FULL COURT DECISIONS

Giegerich Wins the Last Round in His Legal Battle

Nature's Testimony Decides Another Adverse Action—Holly Location Sustained at Victoria

Yesterday afternoon, S. S. Taylor, K. C., received a wire from Victoria that the full court had delivered judgment in Warring vs. Coleman and Newswander vs Giegerich, dismissing the appeal with costs in the first case and allowing the appeal with costs in the second. Mr. Taylor represented the successful party in each instance.

In the first action Thomas Warring, Fred Tattersall and William Tattersall, of Sandon, sued A. B. Coleman and Thomas A Noble, of Philadelphia, chief owners of the Ottawa mine at Slocan City, adversing the claims of the defendants known as the Alfred, Algiers and Aggie. The plaintiffs claimed to own the ground in dispute with the Holly claim, located October 9, 1900. The defendants' three claims above referred to, practically covered the ground of the Holly and were located October 23, 1902. The defendants claimed that the Holly location was invalid bceause at the time of location another claim, the Wallace, had been staked but admittedly not recorded, and had yet two days to run. On the other hand the plaintiffs claimed that the Wallace was a fradulently planted location, one and a half years before, whereas if a true location it should be five years old. The plaintiffs also claimed that in order to make good the defendants used the location lines of the Alfred and Algiers and carried to the ground an old tree post taken from some other claim. The defence set up was following the facts as stated by F. G. Carlyle, locator, now of Spokane, who sold the three claims to the Ottawa people. The trial came off in Nelson before Morrison, J., without a jury, on May 29 and 30, 1905. Mr. Taylor's clients the plaintiffs, won, but the proceedings were deeply interesting inasmuch as there being a direct conflict of testimony as might be expected, the plaintiffs succeeded in proving the truth of their contention, and of necessity the falsity of the defendants through the mute statement of nature as translated into evidence from the bark of blazed trees, the effect of weather on the writing on the claim posts, the actual position of the "planted' tree post below ground, the recent sharpening of one stake and other such unmistakeable facts, which fixed doubtful dates beyond question, established the plaintiffs' claim and swept away the defendants' contention.

The defendants were not, however, satisfied with the finding of Mr. justice Morrison at the trial and appealed to the full court. The appeal was argued by W. A. Macdonald, K.C., for the defendants, appellants, and S. S. Taylor, K.C., for the plaintiffs, respondents, on April 5 and 6 last, before the chief justice and justices Irving and Duff. Yesterday the full court's judgment was given, upholding the finding of the trial judge in favor of Mr. Taylor's clients, the plaintiffs, and dismissing the defendants' appeal with costs.

The second case referred to is possibly the last chapter in the history of a very long drawn out piece of litigation, the case in one shape or another having been before the courts for years, Henry Giegerich, of Kaslo, Mr. Taylor's client, now coming out on top.

The case now known as Newswander vs. Giegerich, was really commenced on November 10, 1900, when R. P. Briggs sued Samuel Newswander for damages for the non-carrying out of an agreement of sale, and for the return of two claims. Briggs claimed that he sold to Newswander under two agreements the Two Kids and the Monarch mineral claims on the South Fork of Kaslo creek, Newswander agreeing to incorporate a company to work the claims, to give Briggs a fair proportion of the company's shares and $500 in cash. Newswander, who purported to act only for himself, in his own name, allowed, it was claimed by Briggs, the Two Kids and the Monarch claims to lapse and relocated them as the Cork and Dublin and subsequently crown granted these. He then refused to carry out his agreement, and Briggs brought suit as stated. The case was tried in Nelson in May, 1901, by Irving, J., who dismissed the action, but without costs, holding that the agreements relied on were of such a nature that the court could not enforce them, but that as Newswander had not acted fairly he would be allowed no costs. Briggs then appealed to the full court and his appeal was dismissed for the reasons given by Irving, J., at the trial, and Briggs appealed to the supreme court of Canada at Ottawa, where he succeeded, hands down, being awarded a quarter interest in the Cork and Dublin claims and full costs of all litigation.

But this was not the end of the story or of the litigation. While the suit just recounted was tediously finding its way to Ottawa, Newswander sold out to J. J. Fleutot, who when called on refused to carry out the terms of the judgment rendered by the supreme court of Canada. Briggs in the meantime sold out to Henry Giegerich, of Kaslo, and Giegerich, with Briggs as a party, brought action against Fleutot to recover what had been granted by the Ottawa court. Fleutot pleaded that Giegerich could not recover what he bought from Briggs because he, Giegerich had "maintained" Briggs in the previous litigation against Newswander, by putting up costs for Briggs in return for getting a share in the property. At the trial Giegerich and Briggs succeeded before Martin, J. On an appeal to the full court, that august body allowed Giegerich all that he bought and paid for from Briggs, but not what he got as a bonus for assisting in litigation. Both sides appealed to Ottawa and both appeals were dismissed by the supreme court.

Newswander then sued Giegerich for damages resulting from the latter's assisting Briggs in former litigation. The case was tried in Nelson before Duff, J., with a jury on February 13, 14 and 15. In all 14 questions were submitted to the jury and on their findings both parties claimed a victory, but Duff, J., decided in favor of the plaintiff, awarding Newswander $5361.78 damages and costs. Giegerich urged that as Newswander lost in Briggs' action against him, that he, Newswander, could not claim he suffered any damage through Giegerich assisting Briggs, and that if Newswander was allowed damages under such conditions it would be equal to giving him damages for his attempt to perpetrate a wrong on Briggs, the supreme court having held that he was wrongfully dealing with Briggs' property. It was claimed that Fleutot was the real litigant and that Newswander, a man of straw, was merely used for a purpose from the very beginning, acting as a blind for Fleutot. That the damages awarded Newswander were made up of the costs, really and admittedly paid by Fleutot.

The full court composed of the chief justice and justices Irving and Morrison, heard Giegerich's appeal at Victoria on June 4, 5 and 6, last, and gave their decision yesterday, allowing the appeal with costs, dismissing Newswander's action with costs. The learned chief justice, dissented from the finding of the full court but to what extent or upon what grounds is not yet known, the telegram to Mr. Taylor not giving these particulars.

All through this long litigation S. S. Taylor, K.C., has acted for Mr. Giegerich. R. M. Macdonald appeared for Newswander, and E. P. Davis, K. C., acted as senior counsel on the appeal.

ARE NOT AT ALL ANXIOUS

NEWFOUNDLANDERS ARE INDIFFERENT TO CONFEDERATION

FORMER ADVANCES TO CANADA NOT WELL ENOUGH RECEIVED

Toronto, July 31.—"Though I talked with a number of public men, I failed to discover any strong pro-confederation sentiment," said Rev. Dr. S. D. Chown to a Globe reporter on his return to Toronto, in speaking of his visit to Newfoundland in company with Rev. Dr. John Potts. "A few public men believe in it as an aspiration, but none seem to think it is yet within the realm of practical politics. They feel that their previous advances to Canada at the time of the great commercial crash 13 years ago did not receive the consideration they deserved, and they will be slow to make further proposals. The Canadian government by offering to subsidize a fourth cross-country train during the week is going about it the right way and ultimately such treatment may produce favorable results. The large business men of the place feel that their present situation yields the greatest financial advantages, inasmuch as they now have competition between Great Britain, the United States and Canada for their market, and they feel that if the competition of the two former were shut off by a tariff wall similar to that existing now between Canada and other countries, their business interests would suffer. There is no particular sentiment in thecase; the ideals of the people being tinged with English sentiment rather than Canadian. Their educational system prepares for matriculation into London university, and they are somewhat disposed to discount the value of Canadian educational advantages."

BIG ONTARIO DIAMOND.

Sturgeon Falls Man Finds a Gem Worth A Fortune.

Montreal, July 31.—According to Rev. father Paradis, who is well known as a New Ontario colonizer, Mr. Adolpe O. Aubin, M.P.P., of West Nipissing, and merchant of Sturgeon Falls, Ont., has in his possession a stone which is believed to be one of the largest diamonds in the world. This stone was secured from a man who found it in the Lake Nipissing district.

A gem of its size represents a colossal fortune, and if the stone is really a diamond, Cobalt and the Yukon will pale into insignificance in comparison with Nipissing. Prospectors will pour in by the thousand, and the face of the Nipissing district will be scarred from one end to the other by the searchers for wealth. The "Nipissing diamond" will rank among the great finds of the world; it will compare favorably with the enormous half pound stone known as the "Cullinan diamond" found in the Premier company's mines near Pretoria, in South Africa.

CANADA'S OUTPOSTS

Halifax, July 31—The steamer Adventure, chartered by the dominion government to carry major Moody and the Northwest Mounted Police to Hudson bay station, sailed this evening.

SCENE IN COMMONS

Debate on the Transvaal Provokes Heated Words

Premier Campbell-Bannerman Charges Mr. Balfour With Lack of Patriotism

London, July 31.—Winston Spencer Churchill, parliamentary secretary of the colonial offices, today outlined in the house of commons the government's proposal regarding the constitution to be granted to the Transvaal. The question came up in committee on supply during a discussion on the question of the colonial secretary's salary. The guiding principle, he said, would be not to make any differences between Briton and Boer, but to extend to both the fullest privileges of British citizenship. All males 21 years of age who had resided in the Transvall would be entitled to vote. It is the intention to give the Rand 32 seats, Pretoria six, Krugersdorp one, and the rest of the Rand 30 seats. The members of parliament will be elected for five years and will be paid for their services. For the first parliament there will be a second chamber of 15 members, nominated by the crown. During the first session arrangements will be made for an elective second chamber. The constitution will contain a clause abrogating the Chinese labor ordinance after a reasonable time. The receiving of Chinese labor will cease entirely November 1.

An animated debate followed the closing of Mr. Churchill's remarks. Alfred Lyttleton, former colonial secretary, said he thought the proposal premature coming as it did only four years after the war. Mr. Balfour declared it to be a reckless and audacious experiment. He argued that it was too near the war to expect the Dutch to forget what they had suffered and more than human nature could grant to expect them to be loyal to Great Britain. He declared an explanation of this hurried procedure was the government's burning desire to get rid of all its economic questions in South Africa which its rash pledges of a general election had brought upon it.

Sir Henry Campbell-Bannerman, the premier, answered that never in the course of his parliamentary career had he listened to a more unworthy, mischievous and unpatriotic speech. An exciting scene followed, the unionists shouting "Shame," "Gag," "Apologize," "Withdraw," etc., but the chairman promptly called a decision on the question of the colonial secretary's salary which was carried 331 to 83.

While this was transpiring in the commons, lord Elgin, secretary of state for the colonies, made a similar statement in the house of lords. While Mr. Churchill was praising the new constitution, his cousin, the duke of Marlborough, who was colonial secretary under the late government, was denouncing it in the upper house.

Lord Harris asked what flag would wave over Pretoria 20 years hence. Lord Milner declared he saw a tragedy behind the precipitancy of the government and feared that the future of the Transvaal was to be left to chance. Lord Lansdowne said there was a dread in the minds of most men that the Boers would gain the upper hand in the elections and then bid good bye to British supremacy.

WHAT IS HIS REASON?

Doctor Goes North to Spend a Year Waiting For Others.

Edmonton, Alta., July 31.—Dr. Cenoit, late of Montreal, left this morning with a party of mounted police for the north. The police will accompany him as far as the landing and the doctor will continue his journey by way of Lesser Slave lake and Dunvegan to Fort St. John, B. C., on the Peace river. There he intends remaining for a year or more, to await the arrival of the party of mounted police who are now engaged in breaking a road from Dawson City to Athabasca Landing. The doctor will then accompany them to Edmonton. The trip north to Fort St. John will occupy several weeks, the distance being 400 miles. It is expected that the doctor will be absent nearly two years.

SUMMER ASSEMBLY

Addresses by Mr. Stackhouse and Dr. Northrop—Today's Meetings

At the afternoon session of the Baptist summer assembly yesterday Rev. W. T. Stackhouse spoke on missionary work and thrilled his audience by his picture of the Higher Life under the impetus of the missionary effort.

At the evening session Rev. Dr. Northrop spoke on "A Cloud of Witnesses," showing that the great men of today and yesterday all believed in Jesus Christ and the inspiration of the Word. "There is not a great man, a great scientist, statesman or author who is not a believer. It is expected that ministers should uphold the gospel, for it is their bread and butter to do so, but men who have nothing to gain from that standpoint are faithful witnesses for Christ." Dr. Northrop quoted from scores of statements made by the leading men of the last 400 years, showing how their faith in Christ was the motive power of their lives. He threw out the challenge that a truly great man could not be named who was not also a believer.

Mrs. Northrop sang a beautiful solo, "The Life of Faith."

Dr. Northrop wants all boys under 15 years of age admitted free to the lecture on Friday evening.

This afternoon Mr. Shanks will speak on "Higher Education and Christian Giving," and this evening Rev. C. Padley will preach.

BOUNDARY TELEPHONES

SUPERINTENDENT KENT IS PLANNING EXTENSIONS

COMPANY WILL SPEND LARGE SUMS ON IMPROVEMENTS

(Special to The Daily News)

Phoenix, July 31—H. W. Kent of Vancouver, secretary of B. C. Telephone company, is making a tour of the Boundary, inspecting the new work being done in this section since his last visit, and planning for considerable new work which the company may undertake in the near future. Mr. Kent spent yesterday in Grand Forks and Phoenix, is in Greenwood today and will be in Rossland tomorrow, being accompanied on the trip by George C. Hodge of Nelson, district superintendent for the company.

It is more than four years since Mr. Kent last visited this section, and in that time his company has probably spent some $25,000 in bettering the service here, including the entire rebuilding of the lines in Phoenix, as well as doing the same with the main service line from Cascade to Greenwood. At present work is just being started on rebuilding the system in Greenwood, after which the same thing will be done in Grand Forks, the two probably costing another $25,000.

When these two exchanges are rebuilt the entire system in the Boundary will be in first class shape throughout, and will represent an outlay of something over $50,000 for renewals alone—a tribute to the importance placed upon this section by the directors of the company. In the early days of this section the company had anything but an easy time, as there were then three independent telephone companies operating here, but by the law of the survival of the fittest, the B. C. Telephone company is the only one now doing business here.

Asked as to whether the company contemplated any extensions, Mr. Kent stated that it was possible that a line would be constructed direct from the Boundary to Rossland, instead of detouring into the state of Washington, via Bossburg and Northport, as is now the case. This requires using another company's lines across the international boundary line, giving that company the lion's share of the tolls, and worse than all, entails delays in repairs when the lines happen to be down in times of storms or otherwise.

Mr. Kent is now looking into the feasibility of building the new line, which must cross two mountain ranges, with not only the initial expense in construction, but the expense of upkeep in the winter months over a route travelled by no one but linemen on duty. The distance from Cascade to a Rossland connection is about 20 miles as the line would go, and would cost several thousand dollars, but the advantages are so manifest that Mr. Kent will doubtless strongly advise it to his board of directors for their favorable consideration. If built it will reduce the cost of telephonic communication between the Boundary and the Kootenays materially.

BORDEN'S STUMPING TOUR

Opposition Leader Planning a Fall Campaign

Ottawa, July 31—R. L. Borden, who has just returned from Halifax, is considering a number of invitations to address public meetings in various parts of the dominion. So far he has made only two or three positive engagements, perhaps the most important of which is for the grand demonstration at Sydney Mines, N.S., on Sept. 3, at which 8000 people are expected to be present. Mr. Borden while in the east will probably deliver several addresses in the Maritime provinces.

The opposition leader will return to Ottawa about the middle of September and commence a series of meetings in Ontario and Quebec, the dates for which have not yet been arranged. One of the contemplated meetings will be in western Ontario and two in the vicinity of Toronto.

Mr. Borden has been requested to visit the Pacific coast, but it is hardly possible that he will be able to accept, owing to his numerous engagements.

DAVIS IS SENTENCED

Goes to Jail for Three Months and Pays $100 Fine

(Special to The Daily News)

Grand Forks, July 31—In the police court this morning George Davis, who badly damaged William Hoffman's collar bone, with a long knife on Bridge street early last Friday morning was sentenced to three months at hard labor in the common gaol at Nelson and in addition will have to pay a fine of $100, and in default of payment of said fine, shall be imprisoned for a further term of three months. The hearing of the case in the police court did not occupy much time, the accused pleading guilty to a charge of "wounding with intent to kill." E. Miller represented the prosecution, while A. C. Sutton acted for the defense. Chief of police A. E. Savage will escort Davis to the gaol at Nelson tomorrow.

BROTHIER STAYS IN JAIL

Attorney General Refuses to Take His Money as Bail

Vancouver, July 31—The attorney general has declined to accept Brothier's money, the $3000 cash he offered as a substitute for one of the two sureties judge Henderson directed him to find "to the satisfaction of the registrar." The attorney general says it would be against all precedent to accept such an offer in lieu of a surety.

GARRISON MUTINIES

Russia's Gibraltar is in the Hands of Rebel Forces

Fortress of Sveaborg Captured by the Insurgents After a Bloody Struggle

Helsingsfors, July 31.—A gigantic military conspiracy aiming at the simultaneous capture of Russia's three great sea fortresses, Cronstadt, Sveaborg and Sebastopol, was sprung prematurely here last night by attempts to arrest members of a company of sappers who had mutinied on account of the death of one of their comrades, alleged to have been due to ill treatment. The entire garrison of the fortress at Sveaborg flamed out intstantly in revolt. The artillerymen and sappers garrisoning the place were involved. Only four companies of infantrymen remained loyal. The mutineers seized forty machine guns and practically all the quick-firers and light artillery but even with this aid, they were unable to hold the main fort against the loyal infantry. The fighting continued all night long. The heaviest firing was from 10 o'clock in the evening till 5 in the morning.

This morning a detachment of civilian revolutionaries seized the marine barracks on Skattuddon island, hoisted the red flag and were joined by all the marines. Nine cruisers, torpedo boats and destroyers lying in the harbor opened fire on the barracks. Torpedo boats and destroyers which were lying close to the shore, steamed out and joined in the bombardment. Finally, towards the morning, the firing ceased and the authorities announced that the barracks had been captured.

At 1 p.m. the Cossacks cleared the square in front of the palace facing Sveaborg and drove the public from the entire water front to prevent the sending of assistance to Sveaborg. The exact situation at Sveaborg is not known. Firing can no longer be heard. Rumors are in circulation that the fortress now has entirely fallen into the hands of the insurgents. It is believed that this cessation of fighting is but a prelude to the renewal of the battle between the mutineers and troops. The casualty list on both sides must be high.

All day long a small steamer has been transporting the families of officers to town. The women and children were in a pitiable condition.

The position on Skatudden island is in favor of the mutineers who commanded the entire island until 8 p.m. At this hour the sailors were yielding. Many of them were deserting. The squadron including the battleship Slava is reported to have sailed from Revalic yesterday afternoon.

The telegraph building at Sveaborg is reported in ruins. The barracks and cathedral there are badly damaged by shells from 11-inch guns. The townspeople fear a bombardment should the squadron arrive.

Horrible scenes occurred during last night when the fierce fighting was continued. The heaviest artillery was used during the conflict. Several officers were killed or wounded. The wounded were transported to Helsingfors. Colonel Nataroff was bayonetted. He begged in kindly tones for transportation to the hospital, promising forgiveness in exchange. Instead he was thrown into the water with a stone tied around his neck.

St. Petersburg, Aug. 1.—(1 a.m.)—No report of the suspension of the great revolt of the garrison at Sveaborg fortress, the Gibraltar of the north, has been received in St. Petersburg up to this hour. The secondary uprising among the marines and troops stationed at Skatudden barracks on the peninsula communicating with the mainland was crushed out at a late hour yesterday afternoon by loyal troops after heavy fighting in which nine cruisers, destroyers and torpedo boats participated. The sound of firing on the islands and from the fortresses has ceased and in spite of the fact that the occupation of the entire water front by Cossacks prevents the obtaining of positive news, it is understod at Helsingfors that the mutinous artillerymen and sappers are still holding their positions. The outlying islands and the fortress are still believed to be in their possession and they practically have all the machine guns, quick-firers and movable artillery of the fortress. General Laiming, the commandant of the fortress, is heading on to the main forts on Commander island with a force of loyal infantry. A general strike was declared in Helsingfors by socialists workmen today.

Sveaborg is a strong fortified town of Russian Finland, situated on seven islands in the gulf of Finland immediately southeast of Helsingfors. The islands, which are connected by pontoons, form the site of a fortress which defends the harbor of Helsingfors and consists of numerous military works and batteries and a military arsenal.

St. Petersburg, Aug. 1.—This despatch has just been received from Helsingfors, dated July 31, 2 p.m.: "A hundred revolutionists armed and half uniformed have just marched to the socialist club. They demanded that the socialist "Red Guard" mobilize and help relieve the thousands of marines who are held in Skatudden barracks. The chiefs of the Red Guard are undecided whether to commence an armed uprising, as many of the population are out of sympathy with such a movement. The authorities apparently are paralyzed by the suddenness of the revolt. They were quite in ignorance as to which troops could be depended upon. Two officers were killed at Skatudden by marines today before a large crowd of civilian sympathizers.

TEMPLEMAN IS BUSY

MINISTER IS REORGANIZING THE GEOLOGICAL SURVEY

INTENDS TO MAKE IT OF PRACTICAL USE TO MINERS

(Special to The Daily News)

Ottawa, July 31—With a new minister and a new director the public will expect to see something doing in the geological survey during the immediate future. The survey has done great work in the past, it is true, but it has been largely along lines of purely scientific work rather than in economic geology, and therefore the results of all the large expenditure during the past 30 or 40 years, valuable as it undoubtedly has been, has not appealed to the hard headed practical men who have been responsible for the discovery and incipient development of nearly all mines now operating in this country.

The experienced "prospector" is seldom a geologist, although he possesses knowledge of rocks and ores and formations and placers, as well as of woods and mountains and at the same time the knowledge of how to face and overcome difficulties, that is even of greater value to him than a certificate of competency as a geologist from Toronto university would be if unattended by the practical qualifications that all successful pioneers in mining have possessed.

The geological survey can be made of enormous value to the industry which is growing, perhaps, more rapidly than any other. By becoming more practical it does not need to sacrifice or impair the scientific value of the work it is doing, but it can bring its scientific knowledge to the assistance of an enterprise that above all others requires aid of that kind, one in the forefront of all Canadian industries. A little more knowledge of geology on the part of the working miner and mine owner and a little more knowledge of the practical or economic side of mining by geologists of Canada, is what is wanted in this country.

It is possible, now that the geological survey has been taken away from the interior department where it was a little thing among big things, and given to the minister of inland revenue, who represents the great mining province of the dominion, and now that there is a new director at its head, that better economic work will be done than ever before.

Director Low leaves for British Columbia this week to look into the work being done there. It is understood that the place formerly filled by the director has been tendered to R. W. Brock, who is one of the most capable and efficient officers of the department. Mr. Brock was appointed to the permanent staff on May 4, 1897 and acted during the season as assistant to one of the field parties in British Columbia. In 1898 he was given charge of a field party in West Kootenay, and since then has geologically examined West Kootenay, East Yale, the Boundary creek, Lardeau and Rossland districts. The work of Mr. Brock in these districts has met with the highest praise from the local mining communities and his advice and judgment is readily accepted in all important mining problems in British Columbia. Mr. Brock has received the degree of M.A. from Queen's, Kingston, and has taken a post graduate course in geology under Prof. Rosenbusch at Heidleberg, Germany. During the past year he has acted during the winter as instructor of mineralogy, mining and assaying and as a professor of geology at Queen's. He now wishes to devote his entire attention to the duties in the department.

The department of inland revenue has issued a bulletin from government analyst McFarlane on the analysis of canned meats in Canada. In all 322 samples were collected from all over Canada. The collection was not confined to Canadian packed goods, but also included samples from the United States. Of the 322 samples only four were found to give evidence of decomposition, the proportion amounting to a little over 1 per cent. The preservatives sought for were salicycle, benzoic, sulphuric and borasic acids, but only the last named was detected in a small number of samples. The quantity did not exceed the limit fixed by the English parliamentary commission. Like Canada's salmon pack, the canned meat has been found very satisfactory.

The census shows Calgary's population as 11,937, compared with 4091 in 1901, and Edmonton, 11,534, compared with 2626 in 1901. Other western towns and districts show very substantial increases.

SCOTT GETS CONTROL.

Transfer of Titles to Saskatchewan Nearly Completed.

Ottawa, July 31.—Premier Scott of Saskatchewan, while in Ottawa, obtained final arrangements for the transfer to his province of the land titles system and offices, and of the public institutions and buildings, including the jails at Prince Albert and Regina, government house at Regina, and all the court houses in the province. These have been assessed as worth roundly, $213,000, which sum the province will pay in five equal instalments. The necessary order in council repealing the old dominion land titles act and transferring the land registration system has been passed, but the necessary advertisement of the order in four issues of the Canada Gazette will delay the actual transfer to September 1.

SHATTERS RECORDS

C. P. R. Train Travels at Rate of Fifty Miles an Hour

Van Horne's Special Covers the Prairie at a Speed Never Yet Equalled in Canada

Winnipeg, July 31.—The C. P. R. has established a new long distance speed record for western lines. Yesterday it made a run of 399 2-10 miles in eight hours flat, including stops. The train which made this record was a special carrying sir William Van Horne, William Whyte and G. J. Bury, and consisted of a baggage car and the private cars Saskatchewan and Manitoba. The run was between Winnipeg and Moosejaw, and the stops included water stops and change of engines at Brandon and layover for all east bound passenger trains. This means that an average speed of more than 50 miles an hour was maintained through the whole distance. The run from Winnipeg to Brandon was made in two and a half hours, the distance being 133.1 miles; between Kirkella and Broadview, 52 miles, an average of 60 miles was maintained. From Broadview to Moosejaw, 134.6 miles, the run was made in two hours and a half elapsed time. This speed has been rendered possible by the improvements which have been carried out on the main line within the last few years, including heavier steel and better roadbed.

The clearings for July amounted to $42,362,170 as against $31,900,309 for the corresponding month of last year and $24,824,509 for 1904. The gain of July, 1906, over July, 1905, is $10,361,801 or 31.85 per cent. This is slightly better than the average gain for the first seven months of the year which is $9,713,889 but lower than the rate of increase shown by June 1906, over June 1905. The substantial character of the gains made each month do not show very much variation and the prospects are that the last five months of the year will show proportionately larger increases. It is more than possible that more banks and branches will be in operation before the end of the year and this will tend to swell the volume. The gain for the year up to the present time is 38.17 per cent and at the end of the six months period ending June, it was 30 per cent. For the first seven months of 1905 and 1906 the record of clearing follows:

	1905	1906
January	$26,276,195	$35,506,258
February	20,452,960	26,272,877
March	23,404,817	31,261,834
April	22,646,778	38,959,258
May	26,790,247	69,026,206
June	26,634,587	37,813,102
July	31,900,309	42,262,170
Total 7 months	$178,100,891	$246,101,505

BIG EXCURSION COMING

SPOKANE BUSINESS MEN WILL VISIT NELSON.

BAND WILL ACCOMPANY THE TOURING CROWD.

(Special to The Daily News)

Spokane, July 31.—This year's excursion of business men of Spokane will be over the S. F. & N. into southern British Columbia, touching Phoenix, Republic, Rossland and Nelson. It will require three nights and two days to make the trip. The purpose of the trip is to get in touch with towns in this region and to advertise the interstate fair in Spokane during the two weeks beginning August 26. Fair literature will be distributed and a band of at least 15 pieces will accompany the party.

Half a day will be spent in going on the boat from Nelson to Kaslo. Permission will probably be secured at Rossland to go down into the Le Roi mine, but the feature of the trip will be the ride from Nelson to Kaslo on Kootenay lake. There will be at least 100 business men on the excursion and there may be 150. Four Pullman sleeping cars and a combination baggage and smoker will make up the train.

No diner will be taken as schedule has been so arranged that meals can be taken at various towns. All the towns will be notified in advance of the coming of the excursion and supplied with schedules.

From Republic to Nelson the run will be made during the night. The party will arrive at 7 a.m. spending three hours before taking boat up Kootenay lake. Kaslo will be reached at 1 p.m. and after an hour for lunch the return trip will be made and Nelson reached at 5 p.m.. The train will leave Nelson during the night so Rossland may be reached at 5 a.m., where half a day will be spent.

JUDGE SEDGEWICK ILL

Halifax, July 31—Justice Sedgewick of the supreme court of Canada, who is at the home of a relative here, is critically ill and his physicians have faint hope of his recovery.

THE SPOILS SYSTEM.

The dismissal of Mr. Bastedo, the deputy commissioner of fisheries, by the Ontario government at the instigation of certain party heelers, has occasioned a great deal of discussion in the eastern papers. A writer in Toronto Saturday Night sums up the situation dispassionately and in the course of his comments fully exposes the rottenness of the extreme partisanship that demands the dismissal of tried officials simply because they happen to have been appointed to, or held office under a defeated party, a form of partisanship not peculiar to either of the great parties, but one that must be stamped out if Canada is to secure the services of efficient civil servants. The writer says:

"Mr. Bastedo has walked the plank. On the report of the commissioner appointed to investigate the charges of partizanship laid against him, he has been dismissed by the Ontario government from his position as deputy-commissioner of fisheries for the province. The whole solemn and formal procedure of investigating Mr. Bastedo's partizanship looks like a bluff. The evidence was pretty fully published in the daily press, and there was mighty little in it. Mr. Bastedo, it is true, had been unable during his many years in office, to administer the fisheries and remain unaware of the fact that the reform party was in power. The news would be broken to him in more ways than one. Members would write to him, cabinet ministers would speak to him, party workers would call on him as being one not an enemy to the party in power, and urge applications for licenses. In all Canada the auditor-general at Ottawa is the only public official I know of who even pretends to ignore the dominance of a party, and he is fortified and upheld by special legislation. The evidence against Mr. Bastedo did not warrant his dismissal, or if it did, all public officials may be dismissed whenever one party quits office and another comes in. Mr. Bastedo was marked for dismissal. He was in charge of considerable patronage that the Liberals used to influence, and that the conservatives have influenced since the change. Nobody expects that Mr. Bastedo will be succeeded by some saintly person who will refuse to know which party is in power, and, in fact, all that Mr. Bastedo did and perhaps all that he was accused of doing, will be done right straight along at the old stand. There is not a lead pencil bought for use in any department in the legislative buildings, there is not a license granted in the province, whether it is to catch fish or sell peanuts, without patronage being made of it if that be possible. If a porter up at the buildings needs a man to help him unload trunks at the side door, he tells a clerk, who tells a head clerk, who speaks to a deputy, who consults his minister, and he names the man. This is not new. It has been the practice. It will be the practice while party government continues. Without it, what the dickens would become of party government?

Politics is the cruelest game played by white men. For 26 years Mr. Bastedo has been in the public service, and he has done much to organize and work out the system of fish protection that we have in Ontario. No doubt he was hampered much by the very politics he is now accused of having furthered. Yet in ransacking all those years nothing could be found against him but accusations that proved vague and vanishing, or those that are the common happenings of departments under party rule. For 26 years Mr. Bastedo has been paying one month's salary each year into a fund in which he was to share on his retirement—but he is dismissed, and can get no share in this fund. The costs of his defence he must pay out of his own pocket. He has been fired. He will be succeeded by a man who, if he doesn't do what Bastedo did, will be fired for not doing it. But you can't make an omelette without breaking eggs."

DISCRIMINATING LADIES.

Enjoy Using Herpicide on Account of Its Distinctiveness.

The ladies who have used Newbro's Herpicide speak of it in the highest terms, for its quick effect in cleansing the scalp of dandruff and also for its excellence as a general hair-dressing. It makes the scalp feel fresh and it allays that itching which dandruff will cause. Newbro's Herpicide effectively cures dandruff, as it destroys the germ that causes it. The same germ causes hair to fall out, and later baldness; in killing it, Herpicide stops falling hair and prevents baldness. It is also an ideal hair dressing, for it lends an aristocratic charm to the hair that is quite distinctive. Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

NEW CURE FOR CONSUMPTION

Dr. George A. Brown, of Montreal, physician to the Montreal dispensary, has submitted for the consideration of the medical profession what he terms a new iodine cure for consumption.

A demonstration of cases is to be given before the British Medical congress, which meets in Toronto this month. It is said that some hundreds of cases are now being treated in Montreal by this method and the results are regarded as gratifying and promising.

Dr. Brown employs iodine in a rather unusual way in the treatment of tuberculosis. He injects a solution in which iodine is held in suspension, the place of application being the shoulder joint.

Dr. Brown has used this method for a number of years, invariably with success. He was induced to make it after reading Krause's monograph upon iodoform in the treament of tubercular joints. Since last February this method of treatment has been adopted by a number of physicians with results, it is stated, no less satisfactory than those obtained by Dr. Brown himself.

The preparation is made according to the following formula: "Precipitated iodoform, which contains 97 per cent of iodine, 100 grains; acacia powder, 25 grains; glycerine, 200 minims; carbolic acid, 5 minims; boiled distilled water, 300 minims."

This method is said to be efficacious not only in affectations of the joints, but in tubercular conditions in the lungs as well, and, in addition to the local effect it has a constitutional action.

EDITORIAL NOTES.

A favorite idea among certain politicians in Washington, says the Montreal Witness, is that the Americans who are crowding into the new provinces will declare for annexation. Those who are best acquainted with these settlers give no encouragement to this notion. These immigrants have found the laws and institutions of Canada all that respectable people could desire. They have also found that the distinctive principle of Canadianism, respect for the law and constituted authority, evenhanded, prompt administration of justice, religious freedom and free education for everybody, prevail throughout the land they have come to, and they are content to accept conditions measurably superior to those they have left behind.

An interesting and successful experiment in loan flotation has just been made by the Ontario government. Instead of offering its last issue of bonds aggregating three million dollars to the British investing public according to the usual custom, it decided to try and place the issue with Canadians. So successful was the experiment that fully half of the loan has already been subscribed. The day will soon come when Canadian government will be able to do all their financing at home— and when Canadians will be in a position to help finance other governments. Ontario's example is an object lesson for the finance ministers of other provinces.

Lacrosse men of the west will note with mingled feelings of satisfaction, surprise and sorrow the tremendous slump taken this year by the once famous Shamrocks of Montreal—the greenshirted twelve that has for years defied and conquered all comers. During the present season the Shamrocks have lost four straight games and the team is now down near the bottom of the championship list. The Minto silver is at last in serious danger.

SUNDAY SCHOOL PICNIC

Treat in Store for Children of St. Saviour's, Church on Thursday

The annual picnic of the Sunday school of St. Saviour's church will be held to Procter on next Thursday, Aug. 2. The steamer Kokanee will leave the city wharf at 9:15 a.m. and 2 p.m., and returning will leave Procter at 7:30 p.m. The city band will be in attendance and a pleasant program of games and sports has been arranged.

Tickets, $1 for adults, and 50 cents for children, may be obtained at the store of Fred Irvine and company, or from any member of the Sunday school. The scholars of the Sunday school will be given free tickets provided they are present in Sunday school to receive them on Thursday morning, not later than 8:45.

Those who are kindly furnishing provisions are requested to send them to the mission hall before 8:30 Thursday morning.

ANNUAL OUTING

Members of Launch Club to Make an Illuminated Display

Two years ago the members of the launch club held a very successful outing to Mr. Busk's ranch and everyone will recall the illuminated parade and display of fireworks in the harbor after the picnic was over, and as the fleet reached home. Last year for some reason, or without any reason, there was but little enthusiasm manifested over the outing, and stormy weather encountered still further prevented the repetition of the previous year's success.

The commodore and officers are anxious to have a well attended picnic and a fine illuminated display to wind up with this year and with this end in view, members of the club are being sounded in the matter to ascertain their views. If a good attendance is guaranteed, a meeting will shortly be held to arrange a satisfactory program.

MILLINERY, COSTUMES, DRESS SKIRTS

We are Clearing Out Our Summer Lines of Millinery, Costumes, Dress Skirts and, in Fact, all Our Summer Stock of New Goods.

We never carry over any of our stocks from season to season. We prefer to clean out all our lines twice a year and put in a complete new stock. We have a fine line of summer goods now on hand and as our fall stock will soon be arriving, these must be cleared out at once. We are going to cut the prices and every day will be bargain day. Don't delay but come early while the lines are complete.

WHAT DR. F. H. TORRINGTON SAYS

THE MASON & RISCH PIANO CO., Ltd., Toronto, Ont.
Gentlemen—Permit me to express my congratulations to you upon having succeeded in making perfect pianos, such as have been used at the Toronto Orchestral concerts during the past season. I have heard delight expressed by those who have heard or performed upon them.
Sympathetic tone and touch, a perfect mechanism and full sonorous tone of beautiful and satisfying timbre, are amongst the characteristics of the splendid instruments you have so kindly supplied for the concerts given under my direction. I am yours faithfully,
F. H. TORRINGTON.

No one is better qualified to speak than Dr. Torrington, Principal of the Toronto College of Music, and Conductor of the celebrated FESTIVAL CHORUS, his experience with Mason & Risch Pianos having been extended over the past thirty years. He speaks in no uncertain voice.

Mason & Risch Pianos are sold on easy terms. Call at our show room and have our easy purchase system explained to you.

TEN MILLIONS TO GIVE AWAY

Applications for Mrs. Sage's Money Should be Sent in at Once

New York, July 31—The times says today: From a source seemingly reliable came the announcement yeterdasy that Mrs. Margaret Olivia Sage, the widow of Russell Sage, intends to distribute ten million dollars to charity as soon as her friend, Miss Helen Gould, returns from Europe. Mrs. Sage, it was said, believes that Miss Gould is able to give her some valuable advice as to how to distribute her money advantageously. The nephews and neices of Mr. Sage, who heard this story declared that it probably was true as Miss Gould and Mrs. Sage has for years been working together along lines of philanthropic work laid out by Miss Booth.

It is now said that the Sage relations have no intention of contesting the will at present and they will sign waivers of citation so that the will may be probated on September 21. Then after each of them receive the $25,000 alloted to them, a meeting of the legatees will be held. At this meeting action may be taken toward organizing an association for the purpose of raising funds to carry on action in the supreme court for the purpose of setting aside the will. That is the program planned by certain relatives of Mrs. Sage, who are not satisfied with a $25,000 legacy. They have hinted that if Mrs. Sage guarantees to give an additional $75,000 to each nephew and niece, there will be no legal fight, but the attorneys for the executors are not in favor of making any such settlement.

Mrs. Sage's brother, Col. J. J. Slocum, said yesterday that Mrs. Sage would remain at her home in Lawrence, L.I., until after the will had been probated.

REFUSES TO PAY INSURANCE

San Francisco, July 31—The Trans-Atlantic Fire Insurance company of Hamburg, Germany, has refused to pay San Francisco insurance claims approximating $4,000,000. The following statement was given out last night by the local officials of the company: "The Trans-Atlantic Fire Insurance company denies liability upon the ground that the losses were from an overwhelming catastrophe due to a visitation of providence, for indemnity against the consequences of which the policy never was intended to provide and does not provide."

MINING RECORDS

At the mining recorder's office on July 31, certificates of work were granted to C. C. French on the Big Patch and to F. D. Le Mieux on the Santiago fraction.

A. H. Anderson recorded the Gold Plume at the head of Clearwater creek.

L. J. Winslow recorded the Wonder on Quartz creek, three miles west of Ymir.

SOLDIER KILLED IN ONTARIO

London, Ont., July 31—John Williamson, a member of the 7th regiment, was instantly killed at the ranges on Saturday afternoon. A rifle in the hands of private Pickle burst and one of the pieces of flying metal struck Williamson on the forehead, Pickle was slightly injured.

WELLMAN'S PARTY AT WORK

Spitsburgen, July 31, via Tromsoe, Norway, July 31—Forty men are working day and night to get the airship of the Wellman-Chicago-Record-Herald expedition on its way toward the north pole during the latter part of August. The big balloon house will be finished in a fortnight.

FAILED TO SWIM THE CHANNEL

Dover, July 31—Jabez Wilfe, the amateur swimmer, has made another unsuccessful attempt to swim the English channel. He started last night but abandoned his effort early this morning on account of his injured leg.

CYCLONE AT WATERLOO

Waterloo, Ont., July 31—A terrific cyclone passed within three miles to the westward of Waterloo at noon today, destroying fences and wheat in stacks and cutting down grain ready to cut.

GIRL DRANK GASOLINE

Kutawa, Sask., July 31.—Two fatalities occurred here on Saturday. The young daughter and only child of a farmer named Pretty, poisoned herself by drinking gasoline. A young English immigrant named Quick, was also instantly killed by the accidental discharge of a shotgun which he was carrying with him on a load of hay.

CLARK'S VEAL LOAF

more wholesome and tasty than plain veal. It has all the delicious flavor of fine veal appetizingly seasoned.

OFFICER'S SHADY "LOANS"

Berlin, July 31.—Emperor William has ordered a searching investigation into the case of major Fisher, who is attached to the home quarters staff in German southwest Africa and who has been arrested. It appears that the major had been receiving money for years from the firm which has the monopoly of supplying the colonial forces in German southwest Africa. This money was given nominally as loans and according to the press reports, the total of the sums paid finally reached $25,000.

Major Fisher's salary was $2000 a year. There was na prospect whatever of his ever returning the loans.

We stand back of everything sold in our stores. If there is any dissatisfaction we want to know it and make it right. Canada Drug & Book Co.

SMOOTH-ON

Smooth-on is a chemical iron compound prepared in powdered form and used by mixing with water to the consistency of a stiff paste. When used in this state it will metallize in a few hours and become part of the casting to which it is applied. Valuable for stopping leaks of steam, hot or cold water, and many other mechanical uses. We sell it

Wood-Vallance Hardware Co., Limited.
WHOLESALE NELSON RETAIL

WHY LOW PRICED TEAS ARE REALLY EXTRAVAGANT

Because so much more of them is required to the cup, than a high grade tea like

Blue Ribbon TEA

As a rule it takes about a third more cheap tea than of Blue Ribbon. In other words, three pounds of Blue Ribbon Tea will go about as far as four pounds of the 30c or 35c tea. So Blue Ribbon Tea is really the most economical.

And as for flavor, there is no comparison. Cheap inferior teas can never have the rich, smooth flavor of Blue Ribbon Tea. If you have been using "cheap" tea, try one pound of Blue Ribbon and notice the difference. Lead packets, and 50c per pound.

FOR SALE

Choice residential property, Silica street east. Stone foundation, refined design, superior construction.

FIRST FLOOR — Parlor, Diningroom, Bedroom, Kitchen, Pantry, Hall and Verandah.

BOUNDARY COPPER MINES

TORONTO GLOBE WRITER REVIEWS THEM AT LENGTH

MR. ACKLAND CONTINUES HIS LETTERS ON BRITISH COLUMBIA

Mr. F. A. Ackland, the member of the Toronto Globe's editorial staff, who is touring B. C., and the author of the letter on Nelson recently republished in the columns of The Daily News, is responsible for the following letter written from Grand Forks:

The little town of Grand Forks itself may be termed the capital of the Boundary district of British Columbia, a district lying continuous to the American border, and stretching for 100 miles along the beautiful valley of the Kettle river. The Canadian Pacific has built out to Midway, which is 127 miles from Nelson, though the railway takes a long dip to the south before beginning its course due west. Along this line and its offshoots lie half a dozen little mining towns of which Grand Forks, with 1500 or 1600 people, is probably the largest and the most prominent among which are Phoenix, Greenwood, Boundary Falls and Midway. This section of British Columbia, which is little known in eastern Canada apart from the prominence given it a few years ago by the intrusion here of Mr. Hill's Great Northern railway, is the most productive mining region in Canada, and considerably more than half the tonnage of the province last year was produced from the camps along this line. The total tonnage of the province, apart from the coal mined, was 1,708,679, and the contribution of the Boundary district was 965,628 tons, about treble the output of Rossland.

The chief producing mine of the district is the Granby, about 20 miles from Grand Forks, and which feeds the smelter whose burning slag lies on the river bank yonder. This immense property is owned almost wholly by Americans, as are, in fact, most of the properties in the Boundary district. It takes its name, however, from the little town of Granby, in the province of Quebec, which is the residence of Mr. S. H. C. Miner, a rubber manufacturer, who became largely interested in the mine in its early stages. His interests were acquired by J. P. Graves of Spokane, an American capitalist of great enterprise and energy who is now occupying himself in building a network of electric railways about Spokane. Mr. Graves came first into the Boundary country about 12 years ago and became interested in various mining companies and in a smelting company. He succeeded in combining these various interests and amalgamating them into the Granby Consolidated Mining, Smelting and Power Co., Ltd, which is the largest and most important mining and smelting company in British Columbia, if not in Canada.

The Granby is capitalized at $15,000,000 of which $13,500,000 is issued stock and the balance of $1,500,000 is in the treasury. The stock is largely held in the United States and the directors are chiefly men prominent in the copper industry of the country. The mine is one of the great low grade propositions of the world. Mr. John Staunton of New York, who has been called the "father of the copper industry," after visiting the property, said in an interview: "The Granby ore body is the largest sulphide ore deposit I have ever examined, and my mining experience has extended to every variety of copper ore. It is analagous to the famous Rio Tinto of Spain. The Granby ore is lower in copper but carries larger values in gold and silver. It is larger than the famous Tennessee deposit. Hitherto sulphide ore bodies from 40 to 80 feet wide have been considered large, but this one at Phoenix eclipses anything else I have ever inspected. I don't know of its equal on the continent. The millions of ore in sight and the vast slopes proved a veritable revelation to me. I believe the Granby can operate at a profit, no matter to what figure copper might fall. With the advantage of gold and silver in it ores it can produce copper at a price that would put less favored mines out of existence."

The smelter was originally furnished with two furnaces only, but the number has now been increased to eight, which have a capacity for handling 3000 tons of ore per day. This represents the largest number of furnaces it will be profitable to install. The capacity of the smelter will, however, be increased by the enlargement of the casting furnaces to a uniform size of 212 inches by 44 inches; five of them have already been so enlarged, and the completion of this extension will bring the capacity of the smelter up to 4000 tons daily. All the leading officers at the mines and smelter are Americans.

The payroll is the truest test of the greatness, however, in a mining camp, and in this respect Granby does not come short, the monthly wage list for mine and smelter being about $75,000, the amount being equally divided between the two branches of the great enterprise. It may be added that a dividend of 3 per cent on the capital stock issued was declared payable on January 15 last, the total being $405,000; this was the second dividend paid by the company, the first having been one of 1 per cent, amounting to $133,000, declared in December, 1903.

It is hardly necessary to say that the mine is equipped with the most modern machinery, which, however, is being continually increased. During the last year, for instance, the company added a mammoth crusher, made and supplied by the Jencks Machinery Co., Ltd of Sherbrooke, Que., a duplicate of one obtained from the same manufacturers previously. The receiving opening of the crusher is 42x30 inches, and its capacity per day of ten hours is 1400 tons of ore, broken to not larger than 8-inch cubes. The heaviest single piece of this great engine is 75,000 pounds in weight, and the total weight is 120,000 pounds.

New electric machinery, etc., was purchased from the Canadian Westinghouse company of Hamilton, Ont., including one 75 h.p. locomotive, one 75 h.p. generator to operate the locomotive, and three 75 h.p. induction motors. During the year also further tramways to the length of 1000 feet were erected and an additional crusher building and more ore bins were constructed. The present year is witnessing still further additions to the plant, the chief being a 150 h.p. double drum electric hoist, with a capacity of 10,000 pounds, raised at the rate of 700 feet per minute. The shipping weight of this machine will be more than 50,000 pounds. It is satisfactory to be able to state that this order also is being filled by a Canadian firm. It will be seen how great a stimulus the successful operation of one big mine may give to Canadian industries thousands of miles distant.

The quarry like character and other aspects of the Granby ore indicated by Mr. Staunton have allowed the working of the immense property on what is no doubt the most economical basis ever achieved in Canada, the mining being accomplished at $1.10 per ton and the smelting at $1 per ton, very different figures indeed from those obtaining in the Rossland camp, even on the reduced scale there of the last year or two. Mining men talk of the capacity of the mine being 50 million tons, but the fact is no limit can be placed to the amount of ore it contains, and the company has already announced its intention of driving a long and deep tunnel that will strike the ore beds at a depth of 1500 feet or upwards.

The Canadian Pacific railway for several years had a monopoly of the freight and during that time hauled three or four million tons of ore to the smelter at Grand Forks and elsewhere in the district, in addition to the bullion and coal and coke traffic. The Granby mine alone paid the C.P.R. an average of $1000 daily on freight charges alone before it had been developed to its present state. The long warfare between sir Thomas Shaughnessy and Mr. J. J. Hill was ended at last by the building of the Great Northern into Grand Forks in 1902 and its extension to Phoenix in 1904, so that the two railways divide both smelter and mine traffic. The Hill line is now extending its line towards Similkameen to connect with the Victoria, Vancouver and Eastern railway, as it comes eastward. With the connection of the two railways, which is promised not later than 1907, the Boundary district will have direct and fast connection with the coast.

The group of mines owned by the Granby company are by no means the only productive properties in the Boundary district. The monthly pay roll of the whole district totals the respectable sum of $125,000, to which, as we have seen, Granby contributes $75,000. The remainder comes $20,000 from the British Columbia Copper company and $25,000 from the Dominion Copper company.

The British Columbia Copper Co., Ltd., owns the Mother Lode group of six mineral claims in Deadwood camp, with a smelter at Greenwood. The company is a New York organisation, with a capital of $3,000,000. It acquired the Mother Lode mine in 1898, and since then has operated it almost without intermission. The mine is situated about three miles from the smelter, the C.P.R. having built a branch out from Greenwood. The ore bodies here, too, are large, the main lode having a surface width of from 80 to 160 feet, the continuity of which has been proven by surface trenches along a distance of 1100 feet from the main shaft, while a big surface exposure of about 700 feet in an opposite direction indicates the extension of ore bearing rock to the south as well. The total output of the Mother Lade mine for the five years ending December, 1905, has been 754,000 tons, of which about 18,000 tons were produced last year. Practically all the ore is smelted at the company's smelter at Greenwood. The present output of the mine is about 600 tons daily, but the plant is being considerably increased this year, and this, with the development work previously done, will probably allow an output of 1200 tons daily for the latter part of the present year. The company is now employing at mines and smelter over 300 men. The B. C. Copper company also owns a three-quarter interest in the Emma mine, the other quarter of which is owned by the Hall Mining and Smelting company of Nelson, B.C. This mine was a considerable shipper a year or two ago, but has now cut down its shipments, pending regular development work.

The third large company operating in the Boundary district is the Dominion Copper Co., Ltd., of New York, a reorganization of the Canadian company of the same name, which owned a group of properties near Phoenix on which development work had been done and from which ore had been shipped by the Montreal and Boston Consolidated Mining and Smelting company. The Brooklyn-Stemwinder and Rawhide are the biggest shippers at present among the company's properties, the figures for the year being Brooklyn-Stemwinder, 52,821, and Rawhide 25,166 tons. Both mines are at Phoenix and began shipping in 1904. The aggregate of all shipments to date from the properties of the company are 163,000 tons, of which last year's proportion was 85,732 tons, rather more than half. The smelter of the Dominion Copper company is at Boundary Falls, and owing to the transfer of the properties was but little used last year, the ore treated only amounting to 82,644 tons, as against 132,510 tons in 1903.

There are many other individual mining properties in course of development through the district, some of which are making small shipments. There are between 20 and 30 of what are known as high grade mines in the Boundary district, most of them within a short distance of the town of Greenwood, which together provide employment for 150 men, and during rather more than two years have produced an aggregate of nearly 5900 tons of ore, much of it ranging from $50 to $100 per ton, or even higher. As in the case of the bigger companies, these smaller properties are mostly owned and controlled in the United States.

As to the towns through the district, they present the usual features of the western mining camp. Grand Forks, perhaps came nearest to having a boom, and paid for it by having many empty buildings on its streets today. An important development of the last few days is the letting of the contract for the construction of a new railway to be known as the Kettle Valley line from Grand Forks north ward for 50 miles. The objective point is the McKinley mine, another great copper property, developed sufficiently to show an immense future mine. The property passed last year into the hands of a company of which the leading spirit is Mr. F. A. Heinze of Butte, who was at one time so extensive a factor in the Rossland camp. The Heinze company bonded the property for $200,000. Mr. Heinze visited the mine himself last fall and made a careful inspection before buying. It is located on McKinley mountain, from which it takes its name. A site for the proposed new town of Franklin, with a smelter, is now being marketed in Grand Forks and other Boundary towns. There are many promising properties besides the McKinley, on which more or less encouraging development has been done, and a considerable camp has already grown up, known as Franklin camp. The contract for the construction of the new railroad has been let to W. P. Tierney and company of Nelson, and the cost of construction is believed to be in the neighborhood of $1,250,000.

It will be seen that the Boundary district is easily the leader in the mining divisions of British Columbia so far as may be judged by the tonnage, pay roll, general activity and immediate prospects. To recapitulate —the total tonnage for the province of British Columbia in 1905 was 1,706,679 tons, to which the Boundary district contributed 965,628 tons, two-thirds of which again came from the Granby properties. The three smelters in the Boundary district are this year considerably increasing their output and for the year down to July 7, stood respectively as follows:

	Tons
Granby Company	320,056
B. C. Copper Co.	82,729
Dominion Copper Co.	94,117
Total	567,102

It is evident, therefore, that in the absence of any unexpected set back the Boundary smelters will treat considerably over a million tons this year.

Especially For Women

FRUIT-A-TIVES are the finest medicine in the world for women.

As a mild and gentle laxative—as a positive and speedy cure for Constipation and Biliousness—as the only cure for weak and irritated kidneys and especially for "that pain in the back"—as a positive cure for headaches—and as a general tonic to build up and invigorate the whole system — FRUIT-A-TIVES stand supreme.

In cases of irritated Ovaries, Ovarian Pains, Vaginal Catarrh, Excessive and Scanty Menstruation, Ulcerations, Bearing Down Pains—and all those troubles peculiar to women—

Fruit-a-tives

OR "FRUIT LIVER TABLETS"

have the most remarkable effect.

Ninety-nine cases out of a hundred of Female Troubles are due to neglect. Bowels become constipated — kidneys irregular — skin neglected — and the poisons of the body, which should be carried off by these important organs, are taken up by the blood carried to the female organs and poison them, thus starting up a train of female troubles.

FRUIT-A-TIVES are made from fruits and by their remarkable action on bowels, kidneys and skin, rid the system of poisons, purify the blood, and restore the delicate organs of generation to new vigor and health.

No woman, who suffers, should ever be without them. 50c. a box—6 for $2.50, at your druggist's or sent postpaid by FRUIT-A-TIVES LIMITED : OTTAWA.

Minard's Liniment Cures Garget in Cows

SUMMER DIARRHOEA IN CHILDREN

During the hot weather of the summer months the first unnatural looseness of a child's bowels should have immediate attention, so as to check the disease before it becomes serious. All that is necessary is a few doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy followed by a dose of castor oil to cleanse the system. Rev. M. O. Stockland, pastor of the first M.E. church, Little Falls, Minn., writes: "We have used Chamberlain's Colic, Cholera and Diarrhoea Remedy for several years and find it a very valuable remedy especially for summer disorders in children. For sale by all druggists and dealers.

THORPE'S LITHIA cures and prevents gout.

We work all the time to please more and get rid of causes of complaint. That's one reason why our trade is so large. Canada Drug & Book Co.

J. S. CARTER, D.P.A., Nelson. W. P. E. CUMMINGS, Gen. Agt., Winnipeg

Synopsis of Regulations Governing the Disposal of Dominion Lands Within the Railway Belt in the Province of British Columbia.

A license to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths, excepting those situated west of Yale, for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:

Sawn lumber, 50 cents per thousand feet B. M.

Railway ties, 8 and 9 feet long, 1 1-3 and 1 3-4 cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent. on the sales.

A license is issued so soon as a berth is granted, but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B.M., for square timber and sawlogs of any wood except oak; from 1-2 to 1 1-2 cents per lineal foot for building logs; from 12 1-2 to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties, and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of 21 years at a rental of [illegible] cents per acre per annum.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for homestead purposes may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the minister of the interior at Ottawa, the commissioner of immigration at Winnipeg, or the local agent for the district within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

It is the practice of the department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle to be actually his own property, with buildings for their accommodation, will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a Homestead entry under the provisions of th Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the Act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so. W. W. CORY, Deputy of the Minister of the Interior.

Ottawa, February 16th, 1906.

THE "HARD-TO-DO THINGS"

Most things are "hard to do" if you try to do them in the hardest ways—and there's a hard way to do most everything!

There are Several Hard Ways to

FIND TENANTS
GET SERVANTS
SELL PROPERTY
LOOK FOR WORK
SECURE OFFICE HELP
INFLUENCE INVESTORS
RENT FURNISHED ROOMS
DISPOSE OF "OLD THINGS"
LOCATE LOSERS or FINDERS

and there is one way of doing these things which—while, possibly, not "easy"—is, at any rate, least-hard—the sensible, persistent use of

"MONEY WILL MAKE THE POT BOIL THOUGH THE DEVIL POUR WATER ON THE FIRE."

AND MONEY—invested in Publicity—will make the store prosper, though assailed on all sides by "hoodoos," "bad luck," or murderous competition!

That "Money is Power" has been conceded since the first coin came from the first mint.

But it has remained for the present generation to learn how to most effectually harness power and make it do the world's work—how, by putting money to work, to make it a useful and a tractable power.

Changed into Newspaper Publicity, money reaches, perhaps, its highest effectiveness.

Newspaper advertising will send store-crowds where they were never before seen will overcome the bad location hoodoo—will do away with "dull days" and "slow stocks"—will batter down, finally, every obstacle to complete store-success—and increasing store growth and profits.

If your Advertising Campaign is big enough, peristent enough, intelligent enough—if it embodies a "Selling Plan" for everything you have to sell—your business will prosper no matter how many of your friends or enemies try to pour water on your fire!

A good medium is an essential part of a good advertising campaign.

NANAIMO MURDER CASE

CORONER'S JURY ACCUSES ROBERT FEATHERSTONE.

PRISONER WILL HAVE TO STAND TRIAL ON CAPITAL CHARGE

The verdict of the coroner's jury empanelled in Nanaimo to inquire into the causes of the recent violent death of Mary Jane Dalton at South Wellington—the girl who is supposed to have been murdered by Robert Featherstone because she resisted an attempt of his to outrage her—has been returned and is as follows:

"We, the jury empanelled to inquire into the death of Mary Jane Dalton agree that she came to her death on July 21, 1906, by bullets fired from a 38 calibre revolver, and from evidence given, we agree that the shots were fired by Robert Stiles Featherstone."

Featherstone, accordingly, will nave to stand trial on the charge of murder. He is still in jail in Nanaimo and is beginning to show the strain of the tension through which he is passing.

All the men who worked with him in the mill where he was employed say that he invariably wore a pleasant countenance, seemed to be free from care and was a gentlemanly person to work with. He was a very quick-tempered man, but his anger was all over in two or three minutes. Now, however, his comrades have noticed a great change in the man. He is much paler, which is not accounted for by the fact that he is in confinement, as he always worked under shade. He is nervous and his eyes are beginning to show a worried look. His fingers are always twitching and in moments of forgetfulness his mouth is working. In prison he eats well and is quiet at nights. He talks freely with his guards and is a man of evident intelligence and education. The latter is shown by the fact that out of a class of fifty at the optical college he attended he carried off the gold medal for general proficiency. As a sawyer it would be hard to get a better man, and the mill hands at South Wellington say that he could saw more lumber out of a log than any man they ever worked with.

Superintendent Hussey is investigating the case. Mr. Hussey says Featherstone claims to have been a member of the Northwest Mounted Police, and that his claims are quite correct. If Featherstone is guilty, says the superintendent, he will be vary canny and act with caution as a result of his mounted police training. A member of Mr. Hussey's office knew Featherstone quite well when he was in the police. Featherstone's counsel says that the prisoner is quite confident of clearing himself of the serious charges against him. Only once did he wish to say anything at the inquest, when he wanted to ask one of the witnesses a leading question which would have explained the marks on his hands.

Superintendent Hussey of the provincial police has gathered a lot of new evidence, some of which will come up at the preliminary hearing. It is alleged that Featherstone has been known to make remarks among the mill hands about the Dalton girl previous to the day of the murder—remarks that will not likely be in his favor. The sentiment around South Wellington is very strong against Featherstone.

STILL AN ANEXATIONIST

GOLDWIN SMITH DENIES THAT HE HAS CHANGED HIS VIEWS

BELIEVES IN ULTIMATE UNION OF CANADA AND THE U. S.

During the recent visit of the Washington correspondonts to Winnipeg, entertainments in their honor were frequent. On one of these occasions, in responce to a toast, F. C. Wade, referring to the possibility of union between the United States and Canada, strongly scouted any such destiny, and, in support of his dictum that any sentiment along that line that ever existed was rapidly disappearing, he declared that Prof. Goldwin Smith, the Toronto sage, who has been a life-long believer in the ultimate union of the two countries, had recently changed his views on the question, and did not any longer regard fusion as a possibility.

Prof. Smith, on being asked by a Winnipeg friend if he had made any pronouncement that would justify Mr. Wade's conclusion, replied:

The Grange, Toronto.

My Dear Sir,—Something that I said about the future relations between our people and those of the United States must have been misconstrued by Mr. Wade. To anything precipitate, violent, or injurious to the mother country, I have always been opposed. But my opinion on this question has undergone no change. That the two sections of kindred and homogeneous population which now divide this continent between them shall ultimately become one and enjoy all its advantages in common seems to me to be the decree of nature, while nothing, apparently, can be more at variance with her decree than the attempt to sever a line of provinces from their own continent and annex them permanently to a European power. We are separated from our kinsmen on this continent only by the political lines. For all other purposes and in all other respects fusion already exists.

The action of the great forces is often suspended and suspended long by that of the secondary forces. It was so in the case of the Italian and in that of the German union. But the great forces in the end prevail. The hour comes and the man.

Great Britain is now withdrawing as a military power from this continent and a Canadian minister of state avows that the immunities of our own hemisphere will henceforth be our guard. Aggression on the part of our neighbors there is not the slightest reason to fear. Not a syllable of the kind is ever heard.

That I am opposed to annexation in a certain sense is true. Annexation is suggestive of force on one side and submission to force on the other. When this event comes it will come, not in the form of annexation but in that of free, equal and honorable union. Yours very truly,

Goldwin Smith.

HOLY WAR THREATENED

TRIANGULAR STRUGGLE IN CAUCASUS BECOMES SERIOUS

MACHINE GUNS TRAINED ON THE TOWN OF BORISSKOA.

St. Petersburg, July 31.—The fierce war raging in the Caucasus between the Armenians, Tartars and Russians, especially near the Persian frontier, is assuming threatening dimensions. There is considerable apprehension that it may cause the outbreak of a holy war for which a serious agitation has been in progress both among the Shiinite and Sunite Tartars for a long time past. The news from Borisskoa, in Kursk province, is quite alarming, but it is not clear from the meagre dispatch exactly what has happened. It is only stated that general Ledvinoff, who has arrived there with rapid fire guns, posted them in a monastery on a hill overlooking the city and sent in word that if all the arms were not delivered up to him by 4 o'clock this afternoon, he would open fire, indicating that the city is in the hands of revolutionists.

Private letters from northern Lithuania say that the peasants in the region around Kovno have entirely ceased to work and that the grain has begun to rot in the field.

St. Petersburg, July 31.—A machine gun was stolen last night from an army factory in the Vassile Ostrov district of this city. It is suspected that the robbery was committed with the connivance of the sentinels on duty at the factory. Secret meetings of workmen, which are being addressed by revolutionary orators, are being held here nightly. At a meeting of the employees of the Putiloff works last night a spy was discovered among those present and he was killed. The police this afternoon captured at a lodging house in Sadovya street five of the social revolutionists. The men taken into custody were awaiting the arrival of their colleagues, preparatory to holding a full meeting of the committee.

OUR COTEMS' VIEWS.

The Bureau of Mines.—The decision of the dominion government to establish a department of mines with a responsible minister at the head is one of the wisest things they have done since they came into power, and the next wisest is to have placed it under the control of the Hon. W. Templeman, who represents the mining province of the dominion in the cabinet.—Victoria Week, (Con.)

Kipling Has a Vote.—Vancouver is the only city in Canada able to claim Kipling as a ratepayer. Seventeen years ago the author of "The Day's Work" on his only visit to Canada, invested in lots 1 and 2, block 157, district lot 264A. He has paid taxes regularly ever since. So far as is known he has never kicked on his assessment or protested against the rate. Recently he refused to sell.—Canadian Graphic.

Attired in Nerve.—R. W. Temple, a monoline operator dropped in on the Herald last Monday. The gentleman was attired in knee pants and nerve, and is on his way around the world. He got a dollar, we got thanks, and he floated out with a smile on his seraphic features that was consoling for the loss of the coin. This round the world stunt on no money is getting to be worked overtime, but as long as there are suckers to give up and nervy young men to work the suckers the game will go on.—Cranbrook Herald.

Keen Business Rivalry.—There is considerable unfair rivalry among the Chinese gardeners who peddle vegetables about the city. Some of them reported that one of their number had leprosy, and as a result of this the unfortunate Mongol lost nearly every one of his customers. The report reached chief of police Long, and he at once hunted up the Chinese who was alleged to be afflicted with leprosy and took him to Dr. R. P. McKenzie, the medical health officer of the city. The doctor made a careful examination of the man's physical condition and found that he was in perfect health and that he was cleanly in every way.—Rossland Miner.

Home Interest Needed.—The stock exchange at Spokane has been reorganized after a period of inactivity that has lasted for two years. Brokers are said to be selling more shares than ever in the history of the city. The dealings are confined almost exclusively to British Columbia and Couer d'Alene shares. In this connection it is remarkable that the shares of the British Columbia mines are not handled to any great extent in any large centre in the province, nor is there a mining share exchange in British Columbia. The industry is too important to be neglected by cities like Vancouver and Victoria, and that alien cities should take more interest in the shares of the mines here than do any of the home centres shows nothing short of pure indifference.—Trail News.

Alas, Poor Fido.—"Dog Tax 13506, Chicago—R.F.C.," was found in a can of beef opened and partly consumed at Roxbury, Va., a few days ago. The reporters are now hunting for the dog that owned the tag, or rather are tracking up the owner.—Chicago Exchange.

Journalistic Treason.—Many people have commented on the Americanization of Canadian sentiment by books and periodicals from the United States. A correspondent who receives regularly the Victoria Daily Colonist notes that a curious illustration on the magazine page of a recent number was a collection of naval photographs. At the top was the title, "Best big gun marksmen on earth—How our sailors are trained." On reference to the article "our sailors" proved to belong to the United States. No doubt the article was syndicate matter, ordered from over the border.—Manchester (Eng.) Guardian.

THE BALFOUR ROAD

Editor, The Daily News,—I observe in your issue of today a statement that this road is in places below high water mark and is not satisfactory to the ranchers and settlers. I beg to state that the owners of all the lands through which the road runs are perfectly satisfied as to the course taken and have not signed any petition or expressed any dissatisfaction with the action of the government or its representatives. It would be a matter of much interest to know who were your informants.

F. ADAMS.

Nelson, July 31, 1906.

[If the correspondent whose letter is reproduced above had read the article to which he refers a little more carefully he would have known that Mr. Gray, of Kokanee, who was mentioned explicitly, was the informant of The Daily News. Mr. Gray visited this office, stated that the comlaint had been sent in by Mr. McKay and himself "acting for a number of dissatisfied ranchers," and explained the grounds of complaint in detail. The article published contained all this information in style sufficiently lucid for the ordinary reader.—Ed.]

Minard's Liniment Cures Distemper

THORPE'S LITHIA cures and strengthens the bladder and kidneys.

PLAN ATHLETIC CLUB

NEW ORGANIZATION LIKELY TO BE FORMED IN NELSON.

PUBLIC MEETING SOON TO BE CALLED TO DISCUSS QUESTION

For some time past the need of some governing body in local athletics has been severely felt—particularly of late since the recreation grounds have been closed to the players except when private parties take personal responsibility for them.

There has always been difficulty in getting any one to take this responsibility and the matter has again led to a discussion on the merits of the formation of a local athletic association which would have the government of all local athletics.

A representative of The Daily News has, during the past few days, called on a large number of local men who take a great interest in athletics and in every case the proposition for the formation of an athletic association was enthusiastically endorsed.

Certain men who are greatly interested in the subject have now taken the matter in hand and are preparing preliminary plans which will be submitted to a public meeting which will be held in the course of the next fortnight, to take the first steps for proper formation, should it be decided to go ahead with the idea.

When asked for his opinion as to the formation of an athletic association, mayor Gillett expressed his strong approval and stated that it was a move in the right direction.

All members of the Nelson junior baseball teams are asked to report for practise at the recreation grounds this evening. A game will be played here on the 9th with the Trail junior aggregation when the youngsters hope to make a better record than the intermediates in their game last week.

The following is the present standing of the teams in the National Lacrosse Union.

	W.	L.	Av.	TP.
Montreal	4	2	.666	6
Cornwall	4	2	.666	6
Capitals	3	2	.600	7
Tecumsehs	3	2	.600	7
Toronto	3	4	.438	5
Shamrocks	2	4	.333	6
Nationals	2	5	.285	5

When the local lacrosse boys go up against the Regina team on the 16th, they will have to play some good lacrosse to win, for the visitors are a strong aggregation. Just before the Souris team went east in June, they had a match with the Regina twelve and after one of the fastest games ever played in Souris, the Regina boys gave the Manitoba champions their first defeat this year. The score was six goals to five. Practically the same team will visit Nelson and it would be a great feather in the cap of Nelson if they were to defeat the Regina boys.

Minard's Liniment Cures Distemper

MAKE HAY WHILE THE SUN SHINES

There is a lesson in the work of the thrifty farmer. He knows that the bright sunshine may last but a day and he prepares for the showers which are so liable to follow. So it should be with every household. Dysentery, diarrhoea and cholera morbus may attack some member of the household without warning. Chamberlain's Colic, Cholera and Diarrhoea Remedy, which is the best known medicine for these diseases, should always be kept at hand, as immediate treatment is necessary and delay may prove fatal. For sale by all druggists and dealers.

S. J. HARLOW, Agent.

NOTICE is hereby given that 60 days after date I intend to apply to the Hon. the Chief Commissioner of Lands and Works for permission to purchase the following described lands, east of the Columbia river, in West Kootenay district: Commencing at a post marked "M. Makinson's S.W. Corner," thence 40 chains east; thence 40 chains north; thence 40 chains west; thence 40 chains south, following T. M. Makinson's line, to place of commencement, containing 160 acres, more or less.

KENNETH L. BURNET, P.L.S., Agt.
MAGGIE MAKINSON.
Dated at Nakusp, B. C., this 14th day of June, 1906.

FARM FOR SALE

I will sell ten acres of my farm two and a half miles south from Kaslo. There is a good road to town and a good steamboat landing; 22 fruit trees, many bearing; good spring of clear water and a water right for irrigation. Cabin chicken houses and stables ready for occupancy. Hay put up and another crop ready to cut. To visit the property take the Kaslo boat and ask to be put off at Archer's landing. Good soil not rock. Price $1000.

JOHN ARCHER
P. O. Box 394 Kaslo, B.C.

VIOLIN LESSONS

Anyone wishing to learn the violin call on Mr. D. W. Curtis, Applethwaite building, corner of Baker and Kootenay streets. Mr. Curtis has just recently come to Nelson and is highly recommended by the local musicians. He studied under several of the greatest masters in New York and Boston and has had 12 years' experience as a teacher and performer in the large cities of the United States and Canada. Mr. Curtis may be heard each evening at the Strathcona hotel during the dinner hour.

NELSON'S NEWS OF THE DAY

C. E. Gillan, Rossland's city solicitor, is at the Strathcona.

Born, in this city on July 31, to the wife of J. P. Bell of Erie, a daughter.

The total receipts at the Nelson customs house for the month of July amounted to $18,945.81.

Rev. W. T. Stackhouse, who has been attending the Baptist summer assembly, leaves for the east this morning over the Crow line.

F. C. Gamble, C.E., provincial public works engineer of Victoria, came in from East Kootenay last evening and leaves this morning for the coast by way of Spokane.

Mrs. Anna Busch has disposed of her interest in her boarding house on Ward street to Mrs. Mary Keefe of Ymir, and will leave shortly for an extended eastern trip.

The offices of the Canadian Metal company have been moved from their original location to the offices of the London and B.C., Ltd., Baker street, east, where Mr. Fowler has his own offices.

A quiet wedding was celebrated at St. Saviour's church last evening, when Thos. Brooke of Coleman, Alberta, was married to Miss Manie Catlin of Bedford, England, by the rector, Rev. F. H. Graham.

Rev. Henry Steel, Grand Forks, and Rev. C. A. Procunier of Revelstoke, are in the city to attend a meeting of the executive committee of the diocese of Kootenay, to be held in the mission hall of St. Saviour's church this afternoon at 2:30.

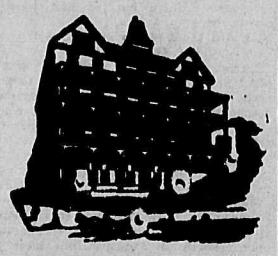
Nelson aerie F.O.E., announce a moonlight excursion to Pilot Bay on the evening of Wednesday, Aug. 8 The band and orchestra have been engaged and there will be dancing in a large open air pavilion. The Kokanee will leave the city wharf at 7:15 p.m.

Capt. T. H. Trethewey, superintendent of the La Plata Mines, came in from the property yesterday and will leave for the east tomorrow morning to attend a directors' meeting and a meeting of the shareholders of the company, to be held at Sherbrooke, Que., on Friday and Saturday, Aug. 10 and 11. Captain Trethewey was very pleased last evening over the situation at the La Plata mine and mill. At the moment the mine is 16 cars ahead of the teamsters who are bringing down the ore. Yesterday, taking into account the ore at the mine, mill and in course of shipment, 420 tons or 21 cars are coming up. Three 4-horse teams are kept busy hauling. About a ton per hour or 12 tons daily goes through the mill. After giving an account of his stewardship to the directors and shareholders, captain Trethewey will return west at once. He does not anticipate being away more than three weeks.

Coroner Dr. E. C. Arthur and provincial constable Young returned from a trip to Bonnington falls yesterday, to inspect the remains found on the little island above the lower falls. As expected, the body proved to be that of Giuseppe Spereacin, the Italian employee of the W. K. P. and L. Co., who jumped into the river on June 29 and was drowned. The remains were so decomposed that the authorities directed that they be buried on the river bank, near where they were found, and this was accordingly done.

RESCUED FROM NIAGARA

Niagara Falls, N.Y., July 31—Mayor Cutler tonight publicly presented patrolman Harry Batts and fireman Thomas Conroy with gold medals for their bravery in rescuing Amos Schweirzer of Toronto, from the brink of the American falls. On June 5 Schweirzer attempted suicide. He entered the water on the American side and was swept to the brink of the falls where he secured a foothold on a ledge of rocks. Batts and Conroy rescued him from his perilous position by going out on one of the fire department extension ladders.



STRATHCONA—W. C. Dalglish, Slocan; T. H. Trethewey, La Plata mine; F. C. Gamble, Victoria; W. W. Montelius, Vancouver; Mr. and Mrs. T. C. Brooke, Coleman; A. G. Rawlinson, Qu'Appelle; Miss D. Yates, Greenwood; H. Steele, Grand Forks; Rev. C. A. Procunier, Revelstoke; C. E. Gillan, Rossland; J. C. Jensen, F. J. Ainsworth, Council Bluffs; G. N. McHUME—J. Henry, Ainsworth; R. W. Livingstone; A. McRae, Calgary; L. McKellar, Fernie; F. Robinson, Winnipeg; R. S. Gourlay, A. Gourlay, J. H. Alexander, Toronto; F. L. Clark, Spokane; F. E. Simpson, Cranbrook; Mrs. E. Ruthven, Revelstoke.

MEANS A BY-ELECTION

Montreal, July 31—Judge Pîche today announced his resignation as a member of parliament for St. Mary's. "According to law," he said, "I could have waited until the next session of parliament to resign, but I thought it preferable from every point of view to send it in immediately. This I did as soon as I was sworn a judge of special sessions.
