ZINC QUEST BEGINNING

Field Work Will Open at Sandon Early This Week

P. Argall and A. C. Garde to Collect Data for W. R. Ingalls' Report--Outline of Program to be Followed

The field work that will form the first step in the investigation of the zinc resources of British Columbia undertaken by the Canadian government will begin during the present week. A. C. Garde arrived in the city from Ottawa Thursday night and now awaits the arrival of Phillip Argall of Denver, whom he is daily expecting to join him.

Mr. Argall is one of the best known mining engineers of western North America, and has had many years' experience in the study of zinc deposits and their treatment. He has lately been engaged in the study of zinc mines in New Mexico. He has not yet reached Nelson but will probobly do so tonight.

The plan outlined is that P. Argall and A. C. Garde shall visit the zinc mines in the province, examine the ores, make the best possible estimate as to the extent, learn the cost of transportation and treatment in each case, and forward numerous and large samples, as thoroughly representative as may be, to Denver to W. R. Ingalls, who will thoroughly test them. Later Mr. Ingalls will visit the province himself and will then make a full report to the minister of the interior, through Dr. Haanel, superintendent of mines of the dominion.

The report will deal with the following matters:

1. Examination of present development of mines and apprximate determination of tonnage of ores immediately available; occurrence and character of the ore and future access, together with the cost of mining.

2. Examination of present methods of milling.

3. Investigation of adaptability of the ores to the new methods of concentrating —magnetic, electrostatic, and so forth.

4. Study of conditions affecting marketing of concentrates, including the question of smelting in British Columbia or elsewhere in Canada.

5. Investigation of the desirability of utilization of zinc ore with silver content.

Seen by a reporter of The Daily News yesterday Mr. Garde said:

"The government's intention evidently is that the work shall be thoroughly done. We are instructed not to spare time, labor or expense in collecting information on all the points that have been raised. Mr. Argall and I shall start out as soon as possible.

"Yes, our program is already arranged, in outline at least. As it is already late in the season we shall visit the mines at the highest altitudes first, and endeavor to get through with our work on them before the snow comes. Afterwards we shall take the districts at lower levels in order of convenience. We shall go first to Sandon by way of Kaslo. Ainsworth being at a low level and warm may safely be left to near the last.

"We shall take numerous samples of zinc ore from each mine, getting representative specimens of all kinds. We shall have them assayed here by competent men and tabulate the results. Sample shipments of about 500 pounds each will also be sent to Denver for a thorough test at the smelter there which is specially equipped for analysis and treatment of all kinds of zinc ores.

"Mr. Ingalls will visit Kootenay later to review the work done by Mr. Argall and myself, and will have all the results collected by us for his use in preparing his report to the government. He and Mr. Argall have often collaborated before and each thoroughly understands the other's methods.

"The report asked for by the government is a most comprehensive one; special importance is attached to the economic and commercial aspects of the zinc mining and manufacturing industries. The investigation means full compliance with the requests repeatedly made by mine owners' associations and boards of trade. The object is to make possible the profitable mining and treatment of British Columbia zinc, so that it may be independent of foreign tariffs and foreign trade conditions.

"There is not the slightest doubt that this province has great zinc deposits. Heretofore the wealth in zinc, which should be a magnificent asset in itself, has been a detriment. The presence of zinc in silver lead ores has incurred a penalty at all smelters. The problem calling for solution now is that of devising methods and means to make the zinc deposits a source of wealth. Zinc is worth about 20 per cent more than lead and is not nearly so dependent for its value, as lead is, on the trade conditions of other countries.

"A favorable report from Mr. Ingolls will mean much to the mine owners of Kootenay as well as to the whole country. It will add a new industry of great possibilities, and enhance the value of more than half the mining properties.

"I earnestly hope that the owners and managers of mines containing zinc ore, will facilitate our work by allowing us prompt and easy access to the properties. We shall, as far as possible, let them know, as nearly as we can know ourselves of the probable date of our arrival in each case.

"I was greatly impressed by what I saw during my stay in eastern Canada. It is a land of plenty and prosperity. It seems to me to be the country just now with the most pomising future."

CRANBROOK'S CELEBRATION.

Tomorrow To Be a Great Day in East Kootenay.

(Special to The Daily News)

Cranbrook, Sept. 2.—The people of Cranbrook are preparing for what they believe will be the greatest day in the history of East Kootenay, so far as celebrations are concerned. Since Labor Day has been established as Cranbrook's annual holiday each year has brought forth a better program and larger crowds. The committee this year have been exceedingly industrious, and have prepared a program that is conceded to be the best in the line of sports ever presented to the people of this district, one of the leading features and the one in which greatest interest is being manifested is the hose'reel race between the fire companies of Moyie and Cronbrook. Cranbrook won the trophy at Moyie on Dominion day and Moyie is making every effort to win back the laurels lost on that occasion. The two militia companies of Fernie will be here in full force, accompanied by a band and not less than 200 citizens of that enterprising town. All industrial institutions of the district will be closed down on Monday to permit the employees to come to Cranbrook to celebrate. Already the hotels of this city have been deluged by applications for rooms on that day, and a conservative estimate places the number of visitors for Labor Day at from 1200 to 1500. The citizens of Cranbrook appreciate the interest that is being manifested and are fully prepared to take care of the great crowd of visitors that are sure to be here. The parade will include militia companies, labor organizations, the fire companies of Moyie and Cranbrook and floats representing the milling and commercial industrial districts. Fair weather is all that is needed now to make Labor Day at Cranbrook this year an unprecedented success.

Considerable interest is shown in Cranbrook for the forthcoming fair at Nelson and it is possible that there will be entries in all the various departments including the baby show.

The beginning of the hunting season was celebrated in this district by a large number of the local nimrods going forth early in the morning and as a rule they met with most satisfactory success.

ACTIVITY IN BOUNDARY

TWO IDLE MINES JOIN THE LIST OF PRODUCERS

THE ELKHORN AND THE JEWEL NOW TO BE WORKED

(Special to The Daily News)

Phoenix, Sept. 2—Work has recently been resumed on two important Boundary mines that have been idle for some time, but which have heretofore been well known producers.

On the Elkhorn, in the high grade belt, adjoining the Providence, which lately came into the limelight of publicity through the quarrels of the shareholders, development has been resumed, and a new shaft is being sunk. Some months ago the Elkhorn was incorporated as the Boundary-Elkhorn Mines, Ltd., Phil McDonald and James Sutherland, two old times of Greenwood, being the chief owners. These gentlemen developed the Elkhorn for years and brought it to the producing stage, every foot of work being paid for from the rich silver lead ore dug out of the property, and leaving them a handsome balance besides paying all costs and the price of the property itself, as well. It is believed confidently that the new shaft will make the mine a producer to such an extent that the new company will realize sufficiently from the output to pay for a new machinery plant, soon to be installed if all goes well. In the past the Elkhorn has shipped over 800 tons of ore that has given results of over $100 per ton.

The Jewel mine, in Long Lake camp has also recently resumed operations after several years' shut down. The property is owned by the Jewel Gold Mines, Ltd., an English corporation, and it is the most prominent claim in the camp mentioned, being about six miles from Eholt. In the past some 1300 feet of development work has been done on the Jewel, and about 2500 tons of free milling gold ore was sent to the smelters. The property is equipped with a machinery plant and J. H. Smith is at present in charge of the work being done. The Jewel was recently examined by engineers on behalf of the Le Roi No. 2 company at Rossland.

THOUGHTFUL JAIL BREAKER

Writes a Consoling Note to the Press and Explains Matters

Rushville, Ind., Sept. 2—Oliver O. Jones, former cashier of the defunct bank of Arlington, in jail charged with embezzlement, and an Italian, under arrest charged with burglary, broke jail here early today by sawing the boards from a window on the second floor.

Jones left a note behind for the press, in which he said: "In order to save myself and my reputation and credit, I have gone to a place not far off, where I may soon be able to satisfy and protect those who were the cause of my being in jail. If I am given my liberty for a few months, in less than a year from this I will be able to return and make good again."

SENTENCED A GRAFTER

Pittsburg, Sept. 2—Ex-captain James Wilson of the Alleghany police department, convicted on charges of graft in the recent crusade against illegitimate resorts in this city, was today sentenced to serve a term of six months in the workhouse. The case was appealed.

TO SAVE THE VICTORIAN

St. Johns, Nfld., Sept. 2—A number of steamers are fitting out here to proceed to the stranded Allan liner Victorian in Belle Isle straits. Three fishing steamers have been lost in the straits. The crews escaped.

ROOSEVELT IS MODEST

His Name Will Not Appear in the Treaty of Portsmouth

The Document is Practically Ready and Will be Signed Tomorrow--No More Meetings Will be Held

Portsmouth, Sept. 2.—With the exception of a single portion of the text, the "Treaty of Portsmouth" was completed this afternoon at a conference in baron Komura's room, and, it is believed, will be signed on Monday. It consists of 17 articles.

Tonight at 9 o'clock M. Witte and Mr. de Maartens and baron Komura and Mr. Dennison began treating of the text. The treaty will not be engrossed by the two caligraphers sent by the state department. At the last moment, it was decided to have the attaches of the two missions perform this work.

The articles pertaining to the nonfortification of the island of Sakhalin, and La Parose straits, and the evacuation of Manchuria were settled. Both parties bind themselves not to fortify the island. La Parose is to be open and Japan agrees not to erect works to command the straits.

The article relating to the evacuation of Manchuria provides that the troops, immediately on the execution of the final ratifications, are to be withdrawn, respectively, to the lines of Mukden and Harbin, and the number of "railroad guards" in ordinary times is limited, but provision is made for the despatch of troops for the protection of lines in case of disorders, after the army has ended its mission.

The last point in dispute was arranged at a meeting of the Russian and Japanese plenipotentiaries which ended at 11 o'clock tonight.

As the plenipotentiaries were leaving the conference, boran de Rosen was asked if a final agreement had been reached. He did not answer.

"Will there be another meeting?"

"No," he replied, "there is no necessity for one; the clerks can do the rest."

It is understood the treaty will consist of 17 articles, preceded by a short preamble in which it is asserted, on good authority, no allusion will be made to the action displayed by president Roosevelt in the arrangement of peace.

GERMAN CHOLERA SCARE

SCIENTISTS SAY EVERY CARE IS BEING TAKEN.

AMERICANS FRIGHTENED OVER LATEST REPORTS.

Berlin, Sept. 2.—The ministry of the interior, has issued a notice assuring the public that there is no reason for anxiety on account of the appearance of cholera in Germany. The government has long reckoned on the present situation. A circular despatch was sent by the imperial department of the interior to the confederated states in January calling attention to the possibility of cholera and requesting them not to be unprepared for the infection.

The record tonight stands at 51 cases of cholera and 19 deaths, a steady increase and a high percentage of mortality.

The most uneasy news for America is that a second case exists at Hamburg. It was officially reported this evening that a laborer in St. George's hospital where the Russian emigrant died, has cholera, but it is added that the seizure is of a milder form than the previous ones. Two of the other fresh cases are in east Prussia, indicating that the infected area has widened. The imperial health office, as shown by the statement made today to the Associated Press, is confident that it has the disease in hand. The most recently reported victims are among the Russian rivermen.

Germany's two greatest bacteriologists, professors Koch and K. Von Leyden, are out of the country, one in Africa and the other in the Tyrol. Professor Adolph Kafka, also an eminent man, is professor Koch's successor as head of the institute of infection, and he has gone to the infected districts direct to take measures to confine the disease.

The institute of infectious diseases usually will be open all night examining secretions taken from the digestive tubes of persons who have died under circumstances suggestive of cholera. From time to time, corpses arrive from some parts of Germany, with portions of bodies done up hermetically.

The ministry of the interior has issued an order covering all Prussia, requiring physicians immediately after the death of any suspicious cases to send a messenger with secretions of the alimentary canal to the institute of infectious diseases.

The interval between death and the medical decision is less than twelve hours.

Professor Metchinkoff has expressed the most positive conviction that the German authorities could cope with the disease and prevent its spreading in Europe. Metchinkoff's position as chief of the Pasteur laboratory during its most famous contributions to science, and his own works, give him a recognized place as one of the foremost authorities of the world upon cholera and other epidemics.

"I can assure you," he said, "from the enquiries I have made and from personal familiarity with the cholera cases in Germany that there is no need for anxiety relative to a general outbreak of cholera, or its spread through Europe. This opinion is based on knowledge of the extremely rigorous and effective measures the German authorities have adopted to prevent its spread. Therefore there is no reason to believe that the disease will become epidemic as in 1892."

"Can there be any danger to the United States owing to the steamship lines connecting Hamburg and America?" was asked.

"I do not think so," was the reply. "Everybody in Germany is on the alert to prevent a spread of the disease, and it is my opinion that extraordinary precautions will not be necessary in the United States."

ALBERTA ELECTIONS.

Edmonton, Sept. 2.—A. C. Rutherford, the liberal leader in the new province of Alberta, was today called upon by lieutenant governor Bulyea to organize the first government for Alberta. It is expected that the first elections will now be held almost immediately.

ROSSLAND'S ORE OUTPUT.

Will Show an Increase Over Last Year. The Week's Shipments.

Rossland, Sept. 2.—The production of the mines continues steady and the week's output was 6,540 tons.

The total output for the eight months of the year ending August 31 was 225,653 tons, and should the shipments keep up for the last four months of 1905 at the same ratio as for the past eight months, the total shipments for the year should reach a total of 348,479 tons. This would be a slight increase over the output of 1904 when it was 342352 tons. It will be somewhat larger and should reach at least 360,000 tons, as the mines will produce more in the last four months of the year than they did in the first four months, and the Crown Point, which has not produced any ore for several years joined the list of shippers this week and sent a carload to the smelter which will be followed by others.

The shipments for the week ending this evening were: Le Roi 2050 tons; Centre Star, 2250; Le Roi No. 2, 150; Le Roi No. 2, milled, 400; Spitzee, 120; Crown Point, 30; Jumbo, 400; total for the week, 6540, and for the year 225,055 tons.

AN INFANT MURDERER

Little Indian Boy Shoots a Playmate and Will Be Tried For Murder

Vancouver, Sept. 2.—A young Indian boy named Makiaula was brought down here today under arrest on a charge of murder, his victim being an eight-year-old Indian girl named Klabalaswege.

The scene of the tragedy was Memkomis, a village on an island, some miles up the coast. The little girl was playing with some dolls on the beach, when Makiaula came down there and commenced kicking the dolls about. The little girl ran, crying, to the house to tell her father, being followed by Makiaula. The latter evidently thought he would get into trouble, and threatened to shoot the girl. Two brothers of the girl were present but did not think Makiaula would carry his threat into execution. He appeared soon afterwards with a gun, which he deliberately discharged at the girl. The charged entered her breast and killed her instantly.

Makiaula has been committed for trial at the fall assizes here. He is only about 12 years of age.

DROPPED DEAD.

Well Known Victoria Merchant Expires Very Suddenly.

Victoria, Sept. 2.—Michael Baker, the well known produce merchant of this city, and a prominent worker in agricultural affairs throughout the province, dropped dead this morning. Mr. Baker, feeling faint, stepped into a store to rest, and the spell having passed off he started for the streets again, but dropped dead before he reached the door.

DEPARTMENT OF MARINE.

Vancouver, Sept. 2.—Colonel Anderson, engineer in chief of the department of marine, arrived here today from Ottawa on departmental business.

LOCAL NEWS OF THE DAY.

J. Fred Hume J. G. Bunyan and J. Teague are on a hunting trip at the north end of Pass valley. The country is said to be full of game of all kinds.

A. C. Garde received a letter from P. Argall last night stating that he would arrive in Nelson this (Sunday) evening from Spokane. Messrs. Argall and Garde will start out on their tour of inspection on Tuesday morning.

Dr. G. A. B. Hall has received notice from the deputy provincial secretary that the lieutenant governor in council has rescinded the order in council appointing him physician to the provincial gaol at Nelson. Dr. Hall does not know who is to succeed him.

NATIONAL ASSEMBLY

Russian Thanks Pouring in From All Classes and All Regions

Move Forward Now Generally Approved Throughout the Empire--Elections Over by December 15th

St. Petersburg, Sept. 3.—Though the national assembly, during the first day's issuance of the emperor's manifesto calling for the assembly, was given more adverse criticism than praise, and the press took a far less favorable view of the assembly than did foreign newspapers, the value of the assembly, the extent of its powers, and the move forward it marks in the path of reform, is now being generally recognized throughout the empire. A flood of addresses of thanks is coming in from all classes and from all regions.

The project is being taken up for careful study and consideration, and much criticism is wearing away, and the talk of boycotting the assembly by the liberals is no longer heard. Public discussion of the assembly and the steps that are being taken to put it into effect are bringing to light minor defects and impracticable provisions in the project, and the ministry of the interior is busy answering questions and furnishing interpretations of doubtful points. It is apparent some modifications, either by imperial direction or by the douma itself, will be necessary before the assembly becomes a practical working body. One of the principal complaints was that the border provinces were not to be represented in the first assembly, but this has been removed by the action of the Solsky commission for the elaboration of a scheme in these districts, in which the system of local organization prevails in the governments of Russia proper, and the machinery of which was appropriated by the Bouligan commission for election purposes is nonexistent. Reports to the contrary are absolutely without foundation. The elections in the empire must be ended by December 15th.

A STEEL RAIL BOUNTY

CLAIM AND COUNTER CLAIM IS BEING MADE.

WHOLE ACT NEEDS A FULLER INTERPRETATION.

(Special to The Daily News)

Ottawa, Sept. 2.—The new auditor general, John Fraser, has withheld the bounty of $61,000 due the "Soo" Steel Company on structural steet which was properly earned, until such time as a competent court has given final judgment as to whether or not the $61,000 paid the same company some months ago for bounty on steel rails was a proper payment under the Act.

J. L. McDougall disputed the payment, but passed the amount under the advice of A. B. Aylesworth, K.C., who said that under the Act it would have to be paid.

The department of justice reported otherwise and an order in council afterwards was passed against any more payments of bounty on steel rails. There is a heavy enough protection on Canadian steel rails at $7 a ton, apart from the bounty.

The steel companies are claiming the duty and the bounty.

The new auditor wants the $61,000 which was wrongfully paid returned to the treasury and expects to succeed. The Act will no doubt be made clear at the next session of the parliament as to any bounty being paid in future on steel rails.

A Montreal paper referring to the matter says:

The bounty on steel rails which has bee nin effect up to this time, amounts to $3 per ton, and as the works at the "Soo" are manufacturing rails at the rate of 500 tons per day, and the works at Sydney at the rate of 350 tons per day, the loss in revenue to the two companies in question by the change will approximate $2550 daily.

The Act under which a bounty of $3 per ton on steel rails was claimed and successfully maintained was brought down on August 4, 1903. At the same time a bounty was also provided on other manufactured articles such as wire rods, beams, joist channels, etc., as well as upon pig iron and steel ingots. The Act reads as follows:

"The Governor-in-Council may authorize the payment of the following bounties on the undermentioned articles manufactured in Canada from steel produced in Canada from ingredients of which not less than fifty per cent of the weight thereof consists of pig iron made in Canada, viz.: On rolled round wire rods, not over three-eighths of an inch in diameter, when sold to wire manufacturers for use in making wire in their own factories in Canada, a bounty of six dollars per ton.

"On rolled angles, tees, channels, beams, joice girders, or bridge building, or structural rolled sections, and on other rolled shapes not round, oval, square or flat, weighing not less than 35 pounds per lineal yard, and also on flat eye bar blanks, when sold for consumption in Canada, a bounty of three dollars a ton."

The contention was raised by the Lake Superior Corporation and subsequently upheld that the words "and other rolled shapes not round, oval, flat or square, weighing not less than 35 pounds per lineal yard," clearly meant that the bounty of $3 per ton applied to steel rails.

PHOENIX BUILDING BOOM

City Hall, Opera House and New Hotel To Be Erected.

(Special to The Daily News)

Phoenix, September 2.—This week plans were drawn by Frank Knott for the new city hall for this city, and the corporation is now ready to receive tenders for the erection of the building. It will be a two story structure, with ample facilities and rooms for the city clerk, chief of police, fire department, and have three strong cells. It will be located in almost the centre of the corporation, and is expected to cost somewhere in the neighborhood of $4000.

Excavations for the new miners' union opera house and hall, which have been going on for a month, are now practically finished, and a force of carpenters is now framing the timbers for the building. In the excavations some 2000 cubic yards of rock and earth have been removed. The building when completed will cost in the neighborhod of $10,000 and will be complete in every way—a building that has been much needed here.

Work on the new Brookyn hotel, being built on the site of the building of the same name, destroyed by fire last February, is in an advanced state, and Messrs. Marshall and Rumberger, the proprietors, are pushing it as fast as possible. The plasterers and painters are now in charge, and the furniture which will be of the best, is on the way from the east. When completed and furnished and ready for business, the new Brooklyn, which occupies one of the best building sites on Dominion avenue, will have cost the owners more than $20,000.

THE SHOOTING SEASON

Good Bags Made at Grand Forks—Local Happenings.

(Special to The Daily News)

Grand Forks, Sept. 2.—Yesterday being the first day of the shooting season, a good percentage of the male population were out gunning at daybreak. It is estimated that many hundred birds were shot within a radius of ten miles of the city.

Grand Forks has just been visited by a succession of showers for the last three days, which has done incalculable good in extinguishing the fierce forest fires raging in this vicinity.

The centrifugal pump recently installed by the city has failed to indicate the pressure guaranteed by the Fairbanks company, under the repeated tests made upon it.

G. W. Tripp, manager of the British American Trust company here, left yesterday for Payette, Idaho, where he will be married to Miss Wood of that place. The marriage will take place on the 6th inst., after which the happy couple will return to Grand Forks to reside.

Dr. Frank, dominion veterinary inspector of Victoria, arrived here yesterday and will likely be located here permanently.

The dominion government is calling for bids for the erection of a large stock corral near the C. P. R. depot. It is estimated that it will cost over $3000.

THAT LICENSE TANGLE.

Supt. Hussey Trying to Straighten Out Matters at Grand Forks.

(Special to The Daily News)

Grand Forks, Sept. 2.—Supt. Hussey of the provincial police has been paying an official visit to Grand Forks and Cascade district. License commissioner A. E. Rainey is authority for the statement that Mr. Hussey is acting on behalf of the attorney general's department, and is investigating into the Cascade license question. Mr. Rainey added that he had received letters from the attorney general stating that his compulsory resignation was the result of a misunderstanding, and that the department would endeavor to straighten out the entanglement later on.

THE USUAL CHARGES.

Petition is Filed Against Return of Alberni Member.

(Special to The Daily News)

Victoria, Sept. 2.—A petition against the return of Manson, the conservative candidate in Alberni, was filed this morning at the court house here on the usual charges of corruption and impersonation.

AMERICAN SOLDIERS IN TORONTO.

Toronto, Sept. 2.—The 74th regiment N.Y.N.G., arrived here from Buffalo, N.Y., this morning, accompanied by a band of 60 pieces. The visiting guards who carried their arms and complete marching outfit, were received by an enormous crowd which cheered them when they stepped from the train. The officers of the Queen's Own regiment were assembled at the station and gave the American officers a hearty welcome.

The visiting soldiers marched, with the band playing martial airs, to their camping ground, and all along the line of march they were cheered by the crowds.

KEEPS UP EMBARGO

British Government Will Not Alter the Cattle Regulations

Declines to Admit, However, That Any Discrimination is Existing Against Canadian Cattle in Particular

(Special to The Daily News)

Ottawa, Sept. 2.—There is no chance of the British embargo on Canadian cattle being removed. A despatch to the state department from colonial secretary Lyttleton makes this clear. The despatch was in reply to protests prepared during the last session of the Canadian parliament and forwarded to the imperial authorities.

It states that the matter has been reported upon by the British board of agriculture and the British government has given it the fullest consideration, and regrets it is unable to propose to parliament any amendment so as to present a law which required the slaughtering of cattle immediately upon arrival.

The memorandum of the British board of agriculture on which the government acted is given. It states the regulation is no obstacle to the development of a large cattle trade and gives statistics to prove this. The cable declares the "existing law does not cast any stigma on Canadian cattle as it applies also against the United States, the Argentine, Australia and other colonies." It is discredited as only a sanitary law. As experience has shown how rapidly the foot and mouth diseases spread when once introduced, it adds: "The enormous losses which British agriculture has suffered in the last 30 years, mainly by reason of increased pressure from colonial and foreign competition, makes it more than ever necessary that precautions should be taken against the introduction of diseases, consistent with the requirements of colonial producers and the interests of consumers at home."

STRANGE PHENOMENON

Peculiar Light Observed on Beach of The Atlantic.

Kittery Point, Me., Sept. 2.—A phenomenon attributed by many persons to the recent earthquakes in Maine and New Hampshire, was observed on the beach directly in front of a local summer hotel during last night. When the tide was half way in a brilliant white light covered the whole beach from a height of about six inches.

At the same time a strong sulphurous odor was emitted from the same locality, it being so offensive that it was necessary to close tightly all doors and windows in the hotel. The light and odor asted for about two hours, disappearing with the full tide.

BOUNDARY SHIPMENTS.

Over 16,500 Tons Were Sent Out During Last Week.

[Special to The Daily News]

Phoenix, Sept. 2.—The ore shipments from the mines of the Boundary for the last week were:

Granby mines to Granby smelter, 12,665 tons; Mother Lode to B. C. Copper smelter, 3616 tons; Emma to Nelson smelter, 288 tons; Oro Denoro to Granby smelter 66 tons; Crescent to Trail, 30 tons; Providence to Trail, 60; Mavis to Trail 20 tons. Total shipments for the week, 16,635 tons; total for the year to date, 587,642 tons.

The Boundary smelters this week treated as follows: Granby smelter, 12,895 tons; B. C. Copper smelter, 4,097 tons. Total treatment for the week, 16,992; total treatment for year to date, 602,526 tons.

JAPAN AND CANADA.

Congratulations Sent to Komura and Invitation Repeated.

[Special to The Daily News]

Ottawa, Sept. 2.—The secretary of state on behalf of the Canadian government has sent congratulations to baron Komura and at the same time has renewed the invitation to visit Canada on the termination of the proceedings at Portsmouth.

CANADA'S POPULATION.

Gratifying Increase Since Last Census In 1901.

(Special to The Daily News)

Ottawa, Sept. 2.—The census department places Canada's population at over six millions, the increase since 1901 being 802,215.

EASTERN CABLE SERVICE

New York, Sept. 2.—The service to Japan by the Formosa route was resumed today, but the wires are working slowly.

STRIKE AT REVEL.

Revel, Russia, Sept. 2.—A general strike has been proclaimed here as the outcome of the recent movement. Measures have been taken to prevent disorders.

EDITORIAL NOTES.

Together the Standard Oil company and the United States Steel Corporation paid last year dividends aggregating $60,319,677, which will surprise many of their foreign competitors, and, incidentally, interest economists who are making a close study of the distribution of wealth.

The special correspondent of the London Times with the first Japanese army writes that the highest praise that Kuropatkin has received comes from the Japanese. It expressed itself in their obvious delight when they heard the name of his successor. The old Russian commander had a strong hold upon the sympathies of the Japanese people because he was reputed to be opposed to the war; upon the Japanese staff because no one could appreciate as well as these past masters of the profession of arms the extent of his difficulties. Their army was made; his army he had to make in the field. Against what was, perhaps, the most thoroughly prepared force for its object in history was arrayed a force of incongruous parts whose organizer never enjoyed undisturbed authority in the execution of his plans. It has been said that Kuropatkin was a schoolmaster and not a field general. That may be. It was his misfortune that he had to teach his troops in face of the enemy the things which those who would win in war against a trained foe must learn in peace.

PROVINCIAL POLITICS.

About a year ago the McBride government, acting under strong pressure, sought a way out of the East Kootenay coal and old lands tangle. Mr. Green, the chief commissioner of lands and works, issued a special form of license for the lands in question, which, while it extracted double fees from applicants, guaranteed them practically nothing in return, except perhaps the right to enter upon costly litigation.

By throwing the burden of settling up the conflicting claims upon these lands, on the applicants, possibly the government imagined that the courts would settle the matter and that the different members of the cabinet might be able to turn their attention to the many other urgent problems that are calling for action. Mr. justice Martin's decision made it clear that the chief commissioner had no power to issue any such special license as he attempted to do and it was thought that the government would abandon its former tactics and "come out of the woods." But apparently Mr. McBride has no intention of grappling resolutely with the East Kootenay lands, any more than he has any apparent desire to tackle any of the several other matters that call for prompt administration, the prevention of forest fires, for instance. The premier prefers to let the coal and oil lands question drag on its weary length through the courts rather than take instant action and dispose of the matter once for all, as eventually he will be forced to do.

In the meantime one of the richest sections of the province is being held back, and capital is kept out of the country, all because of the procrastinating premier's want of energy and business administration.

But if Mr. McBride is slow to act in some matters he is developing rapidly in others.

Dr. G. A. B. Hall, who has been the provincial jail physician here for some years, has received notice that his services are no longer required by the provincial government. No cause has been assigned for this sudden cancellation of Dr. Hall's appointment, and very naturally the move has caused a good deal of local comment. Has premier McBride decided to instal the spoils system in its entirety in British Columbia, just as premier Whitney is now accused of doing in Ontario? The removal of Dr. Hall without any assigned cause, in itself may be a matter of small importance to the community at large, but if the doctor has been thrust aside because of his well known liberal leaning in politics, just to make way for a conservative nominee, the fact should be speedily made clear.

SLOW SIGHT

Naturally bright children with irregular vision often appear stupid and inattentive—not recognizing words quickly. This defect we remedy with glasses Do not deprive your child of best possible vision.

CANADIAN CELEBRITIES

GENERAL MANAGER OF THE GRAND TRUNK PACIFIC

HAS ABLY FILLED ANY NUMBER OF IMPORTANT POSITIONS

The popular notion of a general manager, his work and his woy of doing it is as far from the "life" as the operatic soldier is from the real thing. The public regards the railway official as a sort of hereditary lord, the line his empire and the employees his subjects. How hard seems the lot of Larry, the track walker, in comparison to that of the general manager. One travels his section on foot, the other rocks over the road in a private car, cushioned, painted and varnished.

The general public does not know that the G.M. wakes earlier and works hours after Larry's day is done; that while the track walker smokes his pipe in peace, forgetting utterly low joints and high centres, flapping fish plates and loose locking bars, the general manage's brain is busy with the multitudinous problems that confront him—a score or more, each demanding immediate attention. How hard the lot of the man with the scoop! And yet, when he reaches the end of his run he drops off and goes his way with never a thought of the 97, until the caller comes to call him for the next trip.

But if you watch the general manager, you will see him swinging down before the car comes to a stop, and if you follow him he will lead you to the general offices. His basket is piled full of papers and upon his desk there are a dozen documents that might well be marked "perishable." Some are important letters that must now be answered by wire before he can think of rest. The pressing matters disposed of he dismisses his secretary and picks up half a dozen letters marked "Private" or "Confidential." Some of these are acknowledged by wire, others answered in his own hand. Now he leans back, lights his cigar and begins to think, think, think. "Today" is done and he is already doing tomorrow.

Almost, we may say, as the tail lights of today disappear in the west the head light of tomorrow looms on the eastern horizon. There is the schedule made out by his chief clerk, or assistant to the general manager. It opens at 9 a.m., when he must receive the deputation of leading citizens who come to ask him to elevate his tracks. At 10:30 the member for Squedunc wants to see him on a personal matter. At 11 the grievance committee will be here with an ultimatum. And so runs the tale often with bit ten or fifteen minutes between dates. By the time he has finished reading the bill of fare his cigar has burned up close to his moustache. He scorns to look at the clock but he knows his head is weary and now he remembers that he is married (or ought to be) and that somewhere in the roaring city dinner awaits him. Then comes a late dinner with cranky servants, another cigar, a passing glance at the evening paper, and that's the general manager's day's work.

And you who may envy Frank W. Morse, who, the day he was forty entered upon his important duties as vice-president and general manager of the Grand Trunk Pacific may find comfort in the fact that while you miss the gain and glory of this great job, you also side-step the work and worry that must necessarily go with the building and management of one of the most gigantic and important railway projects ever undertaken on this continent.

Morse is a good name. Wherever the railway has reached its thin fingers where ever the thin strands of steel have been trailed over the sear Sahara through the sand dunes of the south country the mountain fastnesses of the far west or the wilderness of the north—that name is known. For wherever the railway runs there runs the telegraph and wherever the click of the key is heard men have heard of the Morse System. Somewhere in New York—in 23rd street, I believe—there is a stone set in the wall of a house and upon this stone is chiselled the name of Morse. Doubtless that house was once the home of the famous inventor.

However all this, I fancy has little to do with the remarkable success of this young man who is to manage the Grand Trunk Pacific. He had in him the elements of success. He also had the advantage of a good general education, supplemented by a technical education in his chosen field. Mr. Mrose's mother comes of the famous family of Seamans, well known in the newspaper world. From her side he inherits his critical eye, his artistic taste, his keen judgment and love of literature. From his father, we may assume, he has his mechanical genius, his love of "doing things." He enjoyed work and was a stranger to the clock. Sundown and payday were only incidents to him—like sleep and a good cigar.

This side of 40 he had filled a number of important positions, each a little better than the one he had left. Though always apparently content he was ever ready to quit if a wider field opened, with more work and better pay. But upon this Grand Trunk problem I believe he has set his heart, and it would probably take a tempting offer to win him away from this interesting bit of empire building. It may sound absurd to speak of a man of 40 as building his monument, and yet if he succeeds in bridging the continent here in the north, he will have helped to build homes, not for hundreds but for hundreds of thousands of the homeless of earth. It is a task over which the greatest of our builders might well enthuse—this linking the Atlantic with the Pacific, putting a new crimp in the cosmos, and shrinking the sphere by half a thousand miles.

The saving of a full day's sail is of itself vastly more important than would appear at a passing glance. But still more important to Canada and Canadians is the development of the west. When the Grand Trunk Pacific is finished Canada will have more railway mileage than England. This dream will come true in less than ten years. All the west wants is mileage and lots of it. The Canadian west is further advanced than was the territory west of the Missouri when the last spike was driven at Promontory, Utah, completing the first bridge across the continent. That was less than forty years ago. See what an empire lies west of the Big Water today. Our children will still be young when this "Last West" has furnished homes for 50,000,000 people. Of this I am absolutely confident, and equally confident that one of the chief factors in this upbuilding of the dominion will be the Grand Trunk Pacific.—Cy. Warman, in the Canadian magazine for September.

ALL PRIZES, NO BLANKS

EVERY BABY IN KOOTENAY MAY WIN REWARD OF MERIT

PRESIDENT ROOSEVELT WILL BE INVITED TO AID GOOD WORK

If any Nelson baby fails to win a prize at the baby show in connection with the fair it will be because of the neglect of parents to enter it. "All prizes and no blanks" will be offered for competition, Mrs. Harris has met with great success in her canvass which has not by any means been confined to Nelson. Every town in Kootenay has been informed that the show will be held and that any British Columbian baby is eligible for championship honors. Incidentally all have been invited to contribute to the prize list.

The first reply was received from mayor Hodder of Kaslo, who assured Mrs. Harris that the enterprise would receive support from there. He promised to do his best to secure financial support and suggested that several Kaslo ladies should see about sending a good representation of prize babies. He also added the suggestion that E. E. Chipman, gold commissioner and government agent of Kaslo, would fill a position on the judges' bench most acceptably.

Mrs. Harris is strusk with the suggestion—which had already occurred to her—that president Roosevelt would be pleased to receive foreign recognition of his distinguished advocacy of the full cradle and his efforts in its behalf. He will certainly be invited to aid in discouraging race suicide in Kootenay.

J. A. Gibson has gallantly kept his promise and has secured funds for the endowment of a special bachelors' prize, which will be one of the best features of the show.

The hotelkeepers have contributed handsomely and their prize will be a credit to their liberality and public spirit.

Many others have promised to contribute but have not yet decided upon the form or the special destination of their prizes.

Mrs. Harris wishes all who have promised assistance to communicate with her definitely as soon as possible. When all available prizes are known Mrs. Harris will prepare a special prize list with the classes for competition, regulations, prizes and all other information on the subject. She has been careful in all her canvassing to avoid hurting the prospects of collections for the general exhibition fund. So well has she performed the task undertaken that the baby show bids fair to be a source of considerable revenue to the fair while it will itself be absolutely self-supporting.

Entries may be made with Mrs. Harris personally or with secretary Annable at his office on Ward street. It is important that entries be made early so that ample provision may be made for the comfortable accommodation of babies and mothers in the opera house on the morning of the great event.

KEEP YOUR HEAD UNCOVERED.

The Constant Wearing of a Hat Propogates Dandruff Germs.

There are many men who wear their hats practically all the time when awake, and are blessed with a heavy shock of hair; yet if the scalps of these same men once became infested with dandruff germs, the parasites would multiply all the quicker for lack of air. Baldness would ensue as the final result. Newbro's Herpicide kills these germs and stimulates unhealthy hair to abundant growth. Herpicide is a pleasant hair dressing as well as a dandruff cure and contains not an atom of injurious substance. Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

There is nothing like Sunlight Soap for Household Utensils.

When you have to use hard water it is not an easy matter to wash household utensils. To do good washing you should have good soap and soft water (rain water). If you use hard water you must have good soap, and the best soap you can get is Sunlight Soap because it softens the hard water and makes a copious creamy lather. Use Sunlight Soap for all household purposes and the results will surprise you.

SUNLIGHT SOAP

ASK FOR THE OCTAGON BAR.

Sunlight Soap washes the clothes white without injuring the hands.

NEW YORK FASHION LETTER

New York, Sept. 2—There are certain materials which never go out of fashion. Lace is one of these. It seems as if this ever popular material is to be more the rage than ever this winter for gowns and wraps.

A gown made entirely of lace is not always effective and as a consequence the dressmakers are combining it with other materials or with some other lace. The smartest effects are obtained in this manner. Embroidered batiste or linen combined with lace is always charming. Two kinds of lace, a heavy and a light quality will produce some beautiful results and chiffon with lace is still popular.

As said before, simplicity is to be the keynote of this season's fashions and in lace gowns marks the smartest models of this season. The lines are long and rather severe and the trimmings are on the some order. A very charming model was made of what is known as all over lace. The skirt is gored and finished with a medium width flounce and is slightly fuller in the back, forming a short train. The waist is just as simple, closing in the back, collarless and with short puff sleeves. The only trimming is appliques of heavier lace in long lines down the skirt.

A decidedly novel coat to be worn with a citron colored cloth costume, is made in princess style. The coat is cut off like a man's cutaway, fits tightly at the sides and in the back and is held together by a rosette of black satin ribbon. It is cut with a low neck effect and filled in with a gulmpe if lace and lingerie. A wide collar of embroidered satin outlines the gulmpe. The sleeves are shirred to the elbow and have a turned back cuff of embroidered satin with the frilled sleeve so fashionable now, reaching just below the elbow.

According to the latest reports from Paris striped materials are to be extremely fashionable. The stripes are to be had in all widths, from the barely visible pin stripe to the conspicuous widths that will be worn by the extremists. The color schemes are generally light.

Black, always fashionable, is to be especially smart this winter. A black gown always looks distinguished and has the added advantage of being the most economical in the long run. A black costume for evening wear trimmed with bands of handsome jet, is the most effective gown for a matron.

La Mode effects styles in lingerie as well as the outer garments and the tendency here as in the case of gowns is towards simplicity. The numerous frills, berthas and numerous other fluffy trimmings are no longer used on night gowns, chemise and corset covers of the up to date woman. Petticoats are the only piece of underwear which still have billowy flounces and frills.

The finest French batiste and nainsook are the materials chosen for the finest underwear and the coarser but more durable cambric is seldom seen. What is lacking in trimming is made up in the sheerness of the material.

The chemise which was pushed into the background for a time has regained its place in popular favor and appears in some very pretty designs. A line of beading or insertion and lace holds the smartest chemise over the shoulders and sometimes the shoulder strap is made of ribbon. This is especially suitable for wear in the evening with decollete dresses but is also seen on models intended for every day use.

Empire gowns are the most popular for chemises and night gowns with the short waist line defined by a band of broad beading just below the bust. Ribbon is run through the beading and tied with long ends and loops in front.

The use of ribbon is one of the distinctive and extravagant features as well as the stylish lingerie. After one has bought the ribbon necessary for the beading, the bows and knots used so lavishly on modern underwear, this item of expense is quite a large one.

The lovely designs in embroidery, insertion and flouncing are pressed into service for trimming some of the smartest underwear. However these are better for petticoats, night gowns and drawers than for chemises and corset covers.

Embroidered medallions may be used for lace and are easier handled than the other trimmings. An effective trimming may be made by buying little embroidery butterflies in various sizes and setting them around the neck of the chemise or corset cover with the tips of the wings touching and a narrow edge of valenciennes frilled into the irregular line made by these embroidered motifs.

Tiny squares of very fine embroidery are also set into fine lingerie with valenciennes insertion or with beading monograms or initials set into the garments with lace and looking as if embroidered to order.

ESTELLE CLAIREMONT.

GRAIN AND STOCKS

The New York stock market opened steady and held strong throughout the session today. The opening prices showed a slight advance over last night's close. C.P.R. opened at 160, the low mark for the day and closed at 161 1-2, the high price, this shows a good rally after paying a dividend on Sept. 1; Amalgamated Copper opened at 82 3-4, gaining an eighth, sold down to 82 1-4, and closed at 82 3-4; U.S.S. common, opened at 36 3-8, sold up to 36 3-4, broke to 35 7-8 and closed at 36 1-4, preferred opened at 103 5-8, gained a quarter, sold down to 102 78, and closed strong at 103 5-8; St. Paul opened at 178, advanced 3-4 and again touched 178, closing weak at 178 1-4; U.P. opened at 131, sold up to 131 5-8, the close, the low price of the day was 130 7-8; Atchison held very steady and did not have its break with the other stocks earlier in the week, today it opened at 90 1-4, sold down to 89 5-8 and closed at 90 1-8.

Grain—Liverpool closed 1-8 higher. Our market opened steady and held strong from the opening. September wheat opened 79 1-4 @ 3-8, closed 79 5-8; another break of four or five cents is looked for in wheat soon.

Reported by I. C. Major and Company, Nelson, Sept. 2.

Next Monday, Sept. 4th will be the first of a series of dances which will be held in Fraternity hall. This popular hall has been leased by Mrs. McIntyre for the coming season and it is the intention to put on a weekly dance. The price of admission will be one dollar for gentlemen, ladies with escorts free. The dining room has been fitted up and refreshments will be served continuously from 11 o'clock. It will be the aim to make the weekly dances a popular success. The music will be the best the city affords.

"Wonderfully Good." That is always the unanimous verdict of the countless juries of intelligent people who use Quaker Brand canned fruits and vegetables. They are the best to be had. Your grocer keeps them. Give them a trial; you'll enjoy them.

NELSON FAIR

THE FAIR PRIZE LIST

ELEVEN DISTINCT CLASSES ARE OFFERED EXHIBITORS.

ALL ENTRIES TO BE IN BY 16th SEPTEMBER

The prize list for the Nelson Fair which will open on September 20th and remain open for the two following days contains 11 distinct classes enumerated as follows:

Class A—Poultry—$235.00 in prizes.

Class B—Fruits—$363.00 in cash prizes besides silver cup and diplomas.

Class C—Vegetables—Class D—Field Produce—$180.00 in cash prizes for the two classes.

Class E.—Miscellaneous—$50.00 in cash prizes and 17 diplomas.

Class F.—Floral—For amateurs only.

Class G,—Painting.

Class H—Work by children under 15 years of age.

Class J—Fine Arts—Lace work, embroidery, etc., for work that has never taken a prize at any exhibition.

Class K.—For fancy work, etc., done since October 1, 1904.

Special prizes—A list of which will be given later.

In Class A.—Poultry—The cash prizes amount to $235. All poultry must be on the grounds not later than 8 p.m., September 19th, and no birds will be allowed to compete for more than one prize. Birds competing in their own class cannot be shown in the collection. Judging takes place between 8 and 10.30 o'clock on September 20th.

First, second and third prizes are given for the following entries:

Best pair Turkeys, male and female, bronze or black.

Best pair of Turkeys, male and female, white.

Best pair of Geese, male and female.

Best pair of Ducks, male and female.

Best pair of Dark Bramahs, male and female.

Best pair Light Bramahs, male and female.

Best pair Buff Cochins, male and female.

Best pair of Partridge Cochins.

Best pair of Langshans.

Best pair Barred Plymouth Rocks.

Best pair White Plymouth Rocks.

Best pair Silver Laced Wyandottes

Best pair White Wyandottes.

Best pair Golden Wyandottes.

Best pair Black Minorcas.

Best pair White Minorcas.

Best pair Polish ,any kind.

Best pair Brown Leghorns.

Best pair White Leghorns.

Best paid Buff Leghorns.

Best pair Rose Comb Leghorns, any kind.

Best pair Hamburgs, any kind.

Best pair B. B. Red Game.

Best pair Cornish Indian Game.

Best pair Duck Wing Game

Best pair B. S. Game.

Best pair Red Pyle Game.

Best pair Pit Game.

Best pair Andalusian.

Best pair Black Spanish.

Best pair Orphingtons, buff.

Best pair Bantams, Black Breasted.

Best pair Bantams, Duck Wing.

Best pair Guinea Fowl.

Best pair Turkeys, bred in 1905, any breed.

Best pair Geese, bred in 1905, any breed.

Best pair Ducks, bred in 1905, any breed.

Best pair Anconas.

Six best developed chickens, any breed, not less than three being pullets. (Each to compete in their own class, viz., American, Asiatic and Mediterranean.)

The association may pay prizes of $1 first and 75 cents second for the best Cockerel and Pullet in each class.

First and second prizes will be given in the following:

PIGEONS.

Best pair Fantails, white.

Best pair Fantails, black.

Best pair, any other variety.

CAGE BIRDS.

Best Canary, green cock.

Best Canary, yellow cock, free from black marks.

Best Canary, crested cock.

Best Canary, splashed cock.

Best collection of Canary Birds.

Best other Songster.

Best Parrot.

Best Cockatoo.

ORNAMENTAL.

Best pair Pheasant, any variety.

Best pair Quail, any variety.

Best pair Swans, any variety.

RABBITS.

Best pair Lop-eared Rabbits.

Best pair common Rabbits.

Best pair Belgian Hares.

EGGS.

Best Hens. Eggs, fresh, one dozen, white, heaviest.

Best Hens' Eggs, fresh, one dozen, brown, heaviest.

Best Turkey Eggs, fresh one dozen, heaviest.

Best Duck Eggs, fresh, one dozen, heaviest.

SWEEPSTAKES.

To the exhibitor showing the largest and best display of poultry, $15; $10; $5.

MINERAL EXHIBIT.

This department is under the direction of the president of the association, James Johnstone.

Awards will be given for district exhibit for gold ore specimens, silver and gold-copper ore. All mineral in competition must be the product of British Columbia.

Two special prizes are donated by E. W. Widdowson, Nelson, as follows:

One gold medal for best mineralogical sample displayed at exhibition.

One silver medal for best display of mineral from any one district.

Specimens winning the above medals to be displayed in Nelson for 30 days after the fair.

In connection with the mineral exhibit a special prize will be given for the best cabinet of ore specimens.

DISTRICT PRIZE.

The president of the association has donated a silver cup to be known as the president's cup. This is put up for the largest and best dislay of Fruits and Vegetables, and for this purpose the country has been divided into eight districts and the association has selected one man in each section to look after his district, who will be paid for any expense he may be at up to $15.00 for each district.

District No. 1 comprises all the country east of Kootenay lake, including Crawford Bay, Creston and Rykerts. J. E. Houghton and Fred Little in charge.

District No. 2 comprises Ainsworth, Kaslo and points north of Kaslo. G. O. Buchanan in charge.

District No 3 comprises the country on the north side of the arm of Kootenay lake from Hoover's ranch to Ainsworth. J. Hyslop and A. B. Shannon in charge.

District No. 4 comprises the country on the south side of the arm of Kootenay lake, from Procter to Ward St., Nelson. J. A. Kelly in charge.

District No. 5 comprises the country from Ward St., Nelson, to the Columbia river, Slocan river and Slocan lake section. James Williams in charge.

District No. 6 comprises the country north of Castlegar, on Arrow lakes and Fire Valley. Robert Shiell in charge.

District No. 7 includes what is known as the Boundary country, including Grand Forks, Greenwood, Midway, etc. J. D. Honsberger in charge.

District No. 8 includes the country south of Castlegar, Trail, Waneta and Rossland. D. F. Jelly in charge.

Vancouver, B. C.

Backache

is more than tiredness. Hard work does not bring sharp, shooting pains. And a dull, nagging pain—that a night's sleep won't drive away—is never due to weariness.

Nine times in ten, backache says Kidney Trouble. Pain is nature's way of telling you that your Kidneys are weak—that they cannot do nature's work—that they want help to get well and strong again!

GIN PILLS

are the greatest help that sick kidneys can have. They relieve the pain, strengthen the weak parts, and completely cure all Kidney Troubles. They are prepared solely to cure the Kidneys. They do that one thing—do it quickly, thoroughly, completely.

We know what wonders GIN PILLS are. That's why we authorize any druggist to refund your money if they fail.

50c box, 6 boxes for $2.50. at your druggist or direct from

THE BOLE DRUG CO., WINNIPEG, MAN

EQUITABLE LIFE SOUND

SO DECLARES THOMAS F. RYAN, THE MAN IN CONTROL

PENDING INVESTIGATION SHOULD APPLY TO OTHERS

Seattle, Sept. 2—Thomas F. Ryan, the financier of New York city, who recently acquired the controlling interest of the Equitable Life assurance society of New York, in an interview here today with the Associated Press, said:

"As to the Equitable Life, my purchase of the control of the stock and inducing Mr. Morton to take the presidency was only a public duty which any number of other men would have readily performed had they been aware of the consequences of a continuance of the dissensions among the old officers and directors. I happened, from my relations to some of the parties engaged in the conflict, to have a better view of the situation than some of the others. That was all.

"Thee is not the slightest doubt about the strength of the Equitable. It is as sound as the bank of England. It will hereafter be run as an insurance company pure and simple, with an eye singly to the welfare of the policyholders. As to the investigation by the New York legislature nothing could be better for policyholders of the Equitable. Mr. Morton will afford the committee every facility, and will aid in every way, to the end that a full and thorough investigation shall be made. If anybody connected with the company has been guilty of wrong doing he should suffer, and if anyone has anything in his possession belonging to the company, he must give it back. We insist however that the committee shall demand from all other insurance companies that the committee be given the same facilities for an insight into their management as the Equitable affords. We feel that it is not only fair but clearly in the interests of all policyholders. The management of all great insurance companies must become an open book, or confidence, which is the very foundation on which they exist will not soon be restored. The federal government should have practically the same supervision of insurance companies as it has over national banks. The officers and managers of these companies have in their keeping a most sacred trust, and they should not object to the best interests of their business. I am quite sure that president Roosevelt has given this matter much thought, and I hope he will express his opinions to congress in his usual vigorous and straightforward way."

"I suppose you are not pleased at the adverse comment of some of the newspapers regarding your purchase of control of the Equitable?"

"Oh, that can't be helped. It will all come out right in the end, when they see that the directors, Mr. Cleveland and his cotrustees are electing men to stand by Mr. Morton in his determination to have a thorough house cleaning and put the company on an economical basis, reduce the cost of insurance to the policyholders and manage the company in their interest, and with due regard to public sentiment. The new management must in this way appeal to the public conscience; it will then command confidence everywhere."

E. O. Windsor, the regular, independent piano tuner is in the city. Leave orders for him with the Canada Drug and Book Company.

Miss Jessie Blakemore's kindergarten will reassemble in St. Saviour's church mission room on Tuesday next, September 5th. Terms on application.

DR. CHARLES FLESH FOOD

For the Form and Complexion

Has been successfully used by leading actresses, singers and women of fashion for more than 35 years.

Wherever applied it is instantly absorbed through the pores of the skin and its wonderful nutrition feeds the wasting tissues.

REMOVING WRINKLES

as if by magic, one application often showing a remarkable improvement.

Dr. Charles Flesh Food is positively the only preparation known to medical science that will round out hollows in the neck and produce firm, healthy flesh on thin cheeks, arms and hands.

For Developing the Bust

or breasts, shrunken from nursing; it has the highest indorsement of physicians. Two boxes are often sufficient to make the bust firm, large and beautiful.

SOLD BY DEPARTMENT STORES AND DRUGGISTS.

Regular price, $1.00 a box, but to all who take advantage of this SPECIAL OFFER and send us one dollar, we will send two (2) boxes, in plain wrapper.

FREE A sample box and our book, "Art of Massage," fully illustrated, will be sent free to any lady sending 10 cents to pay postage of mailing. Address.

Synopsis of Regulations for Disposal of Mineral on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory.

Coal—Coal lands may be purchased at $1 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2000 pounds shall be collected on the gross output.

Quartz—Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end on the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at $1.00 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper in the Yukon territory, of an area not exceeding 100 acres.

The patent for a mining location shall provide for the payment of a Royalty of 2 1-2 per cent of the sales of the products of the location.

Placer Mining—Manitoba and the N.W.T. excepting the Yukon Territory—Placer mining claims generally are 100 feet square; entry fee, $5; renewable yearly. On the North Saskatchewan River claims are either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1000 feet. Where steam power is used claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N.W.T., excepting the Yukon Territory—A free miner may obtain only two leases of five miles each for a term of twenty years renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged beds or bars of the river below low water mark, and subject to the rights of all persons who have, or may receive entries for bar diggings or bench claims except on the Saskatchewan River where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Dredging in the Yukon Territory—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the first day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental $100 per mile for the first year and $10 per mile for each subsequent year. Royalty same as placer mining.

Placer Mining in the Yukon Territory—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 100 to 2000 feet. All other placer claims shall be 250 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of a Mining Recorder's office. One extra day is allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim 1000 feet in length, and if the party consists of two, 1500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee $10. Royalty at the rate of two and a half per cent on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least $200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed to be abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum—All unappropriated Dominion Lands in Manitoba, the Northwest Territories and within the Yukon Territory are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 1920 acres for such period as he may decide, the length of which shall not exceed three times the breadth. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well, will be sold to the prospector at the rate of $1 an acre, and the remainder of the tract reserved, namely 1280 acres, will be sold at the rate of $3 per acre, subject to royalty at such rate as may be specified by Order in Council.

W. W. CORY,

Deputy of the Minister of the Interior.

PROPOSED CAR SERVICE

REGULATIONS SUBMITTED TO RAILWAY COMMISSION.

IMPORTANT TO ALL SHIPPERS AND FREIGHT RECEIVERS

The attention of the boards of trade, merchants, and business men generally is directed to the proposed car service rules which have been submitted to the board of railway commissioners for Canada.

The board is of the opinion that any rules which may be adopted should, as far as circumstances permit, be of uniform application throughout the dominion.

The board will hear any evidence affecting these rules at New Westminster on September 19th. The proposed rules are as follows:

1. All freight in carloads, or less, handled by shippers or consignees, is subject to a service charge of $1 per car, per day of twenty-four hours, or part thereof, if not loaded or unloaded within 48 hours.

Exception—Twenty-four hours' additional will be allowed on cars loaded with coal and coke in bulk, boards and deals.

2. Cars delayed under load beyond the free time, for any reason for which shippers or consignees are responsible, will be subject to the car service charge.

3. On cars placed before 12 o'clock noon, free time begins at noon; if placed after 12 o'clock noon, free time begins at 7 o'clock a.m. following. Cars to be accessible at all times during the period allowed for loading and unloading. Time lost through interruption, for which the railway is responsible, to be added to the free time allowance.

4. No charge will be made for Sundays or legal holidays.

5. When, owing to wet or stormy weather, loading or unloading is temporarily impracticable, agents will extend the free time allowance so as to give atogether the full free time period of suitable weather.

Agents must immediately report particulars to the manager, and note in their daily reports "Waived Rule 5" opposite each car affected, giving dates on which the car service charge has not been assessed.

6. When, owing to irregularities in transportation, cars have been "bunched" and are tendered to the consignee in numbers beyond his ascertained reasonable ability to unload within the authorized free time, he shall be allowed such additional time as may be necessary to unload the cars so in excess, by the exercise of due and usual diligence. The agent must at once report the particulars to the manager and obtain ratification.

7. When both cars and tracks are owned by the same private party, no charge will be made.

8. Consignees must be promptly notified of the arrival of their freight, and will be held to have been notified when notice of arrival is given at their address or place of business, or if notice is mailed to the address given on the waybill, consignee will be held to have been advised at 7 a.m. of the day following.

9. Twenty-four hours will be allowed to consignees after notice of arrival, in which to pay charges, if any, and give orders for special placing of delivery. If not ordered within that time car will be considered as for public team track delivery and will be placed accordingly, and if not unloaded within the free time will be subject to the car service charge.

Twenty-four hours addtional will be allowed for clearance of customs, where the destination is a port of entry.

Where the destination is not a port of entry, 48 hours will be allowed for clearance at the outside port of entry.

10. The extra time after notice of arrival for paying charges and ordering, will not apply on cars for which agents have previous standing orders or arrangement for placing for regular delivery on designated tracks or private sidings.

11. The delivery of cars to private tracks shall be considered to have been made either when such cars have been placed on the tracks designated, or when they would have been placed but for some condition for which shipper or consignee is responsible.

12. If, after placing, cars are ordered to another siding on the same road to complete loading or unloading by the same shipper, or the same consignee, and no switching or reconsigning charge is made, the free allowance will be computed from the original placing, less the time occupied in replacing the car.

13. If car is reshipped or reconsigned, the original consignee shall pay $1 per car per day, or part thereof, for all time in excess of the period allowed by these rules, so that 48 hours free time may remain to the party taking delivery.

14. Should a switching road give notice that it is unable to receive cars for private sidings, owing to conditions for which shippers or consignees are responsible, then any railway having cars for such consignees must so advise them. Car service will accrue until *the cars are accepted by the switching* road and will be collected by the road which is holding them.

15. Cars held in transit for inspection, cleaning, bagging, completion or change of load, change of destination, etc., and detained over the time allowed for such purpose, will be subject to the car service charges, which must be billed forward as directed by the accounting department. If such shipments are transferred to other cars, the car service charges will follow on the cars to which transfer is made. The forwarding agent, or in the case of change of destination, the agent by whom arranged, must make the following notation on the bill of lading, "Subject to car service charge at ———." The amount must also be inserted in the "back charges" column of the bill of lading, when practicable.

16. So-called industrial, logging or private roads handling cars for themselves or other parties, must be charged car service on all cars delivered to them from the time placed upon the interchange tracks until returned thereto, allowance being made for the time necessary to perform the switching service (not to exceed twenty-four hours), in addition to the free time herein authorized.

17. Cars must not be held short of the destination for the purpose of evading these rules. Loaded cars held back *for cause must be reported to the manager.*

18. When cars are delayed or refused by consignees because of alleged incorrectness in the railway weights or charges, car service must be collected if charges or weights are found to be correct.

19. Agent must in all cases collect car service charges as soon as accrued. Should payment be refused, agents will withhold delivery, either by sealing or locking car or placing it where it will not be accessible.

20. When the contents of a car are apparenty not worth the combined freight and car servce charges and consignee fails to take delivery, the agent must wire the manager for instructions.

21. All complaints, disputes and uncertainties which may arise under these rules must be referred at once to the manager. The manager may reduce or cancel the charges should he consider that the circumstances justify such action.

Claims should be filed with the manager direct, and must be accompanied by receipted bills for the amounts paid.

TELEGRAPHIC TICKS

Japanese in the United States dislike the peace terms.

Friction is developing in the Scandinavian negotiations.

Turkey objects to the scheme of the powers for the autonomy of Macedonia.

St. Petersburg declares that there is no cholera in Russia.

Glenwood the racing stallion has been sold to English breeders for $22,000.

The conversion of lord Dunraven to Roman Catholicism is announced at Rome.

France wants an indemnity from Morocco for the imprisonment of an Algerian subject.

Pot hunters near Victoria have killed a dog and filled Evan Cameron full of buck shot.

NELSON'S NEWS OF THE DAY

The city band gave a very enjoyable concert at the Ward street bandstand last evening.

All banks and other places of business will be closed tomorrow, Labor Day being a statutory holiday.

Miss Blakemore's kindergarten class will open Tuesday morning in the mission room of St. Saviour's church.

Tomorrow being Labor Day the general delivery at the Nelson postoffice will be open only from 10 to 12 a.m.

A concert at Lakeside park by the city band is announced for this afternoon, weather and street car service permitting.

Miss Johns has returned to Nelson and will again preside over the millinery department in the Enfield company's store.

Percy F. Godenrath, travelling representative of the Victoria Colonist, and Mrs. J. Godenrath, left last night for the coast and the Portland fair.

The winning ticket at the lottery for a cushion held in Kerr and company's store is No. 167. The holder is requested to call at the store and receive the prize.

In St. Paul's Presbyterian church today at the morning service the choir will sing the anthem "Therefore with Angels," by Novello; in the evening Mrs. Melville Parry will sing as a solo Shelley's "Abide With Me."

There will be the celebration of the communion of the Lord's Supper in the Baptist church this morning, and the hand of fellowship to new members. This evening the pastor will deliver a labor address. Special music will be provided.

E. G. Smyth and Mrs. Smyth leave for San Francisco this morning. Mr. Smyth will enter the dental department of the university of California which opens on Monday, Sept. 11. W. B. Shaw succeeds Mr. Smyth in the C. P. R. telegraph office.

Rev. J. T. Ferguson, pastor of the Presbyterian church, returned yesterday afternoon from Six Mile point where he has spent several weeks resting. He is greatly improved in health and will take both services in St. Paul's church today.

Everyone who took in the Sunday afternoon sails on the Kokanee during the past summer will easily recall how pleasant they were. Tomorrow, Labor Day, a "last call" for the season will be made. The Kokanee will leave the city wharf at 8 a.m. going to Kaslo, Lardo and way points, including Procter, and reaching the city again in the evening at 6 o'clock. Specially low fares have been given for the round trip.

A. Miller, manager of the LaFrance mine, returned to Greenwood yesterday morning after an extended visit to the company's properties.

G. O. Buchanan arrived from Kaslo yesterday morning and returned in the afternoon. He will not be in Nelson again until he has collected the month's bounty returns.

Mrs. McIntyre will give the first of her series of dances in Fraternity hall tomorrow evening. The chief feature will be the music. The orchestra will consist of Mrs. McIntyre, violin; F. Irwin, conet; Leon McCandlish, Clarionet; Oscar Thompson, piano.

Messrs. Thomas and Erickson have divvided the hotel interests held by them in partnership since 1898. The dissolution took effect at 6 a.m. on Friday, Sept. 1. G. Erickson will in future control the Grand Central and A. Thomas the Lakeview hotel. The division was for business reasons solely. Messrs. Erickson and Thomas are still partners in many mining interests.

A. H. Gracey and Mrs. Gracey arrived from Camborne last evening. Mr. Gracey reports work going on steadily at the Eva and Oyster-Criterion mines. He is here to attend the annual meeting of the Eva Mining company, which will be held on Tuesday.

P. Beltram was visited at the Royal hotel yesterday by a party of his countrymen, L. Cippario, D. Vincenzo, U. Delgudice and E. Bertolino, to congratulate him on his recovery. All were accomplished musicians and enjoyed themselves playing Italian airs.

HUME—J. Barclay Moyle; C. Currie; F. T. Moore, J. J. Loulit, K. N. Jones, Voncouver; J P. Mason; J. J. Binns, C. H. Fraser, Winnipeg; J. Sharp, J. Goodwin, Toronto; J. R. Brown, Spokane; E. Sterling, Greenwood; Mrs. H. Medill, Nanaimo; G. H. Green, Green City; W. J. S. Walker, Trout Lake; T. H. Brady, Montreal; C. F. Caldwell, Kaslo; Miss V. Wolfe; R. Parker, H. P. Stevenson, Cranbrook.

STRATHCONA—F. McBeath, C. E. Watson, Calgary; A. Miller, C. S. Galloway, Greenwood; H. W. Roberts, Seattle; E. W. Hendershot and wife, Montreal; A. H. Gracey and wife, Camborne; S. Daney, Ferguson; H. E. Fox, Albuquerque; L J. Vienne, R. T. Vienne, Paris; Mrs. James Anderson, Largs; J. Anderson, G. O. Buchanan, Kaslo; T. H. Trethewey and wife, Molly Gibson mine.

GRAND CENTRAL—G. A. Graham, D. Mooney, E. McCarty, Salmo; H. Oliver, Lardo.

NELSON—J. W. Harritt, Spokane.

MADDEN—W. J. Hilligoss, Ymir; F. T. Benson, Slocan; E. W. Bridgman, Victoria; J. Sersin, Miles' Ferry; T. Wall, LaFrance creek;

ROYAL—F. Lilly, Five Metals mine; E. W. Dynes, Greenwood; V. P. Wiesenthal, Spokane; C. L. Gordon Ellensburg.
