CLAIMS TRANSFERRED FOR $20,300 CASH

Spokane Parties Pay That Price for Three Promising Claims in the Region of the Arlington at Erie.

Athabasca-Venus Consolidation Has Been Effected and Means Much to Nelson. Satisfied With Lardeau.

Two important transfers were entered at the Nelson record office yesterday. One was the selling of the Keystone Fractional mineral claim, situated at the head of Whiskey creek, about two miles east of the north fork of Salmon river and about half a mile east of the Arlington mine, by J. Shuttleworth, and C. C. Ladd to Abraham L. Davenport of Spokane, the consideration being $15,300 cash. The other transfer was of the Cable and Tenbroek claims, adjoining the Keystone Fractional, from J. Shuttleworth to A. L. Davenport for $5,000 cash. The three claims combined are said to be an excellent property, and one on which the development work now done has shown up most promising results, the ore being similar to that of the Arlington.

Word has been received that the officers of the Venus Gold Mining Company who reside in Toronto have signed the agreement whereby the Venus group of claims is amalgamated with the property of the Athabasca Gold Mine, Limited. A new company to be called the Athabasca Consolidated will be formed under Ontario laws with the head office of the company at Toronto.

The directorate will consist of a number of well known mining and business men of Toronto who are largely interested in the present Athabasca and Venus companies. This will be good news to everyone who is interested in the prosperity of Nelson as the combination will be a very strong one and to the advantage of the shareholders of both companies. The Athabasca has a very complete and up-to-date plant for the treatment of free milling gold ores, which can be kept going at its full capacity with the workings of both properties to draw from. The Athabasca has had considerable difficulty in mining enough ore to keep its plant running at full capacity owing to the numerous faults and breaks met with in the vein which has necessitated a lot of dead work and made it impossible to accumulate any ore reserve.

In the Venus mine the vein is remarkably true throughout all the workings, and there is now blocked out ready for stoping, between 16 and 20 thousand tons of ore which averages about $16 per ton. This amount is sufficient to keep the present plant of the Athabasca running for about two years at its maximum capacity but it is probable that the plant will be enlarged shortly, as future development on the Venus property alone is expected to keep the ore reserves at least a year ahead of milling requirements. The new company will at once proceed with the erection of a tramway from the head of the present Athabasca tram to the Venus workings, a distance of three quarters of a mile, and it is expected that within three months, ore from the Venus workings will be delivered at the Athabasca mill.

The exact terms of the deal have not been announced but it is understood that the new company will be capitalized at $2,000,000 in shares of $1 each, of which the present Athabasca shareholders will get 970,000 and the Venus company 563,000 and a cash payment of $30,000. The balance of the shares will remain in the treasury. The new company with a splendid plant and large ore reserves will undoubtedly be a very strong and substantial one and the fact that the management and control will be in the hands of Canadian business men who have the interests of British Columbia at heart will ensure the best possible management of the affairs of the company and a strong probability of substantial dividends in the near future.

The following extract from the address of the chairman of the annual meeting of the shareholders of the London and B. C. Gold Fields on July 18th last is of interest to Nelson people, especially those who are fortunate enough to hold Imperial Development Syndicate stock as the property mentioned was bonded a short time ago by the latter company to the London & B. C. Gold Fields for $250,000:

A SECOND YMIR.

I now turn to our new undertaking—namely, the group of claims in the Lardeau district. We are lead to believe from all appearances that this property is capable of being developed into a mine equal to, if not greater than the Ymir, and your directors regard this as probably the most important piece of business that the company has taken in hand during its history. The property is a very large one, consisting of no less than 361 acres, and the ore bodies are of very great size, and in places of great richness; but, so far, the information to hand leads us to believe that it is a property, which, like the Ymir, should be treated on a large scale. We hope that when we erect a mill it will be one capable of treating 200 or 300 tons per day, and, as the ore is free milling, and there is ample water power and timber for mining purposes close at hand, the working costs should be even lower than the Ymir. Our position today with regard to the property is that we have an option, which enables us to purchase it for cash and shares, or entirely for cash. Although we have an option, the advices to date are so satisfactory that we think there is practically no doubt we shall exercise the option, and for this purpose we want to put ourselves in a position to do so. We hold a very strong opinion that we ought to purchase this property for cash, and be the sole owners of it. Had we been in a position to do this in the case of the Ymir mine, we should have been in en even better position today, and your directors will make every effort to retain the sole control of the Lardeau property. Our decision as to whether we will give cash, or cash and shares, has to be made forthwith, and the matter is considered of so much importance to this company that, at very great inconvenience to myself, I have made arrangements to leave as quickly as possible, so that I may visit the property and consult with our engineer as to the best course to pursue. Immediately we secured the option we gave instructions to do the largest possible amount of development work, and by the time I arrive in British Columbia, there ought to be a great deal of new ground opened up. With this new business, added to the business I have already referred to, I think you will agree that the London and British Columbia Goldfields has a better future today than ever before.

C. H. Stilwell returned to Nelson yesterday from the Lardeau, where he has been investigating the find made by the prospector whom he sent into the district some weeks ago, and of which mention was made in The Miner last Sunday. Mr. Stilwell states that the discovery was indeed a wonderfully rich one and the vein is so exposed that within two weeks they will be able to make their first

Continued on Third Page.

O'BRIEN WOULD KILL HIMSELF

Dawson Murderer Tries to End His Life and Cheat Gallows.

Fire in Cumberland Mine to Be Flooded.—Coast News.

(SPECIALS TO THE MINER.)

Vancouver, B. C., Aug. 13.—Passengers on the Hating brought news that OBrien, the murderer, had made two attempts to cheat the gallows. He tried to strangle himself by putting a handkerchief tight around his neck, then knotting it. Failing in this he dashed his head against the iron bars of his cell. He was not seriously hurt.

Word has also reached here that B. C. McCord of Vancouver, was killed at Dawson, July 28th, by falling down a mine shaft.

Word has been received by Customs Officer Clute at Westiminster that Charles Clark who disappeared in July from Fort Steele, had been drowned, his body having been found in Kootenay river, near that point.

Victoria, B. C., Aug. 13.—The Provincial Government is still negotiating with the Federal authorities at Ottawa with a view of closing the deal with the N. A. T. Co., who offers to market all gold coming from the Yukon by their boats at the assay office here if the rebate of one per cent is granted them. An additional staff would have to be put on in the treasury department and the assay office enlarged as their next boat is expected to have at least six hundred thousand dollars in gold dust on board. The N. A. T. Co. purchased a big cargo of supplies here last week.

Negotiations are in progress for the purchase of the B. C. Iron Works of Vancouver, and the Albion Iron Works of Vancouver, by the Albion Iron works of this city. Manager Seabrook of the latter establishment is in Vancouver today forwarding arrangements.

Joe Weiler, one of four brothers constituting the big furniture firm of Weiler Bros, died at an early hour this morning from the effects of an overdose of sleeping opiate which he had been in the habit of taking to relieve insomnia. He was unmarried and had charge of the office department of the firm.

A special to The Times from Cumberland says that the sulphurous fumes from the burning mine (No. 4 shaft) have made it impossible for men to work or stay in the vicinity of the fire and for this reason the management last night decided that the mine must be flooded. All night long a gang of men were working, removing pumps, cars, etc. This morning a large ditch is being dug from Comox Lake to the mouth of the stope It will take three or four weeks to fill the mine to the point of the fire. Number 3 stope, which is higher than the flooding point, will now be worked. Three hundred tons daily can be taken from it. This, with 800 tons from five and six shafts, will keep the output for San Francisco and other markets quite as high as usual.

TYPOS TALK.

Birmingham, Ala., Aug. 13.—At today's session of the 47th annual convention International Typographical Union, President Lynch submitted a supplementary report regarding the joint ownership of the label as well as the opinion of the attorneys of the International Typographical Union to the effect that joint ownership of the label is a legal impossibility. In view of recent criticisms of the affairs of the printers' home at Colorado Springs, Trustee McCafferty asked for an investigation, which request was submitted by President Lynch.

A report of the laws committee, looking to the practical reparation of the stereotypers and electrotypers from the International Typographical union was then considered. The committee made no recommendation. The proposition provides for complete autonomy of the sterotypers and electrotypers trade in the district union and those employed in connection therewith was defeated at the convention, last year.

CANADA AGAIN TO THE FRONT

Third Heat of Chicago Yacht Races Won by the Toronto Boat.

Decision Is Given on a Foul but Cadillac's Rival Is Badly Beaten.

Chicago, Ill., Aug. 13.—William Hale Thompson, Cadillac's skipper, presented Invader with the third race of the International yachting match for the Canada's cup, by fouling the Canadian boat at the start, in full view of the juges and most of the spectators. Captain Jarvis of Invader, declined to fly his flag to claim foul, but the judges started after Cadillac and notified Capt. Thompson that they had disqualified his boat, whereupon Cadillac was jibbed around and left the race. Invader sailed the course and was raced by Milwaukee, the Oskosh boat that so hotly contested with Cadillac the honor of defending the cup, and the sailing match was followed all around the trriangulaj course. Invader beat the Oskosh handsomely at all points of sailing in a light wind.

Capt. Jarvis said, after he got ashore, that he felt no satisfaction in getting a cup race in this way but that he was pleased that his boat had had an opportunity to beat Cadillac's rival, the Milwaukee. Capt. Thompson declined to say anything except that the judges had disqualified his boat. To impartial spectators, it appeared as though the Canadian skipper had outwitted Thompson and that the latter, when he found he was caught in a trap with the buoy at one end of the string line close under his lee and his rival with the right of way bearing down upon him, tried to force his way through instead of coming about Inavders' stern. Capt. Thompson came down towards the buoy on the port tack, meeting Invader on the opposite tack just before they got to the line and close to the buoy. Cadillac, of course, was trapped unless Capt. Thompson brought his boat about under Invdaer's stern. If he tried to come about on the starboard tack under Invader's lee, he ran the risk of fouling either the boat or the buoy as he bore around. To be forced to come about and close under Invader's stern right off the line, no doubt, was a bitter pill for a racing skipper to have to swallow, so Thompson elected to squeeze through where he had no chance and consequently he plainly fouled his rival. Capt. Jarvis promptly luffed his boat to save her as much as possible and one of Cadillac's crew tried all he could to force Invader off with his hands. The judges' boat soon weighed anchor and the officials lost no time in notifying Thompson that his boat was disqualified. At this juncture, the Milwaukee, which was in the attendance fleet, to leeward of the racers, went about and stood after Invader. It was not thought anything of at first but when it became apparent that the Oshkosh boat's purpose was to cut into an international cup race, even though the challenger was sailing over the course alone, it was unfavorably commented upon on every hand as a most unusual performance. However, Captain Jarvis soon saw the intention of his would-be opponent. He went in and beat the Milwaukee with ease, many of the spectators not knowing until the close of the race, that the Milwaukee had not been substituted.

GIVEN POWER TO ORGANIZE.

Birmingham, Ala., Aug. 13.—The International Typographical convention today decided by a vote of 84 to 76 to submit to a referendum vote, the preamble of the proposition allowing the stereotypers and electrotypers complete autonomy and to control, charter and organize members of their craft.

GENERAL URIBE KILLED.

New York, Aug. 13.—The Times will say tomorrow: "According to El Conservador, a semi official newspaper published at Barranquilla, Colombia, General Rafael Uribe was killed at San Cristobal, Venezeula, July 27th."

VICTORIA'S DAUGHTER IS LAID TO REST

A Grand and Solemn Procession Conveys the Body, With Funeral March and Roll of Drum, to the Grave.

The Emperor and Empress, Accompanied by England's King and Queen, Attend the Closing Ceremony.

Potsdam, Aug. 13.—The funeral of the late Dowager Empress took place here today and was witnessed by many thousands of people. At 9.30 a. m. the gates of the Sans Souci park were opened to the press and to a few ladies connected with the Government and Court circles. The small crowd here was rigidly kept within prescribed limits by military guards. The morning brought an overcast sky, with the sun feebly peering through the clouds, adding to the solemnity of the occasion. A slight breeze rustled the foliage bringing down an occasional leaf prematurely shrivelled by the drought. The magnificent fountain beneath the San Sauci palace cast an immense volume of water in the air, the splashing of which broke the silence reigning in the park. While observers waited, military organizations marched in and took up positions along the central avenue, through which the procession was to pass.

Numbers of artists from London newspapers occupied the time in sketching scenes in the park as settings for illustrations. Promptly at 10.30 the tolling of bells announced the arrival of the funeral train at Wid Park but it was nearly 11 o'clock when the sound of music in the distance announced the approach of the funeral procession. Far down the avenue moving masses appeared and then halting the procession to assume its proper order. As the procession drew near, the notes of funeral marches, played slowly and plaintively, became audible, the muffled drums rolling in solemn impressiveness. At the head of the procession rode Major General Von Volkte, nephew of the famous Field Marshal, in command of the military forces participating in the ceremonies.

The procession was in every way grand and solemn. The grades du corps, with black and white pennants fluttering at their lance points, attracted much attention as did the royal page corps, composed of cadets from the military academy at Grosse Lichterfeldt in bright red coats, white trousers and broad hats trimmed with white lace. After the military came the highest clerical dignitaries of Berlin, including Dr. Vanller, the court preacher, and Bishop Assemann the highest Catholic military chaplain, in a resplendent purple robe. Over the head of the coffin were the Imperial colors on which was a crown of state of massive gold and heavily jewelled. Also on the colors was a wreath deposited there by Emperor William at Cronberg and two other wreaths. Behind the coffin marched the Emperor with head erect and displaying the greatest self possession and dignity, but his face was pale and sorrowful and he gazed straight forward.

King Edward, who was on the Emperor's left, walked heavily and evidently found the march fatiguing. Both Emperor William and King Edward wore the uniform of the second regiment of the Dragoon guards, Queen Victoria's regiment. The procession occupied 20 minutes in passing. All the bell of Potsdam continued tolling until the procession reached the mausoleum and during the obsequies. The procession reached the mausoleum at 11.40. The proceedings were most simple. The coffin was carried into the mausoleum followed by the Emperor and Empress, King Edward and Queen Alexandra, the royal princesses and other member of the royal family, the rest of those present remaining outside during the last ceremonies. After the body had been lowered into the vault, the choir from the Berlin cathedral sang, "Christ is the Ressurrection," by Grell. Prayer followed and then the choir sang, "Be Faithful Unto Death," by Neidhare. This was the only service. In the meanwhile Emperor William stood beside the tomb in the most solemn manner. There was no weeping, but King Edward frequently used his handkerchief, for beads of perspiration were coursing down his brow.

After the brief ceremony the royal party withdrew and the invited guests, military men, diplomats, statesmen, filed in for the last hasty view of the coffin. The royal party left the park at 12.25 p. m. In the first carriage was Queen Alexandra on the right, and the Empress on the left. The second carriage contained King Edward on the right and Emperor William on the left. Numerous court carriages bore away the invited guests and dignitaries to their homes or to the railroad and the crowds rapidly dispersed.

BIG STEEL STRIKE.

Both Sides Confident But Capital Still Has Best of It.

Pittsburg, Pa., Aug. 13.—Neither side moved decisively in the great industrial conflict between employers and employees in the steel strike and the result is still in the balance. The strikers made gains in Pittsburg McKeesport, Wheeling and Belaire in the last 24 hours but in the main the advantage is still with the mill owners. Both sides claim to be preparing moves that will bring confusion to opponents but neither side has shown its hand. Both sides express their confidence in ultimate victory, and are actively carrying forward their campaigns.

The number of men out as a result of the general order is now roughly estimated at 16,000 and on the three orders at 62,000 Many strikers have found work in independent mills or at other occupations and many are idle merely because the stalled men are out. According to an authoritative announcement made today to a representative of the Associated Press by officials of the American Sheet Steel Co., the destruction of another plant has been ordered by the steel corporation as a result of the refusal of the men to operate it. This time it is the Chartiers plant at Carnegie that is to be dismantled.

SEROIUS FOR NANAIMO.

San Francisco Strike Willl Greatly Reduce Output of Coal.

(SPECIAL TO THE MINER.)

Nanaimo, Aug. 13.—As a result of the San Francisco strike, which has tied up the shipping trade, the coal mines here will close down tomorrow throwing 1400 men out of work The statement of the company to the miners is in part as follows: "Owing to the non arrival of our steamers we shall be compelled to stop work as soon as we have filled the bunkers." It is understood that this order becomes effective almost immediately continuing effective as long as the tie up lasts. Coal mining is the only industry in this town of 7000 inhabitants therefore the outlook is very bad especially as mines in the district which support a population nearly the same size are in a similar predicament. The use of oil in California foreshadowed the serious trouble which the strike has precipitated and it is only too probable that when the mines resume the output will be reduced

A CHANGE OF TONE.

The protective policy pursued by the Canadian government is producing the result sought for—the establishment of manufacturing industries in this country. There was a time when the bulk of the mining machinery used here came from the United States, but the imposition of an import tax on this class of goods led to the American machine houses establishing branches in Eastern Canada and now over 90 per cent. of the mining machinery used in Canada is manufactured at home. An import tax of 33⅓ per cent. ad valorem was placed on the Mergenthaler typesetting machinery and the result that all of these machines used in Canada are now made here. Look at the result of the sawlog policy, adopted by the Ontario Government a couple of years since and no better proof could be adduced that it is operating satisfactorily than the following taken from the Detroit Tribune: "Being no longer able to get American logs for its sawing plant, the Saginaw Lumber & Salt Co. is about to pull up stakes and transfer its activities from the Valley City to the Canadian shore, in order to avoid the effects of retaliatory laws established across the border. From Cheboygan south, all along the Huron shore, there are silent mills, abandoned mill sites and empty lumber yards, to say nothing of vacant houses, and diminishing or stationary town population. Now one of the largest of the remaining lumber firms has been compelled, by failing supply of raw material, to follow others across the lake, where it must employ Canadian labor, buy Canadian supplies, and contribute to Canadian development."

While discussing tariff matters it is interesting to note the change that is coming over the tone of many of the American papers. Where formerly threy were uncompromisingly in favor of a high tariff and strongly opposed to reciprocity they are not talking strongly of free trade or reciprocity with Canada. Where formerly they treated with disdain Canada's claims for a more equitable consideration at the hands of the tariff builders they are now talking of compromise and concession and conceding that the Dominion has some rights which they should consider. The truth is that in the Republic there have been built up, under many years of a protection policy, some vast industries which have had a monopoly of a large home market. The output has finally outgrown the capacity of the home market and the manufacturers are looking for new fields in which to dispose of their surplus wares, and Canada being a close neighbor naturally they desire to secure an entrance into it with their goods on the best possible terms, and this accounts for the change which has come over the tone of the press. Canada, however, is wise enough to see through these blandishments and in order that she may become a great manufacturing country she must, like the United States, protect her infant industries by a stiff tariff and in the course of time she will make more goods and wares than are needed for home consumption and have a surplus for export. Still it would not be a bad idea to have reciprocity in certain lines, where the advantage which we gained would be at least as great as that which we would confer.

MONEY IN FRUIT RAISING.

Gooseberries as large as plums and peaches of a fine flavor, rich color and good size, raised within half a mile of Nelson, show the possibilities of fruit culture in this section. There are large areas of sunny slopes and lowlands in Kootenay which should be utilized for the growing of fruit trees which are now allowed to lie idle, and the wonder is, now that the possibilities are understood, that more of these are not utilized. It is a well known fact that fruit grown in a country where there is frost and snow is better than that which is produced in semi-tropical regions. This is true of apples, peaches and grapes. Ontario fruits of these varieties are more sought after and better flavored than the same kinds grown in California.

The market here is an alluring one. Already it consumes large quantities of fruit brought from long distances and sold at good prices. Besides the population is increasing and there is but little danger of production being in excess of the demand. It is palpable, therefore, that there would be a good profit in the business and it should not be long before the bulk of the fruit consumed in Kootenay should be raised here. Bearing orchards of from 10 to 30 acres should be sufficient, when carefully looked after, to make the owners of them independent, while those of still larger size should make fortunes in a few years for their proprietors.

BOOMERS ARE BUSY.

The latest field for the operation of the townsite boomer is Similkameen and the number of "future great" paper towns there is large. Each, according to those who are booming them, is too be the future metropolis of that section, and those who invest, it is claimed, are certain to make immense profits on what they put in. The average townsite boomer is an individual of some discernment and it is evident that the Similkameen country is one of considerable promise when so many are engaged in floating and pushing real estate schemes. It looks as though the Similkameen country would develop well as soon as it is provided with railway transportation facilities. It has coal measures, gold, silver and copper ledges and besides this there are large areas of land suitable for farming and cattle raising. In addition to this the winters are short, the snowfall light, and the open season pleasant. All that is holding the region back is lack of transportation facilities. It is not likely that a railway will be constructed into the section this year, but it is reasonably certain that it will be done next year. Then Similkameen will enjoy what many of the old residents have been waiting patiently for a genuine boom and the natural wealth of the country will certainly justify it In the meanwhile the townsite men will have only moderate sale for their wares.

EDITORIAL NOTES.

The growth of the Fraternal Order of Eagles has been rapid. Del Cary Smith, the grand president of the order, in a recent speech, stated that athough the order was but five years old there are upwards of 100,000 members enrolled.

The salmon run on the Fraser river is unusually large and hundreds of fish are caught in single casts of the net. The result is that the canneries are blocked with fish. In order that the production may be cut down to the capacity of the canneries the latter will only take 200 fish from each boat.

Anna Eva Fay, the clairvoyant, was in St. John a few days since and was asked what party would win in the next Dominion elections and prophesied that the Conservatives would succeed to power within five years. The words of the seress seemed to have given considerable satisfaction to a few credulous members of the Conservative party, who have faith in her powers. The Montreal Transcript has a man with a long memory on its staff and that paper throws discredit on the utterance of the prophetess by telling how, just before the general elections of 1896, Anna Eva was in Moncton and prophesied that the Conservatives would win and that Hon. George Foster would be the next premier. Thus is the prophetess and those who believe in her put to confusion. Anna Eva, in the instance under consideration, proved herself not only a bad foreteller of the future, but showed that so far as political matters are concerned she is not even a reliable guesser.

The East Kootenay Mineral, Agricultural and Industrial exhibition opens at Cranbrook on September 25th and closes on the 27th. In the three days there will be a number of interesting events, including horse races, lacrosse match, a baby show, performances by an opera company, and besides there will be a mineral and agricultural exhibits, showing the resources of East Kootenay The people of Cranbrook are noted as entertainers and visitors to the exhibition will be made to feel that they are at home. Cranbrook is a picturesque town situated in the midst of a level and fruitful section and is of itself worthy of a visit. The railway company has granted very low rates from all West Kootenay points and the people of Nelson should visit Cranbrook during the time the exhibition is in progress.

The many old friends and students of Professor C. Le. Neve Foster will regret to learn that he has laid down his office as inspector of mines in Great Britain, says the Mining Reporter. Professor Foster was first appointed in 1873. The only interruptions in his work during twenty-eight years' devotion to duty have been through illness. In 1879 he dropped his work for two weeks to recover from a surgical operation, and in 1899 he was compelled, owing to a complete breakdown in health, to absent himself from duty. Not only did he travel thousands of miles annually visiting the mines under his care, but he also filled the chair of mining at the Royal School of Mines, London. His text book on "Ore and Stone Mining" is a classic, and his annual reports on the mineral statistics of Great Britain were the admiration of all competent to judge. It is to be hoped that Professor Foster will crown his life's work by giving the world the benefit of his matchless experience and ability, by writing a complete series of works on mining similar to those wonderful volumes of Dr. Percy on metallurgy.

DON'T LET THEM SUFFER.

Often children are tortured with itching and burning eczema and other skin diseases but Bucklen's Arnica Salve heals the raw sores, expels inflammation, leaves the skin without a scar. Clean, fragrant, cheap, there's no salve on earth as good. Try it. Cure guaranteed. Only 25c at Canada Drug & Book Co.

Have you tried—Ironbrew.

A GOOD THING.

German Syrup is the special prescription of D. A. Boschee, a celebrated German Physician, and is acknowledged to be one of the most fortunate discoveries in Medicine. It quickly cures Coughs, Colds and all Lung troubles of the severest nature, removing, as it does, the cause of the affection and leaving the parts in a strong and healthy condition It is not an experimental medicine, but has stood the test of years, giving satisfaction in every case, which its rapidly increasing sale every season confirms. Two million bottles sold annually. Boschee's German Syrup was introduced in the United States in 1868, and is now sold in every town and village in the civilized world. Three doses will relieve any ordinary cough Price 75 cts. Get Green's Prize Almanac.

A delightful tonic—Ironbrew.

If you don't like Blue Ribbon Tea it's because you never tasted it.

CLAIMS TRANSFERRED FOR $20,300 CASH

Continued from First Page.

shipment. The results of five assays from the surface showing were as follows. Sample No. 1—Oxidized material, together with carbonates, silver 267 ounces, valued at $160.20; No. 2—Oxides together with a little galena, silver 115. ounces, valued at $69.48; No. 3—Galena grey copper sulphurets, etc, which is the prevailing material of the vein as exposed, gold .04 ounces, silver 736 ounces, 6.5 per cent copper, and 56.6 per cent lead, valued at $491.90; No. 4—Chiefly grey copper and sulphurets, 1,211.6 ounces silver, valued at $763.66 per ton; No. 5—Also grey copper and sulphurets, 1,290 ounces silver, valued at $774 per ton. The work done consists chiefly of a careful prospecting of the ground for the purpose of finding whether the lead was continuous and also whether it was mineralized to any distance on either side of the principal discovery. For this small openings have been made on the lead, in every case with satisfactory results, over a distance of 2,000 feet. This examination has proved that the vein is traceable for a great distance, in places having a width of 30 feet between its walls of lime and scnist, and that the character of these walls remains unvaried. But it is at the point on the vein where the first discovery was made that it looks its best. Here an open cut has been made about four feet in width, exposing a like amount of extremely rich mineralised material, from which the samples, the assay of which are given above, were taken.

C. L. Brush is the name of the prospector who made the lucky find. The property is reached by a trail starting from the wagon road about three and a half miles from Trout Lake, the claims being also about three miles from the main trail. Mr. Stillwell will return to the property Saturday, taking with him supplies and men.

There were no locations at the Nelson office yesterday. Certificates of work were issued to C.W. Greenlee on the B. C., and U.S.; to Pierre Dionne on the Blue Stone; to Norman Stewart on the Franklin, Gold Boy and Norman; to Frank Provost on the Lorne, Maller, Golden Star, and Nelson; to J. Zattoni on the Vento; to Roderick McLeod on the Iron Mountain; to R. B. Esnouf on the Gaelrong.

The transfers were Keystone Fractional mineral claim, from J. Shuttleworth and C. C. Ladd to A. L. Davenport, consideration $15 300; Cable and Ten Brock from J. Shuttleworth to A. L. Davenport, consideration $5,000. A certificate of improvement was granted to E. A. Crowe, of Nelson, on the Golden Queen.

Senator John D. Byrnes of San Mateo, Cal., and Phil Corcoran of San Francisco, are at the Hume. They returned on Monday evening from an inspection of the White Grouse group of mineral claims on Harris mountain, east of Kootenay lake. They spent ten days in making the examination. They were reticent last evening as to their intentions in regard to closing the deal for the purchase of the group. The properties are owned by Mrs. Jennie E. Harris of Kaslo, and are considered to be valuable.

A SNAP!—A good Peterboro rowboat for sale at a bargain. Only been in use three months. Must be sold this week. Address "H," Miner.

POLICE NEWS.

Before Mayor Fletcher yesterday morning at the police court the case of Robert McMahon, charged with violating the city bylaw relating to Sunday closing, was tried and resulted in the defendant being fined the costs of the prosecution.

Henry Sigient, who has been absent from the city for about a month since the date of a quarrel with a man named E. Brosseau, returned and was arrested yesterday on a charge of assault preferred by Brosseau. In court he pleaded guilty to the charge but said that the complainant had called him many foul and abusive names. His worship severely reprimanded Sigient and imposed a fine of $2 and costs.

The newest and best summer drink. —Ironbrew.

COMMUNICATIONS

FROM DR. DUVAL.

Editor Miner.—Some one's kindness put into my hands your issue of the 4th inst., with some limited account of my son's death. He did not go south on account of bad health. He was in excellent health, but went to West Virginia to join a civil engineer corps for a summer vacation and was taken with appendicitis, and after some days' treatment at a smaller place was brought on a cot by train to Fairmont Hospital where the operation was too late. The appendix had ruptured and notwithstanding the dear boy survived the operation, and was apparently getting well, general peritonitis set in which could not be overcome. He was not a graduate but next to his graduating year, the first honor man in classics in the university, and a character than which I would not have prayed for a better.

I have seen in the midst of my own grief the death of my good firend Mr. Beaton. My deepest sympathy to his family. FREDERIC B. DUVAL.

Winnipeg, Man., Aug. 9, 1901.

Made by Thorpe & Co.—Ironbrew.

THE CITY

Now that the waters of the lake have reached from the city wharf the need of extensive repairs being made on that much patched structure is more apparent than ever. The planking in places is in very bad condition.

By permission of Capt. Macdonnlel, the band of the R. M. R. will render a concert at the park tonight at which the chief feature will be a cornet solo "Trumpbet Triplets" by J. B. Pollard

The inquest at Rossland into the cause of the death of Mrs. Maggie Angus, who died under rather suspicious circumstances, was held yesterday. the jury bringing in a vedict of death from natural causes.

There will be an ice cream social and musical entertainment at the Salvation Army Barracks tonight. The most interesting part of the musical entertainment will be the Zobo band which will make its first appearance on the street and inside the hall. The proceeds of the social will be in aid of band and local corps.

The steamer Minto, which the Miner mentioned yesterday morning as being put into commission on the Upper Arrow Lake, is to be used in transferring the extra freight which has to go into the Slocan by way of Robson and Slocan Junction, owing to the burning of the bridge on the Rosebery route. She will run between Arrowhead and Robson.

Nelson has been on the route of more tourist parties this year than ever before. Two parties from the States are now at the Hume and rooms have been engaged for other tourists who will pass through the city this month. The C. P. R. is doing much to advertise the scenic beauties of the Kootenays and attracts as much traffic as possible this way. It is but the thin edge of the wedge and it will not be long before Nelson will be the centre of a district that will attract tourists by the hundreds from all parts of the continent.

Foreman Payette stated yesterday that the trouble about the price of board between the men empoyed at the marble quarry at Kaslo and Contractor LeMoine had been a misunderstanding, and had been settled at once, and had nothing to do with causing the delay in the arrival of marble at Nelson. At first it had been intended to ship the stone rough to Nelson and do the cutting here, but after consideration it was decided that it would be easier to prepare it at the quarry, and this now was being done. As it takes some time to get a sufficient quantity of stone ready to make a shipment a delay in operations has occurred.

A large pack train of supplies was despatched to the prospectors and miners yesterday who are working on the Boss Boy, McGinty, and other claims in their vicinity, some fourteen miles out on the old Burn's trail, southeast from Nelson. There are now between sixty and seventy men working in that district within a small radius, lying about three miles south of Five Mile Point, the trail though long, (going up Cottonwood creek valley and thence eastward by the mountain back of Nelson) being the easiest way to reach it. It was in this section that some very rich gold quartz was found a couple of months ago.

FOOD CHANGED TO POISON.

Putrefying food in the intestines produces effects like those of arsenic, but Dr. King's New Life Pills expel the poisons from clogged bowels gently, easily but surely, curing Constipation, Billiousness, Sick Headache, Fevers, all Liver, Kidney and Bowel troubles. Only 25c at Canada Drug & Book Co.

No harmful ingredients in—Ironbrew.

STORAGE! STORAGE! STORAGE!

I have a large warehouse and am prepared to store all kinds of goods. Prosser's Second Hand Store, Ward Street.

SORE BACK

Lumbago, pains in the back or side, soreness, swelling or inflammation find no standing ground after an application of Griffiths' Liniment—penetrates in a minute, dispels the pain, stops the suffering. You will find it better than plasters.

Mr. Mack White, well known trainer of the Toronto Lacrosse Club and Osgoode Football Club says: "Griffiths' Liniment is unequalled for athletes or those training. I have used it with the best of success for sore back, stiffness, soreness, sprains and all forms of swelling and inflammation.

Pianos to Rent at $7 per month.

THE CITY

The first grapes of the season were placed on the local market yesterday.

The building of a shelter over the city weigh scales has been completed.

St. Joseph's school will open for the next session on Tuesday, September 3rd.

A party of men to work on construction in the Lardo left on the Kokanee last evening.

A large number of people are preparing to take in the picnic of the Congregational church tomorrow.

A number of boys are in the habit of going in swimming without bathing suits along the water front, especially in the neighborhood of the boat houses.

The floating house lately belonging to the Gooderow family has been secured by George Hale and he is having it removed to get the supporting raft for boathouse purposes.

The C. P. R. announces that owing to interruption to the line between Rosebery and Nakusp by the burning of a trestle, through business for the main line and coast points will for the next few days, be routed via Robson.

Percy Horton and another young man whose name was not ascertained, while out canoeing last Sunday near Lake Park were upset, and there not being any boat in the immediate neighborhood were in the water for some time until assistance arrived. Neither of the young men sustained any damage from the ducking.

A lot on Latimer street, west of Stanley, was sold to G. A. Neve yesterday by H. & M. Bird, acting as agents for Mrs. H. A. Langford. Mr. Neve has just returned from South Africa, having enlisted in the Imperial Yeomanry while in England and served through the war up till a short time ago. It is his intention to erect a residence on the lot.

The grading and excavating for the high school site at the corner of Latimer and Hendryx streets was started this week and is now well under way. Contractor Gillett expects that this part of the work will be completed by tomorrow night, and the building of the foundations will likely be commenced Friday. Stone is now being brought from the quarry at the foot of Baker street for use in the latter. The timber and brush has all been removed from the lot and burned, and ten men are clearing out the roots and ploughing. The city also have five men employed grading the streets adjoining the site.

..You..

Can Obtain

Certain Body-Building Results by

Using

GRAPE-NUTS

.. FOOD ..

QUESTIONING A FRIEND

If one takes the trouble to carefully question a person that has been using Grape-Nuts Food for two or three weeks, the facts will be brought out that gradually there comes over the body a feeling of increased strength, particularly of mental strength and ability.

The mind works clearer and more actively when it plays upon a brain that is refreshed, rebuilt and properly constructed by the food elements intended by Nature for such work.

This is a profound fact regarding Grape Nuts. The Food contains just the kind of material Nature must have to unite with albumen, from which to rebuild the gray matter in the brain and nerve centers throughout the body. Therefore the user can expect and obtain a definite result from the regular use of Grape-Nuts.

T. B. May, one of the first barbers to come to Nelson, has opened a shop on Ward street.

A letter from Pretoria, South Africa, addressed to John Painter, care of W. J. G. Dickson, awaits the owner at the P. O. general delivery.

The thermometer yesterday was but two degrees below its highest mark this summer. The weather man is giving us one of the eastern hot spells warmed over.

A derrick has been placed in position on the end of the city wharf to aid in handling the stone coming from the Kaslo quarry by barge, for the new postoffice building.

H. Parkin, who is suffering from an attack of delirium tremens, caused by over indulgence in intoxicating liquors, was removed to the city jail from the hospital yesterday.

The second dance of the Nelson Boat Club, held at the Lake Park Pavilion last night, was a great success from every standpoint. The weather was excellent, the music superb, the floor all that could be desired and the people Nelsonians. The members of the club proved themselves capable hosts and a very enjoyable evening was spent. Wambold's orchestra supplied the music.

The following letter was received by the secretaries of the below mentioned teams yesterday: "To the members of 'Tamblyn's Tigers' and 'McFarland's Muffers' lacrosse teams: Gentlemen, I am instructed by the directors of the Kootenay Lake General Hospital to tender you their sincere thanks for your kind interest displayed in arranging and carrying to a satisfactory conclusion the lacrosse match which added to the funds of the institution the handsome sum of $94.50. Yours very truly, F. W. Swannell, secretary Kootenay Lake General Hospita." The R. M. R. band received a similar acknowledgement.

Cooling and refreshing—Ironbrew.

PERSONAL

A. G. Creelman of Rossland, is at the Waverley.

J. G. Sullivan, engineer in charge of construction or the C. P. R. in the Kootenays, is a guest at the Phair.

A. Ferguson and J. A. Lade, of Ferguson, two well known mining men of the Trout Lake district, are stopping at the Hume.

Miss E. M. Hunt, H. Moody and his daughter, Miss I. E. Moody, a party of English tourists who are travelling through British Columbia, are stopping at the Phair.

J. H. Soady, who for some years has been principal of the Nelson schools, has sent in his resignation, as he has decided to abandon teaching for the study of medicine.

Dr. Charles Doherty, superintendent of the Kootenay Lake hospital, Nelson, B. C., is in the city for a vacation. He has been visiting his parents in Eglinton, North Toronto.—Toronto Globe.

Mrs. J. S Carter leaves this morning for the Pan-American exposition at Buffalo and after spending a short time there will proceed to her former home at Kansas City, Mo., where she will spend some months. Mr. Carter accompanies her as far as Spokane.

A party of Americans consisting of Mr. and Mrs. E. C. Cooke, Mr. and Mrs. J. O. P. Wheelright and maid, Mrs. W. D. Shutter of Minneapolis, and Rev. J. H. Tuttle and Dr. Geo. M. Tuttle of New York, returned yesterday afternoon from an outing on the C. P. R. houseboat which has been anchored at the mouth of Midge creek on Kootenay Lake. They expressed themselves as greatly pleased with the trip and will carry away pleasant memories of the week spent in fishing and sight seeing in the Kootenays. The party will leave today for Revelstoke to spend several weeks along the main line among the Rockies.

ARRANGING FOR MONEY.

Montreal Aug. 13.—A special meeting of the shareholders of Vancouver and Lulu Island and Kootenay and Arrowhead railroads was held at the C. P. R. offices today for the purpose of authorizing the issuing of bonds provided for at the last session of Parliament. Work on both lines is in active operation. The Lulu Island road to Steveston will be completed in the autumn and the Kootenay and Arrowhead from Lardo to Trout Lake City about the same time. The Kootenay and Arrowhead serves the silver lead mining district of the Lardo district.

TRAIN HELD UP.

Dennison, Texas, Aug. 13.—J. B. Davis, deputy marshall at Colbert, I. T., arrived here tonight from the scene of the robbery at Caney. Six men have been arrested on the charge of commiting the robbery. These men were arrested at Caney and taken to Atoka today. The operator at Caney when he heard the shooting suspected the train was being held up, put out the light in the depot and telegraphed to Atoka, 11 miles away for officers. Within two hours after the robbery was committed, a blood hound had trailed these men to their homes.

LOOKS FOR PEACE.

London Aug. 3.—Frederick W. Holl, United States member of the international court of arbitration at The Hague who is in London after prolonged visits to St. Petersburg, Berlin and Vienna, sails for New York on the Kaiser Wilhelm der Grosse, August 14. In an interview he expressed the opinion that the outlook for international peace through arbitration was brighter than ever before.

SMALL REVOLUTION.

Washington, Aug. 13.—Consul general Cudger, writing to the state department under date of July 29th, reports that on July 26 and 27, about 25 revolutionists entered the towns of Gatun, Behol and San Pablo, on the line of the Panama railroad, midway between Panama and Colon, made prisoners of the alcade and several policemen, and retired to the mountains taking with them what arms and provisions they could find. A general uprising seemed imminent and the government was becoming alarmed at the situation.

CASES ENLARGED.

Rossland, Aug. 13.—Two men came up at the police court today as a result of Saturday incident when a Northport smelter man was maltreated. Colistro, an Italian from Northport, pleaded not guilty and his solicitor secured an adjournment until Thursday, bail for $1,000 being renewed. Beamish, a member of the Rossland union, also secured enlargement to the same day. The latter is charged with intimidation and assault.

CANUCKS FOR ENGLAND.

Montreal, Aug. 13.—News has been received here from Ottawa that a Canadian regiment will be sent to represent Canada at the King's coronation. They will be organized in the same manner as the regiment sent to the Jubilee ceremony, but will be considerably larger.

TENDERS.

Tenders will be received by the undersigned up to the 20th day of August, 1901, for the purchase of the stock in trade of general merchandise, book debts, business and good will of the late William Thomas Beadles, of Salmo, and Erie, B. C., storekeeper. The property consists of a two-storey frame building at Erie, with a stock of general merchandise, and a stock of general merchandise at Salmo.

Intending purchasers may bid for the whole or either of the stocks.

Stock lists and inventories can be seen on application to James Bannerman at Erie, B. C.

Dated this 18th day of July, 1901.

MACDONALD & JOHNSON,
Solicitors for James Lawrence, Administrator of the estate of William Thomas Beadles.
