THE DAILY NEWS

VOL. 5 — NELSON, B. C., SUNDAY, AUGUST 5, 1906 — NO. 90

THE WEEK IN MINING

Le Roi No. 2 Company Has Obtained Control of the Vancouver.

Excellent Showing of Mining Company for Year--Good Reports Continue from One Lardeau District.

The past week has ben an unusually active one in mining circles all over the district and the chief incidents are only referred to briefly in this summary.

Yesterday a transaction was closed here through Paul S. Couldrey, manager of the Le Roi No. 2 mine at Rossland, whereby the Le Roi No. 2 company, which has been making handsome profits this year, has obtained control of the Vancouver, a well known shipping silver-lead property in the Slocan. The ore is not wanted for fluxing but the company desires to branch out. It is understood that the deal includes the surrendering of the lease held by M. S. Davys. The new owners will actively develop the Vancouver and increase the force at work.

The excellent financial showing made at the annual meeting of the Second Relief Mining company, held here yesterday is a matter of congratulation. The details of the year's work and the receipts will be found appended.

While no definite news is forthcoming regarding the reported rich find at the Silver King, the officials admit that unusually rich ore has been encountered in satisfactory quantities.

The reports from the Lardeau of further rich discoveries continue to come in and some of the specimens brought to this city have caused a sensation.

The details of the first smelter returns from the Summit property, the bonding of the Nevada, Columbia and the Edward D. in the Sheep creek section, all make very pleasant reading to mining men.

At Rossland a satisfactory strike is reported on the well known White Bear, and a shipment of 60 tons from that property will appear in next weeks' output as well as 1200 tons milled at the Le Roi No. 2, both of which items arrived here too late to be inserted in today's statement.

Over in the Boundary it will be noted that the Snowshoe appears in the shipping list for the first time in two and a half years.

The output of the several mines and the receipts at the various smelters for the past week and year to date, in detail are appended:

BOUNDARY SHIPMENTS

Mine	Week	Year
Granby	15,649	501,212
Emma	481	10,456

The total receipts reported from local and foreign mines for the past week were 27,992 tons, and for the year to date, 964,729 tons.

NIAGARA MILKS COWS

POWER OF THE GREAT FALLS DRAWS LACTEAL FLUID

ONE BOY CAN HANDLE 32 BOVINES IN FIVE MINUTES

Rochester, Aug. 4.—Charles Francis, a farmer near Medina, is using a patent cow milker, operated by electricity transmitted from a power plant five miles away.

The Ontario company has completed a power cable from Niagara Falls to Syracuse, 150 miles away, and by its charter must furnish current along the route. Farmers, particularly dairymen, are making great plans for using the current for all kinds of farm work. That Niagara Falls will be milking the cows between the falls and Syracuse is no idle dream.

Farmer Francis is an ardent advocate of the electric cow-milker, for a boy of 15 milks his 32 cows in less than five minutes, even the irascible kickers. Mere manual labor would for this same work require four men two hours, not counting the kicking cows, the flies, the switching tails and other drawbacks.

SEVENTY THOUSAND OUT

NUMERICALLY RUSSIA'S STIRKE IS A SUCCESS.

BUT THE MEN HAVE COMMENCED THE FIGHT HALF-HEARTEDLY

St. Petersburg, Aug. 4.—With a general strike formally declared and the country apparently on the threshold of a gigantic struggle, minor issues fade into the background. If the strike inaugurated today gathers sufficient headway to endanger the life of the state it has virtually been decided that grand duke Nicholas Nichlaevitch will be named commander of all the troops in the empire, "where martial law exists," which will be tantamount to the decreeing of a military dictatorship. It is possible, however, that the government will not be driven to this extremity as the showing made today by the St. Petersburg proletariat was not impressive. Although nearly 70,000 workmen were reported to be out at nightfall, many of the men appear to be entering the struggle with heavy hearts. The spontaniety with which practically the entire nation arrayed itself against the old regime last fall is lacking; the endurance of the people has been exhausted by the long strain, the sympathy of the more conservative liberals has been alienated by fear of a revolution and the lower elements of the population have been organized into what is known as "Black Hundreds" and are ready to enter the fight on the side of the government if the signal is given. Dissensions also are rife among the leaders over the opportunities of giving battle to the government. Moscow and St. Petersburg are expected to decide the issue. The railroad workers upon whom the initial strike depends have not yet formally ordered a strike. On the ulterior object of the proletariat leaders which at present is marked must depend the attitude of the troops. If the military supports of the government stand up as they did at Sveaborg and Cronstadt, the leaders acknowledge that the game is lost, but even so, they declare that defeat if it forces the disaffected portion of the army to show its colors will only prepare the way for final victory.

RICH RETURNS.

High Figure For First Shipment From the Summit Mine.

James Miller and F. E. Collins, who some time ago obtained a working bond on the Summit property on Coon creek, two miles above the Queen mine and across from the Ore Hill, have just received the smelter returns of their first shipment of eight tons to the Trail smelter.

The figures are suprisingly good, netting the lucky bondholders nearly $300 a ton. The gross smelter returns being $2047.85. The values are principally in gold, with some silver and lead.

The second payment on the bond, not yet due, has been anticipated, and paid off.

Messrs. Miller and Collins have a force at work now crosscutting from the face of the tunnel to the second lead a distance of 60 feet.

The property was bonded from Godfrey Birtsch at a satisfactory figure and the owners are naturally delighted at the returns of the initial shipment.

BROKE WORLD'S RECORD

New York, Aug. 4—During an athletic meet here today C. Evry, N.Y.A.C., made a new world's record in the broad jump, clearing 11 feet 6 inches.

PENDRAY FINDING

Commissioner Peters Says World's Charges Were False

Adds, However, That the Paper is Not to Blame for Giving Them Publicity

Victoria, Aug. 4.—Following is the decision handed in to the lieutenant-governor in council by Fred Peters, K. C., who was commissioned to inquire into certain charges preferred against the lands and works department by the Vancouver World:

To His Honor James Dunsmuir, Lieutenant-Governor of the Province of British Columbia in Council:

Having by commission under the seal of the province and signed by your honor, dated the 14th day of July inst., been directed to hold an enquiry to ascertain the facts in connection with the proposed sale of government property at Laurel Point, Victoria harbor, known as lot 570 B, Victoria city, tenders for which were invited on September 22, 1905, and the truth or falsity of any allegations of misconduct in connection with the proposed sale upon the part of the chief commissioner of lands and works, or any official of the said department, I now respectfully report as follows:

1. That upon receipt of the said commission, and before entering upon its execution, I duly took the oath required by statute before the honorable Mr. justice Irving, a judge of the supreme court of British Columbia, and have since held a complete inquiry into the matters referred to me by said commission.

2. I find the facts relating to said proposed sale to be these: Mr. Pendray is the owner of certain property on Sehl's point, which he uses for his business and which adjoins lot 570 B and for obvious reasons was desirous of obtaining lot 570 B. In order to accomplish this purpose he opened negotiations to buy the lot with the Hon. Mr. Green in September, 1905. These negotiations were carried on partly by Mr. Pendray personally and partly by Mr. Brown, his agent.

The result was that Mr. Green signified his willingness to sell the lot by public competition, viz., either by tender, or by public auction, at the same time making a stipulation that the lot would not be put up for tender unless he, Pendray, was prepared to put in a substantial tender, and it was agreed that at least $2000 should be tendered (I find that this stipulation was wise and in the public interest). Mr. Green at the same time suggested that it might be better to sell the property by auction, as under the tender system a slightly higher tender might be put in, and Pendray thus lose the property, whereas at auction he would know just what he had to meet, and could act accordingly. The upshot of the matter was that the tender system was adopted, and on the 21st September, 1905, Mr. Percy Brown, agent for Pendray, put in a written tender for $2000, and put up a certified cheque for that amount. This tender was not sealed, but was open, the reason for this being that Mr. Brown wished to assure Mr. Green that Pendray was bona fide keeping his bargain as to the amount he would tender.

Under the circumstances, I cannot see that there was anything wrong in Mr. Green accepting the tender open.

Tenders were then called for, by notice dated the 22nd September, 1905. Under the terms of that notice, tenders were to be made by 12 o'clock noon of the 7th October, 1905.

On receipt of Mr. Pendray's tender Mr. Green locked it up in a private drawer in his office, apparently still open, not settled up, and the evidence satisfied me that it remained in that drawer until after 12 o'clock noon of the 7th October, 1905. It is clear that no official in the lands and works department other than Mr. Green himself, saw the Pendray tender, or knew the amount stated in it, until after 12 o'clock noon of the 7th October, 1905.

Shortly before 12 o'clock noon of the 7th of October, Mr. Harrison, proprietor of the Driard hotel, and a Mrs. Loggie, a stenographer, employed at the Driard, came to the lands and works department and put in a tender for Mrs. Loggie for $2100. This tender was sealed and enclosed with it was Mrs. Loggie's checque on the Canadian Bank of Commerce for $2100 duly certified. There were no other tenders.

At about 2 o'clock on the same day the tenders were opened in the presence of Mr. Green and then deputy W. S. Gore, when, of course, it was found that the tender of Mrs. Loggie was the higher.

I am of the opinion that if nothing had intervened, the tenders would in the ordinary course have been laid before the council, probably with Mr. Green's recommendation that the Loggie tender be accepted, but something did intervene. The board of trade, a day or so after the 7th October, sent a delegation to the government to point out that the lot in question should not be allowed to fall into private hands, for the reason that if a tall building were erected at the end of the point, it would intercept the view between vessels approaching each other from opposite sides of Sehl point, and cause a menace to navigation. To this argument the government acceded and both tenderers were informed in writing that the lot would not be sold and the reason for the refusal to sell was given.

The sale by tender having fallen through, negotiations to lease the property were entered into by Pendray with the department, which are not yet completed, they having been delayed by reason of negotiations with the government of Canada for the acquisition of the lot for lighthouse purposes. The proposed lease to Pendray was not produced. I understand, however, that it contains, or will contain, certain clauses allowing its cancellation on notice, this being necessary in order to allow the government of British Columbia a free hand in the negotiations with the government of Canada.

So far as the action of the department is concerned what I have already stated is a history of the whole transaction, and upon its face I can see nothing in the least wrong about it.

On the 16th May, 1906, an editorial appeared in the Daily World, a newspaper published in the city of Vancouver, of which D. W. Higgins is editor. This article was headed "Anderson and Anderson Again in Evidence," and will be found in the enclosed exhibits, marked exhibit 4. It contained cerain charges.

The first named article was followed by a second in the same newspaper, in the issue of the 23rd May, also to be found in the exhibits, repeating and adding to the charges already made. And a third article in the same newspaper, dated 26th May, renews the same charges, with added details, and they are repeated in a fourth article on the 5th June 1906.

The charges made in these articles may be formulated as follows:

1. That Mr. Green, or some person in the department, gave away the amount of the Pendray tender to Mrs. James Anderson, or some other person, before 12 o'clock on the 7th October, with the object of fleecing Pendray.

2. That Mr. Green agreed to lease the lot in question to Mr. Pendray at a nominal rent, under a threat from Pendray that unless the land was given to him he would expose the whole transaction.

3. That the tender put in by Mrs. Loggie was not really hers, but that her name was only used as a blind, and that the real tenderer was Anderson.

After carefully considering all the evidence adduced, and I have been careful to obtain every witness who could give any information, I am clearly of the opinion that none of the charges are true, and that the evidence given very clearly establishes their falsity, and with regard to the whole transaction nothing has been done by Mr. Green, or any official in the lands and works department in the slightest degree worthy of censure.

SECOND RELIEF PROFITS

EXCELLENT FINANCIAL SHOWING OF LOCAL COMPANY

MORE THAN PAID FOR PURCHASE PRICE IN A YEAR

The annual general meeting of the Second Relief Mining company was held at the head office of the company in this city yesterday afternoon.

President A. B. Cooper of Nelson, was enabled to present to the shareholders a remarkably satisfactory statement, the details of which are appended.

The property is situated 13 miles southwest of Erie and was purchased from Finch and Campbell of Spokane, a year ago last March. The present company was formed and active work commenced a year ago last April. It will be noted that the subscribed capital was $20,000 and that the net profits to June 30 last were $23,036.52. The receipts from bullion and concentrates amounted to $85,843.16, and the mine profit was $21,033.16. To the net mine profit must be added the net value of some 18 tons of concentrates at the mine, or about $7000.

The financial statement, which is an eminently satisfactory one, to June 30, 1906, is as follows.

PROFIT AND LOSS ACCOUNT

Cr.

Receipts bullion and concentrates	$85,843.16

Dr.

Mine operation and surface labor	$35,983.40
Mill operation, ore sorting, etc.	11,038.45
Tram, hauling, marketing, etc.	8,022.66
Maintenance	1,553.44
Management and general expenses	8,148.05
Nelson office expense	83.70
Mine profit for period	21,033.46
	$85,843.16
Mine profit, above	$21,033.46
Boarding house profit	1,859.48
Stores acct. profit	143.61
Total profit	$23,036.55

Plus the net value of about 18 tons of concentrates at the mine awaiting shipment, estimated at $7000.

The officers and directors of the company, who were all re-elected yesterday for the current year, are as follows:

President, A. B. Cooper, Nelson; vice-president, O. E. McElfresh, Osage City, Kansas; directors, J. E. Hyde, Redding, Kansas, and senator H. B. Miller, Osage City, Kansas.

THE SLOCAN MINERS

(Special to The Daily News)

Slocan, Aug. 4—Development work is in progress on the May, situated on Twelve-Mile.

"Billy" Lee, one of the lessees of the Tamarac, has just returned from a trip to the east. During Hr. Lee's absence only development work was done on the Tamarac. Now, however, several carloads of ore are in sight, and shipments will be resumed.

Mr. Briggs, one of the former owners of the lately sold Standard, passed through town on his way to Silverton this week.

Duncan Grant of Silverton is in town looking after his mining interests.

A party of Winnipegers have been for the past several days examining the timber limits of T. D. Woodcock on Robinson creek.

The Arlington hotel is being put in order for the ocupancy of Mrs. Mason of the Royal hotel, who has rented it.

C.P.R. MEN FIGHT FIRE

Woods Ablaze on Columbia and Western Near Cascade

Railway's Entire Force is Making Desperate Efforts to Save the Trestles—Farron Badly Scorched

Rossland, Aug. 4.—The woods in the section along the Columbia & Western railway between Cascade and the Bulldog tunnel are ablaze in places. At 12 o'clock today the flames reached Farron where they destroyed the station, the round house, the water tank and a large boarding house, inflicting a loss of about $5000. The employees of the railway at Farron made a strong fight against the flames, which, after destroying the buildings, passed on toward the Bulldog tunnel. The fires now extend along the road for about 20 miles and the entire available C. P. R. force from Cascade to Robson is engaged in an endeavor to save the trestles of which there are several which are high and long, on this portion of the road. There has been over a month of dry hot weather and once a fire is started in the forest it burns itself out as there is no stopping it.

(Special to The Daily News)

Grand Forks, Aug .4.—During the past couple of days the northern portion of the city has been threatened with fire from the fierce timber fires that have been raging. Yesterday ex-alderman M. R. Feeney's dwelling and other residences near the foot of Observation mountain would have been destroyed but for the prompt action of chief of the fire department A. E. Savage, who with volunteer firemen succeeded after several hours' work in driving the fire back. The damage so far done by the fire is confined to the destroying of some valuable timber.

A MUTINY AT HALIFAX

CANADIAN ARTILLERYMEN HAVE TO BE SUBDUED BY GUARD.

SIXTEEN OF THEM UNDER ARREST CHARGED WITH RIOTING.

Halifax, Aug. 4.—An incipient mutiny among the Royal Canadian Artillerymen broke out at the citadel Thursday evening, no less than 16 men being placed in the guard room under close confinement, as being the cause of the trouble. It appears that one of the garrison police entered a saloon on one of the upper streets for the purpose of arresting two membes of the artillery boat crew, who were in dishabille. One of the soldiers resented this and struck the arresting officer a severe blow on the face. After a scuffle, the offender ran to the barracks. The police called for assistance to arrest the soldiers. Several of the gunners on being warned for escort duty refused to act. Extra assistance was obtained and with the aid of an armed picket and guard the mutineers were placed in confinement. This caused further trouble and the rioting soldiers smashed windows in the guard room where they were in confinement and tried to escape. Two of them succeeded but were recaptured. Besides the mutineers, two senior noncommissioned officers were placed under arrest for drunkenness.

INSPECT PHOENIX PLANT

OFFICIALS OF DOMINION COPPER CO. LOOKING OVER SMELTER

FORCE AT THE SNOWSHOE MINE IS GREATLY INCREASED.

(Special to The Daily News)

Phoenix, B. C., Aug. 4.—A party of officials and friends of the Dominion Copper Co., Ltd., are in camp, on a trip of inspection of the mines and smelter of the company, arriving over the Great Northern. They include Warner Miller, president of the company, of New York; M. M. Johnson, consulting engineer and managing director of the company, of Salt Lake city; Arthur M. Wickwire, director, member of the law firm of Untermeyer & Marshall, New York; S. W. Trayler, engineer, head of the Trayler Engineering Co., New York; H. H. Melville, lawyer, Boston, and D. E. Woodbridge, M.E., of Duluth, with the United States Steel Corporation.

Accompanied by manager T. R. Drummond, the party yesterday visited the Brooklyn, Stemwinder, Rawhide and Idaho mines of the company, an excellent find of copper ore having recently been made in the lower working of the Brooklyn mine, running 2.3 per cent copper and $4 in bold with some silver. Today they will visit Greenwood and the company's smelter at Boundary Falls, where preparations are being made for the installation of a third furnace, the largest yet used in any smelter in Canada. The officials are pleased with the way things are going at the mines of the company and will spend several days in the Boundary.

The British Columbia Copper Co., Ltd., has received one of the three mammoth furnaces which it is installing at the smelting works, and it is now on its foundations. The other two will follow soon from Milwaukee, where they are being manufactured. J. E. McAllister, the manager, expects to have the first furnace blown in some time by the end of this month, and the entire plant in operating order in September. The improvements at smelter and mines will cost about $400,000.

The force at the Snowshoe mine, which was recently re-opened, has been increased to 20 or 25 men. The pumps are being kept steadily at work unwatering the shafts, and a couple of shipments of ore were made to the Trail smelter this week for sampling purposes. George S. Waterlow, of London, England, representing the old Snowshoe company, stated that the lease for the property to the Consolidated Mining & Smelting Co. of Canada, Ltd., is for two years, or when 125,000 tons of ore have been shipped from the mine, when a price will be agreed on if possible.

HE'S A MAN OF SENSE

MONTREAL BANKER SAYS BRITISH COLUMBIA IS "IT."

CALLS THIS PROVINCE THE RICHEST IN THE DOMINON.

Montreal, Aug. 4.—Mr. Walker, general manager of the Bank of Commerce, interviewed here, was asked:

"What are your bank's news from the western crop belt"

"For a week or two we had news of rust and other discouraging features, consequently we supposed that while the yield would fall off per acre, the increased area under seed would bring the total yield up to and probably a little beyond last year's figures. Now, however, we have news of a reassuring nature, and a considerable increase over 1905 is possibly in order."

"Are the newly constituted provinces of Alberta and Saskatchewan spending much money."

"I do not think so. In fact, they have little to spend. They are, however, building some bridges, and will also have to have legislative buildings at Regina and Edmonton."

Mr. Walker declared that the press of Canada should realize how much greater are the wants of British Columbia than the provinces of the plains. The Pacific province, he said, is an entire empire in itself, and to develop its resources a great deal of money has to be spent.

"Legislators," concluded the general manager, "should not be parsimonious when money is required for British Columbia, which will become the revenue producing province, par excellence, of the dominion."

MRS. SAGE STAGGERED

FINDS SHE HAS HOST OF FRIENDS WHO NEED MONEY.

BEGGING LETTERS POUR IN ON HER BY THE THOUSAND

New York, Aug. 4—Two circumstances serve to distress Mrs. Russell Sage at her summer home, Lawrence, L. I.—first, the purely speculative guesses that she contemplated giving the entire estate to charitable institutions, and, second, the flood of begging letters that pour upon her.

The appeals for aid are based on the assumption that she intends to give away a large part of the legacy during her lifetime and make a disposition of what is left when she executes another will revoking the instrument already in existence.

The majority of these begging letters suggest that whatever Mrs. Sage has to bestow should be bestowed now rather than on her death, and many ingenious arguments are presented to show that to be the wiser plan and the less likely to cause annoyance through litigation. Every imaginable plea is made, from the founding and endowment of institutions of every kind.

NOTES FROM FERNIE

Work Commenced on New Wagon Road to Michel

(Special to The Daily News)

Fernie, Aug. 4—Work has at last been commenced on the much needed wagon road to Michel. The work is in charge of foreman McNeish and will be continued as far as Hosmer at the present, where the development of the C.P.R. coal mines has built up a thriving town. Engineers have not yet decided on the best route for the road between the latter town and Michel but a report is expected soon, and will be acted on promptly.

George Gagne, an employee of the Fernie Lumber company had the misfortune to break his arm while at work at the edging machine at the mill.

Housekeepers are complaining bitterly of the dusty condition of the streets, which, on a windy day makes life unbearable. Street sprinklers are an absolute necessity and until they are provided the members of the city council will have no peace.

The improvements to the public school grounds have been completed and present a very neat appearance.

The driving of the new tunnel in No. 9 mine, Coal Creek, which has just been completed, was a very accurate engineering feat. Working from both ends, it came out to an inch.

The output of coal from the mines of the C.N.P.C. company for the week ending Friday, Aug. 3, was as follows: Coal Creek, 12,942.11 tons; Michel, 8,013.04 tons; total, 20,955.15 tons.

THE LABOR SITUATION

D. W. Bole, M.P., Discusses Question Raised by Fruitmen

Says Canada Needs 10,000 Pick and Shovel Men Right Away—Has Faith in Nelson's Future

D. W. Bole, liberal M. P. for Winnipeg, who has been visiting here for the past three days, leaves for home this morning over the Crow line.

"I have had one of the most pleasant outings I ever experienced," said Winnipeg's M. P. last night. "I spent the whole afternoon in a launch on the lake, and visited several of the nearby fruit ranches. I am delighted with what I have seen and heard about your city and district. Now that you are no longer solely dependent upon mining here, but have the fruit and lumber industries to back you up, I thoroughly believe Nelson has a progressive future before it. I was a little disconcerted by the ups and downs of mining but since my visit here last year your city has taken on a new lease of life. I always admired the situation, it is not equalled in the interior of British Columbia, and is one of the most charming on the continent, but I was a little doubtful about the business aspect. What I have seen and learned yesterday and today has quite settled my opinion and on my return home I will take pains to tell the Winnipeg people, through the press what I think of your charming city's future.

"About the fruit industry? Well, there are two important features that should not be lost sight of. Your fruit must make a name for itself at the start and it can command the best of prices. What is needed is close inspection and grading. If the fruit is not carefully and honestly packed you will find it hard to make people believe it is the real article. It is hard to make a name and very easy to lose it. You can only maintain a high grade name by careful inspection of everything that is sent out. One slovenly, dishonest shipper can give the whole district a black eye.

"The labor situation is a serious one. I have not studied the question closely enough to speak fully, but your fruit men must have plenty of cheap labor if they are to thrive. In the east, as you know berry picking is done by boys and women at odd times. You lack both out here and I do not see where you are going to get the necessary help. The question is a big one at the present moment in the west. I estimate that for railroad construction, harvesting and other such work, we have use for an army of 180,000 men. Where are we going to get them? The man with money in his pocket who wants to farm won't do the wanted work. We want an army of pick and shovel men, and we want them very badly. I think we are making a mistake only to reach out for settlers. We want them, of course, but we want, and we very badly want the man who is able and willing to do the pick and shovel work.

"The whole problem is a very pressing one and one that gets more serious every day. Something must be done if the country is to be built up.

"I have no solution to offer at the moment, but wherever he is to be got the pick and shovel man must come here in large numbers.

"I have enjoyed my visit here this time exceedingly and will give a very glowing account of my experiene upon my return, but that will be the case because I have been deeply impressed with the improved situation here."

WHITE HALL A PLAGUE SHIP

Crew All Sick—Decks Covered With Dirt and Flies.

New Orleans, Aug. 4.—The steamer White Hall, from Colon, was today declared a menace to all ports and orders were given by the state board of health to hold her indefinitely at the Mississippi river quarantine station. The White Hall has one of the worst fever epidemics on shipboard in the records of shipping, having arrived here two days ago with most of her crew ill with Chagres fever. With the death today of the steamer's second officer, three of her complement of 21 men have already died and 16 others are in the hospital. Quarantine officials say that when the White Hall entered the Mississippi river with scarcely enough well men to run her, so great was the amount of dirt and swarms of flies on her decks, that the nerves of experienced physicians were shaken as they boarded her. The steamer will not be permitted to come to New Orleans even after the fever is cured.

MOTHER MUST BE EXECUTED

Berlin, Aug. 4—A woman of the name of Bloemers recently gave birth to a son in prison, where she is awaiting execution for complicity in the murder of a military officer at Gladbach. The courts having considered whether this affected the sentence decided that the judgment must be carried out, but decreed that a nurse be furnished the baby for eight weeks. The child in that time will be an orphan, its mother having been decapitated, and it will be placed in an asylum.

THE GEOLOGICAL SURVEY.

When an up-to-date Geology of Canada comes to be written, one of the principal features of the work will be, we hope, a series of chapters showing the practical good that has resulted from the explorations and examinations of the Geographical survey. There is hardly a mineral industry in Canada that has not directly benefited from the work of the survey, and this is the more to be appreciated when we remember that the officers of that institution are speaking, as it were, for the government, and are naturally constrained to be more careful than if they were reporting independently. In the former case, the survey is responsible for what they write, in the latter they alone are responsible.

It is many years since the survey pointed out the metalliferous character of the Huronian rocks, and the opinions then stated were so soon acknowledged by all mining men and prospectors to be accurate, that any maps published by the department depicting an Huronian area, are always eagerly sought after.

When we review the nickel, copper and gold deposits of the vicinity of Sudbury and Sault Ste. Marie, and especially the silver and cobalt veins of the Temiskaming region, the economic importance and metalliferous character of the rocks of the Huronian system become even more apparent. This fact was recognized and the importance of the geological conditions insisted on by sir William Logan, in reports of the survey made nearly fifty years ago, and it is gratifying to observe that the practical miner has begun to appreciate the value of the large amount of geological work carried out in the districts of Nipissing and Thunder Bay,—work which, a few years ago, might have appeared difficult to justify in the light of any economic results up to that time achieved. More than ten years ago the late George R. Dawson, then director of the Geological survey, made this very definite prophecy—a prophecy that, as we all know, has been so amply fulfilled: "There can be very little doubt that every square mile of the Huronian formation of Canada will sooner or later become an object of interest to the prospector, and that industries of considerable importance may yet be planted upon this formation far to the north, or for other reasons at present regarded as barren and useless. Upon Lake Temiskaming is one of the typical Huronian areas."

A COBALT COINAGE.

The discovery of cobalt ore in large quantities in northern Ontario and the limited market for that metal have had a disastrous effect upon its price which has fallen from three dollars to thirty-seven cents a pound.

At the present time cobalt and its compounds are almost wholly used for pigments, chiefly for coloring glass or the glaze for pottery, beautiful blue, green, yellow and bronze colors, suitable for these purposes being obtained from a cobalt base. The metal is said to be very effective for electrical storage batteries, while as a plating material it is much superior to nickel, the coating being harder, brighter and more tenacious. Experiments conducted with a view to the use of cobalt in a manner similar to nickel as an alloy of iron have not proved successful up to the present, notwithstanding that cobalt from its hardness and high magnetic properties would naturally be expected to give superior results.

The market for cobalt colors is a limited one, and in competition with cheaper artificial colors it is not rapidly increasing. The improvements in storage batteries will probably cause an increased demand for the metal while the cheapening of cobalt consequent to the new discoveries may greatly increase its use as a superior plating material.

Cobalt is a white, slightly reddish metal similar in properties to iron, being slightly harder and more tenacious and having about the same degree of malleability. It tarnishes very slowly, and is not easily attacked by most acids, or by alkalies.

The present small silver coinage of Canada, especially the five-cent pieces, is inconvenient and is easily lost; in the place of these it is proposed to substitute a larger coin of cobalt approximating in size the nickel five-cent pieces of the United States, while a smaller coin might replace the present bronze cents. Owing to its hardness, malleability and lack of tarnish cobalt is an ideal metal for these coins of low value. It would furnish a unique coinage and would assist greatly in absorbing the surplus of cobalt now being mined. The issue of these coins would secure a considerable profit to the government, and their introduction would fittingly mark the establishment of the new Canadian mint at Ottawa.

KEEP YOUR HEAD UNCOVERED.

The Constant Wearing of a Hat Propogates Dandruff Germs.

There are many men who wear their hats practically all the time when awake, and are blessed with a heavy shock of hair; yet if the scalps of these same men once became infested with dandruff germs, the parasites would multiply all the quicker for lack of air. Baldness would ensue as the final result. Newbro's Herpicide kills these germs and stimulates unhealthy hair to abundant growth. Herpicide is a pleasant hair dressing as well as a dandruff cure and contains not an atom of injurious substance. Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

C. C. RICHARDS & CO.

Dear Sirs—I have used MINARD'S LINIMENT in my stable for over a year, and consider it the very best for horse flesh I can get and strongly recommend it.

GEORGE HOUGH.
Livery Stables, Quebec.

homes, built and occupied by the workers. Hence our progress and prosperity, Therefore it is every man's duty who gets his living in this country to see to it that he does all he can to leave to the rising generation who are the children of today a white man's country run on white man's principles.

While my place is not a model of what a fruit ranch should be, as it has suffered from neglect and ignorance from myself, and others for years past, yet it gives me a living even in short years like this. While it is very true I have lost much small fruit from the lack of pickers, I have never since I have lived on the place allowed my self respect to get to so low an ebb as to let a Chinaman work within my gates. I have learned also that five acres are sufficient for a strong man to clear up and when properly put out to different fruits will maintain a large family and when we have a family on every 5 or 10 acres of good land in Kootenay, Nelson will be a city to be proud of. The labor question will be settled; the country can produce berry pickers as well as berries, and voters as well as apples.

H. M. FOSTER.
Nelson, August 4. 1906.

OPPOSED TO CHINESE.

Editor, The Daily News: As the Kootenay Fruit Growers Association has put itself on record as advocating the free immigration of Chinese coolies to this province, would you kindly allow an old settler and fruit raiser to express his opinion on the subject. It seems to me that men who have lived any length of time in this democratic country that offers freedom, fortunes and homes to the white people of the world—and who deliberately wish to give it over to the slave-workers of Asia, either must be decidedly narrow-minded or must have no respect for this country or its people and no regard for the future prosperity of the thousands of children who are growing up in the country and the thousands that are coming from the older countries every year, who must have occupations and homes here, They should remember that America is essentially a nation of

LIPTON ASKS A FAVOR

WANTS TO BUILD TWO CHALLENGERS FOR AMERICA CUP

WOULD TRY THEM OUT AND RACE WITH THE BEST.

A full practise of the members of the lacrosse team is called for this morning at recreation park and if every player is not in attendance manager Deasy will expect to know the reason why.

The next game is to take place in this city on Thursday afternoon when Archie Macdonald will bring his pets over from Rossland to try conclusions with Deasy's twelve.

The latter are still smarting under the defeat administered to them during the Rossland celebration and are out to win. A great game should be the result as the Rossland team has improved fully 100 per cent since it appeared here during the Dominion Day celebration.

Poor old St. Kitts—last year the Athletics were one of the star twelves of the now defunct Canadian Lacrosse association senior series, but an A. P. despatch from Buffalo last night conveyed the intelligence that they were defeated by the Buffalo lacrosse team in the American city yesterday.

A meeting of the members of the tennis club will be held tomorrow evening.

It is understood that there has been a hitch in the negotiations between the Regina and Cranbrook teams for a game in Cranbrook on the 14th. However, it is to be hoped that all trouble will be cleared away and a game arranged as the Regina team plays in Nelson on the 16th and the Nelson boys would like to get a line on the Cranbrook team by knowing how they stack up against Regina.

That sir Thomas Lipton is making elaborate preparations for another attempt to lift the America cup is shown by the following despatch received from London yesterday: "Sir Thomas Lipton, whose anxiety to challenge again for the America cup is well known, has made the suggestion to a number of prominent yachtsmen on this side of the Atlantic that in case he sees his way clear to a formal challenge he would like to secure a concession from the New York yacht club allowing him to build two yachts, sail one against the other and send the better boat against the defender. He firmly believes he is justified in seeking this concession. The defender, as is well known, has the privilege of trying out its boats, but the challenger must, under the deed of gift, name the boat with the challenge. Yachtsmen in New York who have discussed this matter informally seem to agree with sir Thomas that his desire is perfectly fair.

Eastern lacrosse results yesterday were as follows: In Montreal, the Shamrocks were defeated by the Montreals after a hard game by eight goals to seven. This has practically put the Shams out of all chance of winning the championship this year for the Montreals have now an established lead and unless the Irishmen win every one of their games from now and the Montreals lose every time, the Irishmen will part with the honor.

At Ottawa the Capitals won easily over the Nationals by eleven goals to one. It was easy money for the Senators and as Cornwall met defeat yesterday, they are now close up behind the leaders and Cornwall drops to fourth.

Toronto beat Cornwall at the Rosedale grounds by eight goals to two. Cornwall is usually weak on visiting grounds but is easily a winner in the factory town, so the chances of Cornwall in the championship cannot be very well figured. Tecumsehs had an off day, but their prospects are bright.

On the coast, Vancouver gave New Westminster a hard game but the Terminal City boys did not play good enough to down the champions who have won every game they have played this year. The score was six goals to four. By a strange co-incidence the New Westminster intermediates have again won the championship without a single defeat. This intermediate team has had but one defeat in schedule games in four years.

CLOTHING VALUES

We are continuing our great clearing sale and although we have sold an immense quantity of goods we have a large stock still on hand. We are offering some exceptional values this week and in both quality and price we can satisfy the most particular.

Gents' Suits

We handle the famous Twentieth Century Brand of Gents' clothing. These goods are the finest made in Canada, and are acknowledged by all good dressers to be the finest line of Canadian clothing on the market. We have some fine summer suits which formerly sold at $12.50, $15.00 and up, which we will place on sale tomorrow at $5.00 and $7.50 per suit. This is one of the greatest bargains ever offered in Nelson.

Shoes

A fine line and a big stock; $1.50 this week, will buy what it would have taken $3, $4 or $5 last week.

Underwear

Some nice light underwear for summer and early fall wear. Half a dollar and one dollar will bring value to double that amount.

Socks

Gents' Socks on sale this week at 10c, 15c and 25c. Great value.

If you miss this sale you will make a great mistake. A dollar saved is a dollar earned and you can earn dollars by coming to this big sale.

OLD TEA DRINKERS

Are usually very particular about their favorite beverage. They on't want one grade this week and another the next. The flavor and trength must always be the some.

Blue Ribbon TEA

a great favorite with these articular tea drinkers. They nd it richly flavored, fragrant, sufficient strength, and alays the same.
As it always comes from the me plantations, the flavor does not vary from time to time but will be found exactly the same in every package.
By using Blue Ribbon Tea for a time you can easily test this for yourself. Any grocer can supply you.

NTEREST TO MINERS

OCK FORMING MINERALS

(Continued)

hiboles are the next most impor- inerals. They are divided into classes according to the way rystallize, and according to their ition. Hornblende is the chief of this class. It is essentially ite of lime, magnesia, alumina on. There are distinct groups of rnblende family, first the non ous, including the white and pale r grey fibrous varieties such as te and tremolite; the second being the aluminous, embracing the more abundant dark green, brown and black varieties. Hornblende has abundantly resulted from the alteration of pyroxene (see below. In many rocks the iron magnesian silicate now hornblende was originally aujite . The pale non-aluminous hornblendes are found among gneisses, crystalline limestones, and other metamorphic rocks, whilst the dark varieties, though also found in similar situations, sometimes even forming the entire masses of rock as in hornblende-rock, are the common forms in granitic and volcanic rocks, like syenite, diorite, etc.

Pyroxene Groups.—The most important minerals in this group are the aujites. They like the hornblendes, are divided into two groups, first the non-aluminous or pale green varieties; second, the aluminous or dark green or black varieties, such as the common aujite. The distribution of aujite is very similar to that of hornblende, the pale variety being chiefly in gneisses, marble, etc., and the darker varieties enter as essential constituents into many igneous rocks such as diabase, basalt and andesite.

Olivine is another important silicate of magnesia and iron. It forms an essential ingredient of basalt and occurs in many galebros. As its name would imply its color is some tint of green from light to dark, or even to black.

Garnet.—This mineral is often an abundant accessory in mica-schist, gneiss, granite, etc. It also occurs as an essential constituent of garnet rock. It is a silicate of iron and alumina, with other metals frequently present. In color it is usually red or brown.

Kaolin is a silicate of alumina and is the result of potash and soda feldspars decomposing, when exposed to atmospheric influences. The purest white koalin is called china-clay from its extensive use in the manufacture of porcelain. Ordinary clay is an impure variety of this mineral. The impurities being iron, lime, etc., due to the debris of the undecomposed constituents of the original rock.

Serpentine is a silicate of magnesia with varying amounts of iron present. Its color ranges from a pale to a dark green, sometimes black. It is a product of the alteration of other minerals, especially of olivine.

Calcite is a carbonate of calcium or lime. It is the most important rock forming mineral in the carbonate group, of which there are practically four important minerals which enter to any extent in the formation of rocks. Calcite occures (1) as an original constituent of many aqueous or water formed rocks as in limestone either as a result of deposition from water or as a secretion by plants and animals; (2) as a secondary product from weathering when it is found filling ordinary cavities. It never occurs as an original ingredient in massive crystalline rocks such as granites or felsites. Calcite is a great petrifying agent.

Aragonite is also a carbonate of lime, but is harder, heavier and much less abundant than calcite.

Dolomite, a carbonate of lime and magnesia occurs first as an original deposit in massive beds (magnesian-limestone) second as a product of alteration especially of ordinary limestone or aragonite. It is called bitter spar on account of its taste. Siderite or brown ironstone or spathic iron, usually occurs crystalline in association with metallic ores, also in beds and veins of many crystalline rocks particularly with limestones.

Of the remaining rock forming minerals gypsum and barytes are the chief sulphates; apatite, or phosphate of lime, the principal phosphate; and fluorite, or fluorspar, the most abundant fluoride. The sulphides have already ben taeken up in previous articles.

CORRESPONDENCE

T. T., Nelson, B. C.—The large piece of rock you left is an ordinary silicious country rock, mainly composed of quartz. The smaller piece is a schistose rock. Both will carry gold in small quantities.

F.E.C., Salmo, B. C.—Your samples are as follows—(1) calcite or crystalline limestone; (2) the same colored bluish; (3) the same colored brownish; (4) a schistose rock; (5) this sample really requires to have a microscopic examination of it made, though it apparently consists mainly of hornblende, it belongs to a class of apparently a kin to diorite; (6) chiefly composed of hornblende (see today's article); (7) is a sandstone carrying a fair percentage of lime.

S. R. M., Trout Lake, B.C.—Your sample is a clay-ironstone, but as you say, it must contain a considerable amount of spathic iron in the latter's deep brown form. Spathic iron is a carbonate of iron and is often found in combination with clay or talc when the name clay ironstone is applied to it.

J. W., Kaslo, B. C.—The mineral in the piece of quartz you submit for examination is too small to determine correctly. It would be advisable to obtain a larger piece with more of the mineral in, and submit it again for examination.

P.S., Crawford Bay—Your sample contains ruby silver, gray copper and galena in quartz. It will probably run high in silver. It is advisable to assay it for both silver and lead. A little gold is also sometimes found with these minerals, and it would perhaps be as well for you to have it tested for that as well. The fee for the three will be $2.50.

J. McD., Lardo, B. C.—Your sampe is a micaceous sandstone, and will contain little or no values.

B. G., Kaslo, B. C.—There is no ruby silver in your sample; what you mistake for it is a specular hematite, with a deep red streak which seemed to you to indicate proussite.

T. L., Ymir, B.C.—Your rock is a chloritic rock and will probably only carry a very small percentage of nickel if any.

W. B., Erie, B. C.—Your No. 1 sample is a very dark brown variety of zinc blende; will most likely carry good gold values. No. 2 is a graphitic schist. No. 3 calcite.

L. S., Kokanee, B.C.—The fine powdery substance you send is an infusorial earth. It is sometimes put up in boxes and sold as electro-silicon for cleaning brass, and silver ware.

J. S. CARTER, D.P.A., Nelson. W. P. F. CUMMINGS, Gen. Agt., Winnipeg

Synopsis of Regulations Governing the Disposal of Dominion Lands Within the Railway Belt in the Province of British Columbia.

A license to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths, excepting those situated west of Yale, for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:

Sawn lumber, 50 cents per thousand feet B. M.

Railway ties, 8 and 9 feet long, 1 1-2 and 1 3-4 cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent, on the sales.

A license is issued so soon as a berth is granted, but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B.M., for square timber and sawlogs of any wood except oak; from 1-2 to 1 1-2 cents per lineal foot for building logs; from 12 1-2 to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties, and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of 21 years at a rental of 1 cents per acre per annum.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for homestead purposes may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the minister of the interior at Ottawa, the commissioner of immigration at Winnipeg, or the local agent for the district within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

It is the practice of the department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property, with buildings for their accommodation, will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of th Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the Act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,
Deputy of the Minister of the Interior.

Ottawa. February 14th, 1906.

THE

'HARD-TO-DO THINGS"

Most things are "hard to do" if you try to do them in the hardest ways—and there's a hard way to do most everything!

There are Several Hard Ways to

FIND TENANTS
GET SERVANTS
SELL PROPERTY
LOOK FOR WORK
SECURE OFFICE HELP
INFLUENCE INVESTORS
RENT FURNISHED ROOMS
DISPOSE OF "OLD THINGS"
LOCATE LOSERS or FINDERS

and there is one way of doing these things which—while, possibly, not "easy"—is, at any rate, least-hard—the sensible, persistent use of

NOTICE OF TRANSFER OF LICENSE

I hereby give notice that I intend to apply to the license commissioners for the city of Nelson at the next meeting held after thirty days from date hereof, for a transfer of the retail liquor license now held by me for the Club hotel, situate on Lots 21, 22, 23 and 24, Block 14, Nelson, B.C., to Mrs. Mary E. Curran.

Dated at Nelson, B.C., the 6th day of July, 1906. Aug. 7

E. J. CURRAN.

THE SUNLIGHT WAY

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way (follow directions).

Hard rubbing and boiling are things of the past in homes where Sunlight Soap is used as directed.

Sunlight Soap will not injure even the daintiest fabric or the hands, and the clothes will be perfectly white, woolens soft and fluffy.

The reason for this is because Sunlight Soap is absolutely pure, contains no injurious chemicals—indeed, nothing but the active, cleansing, dirt-removing properties of soap that is nothing but soap.

Equally good with hard or soft water.

YOUR MONEY REFUNDED by the dealer from whom you buy Sunlight Soap if you find any cause for complaint. 155

NEW YORK FASHION LETTER

New York, Aug. 4 — The woman who wishes always to be dressed in the best of taste and to be up to date in every way, gives a good deal of time to all those little things that go toward the tout ensemble of the well dressed; the belts, the gloves, the parasols, the handkerchiefs and the lingerie.

Quite the newest thing for the decoration of the summer parasol is to have one embroidered with the monogram in white floss to match the embroidery on the linen dress. A pretty example of this sort was made of cornflowers in the midst of which was the monogram; but it would be well to have the flowers of the color used in the dress or dress accessories. There is no end to the work that has been lavished upon the handles of these elaborate affairs; one was a beautifuly carved stick of ivory, another was topped with a bird's head having jewelled eyes, another had a peacock's head and tail feathers carved out on the flat handle and afterwards enamelled in true colors. The girl with the fad has not been forgotten for there is the golf stick handle and many others of a like nature. The tops are simply things of beauty and all sorts of artistic work is used upon them. As long as they are kept in harmony with the costumes with which they are to be worn, you are not likely to go wrong in their decoration.

Steel is the salient feature of the newest belts; and both those of leather and of silk are finished with steel beads and pailettes, and at the back is a deep buckle, which holds the belt to its full depth, while the front buckle is much smaller and both that at the back and front are rounded so as to fit the figure. There is a new model called the Paquin, which is very wide and of soft leather which adjusts itself to the figure perfectly. This belt is usually dyed to match the costume; but the unfortunate part of this arrangement is that it must be made to order to be quite correct, and all things made to order are exceedingly expensive, as nothing but hand work is used on them. Buckles, like the handles of parasols, are works of art; and no carving, metal work, enamelling, or whatever form of decorative work you may mention is too good for them. The white linen belts are best liked for wear with linen dresses or shirtwaists from the fine lingerie to the tailored blouse. In the case of the colored gown a stitched shaped belt is often worn but a preference is shown for the beautiful silk ribbons that are so cheap just now if you watch the counters for sales. All these belts from the plainest linen to the finest silk may be made as beautiful as you please, or according to your cleverness with the needle.

In shoes, pumps are more worn than ever and both these and the slippers that come in white duck and linen are embroidered in many designs, done in white floss and finished with a chic linen bow. Of course, it goes without saying by this time, that the white dress requires white shoes and stockings. The latter are growing more elaborate every day, embroidery, lace insets, ribbon work and fancy weaving are all used, either separately or together. This elaboration does not apply to white stockings alone, those in other colors are treated in the same manner and one of the fads of the day is to embroider your own stockings, caused, no doubt by the high price of those in the shops. For the woman whose foot will not allow of the wearing of white shoes, there is the new black pump or Oxford tie, which also come in tan, but are cut on a new and lower model. The Cuban heel is the favorite for the street, but is fully a half inch higher than formerly; of course, for the house, the French heel is liked. The Gibson tie is a general favorite with the modish woman.

Little change is seen in gloves as yet, the great desirability being coolness as seen in the new open work backs and silk palms that have been worn all the season. Kids are worn only on the most formal occasions just now.

Corset covers to wear with muslin or lingerie gowns, are now made with an immense amount of work upon them. One of these little garments has a fitted back under arm gores, which gives it an exact fit, but the front is full. The front is covered with insets and motifs of Valenciennes lace, while about the neck is a frill of lace. Many of the new corset covers are made with a fitted girdle which helps to give the princess skirt its nice adjustment. A number of pretty waists are made with full ruffles edged with lace across the bust, which is particularly fitted to the full waist fastened at the back. Blind embroidery is used a great deal upon all underwaists which are fitted close to the figure without any fulness, even at the neck. In this way the pattern is the better shown up. A pretty corset cover, with a seam under each arm, was scalloped around the square neck, armholes and down the front, and embroidered in a pattern of clover leaves and eyelet work, and buttonholes for an inch wide ribbon to run through. A whole suit was embroidered in this manner and run with ribbons.

Handkerchiefs have come under the sway of the lace rage, and they are most beautifully decorated with frills, insertions, corner motiffs, insets, and tiny medallions. One of the summer pastimes for the summer porch, will be the making of these beautiful, airy creations which cost small fortunes in the shops. But, so many patterns are now sold for their making, that every woman may have a few of them. There should be a half dozen with hem stitched borders and the monogram work in one corner, others may have a narrow point lace patterns worked round the border, and still others may have little motiffs set in the corners.

There is not very much change in the new blouses. Sleeves still continue puffed to the elbows, or a little below and are worn with or without the deep gauntlet cuff. Nearly every waist except those of the tailored style are fastened down the back; this is to leave the front free for the beautiful embroidery designs and elaborate trimmings that are used upon them. All the sheer materials are most used and next to them the silks. Handkerchief linen leads, for it has been found that no material shows up the pattern so well as this, and on it are used all the different kinds of embroidery, such as blind, Danish cut work, and the new filled work. But, batiste has been found to adapt itself to the liking for inset work, and designs made for the new waists with open neck as well as the surplice waists, have created a demand for fancy yokes, tuckers and chemisettes, while the short sleeves have made the gauntlet cuff a necessity. Chemisettes are often made of tucked lawn, linen or batiste in combination with rows of lace insertion. A tucked chiffon is also liked when the dress is of silk. Tuckers are made of embroidered batiste, handkerchief linen, baby Irish lace, and also by the paterns made from Valenciennes and all over embroidery. In making these chemisettes be sure to have them long enough all round so they can be pinned down securely and kept in place, as those that are always bulging up are an eyesore to every one who cares for tidiness.

CATHERINE MANN-FAYZANT

MAKE HAY WHILE THE SUN SHINES

There is a lesson in the work of the thrifty farmer. He knows that the bright sunshine may last but a day and he prepares for the showers which are so liable to follow. So it should be with every household. Dysentery, diarrhoea and cholera morbus may attack some member of the household without warning. Chamberlain's Colic, Cholera and Diarrhoea Remedy, which is the best known medicine for these diseases, should always be kept at hand, as immediate treatment is necessary and delay may prove fatal. For sale by all druggists and dealers.

Somebody is going to get a rare bargain in the fruit ranch which is being offered for sale by Taylor and McQuarrie.

When the Liver is out of Order

calomel, cascara, salts, strong liver pills and purging mineral waters won't do any permanent good.

When a person is bilious, the liver is not giving up enough bile to move the bowels regularly—and some of the bile is being absorbed by the blood. In other words, the liver is in a weakened, unhealthy condition.

Now, purgatives don't act on the liver at all. They merely irritate the bowels, and afford only temporary relief. But FRUIT-A-TIVES are the one true LIVER TONIC. They act directly on the liver—strengthen and invigorate this vital organ—and put it in a normal, healthy condition.

FRUIT-A-TIVES also stimulate the glands of the skin—and regulate the kidneys and sweeten the stomach. When skin, liver and kidneys are normally healthy, there can be no biliousness, no constipation, no kidney trouble, no impure blood, no headaches.

No other medicine known to science is so reliable and so effective in curing Biliousness as these fruit liver tablets.

FRUIT-A-TIVES are fruit juices with tonics added—and are free from alcohol and dangerous drugs. 50c. a box or 6 for $2.50. Sent on receipt of price, if your druggist does not handle them.

FRUIT-A-TIVES LIMITED, OTTAWA.

DESPATCHES "CANNED"

TELEGRAPH NEWS DONE UP A LA CHICAGO PACKERS.

THE WORLD AND HIS FRIEND PASS IN QUICK REVIEW.

Chicago, Aug. 4.—For the first time in its history Chicago today is an absolutely "dry" town. The sale is forbidden of spirits or malt during elections.

Berlin, Aug. 4.—Emperor William returned here today from his cruise and drove immediately to the residence of crown prince Frederick William, to see his new grandson.

New York, Aug. 4.—A cable despatch to the Herald from Fort de France, Martinique, says: "Another strong earthquake shock was felt here Thursday night."

London, Aug .4.—The duke of Rutland died today. He was born in 1818.

London, Aug. 4.—The members of the house of commons and of the house of lords met today to clear up the business of the summer session after which parliament will be adjourned until October 23. The commons spent several hours in a discussion of the South African question, which premier Campbell-Bannerman moved to adjourn until the autumn.

London, Aug. 4.—Sir J. S. Randles, unionist, has been elected to parliament for the Cockermouth division of Cumberland, succeeding the late sir Wilfrid Lawson, who died July 1. The successful candidate received 690 votes more than the Hon. F. Guest, his liberal opponent. At the recent general elections sir Wilfrid Lawson, liberal, defeated sir J. S. Randles, by 563 votes.

Ostend, Belgium, Aug. 4.—Princess Alberta, wife of the heir presumptive to the throne of Belgium, gave birth to a daughter today.

Paris, Aug. 4.—An official denial was published today of the report that France has abandoned her official and military establishments on the island of Tahiti, preliminary to ceding the island to Great Britain.

Portland, Maine, Aug. 4.—The British consul to Boston has ordered an investigation of the alleged treatment of lord Znolto Douglas, during the period of his recent detention by the Portland police. Lord Douglas was mistaken by the police for an alleged bigamist wanted in the south. Lord Douglas says he wants no further notoriety and will be satisfied with verbal apologies.

Copenhagen, Aug. 4.—The third conference of the international league of women suffragists will meet here from August 7 to 11. The queen of Denmark yesterday granted an audience of an hour to Mrs. Carrie Chapman Catt, of New York, president of the league.

New York Aug. 4.—Twenty women, nurses of Bellevue hospital, are ill of ptomaine poisoning. It is said they were poisoned by ptomaine in canned tongue.

Paris, Aug. 4.—Congressman and Mrs. Nicholas Longworth today sailed from Cherbourg for New York, on the American liner St. Paul.

San Francisco, Aug. 4.—The San Francisco national banks have, since the fire, loaned in New York on six months' paper, $30,000,000. There is a superabundance of money here at present.

London, Aug. 4.—A despatch to the Pall Mall Gazette from Tangier, published this afternoon says: Highly sensational reports are being received here from the interior of the rapid spread of an anti-French agitation. The rebels are concentrating their contingents around Marakesh, the southern capital. They are clamoring for a holy war.

London, Aug. 4.—William M. Chase, the well-known American painter, sailed today for New York. He stated that he would consult the leading painters, sculptors and architects for the purpose of taking some public action in defence of Stanford White, who was murdered by Harry Thaw.

Washington, D. C., Aug. 4.—All wireless telegraph stations in the world have been located and catalogued by a bureau of the United States navy. The number of stations in each of the principal countries are. Denmark, 4; Germany, 13; France, 6; Great Britain and Ireland, 43; Holland, 7; Spain, 4; Italy, 18; Russia in Europe, 8; Sweden, 3; Turkey, 6; Argentina, 5; Brazil, 5; Canada, 5; United States, 88, (of which 15 are in Alaska and island possessions); Cuba, 5; Japan, 2; and Dutch East India, 5.

Rome, Aug. 4.—Today is the third anniversary of the election of pope Pius X to the papacy and the event is celebrated here with great solemnity. The college of cardinals was received by the pope in collective audience and cardinal Oreglia, the dean, read an address of congratulation and wishing the pope many more years of pontificate in the name of his colleagues.

Montgomery, Ala., Aug. 4.—Robert L. Dix, a negro, convicted of the murder of Bert Pesnell, a Birmingham street car conductor, was executed by hanging today. A quarrel over paying street car fare was the cause of the murder for which Dix was hanged.

San Antonio, Texas, Aug. 3.—L. Mays, the negro murderer of Leo Woods, a young white man, was executed at the county jail by hanging today. The testimony disclosed that the only provocation for the murder was the fact that Woods had twitted him, by calling him "Irish."

STOCKS FOR THE WEEK

LARGE DEMAND FOR SHARES OF B. C. COMPANIES

GOOD INDICATIONS OF FURTHER ACTIVITY THIS FALL

(Reported by B. B. Mighton & Co.)

General satisfaction was manifseted on the mining exchanges in eastern cities and Spokane in consequence of the brisk tradings in most of the shares dealt in. Locally the situation is very satisfactory, there being a larger demand for the shares of B. C. companies than has been apparent for a number of years. The predictions of last week were realized in regard to the stocks of the Rossland camp, the demand far exceeding the supply and in consequence these shares all advanced a few cents. Taken the situation generally, the shares traded in here, were held very firm and there is no doubt, but that a revival of activity is in order for the coming season.

White Bear, Virginia, California, Giant and Monte Cristo all advanced, and a still greater demand for these stocks is expected. This is accounted for by reason of the expected resumption of activity by these companies.

International Coal was again the feature of the week's trading. The sensational advance of this stock was fully anticipated and the top price has not yet been reached.

Pathfinder as predicted gained a few points and is held firm awaiting developments of the exploitation by the interests which have this property under bond.

North Star advanced with no stock offered, but with a large demand.

Denoro Mines and Canadian Goldfields remained firm, with but few shares dealt in. Rambler-Cariboo remained unchanged, with but few offerings. La Plata continues its upward movement, all shares offered being accepted without hesitation.

Folowing are the approximate quotations for the week ending yesterday:

	Asked	Bid
Breckenridge & Lund Coal	$ .70	$ .65
B. C. Standard	$ .25	$ .20
California	3½	.2
Canadian Goldfields	7½	.7
Denoro Mines	7½	.7
Dominion Copper	2.60	2.25
Edward Baillie Syn.	70.00	65.00
Forty-Nine Creek Receipts	.6	.4½
Giant	.2	.1
International Coal	.70	.60
La Plata	.20	.16
Monte Cristo	3¼	.2
North Star	.8	.6
Pathfinder	.5	.4
Referendum	.6	.5
Rambler-Cariboo	.26	.24
Sullivan	3½	.2¾
White Bear	.8	.7
Western Oil	.15	.13

CHURCH SERVICES TODAY

The services announced for today in the churches of Nelson are as follows:

Anglican—St. Saviour's church, corner of Ward and Silica Sts. Eighth Sunday after Trinity; holy communion, 8 a. m.; morning prayer and holy communion, 11; Sunday school, 9:45 a.m.; evensong, 7:30; Rev. F. H. Graham, rector.

Catholic—Church of Mary Immaculate, corner of Ward and Mill streets. Low mass, 8 a.m.; high mass, 10:30 a.m.; evening service, 7:30. Rev. Father Althoff, priest.

Salvation Army—Barracks on Victoria street, west of Josephine. Special services will be held today. Knee drill, 7 a.m.; holiness meeting, 11 a.m.; a praise meet-

Baptist church—Stanley street, near Mill. Morning service, 11 a.m.; evening service, at 7:30; Sunday school, 12:15 p.m.; Rev. E. H. Shanks, pastor. The services will be held in the mission tent in place of the church. Rev. Don McIntyre of Fincher Creek wil preach in the morning and Rev. S. A. Northrop of Los Angeles in the evening.

Presbyterian Church—St. Paul's, corner Victoria and Kootenay streets. Morning service, 11 a. m.; Sunday school, 12:30 p.m.; evening service, 7:30 p.m.; Rev. J. T. Ferguson, pastor.

Methodist church—Corner Silica and Josephine streets. Morning service, 11 a.m.; Sunday school and pastor's bible class 2:30, Rev. R. N. Powell, pastor. Morning topic, "The Words of Jesus—the Law of Life"; evening subject, "David and Jonathan, a Model Friendship." The sarcrament of the Lord's Supper will be administered at the close of the morning service. Miss McBride will sing a solo during the evening service. Strangers and visitors heartily welcomed.

BURCH & REISS' SHOW

Will Appear Here for First Time on Next Tuesday

The amusement business today may be classed with any other business; some firms deal in shoddy wares; some in medium quality wares; and others in the finest grades of goods only.

All the acts in Burch & Reiss' show are presented in an attractive manner, and only the best is presented or allowed to be served to their patrons. There is absolutely no satisfaction in going to a tented amusement where they present inferior acts in two or three rings and on an elevated platform. One cannot watch two or three rings and platform at the same time, and the acts presented in any one ring are not so satisfactory. The best part of any tented amusement enterprise is the trained animal features. With Burch & Reiss' great dog and pony show will be seen upwards of 100 beautiful Shetland ponies; a herd of camels and dromedaries; scores of intelligent dogs, monkeys, goats and a herd of sacred cattle, or zebus; llamas, tapairs and dozens of other rare and costly wild and domestic animals. Every act is presented with a dash and vim. The animals are well groomed, well fed and happy looking creatures, and they enter into their work with a dash and spirit that gives one the impression that they enjoy entertaining. In order to relieve the possibility of monotony of the scores of animal acts, Burch and Reiss have secured the services of a number of famously funny clowns; troupes of aerialists and acrobats; lilliputian feature acts, and the famous Gregory Royal Italian band which is without doubt the finest body of musicians ever carried with a tented exhibition. Another feature that is bound to be popular is the free pony rides after the afternoon show for the little men and women. These rides will be absolutely free and under no circumstances will they be omitted. A grand free street carnival and children's fairyland parade will be given at 11 o'clock on the morning of the exhibition at which time the entire aggregation of animal actors will be seen. These shows will exhibit here on Tuesday, Aug. 7, in enormous waterproof tents, which will be located near the C.P.R. depot.

DOWIE'S DIVINE CLAIM

Gets a Severe Rebuff in Court Decision—Zion City in a Quandary

Zion City, Ill., Aug. 4—John A. Lewis, a deacon, who is recognized as the spokesman of Dowie, and was chosen by the "apostle" to manage the Paradise plantation of Mexico, the rock on which it is said the Dowie and Volivia partisans split, said of the decision of judge Landis:

"If the decision of judge Landis stands the Christian Catholic Church of Zion is uprooted. The church is founded on the theory of a theocracy. How, then, can an election under the laws of Cook county, Illinois, proclaim who shall be leader of the hosts? I firmly believe that the Lord has designated John Alexander Dowie to lead the hosts to the paths of light. Therefore when a special election is called the whole fabric of the church is destroyed."

Minard's Liniment Cures Garget in Cows

UNNECESSARY EXPENSE

Acute attacks of colic and diarrhoea come on without warning and prompt action must be taken. There is no necessity of incurring the expense of a physician's services in such cases if Chamberlain's Colic, Cholera and Diarrhoea Remedy is at hand. A dose of this remedy will relieve the patient before a doctor could arrive. It has never been known to fail, even in the most dangerous cases and no family should be without it. For sale by all druggists and dealers.

THORPE'S LITHIA delivered to your home, 2 doz. pints, $1.75.

RED GUARD ROUNDED UP

ALL LEADERS ARE IN THE HANDS OF THE AUTHORITIES

STRIKE AT HELSINGFORS IS ENDED AND MUTINY IS QUELLED

Helsingfors, Aug. 4—The strike of the employees of the street railroads and factories here is over. All the leaders of the socialist "red guard" have been arrested and the organization has been broken up.

Warsaw, Aug. 4—A telegram from Libau says train robbers today betwen Libau and Kafeipot stole $40,000 of government money. Eight passengers were wounded, among them being the consul general of Brazil and a German.

Warsaw, Aug. 4—A plan to liberate the political prisoners here was betrayed to the authorities today. Several servants and policemen who were implicated have been arrested.

Moscow, Aug. 4—A bomb was exploded in the Kazan railway station today and two persons were killed.

St. Petersburg, Aug. 4—On the Jewish question the Novoe Vremya, the only unofficial paper to appear today, reviews the brutality of the mutineers at Cronstadt in their attacks upon the officers as showing what the country may expect if the mobs get the upper hand. It says that the mutineers tied a rope around the head of one of the officers and threw him into a lake, where he was drowned. They beat in the face of another officer with the end of a rifle and broke the legs of Mme. Jacobia, sister of Alexandroff, who threw herself between her brother and some sailors who were forcing their way into her house, and stabbed her to death with bayonets. It turns out that the servants of colonel Alexandroff and captain Vrichinsky delivered them up to the mutineers, and were among the murderers, who were tried by drumhead courtmartial and shot.

After these evidences of the mob's spirit the Novoe Vremya appeals to all who desire to prevent a repetition of the horrors and terrors of the revolution of France to rally to the side of law and order.

Warsaw, Aug. 4—The Jewish socialists in a proclamation today urge the Jews to be ready to fight, and when the signal is given they are required to appear in the streets armed. The appeal has given rise to a serious panic, and fears also are expressed that a general railway strike may break out here. Stringent measures have been ordered taken for the preservation of order. The Polish socialists today issued a proclamation admitting their responsibility for the recent train robberies and acknowledging that they murdered 20 policemen during the course of a week.

Minard's Liniment Cures Distemper

SUMMER DIARRHOEA IN CHILDREN

During the hot weather of the summer months the first unnatural looseness of a child's bowels should have immediate attention, so as to check the disease before it becomes serious. All that is necessary is a few doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy followed by a dose of castor oil to cleanse the system. Rev. M. O. Stockland, pastor of the first M.E. church, Little Falls, Minn., writes: "We have used Chamberlain's Colic, Cholera and Diarrhoea Remedy for several years and find it a very valuable remedy especially for summer disorders in children. For sale by all druggists and dealers.

Minard's Liniment Cures Distemper

THORPE'S LITHIA cures rheumatism.

Twenty minutes from the time you leave Baker street you can be on the ranch that Taylor and McQuarrie are offering for sale in this issue.

TURKEY IN HOT WATER

Paris, Aug. 4.—Strained relations have arisen between France and Turkey over the frontier of Tripoli adjacent to the French Sahara. Turkish troops occupy the territory on the grounds of Turkey's suzerainty over Tripoli. France's protest was ineffective, the Turkish ambassador here today receiving instructions to maintain the Turkish claims. The officials here do not expect the affair to assume serious dimensions although the attitude of both sides momentarily is very firm. Turkey's reply is interpreted as being further evidence of Mussel-

London, Aug. 4—Silver, 29 7-8; spelter, £26 13s.; lead, no quotations.

NELSON'S NEWS OF THE DAY

The regular weekly concert will be given by the band at the tramway park this afternoon from 3 to 5.

The city council will meet on Monday evening when the question of the delayed machinery for the city power plant will come up for discussion.

George H. Barnhart has been appointed agent of the Snowshoe Gold and Copper Mines, Ltd., which recently leased its Snowshoe mine at Phoenix, to the Consolidated Mining and Smelting company. Mr. Barnhart will inspect the weighing of ore and smelter assays and will generally safeguard the Snowshoe company's interests. Charles R. Hamilton of Rossland, is attorney in British Columbia for the company.

The committee in charge of the moonlight excursion to Pilot Bay, under the auspices of Nelson aerie F.O.E. to be held next Wednesday evening, will meet to make arrangements at Ringrose's store tomorrow evening at 8 o'clock. Irwin's orchestra has been engaged and there will be dancing on the large open air pavilion. The steamer Kokanee will take the party, leaving the city wharf at 7:15 sharp.

J. E. Taylor, convener of the 20,000 club's entertainment committee, is making a special effort to increase the Thursday evening dance attendance at the tramway park pavilion. Next Thursday those who go will be able to purchase tickets with car coupons attached good for two fares. Thme prizes for the best waltzers will be on exhibition tomorrow and Mrs. Briggs, mayor Gillett and captain Gore will act as judges. The following ladies have kindly consented to act as patronesses for this week's dance: Mrs. J. C. Gore, Mrs. T. G. Procter, Mrs. Herbert Fullerton, Mrs. Melville Parry and Mrs. H. C. Briggs.

Senator H. B. Miller of Osage City, Kansas, who came here to attend the annual meeting of the Second Relief Mining company, leaves for Denver this morning. Mr. Miller is a state senator in the Kansas legislature and has large mining interests in New Mexico and Colorado. This is his first visit to B. C. and he expressed himself as greatly pleased with the country and the people. He has other mining investments here under consideration and hopes to return to Nelson later in the year. The combination of mining, fruit farming, lumbering and the residential advantages to be had here appear to have struck the senator very favorably.

Two local ranchers had an altercation in a Baker street bar room yesterday afternoon, one, who is in bad health, had his face cut and badly bruised, while his assailant was subsequently badly punished by a third party, who was later arrested and released on bail. The matter will come up in the police court tomorrow.

SCHWENGERS LOSES CHAMPIONSHIP

Victoria, Aug. 4—Victoria won the intermediate lacrosse match from Vancouver by a score of 5-0. The game was a good one in spite of the score and wasw itnessed by hundreds of the blue jackets from the United States warships at Esquimalt. B. Schwengers was defeated in the B. C. championship tennis match today. to J. J. Tyler of Seattle.

A WELCOME CHEQUE

Albany, N.Y., Aug. 4—A cheque for $65,624.25 was received today at the state comptroller's office from Washington in payment of a claim filed by the state against the government in 1891. The claim is for interest on bonds issued in 1803, the money being advanced for equipment of troops during the civil war.

JUMPED INTO THE RIVER

Fredericton, N. B., Aug. 4.—Edward Bryan, a young St. John man who had been drinking heavily here the past two weeks, threw himself into the river last night and was drowned.

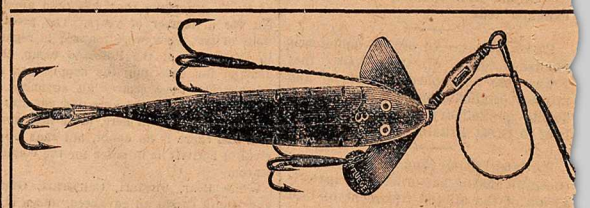
---

A Proposition to Ranchers

How much is it costing to clear your land?
Are you interested in a machine which will save you three-quarters of your time and money?

A machine which will clear land and leave no roots in ground.
A machine which will pay for itself in clearing five acres.
See me about it.

A. N. WOLVERTON
NELSON, B. C.



EVERYTHING IN FISHING TACKLE

We are closing out a lot of odd lines regardless of cost. If you want anything in Fishing Tackle call and see us. WE CAN SAVE YOU MONEY.

MAIL ORDERS SOLICITED.

NELSON HARDWARE CO.
Box 631 SPORTSMEN'S HEADQUARTERS NELSON, B. C.

A MONEY MAKER FOR SOMEBODY

We have for sale one of the best Fruit Ranches in this part of the country. This ranch lies opposite the C.P.R. shipyard, within 1 1-2 miles of Nelson, and contains over 47 acres of elegant fruit soil; 500 fruit trees planted, of which 200 are three years old; 100 which were planted this year, and 200 small fruit bushes, comprising raspberries, currants, gooseberries, etc. Also has a stream of water running through the premises and a frontage on the river of 300 feet. You can get this property at a bargain price.

TAYLOR & McQUARRIE
Baker Street P. O. Box 3 Phone 254
