OCCUPYING SAKHALIN

Japanese Have Landed in Force Upon the Island

Russian Commander Discreetly Retires After Blowing up all Government Buildings and Firing their Stores

St. Petersburg, July 8.—A landing of Japanese troops on the island of Sakhalin was officially reported tonight and startled the military circles in St. Petersburg, though it had been realized, since the defeat of admiral Rojestvensky, that the Japanese were able to take possession of the island as soon as they thought fit.

The strength of the landing force cannot be ascertained but the garrison of the island is too weak to offer any effective defense.

Though the Japanese seem unwilling to risk a grand battle with general Linevitch, pending the peace meeting at Washington, the landing of troops on Sakhalin is considered to express Japan's decision regarding the formal conclusion of a general armistice at the interval before the meeting.

The possession of the island is an important card in Japan's diplomatic contest at Washington.

The Japanese fleet covering the landing of the troops on the island of Sakhalin consisted of two battleships, seven cruisers, three gunboats and 36 torpedo boats, and ten transports loaded with troops.

The Japanese landed at the village of Moree, between Shepwa and Korsakovsk.

The commander of the Russian detachment of trops at Korsakovsk ordered the coast defense guns to blow up and the government buildings and the work of demolishing was completed by fire before retiring.

BONNINGTON STRETCHES OUT

Wire For New Line Ordered By the W. K. P. & L. Co.

[Special to The Daily News]

Rossland, July 8.—The West Kootenay Power & Light Co., today placed an order for 25 carloads of copper wire cable which will weigh 728,000 pounds and cost $131,000.

The cable is to be used to carry the power from Bonnington Falls to Phoenix, Grand Forks and Greenwood, and other points in the Boundary country.

The cable is about half an inch in diameter and contains six No. B and S. wires wound round a jute centre. It was ordered from the Phillips Wire Company of eastern Canada. The wire will be stretched on a pole line made up of 6000 poles.

The construction of the pole line is making good progress. The poles are being delivered as rapidly as possible along the right of way.

There are about seven camps with an average of 185 men employed on the construction of the pole line and 70 at Bonnington who are engaged in building the plant and this force is being steadily increased.

It is expected that the plant and line will be completed and in running order by February 1st.

McDOUGALL RESIGNS.

Auditor General's Request For Further Powers Was Refused.

(Special to The Daily News)

Ottawa, July 8.—Auditor general McDougall resigned this afternoon.

John Lorn McDougall, M.A., C.M.G., was appointed auditor general of Canada in 1878 by the Mackenzie administration. When sir John Macdonald was returned to power in the fall of 1878, he was appealed to to dismiss McDougall and appoint a conservative to the office, but the premier refused to interfere with the 'watchdog of the treasury," and he has remained in office until yesterday, when he resigned because the government refused to amend the Audit Act in the way he wanted. Neither side of the house suported the auditor general's request.

Mr. McDougall is a gold medalist in mathematics and a silver medalist in modern languages of Toronto university. He sat for Renfrew in the Ontario legislature, 1867-71, and for the same constituency in the Parliament of Canada, 1874-78.

ROSSLAND ORE SHIPMENTS

First Run of Le Roi Concentrator is Made.

Rossland, July 8.—The Le Roi experimental concentrating plant this week sent its first shipment of the concentrates to the smelter. It is to be kept on steady operation from now on and the management states that it is operating in a satisfactory manner.

The winze driven on the main ledge of the Centre Star from the ninth level has reached a depth of 190 feet. The next step will be the deepening of the shaft from the ninth level and this is to be commenced immediately.

The ore shoot found on the 1350 foot level and which extends down to the 1550 foot level of the Le Roi continues to be developed. A station is being cut at the 1550 foot level for the purpose of drifting along the shoot at that place. The shoot is a most important one.

The following are the shipments for the week ending this evening:

Le Roi, 2000 tons; Le Roi, crushed, 150 tons; Centre Star, 2370; War Eagle, 1200; Le Roi 2, 60; Le Roi 2, crushed, 1400; Jumbo, 300; Spitzee, 150. Total for the week 7630; for the year 175,528.

ACCEPT THE INEVITABLE

RUSSIA REGARDS SAKHALIN ISLAND AS NOW GONE.

ACQUIESCES IN ITS SURRENDER AS A CONDITION OF PEACE.

St. Petersburg, July 9.—The landing of the Japanese on Sakhalin island and its probable effect on the peace negotiations is the absorbing topic here, the surrender of the Kniaz Potemkine having taken a secondary place.

This move is generally recognized as an indication that Japan intends to demand the cession of the island as one of the conditions of peace but that demand is no longer any insuperable object in the way of the termination of the war.

A GENEROUS GUEST.

Sends the Czar a Band of Beauties—Returned With Thanks.

St. Petersburg, July 8.—A preposterous offer was recently made by a Persian noble to the czar. Last spring a Persian grandee, in close touch with the Shah, paid a visit to St. Petersburg, and was accorded an informal interview by Nicholas II. The conversation, it is said, turned on the beauty of Persian working-class women, and the visitor offered to send the czar samples to see for himself. The czar thinking that this meant a gift of photographs or pictures, thanked his Oriental visitor. Straightway the matter passed from his mind. Recently, however, Tsarskoe-Selo was electrified by the arrival of a body of eight beautiful Kurd girls, selected from among the water-carriers of Teheran. They were a present to the czar from his Persian visitor. Nicholas has returned the band of beauties from whence they came, with an autograph letter of compliments and thanks.

THE OFFICIAL FOURTH.

Whitelaw Reid Celebrates in Dorchester House, London.

London, July 8.—Dorchester house, the home of the American ambassador, Whitelaw Reid, was the scene today of one of the greatest gatherings of Americans ever held in a foreign city.

The occasion was the Fourth of July reception which was postponed on account of secretary Hay's death.

The palatial house was crowded with Americans and distinguished British subjects. Among those present were: The duchess of Marlborough, lord and lady Cheylesmore, sir Sydney and lady Waterlow, sir James and lady MacGregor, chief justice Alverstone, and the earl and countess of Yarmouth.

CONTEMPT OF COURT.

Judge Leamy Must Appear Before the Vancouver Registrar.

(Special to The Daily News)

New Westminster, July 8.—Judge Leamy of Greenwood was given ten days today in which to appear before registrar Beck of Vancouver, on a supreme court order by Mr. justice Morrison, for examination on a judgment summons in the case of Jenns vs. Leamy. Judgment was given before he assumed the ermine. The case was heard this afternoon in New Westminster and Mr. justice Morrison was asked for ten days for his fellow benchman to appear, when, if he does not, he will be committed for contempt of court.

JAURES' GREAT SPEECH.

Fervid Appeal to Socialists to Make Common Cause.

Paris, July 8.—The speech of M. Jaures, the socialist deputy, the delivery of which in Berlin today chancellor von Buelow prohbited, appears in M. Jaures' paper, "L'Humanite" this morning. It covers ten columns and is a fervid and masterly appeal to the socialists of all countries, particularly those of France, Gremany and England, to adopt a common program against militarism and the capitalists and to work together in the cause of peace.

COMMITTED SUICIDE.

German Naval Officer Thought Himself Disgraced.

Kiel, Germany, July 8.—First lieutenant Nirrnheim, commander of torpedo boat "S" 124, which collided with the battleship Woerth on July 5, killed himself with a revolver at his residence last night. The deed was doubtless inspired from the humiliation which he suffered over the accident and the probability of his professional career being ruined. He was the son of lieutenant general Nirrnheim.

FEAR ANOTHER RIOT.

Odessa is Quiet But Revolution Seethes Below Surface.

Odessa, July 8.—It is officially announced that quiet prevails in Odessa but it is feared in many quarters that an outbreak will follow the lifting of the state of siege.

The governor general today issued a proclamation threatening circulators of false reports with punishment under military laws.

SURRENDER MUTINEERS

Demand of Russians Upon the Government of Roumania

Desire to Make a Signal Example of Their Crime and Thus Deter Further Outbreaks Which are Reported

St. Petersburg, July 8.—The admiralty late today was informed of the surrender of the Kniaz Potemkine to the Roumanian authorities but the officials here have no details of the arrangement made between the Roumanian government and the mutineers.

No diplomatic steps have been taken but the foreign office undoubtedly will make the strongest representations against the mutineers being treated as simple deserters and demand their surrender to answer not only to the charges of mutiny but also for the murder of their officers, the bombardment of Odessa and incitement of a revolution.

The crime is one which is considered to be most odious by all nations and it is expected that the sternest justice will be meted out to the ringleaders.

Rear admiral Kruger's squadron, as soon as it can be reached, will be ordered to continue its cruise to Kustenji, and take over the battleship and place a crew on board.

The government hopes that the ignominious collapse of the mutiny on the Kniaz Potemkine will have a sedative effect on the internal unrest which has been encouraged by the naval revolt.

Serious anti-semitic riots have occured in the district around Nijni Novgorod. The educated classes of the Christian population has been attacked. The police of Makareiff, 60 miles from Nijni Novgorod, are powerless to stop the excesses there. The town was given over to the rioters for several hours.

CROP PROSPECTS.

Manitoba and the Northwest Will Have Ninety Million Bushels.

Winnipeg, July 8.—Crop prospects are rosy in Manitoba and the Northwest the June rains ceased as if arranged by calendar, last Friday, and the weather has been growing steadily hotter ever since. From all over the country most optimistic reports are coming in daily. Wheat is heading out splendidly, and the straw is strong and hardy. Barley is growing to a tremendous length, and the oat crop will also be a good one. On account of rain in the early part of the season the hay crop will be tae biggest on record.

Conservative estimates place the coming wheat harvest at ninety million bushels, although the C. P. R. estimates make it at least 100,000,000 bushels. The first important crop of fall wheat in the territories will be garnered this year.

Discussing this new western industry, the assistant land commissioner of the C. P. R. said: "The production of fall wheat in Alberta has definitely passed the experimental stage and may now be regarded as a staple industry. In fact, I would not be surprised if in a very few years it rivaled in importance the ranching industry of that district."

It is estimated, within a month of the harvest, that the crop will run from 750,000 to 1,000,000 bushels. This yield will be from two to six times greater than last year's, which totaled 162,162 bushels. The company has just issued for distribution its first pamphlet on this new industry, and now has en route to the Northwest a total of 4500 bushels from Kansas which will be distributed to Albertan farmers, while 3000 bushels in addition have already been brought in.

GERMANS REPORT VICTORY

Have Demolished 200 Naked Savages on Fish River

Berlin, July 8—Small engagements continue to take place in German South Africa. The troops, after overcoming great difficulties, are able occasionally, to close with the bands of rebel natives.

The most considerable engagement since that at Narus on June 17, occurred June 27 the official report of which was telegraphed today.

Major general Graessar with three companies, the despatch says, attacked 200 Herreros near Kochas on the Fish river, stormed a temporary entrenchment and killed many natives. The German losses were two officers and three men killed, and one officer and eleven men wounded.

KILLED HIS WIFE

Drove Her From His Home and Shot Her on Leaving

Kansas City, July 8—In full view of his neighbors John M. Crane, a mine owner, tonight drove his wife from her home and as she ran into the street, he shot her four times in the back, killing her instantly. Mrs. Crane filed a divorce suit against Crane last April.

JAPAN IS SATISFIED.

Tokio, July 8.—The news of the successful floating of the Japanese foreign loan of $150,000 caused much satisfaction here.

WAS SHOT AND KILLED

NEW YORK WOMAN TAKES LAW IN HER OWN HANDS.

HAS HER LOVER ARRESTED FOR ASSAULT AND KILLS HIM

New York, July 8.—As he was being taken to a police station tonight on a charge of assault, Emile Gendron, 42 years old, was shot and instantly killed on Seventh avenue by Bertha Claicat, a young woman with whom he is said to have been living for six years.

The man was walking between two detectives and the woman on whose complaint he has been arrested, was about ten feet in the rear when she drew a revolver from her dress pocket and fired two shots both of which took effect in his back and as he fell she ran toward him and fired a third shot killed him instantly.

The woman was then taken to police headquarters and locked up, charged with homicide.

BULLDOZING WINS OUT

FRANCE AGREES TO CONFERENCE ON MOROCCAN QUESTION.

PLACE OF MEETING IS SETTLED TO BE AT TANGIER

Paris, July 8.—Premier Rouvier and prince Von Radolin, the German ambassador, reached an agreement this evening relative to the communication to be exchanged between France and Germany regarding Morocco.

France consents to participate in a conference, having been assured in the course of the negotiations, that her interest will be safeguraded.

The official notes on the subject will be communicated to the chamber of deputies, probably on Monday.

Information obtained in diplomatic quarters show that it has practically been settlerd that the conference will be held at Tangier.

HELD A CELEBRATION.

Ambassador Whitelaw Reid Does His Duty to His Country.

London, July 8.—The belated banquet of the American society in celebration of the Fourth of July which was held tonight was the first occasion of a public meeting between Whitelaw Reid and foreign minister Lansdowne since Mr. Reid's appointment as ambassador to Great Britain. Both Lansdowne and Mr. Reid delivered speeches in which the services of the late secretary of state Hay to the world and the good relations existing between Great Britain and America were the keynote.

The dinner was held in the banqueting hall of the hotel Cecil which was crowded with resident and visiting Americans and representative Englishmen. Marshall O. Fox, president of the American society, presided. The prominent persons present included count Wolff Metternich, the German ambassador, Lang Shao Ki, the Chinese minister, Mr. Metaxas, the Greek minister, Rincorn Gallarde, the Mexican minister, and the earl of Strathcona and Mount Royal, high commissioner for Canada.

The chairman proposed a toast to the king. He was followed by lord Lansdowne, who toasted president Roosevelt, Lord Lansdowne said that among the great statesmen of America he did not know of any one who held a greater fascination for Englishmen than did president Roosevelt.

HAD TO CONVERT THEM

And Killing was the Only Effective Method of Doint it

Chehalis, July 8—Asserting that he had killed eight men to make them good, as all live men are bad, Hezikiah Hall, 59 years old, was arrested today charged with killing John Grubb, and with other serious offences in Virginia. Hall says he killed Grubb in self defence. He told sheriff Urquhart that he had killed eight men, remarking that men were never good unless they were dead and that he had run against eight men whom he had found it necessary to make good.

FARFADET IS LOST.

All Hope of Saving Submarine's Crew Abandoned.

Paris, July 9.—All hope of saving the crew of the submarine boat Farfadet which sunk last Thursday morning at the entrance to the port of Said Abdallah, is lost, the efforts made during last night to raise the vessel being ineffective.

IN SUPPORT OF UNEMPLOYED

London, July 8.—Arrangements have been completed for a monster demonstration in Hyde Park tomorrow in support of the government unemployed bill now before parliament. The demonstration will be participated in by trades union deputations from all the chief provincial cities and towns as well as the labor organizations of the metropolis.

JULIET'S HOUSE

Verona, Italy, July 8—The house in which Juliet is said to have lived and in which she received Romeo, was sold today. It was bought in by the city of Verona for $2900.

BEAT THE RECORD

Birmingham, July 8 — At the athletic sports here today H. A. Hyman of Pennsylvania university, beat the English record for the 300 yards run. Hyman's time was 31 seconds, the previous record being 31 2-5 seconds, held by Woods.

PROVIDENCE LITIGATION

All the Actions to Come up for Trial Here Next Week

Many Counsel Have Been Retained--Sensational Developments--Boundary People Interested

(Special to The Daily News)

Phoenix, July 8.—For the last two or three days there have been things doing among the directors of the Providence Mining Co., among whom there has been a struggle for control for some months past, between the Chicago and Greenwood interests. A suddenly called directors' meeting by the Chicago men who had arrived in the Boundary in force for the purpose, a special engine on the C. P. R., and proposals for peace by purchase have all figured largely in the matter, and it now has the appearance of being settled satisfactorily at an early date.

Less than a month ago the Boundary directors held a meeting and ousted the Chicago men from the immediate control of this rich mine. Then injunctions were obtained by both sides, restraining the opposite side from acting. These injunctions were to be heard in court at Vancouver on Thursday, and W. M. Law, representing the Greenwood men, and M. F. Madden, on behalf of the Chicago people, were there themselves. Meantime Mr. Madden's party had arrived in Greenwood from Chicago, determined to do or die, and to nullify the proceedings of the Greenwood directors' meeting of early June. The meeting was called for Thursday last at 5 p.m., and they figured that James H. Peet, of Spokane, an opposition director, could not get there in time because of the short notice given, and so they would practically have things their own way. Right here is where the Boundary men brought strategy into play.

According to railway timetables, Mr. Peet could not possibly reach Greenwood via the Great Northern to Phoenix, till about 6.30 p.m.—if the train was on time. But the Greenwood men knew another trick, and chartered a special engine from the C. P. R., which met the Great Northern train from Spokane, bearing Mr. Peet, at the Grand Forks' junction of the two roads, and contracted to deliver that gentleman in Greenwood at 4.50 p.m. This would necessitate pretty fast running uphill over a two per cent grade.

As luck would have it, the Great Northern was twenty minutes late in arriving at Grand Forks, but Mr. Peet was ready, and soon began his hair raising ride over the Boundary mountains, a distance of about 26 miles from Grand Forks to Greenwood. The distance was made in exactly 30 minutes, and at nine minutes after 5, Mr. Peet walked into the directors' meeting at Greenwood and took his place—much to the surprise of some of those present. It may be surmised that no time was lost on the way. The track was kept clear by the railway officials, ore and freight trains were sidetracked, and when the special engine raced by the Grand Forks station and that at Eholt, nothing was visible but a cloud of dust. The C. P. R. officials had kept their word, even though handicapped by twenty minutes in receiving the passenger.

While the meeting was in progress, telegrams were received by the directors from the coast, stating that the hearing of the injunctions had been postponed for several days till the Dimond case could also be heard, being another bone of contention between the parties to the various suits for supremacy in the company.

It is now said, as a result of these doings that have added much to the gaiety of Greenwood the past week, the various parties to this struggle for the banner high grade mine of the Boundary have come together, and an offer has been made by the Chicago people to buy out the Boundary men entire, at a price that is satisfactory to them. Mr. Peet returned home today on the Great Northern.

The mine itself is being steadily operated again, and sent out this week two cars of the highest grade ore than has yet been shipped, which will probable net the company between $10,000 and $15,000.

M. F. Madden and J. B. Heaney arrived in Nelson from the Boundary last night and are at the Hume. In conversation with a reporter of The Daily News, Mr. Madden said:

"All the cases that have been entered in connection with the Providence mine will be settled before long and I hope forever. They are set down for hearing by Mr. justice Irving in Nelson on Monday, July 17th. The directors' meeting was held in Greenwood on Thursday. All the directors were present, except Mr. Macdonald and myself who have been restrained from acting by injunction granted on an ex parte application. Messrs, Heaney, Fitzgerald, Scully and Rudolph, of Chicago, the two Greenwood directors, Messrs. Macey and Caulfild, and Mr. Peet of Spokane, were present. The Chicago directors, representing a majority of the stock, of course controlled the meeting.

"We are in control of the mine and shall be at least until the cases are decided. The sooner that is done the better we shall be pleased. There have been overtures for compromise, but we prefer a settlement by the courts. The last compromise was a failure.

"The trial may last some time. The original action to recover $294.50 that we allege was wrongfully paid, will probably come up first. It was dropped when we first compromised. Then there is an action to have the purchase of the Dimond fraction set aside. The other actions are for injunctions for various purposes, but everything really hinges on the first two.

"At a full meeting of directors last fall it was resolved that six directors' consent should be necessary to authorize any issue of stock. We had hardly got back to Chicago when three directors met and rescinded that resolution, and issued stock to purchase the Dimond fraction.

"If a minority of directors, three out of nine, representing a minority of the stock, can defy the majority and dispose of the property our interests in the mine become worthless.

"Mr. Heaney and myself will be here, that is between Nelson and Greenwood, until the cases are finally settled."

The litigation has already attracted a great deal of attention and interest. The Providence Mining company will be represented by E. P. Davis, K.C., M. F. Madden by W. A. Macdonald, K.C., the Greenwood and Spokane directors have retained Joseph Martin, K.C., J. A. Macdonald, K.C., and D. Whiteside.

DRIVEN BY ELECTRICITY

C. P. R. MAY USE NEW METHODS IN THE BOUNDARY

MAY ENABLE IT TO COMPETE FAVORABLY WITH G. N.

(From London Daily Mail)

Phoenix, July 8—Lorne A. Campbell, general manager of the West Kootenay Power and Light company, is crowding work as fast as possible on the high tension pole line now being constructed, which will bring electrical energy from the company's works at Bonnington falls on the Kootenay river, to operate the mines and smelters of the Boundary, the Cascade Water, Power and Light company not having sufficient power for the purpose.

At present there are about 200 men at work clearing the right of way for the line on the 20 mile stretch from Rossland to Cascade, and in a day or two a contract will be let for the same class of work on a stretch of 12 miles from Hardy mountain, near Grand Forks to Greenwood. From Cascade to Grand Forks the line will be largely through open country.

It is hoped to have the power available some time in September or October next, if there is no unforseen delay, in time for the dry season shortage in the Boundary, if one should prevail this year.

One phase of the situation, however, has been little spoken of, and that is the probability of the C.P.R. utilizing electricity in place of steam in the operation of its trains on the Boundary system. Already the West Kootenay company has placed orders in the east for two 5000 K.W. generators for use at their power works, and a supplementary order has been placed for four more machines of the same size and type, giving when completed and installed, some 40,000 horse power. Orders have been placed for an unusually heavy copper wire to carry the current of 60,000 volts from the hydro-electrical works at Bonnington falls on the Kootenay river.

It is asserted that these extensive preparations are made with a view to supplying the C.P.R. with electricity in the Boundary when wanted.

It is understood that the test of electricity by the C.P.R. for haulage purposes on extensive scale for heavy grades, will first be made on the Rossland hill, when if entirely satisfactory, the entire Boundary system of that railway will be changed over for electric operation. When accomplished the C.P.R. will be in a position to compete on a most favorable basis with the Great Northern in the haulage of Boundary ores and freight of every description.

W. B. Townsend of Rossland, has been here all this week on right of way matters connected with the pole line of the West Kootenay company. The substation in Phoenix will be located not far from the present substation of the Cascade company, and on Granby company ground. The line will cross the Cascade line not far from the Winnipeg mine in Wellington camp and from there will follow to a large extent the Cascade line to Greenwood. F. W. Guernsey has charge of running the survey lines, and that work is now nearly completed.

ANOTHER NAVAL OUTBREAK

Fourteenth and Fifteenth Battalions Mutiny at St. Petersburg

London, July 8—A despatch to a news agency from St. Petersburg says that a serious outbreak on the part of the men of the 14th and 15th naval battalions occurred today at Mrinkoviski barracks in St Petersburg.

The rioters, it was asserted, broke all the windows and their officers were compelltd to summon in the armed men from the various military posts. The despatch adds that a general strike was ordered for July 10, and that a great meeting is proposed.

WILL VISIT KOOTENAY

Party of Washington Journalists Coming Here

Vancouver, July 8—The party of Washington newspaper correspondents returned here this morning from Victoria and left for the east on the Imperial Limited. They were entertained at luncheon by the Tourist association and were driven round Stanley park and shown other sights of interest. They will visit the Kootenay country on the return trip.

CAUCASIA TROUBLOUS

Settlers are Supplied With Ammunition by the Government

Yet More Disorders are Reported From Baku and Erivan as Well as From Vladimir in Heart of the Country

St. Petersburg, July 8.—The Russian government is faced with a hard problem in the Caucasus. It is reported from Lenkoran, in the extreme southeastern corner of the Caucasus, that Persian bandits are streaming across the border into the province of Baku as well as into Erivan, where an order was promulgated yesterday for the distribution of 1500 rifles and a supply of ammunition to Russian settlers in the Perek territory for their defence against the lawless mountaineers.

At Tiflis four bombs were thrown during yesterday. All business life there has ceased and the peaceful population is terrorized. News of bloody collisions between Cossacks and mobs are expected. The business of Batoum is also paralyzed. The disorders at Vanonovosnesensk, a large manufacturing centre in the government of Vladimir, near Moscow, are not a new development but the climax of a six weeks' strike which was marked by other minor excesses. The workmen are said to be starving and desperate but the employers refuse to make concessions to them. There have been many converts to the revolutionary propaganda which is exceedingly active in the government of Vladimir adjoining the province of Nijni Novgorod.

OKANAGAN MINE.

Good Shipments Made to Tacoma Smelter—Railway Coming.

Seattle, July 8.—The Prize Mining company, of which H. E. Dunham, of this city, is president and general manager, is receiving some good returns from its property in the Okanagan country. Reports from the Tacoma smelter show that two shipments of ore, of 2642 and 2959 pounds each, ran $172.76 and 125.32 a ton, respectively. A 93 pound batch of crude concentrates netted $29.59 or $636.34 a ton. Mr. Dunham says that a 21 ton mill, a sawmill and several cabins have just been completed. The development work so far represents an expenditure og $37,000, including 1500 feet of underground work. The company owns 28 claims, of 233 acres of patented ground. All of the ore mined is of shipping grade.

The company has been operating for two years and there are now 500 tons or ore on the dump. The Great Northern railroad is building an extension from Midway to Princeton which, when completed, will furnish an outlet for the mines. A tramway from the Silver King claim to the concentrator is among the improvements contemplated. The distance is more than a mile and will mean a saving of $2.50 per ton in transportation.

C. P. R. ACCIDENT

Trains Collide at Pilot Butte—Three Men Seriously Hurt

Regina, July 8—At 4 o'clock yesterday morning the engine of a light freight train consisting of freight cars and a caboose, in charge of conductor Simington, and bound for Indian Head, ran into a gravel train engine at Pilot Butte. No one on the gravel train was hurt, but three men on the freight train were seriously injured. Parrott, an Englishman from Moose Jaw, with no relations in this country, had a splinter of wood from the tender driven through his leg, and slight hope is entertained of his recovery. Morow, a brakeman was standing on top of the caboose and was thrown on to a flat car, dislocating his arm but breaking no bones. Engineer Long suffered from cuts and bruises. The men were taken to the Regina hospital.

A. J. Calder, deputy commissioner of education for the Territories, has handed in his resignation, his intention being to go into law.

GOTHAM'S ASSESSMENT

New York, July 8—According to the final estimates of the commissioners of taxes and assessments, New York City this year is worth $5,912,156,227, and will pay taxes on this amount. This is an increase of $271,613,579 over the value of the city last year, as determined by the experts in this department. Of this increase $246,120,522 is charged against real estate and special franchises, the latter under the law, being charged as real estate. The balance, $65,493,048 represents the increase of the value of the personal estates of the residents of th city, which the commissioners have been able to place on the tax rolls.

TENT COLLAPSES.

Middletown, N. Y., July 8.—During a cloudburst the tents of a circus exhibiting at Warwick today collapsed killing Solomon Cohen a candy vendor of Elmira, N.Y., and slightly injuring several other persons.

A DISTINGUISHED SEND OFF.

Tokio, July 8.—Baron Kamura and his suite left Shimbashi for Yokohama this afternoon amid a hearty send off

We are just unpacking a shipment of

TYPOGRAPHICAL UNION LABEL NELSON NO. 536

ONR ZINC ORES.

Missouri-Kansas zinc operators are endeavoring to get the United States treasury department to subject Canadian zinc ore imported into the states to a duty of 20 per cent ad valorem. The zinc miners want the department to refuse to tax importations of crude ore as "lead bearing ore" when the lead in the ore is not there in sufficient quantities to be valuable commercially.

The Joplin Globe says that the particular importations which are now hurting the Missouri miners are from Canada. The sections of the tariff act involved in the controversy are No. 181 and No. 183. The essential part of section 181 says: "Lead bearing ore of all kinds shall be taxed 1 1-2 cents per pound on the lead contained therein." The essential part of section 183 reads: "Metallic mineral substances in a crude state; and metals unwrought not especially provided for in this act shall be taxed 20 per centum ad valorem."

The matter has been brought before the American authorities several times of late but up to the present time the officials have ruled against placing zinc importations under section 183, above referred to. The owners of reduction works in Missouri and Kansas want Canadian ore and are strongly opposed to the ruling asked for by the mine operators.

It is expected that a decision will be come to this week at Washington. Should the American authorities decide to tax the imported ore at the 20 per cent rate, it would, in the opinion of one of the chief ore buyers in this section from the states, mean the exclusion of all our zinc ores that are now being shipped south.

It has been suggested locally that the council of the board of trade should memoralize the federal government at Ottawa, setting out the position taken by the Missouri-Kansas mine operators and asking that the matter be left with the governor general in council to deal with by a retaliatory tariff, in the event of the mine operators being successful, and our zinc ores excluded.

EDITORIAL NOTES.

A section of the travelling Washington correspondents is slated to arrive in this city tomorrow. As mediums for advertising the resources and attractions of this district the correspondents can prove themselves very useful and the council of the board of trade as well as the tourist association should join in looking after the visitors, and in seeing that all necessary information is afforded them. The correspondents have appreciated to the full the courtesies extended to them in their long trip through western Canada and on their return to the east they will have a great deal to say of their Canadian experiences. They should be supplied while here, with good reasons for remembering their visit to Nelson and the Kootenays generally.

The auditor general, John Lorne McDougall, has resigned his office after serving 27 years. Mr. McDougall was appointed by the Mackenzie administration in 1878, the national policy year, and when the conservatives came into office after September 17th,- Mr. McDougall's resignation was demanded on the spoils system. Sir John Macdonald refused to disturb the "watchdog of the treasury" and paid that official a high compliment for his untiring devotion to Dougall has had differences with the ad-Dougall has had difference with the administrations, but has always been given great latitude. This session he demanded that the act governing his duties should be amended so as to give him more power. His request was not seriously backed up by either of the political parties in the house and the amendment was turned down, whereupon Mr. McDougall sent in his resignation as he had threatened to do. Mr. McDougall has been always a zealous official but with increasing years came an almost overwhelming sense of his responsibilities and he was at odds with almost all the departments to such an extent as at times to seriously interfere with the conduct of public business. Another public official would have long ago been retired and it is a tribute to Mr. McDougall's unflinching honesty of purpose that under existing circumstances his services have been so long retained.

So far this season, thanks to copious rains, we have been kept from forest fires, the annual recurrence of which causes such a large financial loss. Camping parties can not be too careful in seeing that their camp fires are extinguished before leaving the spot, and ranchers clearing their holdings by burning brush should watch the fires and keep them under control. Those who offend against the provisions of the law for the prevention of forest fires can not complain if they are rigorously dealt with by the authorities.

FERNIE WATER SUPPLY.

Public Meeting Called—Coal For the Dacotah—Rapid Building.

(Special to The Daily News)

Fernie, July 8.—The last car of the special order of 2000 tons of coal for the S. S. Dacotah, left the Fernie yard by the Great Northern railway yesterday morning, bound for Seattle.

All of this coal was double screened, the screenings being utilized for making coke. Coming, as this coal does, from No. 2 mine, Coal Creek ,is an assurance in itself that the trial as a steam producer on J. J. Hill's trans-Pacific liners will prove a success.

Tonight a meeting of the rate payers has been called by his worship mayor Stork, to debate the results of the meeting between the council and G. G. S. Lindsey, on the subject of the water question. The individual members of the council pledged themselves to secrecy as to the details of this meeting, so that the citizens might be able to hear at first hand from the council a true and authoritative statement of the terms of the agreement arrived at. Such is the reason given by several of the prominent members of the council for their refusel to discuss the subject except at a public meeting specially called for the purpose. That the course of the council has not met with universal approval may be gathered from the fact that a preparatory meeting of the ratepayers was called for at the office of Messrs. D. V. Mott & Son, to lay down a certain course to take in the interests of municipal ownership at the public meeting tonight.

Those who visit Coal Creek at the present time are amazed at the rapidity and clock-like manner in which the columns, eye beams, channels, and diagonals are raised by a steam motor, and put in place. Mr. Wiltshire is certainly up to date at the special work for which the Pittsburg firm appointed him. No time is lost, no idle men, no money wasted.

PLENIPOTENTIARIES SAIL

Minnesota Left for Seattle Yesterday—A Great Sendoff

Yokohama, July 8—The steamship Minnesota, having on board the Japanese plenipotentiaries, sailed for Seattle at 4 p.m. yesterday. The governor of Yokohama and service bodies escorted them to the wharf, where they were receivd by a military guard. At the pier the plenipotentiaries and their suites entered launches and were conveyed to the Minnesota, which was dcorated with flags.

Marquis Ito, premier Katsura, other members of the cabinet, and the American nsmiiter were among those who accompanied baron Kamura and his party to the Minnesota. An enormous crowd of Japanese and foreigners with bands of music, assembled at the water front and general enthusiasm was manifested. Arriving on board the Minnesota baron Kamura and those who accompanied him partook of a collation, after which the ship sailed, amid a storm of cheers. The Japanese guardship Tacca fired a salute of 19 guns as the Minnesota put to sea, escorted by a torpedo boat and a naval steamer especially detailed to convoy her out of Tokio bay.

INTERFERING IN TIBET

Russians Want an Escort for Ex-Dalai Lama

Pekin, July 8—M. Pokotiloff, the Russian minister at Pekin, has left for Washington. Prior to his departure he requested the board of foreign affairs to sanction the despatch of a small body of Russian soldiers as an escort to the Dalai Lama to the borders of Tibet. The Chinese replied that an escort was superfluous and refused their consent. Russia is apparently anxious to emphasize the fact that the Lama has her protection, and it is reported that the Lama is drawing funds from the Russian bank at Kiachta.

Minister Pokotiloff recently visited the Lama at Urga and gave him presents. The Lama is still in Urga.

Sherman and Platt Stock company at the opera house all next week.

THE DAILY WRECK

New York, July 8—Two men were killed and three injured in a rear-end collision between two freight trains on the Pennsylvania railroad at Marion, New Jersey, today. The wrecked cars caught fire but the blaze was stopped by the fire brigade.

SKIRMISHING AT FRONT

Tokio, July 8—The following official advice has been received from the Japanese headquarters in Manchuria: "Occasional collisions take place betwten the scouts on both sides of the railroad along the Fenghwa Kaiyuen and Kwangping roads. The enemy is being gradually driven northward."

Read hand bills carefully and be on hand Monday morning, July Sale. Kerr & Co.

POTEMKINE SURRENDERS

GIVES UP TO THE ROUMANIAN AUTHORITIES.

FINAL ACT ON THE BLACK SEA MUTINY.

Odessa, July 8.—Advices received here today say that the Russian battleship Kniaz Potemkine arrived at Kustenji at 2 o'clock this morning.

Kustenji, July 8.—The Kniaz Potemkine arrived here today, accompanied by a torpedo boat. She now lies in the outer harbor near the Russian guardship Psezouape, the Roumanian cruiser Elisebat, with the training ship Mirce in close proximity. General Algenescow, the commander demanded an explanation of her reappearance in Roumanian waters. The mutineers offered to surrender as deserters, but the Roumanian authorities demanded the breech locks of the battleship's guns as a pledge of good faith.

The formal announcement of the surrender of the mutineers of the Kniaz Potemkine is expected shortly. The mutineers offered to present the battleship to the Roumanian government, as they declare they are anxious that she shall not be handed over to the Russians.

Soon after anchoring the Kniaz Potemkine began exchanging signals with the royal guardship. It is believed ashore that they contemplate surrendering in accordance with the terms offered by the Roumanian government. The appearance of the Kniaz Potemkine and rumors concerning the intentions of her crew caused great excitement and attracted large crowds to the sea front. The excitement increased when it became known the mutineers offered to surrender to the Roumanian authorities as deserters.

The mutineers asked the Roumanian authorities to guarantee that they would furnish the sailors who surrendered with Roumanian passports, and also guarantee that they should not be returned to Russia. The local authorities are awaiting instructions from Bucharest, and in the meantime the commander of the port is preparing a berth for the Kniaz Potemkine.

Constantinople, July 8.—The Russian embassy have authorized Turkey to sink the Russian battleship Kniaz Potemkine if she appears at the entrance of the Bosphorus.

The Porte called the attention of the embassy to the possibility of the battleship trying to force a passage of the Bosphorus, and asked what should be done under the circumstances.

"Sink her without hesitation," was the reply.

A Turkish despatch boat was sent to try to communicate with the Kniaz Potemkine and warn her not to go to Anadolikav, and that she would be sunk if she appeared there.

St. Petersburg, July 8.—The admiralty has been advised of the arrival of the Kniaz Potemkine at Kustenji, and is now endeavoring to get in touch with rear admiral Kruger's squadron and turn it westward. The return of the rebel battleship to Kustenji was a complete surprise to the admiralty, as they were convinced that she was heading for Batoum.

Naval authorities conjecture that a large part of the crew would rather take advantage of Roumania's offer as deserters, and thereby escape punishment for their conduct, than cast in their lot with the revolutionists of the Caucasus.

Kustenji, July 8.—The flag of St. Andrew again floats over the Kniaz Potemkine and her torpedo boat. The formal surrender of the mutinous crew actually occurred at 1 o'clock this afternoon. The Roumanian officers boarded the ship on her arrival here, and called upon the crew to surrender, in which case they would be treated as foreign deserters or else leave the port forthwith. It speedily became apparent that the crew of the Russian vessels returned to this port with the intention of giving themselves up to the foreign government. They soon announced that they accepted the Roumanian terms.

FAST TIME MADE.

Grand Forks to Greenwood in 39 Minutes —Personal Mention.

(Special to The Daily News)

Grand Forks, July 8.—The fastest time ever made on any of the railways in the Boundary was made last Thursday evening by a special train on the Canadian Pacific railway running between Grand Forks and Greenwood. The special was made up of one passenger car, engine and tender, and left Grand Forks station immediately after the arrival of the Great Northern express at 3.30 p.m. arriving at Greenwood 39 minutes later a distance of 24 miles. The last nine miles were made in 14 minutes.

Cooper brothers, the well known ranchers of the valley are, up to date, credited with the greatest catch of trout ever taken in the Kettle river. While out fishing the other day these two brothers caught no less than 87 speckled trout in about three hours time. The trout were caught above Smelter lake on the north fork.

W. M. Wolverton, an old resident of this place, now of Spokane, arrived here yesterday and is renewing old acquaintances.

SCIENCE PREVENTS BALDNESS.

The Fatal Germ and Its Remedy Now Facts of Science.

It is the rarest thing in the world for a man to be necessarily bald. No man whose hair is not dead at the roots, need be bald if he will use Newbro's Herpicide, the new scalp antiseptic. Herpicide destroys the germ that cuts the hair off at the root; and cleans the scalp of dandruff and leaves it in a perfectly healthy condition. Mr. Mannett, in the Maryland Block, Butte, Mont., was entirely bald. In less than a month Herpicide had removed the enemies of hair growth, and nature did its work by covering his head with thick hair an inch long, and in six weeks he had a normal suit of hair. Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

Headaches

When the Head aches and the Tongue is Coated

it is Biliousness or Constipation. Torpid Liver is at the bottom of the trouble. And it takes Fruit-a-tives to make that lazy liver work.

Fresh fruit is fine for these troubles, but one can't eat enough fruit to do much good. The medicinal elements are in too small proportion in the ripe fruits.

A clever Ottawa physician discovered a method by which fruit juices could be combined so that their medicinal action would be increased many times.

Fruit-a-tives are these fruit juices in tablet form. They sweeten and tone the stomach and liver, cure Constipation and remove all blood impurities. One Fruit-a-tives tablet has the same curative effect on liver and bowels as dozens of oranges, apples, figs and prunes. And this action is as gentle as the fruit juices themselves.

"I have been suffering with Torpid Liver and Constipation, and find that Fruit-a-tives are just what my system requires to relieve these complaints. I hope many more sufferers will try them."
MRS. WM. TREFFRY, Burnside, Man.

Fruit-a-tives

or Fruit Liver Tablets.

50c. a box. At all druggists. Manufactured by Fruit-a-tives Limited, Ottawa.

Dressmakers know the importance of little things. It's the little things that make or mar the big ones.

THE REAL YELLOW PERIL

FROM THE EAST MAY COME THE ANTI-CHRIST.

NOT AS A MAN BUT AS AN IDEA—PESSIMISM.

(From London Public Opinion)

That the Yellow Peril has been utterly discredited is just now generally believed. The famous picture of the German Michael calling the nations of Europe together in defence of their hearths and homes is a subject for travesty. But what if this exaggerated confidence is the result of taking a wrong point of view? Following the lead of the late professor Pearson, Europe has had bad dreams of some modern Attila overthrowing its civilization by force of arms. Peace, however, has its victories no less than war, and they may prove more lasting. The Chinese empire was built up, or rather developed, by a process, not of conquest, but of absorption. A conquest of the west by the east may come about by the propagation of ideas. Christianity, itself a force depending on ideas, came from the east. From the east, also, may come the Anti-christ, not as a man, but as an idea. Here then it is, surely, that we come into touch with the true Yellow Peril.

The spread of rationalism and the growth of socialism, combined with the epidemic of a blighting individualism, which threatens the very lives af the poor in both Europe and America, have prepared the social soil for the seed of a new faith. The neo-rationalist is not the coarse creature of a decade or so ago. His methods are more insidious. They have about them the semblance of reason. It is admitted that Christianity is admirable—in theory. But, it is asked, is the world any the happier for it? Individuals may be, but what of the world at large? No, it is urged, human nature is too weak, or the struggle for life is too great, for the teaching of Christianity to be accepted any longer as practicable. What shall take its place? So far, criticism of the creeds has been destructive. If Christianity fails because mankind confessess itself too weak or too pleasure-loving to adopt its restrictions, something approaching *utilitarianism* will be put forward in its place. Of course, it is not forgotten that a religion of humanity has been heard of before. It arose in Italy with the Renaissance, and its altars were raised again in revolutionary France. But, unless appearances are deceptive, Japan is offering a religion of humanity which may have far-reaching effects, because it promises reporse in the place of rapine and individual calm as a substitute for social strife. Whether it be false or true is not the question of the moment. East is still east, and west is west; but the fact remains that the fascination of Bushido is already working upon the minds of the thoughtful who gaze upon its effects from afar.

Baron Suyematsu's recent study of the history of Chinese expansion published by the Central Asian Society, and Mr. A. M. Latter's commentary on it in the June issue of the Independent Review, at least call for careful consideration on the part of the leaders of public opinion in this country. In his latest book, Mr. Dicey has declared the ground cleared for the growth of collectivism. Mr. Latter coincidentally concludes that the lesson of Japanese self-sacrifice in the present war is a lesson in the virtues of collectivism. In fine, we are asked to believe that in Japan every man is alike ready for death or for pleasure (where pleasure is not subversive of the interests of the community), because for his welfare and the welfare of those dependent upon him society is ready to hold itself responsible as a matter of duty, not of charity; whilst every man is taught and convinced that it is impossible for him to have any interests materially divergent from that unit of the state (usually his family) to which he belongs. Thus, "reason unaided produces a spirit of self-sacrifice as complete as any that the most emotional religions have called forth." The individual becomes lost in the family; the family in the state. . . The ancestor worship of China and the Shintoism of Japan challenges comparison with the Christian creeds, while, incidentally, those recognized entertainments, the Geisha of Tokio and the "flower-girl" of Nankin may find their counter-parts in western homes because western home life is becoming less and less a national characteristic. Japan, in short, so we are asked to believe, has said the last word in the world-old discussion of the "Why" and "Wherefore"; and that word acknowledges the uselessness of such questions. Hence, there is nothing for it but for each, greeting pleasure and death with calmness and without regard to a hereafter. The real Yellow Peril, then, is—pessimism; a pessimism, however, at once more seductive and more rational than that of the west and therefore more destructive of Christianity.

MISERABLE MILLIONAIRES.

A Society For Their Education and Regulation Required.

The death of baron Nathaniel de Rothschild suggests to a contemporary the question: What is to be done with our millionaires, and what are they to do with themselves? The late baron was rather a "favorable specimen of his order." He was a "bachelor, who spent seventy years of existence busily occupied in doing nothing expensively. His tastes were blameless, and often meritorious. He was something of a student and a virtuoso, learnt several languages ,studied art, formed magnificent collections, kept a great stud of racehorses and a few steam yachts, entertained Viennese society with lavish magnificence, and spent gigantic sums in building and rebuilding his various palaces. . . Accompanied by his retinue of doctors, secretaries, and personal attendants, he was perpetually travelling about in an unavailing search after the health which he never found." Therefore, though a kindly man, accomplished, charitable—he has left some £185,000 for public charity, especially for the sick and suffering—and popular, he was probably unhappy. Our contemporary goes on to remark: "The accounts we get of the 'kings' of finance are dismal reading. We are told of one multimillionaire, rich enough to pay for the Russo-Japanese war, who is a dyspeptic hypochondriac, and of others who are nervous valetudinarians. Those who are robust are cursed with a constant inability to disburse their enormous incomes pleasantly and profitably. Some of them are creditably anxious to use their superfluity for the general benefit. One of them endows universities wholesale; another scatters about free libraries as if they were as cheap as old hats. Their generosity is not always appreciatel. Some people suggest that their ill-*instructed* liberality may be doing more harm than good. Others look the gift horse in the mouth, and decline to benefit by what they are rude enough to call the plunder of the investing, or the industrial public. The difficulty is aggravated by the multiplication of the millionaire unattached. In former ages the very wealthy man was usually a great landowner, and he had his allotted sphere of duties to perform. Now, he is frequently a mere holder of stocks and shares, free to do what he pleases, *and to live where he likes.* He finds, as others have found before him, that unlimited freedom to indulge in personal desires and caprices is not always a blessing. A society for the eduction and regulation of millionaires is evidently required.

There is nothing like Sunlight Soap for Household Utensils.

When you have to use hard water it is not an easy matter to wash household utensils. To do good washing you should have good soap and soft water (rain water). If you use hard water you must have good soap, and the best soap you can get is Sunlight Soap because it softens the hard water and makes a copious creamy lather. Use Sunlight Soap for all household purposes and the results will surprise you.

CHOLERA INFANTUM

Child Not Expected to Live from Hour to Hour, but Cured by Chamberlain's Colic, Colera, and Diarrhoea Remedy.

Ruth, the little daughter of E. N. Dewey of Agnewville, Va., was seriously ill of cholera infantum last summer. "We gave her up and did not expect her to live from one hour to another," he says. "I happened to think of Chamberlain's Colic, Cholera and Diarrhoea Remedy and got a bottle of it from the store. We kept on giving it and before she had taken half of *one small bottle she was well.*" This remedy is for sale by all druggists and dealers.

West Kootenay Butcher Co.

Synopsis of Regulations for Disposal of Mineral on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory.

Coal—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2000 pounds shall be collected on the gross output.

Quartz—Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end on the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at $1.00 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper in the Yukon territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of a Royalty of 2 1-2 per cent of the sales of the products of the location.

Placer Mining—Manitoba and the N.W.T., excepting the Yukon Territory—Placer mining claims generally are 100 feet square; entry fee, $5; renewable yearly. On the North Saskatchewan River claims are either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1000 feet. Where steam power is used claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N.W.T., *excepting the Yukon Territory*—A free miner may obtain only two leases of five miles each for a term of twenty years renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged beds or bars of the river below low water mark, and subject to the rights of all persons who have, or may receive entries for bar diggings or bench claims except on the Saskatchewan River where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or *fraction is sufficient. Rental $10 per* annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Dredging in the Yukon Territory—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the first day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental *$100 per mile for the first year and $10 per* mile for each subsequent year. Royalty same as placer mining.

Placer Mining in the Yukon Territory—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 1000 to 2000 feet. All other placer claims shall be 250 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of a Mining Recorder's office. One extra day is allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim 1000 feet in length, and if the party consists of two, 1500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee $10. Royalty at the rate of two and a half per cent on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned and another obtained on the same *creek, gulch or river, by giving notice and* paying a fee.

Work must be done on a claim each year to the value of at least $200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed to be abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum—All unappropriated Dominion Lands in Manitoba, the Northwest Territories and within the Yukon Territory are open to prospecting for petroleum, and the Minister may reserve for an individual or *company having machinery on the land* to be prospected, an area of 1920 acres for such period as he may decide, the length of which shall not exceed three times the breadth. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well, will be sold to the prospector at the rate of $1 an acre, and the remainder of the tract reserved, namely 1280 acres, will be sold at the rate of $3 per acre, subject to royalty at such rate as may be specified by Order in Council.

MIDWAY-VERNON ROAD

RUMORS FROM THE BOUNDARY OF STARTING WORK.

MINING NOTES OF PROPERTIES BEING DEVELOPED.

(Special to The Daily News)

Greenwood, July 8.—Instructions were received here last night from the coast to immediately start levelling from Midway to Rock creek. Ralph Smailes is at present at the coast, and as he is one on the principal promoters it is thought here that these instructions mean that he has at last managed to finance the Midway and Vernon railway. Others state that there need be no surprise exhibited if the C. P. R. construction trains go through here any day to start an extension west. In view of the emphatic statement of vice-president Whyte during his recent visit to the effect that his company would not build west from Midway this summer, this latter rumor is hard to believe.

The Great Northern Railway company have received 150 cars of steel rails for their branch from Curlew to Midway. These cars are now at Curlew and as it is known that the contract has been let for laying them, it is fairly safe to expect that Great Northern trains will be running into Midway within a short time. The contractors at Oroville seem positive that it is the intention of the Great Northern to build an extension of their Phoenix branch from the Emma mine through Greenwood and on to Midway, and they are daily expecteing instructions to start for this valley.

For many months the bonders of a claim named the Twin and situate just east of the city have been prospecting on the property with a view to developing it. Up to June 1st most of the work done was on the north side of Twin creek which practically divides the claim into two equal parts, but on that date a tunnel was started on a lead discovered about 300 yards east of the city hall. The portal of this tunnel is about 20 feet above the level of the creek, and yesterday was visited by The Daily News' representative accompanied by one of the gentlemen interested in the property. The visit was most timely as shortly after arrival two shots were fired uncovering a splendid paystreak fully 10 inches wide and in the middle of a very strong ledge nearly three feet wide. The streak is solid mineral composed of copper and iron pyrites and galena. While no assays have been made as yet, the ore looks remarkably promising and in the opinion of several prominent mining men to whom your correspondent showed a sample, carries good values.

As already stated the tunnel was started on June 1st, since then one shift of two men has been employed and this morning were in over 70 feet. The first 15 were in dirt and loose rock, but even allowing for that the progress made is remarkable and is at the rate of nearly two feet per day. The ledge was discovered by stripping on the surface and at the portal of the tunnel lies very flat about six inches in width, and much oxidized. Poor values were obtained but the lead kept getting stronger as the tunnel was driven. The vein also straightened up until now it is dipping to the east at an angle of, roughly, 45 degrees and running practically north and south. It is popularly supposed that the lead now being worked is the Barbara lead which has been traced to within 50 feet of the portal of the Twin tunnel. In any case the character of the two ores is very similar.

The Twin is ideally situated for tunnelling and depth at the rate of 15 inches per foot is being gained. Should the vein now discovered prove permanent the bonders have 500 feet of the claim on the south side of the creek, with the vein dipping into the claim to the east, and to all appearances have a most promising property and within a quarter of a *mile of the railway*.

ADVERTISING NELSON.

Board of Trade Committee Doing Good Publicity Work.

The advertising committee of the board of trade is working hard to place the facts about Kootenay before desirable immigrants. Numbers of the little booklets issued by the board have been sent to the various Atlantic steamers at Liverpool. This is done in order that they may be distributed among the westward bound passengers coming to this country, rather than among the passengers from Canadian ports going eastwards. Copies of an article in The Daily News on the berry crop are being distributed amongst the papers of Manitoba and the plains. Illustrated articles are being published by the Manitoba Free Press and other papers and every possible effort is being made to make the country and its opportunities *known in places whence possible* settlers exist.

ONE DOLLAR SAVED REPRESENTS TEN DOLLARS EARNED

The average man does not save to exceed ten per cent of his earnings. He must spend nine dollars in living expenses for every dollar saved. This being the case he cannot be too careful about the unnecessary expense. Very often a few cents properly expended, like buying seeds for the garden, will save several dollars outlay later on. It is the same in buying Chamberlain's Colic, Cholera and Diarrhoea Remedy. It costs but a fe wcents but a bottle of it in the house often saves a doctor's bill of several dollars. For sale by all druggists and dealers.

SUNKEN SUBMARINE.

Fresh Effort Made to Release Imprisoned Crew.

Bizerto, Tunis, July 8.—Another attempt is to be made today at noon by the relief ships Berger and Wilhelm to move the submarine boat Farfedet. Most of the entombed crew have families living here.

The despair of the wives and children of the imprisoned crew make a pitiful spectacle.

Strict official censorship is maintained against the cabling of detailed information.

CHAMBERLAIN'S COLIC, CHOLERA AND DIARRHOEA REMEDY—THE BEST IN EXISTENCE

T. M. Wood, manager of the White county News, Beebe, Ark., is a representative *southern business man, who does not* hesitate in expressing his good opinion of a well known remedy. He says: "It gives me pleasure to recommend Chamberlain's Colic, Cholera and Diarrhoea Remedy, having used it myself and in my family with the best results. In fact I believe it to be the best remedy of the kind in existence." Sold by all druggists and dealers.

James Band, proprietor of the Grove hotel, Fairview, has had that favorite summer resort nicely fitted up. It is conveniently located within half a block of the street car line and good meals and the best of liquors and cigars make it a popular house of call. Drop in any time when passing and sample some of those choice thirst quenchers always on tap.

LAND NOTICES

TAKE NOTICE—Sixty days after date I intend to apply to the Hon. the Chief Commissioner of Lands and Works at Victoria for permission to purchase the following described land, begining at a post near the north bank of the Kootenay river, West Kootenay District, marked W. Clayton's southeast corner, thence west 40 chains, thence north 40 chains, thence east forty chains, thence south 40 chains to point of commencement, containing one hundred and sixty acres more or less.

W. CLAYTON.

Thrums Siding, May 24th, 1905.

A beautiful story, well written, and carefully produced.
Prices 25c, 35c, 50c.
Reserved seats on sale at Opera House Saturday morning at 10 a.m.

FIRE BY-LAW ENDORSED

EXPERT CONDEMNS TRIFLING WITH PERSONNEL OF BRIGADE

NON-PARTIZAN ADMINISTRATION IS CONDITION OF LOW RATES

The efforts of Nelson property owners and fire insurance agents to secure a substantial reduction of rates from the companies doing business in British Columbia, are probably doomed to disappointment for at least another year. George V. Lawry of Vancouver, inspector of the Mainland Fire Underwriters' association, has been in the city for several days and will remain here for another week. He is on a special trip of inspection of the cities and towns of the province. Interviewed yesterday at the time, by a representative of The Daily News Mr. Lawry said: "The purpose of my trip is mainly to compile a new book of rates. The last was made out in 1899. Since then there have been so many additions to and changes that the original book is practically useless. Therefore the association decided upon the compilation of a new book, and I am out to inspect and report. The rates will be fixed by the board according to the conditions I report.

"So far I have visited only Fernie, Cranbrook and Moyie. Cranbrook has improved materially in her fire fighting appliances. Fernie is still handicapped by inadequate water supply. But I understand that steps are being taken to make good the defect. Moyie is fairly well off as compared with other mining towns of the same size.

"The conditions on which the rating of a city depends are many and various. The chief features are the efficiency of the fire brigade and the water supply. Besides these the rates are affected by the proportion of frame buildings to those of brick or stone, the closeness of the buildings to each other, the width of streets, prevailing winds, the fire record, the conflagration hazard, that is, the number of frame buildings close together, and many other things. Nelson's rate, for instance, is lower than Rossland's because it is less exposed to winds and its proportion of brick and stone buildings is very much larger.

"I have been directed to pay especial attention to conditions in Nelson, not only on account of a persistent agitation for lower rates, but because it is a matter of common knowledge that the efficiency of the Nelson department is seriously impaired by interference with the discipline, and even with the personnel of the brigade.

"I have no objection to saying, as emphatically as possible, that I don't doubt very much that the fire insurance companies will even consider the question of lower rates in Nelson while the fire department is made the bone of contention between political factions in the city.

"The sooner the city council hands over the whole administration of the fire department to a competent chief, the sooner they will find a better condition of discipline and fire fighting qualities in the brigade. Not until that is done would the companies feel justified in considering the question of lower rates.

"I had understood that Nelson's water supply for fire-fighting purposes, had been diminished. But on investigation I have found that the supply is still adequate, and I see no reason to apprehend any deficiency.

"I shall be here for another week. My work cannot be done in a hurry, and I have not done half of it yet."

GUN CLUB SHOOT

Hot weather Reduced the Number of Marksmen

Even the enthusiastic marksmen who compose the Nelon gun club, wilted under the July sun of yesterday afternoon. Only a faithful few prevented the regular weekly club shooting from collapsing. The few made very creditable scores. Only two events were contested, C. H. Ink winning both.

First event—25 birds.

MINING RECORDS

The only records in the mining recorder's office Saturday were two locations near Erie. H. A. Faulkner and Dr. Leon Lacosta are the locators. The claims are the Gussie and the Erie, side by side, and half a mile east of the town of Erie.

It will pay you to keep Chamberlain's Colic Cholera and Diarrhoea Remedy in your house. It only costs a quarter. Sold by all druggists and dealers

Men's high grade summer suits, value $12.50 for today at $7.75 at Brown and Co.'s

July Sale Monday, at Kerr and Co.'s.

NELSON'S NEWS OF THE DAY

Two rifles will be raffled at the Hume hotel bar Monday evening at 8 o'clock.

Judge Forin will hold chambers and continue the adourned sittings of the county court on Monday morning.

The musical evening at the Baptist church was a success in every way. The pastor has ordered over 100 copies of the church hymnal out of the proceeds.

J. Hay of the O.K. Bakery, has been hastily summoned to Fergus, Ont., where his mother is dangerously ill. He leaves by this morning's Crow boat.

F. W. Mehan and Mrs. Mehan, of Milbank, North Dakota, are visitors at the residence of H. V. Gibson, Mrs. Mehan's brother, whom she has not seen for 14 years.

The temperature yesterday was the highest of the year to date, 89 degrees. Friday's temperature was 88, Thursday's 87. The highest recorded before was 84, on Tuesday.

The excursion on the Kokanee this afternoon at 2 o'clock will in a measure make up for the abandoned tramway park concerts. The steamer will leave the city wharf at 2 o'clock for a four hours' sail.

The annual picnic of the Methodist Sunday school will be held at Procter next Thursday afternoon. The chief attraction will be a basketball match between the old opponents, the grocers and the dry goods men.

The examination of D. McBeath by A. H. MacNeill, K.C., before acting registrar Bowman, took place yesterday morning at 11 o'clock. The examination lasted half an hour. Mr. McBeath looked none the worse for his experience.

The Sherman-Platt Stock company will be at the opera house all this week, opening tomorrow evening with "Shall We Forgive Her." The company comes well recommended and theatre goers are assured of excellent performances at reasonable "hot weather" prices.

The Washington press correspondents will arrive in Rossland Sunday night and remain there all day Monday. Their stay in Nelson will be very brief if their present intentions are carried out. They will arrive from Rossland by the 10:05 train Monday night and leave Tuesday morning by the Crow boat.

AMERICAN INVESTORS

Loking Over Situation in the Boundary—Strike on the Helen

(Special to The Daily News)

Greenwood, July 8—James Donnahue and Richard Armstrong of Chicago, visited Greenwood last week. Mr. Donnahue is one of the owners of the Helen mine and came west for the purpose of seeing the property in which he is interested. Mr. Armstrong is well known in the Boundary country as he was formerly president of the Grand Forks Townsite company.

While here the two gentlemen visited the leading mines in the district including Phoenix camp, and left for Portland to take in the fair. Mr. Armstrong returned to Greenwood on a lengthier visit this week.

Mr. Donnahue is one of Chicago's leading real estate and financial agents. He loans sums of money on real estate security and is a wealthy and highly respected citizen of the Windy City. While in this province both men visited the LaFrance mine in East Kootenay, on the east side of Kootenay lake. A visit to this mine entails a climb of 6000 feet from the lake. It is a silver lead proposition in which Alex. Miller of this city, is heavily interested.

The new shaft being sunk on the Prince Henry, a claim just west of the city limits, and which is under bond to a local syndicate, in now down 50 feet and a good clean vein of ore six inches wide, was encountered, which assays over $100 per ton in gold and silver.

The syndicate working the property is, as already stated, composed of local capital, and is called the Prince Henry-Abercraig Development syndicate. It is on the assessment plan, formed for the purpose of developing and purchasing the two claims under bond, the Prince Henry and the Abercraig.

The Phoenix syndicate which has the Mavis under bond, has sunk a shaft 25 feet deep on the main lead which, judging from the character of the ore, is a continuation of the Bay lead. At the bottom of the shaft from 14 to 18 inches of rich free gold ore is exposed. The bonding syndicate purpose pushing development work with all possible dispatch.

The crosscut tunnel now being driven on the Gold Bug is now in 250 feet. The contract calls for 300 feet, at which point it is expected that the ledge will be encountered.

Crosscut tunnels are being driven on both the Fremont and the Strathmore and while the ore has been struck in neither, there is every evidence of the proximity of the leads in both. Your correspondent visited both on Wednesday afternoon in company with secretary C. Scott Galloway and Alex. Miller. On the Fremont two men ran a 25 foot open cut and a 60 foot tunnel through dirt, timbered and complete in 27 days. This is exceptionally good work. The timbering is as neat as any seen in this camp.

The latest ore struck on the Helen mine is the finest in general quality so far found on this most promising property. The vein is solidly mineralized and assays well above the profitable mark. Although much ore is sacked ready for shipment, the management will not start shipping yet awhile preferring to continue with the development work.

D. M. Currie, one of the original bonders of the Duncan mine, situate on Wallace mountain, West Fork district, arrived in Greenwood on Tuesday last suffering from a badly sprained side. He is at present under a physician's care and is progressing favorably.

BOUNDARY ORE SHIPMENTS

Nearly Half a Million Tons Sent Out This Year.

[Special to The Daily News]

Phoenix, July 8.—Boundary mines for the last seven days sent out ore as hereunder: Granby mines to Granby smelter, 13,018 tons; Mother Lode to B. C. Copper smelter, 3,776 tons; Mountain Rose to B. C. Copper smelter 132 tons; Oro Denoro to Granby smelter, 66 tons; Providence to Trail smelter, 60 tons. Total for the week, 17,052 tons; total for the year, 476,473 tons.

The following is the smelter treatment for the last week: Granby smelter, 13,250 tons; B. C. Copper smelter, 3,865 tons. Total for the week, 17,115 tons; total for the year to date, 487,965 tons.

NEW YORK FASHION LETTER

New York, July 8—Out of the various historical periods that have been setting the types of the last two or three years' fashions have been gathered a host of small fancies and furbishings, all of which seem to be flourishing this year. Take the vogue of bows, mostly Watteau origin, which have lighted like myriads of butterflies on this season's toilets. They deck the slippers or ties, the gown, the coat, hat and even the hair. They not in disorderly profusion, march in processions or come singly or in doubles and trios. They are jersey or square, as preferred and are made of the most old timy ribbons with picot, frayed or pinked edges and with surfaces changeable, flowered, figured and striped or plain. A spool of the tiniest wire is now usually found in milady's work basket for the delicate substantiation of the edges of the bows, ruches and other things.

There seems in the air a growing demand for stiffenings, although as yet, the tendency is very subtle. On very slight figures the hems of the dresses are held out by some interlining, such as very supple haircloth, crinoline or soft reeds. A new device for airy materials is the insertion of horsehair braids—the kind the milliners use—in the hems of skirts. Very often, most often in fact, these supports are put into the foundation or drop skirt instead of in the outside skirt. If hints of the fearsome hoop skirt they be, they are ghostly and etheral and, like other specires cast no shadow under the strongest scrutiny. There is more actual fear that the bustle and hip pads will return than that the hoop skirt will return. In some quarters the latter ogres have actually returned but they are very far from acceptation in fashionable circles.

Another ancient revival is the use of velvet or ribbon bows at the back of the stocks, the ribbon encircling the neck around the back of the stocks and serving as a necklace for the pendant or locket. Black moir is in frequent use for this purpose.

If one were to judge from a casual survey of the morning costumes what the two most prominent fads of the hour were, one would be very apt to say, without hesitation, suspender and cross-over effects. Both have been modified and adapted until often the original type is all but lost, but both are at the bottom of much of the elaboration seen on trim get-ups.

As pretty a fashion as courts fresh country breezes in swell turn-outs in sunny afternoons, is the little cape of cloth or silk worn with a muslin frock and matching in color the hat, sash and parasol. It is a girlish style, jut suited to dainty youthful get-ups. These little capes are very ripply, just like the skirts, at the tops of the arms, and are made of chiffon, broadcloth or taffeta, and are lined with the thinest silks, white of pale tints. The necks have flat finishes, usually ending in a V or U at the front. Sometimes the fronts are quite open, just held together by a strap or two. These little capes come in good play for an early evening walk or a cool afternoon promenade.

Nearly every collection of trunks that is outward bound carries one or more black dresses and at least one all black picture hat. At the races overseas, which have been engrossing the attention of fashion folks as much as race goers, the big black hat—the one with the flat undulating brim—has been much in evidence. It looks now as if it would survive the summer, but would be ousted bag and baggage long before the leaves begin to fall.

In negligee a woman's own preference largely prevails. Coming and going styles affect this part of the wardrobe materially, of course, but individuality is more apparent than in conventional toilets. For the woman who mourns the departure of the clinging styles, the neglige offers a balm for in it she may still cling to her favorite effect. But the short waisted empire fashion is very prevalent in the boudoir and bedroom.

ESTELLE CLAIREMONT.

Sherman and Platt Stock company at the opera house all next week.

CHURCH SERVICES

Anglican—St. Saviour's church, corner of Ward and Silica streets. Second Sunday after Trinity; holy communion, 8 a. m.; morning prayer and litany, 11:0; children's service, 9:30 a.m.; evensong, 7:30. Rev. J. S. A. Bastien of Cranbrook will preach at both services.

Catholic—Church of Mary Immaculate, corner of Ward and Mill streets. Low mass at 8 a.m.; high mass at 10:30 a.m.; evening service, 7:30 p.m. Rev. Father Althoff, priest.

Salvation Army—Barracks on Victoria street, west of Josephine. The following services will be held today: Knee drill, 8 a.m.; holiness meeting, 11 a.m.; a praise meeting at 3 p.m.; Salvation meeting at 8 p.m.

Baptist church—Stanley street, near Mill. Morning service at 11 a.m.; evening service at 7:30; Sunday school, 2:30 p.m. Rev E. H. Shanks, pastor. Morning topic, "The Ministry of Affliction"; evening subject, "Stones from David's Sling." Subject, "Raise Me, Jesus."

Presbyterian church—St. Paul's, corner of Victoria and Kootenay streets. Morning service, 11 a.m.; 12:30 Sunday school; 7:30 evening service. Rev. J. T. Ferguson, pastor.

Methodist church—Corner Silica and Josephine streets. Morning service 11; Sunday school, 2:30 p.m.; evening service, 7:30. Rev W. W. Baer, pastor.

WINS OUT NARROWLY

New Westminsters Have a Close Shave With Victoria.

(Special to The Daily News)

New Westminster, July 8.—In the New Westminster-Victoria lacrosse match today, the former won by six games to four. This was the closest shave of the season for New Westminster, which had four intermediates playing.

The winners did plenty of slugging but there was no real rough play.

The sun was very hot, the temperature being 91 in the shade, and there was only a small crowd present. In the second half New Westminster got afraid and worked hard.

Bargains Monday at Kerr and company's. First day of July Sale.

GIN PILLS

stand unrivalled. It is not necessary to wait for days for beneficial results, you know at once that Gin Pills are helping you. Sold by all Druggists at 50 cts. per box, 6 boxes for $2.50 or direct from

THE BOLE DRUG CO., - - WINNIPEG, Man.

FIND ON LONE BACHELOR

THREE FOOT LEAD OF PURE GALENA HAS BEEN STRUCK

FORTUNE OF MINERS WORKING THE CLAIM UNDER LEASE

Coincident with the announcement of the duties on manufactured lead comes the news of mining development in the Slocan. So long has the commonest news from the great silver lead district been of the closing down of mines, or of the restriction of operations, that news of progress from even one mine is decidedly encouraging. While all authorities are agreed that the silver-lead mining industry should revive at once, it is also generally recognized that capital is necessary. It is well known that the greatest encouragement to capital is news of success.

S. S. Fowler returned from Sandon yesterday afternoon. He tells of a very rich development at the Lone Bachelor mine, near the Monitor, between Sandon and Three Forks. The Lone Bachelor is worked by a party of Three Forks' men under lease from Mr. Petty, the owner.

Mr. Fowler saw the lead which has been trsuck. It is three feet wide of pure galena and carries very high values. The lessees are delighted with their find and expect to reap big profits. All of them are working miners and are all investing their time and labor as well as their money in the venture.

KASLO MINING NOTES

Good Work on the Flint—Strike on the Miner Boy

J. A. Carter, one of the lessees and owners of the Flint mine, on the South Fork, was in town this week, says the Kaslo Kootenaian. Several weeks ago, says Mr. Carter, a strike of 18 inches of solid ore was made which assayed 140 ounces silver and 65 per cent lead. In sinking an 18 foot shaft on the lead a parallel shoot of solid ore has since been struck which is from 18 inches to 2 1-2 feet wide in the bottom of the shaft and assays 375 ounces silver and 71 per cent lead. This ore is thoroughly impregnated with grey copper and shows an abundance of wire silver. The strike is at about 80 feet depth on the lead which shows up 11 feet wide and is well mineralized throughout from foot-wall to hanging wall. Mr. Isaacson who has charge of the work on the property, has left for the mine and will start a new crosscut tunnel which will be driven for 160 feet and catch the ore shoot at a depth of 130 feet. The lessees have a carload of rich ore ready to ship as soon as a trail is built to the property which has been promised by the government. Mr. Carter left for Hillman, Wash., on a short trip, but on his return, about August 1, he expects to commence work on three adjoining claims, the Martin, Grace and Ruth, which lie below the Flint and Granite King groups. The work will consist of a 200 foot tunnel on a parallel lead to that of the Flint and on which there is a good showing of ore. The tunnel will be completed about Christmas, when he expects to catch the ore shoot at considerable depth.

Gus. Adams was in town this week from the Miner Boy, on the north fork of Carpenter creek. This property is under lease and bond to Adams brothers, who are now working three men. An upraise, a drift and a tunnel have been started since the work commenced and the work is being pushed steadily. Some very rich ore has been encountered and Mr. Adams reports that the property is in a very satisfactory condition.

The trail to the Baltimore, on Woodberry creek, is now finished to the property and it is understood that shipments of ore will be continued through the summer.

W. F. Caldwell has left for the Pontiac mine at Woodberry. He intends putting on as many men as he can on an upraise from his crosscut tunnel, which is now in 700 feet. The upraise is for the purpose of obtaining air and when it is completed drifts and stopes will be run on the ore bodies to determine their extent. The long tunnel is now in 700 feet and taps the ore body at a depth of 400 feet. Other development will be done to prepare for the winter's work.

MANAGER OF TIMMINS

R. W. Brigstocke to Take Charge of Mine in Northern Ontario

R. W. Brigstocke, lately manager of the Hunter V. mine and formerly manager of the Fern, has accepted the managership of the Timmins mine in the Temiskaming district of Northern Ontario, and leaves by tomorrow morning's Crow boat to assume his new duties.

The Timmins is one of the four mining properties on the shores of Long or Cobalt lake, and near the line of the Temiskaming and Northern Ontario railway, 102 miles north of North Bay.

The Timmins carries silver, cobalt and nickel, the ore is high grade and of good extent. A shaft has been sunk 70 feet on the property and values have not declined at that depth. It is equipped with a steam plant and air compressor. The production of the mine up to May of this year has been $150,000.

The Timmins is the property of Messrs. Drummond of Montreal, who also own many other properties in the district, Coleman township.

Mr. Brigstocke will be greatly missed in Nelson, of which he has been a resident for seven years. His reputation as a mining engineer has deservedly stood high, and has no doubt been the means of securing him the managership of one of the biggest mines in a mineral district which is growing in importance and value every year.

BUY IT NOW

Now is the time to buy Chamberlain's Colic, Diarrohea and Cholera Remedy. It is certain to be needed sooner or later and when that time comes you will need it quickly. Buy it now it may save life. For sale by all druggists and dealers.

MISS SUTTON IS CHAMPION

London, July 8—Miss May Sutton of Pasadena, California, today beat the British champion, Miss K. Douglas, by a score of 2-0, and thus becomes British as well as American lady champion. The scores were 6-3, 6-4.

The Makers of
"The Leckie Boot"
Are "Old Timers" of the West

They know to a nicety, the climatic and geographical conditions that call for a special class of footwear to meet these conditions.

Eastern shoe men cannot know these things from mere hearsay.

They must live "out west"—get "the local color" as it were—become steeped in western experience and knowledge obtainable only by living the life of a Westerner, before they can hope to make satisfactory footwear for the strenuous life of the toiler in western forests, fields and mines.

"THE LECKIE BOOT" Is a Western product for western people.

Look for the trade mark upon the sole.

NELSON'S NEWS OF THE DAY

Arrangements were completed last night by telegraphic correspondence, with the sports committee of the Portland exposition, for the sending of a Nelson crew to compete in the Portland regatta. The crew is not yet chosen. It will leave here possibly the day after the midsummer regatta, which has been fixed for July 20.

Originally Mr. Justice Irving was only to dispose of the case of the West Kootenay Power and Light company against the city of Nelson, at the special supreme court sittings fixed for the 12th, but Coulter's application has been added, and the difficulty between the Providence mine shareholders is to be adjusted, so that the sitting will likely last over a week.

The Trail baselvall team arrived last night. The team is the same as that which defeated Nelson on June 30. The Nelson infield has been strengthened by moving Parrott to second base and Archie Bishop to third. C. D. Blackwood will umpire the game, which will be called this afternoon at 3 o'cock sharp to enable the Trail players to return home by this evening's train without hurrying after the game.

James Cronin, managing director of the War Eagle-Centre Star mines, superintendent Stewart and R. W. Brock of the dominion geological department, spent a few hours in Nelson last evening on their way from Rossland to Moyie, leaving on the Crow boat this morning. Speaking of the good feeling shown at the War Eagle-Centre Star mines by the men, and the excellent work that is being done on the properties at the present time, Mr. Cronin mentioned that after the settlement of the War Eagle-Centre Star litigation with the Rossland Miners' union, the executive of the union drew up and forwarded to T. G. Blackstock a letter, setting forth their thanks for the friendly and generous settlement made and declaring that there would be industrial peace at the mines in the future. Mr. Cronin says that Mr. Blackstock was greatly pleased over the letter, which he prizes highly.

ALL ROUND ATHLETE

Record Now Held by M. J. Sheridan of New York

Boston, July 8—Martin J. Sheridan of the Greater New York athletic club won the all round amateur athletic championship today against four contestants. Sheridan broke the American record with 6821 1-2 points. The previous record held by Harry Gill of Toronto, 6360 1-2 points, was made in 1900.

DESTROYED BY FIRE

Danvers, Mass., July 8 — The plant of the P. Kearns, Russian leather manufacturers at Danvers, was destroyed by fire today. The loss is estimated at about $100,000.

Sherman and Platt Stock company at the opera house all next week.

COTTON GARDEN HOSE

Many people have an idea that cotton covered garden hose is not as good as the rubber covered article. Still it is a fact that every fire department in every city in Canada uses cotton covered hose.

Our cotton hose is of exactly the same quality as high grade fire hose. We guarantee it to stand Nelson pressure for two years It is much lighter to handle and inexpensive. See our east window.

LEASED BY HALL MINES

B C. Standard Properties to be Worked Immediately

At a well attended meeting of the local shareholders of the B. C. Standard Mining company, held in this city last evening, a very encouraging and interesting account of the condition and future prospects of the company's properties, was given by R. W. Brigstocke, the retiring mine superintendent, who is leaving the Kootenays for the east to take charge of the imoprtant Timmins mine in Temiskaming district of northern Ontario.

The meeting unanimously recommended the directors to accept a proposition for a lease of the mint, made by the Hall Mining and Smelting company, and it is understood that that company will commence operations at the mine immediately.

DANGEROUS REFUGE

Tree Struck by Lightning in Prospect Park, Brooklyn

New York, July 8—Ten persons were rendered unconscious today by a stroke of lightning in Prospect park, Brooklyn The park tennis lawn was crowded with players when a sudden thunder storm drove all to shelter. John Lewis, his wife and two children and James Haithwaite and five members of his family found protection from the rain under a tree.

They had scarcely done so when lightning struck the tree, splitting the trunk down to the roots and hurling those beneath it to the ground, where they lay motionless. Assistance was soon on the spot and the injured person were quickly restored to consciousness.

NO SIGNS OF BATTLE

Reconnaissance in Force is Going on in Manchuria

St. Petersburg, July 9—Operations against the Russian left at Beiche and Logushan, reported by general Linevitch, are in the nature of a reconnaissance in force, and there are no signs of a general engagement in Manchuria.

The rumor that General Kuropatkin is about to retire is revived.

CHESS MASTERS' TOURNAMENT

Janowsky in the Lead With Thirteen Points

Ostend, July 8—Play was resumed in the international chess masters' tournament today. Prior to the luncheon adjournment Janowsky had won from Marco and resumed the lead with 13 points to his credit.

In the afternoon Macozy won from Leonhardt, Burns defeated Blackburn and Teichmann and Alpin drew. Tarrasch and Tschigorin did not finish their game. The two adjourned games from the 20th round were also decided. Schlechter scored against Alpin and Marshall drew with Wolf.

CHOUKNIN NOW IN EAGER.

No Fighting to Be Done With the Kniaz Potemkine.

Odessa, July 8.—Vice admiral Chouknin, when informed of the surrender of the Kniaz Potemkine, despatched two warships and six torpedo boats to Kustenji to take over the battleship.

BRIGHTON HANDICAP

Brighton Beach, July 8—The Brighton handicap, value about $25,000, one mile and a quarter, was won by Artful; Orwell was second and Beldame third. Time 2:04 4-5.
