WINNIPEG, Dec. 18.—Mr. F. T Griffin, C. P. R. land commissioner, has wired the Montreal offices of the company that from an exhaustive report received from the West, and made up by the railway and milling people, he found the crop of 1907 was valued at $20,000,000 more than that of 1906.

CANADA'S CLIMATE

Perfect Summer and Autumn Weather

OTTAWA, December 17.—In an address before the Canadian Club on Saturday, Mr. R. F. Stupart, director of the meteorological offices, Toronto, gave a comprehensive description of the climate of Canada. He said that while Europeans thought Canada was a northerly country, Ottawa was further south than Venice; Toronto was 550 miles south of London, and Winnipeg about 100. The mildest winters in Canada were in Southern Alberta. Of the country lying between Lakes Athabasca and Slave and Hudson Bay, Mr. Stupart was dubious as to whether it would ever be used for agricultural purposes. At Fort Churchill the mean temperature o June was no higher than that of Macdhod for April, and the mean for July was not as high as on Mackenzie river at the Arctic Circle.

Among other items in the address were statements that one inch of rain means 72,000 tons per square mile. All Canada was favored with more sunshine than any portion of Great Britain, Germany, Holland or Northern France. The Summer temperature per centage of the Dominion was between 54 and 59 degrees, while southermost England it was generally between 35 and 45. The salient feature of Canada's climate, Mr. Stupart said, was not the cold of winter, but the perfection of her Summer and Autumn.

GOVERNMENT CONTROL

Provincial Government to Appoint City Commissioners.

VANCOUVER, Dec. 17—That the provincial government will extend its proposed amendments to the liquor license laws so that in future all license commissioners in the cities will be appointed by the government instead of half being appointive and half elective, is the rather startling rumor that has travelled among those most interested within the past few days. Attorney-General Bowser is out of the city, having left on a holiday trip to California, and official confirmation of the story can not be obtained. Those best able to speak, however, state that the proposal is under consideration, and that considerable pressure is being brought to bear to have the change made.

It has already been announced that in the near future the control of licenses in the rural municipalities will be taken from the municipal authorities and vested in the provincial police, a move that meets with general approval. The proposed change in the cities, however, is a very different matter and there is certain to be a storm of opposition if any definite action is taken.

UNEMPLOYED RELIEF

Provincial Government to Commence Road Work at Pt. Grey

VICTORIA, Dec. 17.—Instructions have been issued by the Provincial government to have work started on the roadway through the lands at Point Grey. Orders were issued to Engineer Gamble at Vancouver last evening instructing him to start work at once. In this way it is thought that the unemployed of Vancouver, the plight of whom was placed before the government, will be remedied. Work will be paid for at the rate of 20 cents per hour, and with work provided by the city it is thought all will be cared for.

Throughout the interior country there are large numbers of unemployed and the distress is even greater than on the coast. Now is the time for the government to get in and employ these men on the construction of the Columbia River Bridge at Revelstoke, which will afford relief to many who are absolutely unable, though willing to find employment.

JAP IMMIGRATION

Minister Lemieux Concludes Negotiations.

TOKIO, Dec. 17—Minister of Labor Lemieux was the guest of honor at a farewell banquet attended by 300 leading citizens and officers, including foreign minister Hayashi and British Ambassador Sir Claude Macdonald, last Monday.

The negotiations with the Japanese government have been concluded without a formal agreement or exchange of memoranda, but with an understanding similar to that between Japan and the United States.

Some of the papers state that regulations will be enforced restricting the emigration from Japan of so-called student laborers, while others are of the opinion that the announcement of restricted control of emigration on the part of Japan is assured.

MURDERER HANGED

Penalty Paid for Hideous Crime.

Hong Kong papers contain an account of the hanging of W. H. Adsetts for the murder of Gertrude Dayton, whose body he placed in a trunk and endeavored to ship it to Victoria on the steamer Montesgle. Blood on the outside of the trunk caused the quartermaster to open it before the vessel sailed.

Adsetts walked calmly to the scaffold, showing no trace of fear. His mind, it is said, appeared to be unconscious of all things earthly, or, as another put it, as if he were in a sort of stupor. The execution was managed without the slightest awkwardness.

ARSON AND MURDER

Startling Discovery Made by Winnipeg Police.

WINNIPEG, Dec. 14.—Murder and robbery is the startling revelation made by an investigation into the early morning fire on Friday last, in which the burned bodies of Luke Wing and Lee Chow were found.

There is not the slightest doubt now that the fire was the work of a murderer and incendiary and examination of the bodies of the dead men shows that both were brutally battered about the head with a blunt instrument of some kind.

Declines Third Term

WASHINGTON, Dec. 17.—President Roosevelt will not be a candidate for a third term. All doubt on this point has been dispelled by an authoritative statement from the White House that Roosevelt still adheres to the declaration of renunciation made on the night of the election three years ago. In the statement which was issued last night President Roosevelt says he has not changed and shall not change the decision delivered to the American people in 1904.

Uncalledfor Risk.

LONDON, Dec. 17—John Burns, M. P., addressing a meeting at Leeds, having enumerated various advantages which the colonies already enjoyed, said: "We cannot, without a mandate from the country—and that will never be given—we cannot risk the world's trade of thousands of millions and the good will of fifteen hundred millions of people by doing more than we have done for the colonies. That" said Mr. Burns, "is also the opinion of sensible disinterested colonies."

PINTSCH GAS USED

No More Acetyline on C. P. R. Trains.

Acetyline gas was used for the last time on passenger trains of the Canadian Pacific Railway on Monday. On a number of the trains the change from acetyline to Pintsch gas has already been made and the necessary alterations were completed that night.

The use of the discarded illuminant was favored by many railway men and it was strenuously maintained by them that with proper care there was nothing more to be feared in connection with its use than any other illuminating matter. Action was taken, however, some months ago by the railway commission in connection with the subject, and the order was issued that the railway companies must give up the use of acetyline on all trains. The management of the railways at once arranged accordingly The work has now been completed and Pintsch gas will be in use on all trains after this date.

The cost of making the change is not large.

Pintsch gas has been in use on railways of continental Europe and the United States for many years.

IMPERIAL RELATIONS

Prominent King's Counsel Reviews the Situation.

Addressing the Canadian club in Ottawa last week on the future of Canada, J. S. Ewart, K.C., urged that the present position of subordination is one that cannot last forever. Canada must some day rise to the full dignity of nationhood, and either alone, or in some partnership, have and exercise the highest powers of government.

The Dominion would most probably be one of the following five:

1. Union with United States.
2. Independent republic.
3. Union with United Kingdom.
4. An independent monarchy, with Canadian king and queen.
5. Independent monarchy with the same sovereign as the United Kingdom.

In Mr. Ewart's opinion the future of Canada would seemingly be a nationhood, self-control, political equality with the United Kingdom instead of subordination and subserviency to the colonial office.

"If," concluded Mr. Ewart, "this be our future, then we will yet reach the goal aimed at by the late Sir John A. Macdonald. We shall get a great British monarchy in connection with the British empire and under the British king, recognizing the sovereign of Great Britain as its sole and only head."

The Mail-Herald

There is so much bad in the best of us,
And so much good in the worst of us,
That it hardly behooves any of us,
To talk about the rest of us.

WEDNESDAY, DEC. 18, 1907

A MERRY CHRISTMAS.

At this festive season of the year with all its pleasant association it would be amiss to refrain from mingling in the sentiment of the emotional feelings which fill each and every heart in this happy community. We fully believe that the heavenly message associated with this season "Peace on earth, good will toward men," contains the essence of all our hopes and men at this time try to express it in their own little way by shewing how much more blessed it is to give than receive. Long may Christmas be celebrated and the message it brings to men remembered. Petty jealousy and personal spite should be forgotten at this time and a genial feeling of friendship be established among us. This is a happy time in the truer sense and it is in no conventional or ordinary manner that the MAIL-HERALD wishes all its readers in Canada, England, United States, and Europe "A Merry Christmas."

A WISE DECISION.

The two bylaws now being advertised and submitted to the people will receive either their endorsement or rejection at the hands of the citizens on Friday next. The one for the raising of funds to erect a city jail, the other to cover the overdraft at the Molsons Bank which has accumulated year by year through municipal improvement work being paid for from the wrong source and by the bad management of civic finances. We do not look so much at the past, for that can never be recalled, and no matter how *injudicious* and wrongly based has been the financial policy of the previous councils, we cannot do any good by putting fresh obstacles in the way of clearing the city of debt, by dwelling on the failings of past administration. Now that the blunders have been made, perhaps with the best intention of those who imagined they were doing what was right, there is no use of harping on them and the sooner the city gets herself clear of debt the better for the present and future condition of this community. Some have urged that the proceeds from the water and light plant be put to paying off the overdraft but that would, besides being impracticable and unwise, be a decidedly unfair and injudicious tax on the present generation, who will have to bear the burden of all the previous years. By the issue of debentures the burden will be less heavy and give the coming generations an opportunity of taking their share while the bank will feel more satisfied in that there is now some security for their money which in this overdraft has been totally unauthorized and *illegal*. Were the current revenue used for this object the city would be pinched for ready money in case any occasion should arise where a big sum might be needed. The citizens will be doing the right thing, and the best thing under the circumstances by endorsing and passing this bylaw and authorising the issue of debentures. We would advise therefore that the people of Revelstoke use their best judgment on Friday, Dec. 20th, in coming to the polls and give their unanimous vote for both bylaws, which will place Revelstoke once more on a sounder and stronger base, do away with what has always been a thorn in the flesh at the same time relieving the burden of heavy tavation in years to come

POLICE PROTECTION.

Our attention has been called to the continual noise and disturbance during performances in the opera house, which has the effect of not only being a distinct annoyance to those of our citizens who do attend that place of amusement but also of keeping others away who would otherwise go. No one suffers from this nuisance as much as the opera house management themselves and it would be to their own interests to study this part of their business a little more closely. The owners of the opera house are bound to supply their own police and police protection and this has not been done, hence the unseemly conduct in the galleries. Smoking too is invariably practiced and this besides being a nuisance and annoyance to others is dangerous in the extreme and should be severely dealt with by those in authority. We would advise therefore that the management take measures to in future employ special police, as the bylaws demand, who will keep order in the galleries and incidently protect the public; if this is done and the unruly aud objectionable element summarily removed we venture to assert that the business of the house will increase and receive far larger patronage.

CORRESPONDENCE

Editor MAIL-HERALD.

SIR: Is it a fact that the citizens are expected to vote on a bylaw in *two days from date for the borrowing* of money to pay up a debt incurred by previous and present city councils, after having just paid into the city treasury the limit of taxation, without the formality of a public meeting where reasons may be rendered why we are in debt and why we should go into debt to get out of debt and borrow one dollar bearing interest to pay back ninety cents? Here, Mr. Editor, is, I think, something to think about.

TAX PAYER.

Professor McEwen

Professor McEwen, the great magician, gave his final performance in the opera house last night commencing with some interesting and scientific tests of thought and mind, reading, finding articles hidden in the hall by the aid of the concentrated thought of those who assisted him. Moving pictures and vaudeville selections of a laughable character filled in the intervals. Hypnotism concluded his programme, the many tests applied being of a humorous nature causing endless merriment. On Monday night Professor McEwen gave an exhibition of extreme interest T. W. Bain, chief of police, and Officer Terry, in the presence of several of the citizens, on the stage locked 13 pairs of handcuffs and leg irons on the professor, vouching for the fact that he was secured hand and foot. After a few minutes inside a cabinet where outside aid was impossible, McEwen freed himself from all his fetters and reappeared before the public with the gyves in a heap on his arm. This test is conclusive of the skill and ability of McEwen in magic and conjuring. Florence McEwen has charmed her audience during her appearance here by her dainty and charming songs.
