable addition to the architectural features of the town.

The third announcement is that matters in connection with the Dominion assistance in regard to the Revelstoke National Park project are progressing rapidly and most favorably. The estimates are now before the House at Ottawa, and they include an appropriation of $16,000 for the Revelstoke National Park.

The happy results which have attended the above projects for the advance of Revelstoke have been attained largely as the outcome of the untiring efforts of our representative at Ottawa, Mr. R. F. Green, and it is only just that full acknowledgement and sincere thanks should be accorded Mr. Green.

THE LANDS OFFICE.

In connection with the land and timber office at Revelstoke, a representative of the "Mail-Herald" was fortunate enough this morning to run across Mr. J.W. Martin, of Calgary, Inspector of Dominion Land Agencies, who is in town, in connection with the transfer of records, etc., from the Kamloops office, to Mr. Wadman's office in the Canadian Bank of Commerce building, which is at present the scene of great activities, and to obtain from him information as to the important change made as from today and the results which may be confidently expected.

"Hitherto," said Mr. Martin, "all the business for the Eastern half of the Railway Belt, all the land, timber and other business in connection with Dominion lands, has been transacted at Kamloops, with sub-divisions at Revelstoke, Salmon Arm and Golden. In future all such government land business, including mining matters, will be transacted from the Revelstoke office, with a sub branch at Golden. The people of this district will have the advantage of being able to transact their land business direct at Revelstoke and of being in personal touch with the land office and its officials. It will not be necessary for them to communicate with Kamloops at all. The territory of the Revelstoke district will be all the Railway Belt east of a line between ranges 3 and 4, west of the Sixth Meridian.

"Any lands business hitherto transacted was subject to ratification at Kamloops, and any delay occasioned thereby operated against the residents in this district. The dates of transactions, for instance, were the their representations came to naught dates of the dealing with the matters at Kamloops. Now all these matters will be directly dealt with by Mr. Wadman or one of his staff. That should prove a decided advantage to Revelstoke people and bring much business into the town.

"The business of the Revelstoke office as now constituted will include all homestead inspections and matters appertaining thereto, which will be attended to direct without reference to or the intervention of any other office. That in itself is a decided convenience to those in this district who have such business to transact and will mean that people will come to Revelstoke to transact such business instead of going to Kamloops. There are lands which in the near future will become available for settlement and prospective settlers and others interested will come to Revelstoke.

"All the records have already been transferred from Kamloops."

Mr. Smith, who had charge of the business of the timber department at Kamloops, is also in town supervising the transfer of documents from that department to the Revelstoke office.

The establishment of the land and timber office on the new basis outlined will of necessity mean an increase in the staff under Mr Wadman—who has been promoted from subland and timber agent to the position of Crown Timber and Land Agent for the Kootenay District—another welcome feature.

There is no doubt that the personal efforts of our representative at Ottawa, Mr. R.F. Green, M.P., are largely responsible for this happy recognition of Revelstoke claims and advancement.

This announcement is particularly pleasing in view of what was generally regarded as the injustice done to Revelstoke in 1910 when a rearrangement of land and timber office organisation was made by Mr. Oliver which was bitterly resented here. It will be remembered that at that time there were strong protests made by all local bodies and organisations, the lumbermen being particularly active with the Liberal Association, the Board of Trade and the citizens generally. All The new arrangement which comes into force today means that the justness of the 1910 representations has been forced upon the authorities and that Revelstoke has come into her own again.

THE PARK.

There is every indication that the sum on the estimates in aid of the Revelstoke National Park, $16,000, will be available shortly. The local community has recognised the importance of the development and extension of the park scheme for years past, and has done its share towards ensuring that the value of this asset should be fully realised. But the question of finances has lately threatened to delay matters, and the grant of $16,000 from the Dominion government is all the more welcome on that account. The grant carries more than the handing over of the sum mentioned; it ensures the Revelstoke National Park ranking amongst the officially recognised scenic wonders of the Dominion, and thus obtains at once the widest possible publicity for our local attractions to tourists. What the development of the tourist attractions of the Revelstoke district means it is impossible at this stage to state definitely, but it is a very big thing, aad the completion of the Park is the first step, now rendered possible, towards the fulfillment of long cherished ideals and the attainment of a most desirable end. The citizens of Revelstoke, rightly regarding this matter as of vital import, have steadily busied themselves in movements directed towards the obtaining of such recognition as has now been accorded, and they owe much to Mr. R. F. Green, M.P., for his indefatigable endeavors and powerful advocacy of the claims of the park and the desires of the residents.

THE POST OFFICE

Revelstoke possesses a particularly fine Court House, and creditable buildings in its business centre, but it has long been acknowledged that a new, up to date, commodious post office building is an urgent requisite. It is indeed pleasing to know that the needs of the town and district in this regard are to be met. Mr. R.F. Green, M.P., has made this matter a particular hobby, no other description is adequate to apply to the manner in which our member has worked in connection with the provision of a really handsome adequate post office building for Revelstoke. Tenders for the erection of such a structure are to be called for in the very near future, and the reproach that has hitherto attached to the town will be removed in the best possible fashion. The building will include suitable accommodation for the Dominion offices here, including the department of lands and timber, the Customs Office and all other Dominion branches.

The citizens of Revelstoke and district should appreciate, as we believe they will when the facts are published, the successful efforts of Mr. R.F. Green, M.P., in connection with these important matters.

MANNING'S MAKE

Our Easter Line of Novelties this year will be the best that has ever been shown in the City.

Watch our Windows for Easter Display.

MANNING'S.

NOTICE!

Register Your Vote!

If you are a male British subject, 21 years of age, a resident of British Columbia for six months, and of the Revelstoke Riding for one month you are entitled to have your name inserted on the voter's list. But you must make personal application to this effect and sign a form provided for this purpose. And in order to have your name included on the list, which will be revised on the Third Monday in May you must make application before the sixth day of April.

In the Revelstoke District there may be qualified voters who are not registered as such. This should not be, but it is always the case, with the result that when an election comes round many are found bitterly complaining that they have no vote. The fault of course, is entirely their own.

Ample facilities are afforded for all to register, and the Revelstoke Conservative Association would urge all residents of this Riding who are duly entitled to exercise this franchise to see without delay that their names are enrolled on the Register of voter's.

Forms aad all information can be obtained and the necessary declaration taken by applying to A. E. Kincaid, President City Association, H.J. Parker, Secretary, and W.R. Reid, Arrowhead, President District Association, or R. D. Macdonald, Secretary.

REVELSTOKE CONSERVATIVE ASSOCIATION

COUNCIL SPECIAL MEETING

Mayor McKinnon presided at a special meeting of the City Council, held on Tuesday night, when there were present Aldermen H.J. McSorley, F. Bourne and S. Needham with Mr. W.A. Gordon, city clerk.

The City Clerk reported the result of the bylaw vote, and read the returning officers declaration that the bylaw authorising the raising of $40,000 for the improvement and extension of the power plant had been carried by a majority of 49.

On the motion of Ald. McSorley, seconded by Ald. Needham, the bylaw was reconsidered and finally passed and approved.

GRADES

Messrs. Wallace and Smith attended in connection with the determing of grades for the improvement of approaches to the Court House, in connection with which matter the members of the council inspected the vicinity on Saturday afternoon.

Plans were exhibited showing the solution of the difficulty recommended by the engineers.

On the motion of Ald. Needham, seconded by Ald. McSorley, the plans prepared by Mr. Smith giving grades for approaches to the court house, were adopted.

The proposal is to arrange for entrances to the court house from the corner of Second street and Kootenay street and the corner of Third street and Kootenay street, and it is understood that the court house grounds will be laid out and beautified by the government, who required the grades before proceeding with the improvement scheme.

THE BY-LAW PASSED

Monday was polling day in connection with the proposal to issue a $40,000 debenture for the extension and improvement of the power plant. The day was unpleasantly wet and the conditions were not conducive to a big poll, yet an overwhelming majority voted in favor of the proposal which has been fully explained in our columns.

Mr. B.R. Reynolds was the returning officer and he announced the result of the poll as follows:

For the bylaw	196
Against the bylaw	53
Spoiled ballots	1
Total	250

March simply had to get that little snowstorm out of its system before making way for a real spring month.

City Council Holds Regular Meeting

Court House Approaches Improvement.—The Question of Grades.—Mrs. Stacey Waits Upon the Council.—Water Charges.—Ald. Needham's Criticisms.

Mayor McKinnon presided at a meeting of the city council held on Friday night, when there were also present, Aldermen F. Bourne, S. Needham, W. Smythe, H.J. McSorley and J. Pradolini, with Mr. W.A. Gordon city clerk.

The discussion of the grades required in connection with the Court House approaches improvement scheme was continued.

The Mayor suggested that it might be advisable for the council to view the ground, as Mr. Wallace had suggested.

It was stated that whatever was done, it was impossible to please all parties affected.

Ald. Pradolini seconded Ald. Needham's motion with the proviso that the grade be merely put on record, and not fixed on a registered plan.

Ald. Needham would not accept the proviso. He wanted the grade registering.

Ald. Smythe withdrew his proposal and seconded Ald. Needham's motion

On a vote being taken Ald. Needham and Smythe voted for the motion, and Ald. McSorley, Pradolini, and Bourne against, the motion being lost.

The Mayor—That does not settle the matter.

Ald. Pradolini—We might give a grade without registering it is merely giving a grade for the present and recording it, not enforcing it for the future, as we do not know what conditions may arise.

Ald. Needham—All the work of the committee and the expense incurred during the past fortnight is wasted. You talk about wasting money; the committee was told to enquire into ir and did, and now you wan't accept it.

Ald. Pradolini said he did not want to bind future councils to a grade designed to meet the court house improvement scheme.

Ald. McSorley said his idea was to grade Second and Third streets in conformity with surrounding streets, leaving the hill out of the question.

Ald. Needham said the fixing of a permanent grade would not mean that the government would have to build down to that level right away, or indeed at any time.

Ultimately it was decided that council should inspect the ground at two o'clock on Saturday, and that the question of the grade should be decided at a special meeting.

MRS. STACEY.

Mrs. Stacey, who had been waiting during the above discussion and who by this time had left, returned and voiced several grievances, the chief of which was a complaint that she had been forced to leave her ranch on account of the sewage being washed up on the banks of her land as the result of the unsatisfactory method of disposing of the city sewage. She said the city had forced her and her children off the ranch to starve, and that proper steps had not been taken to ensure the return to her of her husband. She handed Ald. Smythe news paper clippings and other quotations dealing with the pollution of water by sewage, which he read at her request, and then continued her story of woe at great length, all her children were sick as the result of the pollution of the water bounding her ranch and she was forced to leave it.

The Mayor said reports had been presented to the council stating that the sewage could not affect the land at the point mentioned.

Mrs. Stacey said she could not accept a cheque sent her from the city as she could not sign it as a destitute person; she was not destitute, she had always supported herself and only wanted the children providing for, which was what the ranch was intended for.

Ald. McSorley said the water was a Dominion government matter.

Mrs. Stacey—No, as we got the ranch from the Liberal government.

It was decided to let the Health committee enquire into the position.

Thereupon Mrs. Stacey said she wanted a square deal and no one interested in taxes on the committee, as people interested would not favour building a tank to deal with the sewage.

Mrs. Stacey rattled on at a great speed, and declared that her chickens and roosters died in dozens on the ranch in consequence of the sewage, "though probably she would have been told they died of appendicitis" had she had them examined.

Mention of a former visitor who had gone into the subject of her complaints elicited the reply that "he was no good as he was full and smelled worse than the sewage." She declared she would jump into the river before she would see her children starve, but would not accept cheques made out to a destitute person as she was not destitute, and so on. Her taxes were too high, she never got justice and nothing was done to get her husband back and so on.

The Mayor promised to give all consideration to the complaints and to assist in sending one of Mrs. Staceys children to the coast to have his eyes attended to though Mrs. Stacey said that was useless unless "Mr. Stacey's consent" to an operation was first obtained.

Mrs. Stacey withdrew on the understanding that the Health committee would speedily consider the chief of her complaints, declaring as a parting shot that she did not believe the council wanted to poison her but that starvation was about the same as being poisoned.

CITIZENS LEAGUE

The Mayor reported the receipt of a letter from the Citizens League, endorsing the council's action in regard to licensing bartenders, the collection of garbage, etc.

It was decided that the letter should be filed.

PEACE CENTENARY.

The city clerk reported the receipt of a letter on the subject of the Peace Centenary celebration, and said he would communicate with the members of the local committee.

SEWER ASSESSMENT.

It was intimated that the arrears of the triangular lots, regarding which difficulties had arisen in connection with sewer assessments were now prepared, and the matter was referred to the Bylaws committee on the understanding that the readjustment of the scheduled should be proceeded with on this new basis as applied to triangular lots.

WATER CHARGES

Ald. Needham brought up the matter of water charges. At the last meeting it was said that Revelstoke received as much for its water as other towns did but he would show that was not so. In Revelstoke hotels paid $8 per month for water less 20 per cent discount, in Vernon hotels paid $6 up to 15 rooms and 25 cents per room over 15 rooms, with no discount, so that a hotel with 55 rooms paid $16. In vernon steam laundries paid $15 per month, and $1 per month per horse power for engines over 5 h.p. He went on to state that the charges for butchers, breweries, etc., were unsatisfactory.

SYNOPSIS OF COAL MINING REGULATIONS.

Coal mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each applicant must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to the Agent or Sub-Agent of Dominion Lands.

Jag-ship of the Trent

(Among the astounding revelations of petty graft on the Trent Canal during the Liberal regime is the case of the government boat "Bessie Butler," which was used as a floating bar for joyous expeditions by the faithful.)

Hurrah for the "Bessie Butler,"
hurrah for her gallant crew,
As spick and span a little craft, as ever the Grit flag flew,
Whenever the "boys" got thirsty, and all their money was spent
They boarded the "Bessie Butler," the Jag-ship of the Trent.

The cargo she took was precious and they stowed it all below
Rum and whisky and lager, right down in the hold would go,
And never was crew so handy, with never a thought of care
And the tools they carried were corkscrews, and each man had a pair.

There was gin for the gallant captain, and beer for the ba'sun bold,
They spliced the main brace every hour, in the bar-room in the hold,
They sang and played the piano from eve until break of day,
And the theme of the song was "Stratton," and the chorus was "Laurier."

Hurrah for the "Bessie Butler," the boat so smart and trim,
Loaded with beer and "vittels," she did great work for Jim.
She did her duty nobly, no matter where she was sent,
The good old "Bessie Butler," the Jag-ship of the Trent.

Trade channels are variable and the law of supply and demand regulates the direction of the current. A few years ago the West depended on the East for its supply of eggs. Edmonton is now shipping eggs to Toronto.

HIGH SCHOOL SYSTEM

Ontario is awakening to the fact that its high school system is a failure, and that all these institutions must be transformed. Some of them are being turned into agricultural high schools and some into technical schools. There is a great awakening among the teachers. Here is a letter from a high school teacher in eastern Ontario, which is published in the Canadian Courier, and which reveals the fact that we do these things better in Vancouver: "Personally, I am much interested in agricultural and technical education, and am of the opinion that our government and the department of education, are not attacking the problem seriously at all. The high schools of this province are engaged in preparing girls for the teaching profession, a few boys for the 'learned' professions, and a few more for engineering and business. A large proportion drop out without any real preparation for anything and go to swell the number of bank clerks, etc. Very few enter any mechanical or technical trade or farming. Those who do enter the latter get no benefit from their education except the general benefit of mental training. The high school here is in the centre of a fine farming district, and the town possesses two good industries, yet this school is not catering to the needs of the community at all, and very few pupils benefit the local industries. This condition is true all over the province, and the consequent economic waste is incalculable. We are really trying to give the boy of the twentieth century the education of a mediaeval monk plus a smattering of the natural sciences and modern languages. The whole thing bears as much relation to the economic and social needs of our country as the Chinese alphabet does. The remedy lies in establishing agricultural and technical secondary schools, not only in the cities that can afford to pay for them, but in the towns and counties. These schools should be freed entirely from local control, and supported by the state. The teachers should be paid at least as well as the inside civil service, and should be hired, paid and stationed by the department. The municipal school boards have never done one single thing to advance education, and never will; economy and not efficiency is their only idea; and as long as it costs money for efficient teachers and well-equipped schools, the school boards will fight progress. I know what I say will not be agreed with by those who ring the changes on the 'humanities' and 'culture,' and who shout 'materialist,' when one talks of making education a training for earning one's bread and butter and for subduing nature to man's material needs. However, I hope to see some steps taken in the directions I have indicated before very many years. This subject is too large for a letter, and I am afraid you will not care to read all I have said."—World.

MAKES OLD PEOPLE STRONG AND WELL

We want to get the news to all old people about Rexall Olive Oil Emulsion, a remarkable new food-medicine which we firmly believe is the best remedy ever made to overcome the weakening, debilitating effects of increasing old age. It helps to rebuild wasted tissues, strengthen the nerves and give new energy and a lively feeling to the body. It contains no alcohol or dangerous drug. It may not make you feel better for a few days, but if you do not feel much better and stronger before you have taken a quarter as much as you have of other medicines that have not helped you, we will gladly give back your money.

Rexall Olive Oil Emulsion contains pure Olive Oil and the Hypophosphites which, though they have long been endorsed by successful physicians, are here for the first time combined. The result is a real body, nerve and blood-building food-medicine that we believe is superior to anything else in overcoming debility, weakness and liability to disease and to tone and strengthen the nerves and enrich the blood. You who are weak and run-down—you who are often troubled by various cold weather ailments, use Rexall Olive Oil Emulsion to get and keep well and strong. It is a sensible, pleasant-tasting aid to renewed strength, better spirits, glowing health. If it doesn't help you, come and tell us and we will give back your money without a word. That is how much faith we have in it. Sold only at the 7,000 Rexall Stores, and in this town only by us, the Bews Drug store.—$1.00.

Only a fool will neglect his family in order to pose as a public benefactor.

"Rod and Gun"

Rod and Gun for April is out with a bill of fare designed primarily for the fisherman. The cover cut, which this month is specially attractive, depicts a fisherman holding up to view a 17lb. prize salmon trout secured last year in Algonquin Park. Bonnycastle Dale contributes the leading article "Halibut Fishing in the Northern Pacific"; H. Martimer Batten a well illustrated article on—"Trout Fishing"; and other stories and articles follow that describe fishing experiences etc., in various parts of the Dominion from Atlantic to Pacific. Prof. Edward Prince, Dominion Commissioner of Fisheries and an authority on both fish and game, writes of "The Prong Horned Antelope of the West", which is said to be in danger of extinction unless immediate protective measures are adopted for its preservation. The regular departments are all well maintained.

Fortunately for the average man, few of his prayers are answered.

Mail Clerks Benefit

Western railway mail clerks are to receive a large increase in their salaries.

The secretary of the Manitoba Railway Mail Clerks- Association today received a wire from Postmaster-General L.P. Pelletier stating that an order-in-council was passed on Saturday giving the Western railway mail clerks the same living allowance as is given to other postal employees in the West.

This gives Western mail clerks a straight living allowance of $15 a month in addition to their salaries.

GILLETT'S EATS LYE DIRT CLEANS-DISINFECTS

ELECTORAL MAP OF B.C.

The redistribution committee of the House of Commons has prepared a tentative electoral map of British Columbia, showing the thirteen constituencies which will have representations in the next House of Commons. Some changes may be made yet, but on the whole the redistribution is likely to follow the lines laid down. Under the bill now before the House, British Columbia will receive six additional members.

Vancouver city will be given two members, to be elected at large. Another member will go to South Vancouver, consisting of the municipalities of South Vancouver and Point Grey. The present New Westminster riding will be divided into two. One of the new ridings will comprise the provincial constituency of New Westminster city and Delta and all that portion of the provincial electorial district of Richmond lying south of Burrard Inlet, excepting the municipalities of Vancouver city, South Vansouver and Point Grey.

The other district will be composed of the ridings of Dewdney and Chilliwack and all that portion of the provincial electoral district of Yale adjoining the provincial electoral districts of Chilliwack and Dewdney, bounded by a line commencing at the southeast corner of the provincial electoral district of Chilliwack thence easterly along the international boundary to its point of intersection with the westerly boundary of the provincial electoral district of Similkameen, thence northerly following the said last mentioned boundary to the northeast corner of provincial electoral district of Similkameen, thence in a straight line westerly to a point on the north bank of the Fraser river, one mile east of the village of Yale, thence following a straight line to the northeast corner of the provincial electoral district of Dewdney.

The present constituency of Kootenay will be divided into East and West Kootenay. East Kootenay will comprise the provincial ridings of Cranbrook, Fernie, and Columbia. West Kootenay will comprise the ridings of Nelson City, Ymir, Rossland City, Slocan, Kaslo and Revelstoke.

Victoria City riding will remain practically as it is today. Nanaimo also will be about the same, consisting of the ridings of Cowichan, Esquimalt, Nanaimo City, Newcastle, Saanich and the Islands.

A seat called Skeena will consist of the provincial ridings of Skeena and Atlin.

Yale-Cariboo will be divided into two seats. One will consist of the provincial ridings of Cariboo, Lillooet, Kamloops and Yale, excepting that portion of Yale contained in the electoral district of Westminster district as the same is above described and including the whole city and district municipality of Salmon Arm.

The other will consist of the electoral districts of Okanagan, excepting any portion of the city or district municipality of Salmon Arm, which may be contained therein and the provincial electoral districts of Similkameen, Greenwood and Grand Forks.

The thirteenth seat has not yet been named, but will consist of the ridings of Alberni, Comox and all that portion of the provincial electoral riding of Richmond, thence in a southwesterly direction to the mouth of the east branch of the Squamish river at the head of Howe Sound, thence in a southerly direction along the easterly shore of Howe Sound to Burrard Inlet.

GUARANTEED RELIEF FROM ALL BOWEL ILLS

If your bowels are out of order, instead of using some harsh salt or other physic, take a Rexall Orderlie tonight, and tomorrow you will feel great. They taste good and act so easily that there isn't a particle of griping or purging, nor the excessive looseness that follows the taking of salts and most pills. They soothe and strengthen the bowels, promptly relieving the constipation, making it unlikely to occur again.

We don't believe there is any other bowel remedy anywhere near as good and at the same time so easy and pleasant to take as Rexall Orderlies. We know you will agree with us and believe you will thank us for telling you about them. If they don't satisfy you in every way, come back and tell us and we will give back your money without a word or question. You have no reason to hesitate when we give you the opportunity, as we hereby do, to try them at our risk. In vest pocket tin boxes; 10c, 25c, 50c. You can buy Rexall Orderlies only at The Rexall Stores, and in this town only of us, the Bews drug store.

Premiers Take Up Immigration

Ottawa.— Sir Richard McBride, Premier of British Columbia, and the members from British Columbia had an important conference with Premier Borden, when the whole question of Oriental immigration was thoroughly discussed with a view to working out a permanent solution of this vexatious problem. Sir Richard submitted to the Premier the attitude of British Columbia, pointing out that the province was practically a unit in favor of total exclusion.

He took special pains to point out that they did not want to take any action which would be offensive to the Oriental countries to heap indignities on their Asiatic neighbors. They looked at the question purely from an economic and national stand point. They claimed that it was utterly impossible to assimilate the Asiatic and without assimilation a sound Canadian nationality could not be built up.

It is understood that the conference reached no definite conclusion. The various international and Imperial aspects of the problem were discussed and a number of suggestions were made. One was that a conference of all the Overseas Dominions who were interested in the problem be called. This was regarded as hardly feasible. At the conference, Sir Richard made the following state ment to your correspondent.

"I am very hopeful that in a short time the whole situation will be treated from a national standpoint in a manner acceptable to all the parties interested."

There was incidentally discussed the question of extending the Order-in-Council, which expires on March 31, which excludes all artisans and laborers from British Columbia ports No order has yet been made but it will likely be extended for another six months.

Probs for the north coast of Ireland—unsettled.

There is nothing dearer to a man than a good wife, and very little that is more expensive.

CITY COUNCIL

(Continued from Page One.)

and also the charges for rooming blocks. The question of tapping mains was also unsatisfactory, in fact the city was "scabbing" in this connection.

Ald. Bourne said he had repeatedly drawn attention to that anomaly. Main connections cost from $8 to $10 and were charged at one or two dollars. Then they wondered where the money went.

Ald. Needham said there were many inconsistencies in regard to the charges and the bylaw committee should go into the matter.

It was stated that the Bylaw committee was considering these points.

Ald. Needham said the present system was not fair; the charges to householders, generally speaking were fair, but other charges were not equitable. Pipes of different capacity were put into various buildings and so on.

Ald. Bourne said if big pipes were put in owners had the benefit of reduced fire insurance rates, but the city had to bear the cost of the connections.

CITY SOLICITOR.

Ald. McSorley brought forward the matter of the appointing of a city solicitor, stating that apparently pro gress in regard to bylaws was hung up owing to the need for legal advice.

The Mayor said it would be necessary to appoint a city solicitor.

Ald. Bourne said if the appointment was to be made the earlier it was done the better.

Ald. Pradolini—We don't need one just yet.

Ald. Needham—No.

The matter dropped after it had been suggested that it should be referred to the Finance committee for consideration.

This concluded the business of public interest.

B.C. LAND THROWN OPEN

Eighty thousand acres of land adjacent to the Grand Trunk Pacific Railway, which is to be completed from ocean to ocean on April 10th, a large proportion bordering on the railroad, will be opened to pre-emption in the valley of the South Fork of the Fraser River in June, according to an announcement made yesterday by the Hon. Wm. R. Ross, Minister of Lands.

When the work of building the Grand Trunk Pacific Railway was begun this valley, which contains a large amount of agricultural land, favorably situated, was placed in reserve. In 1907 a reserve was created under which a stip of six miles covering the valley was reserved for pre emptor. Now that the railroad is completed the agricultural lands are being opened to the settler.

The land being opened to settlement is in two parts the eastern half stretching on either side of McBride, the young city 90 miles from the eastern border of the Province, where a divisional point has been created, car shops, large yards, etc., are being built, and a city is in its infancy. The western half stretches from Willow Station on the G.T.P., not far east from Fort George to join the other part of the tract.

The lots in the eastern half will be opened to entry by pre-emption at McBride on June 1st at 9 a.m., a special office being opened there by the Land Commissioner of the District for one week in order to give those who seek a homestead there an opportunity to file their recocds at the nearest city to the land, and after a week records will be made at the office of the government agent for the district at Fort George. The lots in the western half will be opened to entry by pre-emption on June 15th at 1 a.m. at the office of the government agent at Fort George.

McBride, where the lots in the eastern half will be opened for a week, beginning at 9 a.m. on June 1st, was the first townsite laid out in the district, and the first postoffice in the district was created there. It is a bustling young town, and, as it is in the heart of the agricultural land, is expected to become a great centre. It is 145 miles from Fort George, 90 miles from the eastern border of the Province, 345 miles from Edmonton.

The town, named in honor of British Columbia's Premier, is both the passenger and freight divisional point, and a large amount of money has been expended by the railway company to make preparations for the future, all its construction being of a large type. The yards cover eight miles, and the station, yards roundhouse, shops, etc., are the larg est between Winnipeg and Prince Rupert. The G.T.P. have a hospital and there are a few permanent buildings, the number of which is being increased. There are some rooming houses and three or four well stocked stores.

The valley of the South Fork of the Fraser in which the large area of land, set aside when the railroad was begun and held until transportation facilities were provided for the pre-emptor, varies in width from one to two miles in its upper part at Tete Jaune Cache to five miles at McBride, six at Goat River and about ten miles at the Canyon. It lies at a mean altitude of 2250 feet above sea level.

The main industry of a great part of the valley, other than farming, will be lumbering, and this should reach considerable proportions. There is a large amount of good timber, and the lumber mills built to handle it, together with the towns along the railroad between Fort George and Mount Robson Park, which. before long will prove a great tourist resort reached from the west through this valley, should prove a ready market for farm produce from this district. A large mill with maximum daily capacity of 100,000 feet has been built by the Upper Fraser River Mills Company at Mile 142, near Dome Creek. Another big mill is projected for Mile 128 and a number of other sites are being sought for mill purposes.

A pamphlet descriptive of the district, with special maps showing the various lots which will be available for pre-emption in this valley in June, is now being prepared and will shortly be issued by the Department of Lands.

To land in jail for taking things easy, that is the irony of fate.

A bad memory is a cheerful liar's nightmare.

The promoters of a floral show in a little Oregon town are undecided whether to call it a blaze of bloom or a blooming blaze.

The immense popularity of rural mail delivery is apparent in the demand for rural mail service from all over the Dominion. Last year six hundred new routes were opened, with 22,250 boxes, and up to November last there had been established 1865 routes in all.

BRITISH PROGRESS IN AVIATION

History may be searched in vain for a record of progress which can be compared with that established by aviation in 1913. Feats have been accomplished before which the performances of motorists in the early days of the motor car boom pale almost into insignificance. The year now passing has proved particularly favorable to aviation. Exceptional spells of calm weather have aided aviators in ganing a wider knowledge of the medium in which they are working, and a fuller confidence in their own powers.

Great Britain, of all countries, may look with favor upon the development of aviation, for although few, if any, records have been placed to her credit in the past year, the British manufacturer has gained world-wide confidence as a builder of trustworthy machines. British Service pilots, too, both in the military and naval wings of the Royal Flying Corps, have demonstrated that they are second to none in daring and prowess. Too much stress, in fact, cannot be laid upon the remarkable work being accomplished in silence daily by members of the Royal Flying Corps. Captain Longcroft's recent non-stop flight from Montrose to Portsmouth, and back to Farnborough, a distance of over 650 miles—by far the most remarkable flight yet accomplished in this country—is but the best of many nearly equal in merit that have been undertaken in all weathers by soldiers and sailors. How popular aviation is becoming among members of the Services may be guaged by the fact that 24 out of 25 of the pilots' certificates awarded last month were gained by officers and non-commissioned officers of the Army and Navy. A Britisher, C. P. Pizey, has been recently appointed chief of the Flying Corps of the Greek Navy.

REMARKABLE RECORDS

Amongst the feats accomplished during the year, and given official recognition, have been a flight of 250 kilometres in less than two hours and two minutes, by Jules Vedrines, a flight of 250 kilometres with four passengers by F. Champel in a little over three hours and one minute and the attainment of a speed of 126½ miles per hour over a measured circuit by M. Prevost. An altitude climb of 30,295 feet by M. Legagneux has yet to receive official recognition. The only world's records credited to Great Britain by the International Aeronautical Federation are Captain C.A.H. Longcroft's feat of carrying a passenger 286.72 miles without alighting, and Mr. Louis Noel's flight of 17 minutes 25 2-5 seconds with seven passengers. The latter feat, however is improved upon in the British records by the same aviator's flight on October 2, with nine passengers for a period of 19 minutes 27 seconds. Other British records established during the year are:

Height—11,450 feet: H.G. Hawker.

Height—With one passenger, 12,000 feet: H.G. Hawker.

Height — With two passengers, 10,600 feet: H. G. Hawker.

Height—With three passengers, 8,400 feet. H. G. Hawker.

Feats not classed as records, but worthy of notice, include the flight of 200 miles by Baroness de la Roche, the winner of the Femina Cup, a flight of 1250 miles in twenty-four hours by Victor Stoffler, and the flight of Vedrines, just concluded, of over 3500 miles over country in Europe, Asia and Africa. H.G. Hawker's attempt to cover a "circuit of Britain,' with a hydro-aeroplane fitted with an English engine, although unsuccessful, stands as the finest performance with the new type of aircraft. The increase of confidence amongst aviators is strikingly demonstrated by the number who are anxious to emulate such daring performances as those introduced to the public by M. Pegoud. Nearly a dozen men are now giving exhibitions of the looping the loop character.

BRITISH ADVANCE.

Record breaking and fancy flying are not taken very seriously by British aviators. They are mainly engaged today upon the more serious work of studying the peculiarities of the air currents in different parts of the kingdom and in testing devices likely to be of value in the defence of these lands. The attention they are giving to the hyfro-aeroplane is calculated by aerial experts as likely to secure for British manufacturers the ultimate pre-eminence in what is regarded by many as the most useful of all air craft. The Dunne stable aeroplane, which has created a sensation wherever it has been flown, is quoted as a typical British product. The English engine, which has long remained under a cloud, has at last gained the recognition which it deserves.

Aeronautical experts are confident that if the recent progress continues the coming year may possibly witness a Transatlantic flight and the introduction of cross-country and cross-Channel passenger services upon the aeroplanes of high capacity.

HOLD-UP SUSPECT

Arrested at Calgary

Deputy Chief of Police McRae accompanied by Special Agents Lee Tignor and Charles McShane of the Great Northern Railway arrived in Vancouver, having in custody Geo. Ball, alleged to have been one of the bandits, who on the night of February 20, held up a Great Northern train at Samish, Wash., and murdered the three passengers who opposed them.

Ball, who is a sharp featured man with an alert manner and shifty glance, denied any knowledge of the crime, and declares that he can prove beyond a shadow of a doubt exactly where he was on the night of the hold-up.

Deputy Chief McRae is certain—"as certain as can be without absolute proof"—that Ball is the man. His picture, shown to various persons who were passengers on the train, since he was suspected, has, it is said been identified in almost every case without hesitation.

Messrs. McShane and Tignor, acting on information furnished by the local department to Chief Special Agent A. G. Ray, started to look for him in the vicinity of Calgary, Deputy Chief McRae stopped off on his way to Edmonton and showed a picture of the wanted man to the police officer of that city. The Special agents of the railway company followed Ball from Kamloops to Revelstoke, and from there to Calgary. Three hours after their arrival in the city the man was in custody, having been arrested by an inspector of police.

The two train robbers and murderers, Harry Matthews and George E. Ball, wanted by the police authorities for the hold-up of the Great Northern train at Samish station, near Bellingham, on February 29 last and who murdered three passengers on the train, have been in Victoria and have been under arrest. This fact is shown by the records of the local department.

Matthews and Ball, under the respective aliases of Tim Binning and Harry Wade, were arrested by Detective Perdue and Constable Harper on August 18, 1907, on a charge of having stolen a quantity of goods from the Queen's Hotel here. Matthews, or Binning as he was then called, was convicted and sentenced to four months in jail. Ball, then under the alias of Wade, was acquitted.

The man Lacroy, who is now in the Vancouver jail awaiting trial for an attack upon a policeman, has made a confession that his companion in that crime was Matthews, who fired and later turned up as one of the train robbers. Lacroy, who has given what information the police now possess of the train robbers, is a native of Winnipeg and also has a Victoria record. On February 9, 1912 he was arrested by Detective Heather on a charge of stealing a purse, but he was acquitted, the evidence not being conclusive.

The Great Northern Railway is offering a reward of $30,000 for the arrest and conviction of Matthews and Ball, both of whom, judging by their criminal records not only in Victoria but elsewhere, are a pair of desperate characters.

The press dispatches telling of the tracing of the identity of the desperadoes, through a confession made by a man confined to one of the Victoria hospitals, is incorrect. It is Lacroy who told the police of the train robbers, but his statement mentioned having been in Victoria with Matthews, some time before the train robbery and before his arrest in Vancouver. He tells of one or two crimes which the police assert were never committed though other portions of his statement indicate that the two were here within the past few months

Great Railway Tunnels

The world's great tunnels are to be found in Europe, and a brief summary of these in the "Engineer," shows that the greatest is the Simpon which is 12¼ miles in length. Two the St. Gothard and Lotschberg, are over 9 1-3 miles in length. The Mont Cenis is a little over 7 miles in length. The Arlberg in Austria, is 6¼ miles long. There are four tunnels between five and six miles in length, five between four and five miles in length, seven between three and four miles and sixteen tunnels that are over two miles long. The longest tunnel in the United States, the Hoosac is four and one-third miles long.

Build Concrete Barns and Barnyards

YOU will find that they are best at first and cheapest in the end.

Concrete buildings cannot burn and many dollars are saved in lower insurance rates. They need practically no repairs and never need painting.

Concrete barnyards make the best kind of a feeding-floor and save many dollars in feed bills, as your stock gets every particle that you feed to them.

Send for this free book "What the Farmer Can do With Concrete." It shows just how to build your own concrete barn, feeding-floor or any other building that you may need.

For Beautifying Your Hair

The Ladies in this Town are Simply Going Wild over Harmony Hair Beautifier. And no wonder, because to make the hair lustrous, soft and silky we believe there's nothing else—and we sell about all the various hair preparations made—that anywhere near comes up to Harmony Hair Beautifier.

Ask any one of the many women in this town who use it—she'll tell you she "loves" it. Just look at her hair, and you'll come to us and get some yourself.

HARMONY HAIR BEAUTIFIER

Is just what its name implies.—Just to make the hair glossy, lustrous, more beautiful.—Just to make it easier to dress, and more natural to fall easily and gracefully into the wavy lines and folds of the coiffure.

It leaves a delightful fresh and cool effect, and a lingering, delicate perfume. Will not change or darken the color. Contains no oil; therefore doesn't leave the hair sticky or stringy. Simply sprinkle a little on your hair each time before brushing it. But first, make sure that your hair and scalp are clean, by using

Harmony Shampoo

—A liquid shampoo to keep the hair clean, soft, smooth and beautiful. It gives an instantaneous, rich, foaming lather, penetrating to every part of the hair and scalp. It is washed off just as quickly, the entire operation taking only a few moments. *It leaves no lumps or stickiness.*—Just a refreshing sense of cool, sweet cleanliness.—Just a dainty, pleasant and clean fragrance.

—Both in odd-shaped ornamental bottles, with sprinkler tops.

Harmony Hair Beautifier, $1.00. *Harmony Shampoo*, 50c.

Both are guaranteed to please you, or your money back.

These Stage Beauties Endorse Them

There is no class of women who know better how to discriminate in the use of things to make them more beautiful than actresses. Among the many celebrated stage beauties who use and enthusiastically praise both Harmony Hair Beautifier and Harmony Shampoo are:

ETHEL BARRYMORE
Star in "Tante," Empire Theater, New York.

ELSIE FERGUSON
Star in "A Strange Woman," Lyceum, New York.

LOUISE DRESSER
Star in "Potash and Perlmutter," G. M. Cohan Theater, New York.

LAURETTE TAYLOR
Star in "Peg o' My Heart," Cort Theater, New York.

NATALIE ALT
Star in "Adele," Longacre Theater, New York.

ROSE COGHLAN
Star in "Fine Feathers," now touring the United States.

B.C. TIMBER ROYALTY BILL

U.S.A. Eulogy

A Washington letter to a number of newspapers in the United States, prints the following relative to the recent Timber Royalty Bill passed at the last session of the Legislature:

"The Canadian Province of British Columbia is showing the way to all other governments in the matter of doing things for the common people. The B.C. Legislature passed a law introduced by the Minister of Lands, Hon. Wm. R. Ross, which assures to the citizens of that Province an income within ten years of three millions of dollars a year from royalties on publicly-owned timber. This act, according to information which comes to interested public men in Washington, does for publicly-owned timber in British Columbia, what the conservationists, under the leadership of Gifford Pinchot, have been trying to secure for the people of the United States in the matter of this nation's water powers.

"The act retains in the Provincial government, for the people, the fee simple title to all timber lands, it permits the taking of timber claims one mile square at an annual rental of $120 per claim, and for the payment to the government of a stumpage price which rises gradually with the increased value of timber. Under the old act of 1905, the stumpage price per thousand feet was 50 cents. The new act increases it to 75 cents a thousand feet, effective in 1915 and provides that five years later there will be added to the royalty price 25 percent of the increased value of lumber at that time above a minimum price of $18.00 per thousand each five years thereafter the same thing will be done again, the percentage taken by the government to increase gradually from 25 to 40 percent, the whole arrangement covering a period of about 40 years.

This means, first, that the lumbermen get a reasonable profit out of their operations—the government takes nothing unless the price is above $18.00 a thousand. It means further, that the government, the people, share in the increased value of their timber. It establishes a great profit-sharing, co-operative principle, in which the government and the timber operators are partners. The government retains the title to the land and the right to prescribe the way in which the timber shall be cut. The people's interest is protected, and at the same time lumbermen are encouraged to take up holdings and develop the timber industry.

"The great lesson for the United States in this B.C. Royalty Act lies in the recognition by the Provincial government that the people should share in the increasing value of their own property—a principle which American conservationists under the leadership of Pinchot, have been and are fighting to have enforced in the development and use of public water-powers in the United States."

STOMACH HEALTH—OR NO COST TO YOU

Very likely others have advised you to use Rexall Dyspepsia Tablets, because scores of people in this community believe them to be the best remedy ever made for Dyspepsia and Indigestion. That is what we think, too, because we know what they have done for others and what they are made of. We have so much faith in them that we urge you to try them at our risk. If they don't help you, they won't cost you a cent. If they don't do all that you want them to do—if they don't restore your stomach to health and make your digestion easy—just tell us and we will give back your money without a word or question.

Containing Pepsin and Bismuth, two of the greatest digestive aids known to medical science, they soothe the inflamed stomach lining, help in the secretion of gastric juice, check heartburn and distress, promote regular bowel action, and make it possible for you to eat whatever you like whenever you like, with the comforting assurance that there will be no bad after-effects. We believe them to be the best remedy made for dyspepsia and indigestion. Sold only at the more than 7,000 Rexall Stores, and in this town only at our the Bews Drug Store. Three sizes, 25c, 50c and 1.00.

As a newspaper man George P. Graham owes an apology to his confreres of the press for making that seven-hour speech.

There is at least one aggressive and resourceful campaigner in the Montreal mayoralty contest. In the intervals between bouts at a wrestling match he jumped over the ropes and made a speech to the assembled sports.

WATER NOTICE

Application for a license to take and use and to store and pen back water will be made under the Water Act of British Columbia as follows:

(1) Name of applicant, Selkirk Power Company, Limited.

(2) Address of applicant, In care Ridley Macrae and Tobin, its solicitors, 509, Bank of Ottawa Building, Vancouver, B.C.

(3) Stream, Akolkolex or Isaac Creek.

(4) The water is to be diverted from the stream on the south side about two thousand four hundred feet upstream from the Northern Boundary of L.S. 16, Section 26, Tp. 21, R. 1, West of 6th Meridian.

(5) The purpose of water will be production of power.

(6) The land on which the water is to be used is described as follows:—Power house on or about L.S. 16, Sect. 26, Tp. 21, R. 1., West of 6th Meridian, being a fall of 410 feet more or less from point of diversion.

(7) Water applied for, 100 cubic feet seconds.

(8) Water to be stored is 23000 acre feet, area 400 acres more or less

(9) Reservoir site is located about 2400 feet upstream from Northern Boundary of L.S. 16, Sect. 26, Tp.21 R.1, West of the 6th Meridian.

(10) This notice was posted on the ground on the 28th March, 1914.

(11) A copy of this notice and an application pursuant thereto and to the requirements of the "Water Act" will be filed in the office of the Water Recorder at Revelstoke, B.C.

(12) Territory in which power is to be used is in and about the district known as East and West Kootenay.

Selkirk Power Company, Limited,
W. Bowden, Director,
Applicant.

1st appearance 1st April, 1914.

Objections may be filed with the Comptroller of Water Rights, Victoria, B.C., or Water Recorder, Revelstoke, B.C., within 30 days of this date.

Petition for the approval of the undertaking will be heard in the office of the Board at a date to be fixed by the Comptroller of Water Rights. Apr. 18.

NOTICE

And further notice is given that a meeting of the creditors (if any) of the Company will be held at the offices of Harvey, McCarter and Company, Imperial Bank Block, Revelstoke on Monday, the 5th day of April, 1914, at 2 o'clock in the afternoon and that all creditors of said Company are required to send on or before said 5th day of April, 1914, to Harvey, McCarter and Company, Revelstoke, B.C., Solicitors for the undersigned Liquidator, their names, addresses and particulars of their claims.

Dated this 20th March, 1914.

FREDERICK E. SINE,
Apr. 1st Liquidator.

Hon. William Pugsley is back in parliament again. Now get ready for the fireworks.

Calgary cannot have the new Dominion telescope because its atmosphere is unsteady. Here's the strongest argument for total prohibition the temperance people have yet had handed to them.

A RAILWAY SCOUT

A railway scout built on the lines of a baseball scout for the big leagues, is the latest innovation on the Canadian Pacific Railway. In announcing the proposal today, Mr. F. E. Trautman, publicity commissioner of the company, said:

"It unfortunately happens in large organizations that many deserving employees remain stationary instead of advancing in the service on account of their environment or owing to not coming under the purview of those who recommend men for promotion. With a view to bringing the management in as close personal touch as possible with all the men employed on this vast transportation system, a new arrangement has just been inaugurated by those conducting the company's business. Under this system, the officers will be required to make reports twice a year, in June and December, on the service rendered by every officer and employee under his immediate jurisdiction. In this report an account will be given of an employee's disposition attention to business, loyalty, zeal, and particularly of the tactful and courteous manner with which he deals with the patrons of the company. Realizing that fairness and courtesy are one of the greatest assets in the success of any company, greater stress will be laid on the degree in which that qualification is possessed.

"It has been made a rule, however, that should an officer find it necessary to make any adverse comment on the services or qualifications of an employee, that employee must be called in and shown the report and instructed to initial it with any comment he may wish to make. This report will go ultimately to the vice-president. Unfortunately, human nature is not perfect and this means is being adopted to prevent any possibility of a man being 'knocked' without his knowledge.

"In addition to these reports a gentleman who is a good judge of human nature, of kindly disposition, whose name has not been divulged to the staff, has been selected who will travel over the road as a passenger, and in that capacity or as a shipper or consignee will come into continual contact with the various employees and his instructions are to look for the good points in employees and to draw attention to, and send in the names of any of the staff whose courtesy, zeal, loyalty, ambition and knowledge marks them out as above the ordinary and likely material for advancement.

"In any large concern today one of the chief and possibly the principle concern of those in charge is finding suitable men for the openings which are continually occurring and it is thought by the vice-president of the Canadian Pacific Railway that by inaugurating such a system it would prevent the overlooking of deserving men and to be the means of bringing to notice men in the various grades of the service who are fit for and deserving of better positions.

"There is probably no service in the world with the chances of promotion and advancement to men of the right type greater than the railroad service, but the trouble is to find these men and then bring out the best that is in them. The sending of a man over the road to look out for material is something like the system adopted by all the major league baseball clubs who send out scouts over the road to visit the games of the different baseball leagues for no other reason than to pick out men who will be their first-class players later on."

Pays 2,500 Per Cent

The Colonial Diamond Mining Company of German Southwest Africa is possibly the world's biggest dividend payer. It has reduced its 1913 dividend by 1300 to 2500 uer cent., having paid 3800 for 1912. In 1910 2400 per cent. was paid and 2500 in 1911.

The company's capital is $2500. Its managing director and chief shareholder was once a humble railway official named Satuch. He will soon be made chairman of the German imperial diamond administration.

The new postoffice regulation prohibiting the mailing of coins or currency in an unregistered letter is likely to prove a dead letter. How is the department to know whether the letter contains a bank note or a sample of dress goods?

MORE SCHOOL TEST GEMS

School Compositions

FIRST READER, CLASS A, SELKIRK SCHOOL.

"SAVED"

Once there was a dog on a boat. There was a girl on the boat too.

Once the girl got sick and the rest of them ate their supper. The girl went outside. A little while after she got sick worser and fell off the boat into the water. It was late in the night. Nobody came to help her. At last the dog came and saw the girl in the water.

He jumped down from the boat into the water. He caught the girl's dress with his teeth. He dragged her to the wharf. And when he got there he was tired from his long journey. The girl was glad when she got home.

Rose Frey.

One day a boat was going up the river. A little girl fell off and a dog jumped off too, and saved her. They were on the pier all night. In the morning a boat came down the river and stopped at the pier.

The man knew this and took them safely home.

D. Blair.

"POPPING" IN VERSE.

James O. Baldwin, husky lad, wants to marry, very bad. He is 50, six feet, strong—lived at Caldwell, Jersey, long. Couldn't find a wife at home, so he sings this little poem:

"Wanted—Wife to clean and scrub, mend my socks and cook the grub. Must be handsome, bright and gay—32 if she's a day. Widow women not deterred—one kid, maybe, none preferred. She must have some cash to spend; an intellect with learned trend She must be a music lover; fond of me, and nary other. That is what my wife must be—lum-te-dum-te-deedle-dee."

Every time a woman attempts to work off a ten word compliment on a man she is sure to spoil the effect by transforming it into a serial story.

SHILOH CURES COUGHS & COLDS

LOCAL and GENERAL

F. J. Bossley of Solsqua, is in town on Business today.

The W.C.T.U. will meet at the home of Mrs. Jones, McKenzie avenue, on Friday afternooo at 3:30.

Mr. W.H. Edwards, 35 Second St., undertakes the mounting of Bear skin rugs and the cleaning and dressing of furs.

Keep the evening of May 24th free for the dance to be given in the Masonic Hall by the ladies of the Hospital Guild. Further particulars later.

Mr. J. H. Curtis is starting in the transfer business, and orders may be left for him at the Kootenay Agencies, which will receive his prompt and personal attention.

Mr. Jones of Vancouver, the acting inspector of the Mountain Division of the C.P.R. telegraphs, who is relieving Mr. Geo. Wady, at present away on leave, is in town, accompanied by Mrs. Jones.

An enjoyable evening was spent, when Mr. and Mrs. T.B. Philip entertained about forty of their friends at their residence on Second street. The time was spent in dancing. Lovely music was rendered by Miss Jennie Cashato, Messrs. C. Moller, F. Wiesner and W. Armitage. Dainty refreshments were served by Miss Nyustrom, Mrs. Bishop, Mrs. Moller and Mrs. Bent, after which dancing continued intil a late hour.

"The Bishops Carriage" in motion pictures will be run at the Empress theatre Saturday afternoon matinee, 2:30 p.m. and 6:45 starting the first show at night, with three performances. "The Bishops Carriage" is played by the Famous Players, a new company, and the best in the motion picture business. The leading lady is Miss Mary Pickford, who is the greatest actress ever shown on a screen, Saturday only.

WIRELESS TELEPHONE PROBLEM

Signor Guigielmo Marconi, who has been conducting experiments with wireless telephony, has gone to London. The naval officers who assisted him in his experiments are convinced that he has completely solved the question of radio-telephony. They say that Signor Marconi in his experiments did not use any special apparatus. The existing aerographic installation served his purpose with slight modifications. One of these was a new receiver of his own invention, including a microphone, which is essentially different from all others

Signor Marconi's improved high-sounding receiver with a dictaphone arrangement, which has now been adopted in radio-telegraphy, can be employed in wireless telephony to such an extent that the human voice can be clearly heard by everybody present in addition to the operator. Communication was maintained with the slightest energy day and night with ships 15 miles away and 15 miles apart. In spite of the intervening loud sounds, whatever is said is invariably clear. Distance, instead of diminishing, increases this clearness.

Atmospheric perturbations affect aerophony considerably less than aerography, and hence if the energy is sufficiently increased wireless telephony is possible at any distance. Signor Marconi has confided to his friends here that he will shortly aerophone across the Atlantic.

EMPRESS THEATRE PROGRAM

Wednesday— King The Detective, in two parts. With King Baggot; The Dramatic Story of the Vote; The Joy Riders.—Empress orchestra.

Thursday—From Railsplitter to President, in two parts. With Francis Ford; Jewels of Sacrifice; Teaching Dad a Lesson. Empress orchestra

Friday—Governor's Veto, in two parts. Fine Eclair Feature; Jimmies Deception; Seymour Hicks Dancing Film. With Special Music. Empress orchestra.

Saturday, April 4th, and Matinee at 2:30—In the Bishops Carriage, in four parts. First Greatest of all feature films, with Mary Pickford, and the famous players; Universal Weekly No. 102. Empress orchestra.

All Famous Players Productions at the rate of one a week.

The apple is blamed for the original downfall of man, but the peach and banana skin are responsible for many of his modern misfortunes.

EASTER LINEN SHOWER

The ladies of the Hospital Guild will hold their annual linen shower at the Hospital, on Saturday afternoon, April 11th, from three-thirty to six o'clock, Afternoon tea will be served by the ladies, to which all are welcome.

With the new hospital building and the increased accommodation come increased demands on all the various supplies. At this time the linen closets need replenishing. One who has not actually looked into the matter would be astounded at the amount of bed linen alone, that is required in an institution of this size in even one day.

Donations of linens of any kind will be most thankfully received, but the presents needs call particularly for—100 pillow slips (21 inches wide); 100 Bath towels; 100 Linen towels.

The ladies of the Guild hope that this appeal will meet with the usual generous response from the citizens.

Selkirk School Roll of Honor

Monthly Roll of Honor, Selkirk School, March, 1914:

Receiving Class—Albin Norburg, Ruby Rutherford, George Singer. Honorably mentioned:—Annie Tevini, Eva Carmichael, Elmer Hansen, Emma Rowlett, Reginald Manley and Irvenna Porter.

TIMBER MARKET

With a view to securing better and larger markets for British Columbia timber a movement has been inaugurated by the Forestry branch of the Provincial government to have the trade commissioners make a study of the local product in relation to the needs of the markets with which they may be connected.

Correspondence has already passed between the Hon. W.R. Ross, Minister of Lands, and the Hon. Geo. E. Foster, Minister of Trade and Commerce for the Dominion on the subject, and as a result of the interchange of views it is believed that satisfactory arrangements may be made which will result beneficially to the lumber industry of the province.

It is claimed by the department here that trade commissioners located in the various parts of the world and intimately connected with the requirements of the lumber market may be of inestimable value to the industry. Already it is the business of these officials to make returns regarding trade in general and how new channels might be profitably opened up, but so far as lumber is concerned little has been accomplished, and it is with the idea of making lumber one of the leading issues of the office of trade commissioners that the present movement has been inaugurated.

There is every evidence, both here and elsewhere, as to the excellence of the British Columbia product, according to the reports of departmental officials and others interested in the timber development of the province, and it is asserted that with the dissemination of knowledge as to its merit will come new demands for supplies. Already an effort has been made to introduce British Columbia lumber in South America through the Canadian trade commissioner at one of the leading centres, and it is stated on the authority of the Minister of Trade and Commerce for the Dominion that there is a big field for it in Australia and New Zealand.

Y.M.C.A. Weekly Notes

GYMNASTIC EXHIBITION

Friday, April 3rd will be a banner day in Revelstoke, The Y Exhibition is an event to which all look forward.

This year the exhibition will be just as good as former years and that is saying quite a lot.

Dicklett Groundscraper the greatest living clown will arrive on the night of April 3rd in time for the big show

He will also assist in pulling Sir Herr Von Dewdropsome up to the ceiling, when Sir Herr Von will make his wonderful dare-devil hair raising dive from the ceiling to the floor positively without breaking is neck.

In addition to this there will be a good game of volley ball played by the Can't-be-beats, vs. Always-wins.

There will also be drills, Human Pyramids, and say, I nearly forgot the ghosts. If you never seen ghosts walk before you will see them on Friday evening. No matter who yer bee, kum along and bring yer gurel, and if you are so fortunate as not to have one, borrow someone elses for the night.

You should pay an extra two bits to see Si Punchum, the celebrated, most famous, most wonderful, cowpuncher, I mean bag puncher ever seen before.

The performance starts promptly at 8 o'clock, those who come after that time will miss part of the program.

Watch out for the free street parade which leaves the Y at 7:30. Admission to the exhibition will be 25c. for everybody.

Weekly Gun Club Shoot

The next weekly shoot will be shot under the new Telegraph System; Kamloops, Vernon, Armstrong, Sicamous and this Club will shoot in the league. The highest of the three high men from each club will be taken, this will be published every shoot, and at the end of the season the club making the highest score will be declared the winner, and will be awarded a fitting trophy.

THE ROYAL SHOE STORE HOWSON BLOCK

In view of the very considerable amount of public attention that has been given to the great 6-foot reflecting telescope to be erected by the Dominion government, the following letter from Mr. Bennett, M.P., to the Calgary Board of Trade will be read with interest: "The chief astronomer, in writing me regarding the selection of Calgary for the erection of a new telescope says: 'While the first meteorological requirement, the prevalence of fine weather and the absence of clouds, is well fulfilled at Calgary, it has been found by observational tests made at Medicine Hat and Banff (as typical points) that, with apparent clearness, there may be an unsteadiness in the atmosphere which seriously interferes with telescopic definition. This unsteadiness is probably connected with the large range of temperature from day to night and during the night,' which prevails generally to the East of the Rocky Mountains. As this unsteadiness would prevent the best use of the telescope, we have been looking for a place where the temperature conditions and the atmospheric conditions there with are better.'"
