EARL GREY'S RECEPTION

Central Figure at the New York Pilgrims' Dinner

Expresses His Hope of a Settlement of International Disputes--Restores a Picture of Benjamin Franklin

New York, March 31.—Earl Grey, governor of Canada, was the guest of honor tonight at the Pilgrims dinner held in the Waldorf Astoria. Earl Grey arrived in company with his host, Joseph H. Choate and the other members of the Canadian party were lady Grey, lady Evelyn Grey, their daughter, lady Alexandra Beauclerk, their niece, a sister of the duke of St. Albans; colonel Hanbury Williams, military secretary; sir Frederick W. Borden, and earl Grey's private secretary, Arthur F. Sladen.

Mr. Choate presided. Shortly after 8 o'clock a bugle blast brought the formalities of the reception to a close, and the guests assembled in the grand ballroom. The tables were decorated with sprays of trailing arbutus, the first flowers found by the pilgrims when they landed at Plymouth Rock, while to add to the international aspect of the dinner, stands of small British flags were entwined on each of the tables.

A letter was read from president Roosevelt, regretting his inability to be present. Lord Roberts, president of the London Pilgrims, by cablegram, sent his "warmest greetings."

The toast "The President and the King," was drunk standing while the orchestra played "The Star Spangled Banner," and "God Save the King." Then came a toast to "The Right Honorable Earl Grey, Governor-General of Canada," to which the earl responded, in part as follows:

"I am aware that this magnificent banquet is the eloquent expression of your desire to emphasize and, if possible, promote the good relations already existing between the United Kingdom, the self governing nations of the British empire, and the United States. That same desire also possesses and completely fills my heart."

After paying a graceful tribute to American ambassadors he had known in England and expressing an appreciation of America and its people, earl Grey continued: "Mr. Choate has referred at my introduction in a manner that I much appreciate to my restoration to you of the picture of Franklin which for 130 years has been the most honored and most interesting possession in my English home, being brought from Philadelphia at the time of the occupation of Franklin's home by general Grey. Why do I restore the picture? Because I love the American people; because my sense of equity tells me that there are higher laws than the law of possession, and because I believe that neither England nor America can fulfill their high mission to themselves, or to the world, unless we approach the consideration of every problem affecting our relation to each other, not from the narrow, selfish and provincial standpoint of what America and England can each of them do for themselves alone, but from the higher standpoint of what we all can do for England, America and the world.

"Coming as I do from Canada, whose lovely sparkling winters make her in more senses than one the brightest jewel in the British crown, may I tell you what I know you will be glad to hear? We have safely embarked our national ship on the ocean of enormous developments, and in order to enable us to realize as quickly as possible the magnificent destiny that awaits us we hope you will allow us to continue to draw largely on your friendship and powerful assistance. Mr. Choate chaffed us the other day at Ottawa, with that kindly humor in which he so preeminently excels for the modesty which has caused every Canadian from the prime minister to the youngest enfranchised citizen of the dominion to believe, that if the 19th century belonged to the United States, the 20th century belonged to Canada. Yet, gentlemen, this is the stimulating faith of the people whom I represent. Any idea of the possible annexation of Canada by the United States is scouted by us as an impossibility, as great as you would regard the annexation of the United States by Canada."

The earl then spoke of the part Canada played in the upbuilding of the United States, saying there are 2,827,000 persons of Canadian birth or descent in the United States, and that French Canadians were the founders of Chicago, St. Louis, Pittsburg, New Orleans, Detroit, St. Paul and Milwaukee. He added: "So great was the sympathy felt in Canada for the blue coats of the north that 40,000 young Canadians left their homes and their work and marched to your assistance in order that they might help you in your hour of struggle to achieve your national unity.

"If Canada can proudly claim that she has been privileged to lend a hand to the building up of the United States, she is also conscious that there is not a day on which she does not feel the influence of the example, guidance and inspiration of the United States.

"And now, gentlemen, may I say, the more we see of Americans the better we shall be pleased. Just as Canada is pround to think that 2,800,000 of her stock is bringing vigor and strength to your republic, so I feel sure you will be pleased that an ever increasing flow of your people into the dominion will, by the addition of the character, experience and energy which they will bring to our country, contribute to its greatness. The more Americans that come to Canada, the better pleased we shall be. We are not afraid that they will make less good and loyal Canadian citizens than they have been good and loyal American citizens.

"Given, on both sides of our boundary, a continuation of the present unreserved and ungrudging respect for each other's just and legitimate rights, a heartfelt and chivalrous desire to promote each other's interests, and to meet each other's requests in the fullest degree consistent with the maintenance of our self respect, and we shall continue to advance hand in hand and shoulder to shoulder along the path of common development and towards the attainment of a common ideal.

"To those of us who believe that in the coming solidarity and unification of the Anglo-Saxon race lie the future peace and hope of the world, the signs of the times are most encouraging. The forces of the world are slowly, but steadily drifting in this direction. Let it be our privilege in our generation to do nothing to prevent the flow of these currents, which, if uninterrupted, will one day course together in the mingled waters of one mighty and irresistible river. The peoples of the United Kingdom, of the self governing nations of the British empire, and of the United States are joint trustees for the protection and expansion of that Anglo-Saxon civilization, which carries in its development the hope of future peace and the realization of the highest ideals attainable on others. Every year our joint responsibility to mankind and to future ages for the way in which we now administer our sacred trust grows in fullness and importance.

"There are several questions outstanding between the Dominion of Canada and the United States, which have been left open too long and which call for settlement. Both governments desire to take advantage of the opportunity which the present feeling of amity between the two countries affords and I am persuaded that the hearts of the two peoples on both sides of the frontier will be glad when their respective governments have given effect to their desires. You and I and my fellow Canadian guests, all come from the same splendid stock. We speak the same language; we are pressing toward a single goal; we are united in hope, in aspiration and faith, and, if we are co-sharers in nine-tenths of the past, may we not hope that we are co-partners in the whole of the long future that is looming up on our horizon.

"It is the proud mission of the Anglo-Saxon race to maintain in advance the cause of civilization through the world. England thankfully recognizes your desire to co-operate with her in this beneficial work and the knowledge that the stars and stripes and flag of England stand in the gateways of the world as on these walls, their colors draped together, fold within fold, as the joint emblems of freedom, righteousness and duty, may make us all proud; first, that we have a big duty to perform to the world and, secondly, that so long as we are true to each other and to ourselves we shall have the strength as well as the will to accomplishe the noble purpose of our joint and splendid destiny."

Other toasts were "International Comity," by secretary Root; "The Empire State," by governor Higgins, and "The Peace of the World," by general Porter.

ROYALLY RECEIVED.

Prince Arthur Enthusiastically Greeted at Vancouver.

(Special to The Daily News)

Vancouver, March 31.—An enthusiastic reception was given H. R. H. prince Arthur of Connaught when he arrived here this morning on his way home to England from his diplomatic journey to Japan. The prince was welcmed to the city by acting mayor Bethune, lieutenant colonel Whyte, colonel Falk Warren, Richard Marpole and others. After receiving an address of welcome at the drill hall, the prince, accompanied by his suite and various members of the local militia, drove around Stanley park, and later inspected the 6th regiment or "The Duke of Connaught's Own Rifles," of which his father is honorary colonel. A grand display of fireworks in the evening by Japanese residents ended the day's proceedings. The prince and suite will sleep on the special train provided for them, and will leave Vancouver early tomorrow morning.

YELLOWSTONE SOLD.

William Waldie Pays $16,000 For Group. Ymir Notes.

(Special to The Daily News)

Ymir, March 31—William Waldie of the Queen mine who has developed this property from a mere prospect into a shipper has purchased the Yellowstone group of claims situated on Sheep creek and adjoining the Queen, the purchase including the Yellowstone stamp mill. The price is reported to be in the neighborhood of $16,000.

John Scoley, foreman of the Hunter V. and Standard Group owned by the B. C. Standard Mining Co. and under lease to the Hall Mining & Smelting Co. reports having shipped 600 tons of ore during the month of March. This ore will pay all expenses besides giving a handsome profit, the latter being utilized in development. Much native silver is being encountered in the workings and the prospects are exceedingly bright for the season. After next month the property will be in a position to ship 100 tons of ore per day.

F. M. Peters is stocking his ranch on the Salmon. Recently he imported a carload of cattle and tomorrow he commences driving a car load of hogs. As a cattle and stock country the Salmon river bottom from Feeney's ranch out to the Pend d'Oreille river cannot be beaten.

Thomas Flynn, the pioneer prospector of the camp, locator of the Dundee mine and other valuable mining properties left last evening for Cobalt, Ontario, where he will prospect the coming summer for a syndicate, the head of which is W. A. Galliher, M.P.

A. H. Ervine is at Everett, Wash., visiting his brother the Everett smelter accountant.

F. G. Saunders was successful in landing two fine fish out of the Salmon river yesterday. This is the first catch of the season at this point.

ASSAULTED THE MAYOR

STRENUOUS METHODS BY WINNIPEG STRIKE BREAKERS

CARS ARE RUNNING WHILE DRAGOONS GUARD STREETS

Winnipeg, March 31.—Mayor Sharpe, city solicitor Hunt, Rev. C. W. Gordon (Ralph Connor), and a Tribune reporter, were standing in the middle of the road in the centre of a block which was being kept clear by dragoons this afternoon, when car No. 84 arrived and after passing a cordon of soldiers, stopped opposite the group. A Thiel detective, named A. G. Ardwell, jumped off the car and as the mayor approached him to ask a trivial question as to how things were going in another part of the city, the detective struck the mayor which his baton and city solicitor Hunt stepped forward and told the detective who it was he had struck. The Thiel man replied: "I don't care a damn who you are; get to hell out of here.'

The car started to move and the detective boarded it. Hunt jumped onto the car to order the city police inside to arrest the Thiel agent, but was knocked off by him. The car soon returned and was waited for by several policemen who immediately apprehended Ardwell. He is out on bail and his case has been remanded for one week. He has been dismissed from the service of the street railway company, who have apologized for his action.

The crowds are orderly and anxiously awaiting the result of a conference between the ministers and the directors. According to present indications the conference will be lengthy. The cars were to have quit running at 6 o'clock but at 6.15 some were still in operation. The question of wages and arbitration are now the chief issues in contention.

C. C. Christiansen, the leader of the strike breakers, was arrested tonight at 9.30 for assaults on citizens. The arrest was made by order of the attorney general and bail was refused.

WAS A RECORD BREAKER

CANADA'S CUSTOMS RETURNS FOR THE MONTH

SUDDEN DEATH OF OFFICIAL AT THE CAPITAL.

(Special to The Daily News)

Ottawa, March 31.—Canada's custom revenue for the current month was a record breaker. It is $738,505 over March, 1905. The total customs revenue for the month was $4,423,667 as compared with $3,694,161 in March last year. For the nine months the revenue was $34,046,030, or $3,129,850 over the same time last year.

W. M. Goodeve, chief clerk in the land patent branch of the interior department died suddenly early this morning. He was 57 years of age, and has been in the service 40 years. He was married to a daughter of the late Rufus Stephenson ,of Chatham, who was the whip of the conservative party for some years.

NOT A POLITICAL MISSION

Rome, March 31.—Archbishop Ireland is most annoyed about the reports circulating in the United States concerning his visit to Rome. He said today: "I came here simply for my regular visit; it is especially untrue that I am acting as the representative of the American government in the settlement of Philippine affairs with the Vatican, my work here is merely personal and has no public significance whatever."

ROSSLAND MINES.

Rossland, March 31.—The LeRoi strike continues to attract a great deal of public attention. Drifting is still in progress on the 800 foot level, west of the big Josie dyke and the ore is said to maintain good high values throughout.

The Velvet-Portland, which has been shut down for a year is to be re-started in a few days.

FEAR A MASSACRE

Kieff, March 31.—Many Jewish families are leaving the city frightened by the rumors of a massacre at Easter. The authorities announce that they have taken every precaution and that at the first sign of trouble the troops will be employed to restore order.

SHIPMENTS INCREASING

Year's First Quarter Shows Enormous Addition to Output

Two Million Ton Mark May be Attained by the End of the Current Twelvemonth --Industry Everywhere Active

The first quarter of 1906 shows the enormous total of 429,072 tons of ore produced in the districts of Kootenay and Yale, which is at the rate of 1,700,000 tons per year. That this rate will be maintained is more than likely and indeed the probabilities at this time in the year seem to indicate that a total tonnage of 2,000,000 will be nearly reached. At present there are 76 mines shipping over the whole district, a list of which, with the exception of those shipping zinc ores to the plants at Pilot Bay and Frank, of which no detailed figures have as yet ben officially given, will be found appended. Of these, however, only 17 shipped during the past week, such is the state of the roads, owing to the melting of the snows. This condition has existed for the past month, materially reducing the output, and is likely to exist for some weeks to come. From that time forward, however, the mines may be expected to ship normally, the last two quarters of the year being heavier for this reason, than the first.

It may be noted that out of a total shipment from the Kootenay and Slocan districts of 28,763 tons, there were 3500 tons of lead zinc ore which would have remained in the mines if it had not been for the new plants run by the Canadian Metal company at Pilot Bay and Frank. This has formed a sensible addition to the output of the lead districts and when the plants are fairly in operation, which C. Fernau expects will be the case early in May, this source of ore supply will be much enlarged.

The cheaper rates for lead smelting, announced early this year, will also have their due effect upon the output of the lead districts, when the season is sufficiently advanced to permit of work being started on the numerous properties whose owners have already signified their intention of reopening their mines.

Similarly in the Boundary district a large increase may be looked for. The B.C. Copper company's smelter, which has already received close on 40,000 tons of ore during the last quarter, is more than doubling its capacity and thus a large increase may be looked for later in the year. The Dominion Copper company's smelter will also increase its works but at a comparatively later date.

From central Kootenay, from such mines as the Paradise, Ptarmigan, Red Line and others an output may be looked for, possibly at the end of the year and certainly next year, upon the completion of the Kootenay Central railway. In like manner the opening up of the Similkameen district and of that round Vernon, by railways which are already in course of construction, will also enhance the totals for the present and for the coming year.

The mines shipping to Pilot Bay are the Hartney, Silver Cup and Blue Bell, and those to Frank are the Mammoth, Charleston, Wakefield, Emily Edith, Goodenough, Lone Bachelor, Giant of Revelstoke and Aurora.

With the disappearance of snow the road from the Eureka Mines to the upper terminal of the tramline has become impassable, and shipments cannot be resumed for another month at least.

In the meantime development work is being pushed vigorously, and with highly gratifying results. The ore bodies now located and proved are very extensive, and the hopes of the owners are being fully realized. Values are not only maintained as development work goes lower, but have so far steadily increased.

Drifts are being run north and south on the 150 foot level. The vein followed to the north is four feet wide, and carries values aggregating about $35 a ton. Southward also the ore continues high grade.

More pumps for sinking are to be installed at once and the property will be explored at greater depth. A small boiler will be operated for power to run a small sawmill to cut all timber required for tunnelling and for various mine buildings.

During 1906, to date, the Eureka has shipped to the Trail smelter 699 tons of ore averaging round $30 a ton. Assays of the ore now being uncovered at lower levels show higher values than those of former shipments. On the whole the stockholders feel highly pleased with the results of the work already done, and with the general outlook for the property.

CANADIAN FRUIT.

Recommendations For Better Grading and Packing.

Toronto Globe: For producing certain kinds of fruit some parts of Canada are very well adapted. Apples are grown over a wide range of territory, with satisfactory results. Grapes and peaches of many varieties and of excellent quality are produced in great abundance between Niagara and Detroit. Berries of all sorts and many varieties of plums may be profitably cultivated over all southern Ontario and Quebec. While fruit is extensively and increasingly consumed in Canada, a foreign market is a necessity if the industry is ever to reach the proportions which our soil and climate warrant us in expecting. This is especially true of the less perishable fruits, and more particularly of apples.

At the recent meeting of the Dominion Fruit Growers' Association at Ottawa this matter was thoroughly discussed in all its bearings. The members present were very insistent as to the necessity for better cold-storage facilities, for more efficient inspection of packed fruit and for better grading. The need for honest packing was not overlooked. It is not too much to say that on this more than on all other things put together depends the possibility of building up a large export trade in Canadian fruit. What has been successfully accomplished in the case of cheese, and is now in process of accomplishment in the case of butter, might be brought about in the case of fruit, if frauds of various sorts could be successfully suppressed.

The most effectual preventive of fraudulent packing is honesty on the part of the packers. If, as individuals, they choose to go on deceiving British purchasers, it will be impossible for Canada ever to secure the reputation as a fruit-producing and exporting country to which she is by nature entitled. Something may be done by efficient inspection, by insisting on correct labelling, by requiring all packers to put their names and addresses on their packages, and by drastically punishing perpetrators of frauds. One of the worst features of the situation is the wrong done by the dishonest packer to his honest neighbor, who too often becomes a kind of laughing stock for men that make more out of their fruit than he does and yet get off scot free.

The Fruit Growers' Association recommends that the Fruit Marks Act be amended so as to provide for the creation of four grades, numbered one, two, and three, with "extra" to designate the highest. It is doubtful whether fruit coming fairly within the description of the lowest grade should be exported at all. The next lowest would include only specimens of medium size, not less than eighty per cent being free from worm-holes and such other defects as cause material waste. In all grades proper packing is regarded as essential. Hitherto there has been a good deal of reluctance to resort to penalties for the enforcement of the act. This squeamishness will have to be abandoned, however, if the law is to be effective, and the sooner the better If the present penalties are found to be insufficiently deterrent, then they should be made heavier. There are no minor offences in fruit grading and packing.

LOCAL MINING MARKETS

COPPER STOCKS FAVORABLY MOVED BY GRANBY DIVIDEND

DEMAND STILL GROWING—HOLDERS DECLINE TO SELL

The stock market continues active. While some stocks declined a few points, most of them held very firm.

Dominion Copper was the most active. This stock advanced early in the week to 62 1-2, and then sold off a few points, closing yesterday on the curb at New York at 53. Granby is in good demand, most of the orders coming from the boundary and western states. On March 30 this company declared a dividend of 3 per cent, amounting to $400,000. It is expected that this will cause an advance in all Boundary copper stocks.

International Coal is holding firm with very little of the stock being offered.

Rambler-Cariboo is in good demand, but local brokers find it almost impossible to bring out any of the stock.

Western Oil is still very active, most of the orders coming from the east and Vancouver.

Canadian Smelters is holding firm, selling now at $40 above par.

Eureka Copper is still the favorite with local investors. Nicola Coal has again advanced, but even the higher price brings out but very little of the stock. Le Roi is in good demand, most of the orders coming from Trail and Rossland. Denoro Mines dropped a few points, principally on account of the closing down of the mine pending a certain deal on the property to the B. C. Copper company.

Following are the quotations for the week just ending:

	Bid	Asked
Arlington Mines	$ .4	$ .5
Alhambra	.10	.12
American Boy	.1	.1¼
B. C. Copper	8.50	10.00

White Bear	.2	.3
Yale-Kootenay Ice	.7	.8

STRIKE IS NOT GENERAL

MINERS IN THE BITUMINOUS FIELDS WILL REMAIN AT WORK

WORK IN ANTHRACITE DISTRICTS IS SUSPENDED

Indianapolis, March 31—Despatches received from various parts of the coal districts, both bituminous and anthracite, today show that there is not likely to be a strike of any extent in the bituminous fields but that, pending the result of the anthracite conference of Tuesday next, the great majority of the anthracite miners will not return to work on Tuesday and will remain out until an agreement has bee reached. President Mitchell is leaving here at once for New York, where he will attend the meeting. Th only exception to the rigid observance of the anthracite strike is possible in the Schuylkill collieries in southern Pennsylvania, where the operators claim they will have enough men return to work to permit them to run the collieries shorthanded. This is denied by the miners and the probabilities are that the whole Lackawanna district, including Schuylkill, will go out.

On the other hand, the great bulk of the bituminous miners will not stop work at all. Contracts were signed today, granting the new scale by the operators of western Kentucky, by the Mercer Buler coal district of Sharon, Pa., and by the Berwin-White and Steinman coal companies of Johnstown, aP. In addition to these several large mines in southern Illinois and all the mines of southern Indiana have made application to be permitted to sign the contract and president Mitchell freely predicts that within ten days the whole of the bituminous operators will grant the scale. The names given are in addition to those represented by F. L. Robbins and the independent operators, who between them control 53 per cent of the total output.

On the other hand the operators in Arkansas and in Shamokin and Hazelton, Pensylvania have determined to go with the struggle. The opertors telegraphed president Roosevelt today saying that they were willing to submit to arbiration but that president Mitchell had refused.

CONFERENCE AT AN END

Kaiser Concludes He Has Lost More Than He Has Won

Great Britain is of Opinion That France Has Won a Great Diplomatic Victory but War May Yet Come

Algeciras, Spain, March 31.—The committee of the conference on Moroccan reforms reached an agreement today on all points, and this agrement was sanctioned at the plenary session of the conference this afternoon.

The division and the policing of the ports of Morocco was arranged as follows:

Spain polices Tetuan and Larache, a Franco-Spanish mixed police will be established at Casa Blanca and Tangier and a French police force at once will have charge of Mogador, Saffi, Mastagan and Rabat. This gives France four Atlantic ports. The duration of the police agreement was fixed at five years. The settlement of the question of the state bank of Morocco gives France three shares including those of the French syndicate. The other nations have one share. Four bank supervisors will be appointed by the bank of England, the bank of France, the Imperial bank of Germany and the bank of Spain.

London, March 31—Although anticipated for a fortnight the successful outcome of the Algeciras conference on Moroccan reforms brought great relief to England, as during the past year the Moroccan question was the only one causing serious misgivings to the peace of Europe. The agreement is considered to be a victory for France, who retains the preponderance of the influence on the financial affairs of the sultanate, and loses very little of what she demanded with respect to the policing of the country, for, with a majority of the powers supporting her policy the diplomats at Tangier are not likely to interfere much with the Franco-Spanish officers. While Great Britain opposed the conference until France had agreed to it, it is now realized that the meeting of the delegates served useful objects in cementing the Anglo-French entente and dissipating the belief held in many continental states that Great Britain would only support her friend when it was to her own advantage.

On the other hand it assures Great Britain that she is not involved with a dangerously aggressive power. As for the future, the foreign office is not so optimistic, but officials look upon the agreement as merely a temporary relief as it stops aggressive action, but does not prevent the interested nations continuing to strengthen their positions until either feels strong enough to take without parley what it failed to secure through diplomacy. It is not believed that Germany will give up her efforts to obtain a footing in the Mediterranean.

Berlin, March 31.—The gains and losses due to Germany's Moroccan policy are being consulted when other powers are arranging the future of weak states now is regarded as established. In the face of diplomatic resistence of Frence, Great Britain, Italy, Spain and Russia, the Germans, throughout the long controversy, have been compelled to recognize that they have not a friend in Europe, except Austria. Respecting Morocco itself, Germany claims it has secured equal trade for the future and that it has checked, for some years, the development of French political designs.

The losses sustained by Germany, and they are deemed great ones by those who are opposed to her Moroccan policy, are that a reconciliation with France has been delayed indefinitely, while France and Great Britain have been pressed closely together in their mutual dislike of Germany. The conviction is strengthened that Germany must continue to develop her navy in order to be safe in future international discussions and Germany's determination to avoid the ruin of war is increased.

FIRE ALARMS

The fire brigade was calltd out yesterday at 6:10 p.m., and on arriving at the scene the firemen found a fire of rubbish on vacant ground behind the Porto Rico Lumber company's office. There was no danger or apparent reason for the alarm. Later the author of the alarm was discovered, a Frenchman, name unknown, and very drunk. He was take in charge on general principles.

The children who started the fire near the exhibition building Friday afternoon were located yesterday. As their respective ages are four and five years, they are exempt from punishment, except at the hands of their parents.

GUN CLUB SCORES

On account of the small attendance of members at the traps yesterday the executive of the gun club called off the shoot for the Dominion Cartridge company's medal. Two events of 25 birds each were shot, with the following scores.

Goepel, 23; Blackwood, 19; Young, 12.
Goepel, 21; Blackwood, 20; Ward, 16.

TURKEY YIELDS.

London, March 31.—The Cairo correspondent of the Daily Telegraph reports that Turkey has begun the withdrawal of troops from the disputed posts in Akabah.

THE DAILY NEWS

Published at Nelson Every Morning, Except Monday by F. J. DEANE

A TIMELY PROTEST.

In the course of an address delivered recently in New York city to a fraternal society, district attorney W. T. Jerome, roundly denounced a section of the United States press and some magazine publications for their "yellow" methods in reporting insurance and other "disclosures" and in spreading broadcast many absolute fabrications of alleged existing conditions in the industrial life of the American nation.

Speaking of the effect of this general and indiscriminate attack Mr. Jerome said: Public opinion goes hither and thither like a ship, but in the long course of time it is sweet and sane and sound and will make its port; but it lies on you to see to it that its tacks are no longer than they ought to be. It is wasted power, that sentiment of the community that goes up one trail and back again to another. Today all through this nation what do we find—a case of absolute hysteria. Gentlemen, no nation ever built its national life on the warp and woof of perjury, tort and larceny; and yet today you would think this great country we love was setting its course on this foundation."

Coming down to specific instances where the public had been needlessly alarmed by the methods adopted by the newspapers and magazines referred to, Mr. Jerome, stated that he had been informed by a director of the Mutual Life Insurance Company that nearly one hundred millions of dollars in policies has lapsed in the last year. Upon asking for further details he was told that the vast majority of these lapsed policies were those of poor people and were for from $1200 to $3000. These unfortunates, said Mr. Jerome, had taken alarm at the cries of the wild newspapers. "No one could doubt that these companies are solvent as the United States government, but they had been scared by these hounds of yellow journalism, and the poor motormen and conductors and mail carriers have let their policies lapse. The newspapers had driven from their protection the wives and children of the poor."

In concluding his address, the district attorney declared: "Gentlemen, the real terror is not what has been told you. The real evil in this insurance situation is that some eighteen or twenty men can control hundreds of millions of quick moving assets; can sit in their club and make the game of finance a brace game if they want to. The great evil is that. You can't pick out eighteen or twenty men so good that the power of $1,500,000,000 should be entrusted to them."

There is a danger that some of our own people may become needlessly alarmed over sensational accounts of "disclosures" made at the insurance investigation now in progress at Ottawa before the royal commission, and as more than once recently pointed out in these columns, the main issue involved at Ottawa is not the solvency of the life insurance companies but a determined effort to regulate the methods employed and to safeguard the policy holders in the administration of the huge sums that are annually handled by these companies. It can not be too strongly impressed upon all life insurance policy holders at the present time that under no circumstances should they allow their policies to lapse, on account of "disclosures" at the investigation now pending.

EDITORIAL NOTES.

The greatest industrial struggle in the history of America, in comparison with which the coal strike of 1903 pales into insignificance, has been narrowly averted for the time being and it is yet possible that the operators and miners may come to an agreement. The result of Tuesday's meeting will be awaited with anxiety all over this continent.

The directors of the Nelson Agricultural and Industrial Association are to be congraulated for their commendable promptness in getting ready for this year's exhibition which will be held here on three days in the third week of September. The prize list has been carefully revised and added to and we are able today to present to the readers of The Daily News two portions of it, those referring to the poultry and fruit sections. It will be noted that last year's list in both departments has been considerably extended. The balance of the prize list will be published in these columns in the next few days, and will shortly appear in pamphlet form for distribution. Nelson's annual exhibition has proved one of the best advertising schemes for the city and district yet produced and this year the directors hope to greatly improve on any fair so far held. By making their arrangements well in advance, as they are doing, the fair managers will win the strong approval of the community and insure the triumphant success of this year's undertaking.

Concluding an editorial reference to chief justice Hunter's decision in the Vernon-Midway subsidy matter, the Vancouver World says: "The judgment is invested with more interest than otherwise would be the case because of a persistent rumor that will not 'down' and which attributes (among other things) the retirement from the cabinet of Mr. Wilson to the attempt on the part of the government, at the bidding of the Canadian Pacific railway, to kill the Midway and Vernon scheme until the C. P. R. had had time allowed them to build the road themselves. The conspiracy, if it existed, has been signally defeated."

THE DIVINITY OF CHRIST

PROCLAIMED BY HIMSELF IN REPLY TO JEWISH QUESTIONS

MEDIAEVAL CUSTOMS OF KEEPING ALL FOOLS' DAY

Today is the fifth Sunday in Lent, commonly known as Passion Sunday. The gospel narrative, which, during the earlier Sundays of the season, deal with the acts and especially with the miracles of Christ's ministry, become, as the end approaches, an account of His direct doctrinal teaching on the subject of His own divine personality and His relation with the Father. Today's gospel, from St. John, is the answer of Christ to the Jewish doctors accusing him of sorcery and evil teaching. His account of Himself is direct and explicit, and presents an unanswerable difficulty to modern thinkers who would describe Him as a great, perhaps the greatest inspired teacher of the race, but still wholly human. His reply contains the statements: "If a man Keep my sayings, he shall never see death," "It is My Father that honoreth Me, of Whom ye say, that He is your God; yet ye have not know Him, but I know Him," and as to His existence from the beginning, "Before Abraham was, I am."

Today being the 1st of April, is All Fools' day, a mock religious festival of the Middle Ages. Its rites, were wholly profane and blasphemous, yet their observance was not seriously reproved by the church. The grotesque ceremonies peculiar to the occasion, the crowning of the Pope of Fools, the consecration of the Boy Bishop, the Abbot of Unreason, and the ordaining of the Monk of Misrule, are described at length in Scott's novel, The Monastery. The custom died out—with the Reformation of the 16th century and the Catholic reaction that followed, when spirituality and reverence were resored.

The services announced for today in the churches of Nelson are as follows:

Anglican—St. Saviour's church, corner of Ward and Silica street. Fifth Sunday in Lent. Holy communion, 8 a.m.; morning prayer and holy communion, 11; children's service, 2:30 p. m.; evensong, 7:30. Rev. F. H. Graham, rector.

Catholic—Church of Mary Immaculate, corner of Ward and Mill streets. Low mass, 8 a.m.; high mass, 10:30 a.m.; evening service 7:30. Rev Father Althoff, priest.

Salvation Army—Barracks on Victoria street, west of Josephine. Special services will be held today. Knee drill, 7 a.m.; holiness meeting 11 a.m.; a praise meeting at 3 p.m.; Salvation meeting, at 8 p.m.

Baptist church—Stanley street, near Mill. Morning service, 11 a.m.; evening service, at 7:30; Sunday school at 2:30 p.m.; Rev E. H. Shanks, pastor. Morning topic, "The Badge of the Christian"; evening topic, "To be a Man, or the Basis of Equality."

Presbyterian church—St. Paul's, corner of Victoria and Kootenay streets. Morning service, 11 a.m.; Sunday school, 2:30 p.m evening service, 7:30. Rev. J. T. Ferguson, pastor.

Methodist church—Corner of Silica and Josephine streets. Morning service, 11 am.; evening service 7:30; Sunday school, 2:30 p.m. Rev. G. W. Dean, pastor.

STRONGER AT WEEK END

STOCK MARKET REACHES HIGHEST QUOTATIONS OF MONTH

GRAIN AND PROVISIONS DECLINE—CROP REPORTS GOOD

The closing session of the week on the stock exchange was marked by a general advance, an unusual movement for Saturday. The development is especially significant for several reasons. The opening quotations were above Friday's closing figures, and the highest of the week, and, in fact, of the month. The advance was general, affecting every stock on the list, and the majority closed at the high figures. Such a situation in the face of an impending industrial strike involving early every interest in the country, is taken as an indication of great confidence in the stability of the market.

Grain and provisions experienced the usual week end decline, not very pronounced but general. Wheat is now one point below the average low quotation of March. The May option will be open for 30 days longer, but as crop reports continue favorable, a decline is more likely than an advance.

STOCKS—Amalgamated Copper opened at 108 3-4, advanced to 109 1-8 at close; U.S.S. common opened at 40 3-4, advanced to 41 3-4 at close, preferred opened at 106, closed 107 1-4; B.R.T. opened at 87 1-2, closed 87 3-8; St. Paul opened 176 7-8, advanced to 177 7-8, closed 177 5-8; U.P. opened 156 1-8, advanced to 157 1-4, closed 156 7-8; L. & N. opened at 150 3-4, advanced to 151, closed 150 3-4; Atchison opened at 94, closed 94 3-8; Erie opened 44 3-8, advanced to 44 5-8, closed 44 1-2; C.P.R. opened at 172 1-4, sold to 172 5-8, closed 172 1-2; Penn. opened at 138 1-2, advanced to 138 7-8, closed 138 5-8; Reading opened 134 3-4, advanced to 135, closed 134 7-8.

May wheat opened 77 3-4, sold to 77 and closed 77 1-4; July opened at 77 3-8, sold to 76 3-4, closed 76 3-4.

ALWAYS KEEP CHAMBERLAIN'S COUGH REMEDY IN HIS HOUSE

"We would not be without Chamberlain's Cough Remedy. It is kept on hand continuously in our home," says W. W. Kearney, editor of the Independent, Lowry City, Mo. That is just what every family should do. When kept at hand ready for instant use, a cold may be checked at the outset and cured in much less time than after it has become settled in the system. This remedy is also without a peer for croup in children and will prevent the attack when given as soon as the children become hoarse, or even after the croupy cough appears, which can only be done when the remedy is kept at hand. For sale by all druggists and dealers.

A FAVORITE REMEDY FOR BABIES

Its pleasant taste and prompt cures have made Chamberlain's Cough Remedy a favorite with the mothers of small children. It quickly cures their coughs and colds and prevents any danger of pneumonia or other serious consequences. It not only cures croup, but when given as soon as the croupy cough appears will prevent the attack. For sale by all druggists and dealers.

AFFLICTED WITH RHEUMATISM

"I was and am yet afflicted with rheumatism," says Mr. J. C. Bayne, editor of the Herald, Addington, Indian Territory, "but thanks to Chamberlain's Pain Balm am able once more to attend to business. It is the best of liniments. If troubled with rheumatism give Pain Balm a trial and you are certain to be more than pleased with the prompt relief which it affords. One application relieves the pain. For sale by all druggists and dealers.

Until April 15, the Workingman's store has special bargains to offer.

All members of Nelson lodge, No. 25, Knights of Pythias are requested to attend a farewell social for brother D. Porter at Castle Hall on Tuesday, April 3rd, at 8:30 p.m. Visiting members are cordially invited to attend. A good time is assured.

NELSON EXHIBITION

Appended will be found Sections A and B of the Prize List for the Nelson Exhibition to be held here on September next. The Sections given are devoted to Poultry and Fruit. The balance of the Prize List will appear in the course of the next few days.

PRIZE LIST.

SECTION A.—POULTRY.

$270 IN PRIZES
OPEN TO ALL

(1) The card of the Association will be placed upon each coop, cage or specimen, giving the number and variety of the exhibit only; but no other card, or any other means of identification will be allowed on any coop, cage, or specimen until the judges have completed their awards.

(2) Coops, except in the Ornamental Class, will be provided and the poultry fed and taken care of at the expense of the Association.

(3) All specimens, except Games and Game Bantams must be exhibited in their natural condition.

(4) No exhibitor shall interfere with, or enter into discussion, or be allowed within the building with the Judges whilst they are engaged in their work.

(5) All poultry and pet stock must be on the grounds not later than 8 o'clock p.m., Tuesday, September 18, and no birds will be allowed to compete for more than one prize. Birds competing in their own class cannot be shown in the collection.

Judging takes place between 8 and 10:30 o'clock on the morning of Sept. 19

Audited and found correct.
J. M. SCULLY, F.C.A., Auditor.

GEO WEGENAST, Manager
Waterloo, Feb. 1, 1906.

DIRECTORS' REPORT

INSURANCE ACCOUNT—The volume of new business was 3637 policies for $6,014,576, being an increase over 1904 of 185 policies for $966,408. With the exception of $65,000 written in Newfoundland the new business was all written within the dominion of Canada. The total amount of assurance in force is $44,199,954, under 29,783 policies, being an increase over 1904 of $3,722,984.

INCOME—The total income for the year was $1,956,518.91, derived from premiums, $1,547,506.45; interest and rents, $407,563.94, and profit from the sale of real estate, $1448.52.

PAYMENTS TO POLICYHOLDERS—The payments to policy holders consisted of death claims, $231,924.10; matured endowments, $159,450; purchased policies, $64,188.68; surplus, $37,928.85, and annuities, $9,422.56, being a total of $552,914.19. The death claims which fell in during the year amounted to $269,214, and though slightly in excess of those in the preceding year, were very light and much below the expectation.

THE EXPENSES AND TAXES were $348,491.76, and profit and loss $1,519.18, making a total of $350,010.94, or 17.8 per cent of the total income.

ASSETS—The cash assets at the close of the year were $8,846,658.42, and consisted of mortgages, $4,265,533.86; debentures and bonds, $3,245,401.89; loans on policies, $988,670.39; premium obligations, $28,810.60; real estate including the head office building, $56,281.08, and cash in banks and at head office, $261,960.60. Adding to this the due and deferred premiums, $272,121.08, interest and rents due and accrued, $177,312.65, the total assets amount to $9,296,092.15. It will be observed that, as in the past, we still continue to invest our funds in securities of a non-speculative character, and that we hold them on our books at their net cost.

The interests on our investments has been very well met, especially in the city of Winnipeg, where on mortgages amounting to $745,555, the interest in arrears at the end of the year was only $227. In the province of Manitoba and the west generally there is a tendency to defer payment of installments of principal on account of the desire to purchase more land. All payments both for interest and principal have, however, been very well met, and were quite equal in that respect to the previous year. In Ontario and Elsewhere the mortgage collections have been exceptionally good and at the close of the year there was interest in arrears of only $16,317, the largest part of which fell due on the closing days of the year and has since been paid. The active demand for money during the year kept our funds well employed and at good rates of interest. The average rate realized on our funds was 5.1 per cent.

THE LIABILITIES were again computed on the same standard as in former years, viz: Combined Experience Table with 4 per cent interest for all business up to January 1, 1900. From that date to January 1, 1903, on the Institute of Actuaries Table with 3 1-2 per cent interest, and thereafter on the same table with 3 per cent interest. The reserve computed upon this standard of valuation amounts to $8,210,064.24 and the total liabilities are $8,342,091.03. The surplus over all liabilities on the company's standard of reserve, as above mentioned, is $952,001.12, being an increase for 1904 of $179,928.25. On the government standard of valuation our surplus would be $1,261,905.

As in former years, the executive committee has examined all the securities and verified all the entries relating to them on the company's book.

On behalf of the Board, ROBERT MELVIN, President.

NOTICE

NOTICE is hereby given that sixty days after date I intend to apply to the chief commissioner of lands and works for permission to purchase 100 acres of land in West Kootenay district, commencing at a post on the west boundary of Lot 301A, where the said boundary intersects the south shore of the Columbia river, thence south along the west boundary of Lot 301A for a distance of 18.14 chains to a point 40 chains north of the southwest corner of Lot 301A, thence west 60 chains, thence north 16 chains more or less to the southern boundary of Lot 7373, thence east along the southern boundary of said lot for a distance of 32 chains more or less to the southeast corner of Lot 7373, thence north 1.88 chains to the C. P. R. right of way, thence east 6.50 chains more or less to the southeast corner of Lot 4580, thence north along the east boundary of Lot 4580 to the south shore of the Columbia river, thence east along the south shore of the Columbia river for a distance of 21.80 chains more or less to the point of commencement, containing 100 acres more or less.

J. J. TANGEN,
K. K. BJERKNESS, Agent
Dated Feb. 2nd, 1906.

Synopsis of Regulations Governing the Disposal of Dominion Lands Within the Railway Belt in the Province of British Columbia.

A license to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths, excepting those situated west of Yale, for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:

Sawn lumber, 50 cents per thousand feet B. M.

Railway ties, 8 and 9 feet long, 1 1-2 and 1 3-4 cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent. on the sales.

A license is issued so soon as a berth is granted, but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B.M., for square timber and sawlogs of any wood except oak; from 1-2 to 1 1-2 cents per lineal foot for building logs; from 12 1-2 to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties, and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of 21 years at a rental of 2 cents per acre per annum.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for homestead purposes may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the minister of the interior at Ottawa, the commissioner of immigration at Winnipeg, or the local agent for the district within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

It is the practice of the department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property, with buildings for their accommodation, will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of th Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the Act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,
Deputy of the Minister of the Interior.
Ottawa, February 14th, 1905.

NOTICE

NOTICE is hereby given that 60 days after date the undersigned intend to apply to the Honorable the Chief Commissioner of Lands and Works for permission to purchase the following described lands: Commencing at a post planted at the southwest corner of Thomas Greenwood's application to purchase, and being on the eastern boundary line of Lot 832, G.I., Kootenay District, thence south 20 chains, thence east 40 chains, more or less to the western boundary line of Lot 306, G.I., Kootenay district, thence north 20 chains, thence west 40 chains more or less to the place of commencement.

FRED J. SAMMONS.
GEORGE ADAMSON.
Dated at Procter, B.C., this 2nd day of March, 1906.

WHY DON'T YOU PUT IT IN
THE DAILY NEWS

WANT ADS in The Daily News bring prompt returns, because The Daily News is read by nearly everybody in the Kootenay and Boundary Districts six days a week.

Let Your Newspaper Do things for You.

When this newspaper has given to you the last word about the events of the day—when it has acted as a sort of Central Office in "connecting" you with "all of Creation"—it has done much for you, of course.
But it can do more than that.
It can help you run your store, your office, your factory or your house.
It can carry your "little worries" for you—and never turn a hair.
You do not fully use your newspaper if you simply read it.
You don't really KNOW your newspaper until you have used its want advertising columns.
It can dispose of things for you—it can secure things for you.
It can find lost things for you, find any kind of help you need, find buyers for your house, your lot, your horse, you furniture your shop or store, leasehold or interest or equity.
In short, any day, every day, this newspaper stands ready and able to
DO THINGS FOR YOU!

How would you like to Have 100 new Customers?

Is your store in such shape that ONE HUNDRED NEW CUSTOMERS would "turn the tide" for you?
Are things with you only just "so-so?" Bills maturing too fast—sales a little too slow—too many people going past your doors—lack of "snap" and "go" and "hustle" around your counters?
Are Fixed Expenses coming to be a burden—while they should be merely an incident—in your business?
If you feel these symptoms—no matter whether you are a big merchant or a little one—YOU NEED A TONIC!
PUBLICITY, in just as large doses as you can stand, repeated EVERY DAY, will change the whole situation for you.
It is idle to suppose that you cannot secure the ONE HUNDRED NEW CUSTOMERS—regular customers—who would "turn the tide" for you. YOU CAN GET THEM IN A WEEK—but not by wishing for them. It's not so easy as that. Nor by distributing hand-bills, or putting up posters, or buying space in programmes—it's not so easy as that. You must spend some money—more than you have ever spent—for ADEQUATE ADVERTISING SPACE IN YOUR DAILY NEWSPAPER.

WM. T. BUGGINS, Agent.

CERTIFICATES OF IMPROVEMENTS

Fourth of July No. 6, Jenny Long No. 2, and Teuro Mineral Claims. Situate in the Slocan Mining Division of West Kootenay district. Where located: On the North Fork of Lemon Creek.

TAKE NOTICE that I, C. D. Blackwood, acting as agent for A. T. R. Blackwood, Free Miner's Certificate No. B67845, and A. E. Tester, Free Miner's Certificate No. B69326, intend, sixty days after date hereof to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining Crown Grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificates of Improvements.

Dated this 10th day of March, A.D., 1906.
C. D. BLACKWOOD, Nelson.

OF INTEREST TO MINERS

ANOTHER SPECIAL ARTICLE ON "RARER METALS"

REPLIES TO MANY ENQUIRING CORRESPONDENTS.

Following our introduction, to the articles and correspondence we are publishing in these (the Sunday) issues, given last week, we have received a considerable number of replies. Most of our correspondents desire to know about the different gold, silver, copper, and lead ores. As the prospecting season will be commencing shortly, in all districts, within the next two months from now we think it an excellent plan; and though all arrangements are made for the completion of the articles upon the "Rarer Metals" we may hold one or two over so as to be in a position to deal with something that will be of more utility to the ordinary mining man, than the articles we have been running for the last three months. At the same time we should like to impress upon all our readers that gold, silver, copper, zinc and lead are not the only valuable metals that may be found in British Columbia, but that many others may be found in payable quantities. During the last three months we have tried to explain the chief metals that have a commercial value, and hope they have been taken advantage of by our readers.

PLATINUM GROUP

The group of "Rarer Metals" we give an account of this week, are similar to copper, arsenic, etc., inasmuch as they are precipitated as sulphides from a solution previously acidulated with hydrochloric acid. The greater part of this group are called platinum metals, as they are always found associated with that metal. Platinum and molybdenum are also included in this group but as they have been previously given in this course of articles , it is not necessary to deal with them again. Further as these metals are very rare and of little commercial value we only propose to give a few lines to each.

Palladium: This metal is chiefly found in connection with platinum ores, the only other known occurrence being in the gold ores obtained in Brazil, which ores usually contain from 5 to 10 per cent of the metal. Like silver it is soluble in nitric acid, which is a peculiar feature of this metal, as none other metal in this group is. It also has the lowest melting point of any in the group, melting at about 1500 degress. It has a white steel-like color, and is about as hard as steel. It is used in the inner works of watches, for surgical instruments, and for very delicate balances such as are used by assayers.

Rhodium is a whitish gray metal similar to platinum, though not as soft. It is insoluble in even the strongest acids or any combination of them, but when alloyed with lead it can be dissolved in aqua regia. It melts at 2000 degrees. Has no commercial value at present, though it costs $3.25 for 15 grains.

Osmium is the heaviest of all known metals having a specific gravity of 22.4. It has a grayish color and possesses a metallic lustre. When fused by an electric current it has a bluish color. It is used in combination with iridium in the preparation of the filaments for incandescent lights.

Iridium is a white steel-like metal, nearly always associated with osmium, in the form of osmiridium. It fuses at a slightly lower temperature than osmium but in other respects it is very similar, and has the same uses. As it is extremely hard and wears very slowly it is very useful for the points to gold pens, knife edges, in delicate balances, and other hard wearing surfaces. It costs about $1.10 for 15 grains, and it is stated that 30 ounces will fill the demand for the metal one year in the United States.

Ruthenium is very similar to the later metal being grayish white in color and very hard and brittle. It has no commercial value.

All the foregoing metals are what are commonly called platinum metals and are all found associated with that metal.

TELLURIUM

Tellurium is a brittle silvery white metal which combines with other metals in a similar way to that which sulphur does. The difference between the two being that whilst sulphur is often a very useful adjunct, tellurium is exactly the reverse, being the most useless, and deleterious metal known. In combination with gold and silver it forms tellurides of those metals. When these ores are roasted, the tellurium, which volatilizes at 500 degrees, has the power of carrying off the precious metals with its fumes, often causing great losses, so that special precautions are necessary when treating these ores. The metal even in minute quantities has a very deleterious effect upon copper, and should any get into combination with it, it causes great trouble in removing the same.

Tellurium is found in nature chiefly in combination with bismuth, gold, lead and silver. Occasionally it is found in its native state. Though this metal has been known over a hundred years and is not so very expensive to buy, no known uses have been found for it. It is, therefore, sometimes called the "black sheep" of the metal family.

SELENIUM

This metal was first discovered in 1817 by a Swedish chemist who found it present in the flue dusts of the lead chambers of the sulphuric acid works. He gave it its present name after the Greek word for "moon." Like tellurium it is closely allied to sulphur. Occasionally it is found in its free state but more often in combination with other metals, when it forms selenides. The metal can be either a dark reddish brown or a grayish black.

Selenium has been found very useful in electrical apparatus. It is used in the instruments for wireless telegraphy, and also in the photophone, a machine for sending photographs by electricity. It costs from 10 cents to $1.00 for fifteen grains, accroding to its pureness.

CORRESPONDENCE

Harold Cook, Arrowhead, B.C., writes as follows: "I am sending you a few samples of a mine I found, to see if it is any good. If it is please let me know for I am only a boy 10 years old and haven't got any money." We are sorry to have to disappoint our young correspondent by telling him that his samples are no good. The white rock with black spots in it, is an altered granite, whilst the yellow stained rock is quartz, neither of which will contain commercial values. We shall be pleased at all times to answer such enterprising young men as Harold Cook, as well as assist them in every way possible. We hope next time we hear from you, you will have richer samples to send.

A. H., Nelson, B.C.—The sample you submit for examination is a quartz porphyry containing azurite, malachite, and a little copper pyrites. The two former are carbonates of copper. Azurite when pure conains 69 per cent of copper oxide, and malachite 72 per cent of the same oxide. They are probably caused by the decomposition of copper pyrites in your vein, and with depth they may disappear giving place to the pure copper pyrities.

W. A. W., Slocan Junction, B. C.—The placer sand you left with us, is composed of several different minerals. Besides ordinary quartz sand, it contains black sand or magnetite. The red crystals are rubys, though of a very pale variety. They are sometimes called pigeon's blood rubies on account of their light color. Those contained in your sample are too small to have any commercial value, but if you can find them larger, a ready sale can be obtained for them at a good price. We shall be pleased to put you in communication with buyers should you be able to get them larger. Besides the above mentioned minerals there is a black mineral present, the exact character of which we are unable to state. Possibly it may be something to your advantage so would advise you to have it examined and assayed. There is also a little gold present and would suggest that you send us another sample somewhat larger and have it assayed for gold. Whilst doing that the assayer may be able to form an opinion of what other metals are present. The charge for gold assay will be $1.00.

W. T., New Denver, writes:—With reference to your recent article on molybdenum, it may interest your readers to learn that sulphide of molybdenum, molybdenite, has been found at several points in the Slocan country. Al. Wild reported an occurrance in the Little Slocan; Frank Provost and W. Brach reported two on Lemon creek, and I found one on Wilson creek several years ago. F. Provost states that one deposit on Lemon creek has a good showing of the mineral and may be worthy of development.

NEW YORK FASHION LETTER

New York, March 31.—Will shirt waist suits be worn again this season? This was the question asked me the other day. Indeed they will be worn, and judging by the numbers shown in the shops, and the great variety of suitable materials on exhibition, every woman must be going to have several of them.

Piques are going to be worn both for the smart morning frock with a jacket and also for the shirt waist suit proper. The majority of the new piques show many styles of cording and patterns and are so woven now that they have become well adapted to tailor cut and finish. Although white piques are so much favored, those in colors are hardly seen at all in fashionable "make-ups." The trimming most to be used is the eyelet embroidery, Hedebo or Danish cut work, which promises to be as popular as the Hardinger of last season.

A smart design on the blouse Eton style was developed in white pique and trimmed with bands of embroidery. The waist was made in blouse style with a double-breasted vest and backward turning fronts to form revers. Bands of embroidery decorate the cuffs of the short sleeves and revers and collar. The graceful skirt is the popular circular shape with two seams, the one at the centre of the front being made in Duchess style. This skirt should be about five yards and a half round with only enough fulness about the waits to form an inverted box-plait at the back.

Hedebo embroidery in combination with a pretty weave of pique was used for the second example of a shirt waist suit. The skirt was of the nine gored order with an inverted box plait back and at each side which is made in duchess style to yoke depth and the front gore has an "in-set" of embroidery reaching from the belt to the foot. The waist by means of tucks simulates the duchess effect and a panel front of embroidery decorates the front, and the cuffs of the same, trim the long close sleeve.

Linen, as I have written you before, is to be extremely fashionable, and if you have but one new dress have it made of linen. The fruit tints such as cherry, strawberry, currant are shown, but pink, blue and apple green with white as their leader are the most called for colors. There are also some beautiful tints of ivory and cream that wil be much in demand later on in the season.

Although you see many vivid colors on the counters, do not be deceived by them, "this is to be a white season," of which asertion there is ample proof; for the dressmaking parlors of our most fashionable costumers are full of white models and are turning out an unprecedented number of white gowns for all occasions.

Perhaps the favorite material for house dresses is the Persian lawn. The ground is almost invariably white over which are strewn the most beautiful patterns in delicate flower shades, conventional designs, etc. Still one does see a few colored Persian lawns, though they are by no means as beautiful in pattern or coloring as their white competitors. The lawns are particularly used for the fancy blouse. For lawns and all the thin fabrics now so popular the shirred modes are particularly effective; and a very pretty gown was developed in a white lawn figured in violets with its shawl, collar and cuffs of valenciennes lace. The foundation of the skirt was composed of five gores, the front gore formed a panel extending into a hip yoke to which was attached by means of three groups of shirrings, an over skirt made with a slight train. The waist was a shirred model having a lace V and shawl collar, and the sleeves were put into the arm holes with groups of shirrings and finished with a shirred cuff and fall of lace.

White linens and piques are worn for mornings and dimities in the afternoon, flowered organdies and muslins are par excellence the material for evening gowns; and the makers have been lavish in the grace and artistic beauty of their patterns and the lovely new collar effects. Frills edged with valenciennes lace will be a most popular form of decoration.

Organdy over pink silk was made for a debutante in the popular princess style. The skirt was made with many gores and the fulness about the waist was gathered to form a corsetlet from which the folds fall in graceful lines. The waist was developed from Irish lace with bolero fronts and back of the organdy, edged with lace. The neck was made low and the sleeves were of elbow length from which falls of lace were the finish.

Open neck and short sleeves are the characteristic traits of the new shirtwaist suits. All the skirts except those intended for more ceremonious wear, are made with short skirts graduated in that shortness according to the use to be made of the dress. Low shoes, tan, grey, or the again popular white will be worn over beautifully worked stockings. Tuckers will be worn by those who dislike the open throat, and in any case it is well to have one with each dress so made for in this climate so changeable, the open neck dress is often impossible even in summer and especially the evenings.

The little fancy boleroes of silk, chiffon or lace are a "happy-thought" adjunct to these lightweight dresses to be worn on cooler days and evenings. Some are fastened to the waist, but many are detachable, making them thus far more serviceable and often changing the whole effect of the dress, a pleasing feature if one has but one gown.

These "change-effect" accessories of dress should receive a good deal of attention from every woman who must economize for additional collars and cuffs, belts, boleroes, etc., are the poor woman's god-send in the matter of nice dressing.

A simple gown developed from this last material was yet made elaborate enough for all but the most formal affairs. A fitted lining supported the waist which is laid in fine tucks attached to a round yoke above which shows the shallow tucker and standing collar. The sleeves are laid in tucks from below the gathered shoulder puff and finished with a tab top. The modish flare skirt is of seven gore cut, fitting closely at the top, with a measurement of about six yards at the bottom. The costume is further decorated by a fancy embroidered band around the yoke from which extend tabs four inches deep; and about the skirt is another band and tabs six inches above the foot.

For the binding of light colored skirts a mercerized braid in a large line of colors are now shown. It is softer, lighter and more durable than the woollen or linen braids for summer dress and not so hard on the shoes.

CATHERINE MANN-PAYZANT.

WONDERFUL EFFECT OF FRUIT.

"Fruit-a-tives" (Fruit-Liver Tablets) are concentrated fruit juices. And it is these fruit juices that cure Constipation, Biliousness, Headaches, Indigestion, Palpitation of the Heart and all Troubles of the Stomach and Kidneys. A leading Ottawa physician discovered a process by which he could combine the juices of Apples, Oranges, Figs and Prunes and by adding another atom of bitter principle from the Orange peel, completely change the medicinal action of the fruit juices, giving the combination a far more powerful and more beneficial effect on the system. "Fruit-a-tives" are tablets made of this combination of fruit juices—and they have made most wonderful cures of Stomach, Liver and Kidney Troubles and of Blood and Skin Diseases. 50c a box.—Ask your druggist.

MUTUAL LIFE OF CANADA

Home Insurance Company Which is Owned by Policy Holders.

The 36th annual report of the Mutual Life Assurance company of Canada—known until six years ago as the Ontario Mutual—has just been issued and appears in full elsewhere in today's issue.

Policy holders in Nelson and throughout Kootenay, who are quite numerous, will be well pleased with the excellent showing made by their company during the year.

The company is the only one that is at once purely mutual and purely Canadian. Its policies are all held in Canada, and its funds are all invested in Canada.

Misuse of the company's funds and maladministration of the kind lately disclosed in connection with several American companies is almost impossible in the case of the Mutual Life of Canada, because the ownership and control is vested absolutely in the policy holders.

A special feature of the company's management is the very low proportion of working expenses to revenue, which is only 17.8 per cent. Consequently the company is in a position to offer policies at a somewhat lower figure than most other companies.

The greatest care also has been taken as to the selection of investments. The company's financial record for the 36 years of its existence, which is published for the information of the policy holders, is one of rapid, but healthy and steady growth.

NELSON'S NEWS OF THE DAY

Beginning tonight the curfew bell will ring at 8:45, instead of 7:45, as during the winter months.

Mrs. Frank Miller of Grand Forks, is in Nelson visiting her sitser, Mrs. J. P. Paxton, Silica street.

The regular fortnightly meeting of the city council will be held in the city hall tomorrow night at 8 o'clock.

The regular monthly meeting of the Women's hospital aid will be held in St. Paul's church hall tomorrow afternoon at 3 o'clock.

The morning service at the Baptist church today will be followed by a communion service. There will be special music by the choir.

G. H. Keefer, who has been foreman for contractor John Burns on the construction work at the Hall Mies smelter, leaves this morning for Edmonton.

M. F. Madden, president of the Providence Mining company of Greenwood, arrived from the Boundary last night and leaves for Chicago this moring.

The sacrament of the Lord's Supper will be dispensed in St. Paul's church today at the forenoon service. Strangers desiring to communicate will be welcome.

Mayor Gillett has now repeated three times his request for a reply to his telegram to Allis-Chalmers,Bullock company, but has so far obtained no reply nor even an acknowledgement.

A dance under the auspices of the city band is announced for Thursday night in Fraternity hall. The object of the dance, next to that of social enjoyment, is to complete the fund for the band uniforms which are expected to be ready in about a fortnight.

A boy of 11 years will appear in he city police court tomorrow morning to answer to a charge of theft. The accused lives in Fairview and has been a pupil at the school of the Sisters of St. Joseph. Small sums of money have been disappearing from time to time, and there is reason to believe that the boy is the culprit.

The musical entertainment at the Baptist church tomorrow evening, the program of which appears elsewhere in this issue, will probably be the best yet presented. Miss Cosling of Manchester, England, the guest of Mr. and Mrs. J. L. Stocks, will make her first public appearance in Nelson.

The first counting of the ballots in the 20,000 club popularity contest has been postponed for a week. The votes for the first fortnight will appear together. It is understood that Miss McCandlish polled a considerable majority up to noon yesterday, as Miss Cameron did not succeed in entering the ballots cast in her favor until after the time announced for the first counting.

A telegram for advertiser "C.H." has reached the office of The Daily News.

"Opportunities" occur—they are events or the result of events, and the news about them is usually printed first in the want ad column.

The members of Nelson lodge No. 25, K. of P. are tendering David Porter a farewell social at Castle hall on Tuesday evening. A good time is assured, and a large attendance is requested.

The woman shopper who "reads the ads first" saves her own and the store's time—uses better judgment in selection of goods—makes up her mind more promptly about things than the woman who shops in a rambling way.

The collections at the Nelson customs office for March amounted to $15,845.81, as against $15,166.93 for March, 1905. The receipts for the first quarter of 1906 are $56,590.47, against $39,541.21 for the corresponding period of 1905, an increase of $17,058.26, or nearly 40 per cent.

At St. Paul's church today at the morning service, Mrs. Melville Parry will sing Gounod's "There is a Green Hill Far Away." In the evening the choir will sing Dudley Buck's communion hymn, "Bread of the World," and Miss Johnston will sing the solo from Handel's Messiah, "He was Despised and Rejected of Men."

A series of dancing lessons will be given at the K. of P. hall, commencing Monday at 8 p.m. Everybody welcome.

CHIEF DEASY ARRIVES

New Head of Nelson Fire Department is in Charge Today

Thomas Deasy, the new chief of Nelson's fire department, arrived from Victoria last night, accompanied by Mrs. Deasy and is at the Hume.

Mr. Deasy was met at the station by mayor Gillett and assistant chief Phillips, and visited the fire hall. He looked over the equipment, and expressed surprise at its extent and quality. He immediately went over the department's plan of the city, showing the location of the hydrants, with the assistant chief, and inquired as to the pressure and the system of alarms.

While the new chief found a few things that he thought could be improved, he was very favorably impressed with Nelson's means of fire fighting. Chief Deasy will take over the control of the department at once.

Good Tooth Brushes

Don't grow on every bush. We get ours from a bush that produces the very best in the market. Tooth Brush prices with us run from 15c to 50c.

The 15c ones are not guaranteed. They are the best to be had for the money, that's all. The brushes from 25c up we replace with a new brush free of charge if they prove defective in any way.

Fifty cents may seem like a good deal to pay for a tooth brush, yet the people who buy them say that they are far more satisfactory and a bit cheaper than the 25c ones.

AT ANY PRICE WE CAN SUIT YOU
