THE DAILY NEWS

VOL. 5 NELSON, B. C., SUNDAY, AUGUST 12, 1906 NO. 96

PROVINCIAL LIBRARY

HAS FOUND THE LEDGE

Eight Foot Vein of High Grade Ore Struck in Rambler

Rich Discovery at the Krao in Ainsworth Camp is Creating a Sensation—Ore Shipments for the Week

The welcome news was received here last night that what is believed to be the long looked for ore body in the famous Rambler tunnel has been definitely located. The tunnel in question is over a mile long and was commenced nearly three years ago. When it was completed early this year it was announced that the expected ore body had not been reached and a natural slump in the stock followed. The dispatch appended states that a vein eight feet wide, highly mineralized and carrying high grade ore has been reached in an upraise from the tunnel but that more work will have to be done before the value of the discovery can properly estimated. The news has caused a sensation and further developments are eagerly awaited.

The rich find in the Krao mine at Ainsworth, reported on Thursday last, has attracted a great deal of attention and A. D. Wheeler, the lucky owner and manager of the property, is the subject of many congratulations. The ledge is said to be from 10 to 15 feet wide containing a streak of six inches of native silver, the richness of the discovery exceeding anything authentically reported from Cobalt camp in Ontario. Mr. Wheeler traded off some of his other holdings for Krao interests some time ago and it is understood that he now owns the property outright. He has been working away for some time with a force of six or eight men, and came on this latest discovery when about 100 feet down. Ainsworth camp has always been regarded as a low grade proposition, but if the Krao discovery is sustained a new estimate must be placed on the location.

The list of shipping properties in the Slocan-Kootenay district continues to grow, as will be seen by the number published this week.

The visit to Nelson and to Kootenay generally of A. P. Low, of Ottawa, director of the geological survey, already fully reported in these columns, and the closing of the deal for the Vancouver, by the Le Roi No. 2 company, referred to briefly in the mining review of last Sunday, were the only other occurrences of importance last week.

The output of the several mines and the receipts at the various smelters for the past week and year to date in detail are appended:

BOUNDARY SHIPMENTS

Mine	Week	Year
Granby	18,048	519,260
Emma	103	10,559

The total receipts reported from local and foreign mines for the past week were 29,244 tons and for the year to date 993,973 tons.

STRIKE ON RAMBLER

(Special to The Daily News)

Sandon, Aug. 11—At a depth of 1400 feet, a vein eight feet wide was struck in the Rambler-Cariboo today. The vein is well mineralized and carries high grade ore. It is stated that the vein was found in an upraise from the long tunnel, some 5500 feet in. The vein was found at a point between one and two hundred feet up from the tunnel. Further development will be necessary to demonstrate the exact value of the discovery but it is confidently believed that manager Zwicky has found the main ore body, the celebrated long tunnel was driven to strike. The tunnel, which is in over a mile, was commenced two years ago and completed early this year. The ore was not reached when the tunnel was completed and an upraise was started, with the result announced today.

STRIKE ON OTTAWA FRACTION

(Special to The Daily News)

Slocan, Aug. 11—Additional work to the value of 500$ is to be done on the May claim on 12-Mile, the contract for that amount having been let this week.

Paul Hauck has made a strike of good ore on his claim, the Ottawa fraction, adjoining the Ottawa, on which he has been working for the past month. The ore is silver, carrying grey copper and is as rich as that of the Ottawa.

GREYHOUND BONDED

(Special to The Daily News)

Phoenix, Aug. 11—Recently a bond was taken on the well known Greyhound mine, located in Deadwood camp, near the Mother Lode and Sunset mines, by the Rathmullen Mines, Ltd., through their managing director, L. H. Moffatt of Rossland, and Mr. Moffatt has already started a force of men to work, which is being done in charge of R. H. Hewer, a practical mining man and a mining engineer. At first surface work is being done on the property, preparatory to operating the property on the glory hole or quarrying system. The plan is to get a face from 60 to 100 feet in depth, and quarry the ore out for shipment, later using the present 200 foot shaft for deeper workings by a system of mill holes, which will obviate the necessity of shovelling the ore, as everything will be handled by gravity.

The surface and underground workings of the Greyhound have been thoroughly examined, sampled and assayed, with what are said to be satisfactory results, previous to the bond having been signed. The mine has one of the largest surface showings of any of the copper-gold propositions in the district, and it is the opinion of those taking the bond that the property can be put on a profitable shipping basis, and the low grade product made to yield satisfactory returns with an adequate amount of development.

CROW'S NEST COAL OUTPUT

(Special to The Daily News)

Fernie, Aug. 11—C. Bethune arrived in Fernie yesterday morning by the C.P.R. to spend a few days with his sister, Mrs. G. G. S. Lindsey. Mr. Bethune is a partner in the firm of Chrysler and Bethune, the well known corporation lawyers of Ottawa.

R. W. Coulthard, the general sales agent of the C.N.P.C. company, returned yesterday from a business trip to Spokane.

Wells Ross, son of the well known Toronto surgeon, is in Fernie spending a few days with Charlie Lindsey.

The small boy of Fernie was in his glory yesterday, there being a circus in town. The Burch and Reiss company put on two performances with a large street parade at 1 o'clock.

The following is the coal output for the collieries of the C.N.P.C. company for the week ending Friday, Aug. 10: Coal Creek, 13,738 tons; Michel, 8,356.08 tons; total, 22,094.08 tons.

Mr. and Mrs. Herchmer entertained a number of young people at a dance last night. The floor was excellent, and the music splendid. The grounds surrounding Mr. Herchmer's house, with their quantities of shade trees, adapt themselves splendidly for sitting out, cushions and rugs were spread under the trees and hammocks hung in shady nooks; the garden was most tastefully decorated with Chinese lanterns and the whole formed a most picturesque scene. Both Mr. and Mrs. Herchmer are prodigal of hospitality and dancing was kept up till the "wee sma' hours."

FIRES RAGE EVERYWHERE

Whole Valley of the Kootenay is Hazy With a Pall of Smoke

King Lumber Plant at Kingsville Threatened—Cranbrook Gets a Scare—Ymir Teamster's Close Call

(Special to The Daily News)

Cranbrook, B. C., Aug. 11.—A wire has just been received here stating that a serious fire is raging around the premises of the King Lumber company at Kingsville, about seven miles west of Moyie. At the time of the sending of the wire the shacks, blacksmith shop, office, cookhouse and barn were on fire with little or no hope of saving them. It is expected they will become a total loss. No portion of the mill itself or of the operative portions of the plant had caught fire up to the time of the despatch. The fire started from a small brush fire at the back of the shacks. How it originated is not known. M. B. King, who was fortunate enough to catch a train, started for the scene immediately on receiving the intelligence.

Bush fires are becoming somewhat serious around Cranbrook. On Tuesday night quite a big area was burning out near the North Star mill on the Marysville branch. It appears to have burned itself out, but is reported to be smouldering and may again become dangerous. The excessively dry weather and great heat of the past few days have made the woods as inflammable as tow, and of water to deal with outbreaks of an extensive character there is none available.

Last evening the fire bell rang an alarm and the hose wagon and a number of the fire brigade had to turn out to fight a brush fire close in beside the city limits near V. Hyde Baker's residence. It was got under control with the city water supply and is now being watched under the direction of the chief of police who has put on some men for the purpose. The entire valley of the Kootenay river is hazy with the smoke of various fires in different places around here. So far, however, no very great damage has been reported. Today the thermometer on the north side of Baker street registered close on ninety degrees, while in one of the offices on the south side it went well over the ninety mark. The present heat wave is the most trying to which this locality has been subjected to this year.

Ymir, B. C., Aug. 11.—Parts of lot 273, owned by Davis Sayward, of Victoria, and situated in the vicinity of Salmo, is undergoing a thorough cleaning out by fire. The fire started Tuesday afternoon about one mile from Salmo and on the Yellowstone wagon road. It was seen by a man named Olmstead who came in and reported a small fire burning around a stump. S. N. Ross, of the firm of Benson & Ross, immediately started for the scene but before he reached the place indicated the whole bottom was on fire. The bottom at this point consists of the old Lavin sawmill cuttings. This fire has spread along the wagon road and extended up the Salmo river a distance of about two and a half miles to a point where the Kootenay Shingle company Jap camp is situated. So far the fire has been kept wholly on the east side of the Salmon river. Manager Archibald, who has been working day and night with his men endeavoring to get the fire under control, is exhausted as are his men. If it was not for a strong wind which has been blowing for the past few days from the south this fire could have been stopped, but with the wind it is utterly impossible to prevent its spread. The railway track is patrolled by Archibald's men in an endeavor to prevent it crossing the track on to the west part of the lot.

There is also a bad fire raging on the Yellowstone road near Sheep creek. Three bridges have been burned out and the road is impassable except for pack or saddle horse, or those walking. Wm. Waldie, or the Queen mine, has his own men at work endeavoring to keep the fire off the corduroy. The Queen teamster yesterday started for the mine with a load of supplies, including one ton of powder. A tree fell across the load, barely missing the horses and teamster and a branch went completely through a box of powder, breaking the contents. Fortunately it did not explode. Fire warden Strathern, of Kaslo, is endeavoring to do the best he knows how to prevent the spread of the fire. Unless a big rain sets in it is feared that much valuable timber will be destroyed.

SLOCAN NOTES.

(Special to The Daily News)

Slocan, Aug. 11.—J. R. Martin, of Nelson, assistant timber inspector for this district, was in town yesterday.

Mr. Poupore, of Nelson, visited friends in Slocan this week.

The wife and children of Capt. McKinnon, of the str. Slocan, are visiting Mrs. R. E. Allen.

Mrs. M. E. Dempster, of Rossland, is the guest of Mrs. H. R. Jorand.

A delightful picnic, under the auspices of the Presbyterian Sunday school, and with the hearty co-operation of practically the whole town, was given the children of Slocan last Wednesday. The picnic was held on the beautiful grounds near the "Y" and overlooking the Slocan river. The sixty children present were most generously provided for, and thoroughly enjoyed the afternoon.

Miss Edna McVicar left yesterday for Vancouver where she will enter the training school for nurses. A ball was given in Miss McVicar's honor, on Tuesday evening, and she as also presented with a handsome purse as a token of the esteem and good will of her Slocan friends. The presentation was made at the picnic, Rev. Forbes making the address.

M. E. Dempster, of Rossland, is in town looking after his mining interests.

Miss Katherine Tinling and Mrs. Marshall, of New York, who have been visiting Mr. and Mrs. John Tinling, of Silverton, for the past month, have returned home. The young ladies spent the whole time in camping, boating, fishing, etc., and are enthusiastic over Slocan's ideal conditions for a vacation spent in outdoor pleasure.

IN SPORTING CIRCLES

REVELSTOKE LACROSSISTS WANT TO TACKLE NELSON.

RESULTS OF TODAY'S GAMES IN THE N. L. UNION.

In the ninth and last race of the day at the Worcester regatta yesterday the Riverside Boat club's senior eight-oared entry fouled the Argonauts of Toronto and as a result the judges have withheld their decision. The New York Athletic club's crew crossed the finish line first in eight minutes and twenty-six seconds.

Portland again had poor luck but finished second in the international four-oared shells. Winnipeg took fourth. The winner's time was 9.08. This was a mile and a half with a turn.

Winnipeg won the senior four-oared shells with St. Louis second. Time 12.27. J. C. Henderson, of Winnipeg, took first in the finals of intermediate singles. His time was 10.33.

C. S. Titus, of New York, won the championship senior singles against Sheppard of Brooklyn. Time was 10.5.

The cricket club are meeting with great success in their arrangements for the trip to the tournament at Victoria. According to present plans they will leave for the coast on the 17th.

Eastern lacrosse yesterday contained but few surprises. The strong teams were lined up against the weak ones and the results could safely be forecasted. The Shamrocks defeated the Nationals in Montreal by eight goals to four, and in Ottawa the Capitals took the Tecumsehs into camp to the tune of eight goals to two. The senators were expected to win but after their last game, which was a tie, it was thought that the Indians would put up a harder game. Cornwall, which is almost invincible in the factory town this year, had an easy time with Toronto, the score being nine goals to two. Last Monday on the Tecumseh grounds Toronto defeated the Indians rather easily. Score ten to two. The corrected standing of the N. L. U. teams, including yesterday's games, is as follows:

Team.	W.	L.	A.	TP.
Montreal	5	2	.714	5
Capitals*	5	2	.714	5
Cornwall	5	3	.625	4
Toronto	6	5	.545	1
Tecumsehs*	3	5	.375	4
Shamrocks	3	5	.375	4
Nationals	2	7	.222	3

*A tie game between Capitals and Tecumsehs is not figured in above standing.

Arrangements have been made for a game of lacrosse to be played on the opening day of the Lethbridge fall fair, the 16th of August, between the Calgary and Lethbridge teams.

Revelstoke has a lacrosse team of which it is proud and they are communicating with Manager Deasy of the Nelson club with a view to arranging a game in the junction city. The Revelstoke team is one of the fastest in the interior and numbers among its players several who were conspicuous in the past on the coast teams. Among these are four ex-Westminster players and two from Vancouver.

The local boys are all ready for Regina next Thursday but beyond accepting the date, nothing has been heard from them for several days and the local manager is stirring them up by telegraph.

Formal articles of agreement for the Gans-Nelson fight on September 3, at Goldfield, Nev., were signed yesterday. Each pugilist posted a forfeit of $5,000.

Cranbrook, Aug. 11.—Yesterday chief game warden Randall, of Fernie, charged J. Streeter and his son, both of whom are employed at Ross Bros. lumber mill at Elkmouth, before Alec. Watson, justice of the peace, with shooting chicken and wild ducks during the close season. The case was considered proven and the parties were fined $10 each with costs.

It is to be hoped that this successful prosecution may have the effect of putting a stop to this class of "sport." It is becoming a serious matter to preserve game for legitimate sport in the proper season and the public should aid in putting a stop to illegitimate destruction of the birds which do so much to attract outsiders to see the country. The very parties who are the most persistent offenders in this particular are those who would benefit most by the presence of strangers. The case was disposed of in the office of Mr. Malcolm McInnes at Elkmouth.

MAY RUN IN VANCOUVER!

Hawthornthwaite May Try His Luck in the Terminal City

Acknowledges That He Has Been Asked to do so, and Says He Will Consent if Pressed to

Vancouver, Aug. 11.—There is a probability that when the McBride government appeals to the people for a verdict on its past record, Mr. J. H. Hawthornthwaite, socialist member for Nanaimo, will be a candidate in Vancouver for the provincial legislature. Seen at the Dominion hotel, Mr. Hawthornthwaite said:

"Yes, there is a movement among the members of the socialist party in Vancouver to have me run here. I, like my two colleagues, am in the hands of the party. If it is considered in the best interests of socialism as we understand it to run here I will do so. Personally I would much prefer to remain with my friends in Nanaimo, who have stood by me in the past and who, I feel, deserve my best efforts at all times."

Other socialists seen expressed themselves as anxious that Mr. Hawthornthwaite should run here. They think that some other good man endorsed by him could carry Nanaimo and that he would undoubtedly be elected in Vancouver if he ran here and in that way the socialist party would gain a seat.

CANADIAN BOAT WINS

CHALLENGER CAPTURES FIRST RACE FOR FISHER CUP.

IROQUOIS DEFEATED BY ONE MINUTE AND THIRTY SECONDS.

Rochester, N. Y., Aug. 11.—The thirty-footer Zoraya, the challenger representing the Royal Canadian Yacht club of Toronto, today defeated the Iroquois, carrying the colors of the Rochester Yacht club, in the first race for the Fisher cup. The official time is as follows:

Start—Zoraya 12:20, 10; Iroquois 12:20, 12.

First mark—Zoraya 1:24, 45; Iroquois 1:36,27.

Second mark—Zoraya 2:23, 26; Iroquois, 2:25, .02.

Finish—Zoraya 3:12, 37; Iroquois 3:14, .09.

Zoraya won by one minute thirty seconds.

The race was over a triangular course of 21 miles. The first leg was to windward, the second a spinnaker run and the third a close haul on the wind. The wind was about 12 miles an hour.

Both yachts started on the starboard tack. Both were on the line when the starting gun was fired. The Zoraya crossed the line two seconds ahead of the Iroquois, the American boat holding the weather position. The wind was blowing across at 12 miles an hour with a choppy sea.

BACK THE FRUIT MEN

FRASER RIVER CANNERS ECHO CALL FOR CHINESE

APPEAL TO FISHERIES COMMISSION TO HELP THEM

New Westminster, Aug. 11—The Fraser River Canners' association has memorialized the fisheries commission upon the question of Chinese immigration. The secretary, W. D. Burdis, has laid the views of the organization before the commission. Their desires are simple. They want the tax of $5000 on orientals coming into Canada reduced to $100. They argue that, owing to the excessive head tax, no Chinamen have come here within recent years and that, as a result, labor is scarce, while wages have so increased as to make the work of putting a pack together much more expensive than heretofore. Their position, however, is clearly outlined in the aforementioned memorial, which follows:

August 6th, 1906

To Professor Prince and the Members of the Fisheries Commission, Vancouver:

Gentlemen—I have been instructed by the members of the above association to draw your attention to the serious and baneful effects which the increased Chinese poll tax has had upon the salmon canning industry in this province. As you are aware, about two years ago the head tax on Chinese emigrants coming into Canada was raised to $500 from $100, the amount at which it formerly stood. Since that time practically no Chinese have come in to take the place of those who died or returned to China for good. The result has been that farmers, fruit growers, householders and every person needing Chinese helpers, but more especially canners, have found it impossible to procure the necessary hands and consequently the rate of wages to Chinese laborers has increased about threefold. You will recognize how seriously this has affected the canners and increased the cost of their packs, as owing to the small population here, it is not possible to procure white helpers to take the place of the Chinese. The canners on Puget Sound and in Oregon and California do not experience this difficulty nearly so much, as, with the large population behind them, they can much more easily supply their requirements.

The canners respectfully submit that whilst your hon. commission is pursuing its labors here, it would be well, if evidence were obtained in this connection, and if the effects of the tax are found to be as stated, such representations be embodied in the report as will induce the dominion government to lower the rate to the former figure, viz., $100.

Respectfully bespeaking the favor of your esteemed consideration and attention.

I have the honor to remain, yours obediently,

(Signed) W. D. BURDIS, Secretary.

IS IT A SUICIDE CASE?

HARRY LAKE JUMPED OR FELL FROM STEAMER ROSSLAND.

DROWNED HALF A MILE FROM ARROWHEAD DOCK.

(Special to The Daily News)

Arrowhead, Aug. 11.—About 3 o'clock this afternoon when the C. P. R. river steamer Rossland was half a mile from the dock here a man named Harry Lake, of Sandon, jumped, or fell, overboard and was drowned. Boats were immediately lowered from the steamer and a specially close search was made but no trace of the unfortunate man could be found.

(Special to The Daily News)

Sandon, Aug. 11.—Harry Lake, who was drowned off the steamer Rossland today near Arrowhead dock, left here yesterday for Seattle. He stayed at Nakusp all yesterday. He was born in Oregon and belonged to the Miners' union.

Lake did not take up work here but dressed well and appeared to have plenty of ready money; he however seemed to be bothered about some matters and it was noted here, and at Nakusp as well, that the man appeared to be despondent.

The proprietor of the Grand hotel at Nakusp missed Lake last night after 7 o'clock and noted that Lake did not take his breakfast or dinner today.

The Miners' union here are trying to locate Lake's friends.

FEDERAL MINISTER ILL

HON. N. A. BELCOURT SUFFERING FROM PNEUMONIA.

ARGUED A CASE BEFORE PRIVY COUNCIL WHEN SICK.

(Special to The Daily News)

Ottawa, Aug. 11.—The Hon. N. A. Belcourt has been seriously ill for more than a month past. Mr. Belcourt a few days after his arrival in London contracted a very bad cold, which, owing to his many professional and social engagements, he neglected. It soon developed into pneumonia. Notwithstanding this, Mr. Belcourt persisted in his work and after arguing a case before the privy council (when seriously ill) he sailed on the 26th by the Empress of Ireland arriving in Montreal in a very weak state. He then placed himself under the care of Dr. Roddick, who ordered absolute rest and abstention from all work.

NELSON'S NEWS OF THE DAY

The Star bakery will be closed until 8 p.m. today, as Choquette Bros. will entertain their employees at a picnic to Procter today.

President Fred Starkey states that if the C.P.R. will grant a single fare to the coast and return, the excursion of the board of trade will take place on the 17th inst. The cricketers will join in and a good sized party can be made up if the right rate is given.

The Sunday school of St. Paul's church will hold their annual picnic in the Tramway park on Thursday next, the 16th inst. It will take the form of a basket picnic and parents of the scholars will be gladly welcomed. The members of the 1st Nelson company Boys' Brigade will also share in the picnic.

FOUR DROWNED AT WINNIPEG

(Special to The Daily News)

Winnipeg, Aug. 11—A terrible drowning accident occurred in the Red river this afternoon. A gasoline launch collided with a sunken log and a party of eight were thrown into the water. Four were unable to reach shore. The victims are: Ethel Brown, aged 18; Myrtle Brown, aged 12; J Brown, aged 14, all children of city clerk Brown, and Ruby, the youngest daughter of John Thomson, aged 13.

SULTAN IS REALLY ILL

Constantinople, Aug. 11—The sultan who has been ill for three weeks, was unable to attend the selamlik yesterday morning. The circumstance is unprecedented, the sultan never failing to perform this practice during the forty years of his reign. Up to the last moment he hoped that his condition would allow him to proceed to the mosque and the guard was on its way to the palace when it was ordered to return to its barracks.

SETTING OUT FOR DAWSON

Vancouver, Aug. 11—The railway commissioners met the directors of the White Pass and Yukon railway today preliminary to leaving for Dawson to hear complaints of the Dawson board of trade against the company for excessive charges on freight.

SUFFRAGETTES GO HOME

Copenhagen, Aug. 11—The sessions of the international conference of the league of women suffragettes terminated today.

A GIRLISH ASSASSIN

Friend of General Kaulbar's Daughter Throws A Bomb

Failing to Take the Life of Her Host, She Blows Out Her Brains—Sveaborg Mutineers Shot

Odessa, Aug. 11.—It was learned from official sources today that Barbara Printz, daughter of lieutenant-general Kaulbars, with a bomb hidden in her reticule, arrived here a week ago from Warsaw on the invitation of the daughter of governor-general Kaulbars, with whom she was educated. She frequented the general's house, watching him closely, preparing to make an attack on his life. Papers found in her room prove that she belonged to the terrorist section of the social revolutionists and that she came to Odessa commissioned to execute the sentence of death imposed by them on the general. The bomb was of extraordinary power and capable of destroying the general's palace. General Printz commands the Warsaw military division.

Yesterday Mlle Printz dropped her reticule containing the bomb when a few yards from the palace of the governor-general. The bomb exploded, but did not injure her. She then rushed to the hotel De St. Petersburg, where she had previously registered under the name of Polupkin, and shot herself dead.

St. Petersburg, Aug. 11—A representative of the Associated Press at Tsarkoe-Selo today ascertained that, though several arrests were made, responsibility for the attack on grand duke Nicholas had not been decidedly fixed. After a long investigation it was determined that the ball cartridges were fired by the first battalion of sharp shooters, one of the elite corps of the Russian army. The incident occurred during the movement of the Ismailovsky guard and the sharp shooters against a position held by the Seminovsky regiment.

Grand duke Nicholas was sitting on his charger observing the manoeuvres from the top of an entrenchment. The troops were advancing by short rushes in open order across a wide level field firing blank volleys by squads as they came. A few yards behind the grand duke was his suite. Suddenly, when the first of the attacking forces, consisting of sharp shooters, was 500 yards distant, a bullet rang high over head, followed by another and still another.

The cry was raised "they are firing ball," and the group was thrown into confusion.

After frantic signalling, "cease firing" was sounded but the shooting continued for some time. Grand duke Nicholas remarked, when he joined his suite: "It would be more realistic if the troops always fired ball during manoeuvres, but this is unpardonable negligence."

St. Petersburg, Aug. 11 — A manifesto signed by count Heyden, prince Nicholas Lvoff and Michael Stakovitch and issued on behalf of the "party of pacific regeneration," says:

"The members of the late parliament who have held aloof from the aims of the party of popular freedom, have decided to unite on the basis of a common program, their main object being the creation of a constitutional monarchial state. The regeneration of Russia is dependent upon a strong monarchial power, popular representation and freedom based on the rights and equality of all before the law. Regarding the agrarian trouble, this party considers it necessary and will not hesitate to demand compulsory expropriation of an amount of private property necessary to create permanent peasants holdings."

London, Aug. 11—A despatch to a news agency from Copenhagen says that a telegram has been received there from Helsingfors to the effect that lieutenant Hahanski and lieutenant Wiljanoff and five soldiers were tried by court martial and shot at Sveaborg today for connection with the recent mutiny.

CHILDREN'S BODIES FOUND

Moose Jaw, Aug. 11—Word comes from the Woods mountains that the remains of the two little Hoffman girls, aged 9 and 11 years, who wandered away from their home while going after horses on May 23 last, have been found by a shepherd in Porcupine creek, some 40 miles from their father's ranch. They must, therefore, have lived for some days, and finally died of starvation.

ROSSLAND MINES

Rossland, Aug. 11—Shipments of ore for the past week were somewhat lower than for the week previous as the bigger mines are paying attention chiefly to development work and in additions to their working facilities. An increase in output in the near future is likely to be the result of the preparatory work now in progress.

PRINCESS ALICE RETURNS

Oyster Bay, Aug. 11—Representative and Mrs. Nicholas Longworth arrived from Europe today and reached Sagamore Hill tonight. They will remain the guests of president Roosevelt for several days.

EARTHQUAKES IN ITALY

Rome, Aug. 11—A severe earthquake lasting two seconds, occurred at San Remo this morning. The population was panic stricken. Slighter shocks occurred at Bordighera and Goldirodi.

McBRIDE AND HAWTHORNTHWAITE.

Two particularly bright and shining stars of the conservative government have just returned to Vancouver from trips to distant parts of the province—Premier Richard McBride, of Dewdney, and the unofficial minister from Nanaimo, Mr. Hawthornthwaite. Each, according to custom, has been doing some talking, but once more, as it has so often proved in the past, it is the word of the unofficial minister that counts. The premier has contented himself with uttering commonplace comments on the scenes he witnessed and the progress he noted on his jaunt to Atlin (a jaunt, be it whispered, that was taken for the purpose of finding out how Mr. Clifford's pulse would stand the serious strain of being offered a place within the charmed circle of the cabinet)—but Mr. Hawthornthwaite has gone a good deal farther. He has announced for the McBride government that no election will take place this fall—not because the McBride government did not want it, but because he, Mr. Hawthornthwaite, blocked the premier's plans. Truly this is treason—treason, however, that will receive no punishment, for the miscreant has the upper hand.

According to Mr. Hawthornthwaite's story, he accomplished a good deal on his present stumping tour. In an interview with the Vancouver World, he allowed the reporter to write this:

"There will be no general election this year. There was to have been; in fact, it was arranged between the leaders of both sides of the house that there should be; but Mr. J. H. Hawthornthwaite has brought these well laid schemes to naught. At least, Mr. Hawthornthwaite himself says so; and after that, there is nothing more to be said.

"Among other matters which Mr. Hawthornthwaite settled, once and for all, on his recent trip, were the aspirations of Mr. Ross, the member for Fernie, for the portfolio of attorney-general. It was on the conservative cards that Mr. Ross should be re-elected while certain divisions still prevailed among the labor men. Mr. Hawthornthwaite has attended to that, and healed the divisions; and it is now understood that the government is looking around for another easy constituency from which to obtain a member to fill the vacant chair. Mr. Hawthornthwaite's next great work is to be the destruction of party lines in the province. This will be effected by the election of 9 or 10 socialist members in the next house, which will necessarily put everybody else on the other side. Indpeendently of all this, Mr. Hawthornthwaite expects that there will be a great change in the personnel of the coming legislative assembly. Not more than three or four members of the present house, he says, can be considered to be at all sure of re-election. It will be remembered that the present socialist party consists of three members.

"Mr. Hawthornthwaite arrived this morning from the upper country. The statistics of his trip show that he has visited 25 points, and delivered 30 speeches. In between the speeches, Mr. Hawthornthwaite took observations of the industrial aspect of things. British Columbia, he told The World, was in the midst of one of the greatest capitalistic booms in the history of the continent—which is the socialist way of spelling development and prosperity."

It is fortunate for the people of B. C. that they have Mr. Hawthornthwaite to tell them things. Otherwise they might imagine that the conservative and liberal leaders in the province were exerting at least some influence on the direction of public affairs.

EDITORIAL NOTES.

The coast papers are drawing attention to the fact that Magistrate Williams gave a rather unusual decision in the case against Capt. Griffin, of the steamer Princess Victoria, who appeared before him last week on a charge of manslaughter in connection with the wreck of the Chehalis. Capt. Griffin was committed by the magistrate for trial, but he was committed under a special section of the code the effect of which is to make a speedy trial impossible. In other words, Capt. Griffin, if he is tried at all, will have to be tried by a jury whether he wants to or not. Under ordinary committals—the procedure followed in most cases before the magistrate—the latter simply orders that the accused shall appear before the next court of competent jurisdiction. The prisoner is committed to jail. The magistrate cannot grant bail, but the accused person must come before the judge of the higher court and ask for a speedy or a jury trial. If he elects for the latter, he can then apply for bail, to be allowed at the discretion of the judge. In this case Captain Griffin is bound over to appear when indicted, and there is apparently no legal machinery to give him a speedy trial now in case he should wish to have one. The practical effect of Magistrate Williams' judgment is that if the attorney-general sees fit to prefer an indictment against Captain Griffin, then he is bound by sureties to appear and answer that indictment. In effect he says: "I find no fault with this man, but the attorney-general must settle the matter."

At the solicitation of certain friends of moral reform, and under instructions from the police commission, Vancouver is to have a thorough cleaning out of her restricted district. The broom is to sweep close, and the vice that has hitherto raised its head in a shunned section of the city where it is found amongst congenial surroundings and where the pure seldom or never go, must henceforth creep abroad, under disguise, and find new hiding places in the residential districts. There are a number of people, it seems, who take a morbid delight in "dealing" with this so-called "problem," They take advantage of every opportunity to discuss it, and keep it constantly before the public mind. It is just possible as much harm is done by the publicity given the evil as by the evil itself under normal conditions, and certain it is, at any rate, that more harm can be done the impressionable youth of the city by scattered and disguised "retreats" than can befall them when, in order to be contaminated at all, they have to brave the passage of well marked public streets to haunts of shame kept constantly under close police surveillance.

B. C. FOR WHITE WORKERS.

Editor the Daily News,—I have just come in from the hills and, of course, the first newspaper that caught my eye on the hotel desk was the Nelson Daily News. You cannot get away from "The Daily News" anywhere in the Kootenays. Being interested in the fruit industry I naturally looked for that section of the news first and must confess that I was very much disappointed to see that some of the members of the K. F. G. A. should be advocating the free and unlimited immigration of Asiatics. I consider such ideas to be very unpatriotic, un-Canadian and suicidal of the interests of the white race of B. C.

Who is it that has made it possible for those same fruit growers to come here and enjoy the benefits of this glorious country? And who are the people that are creating such a demand for our fruits Is it the Asiatic? Come, Mr. Chinese lover, answer that question. When I look around and see all the splendid Canadian children attending our schools throughout the Kootenays—and it is the same all over B. C.—the great problem to me is how are we going to keep them in B. C. for we certainly need them to help keep up our schools, churches, post offices and a white man's civilization.

I think we should be a little more farsighted, a little more patriotic in dealing with such problems. The negro problem of the South and the Chinaman in the Transvaal should make us hesitate.

The lumber industry is suffering through the scarcity of labor, more so than the fruit industry, and will suffer very likely until this abnormal railway construction work is somewhat lessened which, with the armies of men now employed, will not take so very long. I venture to make the assertion that, at the present rate of European immigration, in a few years instead of a scarcity of labor we shall be fairly swamped with laborers looking for work.

Our fruit ranches are not very large as yet and by the time they do reach to large dimensions labor will be pouring into this province faster than we can absorb it; and, besides all these arguments, we must not forget our duty to the rising generation nor to the white race.

Mr. Foster is perfectly right when he says that this country can produce berry pickers as well as berries and voters as well as apples.

DIRECTORS WERE CARELESS

Kept no Tab on Financial Operations of Stensland

Chicago, Aug. 11—The discovery yesterday of new trails of crookedness running through the Milwaukee avenue state bank led the state attorney to summon peremptorily last night the principal directors in the affairs of the institution. They were called upon to explain conditions which indicate that another line of robberies was being carried on independently of the gigantic swindle already disclosed. The directors who responded to the summons were Frank R. Crane and A. Marius Kirby. An officer was sent for M. A. Labury, another director, but he could not be located. Director Crane was subjected to a hot examination by assistant state attorney Olsen in the presence of inspector Shippy and assistant chief of police Schumeler. He denied all knowledge of the forgeries perpetrated by Stensland.

"Did you ever attend a meeting of the executive board?" asked Mr. Olsen of Crane.

"No, sir, I never did," replied the director.

"Did you ever know the executive committee to meet?"

"It has never met so far as I know," admitted Crane.

"Did you ever pass on loans or do anything else to further the interests of the bank?" pursued the prosecutor.

"No, sir," said Crane.

The director was shown a note for $4000, dated April 4 last and asked if the signature was genuine. He replied that it was. He had borrowed a total of $25,000 from the bank, this $4000 note being the last transaction of a series. He is indebted to the bank for the whole amount at present. The security which Crane gave the bank for this $25,000 in loans consisted of 40 shares of Northwestern Street railway stock worth $2400. He was asked if as a director of the bank, he did not consider that pretty slim security for a borrower to put up. He did not think so.

Director Marius Kirby was questioned on the same subjects. He was a member of the loan committee together with Stensland and his son. He was supposed to pass on the loans, but he admitted to the state attorney that he left the greater part of that responsibility to the president.

Among other papers examined last night was a check for $4000 which bore no signature except one made with a rubber stamp, no name being attached, the check in its place bearing only the address 203 Milwaukee avenue. This had been handed in by president Stensland, who obtained the amount of the check in cash through Herring.

BRAINS IN BUSINESS

A Greater Force Than the Genius of the Profession

We have heard of the artist's brain, of the salesman's brain, of the brain of a soldier. But what makes the world run smoother is the business man's brain. It is a pleasure to do business with a man who knows his business because he mixes brain in his business. Semi-ready tailoring was a stroke of genius, and the company has been particular to select for each Semi-ready wardrobe in Canada a man who knows the tailoring look. Importuning you to buy is bad form, not known in the Semi-ready shop.

OF INTEREST TO MINERS

DETERMINATION OF ROCKS.

Fragmental Rocks.—This series embraces all rocks formed of fragmentary materials, which have existed on or beneath the surface of the earth in another form and the accumulation and consolidation of which gives rise to new compounds.

Fragmental rocks are usually divided into four subdivisions viz: (1). Those formed by the action of the atmosphere, rains, winds, etc. (2). Those formed by the operation of moving water. (3). Those formed by the accumulation of fragmentary remains of once living plants and animals. (4). Those formed by volcanic action.

Sub-Division 1. Gravel and Sand Rocks.—The deposits in this subdivision are formed by disintegration and removal of rocks by the action of the atmosphere, rain, frost, etc. They are mere mechanical accumulations, and consequently vary greatly in composition, according to the source from which they were obtained. There are a great variety of rocks under this heading, the chief being as follows:

Cliff Debris.—This is ordinary angular rubbish, disengaged by frost, and atmospheric changes, from the cliffs and steep slopes of the mountains. Where this cliff debris falls upon and is carried along by glaciers it is called "moraine stuff." Occasionally very large masses of rock are transported by glaciers a great distance and there deposited; these masses are termed "erratic blocks."

Soil is also a product that comes under this heading; it is formed by the decomposition of rocks and the decay of plants and animals. Gravel and shingle, these are the names used for the coarser kinds of rounded waterworn detritus. Sand is the term applied when the detritus is finer. As a rule sand consists largely, often wholly, of quartz grains, whilst gravel and shingle vary greatly in composition. Conglomerate or pudding stone is a rock formed of consolidated gravel and shingle, the component pebbles being rounded and waterworn. They may consist of any kind of rock, though usually of some hard and durable sort such as quartz or quartzite. Breccia, is in many respects similar to conglomerate, the chief differences being that the gravel and shingle in it are angular instead of being rounded, and it commonly shows less trace of stratification than conglomerate. Sandstone is a rock composed of consolidated sand; as in modern sand, the grains in sandstone are chiefly composed of quartz. The difference in color is due to the matter which cements the different particles together, and is not due to the color of the quartz, which is nearly always white. A piece of fine grained sandstone when examined under the microscope looks like a coarse conglomerate, so the difference between the two rocks is little more than one of relative size of particles. Among the varieties of sandstone the following may be mentioned: *Flagstone*, a thin bedded sandstone, which may be split along the lines of stratification in thin flags; micaceous sandstone, a rock so full of mica flakes that it splits readily into thin plates each of which has a lustrous surface from the quantity of silvery mica. Free stone, a sand stone which can be cut into blocks in any direction without a marked tendency to split in any one plane more than in another. *Buhrstone*, a highly siliceous, exceedingly compact though cellular rock. On account of the hardness and roughness of this rock, it forms excellent material for the grindstones in flour mills.

Grey wacke is a compact aggregate of rounded and angular grains of quartz, felspar, slate and other mineral rocks cemented together by a paste which is usually siliceous. Gray, as its name denotes, is its prevailing color, but it passes into a brown, purplish-brown and sometimes black. It is distinguished from ordinary sandstone by its darker color, its hardness, and the variety of its component grains, and by the compactness of the cement in which the grains are imbedded.

Quartzite is an altered siliceous sandstone, but will not be treated for the present.

CORRESPONDENCE.

L. K., Greenwood, B. C.—You must have mis read the article you refer to. It distinctly states under crystalline rocks, that when brisk effervescence take place the sample will probably be limestone; whilst it is necessary to use hot acid to obtain the effervescence with dolomite; and where gypsum is suspected no effervescence is obtained either by hot or cold acids. If you will again try these tests you will no doubt be able to name your rock correctly.

G. A. W., Kaslo, B. C.—The mineral in your specimen is chalcocite or copper glance. When pure it carries about 80 per cent copper. It would be adadvisable to have it assayed for the latter metal, the fee for which will be $5.00 if not separated from any cobalt present. This mineral is the source of the supply of nickel from the New Caledonia nickel mines.

"Zero," Grand Forks, B. C.—There is a gold medal offered at the Nelson fair for the best exhibit from any individual prospect. This is no doubt what you mean. There is also a gold medal offered for the best district display. There are also four silver cups offered beside six prizes of $10 each for various displays of minerals. The secretary of the association will no doubt be pleased to give you further particulars.

B. G., Nelson, B. C.—Your No. 1 sample is a quartzite. No. 2 a schist ore rock. No. 3 is a quartzite with a little schist attached. No. 4 is calcite colored brown with iron.

M. A. C., Pilot Bay, B. C.—The material you send is soap stone. To be of any commercial value it should be a lot clearer than this specimen, and either a white or a light green tint. We know of no firms handling this product in the west.

S. S., Sandon, B. C.—Galena when pure carries 86.6 per cent lead, the balance being sulphur. It is however rarely found in its pure state.

F. C., Creston, B. C.—In the sample you submit there are two distinct minerals. One, the black glassy mineral, is biotite or black mica; the other, blackish with a greasy feel and reddish streak is specular hematite.

L. T.—It is impossible to say anything about the sample of carbonates you send us, as you give no particulars, not even stating the town or district they are from. Your sample will be kept one week so you can rectify this blunder if you care.

G. G., Phoenix, B. C.—Your rock belongs to the granitic family. It does not appear to carry any values.

G. P., Greenwood, B. C.—No. 1, steel galena, pyrrhotite and blende. No. 2, graphitic schist. No. 3, galena and blende with talc associated. No. 4, same as No. 2.

F. D., Erie, B. C.—Your rock is a variety of schist with a stringer of copper pyrites running through it. Assay it for copper and silver.

MAKE HAY WHILE THE SUN SHINES

There is a lesson in the work of the thrifty farmer. He knows that the bright sunshine may last but a day and he prepares for the showers which are so liable to follow. So it should be with every household. Dysentery, diarrhoea and cholera morbus may attack some member of the household without warning. Chamberlain's Colic, Cholera and Diarrhoea Remedy, which is the best known medicine for these diseases, should always be kept at hand, as immediate treatment is necessary and delay may prove fatal. For sale by all druggists and dealers.

Hot Weather HEADACHES

Tablets, powders, drugs, of any kind will NOT cure headaches. Simply because they never reach the CAUSE of the headache.

What causes headaches? Poisoned blood, always.

If the bowels are constipated—

If the kidneys are weak—

If the millions of pores of the skin are not active—

There are bound to be headaches.

Fruit-a-tives

OR "FRUIT LIVER TABLETS"

cure headaches because they cure the cause of headaches. They do not drug the nerves. They go to the root of the trouble, invigorate and strengthen the liver and increase the flow of bile into the bowels, which cure constipation. Act directly on the kidneys, heal all kidney irritation. Act on the skin, stimulate and open the pores.

With bowels, kidneys and skin all healthy and working in harmony, the blood is kept pure and rich and there can be no headaches.

FRUIT-A-TIVES are pure fruit juices—combined by a secret process with tonics and intestinal antiseptics.

50c. a box or 6 boxes for $2.50. Sent on receipt of price if your druggist does not handle them

TO WORKINGMEN

NOTICE

Whereas, at the Last Chance and Surprise mines, Chinese kitchen help is at present empoyled, to the exclusion of White labor.

Therefore, be it resolved that this organization, Sandon Miners' union No. 81 of the W. F. of M. reaffirming its opposition to the employment of Orientals within its jurisdiction, strongly condemns the position taken by the management of the properties in question, and counsels workingmen everywhere and those favorably disposed toward organized labor to be governed by this action.

J. S. CARTER D.P.A., Nelson. W. P. F. CUMMINGS, Gen. Agt., Winnipeg

Synopsis of Regulations Governing the Disposal of Dominion Lands Within the Railway Belt in the Province of British Columbia.

A license to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths, excepting those situated west of Yale, for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:

Sawn lumber, 50 cents per thousand feet B. M.

Railway ties, 8 and 9 feet long, 1 1-2 and 1 3-4 cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent, on the sales.

A license is issued so soon as a berth is granted, but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B.M., for square timber and sawlogs of any wood except oak; from 1-2 to 1 1-2 cents per lineal foot for building logs; from 12 1-2 to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties, and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of 21 years at a rental of 5 cents per acre per annum.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for homestead purposes may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the minister of the interior at Ottawa, the commissioner of immigration at Winnipeg, or the local agent for the district within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

It is the practice of the department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property, with buildings for their accommodation, will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of th Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the Act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY, Deputy of the Minister of the Interior.

Carnefac Stock Food IS THE BEST

NEW YORK FASHION LETTER

New York, Aug. 11—There is no rest for *the mothers*; all the year her babies—the big ones and the little ones in her arms—are on her mind, and her hands are ever busy for them. In June it was the graduation and *school festival dresses*, then the vacation clothes, and now, perhaps, after a short breathing spell, the whole family must get ready for school again.

Of course, for the first few weeks the summer clothes will come into play and, indeed, many mothers let their children wear the heavier weight wash gowns all the year round, in winter depending upon the underclothing for the extra warmth needed and heavy coats for outdoor wear. For sanitary reasons where children are in big schools and must mingle with all kinds of companions, the idea is a good one, and the usual simplicity of such dresses is best suited to the age. For these dresses nothing is equal to linens, which, if well shrunken in the beginning will do long service because of their durability. If white is objected to because of its color being so easily soiled, buy the blues, pinks, tans, etc. But great care must be used in the washing.

Nearly all suits for children are made with guimpes or the bodice frocks, decorated with machine stitching and a strong leather belt, red and brown being the most favored colors for the latter. Another material that is much liked for children's dresses is the Anderson Gingham, which comes in all kinds of pretty designs and those in plaids are almost like silks, but as these are rather expensive for some purses, there are other Ginghams which, will give *much satisfaction as to style and* wear. For later on in the autumn some of the cotton cheviots would be very useful as they wash well, are light, inexpensive, making up well, and yet have the effect of all wool dresses, those in the grays, or tan plaids or mixtures being particularly stylish.

The empire shapes are most prominent and this applies to coats as well as to dresses, the waist being indicated by a band of mousseline de soie or a soft ribbon knotted in the back; but some of the old favorites such as the Gretchen and Russian sacque, fastening on the left side, are still in style. Then for the older girls the princess and corselet dresses belong to them no less than to their older sisters. In coats reefers are the favorites for little children, both girls and boys, and baby's wraps of the long and short variety are most fashionable when made of linen pique trimmed with frills of embroidery.

For the boy who has just emerged from the "kilty, skirty things" into grown up kind of clothes, for morning wear there are knickerbockers of *serge, flannel or cotton* cheviot, worn in combination with blouses of wash material. For the smaller boy the blouse may have wide collar and cuffs, edged *with frills of embroidery; but* if you wish to endear yourself to him, relieve him of all such furbelows which, with curls, he now believes belong to the *girls only.*

Boys still in frocks wear knickerbockers under the frocks instead of petticoats, the latter being worn only by baby boys *still in yoke dresses.* For playtime dresses which will not show wear or tear, nothing is more to the point than the one piece dress of heavy chambray or brown Holland in dark shades. Thus dressed the little man may play all day and never worry a moment over his suit and his older brother may have a little pajama-like suit for the like occupation.

Even in the warmest weather a coat made in some kind of light weight goods must be provided for the girls for the first cool days. A coat of tan cheviot is shaped with semi-fitting back and a box front closing made with buttons and button holes. Braid trims the fancy collar and cuffs. The sleeves are full at the top and are in long length. Strappings of braid are applied on the coat at the back, but this may be omitted if a plainer effect is desired, and a pocket is supplied on the left side. A pretty development contrive effects in red cashmere with linings of silk or of nearsilk, if the first is considered too expensive for such purpose as a school coat.

A dainty little dress for school wear was constructed from red challis scattered over with tiny sprays of green fern, and decorated with narrow edging of gallon in a darker shade of red. In this instance the low round neck was chosen and short puff sleeves, inside of which was worn a white linen guimpe. The waist is allowed to blouse all round, and the straight gathered skirt is finished by a sash of soft crushed ribbon tied in a full short bow at the back.

For the littlest girl there is a French model *that is very attractive, which* lends itself to the plainer materials because of its decorative mode of construction. A mercerized plaid Gingham was employed, and short puff sleeves and low neck was chosen. The straight gathered skirt was completed with a heading of beading and through this a black velvet ribbon was run, tying in the back with a bow. The short sleeves and neck were finished in the same manner. The guimpe was made of alternate rows of tucked handkerchief linen and lace insertion. This dress would be pretty made up in any of the beautiful flouncings that are so popular just now. For frocks of this sort light weight fabrics including veilings, cashmere, Gingham, linen, madras and pongee are suitable.

A pretty box plait mode is offered for girls from four to twelve years of age. The material was of dark blue cashmere, showing trimmings of lace medallions on *the pointed bertha and a guimpe* of lawn to be worn inside. The body and skirt are cut in one, and a double inverted pleat at the under arm seam allows for extra fullness in the skirt. *For a less dressy effect* the long bishop sleeve may be employed and the yoke be of the same material as the dress material and a narrow silk braid either plain or fancy may *trim* the bertha and outline the yoke.

There has never been a season when linen has been such a fad and a fashion as at the present writing. And as the linens have taken the place of lawns and muslins they may be used for dressy wear even during the winter. The newest model seen lately was made of Irish linen embroidered in red linen thread. Another model was made of a heavier quality embroidered in dark blue silk, with a blue linen belt and bands of the same on the skirt and waist.

Mercerized Gingham in a stylish plaid *effect was chosen for a little girl's dress.* The pattern is cut with a full blouse, tucked to graduated yoke depth across the front and blousing at the French waist *line. The back, where the closing is formed* is tucked in the same manner as the front. The sleeves are short puffs, shirred to form a ruffle effect at the bottom and trimmed with frills of embroidery. The bertha which gives such a particularly stylish appearance to the frock, is the very latest fashion idea. It is made of white linen and edged with embroidery and an embroidery medallion in front and is adorned with three buttons on each side and the full skirt is plainly finished with a deep hem. It is sewed on to the waist, around which a short sash is worn.

Brilliant lustrous silks will be very popular this coming season.

Great quantities of white materials will be worn all winter, either as dresses, aprons for little girls' dresses or guimpes.

Japanese silks are being worn a great deal.

Wash silks are coming into favor more than ever.

Wash suits in challis of white or part white will be extensively used this fall and into the winter.

Plaids are still quite popular.

FIRED AT GRAND DUKE

RUSSIAN SOLDIERS TRIED TO MURDER LEADER IN SHAM FIGHT

BULLETS WHISTLED OVER HEADS OF DUKE AND HIS STAFF

St. Petersburg, Aug. 11 — Grand duke Nicholas Nicholeavitch, president of the council of national defense, narrowly escaped assassination yesterday afternoon at the hands of the imperial guards in the guard camp at Krasnoyo-Selo. The grand duke was personally reviewing, manouevering and putting troops through blank firing practice when he suddenly was startled by the hiss of bullets about his head. Fortunately neither he himself nor his horse was touched. A command to cease firing was immediately given and the soldiers of the regiment from which the bullets came were marched back to their quarters and an investigation was begun in the hope of ascertaining which of the soldiers fired ball cartridges. It was learned that the troops were in extended order and engaged in manoeuvres when the accident occurred. The grand duke, surrounded by officers and aides-de-camp, was off on one side, out of the line of fire.

Several arrests are understood to have been made. One of the grand duke's aides who, however, was not present, advanced to the Associated Press the theory that possibly the bullets were fired by accident, but he considered that beyond a doubt there was a cold blooded plot on the part of a number of the guardsmen, who deliberately planned to take the life of the grand duke, under cover of the general blank cartridge firing. The aide-de-camp added: "It was no more an accident than was the firing of the famous charge of grape at the Winter palace on the occasion of the ceremony of the blessing of the waters of the Neva, a year and a half ago."

The bold attempt on the grand duke's life caused an immediate change in the plans of the emperor, who had arranged to go to Krasnoyo-Selo today. The affair has created a deep impression in military circles and is the topic of conversation in the clubs, but the attempt on the grand duke's life is not generally known here, no word on the subject having been published in the newspapers.

St. Petersburg, Aug. 11—After the preliminary investigation the military and naval prosecutors have decided to try by courtmartial no fewer than 2000 soldiers and sailors who participated in the Cronstadt and Sveaborg mutinies. The prospects, however have been brightened by the decision of the emperor to appoint two extraordinary commissions to investigate the causes of these outbreaks and determine the responsibility for the demoralization. War minister Rudiger and minister of marine Bierieff are said to be arriving at the same conclusion as admiral Skrydloff, the commander of the Black sea fleet, that officers are more to blame than the members. The commission will inquire into international conditions prevailing in the navy and army, and it may result in a very heavy shakeup, including the wholesale cashiering and retirement of commissioned officers.

Mitau, Corland, Russia, Aug. 11—A court martial here yesterday sentenced to death two terrorists, who were found guilty of several mrders in the district of Mitau.

Moscow, Aug. 11—The police have discovered in a neighboring village a secret printing establishment of the revolutionary league, where the Viborg and Terkjoki manifestos to the army and navy have been printed. It is learned that among the members of the revolutionary committee recently arrested at Moscow was Mme. Efrenoff, who is said to have been the chief of the central organization of the social revolutionists and peasant league of Moscow. Fifty workmen agitators were expelled yesterday from Moscow.

St. Petersburg, Aug. 11—Another indication of the determination of the administration to participate vigorously in the electoral campaign is furnished by an order of the minister of the interior to the police throughout the empire to make reports as speedily as possible on all political parties in their districts, their membership, activity and press organs.

St. Petersburg, Aug. 11—Revelations made in an open letter by count Hayden, prince Ivoff and M. Shipoff, regarding the cause of the break in the negotiations looking to their entering the cabinet, place premier Stolypin in a rather bad light. The letters show that the government utterly refused to grant any substantial concessions, and only tried to give the deal the appearance of liberty, by taking in two public men. Prince Nicholas Lvoff, in his letter, said it was absurd to ask them to become mere government clerks. None of the liberal papers have been allowed to resume publication. The Novoe Vremya, which often reflects the sentiments of the upper circles, displays a constantly stronger tone in favor of a rigorous suppression of revolutionary movements.

Today it was learned that every member of the outlawed parliament, who signed the Viborg manifesto, must be prosecuted. The censorship continues to forbid the publication of all foreign criticisms of the government's course.

STOCKS FOR THE WEEK

RISE IN RAMBLER-CARIBOO WAS THE FEATURE

MARKED FIRMNESS SHOWN IN ALL B. C. HOLDINGS

(Reported by B. S. Mighton & Co.)

During the week just elapsed much firmness was shown in the stock market, and at the latter part of this period an upward tendency became apparent in the most prominent securities, but a dullness prevailed throughout, though not to a greater extent than might be expected during the holidays. A return to activity can confidentally be expected when the holiday season has terminated, and in the meantime, many inquiries were made in certain stocks by those who take advantage of summer prices.

International Coal fell off somewhat during the early part of the week, but recovered its usual firmness, and business became brisk, the price in consequence rising considerably.

Rambler-Cariboo opened firm, then declined several points, and during the last two days advanced over seven cents per share, with the top price not yet in sight. This advance was the feature of the week, and dispelled to a great extent the somewhat quiet market.

Of the coal stocks, Breckenridge & Lund Coal and Nicola Coal advanced a few points, while Diamond Vale weakened a little. There are rumors afloat which will affect the price of other coal stocks, which were traded in some time ago, but which for some time have remained inactive.

North Star and Sullivan advanced somewhat and were held very firm. Pathfinder remained unchanged with a number of shares changing hands.

Referendum and Forty Nine Creek Receipts were in demand, with but few shares offering. La Plata exhibited firmness, with a number of inquiries for this stock. B.C. Standard remains inactive with no business offered.

Folowing are the approximate quotations for the week ending yesterday:

	Asked	Bid
American Boy	$ 1½	$ ½
B. C. Standard	.20	.15
Belcher	.50	.46
Breckenridge-Lund Coal	.75	.60
California	3½	2½
Canadian Goldfields	7½	7
Dominion Copper	3.75	3.25
Diamond Vale Coal	.21	.20
Forty-Nine Creek Receipts	6	4½
Granby	18.50	12.00
Giant	2	1
Homestake Extension	7	5
International Coal	.67	.65
Jumbo	.21	.19
La Plata	.20	.18
Novelty	2	1
North Star	8½	7½
Pathfinder	b	4
Rambler-Cariboo	.27½	.25
Sullivan	3½	2¾
Western Oil	.15	.13

SUMMER DIARRHOEA IN CHILDREN

During the hot weather of the summer months the first unnatural looseness of a child's bowels should have immediate attention, so as to check the disease before it becomes serious. All that is necessary is a few doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy followed by a dose of castor oil to cleanse the system. Rev. M. O. Stockland, pastor of the first M.E. church, Little Falls, Minn., writes: "We have used Chamberlain's Colic, Cholera and Diarrhoea Remedy for several years and find it a very valuable remedy especially for summer disorders in children. For sale by all druggists and dealers.

NELSON'S NEWS OF THE DAY

J. Labarthe, superintendent of the Trail smelter, is at the Strathcona.

Miss McBain will sing Torrington's "Abide With Me," at the Presbyterian church this evening.

The regular Sunday afternoon concert by the city band will be given in Tramway park this afternoon from 3 to 5.

It is the correct thing now to wear a 20,000 club button. They can be obtained by members from the club secretary.

Mrs. Thurman will sing as a solo a selection from Mendelsohn's "Elijah"—"Oh, Rest in the Lord"—this evening in the Methodist church.

Mr. Curtis continues his violin solos with piano accompaniment at the Strathcona every evening during the dinner hour. As announced in his advertisement in this issue, Mr. Curtis is prepared to give lessons on violin playing.

According to the advance man Richards and Pringle's famous Georgia Minstrels, who come to the Sherman opera house on Tuesday, have arranged a program in the neatest and most attractive manner to suit the ladies and the little ones. The matinees given by this organization are special features and are largely patronized, as the reputation of this company for giving a performance free from all objectionable features has long been established. There will be plenty of beautiful scenery, handsome costumes and lots of music and a big lot of fun.

J. E. Taylor, chairman of the 20,000 club's entertainment committee, said last night that the dance at the tramway park last Thursday proving such an excellent success, the club would make a special effort again this week to attract another large crowd. The committe has decided to offer prizes for the best pair of two-step dancers on Thursday evening next and in addition to the list of ladies who acted as patronesses last week permission has been given to add the following for this week's dance: Mrs. J. M. Lay, Mrs. R. N. Riblet, Mrs. W. A. Macdonald and Mrs. S. M. Brydges. Further particulars concerning the program for Thursday evening will be announced further on in the week.

A. P. Low, director of the dominion geological survey department, and W. R. Brock, who have been spending the past two days in the Lardeau-Slocan country, returned to the city last evening and will go over to the Boundary country this week. They are guests at the Hume.

An extraordinary general meeting of the shareholders of the Northwest Coal and Coke company is called for Monday, Aug. 27 at the company's office in the Aberdeen block, when the deal made by J. L. Stamford for the disposal of the company's assets will be submitted for approval. The deal includes the transfer of the entire property for cash and stock in a new concern. The stock is held by residents of Nelson principally and the property is near Cowley, Alberta.

Whether the city council will be called together early this week and special steps taken to regulate the water supply for lawns and gardens, depends upon the state of the city reservoir tomorrow morning. It is hoped that by tomorrow the reservoir will have filled up again, but if not, action will be taken in compliance with the water bylaw to enforce the using of a limited supply of water for garden purposes during stated hours. If this is not found to result in keeping the necessary reserve on hand for fire purposes, still further limitations will be imposed. In any case citizens will do well to bear in mind that water can not safely be wasted for the balance of the summer.

SHERBROOKE—E. Murphy, H. T. Johnson, C. Morris, Bonnington; G. Gautier, Slocan; W. Smith, Arrowhead; J. Bartel, Vancouver; E. J. Richardson, Sirdar; R. Evenson, Rossland.
