LUMBER TO COST MORE

Mountain Manufacturers Decide to Raise the Price

Will Ask a Dollar a Thousand Extra on Common Dimension Stuff

At their regular monthly meeting, held at their head office in this city, the Mountain Lumbermen's Association made a slight increase in the price of lumber and decided to attend the Forestry convention at Vancouver in a body.

Among those present were J. A. Dewar (chairman), Ymir; F. E. Becker, Calgary; P. Lund, Wardner; A. F. Krapfel, Elko; M. B. King, A. Leitell, D. B. Dalmage, Cranbrook; M. Avery, Arrowhead; C. J. Archibald, Salmo; J. G. Billings, W. B. Robertson, Nakusp; R. B. Benedict, Mayook; F. E. Sine, Revelstoke; D. R. Gates, Wycliffe; A. E. Watts, Wattsburg; J. Mowatt, Enderby; Leslie Hill, W. C. E. Koch and secretary George P. Wells, Nelson.

A morning and afternoon session was held, at each of which a large amount of routine business was transacted.

It was decided to advance the price of common lumber—dimensions—$1 a thousand. There will also be a slight advance in some other lines.

The association decided to attend the approaching forestry convention to be held at Vancouver on September 25 and 26 and which will be opened by the governor-general. If possible all the members of the association will attend the convention in a body.

The new price schedules will come in force immediately, as soon as the changes are made and the new schedules printed and distributed.

The meeting adjourned at 4:30 until the September meeting.

BLAMES THE CAPTAIN.

Official Inquiry Fixes Blame for Sirio Disaster on the Commander.

Madrid, Aug. 8.—The official inquiry made by the naval authorities into the wreck of the Sirio seriously inculpates the captain and crew of the steamer for saving themselves first, abandoning the vessel and causing a panic. The inquiry is expected to lead to severe action on the part of the authorities against those who were responsible for the disaster.

Cartagena, Aug. 8.—A diver participating in the salvage of the wrecked steamer Sirio says he saw seventy bodies in the interior of the Sirio.

FARM LABORERS MAY STRIKE.

Don't Believe Dominion Government is an Easy Enough Task Master.

Ottawa, Aug. 8.—Fifty laborers on the experimental farm here threaten to strike if not given a nine-hour day. At present it is ten.

Sir Charles Rivers-Wilson told the members of the transcontinental commission in Quebec that he expected to haul part of the 1907 crop over the Grand Trunk Pacific.

The colonial office cables that the German cruiser Panther will visit eastern Canadian ports, including Montreal and Halifax, from August 11 to October 1.

DISPUTE WITH NEWFOUNDLAND.

Quebec and Ancient Colony Quarrel Over a Boundary.

St. Johns, Nfld., Aug. 8.—The Quebec government, which maintained a party of surveyors at Hamilton inlet last winter surveying lumber areas, has seized 40,000 logs belonging to a lumber company operating there under leases from the Newfoundland government. The Quebec government claims the territory and Newfoundland contends the contrary. This brings about an acute phase of the boundary dispute between Canada and Newfoundland and it will likely compel an early arbitration of the matter by the imperial ministry.

A MODERN MIRACLE.

Columbia, S. C., Aug. 8.—The republican state convention elected Edmund H. Deas, a negro, state chairman. Resolutions were adopted congratulating the country on its prosperity, and commending the work of both houses of congress.

NO MORE SECRECY.

New York, Aug. 8.—The Mutual Life Insurance company was ordered by Justice Giegrich today to furnish a correct list of its policy holders to the international policyholders' committee.

TEXAS FLOOD LOSSES.

Fort Worth, Texas, Aug. 8.—Reports from the flood districts indicate that the damage will be great, conservative estimates placing the loss at $1,000,000.

ADDRESS TO LORD MILNER.

London, Aug. 8.—Lord Milner, the former high commissioner for South Africa, was today presented, through the Duke of Somerset, with an address expressing appreciation of his services in South Africa signed by 370,000 persons. He received a similar address from the Transvaal with 20,000 signatures.

THE AMERICAN PERIL.

St. Petersburg, Aug. 8.—The Nova Vremya calls the international American conference now being held at Rio Janeiro a scheme of the United States aiming at establishing a hegemony in America. It raises the cry of "The American Peril" and predicts that "the time is not far distant when the Slav, German and Latin races of Europe will become united for self-protection against the combination of greater America, greater Britain and greater Japan.

STOLE A COOL MILLION

RECORDS SHOW CHICAGO BANKER WAS A CRIMINAL.

CARRIED ON SYSTEMATIC PILFERINGS FOR YEARS.

Chicago, Aug. 8.—Conclusive evidence has been unearthed by state bank examiner C. C. Jones, that Paul O. Stensland, the fugitive bank president, has been guilty of highly criminal action. This was officially announced by Mr. Jones today. Henry W. Hering, the missing cashier who was declared to be an embezzler of large sums of money, is being in a measure exonerated because of a lack of direct proof against him.

"I cannot yet just say how far the frauds have been carried," Mr. Jones said, "but that it is a great length is proved by papers already brought to light."

The Tribune today says: A state of affairs more startling and shocking than had been previously hinted in connection with the collapse of the Milwaukee avenue state bank was revealed last night when it became plain that though barefaced forgery president Paul O. Stensland had plundered his own bank systematically through a period of years. The question arose whether cashier Henry W. Hering profited to any extent by this plundering. His friends say he did not though, acknowledging that he may have known of what Stensland was doing. At any rate there had been discovered in president Stensland's safety deposit vault box memorandums detailing how the bank was looted. The amount thus taken is set down in Stensland's own hand-writing at $1,003,000. The money went to support his real estate speculations, his "Co-operative" building and business, and his fine household in Irving park.

RELIGIOUS EDUCATION

BRITISH COURT FINDS A FLAW IN THE ACT OF 1902.

"PASSIVE RESISTERS" WIN OUT IN YORKSHIRE TEST CASE.

London, Aug. 8.—(A decision given by the court of appeals today leaves the question of religious education in Great Britain in a peculiar position. The education act of 1901 was intended to compel local authorities to pay for religious instruction in the voluntary schools and led to the notorious "passive resisters" movement under which numbers of non-conformists refused to pay the rates levied to cover this expenditure for church schools. The education bill which was recently under discussion in parliament, is intended to remedy this state of affairs.

In the meantime, the county council of the west riding of Yorkshire had refused to pay teachers for the time devoted by them to religious instruction. The board of education then sought the assistance of the courts in the matter with the result that the court of appeals decided in favor of the Yorkshire county. If this decision should be upheld by the house of lords, whither the case now will be carried, it will practically accomplish by a legal stroke what the bill of Augustine Birrell, president of the board of education, aims at and furthermore, it may possibly enable many "Passive resisters" to bring action for false imprisonment.

The trouble appears to be due to the careless drafting of the bill of 1902.

BEWARE THE U. S. BRAND.

Koenigsburg, Aug. 8.—At a meeting of the German butchers association held here today it was decided to apply to the imperial government to take precautions to protect the trade of German butchers from unscrupulous Americans, and that no foreign tinned meat be used for the army or navy.

AT THEIR OLD TRICKS.

Columbus, Ohio, Aug. 8.—Reports of the analysis of about fifty samples of potted ham, potted chicken and luncheon sausage and similar canned meats show the presence of preservatives. One sample labelled "Potted chicken" was found to be veal.

VANCOUVER'S WIN AGAIN.

Vancouver, B. C., Aug. 8.—The result of the lacrosse game today between Vancouver and the Maple Leafs was 6 to 4 in favor of Vancouver.

BEWITCHED WATER HOLE

Miner Had to Fire a Shot Every Time He Wanted Water

Strange Tale From Grand Forks—Dominion Copper Co. Officials Inspect Their Properties

(Special to The Daily News)

Grand Forks, Aug. 8.—Senator Warner Miller, of New York, president of the Dominion Copper Co., and M. M. Johnson, of Salt Lake, arrived here yesterday and left for Salt Lake this morning. The visitors were shown through the Granby smelter by assistant superintendent Williams, and expressed themselves as highly pleased with this, their first visit to the big plant. Senator Miller was only once in this city before, the visit being in 1900 before the smelter here blew in. Mr. Miller was at that time on a visit to Republic.

"Republic has been a trifle unfortunate, senator?"

"Well, Republic has hardly made good," was the reply, "but efforts are being made now to recover values along some new and scientific lines of work. Mr. Traylor, of the Traylor Engineering Works of Pennsylvania, and Mr. Tate of Spokane, president of the Quilp, are now in Republic investigating, and Mr. Traylor will probably join me this morning."

The senator is a tall, portly man, close onto the three score years and ten, but seems to enjoy traveling. He was not complimentary about the Great Northern service between this point and Spokane, which he regarded as the toughest bit of travelling between here and New York. He was delighted with the climate of B. C., and referred optimistically to the progress with Dominion Copper matters.

M. M. Johnson is a well known figure in mining circles. Born 50 years ago in Pennsylvania Mr. Johnson is a wiry, spare, man who carries his age well, and is evidently full of vim. He worked first in the coal regions, and later came to Utah where he has won a first class reputation as a mining engineer. Mr. Johnson has just come from a trip through the famous Death Valley in California. He made the trip in an automobile and laughingly explained that the journey took 50 hours for which he was charged the tidy sum of $9 per hour, or $450 all told. The party took forty gallons of water with them, but Mr. Johnson did not appear to be vastly impressed with the mineral conditions.

"There are some good copper showings of course," he said, "but no great amount of work done to prove the existence of large bodies. Patsy Clark is operating in the Furnace creek district but I was not allowed to see the workings, a thing which cannot be regarded as a good sign."

Asked as to conditions of the Dominion Copper Co.'s properties Mr. Johnson spoke in a very sanguine strain. "The Rawhide never looked better than it does today, and has certainly passed my expectations. Yes, values are good and there is a gratifying per centage of iron magnetite. The lime and iron more than offset what silica the Rawhide ore contains. I should consider it a little better even than the ore of the Brooylyn and Stemwinder, and we are disclosing a big tonnage. The Idaho is developing extremely well, and though we do not propose to do any stoping yet, we shall ship ore mined in development work to the smelter shortly. The Idaho will be developed on a large scale. The hoist is partly installed, and will be operated by steam until the electrical connections are ready. A compressor plant capable of working forty to fifty drills will shortly be installed at a cost of $30,000."

Mr. Johnson states that the big new furnace for the smelter at Boundary Falls should be here next month, and when blown in will make the daily tonnage smelted about 1200 tons. Asked as to the possible erection of a new smelter Mr. Johnson replied that it was somewhat early yet to formulate plans. The mines would be thoroughly developed and smelter arrangements would be made to fit in with the general progress of the mines which were at present in an extremely satisfactory condition. Neither senator Miler nor Mr. Johnson could say much as to their work in Franklin camp. The company has a bond on the Gloucester group and are now at work upraising in the tunnel but development is not sufficiently advanced to state what action the company will take

To be forced to blast with powder before he could get water to drink was the novel experience of a well known prospector in this district, Mr. E. R. Knight. In relating this strange occurrence last evening in an interview with your correspondent Mr. Knight said: "I have been doing development work for the past few weeks on my claims on Bonanza mountain and they are situated over a mile up the mountain from the river crossing. On the claim I was working on, however, was a dry creek, and on this old river bed I dug a small well about four feet deep. In finishing the well I made one shot with powder and was surprised immediately after the shot to find the well filling up with fine spring water. It took about half a day to fill the well to the brim and then the water would start and run out taking about two days to empty the well. When the well became empty I would put in another powder shot and at once the water would come each time the shot was made. I kept this up for over two months and had excellent water to use all the time. I may say that before putting the second shot in the well I tried to get water by digging it deeper but failed until the powder was used. If I had not been able to secure water by blasting in this way I would have been forced to abandon my mining work for want of fresh water."

NO ONE IS BLAMED

INQUEST HELD OVER BODY OF THOMAS H. CORKILL.

WAS KILLED BY ENGINE WHILE LYING ON THE TRACK.

(Special to The Daily News)

Phoenix, B. C., Aug. 8.—Coroner A. S. Black, of Greenwood, yesterday afternoon held an inquest on Thomas H. Corkill, who was killed late Saturday night by being struck here by a Great Northern locomotive on an unfrequented part of the Granby switchback. The jury consisted of Walter Morrison, N. Lemieux, Gust. Johnson, J. Frank Jones, John Tipich and David Smith. The witnesses were Thomas Kermeen, cousin and partner of the unfortunate miner; Arthur E. Bodey, engineer of engine No. 720, by which Corkill was killed, and W. H. Weise, his fireman. After hearing the testimony the jury gave a verdict to the effect that deceased came to his death by being struck by the locomotive at 10:55 p. m., August 4th, while lying between the rails on the Great Northern track, and that no blame was attached to the trainmen.

The funeral of Corkill was held this afternoon at 1 o'clock, under the auspices of Phoenix Miners' Union, No. 8, the interment taking place in Greenwood cemetery, deceased being a member of Greenwood Miners' Union.

A SCIENTIST'S PROTEST

PRESIDENT OF BRITISH ASSOCIATION IS BADLY TREATED.

RETIRED FROM POSITION IN BRITISH MUSEUM UNEXPECTEDLY.

London, Aug. 8.—In a letter to the Times, published this morning, Edwin Gray Lancaster, president of the British Association for the Advancement of Science, protests against his compulsory retirement from the post of director of the natural history department of the British Museum under the civil service superannuation act, with the inadequate pension of $1,590 a year, which is all the regulations entitle him to receive. He explains that he gave up a life professorship at Oxford at a salary of $4,500 a year when he was appointed to the museum at a salary of $6,000, and he supposed, as had been the case with previous directors at the museum, that he would be allowed to hold his post until he was 70 years of age and that there would be a special pension arrangement. Instead of this, however, he is retired at the age of 60 without a word to explain the reason of his dismissal.

TARRED AND FEATHERED

SYRACUSE MAN'S ROUGH LESSON IN MORALITY.

WOMAN IN THE CASE BEGGED CROWD TO LET HER OFF.

Syracuse, N. Y., Aug. 8.—At East Syracuse last night a crowd of 50 men went to the house of Frak L. Rice, a railroad employee, and found there Edward Connors, another railroad man whose attentions to Mrs. Rice the villagers have for some time objected to. Connors was hiding in a bathroom, and was dragged into the street, stripped of his clothes, and painted from head to foot with green paint, in lieu of tar. A coat of feathers was then added. The crowd threatened the same punishment for Mrs. Rice, but she begged on her knees for mercy and promised to leave the village.

After being released, Connors returned to the Rice home, and, securing a gun, threatened to shoot anyone who appeared. For several days Connors and the Rice woman have received warnings and orders to leave the village, but paid no attention to them. The woman's husband is absent from home on business.

DETERMINED TO DIE

NEW YORK JOURNALIST MAKES THREE FUTILE ATTEMPTS.

PLUNGES DOWN STAIRWAY, THEN JUMPS IN FRONT OF TRAIN.

New York, Aug. 8.—Cecil B. Smith, 43 years old, a newspaper man, made three unsuccessful attempts to commit suicide today. First he threw himself headlong down the stairway of the 50th street subway station, sustaining a few bruises. After he was assisted to his feet, he walked up the stairs on the other side of the station and again dived down to the platform below. Breaking away from two reporters who ran to his assistance, he threw himself upon the tracks, but was rescued barely in time to save him from being run over by an approaching train. It is believed his mind was affected by the hot weather.

CANADIAN CHAMPION BEATEN

St. Johnbury, Vt., Aug. 8.—The defeat of Irving Wright, of Boston, tennis champion of Canada, by Edward B. Cornwall, of Princeton, 3-6, 6-3, 7-5, was the feature of the second day's play in the Vermont state tennis championship tournament here today.

HE KEEPS HIS WORD

D. W. Bole, M.P., Spreads the Fame of Nelson's Fruit

Predicts "One Vast Garden Stretching From Revelstoke Through Kootenay" —the Labor Problem

Winnipeg, Man., Aug. 8.—"I was amazed to find the fruit industry at Nelson had reached such proportions. I visited several fruit ranches and could hardly believe that so many apples could hang on the one tree as I saw there," said D. W. Bole, M. P. and president of the Canadian Drug company, who has returned from a western trip. Mr. Bole in connection with his business, visited Regina, Calgary, Revelstoke and Nelson. "Nelson has always been looked upon as a mining town and its progress is supposed to depend on the progress of mining work. Today this condition of affairs is to a great extent changed. The people have discovered that the land adjacent to the city is most admirably adapted to the growth of all kinds of fruit. Apples, pears and cherries I saw, and small fruits are grown in abundance. The fruit industry will give stability to the city. I anticipate that in time the entire district from Revelstoke to Kootenay Landing will be one vast fruit garden. I took a trip up the Kootenay lakes with a friend, and had an opportunity to see things for myself."

"Is there any difficulty in securing labor to harvest the fruit," asked the reporter.

"Speaking without any specific knowledge of the subject," said Mr. Bole, "it appears to me that cheap labor will be required to make the fruit industry profitable in the face of the competition from other parts of the province and in the state immediately to the south. Already at Nelson there is considerable agitation over the question of Chinese labor."

"I notice that a Nelson paper quotes you as saying that an army of 180,000 men will be required for the harvest and railway construction in the west. Did you find the harvest as great as that."

"That was a misrepresentation. What I said was that I thought the immigration for the year would be 180,000 and of these there would be required at least 50,000 for the harvest and for railway construction," replied Mr. Bole.

Mr. Bole states that the progress over the entire part of the country visited by him was marked. He visited the same territory last year and was in a position to note the growth.

"In all the towns I visited one of the remarkable things noted was the extraordinary advance in the price of farm lands and city property. In Nelson the fruit lands have jumped from $50 to $100 per acre and the city property has also made a rise. Regina property has made a great advance since last year. In Calgary prices are going up fast."

NELSON'S NEWS OF THE DAY

The regular monthly meeting of the board of trade will be held this evening in the rooms at 8.30.

Mayor Gillett visited the city power plant late yesterday. The residence buildings are all completed and four men are at work. Pending the arrival of the long delayed hydraulic machinery no further progress of moment can be made. The bush fires raging along the road have destroyed a couple of the poles for carrying the power line, and injured others.

The Kokanee brought back a delighted party at 2 o'clock this morning from Pilot Bay where the Nelson Aerie F. O. E. held a most successful moonlight excursion. A more perfect moonlit summer night could not have been got. There was plenty of music from the Nelson band and orchestra and the pavilion dance was a treat to all who took part in it. An unusually large crowd took in the trip.

The three tax bylaws which passed their third reading at the last council meeting provide for interest and sinking fund on $50,000 city debentures for which 2 1-2 mills on lands and 2 mills on improvements will be levied; also interest and sinking fund on $175,000 city debentures for which 15 1-2 mills on lands will be levied, and also $13,000 for general current purposes for which 11 mills will be levied on lands, making the total levy 29 mills, as against 28 last year.

The smoky haze, so familiar last summer has again spread all over the surrounding country, and bush fires are reported at several points. The fire causing the greatest destruction at present is raging west of the divide on the other side of Little Slocan, where some very valuable timber is being burned up. Along the western end of the granite road another bridge was burnt yesterday and the fire has gone some distance down towards the city power plant. The fire at Port Hill which came over from the states and which threatened to do great damage is reported by provincal constable Wilson at Creston, to be now under control. A heavy rain is badly wanted in this neighborhood and all over Kootenay, otherwise the existing fires threaten to obtain highly dangerous proportions.

Lewis Rowe, a Rossland "incorrigible," is a guest of warden Lemon's, en route to the provincial reformatory at Vancouver. The boy is only nine years old, but neither his parents or the Rossland police authorities have been able to do anything with him. He was convicted recently of stealing a watch and the police magistrate decided to send him to the reformatory for a couple of years and try the effect of the treatment. Other Rossland youths may be sent to the same abode, if they do not mend their ways.

All arrangements have been completed for the 20,000 club's weekly oncert and dance at the tramway park this evening. Mrs. J. C. Gore, Mrs. T. G. Procter, Mrs. Herbert Fullerton, Mrs. H. C. Briggs and Mrs. Melville Parry have kindly consented to act as lady patronesses. There will be a concert up to 9 o'clock and then the dancing will commence. The prize waltzing will begin at 10 o'clock. There will be a 20-minute car service from 8 o'clock and the last cars will leave the park at midnight. The grounds will be illuminated, the band and orchestra will be on hand and no effort has ben spared to make the dance an enjoyable event.

LORD KELVIN PROTESTS.

London, Aug. 8.—Lord Kelvin has written a letter to the Times concerning the recent discussions before the British association for the advancement of science. He protests against the idea of the gradual evolution of one metal from the other. He also expresses himself as against the hypothesis that the heat of the sun or the earth is due to radium; he believes it to be mainly due to gravitation.

BIG SUMS FOR RELIEF

RUSSIAN GOVERNMENT APPROPRIATES MANY MILLIONS OF DOLLARS

WILL BE USED TO FEED STARVING PEASANTS IN FAMINE DISTRICTS

St. Petersburg, Aug. 8.—M. Onipko, the peasant member of the last parliament, who was captured red-handed at Cronstadt after the mutiny there, will be tried, it is semi-officially announced, according to the rule for inciting and participating in a revolt, the penalty for which is death. The authorities hope that the case will involve several ther prominent extremists in the late parliament and prevent their re-election to any future parliament.

The ministry already is beginning a far reacing campaign preparatory to a more tractable parliament in December. It is noticeable that their first step was taken through the police, who were asked to report on the possible government candidates for seats

The cabinet today discussed measures of famine relief. It was decided to recommend credit of $27,500,000 in addition to the $7,500,000 voted by parliment for this use, $25,000,000 of which sum is to provide food and employment to keep the stricken population from starvation and the remainder for the purchase of seed grain. Among the public works recommended are the construction of flood embankments, ports and other improvements on the Volga, in which unskilled labor in the chief famine distrcts could be employed and for which $550,000 were voted at the recommendation of premier Stolypin.

The cabinet also voted to extend the "state of extraordinary reinforced security" to all districts of the empire where the semi-annual limit is about to expire.

The official telegraph agency tonight reports the formation at Yekaterinoslav, of a reactionary organization whose purpose is to exact life for life, for every official killed by the devolutionists. The murder of the ex-deputy Hertzenstein is an example of this procedure. The agency also reports an encounter between police and workmen at Kostroma, during which Cossacks were summoned and dispersed the crowd with a volley. No mention of the casualties is made.

Moscow, Aug. 8.—The police have captured a store of rifles and many revolvers and posters issued by the revolutionary fighting legion. Several members of a new revolutionary committee also were captured and 36 suspects have been expelled from the city.

Usoka, Aug. 8.—Another collision between strikers and troops occurred today at the Alexieffskain line in the suburb of Bogodugovsky, following the outbreak of fighting between two factions of workmen. Two men were killed and many were wounded. A number of leading agitators were arrested.

Odessa, Aug. 8.—It is said the revolutionists here are planning a general strike.

St. Petersburg, Aug. 8.—The constitutional democratic leaders are undecided as to what course to pursue. They appear to be waiting developments. Professor Milukoff has gone abroad, and M. Petrukevtch frankly admits that he does not know what to do.

STANDARD OIL JOLLIFICATION.

Tulsa, Ind., Aug. 8.—With the completion of a new pipe line the mid-continent oil field is in direct communication with the Standard Oil company's eastern terminus at Tidewater. In the presence of Standard Oil officials the new line was christened with a bottle of wine.

CARDINAL RAMPOLLA ILL

Rome, Aug. 8.—It is reported that the health of cardinal Rampolla has broken down. There is little hope of his recovery.

DAWSON'S SUCCESSOR

A. P. Low, Deputy Head and Director of Geological Survey

Is Visiting Nelson Today With W. R. Brock to Study Kootenay Conditions From Departmental Standpoint

A distinguished Canadian arrived in the city last evening in the person of Albert Peter Low, deputy head and director of the Dominion geological survey department Ottawa. Mr. Low left Ottawa a fortnight ago and spent yesterday and the day previous in looking over the situation at Rossland and at the Trail smelter. He came here last evening, accompanied by R. W. Brock, who with J. H. Boyd, also of the survey department, has been engaged in special work at Rossland since May last. Mr. Low will spend a couple of days in Nelson and will then go on to the Boundary country and later still to the Similkameen after which he will proceed to the coast.

Mr. Low was promoted last March to his present important position. Hon. William Templeman is now head of the survey department and in view of the creation of a department of mines with Mr. Templeman as its head, as is now confidently looked for, Mr. Low's visit here is of added importance to all interested in the mineral industry in Canada and especially in British Columbia.

Mr. Low is a man in the prime of life who as an explorer in the great Hudson's Bay country and Labrador has already carved out a name for himself in Canadian history. Since assuming his new duties as deputy head and director of the geological survey department he has instituted several improvements of note and has succeeded in bringing the department in a practical way in close touch with the Canadian public.

Called upon to supervise a great deal of work done in the west, Mr. Low has snatched a brief respite from his work in the east, to visit out here for the first time in order to understand the situation more perfectly. He has been in the department practically since 1882, and is credited with honestly desiring to emulate the efforts of his distinguished predecessor in office, the late Dr. George Dawson, in placing the Canadian geological department in the world's first rank.

Mr. Low will visit the Hall Mining and Smelting company's plant this morning and will also inspect some nearby mining properties. Mr. Low is a guest at the Hume.

Referring to the work of his department generally Mr. Low states that favorable reports have come in showing that the work is everywhere progressing favorably.

From Dawson word has come that the work of estimating the volume and value of the gold-bearing bench gravels is well under way.

In British Columbia Mr. LeRoy has finished the examination of the coast section from the international boundary to Burrard inlet and is now continuing it in Howe sound. He has traced out the rocks on the coast containing economic minerals and will carefully study the more important areas of Howe sound.

Mr. Cambell in the Similkameen has finished the mapping of the Princeton coal basin, and has left to examine the Roche river, Kennedy and Copper mountain camps along the South Similkameen from the international boundary northward.

Mr. Brock reports good progress in the detailed study and mapping of Rossland camp and sees no difficulty in completing the work before the end of the season. He has sent for analysis specimens of sands from Little Sheep creek, which he expects contain platinum, along with a considerable amount of gold.

No word has been received from Mr. Leach, in the Bulkley valley, nor from Mr. Dowling who is tracing northward the anthracite coal area on the eastern slopes of the mountains.

From the plains Prof. Macoun writes frequently and enthusiastically concerning the soil and crops of the country along the line of the Grand Trunk Pacific railway to the west of Manitoba, while Mr. Chalmers has been employed giving advice as to the clays and the boring prospects in the same region.

The parties of Mr. McInnes and Mr. O'Sullivan who are exploring the country between the Saskatchewan river and Hudson bay have not been heard from nor has word been received from Mr. Collins nor Mr. Wilson in Northern Ontario and Quebec.

Dr. Barlow, who's party is working in Quebec to the east of Cobalt, reports fair indications of mineral in the district, but owing to a thick covering of clay, discoveries are slow and difficult to make.

The International committee on the classification of the older rock formations is at work in Northern New York and will transfer their field of investigation to Eastern Ontario towards the end of July. Dr. Barlow is the official representative of the survey on this commission.

UNION LABEL

DEPORTATION OF AMERICANS.

The decision of the Judicial Committee of the Privy Council of Great Britain, sustaining the judgment of the Supreme Court of Canada, ordering the deportation, under the Canadian Alien Labor act, of citizens of the United States who had been employed by *the Pere Marquette railroad on the* Canadian side of the line, declares the absolute right of the Canadians to prevent foreign subjects or citizens of any kind from working under contract in Canada. This has aroused the ire of some of our journalistic friends on the other side of the line. They take it almost in the light of a conspiracy to cut the Americans out of earning a frugal dollar.

The New York Press warns us: "The Canadian government has the power, but if the Canadian people are wise they will be extremely conservative in the exercise of that power. The deportation of all the Americans working in Canada would cause some inconvenience, but the deportation of all the Canadians now making their fortunes in the United States would be somewhat calamitous to the Canadian people. The harsh enforcement of the remarkable Canadian alien act would lead to retaliation and reprisals."

For this splenetic utterance the Press gets some good natured badinage from the Montreal Star: "It would seem strange to see the *army of Canadians*—among them leading university presidents, distinguished divines, most famous doctors, lawyers, newspaper men, engineers, politicians, actors, artists—marshalled two by two, headed by Jim Hill with his railways under his arm, and marched back into Canada." It would be just as strange, adds the Star, to see Canada gathering all those *who had been former citizens of Uncle* Sam's, including some hundreds of thousands of all ranks, and bundling them back over the border.

The Press suggests that Canadians who went over the line to make their homes did so to "make their fortunes." It is quite probable that when an energetic school master gave up the rod and book in Halifax and went to New York to found the nation's greatest representative paper, he had financial possibilities in view. Others who joined the exodus afterwards, from the girl to work in a cotton mill to the engineer in charge of the Panama canal works, may have expected to get some slight remuneration for such humble services as they performed. It is probable that the fifty thousand Canadians who went over and fought in the armies of the North in the Civil War did so more for adventure than gold. At the same time it is possible that some of the citizens of the Republic who crossed into Canada did not come entirely for their health, nor have they all failed to earn three square meals. As our two greatest railroads have at their heads gentlemen whose earlier years were spent in the United States, and they are deemed level-headed business men, it would seem as though Canada was not itself without opportunities for the ambitious.

But these movements of exiles are not going to be put among the early exhibitions, because the governments and people of neither country are insane. Canada was not the first com*munity on this continent to pass* laws restricting the employment of alien labor, nor have the Canadian authorities been the harsher in administering such laws. The United States are constructing the Panama canal as a national enterprise. They make it a condition of the work that no one other than a citizen of the United States can tender, that no foreign capital or supplies can be used. In Canada we are building another transcontinental railway, with enormous assistance paid for by the people of Canada. The work is open to the world, and tenders from the United States have been and will be received. The way in which engineers were employed from the United States, while it was alleged there were many competent men in Canada overlooked, made the Canadians stand up and stare.

THE PEOPLE ALL

in Chorus Cried, Give Us Newbro's Herpicide.

This word of late has been in everyone's mouth, and many are wondering what the word signifies, though no one has yet been found, who will deny that NEWBRO'S HERPICIDE does the work. Well, for the information of thousands of people who like to know all about a good thing, we would say that HERPICIDE means, a destroyer or killer of "Herpes." Now "Herpes" is the family name of a disease caused by various vegetable parasites. A similar microbe causes Dandruff, itching scalp, and falling hair; this is the microbe that NEWBRO'S HERPICIDE promptly destroys; after which the hair grows. Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich

CANADA DRUG & BOOK COMPANY, Special Agents, K.W.C. 146 2

EDITORIAL NOTES.

President Roosevelt has shown that *he is big enough to overstep the bounds* generally set by pride of purse and official custom in contributing a one dollar bill to the republican national campaign fund. The republican committee recently decided that it would be better to secure a multitude of small donations from the rank and file of the party than to accept a few princely gifts from interested captains of industry and finance. Accordingly, an appeal for dollar subscriptions was sent out, and President Roosevelt was one of the first to step in line. The last presidential vote showed that there are at least 7,600,000 republicans in the United States. If even one per cent follow Roosevelt's example, the fund will amount to $76,000.

How sparingly the Imperial veto is used nowadays is evidenced by a return recently laid on the table of the British House of Commons. It contained a list of all the recent acts passed by full self-governing colonies which have been disallowed by the Imperial government. They are twelve in number, but in one case only was the Imperial veto exercised in the interests of the colony itself. This was an act of the Newfoundland legislature in 1897 to amend the electoral law, and it was disallowed on the ground that it would have enabled public money to be used for undesirable purposes at elections. In five out of the twelve colonial acts that were disallowed the ground was that they were "directed against particular races" or contained "racial disqualifications."

The Toronto Globe blames Vancouver for the publication of The Colonist. The Globe owes Vancouver an apology. The responsibility rests with Victoria.

The "Gillies limit" in Cobalt, Ont., to which reference was made in the telegraphic columns yesterday in the report of an eastern forest fire, is one of Ontario's lucky strikes. The land is right in the heart of the mineral district already so well known for its immense stores of wealth. The timber alone will bring in a revenue of several million dollars, and in addition to this the province is seriously considering a proposition to mine the property on

business principles. Ontario is already a wealthy province; if it keeps up its present gait, it will soon become insufferably rich. Readers should remember that the right of way of the new provincial government-owned railroad *to James Bay runs through the* Cobalt region and that mining rights on this valuable strip of land have been leased to a company which is to pay the government twenty-five per cent on the gross output.

As news gatherers the Vancouver papers are enterprising. If real news is available, they use it; if it is not, *they make it. The World has just dis*covered that a son of Kuropatkin, the fire eating Russian general who was nearly eaten up by Oyama, recently tamped gravel on a Vancouver city street gang. Before the tale was printed, of course, young Kuropatkin had gone to Seattle.

"Southern British Columbia," is the title of a well printed and illustrated booklet issued by the C. P. R. as a means to direct incoming settlers to lands in the Kootenay, Boundary and Okanagan districts. The little volume is worth securing and sending to friends in the east who may be open to temptation to move westward. A valuable feature of the book is a resume of the Dominion, provincial and C. P. R. *terms upon* which unoccupied lands can be taken up.

The bones of King Richard, the Lion Hearted, will soon, it is expected, rest in English soil. King Richard was entombed many centuries ago in the ab*bey of Fontevrault, near Saumar, in* the valley of the Loire. France was the place of his death, in battle, it will be remembered. In 1869 the British government asked Napoleon III to permit the removal of the bones, but the Franco-Prussian war interrupted the negotiations. The British ambassador now in Paris has lately reopened the question, and an agreement is expected at an early date.

Dr. Mills, a member of the Canadian railway commission, had a rather unpleasant experience at Ottawa a few days ago. The story has just leaked out—a story which the lynx-eyed reporters around the parliament buildings were evidently bribed to suppress. Dr. Mills was a prisoner in his own of*fices for an hour one afternoon.* The janitor went off at 5 o'clock, locking the offices tight, not knowing the commissioner was in his room. Dr. Mills could not get to the phone, but succeeded in attracting the attention of men on a hose reel that was passing and they succeeded in opening a lower window, out of which the doctor climbed.

It ill be interesting to watch developments at the St. Eugene. The men some time ago circulated a petition asking the company to grant an eight-hour day, and in their petition set August 10 (tomorrow) as the date when a reply would be expected. The men want the eight-hour day at the present scale of wages.

FEARED JAIL BREAKING.

National Guard Patrols Prison to Prevent Liberation of Lyncher.

Charlotte, N. C., Aug. 8.—Last night three companies of the national guards surrounded the jail at Salisbury, while *sentries with orders to shoot to kill,* patrolled the four streets that flank the prison. Threats had been made all day and into the night, but there was no *demonstration.* Crowds thronged the city's streets far into the night. George Hall, an ex-convict who is supposed to have led the mob that lynched the alleged murderers of the Lyrley family, is in the jail. The plan to rescue him, rumors of which caused governor Glynn to hurry troops to Salisbury, has not materialized. The surviving negroes, Henry Lee, George Ervin and two women are in the jail at Charlotte and there is no danger of violence to them.

IRISH McBRIDE DIVORCED.

Paris, Aug. 8.—The civil tribunal of the Seine today confirmed its decree granting Mrs. McBride, known as the Irish "Joan of Arc," a judicial divorce from her husband, major McBride, who was a prominent member of the Irish brigade of the Boer army during the war in South Africa but the tribunal refused to grant her an absolute divorce on the ground of her Irish nationality. Mrs. McBride was awarded the custody of her child. The major's cross bill was over-ruled.

THE POPE'S SOLUTION.

Paris, Aug. 8.—A rumor is prevalent that instructions from the pope to French bishops relative to the law of separation of church ad state have ben received here. It is declared in a well informed quarter that the Vatican considers the enactment of this law to be a dead letter, and does not recognize the principle that lay associations can govern churches. The Vatican overcomes the difficulty, however, by permitting for this purpose the formation of Catholic societies under the bishops.

DECLARE OPEN SHOP.

New York, Aug. 8.—The executive committee of the employing lithographers' association met here today and declared an open shop in all branches of the industry. It was said that 30,000 men through the country are affected by this action. When the national strike was begun by the lithographers, the employers declared an open shop in the case of lithographers only. It was officially announced tonight that the open shop declaration now affects stone *grinders and artists and other workmen.*

U. S. SAILORS MUTINY

Philadelphia, Aug. 8.—It became known today that five marines are in double irons on board the receiving ship Lancaster at the League island navy yard, and ten sailors are under arrest as the result of a *mutiny on Monday night in which two of* the mutineers were badly injured.

HAS CARDS UP HIS SLEEVE

Buffalo, Aug. 8.—Major J. Adam left this city very quietly last evening for Quebec, from which point he will sail on the steamship Empress of Ireland, of the Canadian Pacific line. He will be absent about a month.

POISONED BY SALMON

Winnipeg, Aug. 8.—The body of Herbert J. Smith was brought to Vermilion, Alberta, today, the deceased dying after eating canned salmon in a railway construction camp, 40 miles south of here. Three other members were taken violently ill but will recover. Smith served with distinction in the South African war, receiving the title major. He studied medicine for three years in Canada.

YOUNG PREACHER DROWNED

Vermilion, Alberta, Aug. 8.—J. A. MacQueen, Presbyterian missionary 20 miles west of here, was drowned in the lake, near town, while bathing. His parents reside at Beaufield, Ontario.

STANDARD OIL INDICTED

Chicago, Aug. 8.—The federal grand jury this afternoon returned an indictment against the Standard Oil company charging it with having illegally received a railroad rebate on storage charges.

THE JAPS ARE SATISFIED

SHOOTING OF POACHING SEALERS NO CAUSE FOR TROUBLE

INTERNATIONAL CMPLICATIONS NOT AT ALL PROBABLE.

New York, Aug. 8.—A special despatch to the Herald from Dutch harbor, Alaska, says:

"Five Japanese were shot and killed on the island of St. Paul, of the Pribyloff group by order of the agent of the department of commerce and labor on July 17, as the result of a raid by four Japanese schooners on the seal rookeries.

"The revenue cutter McCulloch reached here today from St. Paul with 12 prisoners, two seriously wounded who were turned over to deputy marshal Harmon. The raiders were discovered lying near the northeast point of St. Paul by native lookouts of the North American Commercial company, which leases the seal privileges from the government. Word was telegraphed from the patrol station near the rookery for which the raiders were aiming, and special agent Lempkie, of the department of commerce, on duty in the Pribyloff islands, arrived on the spot as the Japanese reached shore. He ordered the boat crew to surrender, which they did. On climbing the promontory at the end of the cape overlooking one of the larger rookeries a schooner was seen close in shore. Looking straight down over the cliff was a dozen or more Japanese skinning a great number of seals, which had been slaughtered indiscriminately.

The raiders refused to surrender when Lempke reached the scene and tried to make off with their booty in small boats, several of which were then drawn up on shore. The agent then ordered his guard of natives to open fire. The Japanese offered no resistence, being without fire arms. Three of the raiders fell dead on the beach, a fourth was seen to be thrown overboard from one of the boats that escaped, and a fifth body drifted ashore later in another boat. The men had killed more than 200 seals, many of them cows. Those who escaped carried away more than 120 skins. The raid is believed to have been a concerted effort by the Japanese who have been hanging around the island for months and giving the revenue cutter trouble.

The Tokwa Maru, a schooner, was overhauled by the cutter Perry on July 5, off the New Volcanic island which rose near Bogoslogo, 40 miles from here last March. She was crowded with Japanese but no seal skins were found aboard. The suspicion of captain Donwoody, of the Perry, was aroused and he went to the Pribyloffs at once, but a dense fog set in and lasted until the Perry returned here on July 16. The McCulloch reached the island on July 20 and took charge of the prisoners.

Besides the Tokwa Maru the schooner Bosso Maru is known to have been in the raid last autumn. Japanese were found fishing and trading with natives on the island of Attu, the westernmost in the Aleutian chain and were routed by the Perry. The raid is the most serious that has ever occurred in the troubled history of the rookeries. The last attempt to raid the island was made about ten years ago by a schooner flying the Mexican flag. She was intercepted by a cutter sent out for the purpose and many prisoners were taken after the raid, but were allowed to return to their vessels, as the guard was considered insufficient to control so many. The prisoners buried their own dead on the beach. In trying to return to the seal islands with agent Lempke on July 22 the Perry broke her cylinder pump a mile from shore and was put completely out of business. This leaves the patrol short of vessels and the islands unguarded.

The Thetis is in the Arctic, the Rush is on duty at Nushagak, Bristol Bay, the Bear is out of commission and the McCulloch is under orders to proceed to Sitka to take on board the governor of the district and land fish commissioned Bower, now at St. Paul, on Kodiak island. Two prisoners left on July 25 on the monthly mail steamer for Valdez where the court of the second judicial district, in which the Seal islands lie, sits in August. The charge will probably be piracy.

Washington, Aug. 8.—Acting secretary of state Bacon has sent to ambassador Wright at Tokio, the substance of the despatch received by the department of commerce and labor from solicitor Sims at Sitka, Alaska, regarding the killing of Japanese fishermen on St. Paul island. In sending the despatch the acting secretary states that it is forwarded for the purpose of giving information such as this government has of a regrettable incident, news of which may reach Japan in distorted shape. There is no intention of offering an apology or any further regret than contained in this despatch as the state department regards the Japanese fishermen as poachers if they were within the three-mile limit, and the despatch from Mr. Sims emphatically states this as a fact. It is stated that the American fishermen in Newfoundland waters, if within the three-mile limit, would be subject to arrest by the British authorities and would have no redress as they would be poachers the same as the Japanese.

The government of the United States will take no further active interest in the matter save that the prisoners must be tried by United States authorities and according to United States law. It is not intended to send any more revenue cutters into Alaskan waters as it is understood that the ships now there are sufficient to protect the interests of the United States citizens. The raiders were repulsed by the agents of the lessers of the island and not by the United States authorities. Special agent Lempke, referred to in solicitor Sims' despatch, is not connected with the government but is the agent of the company which has leased the island. After discussing the matter with assistant state secretary Bacon today, Mr. Minoka, the Japanese charge de affaires, claimed that it was not a case to cause an international incident.

The following contains the main features of the despatch of Sims:

"Fur seal rookeries, St. Paul island, were raided by crews of Japanese schooners July 16 and 17; about 200 seals were killed, but raiders were eventually repulsed as a result of the courageous action of chief agent Lempke and assistant agent Judge at the head of the native guards Five raiders were killed and 15 captured, two of the latter being badly wounded. Three boats and some small arms were also captured by the force protecting the rookeries. The schooners were first observed on July 16 and were close to shore, easily within the three mile limit. On this day the boat crew of six men, which had landed at the northwest point, were suprised and captured by agent Lempke and the native guards without a casualty on either side. On the morning of July 17 two native watchmen shot and killed two and wounded one of an armed landing party. The crews of the schooners, under protection of a fog, shot seals in the water close to shore most of the day. During this time shotgun firing, which could easily be heard from the shore, was frequent. It is unknown how many seals were killed in this manner but the number must have been considerable. On the evening of the same day the crews of at least three schooners made concentrated raids on the rookeries. The raid on the Seapandi rookeries was repulsed by native guards after considerable firing. The raid on the northwest part was partially successful Owing to a dense fog the raiders were not discovered until nearly 200 seals had been killed. The raid, which was apparently participated in by an entire ship's crew in five boats, was repulsed by agent Lempke, and a native force, and three raiders were killed and five captured. Most of the seals killed in the water were females in search of food for their young. During the time I was on the island, schooners were frequently sighted less than three miles from shore. It is evident that at least eight or ten schooners, believed to be Japanese, are sealing in close proximity to the islands. The 12 prisoners were taken on the cutter McCulloch to Kodiam and after a hearing before the commander were held for the jury and taken in charge by marshals. The Japanese killed by the American officials stand in the same position as burglars shot in the act of stealing, according to prominent authorities on international law. No international incident can result from the shooting of the Japanese poachers, it is said at the state department. This government has no amends to make to Japan other than those that courtesy may prompt and a mere expression of regret that such an incident should take place is all that is looked for.

$5,000 REWARD will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

Sunlight Soap

is a perfect cleaner and will not injure anything.

Best for all household purposes, Sunlight Soap's superiority is most conspicuous in the washing of clothes.

Common soaps destroy the painted or varnished surfaces of woodwork and take the color out of clothes.

Even the daintiest linen or lace, or the most delicate colors may be safely washed with Sunlight Soap in the Sunlight way (follow directions).

Equally good with hard or soft water.

Your money refunded by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

UNNECESSARY EXPENSE

Acute attacks of colic and diarrhoea come on without warning and prompt action must be taken. There is no necessity of incurring the expense of a physician's services in such cases if Chamberlain's Colic, Cholera and Diarrhoea Remedy is at hand. A dose of this remedy will relieve the patient before a doctor could arrive. It has never been known to fail, even in the most dangerous cases and no family should be without it. For sale by all druggists and dealers.

MAY DEPORT PREACHERS.

London, Aug. 8.—It is being suggested that a small party of American colored preachers, who have been advocating the Ethiopian propaganda, "Africa for the Africans," should be deported from South Africa. The government has not yet taken any action and it is a question whether it will. The agitation against the preachers has been revived by the recent trouble at Cape Town for which they are held by certain leading papers to be partially responsible. They have made no secret of their mission to South Africa, advising the natives to use their efforts to secure supremacy in that part of the world.

J. S. CARTER D.P.A., Nelson. W. P. F. CUMMINGS, Gen. Agt., Winnipeg

Synopsis of Regulations Governing the Disposal of Dominion Lands Within the Railway Belt in the Province of British Columbia.

A license to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths, excepting those situated west of Yale, for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:

Sawn lumber, 50 cents per thousand feet B. M.

Railway ties, 8 and 9 feet long, 1 1-2 and 1 3-4 cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent, on the sales.

A license is issued so soon as a berth is granted, but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B.M., for square timber and sawlogs of any wood except oak; from 1-2 to 1 1-2 cents per lineal foot for building logs; from 12 1-2 to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties, and 60 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of 21 years at a rental of 1 cents per acre per annum.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for homestead purposes may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the minister of the interior at Ottawa, the commissioner of immigration at Winnipeg, or the local agent for the district within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

It is the practice of the department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property, with buildings for their accommodation, will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of th Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the Act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so. W. W. CORY, Deputy of the Minister of the Interior.

MAY MOULD HOUSES

EDISON PROPOSES TO CAST CONCRETE COTTAGES.

SUCCESS MEANS CHEAP HOMES FOR EVERYBODY.

New York, August 8.—Whole houses moulded in a single casting out of solid concrete, which will provide cosy homes for workingmen at a cost from one-fifth to one-fourth of what the average mechanic pays today, is a goal which Thomas A. Edison is striving to reach by a plan he is confident will work out successfully.

Combined with economy of construction and maintenance the inventor aims to embrace architectural beauty and practical indestructibility in the project, by which he expects to revolutionize present methods of erecting the poor man's home. He intends next year to make the first practical experiments in moulding solid concrete houses in a new village near Warren Cove, N. J., just across the Delaware river from Easton, Pa. One of the big Edison industrial establisments is situated there, and he purposes to erect homes by the new process for the families of the hundreds of employes of the plant.

Describing in detail the plan he has devised, Edison said: "I purpose, after obtaining the designs, to have metallic moulds made to correspond with them. The mould for each house will be made in detachable parts. There will be separate plates and small moulds that can be screwed together easily to form one mould for an entire house. That a fine finish may be obtained the inside surfaces of the parts will be nickel plated.

"After a mould for a whole house is set up, it will be a very simple matter to pump concrete into every nook and cranny. The pumping process will not require more than a few hours. After four days that at most will be necessary for the hardening of the concrete the parts of the mould will be unscrewed and taken off, and a solid concrete house will remain."

The inventor says that under ordinary circumstances the concrete dies will not cost more than from $500 to $600 apiece.

"When my plan is actually put to practical use," he said, "mechanics earning $2.50 a day can live as well, so far as the quality and convenience of their homes is concerned, as men now earning $10 a day. It costs now about $2,000 to build a frame villa of the size and with the convenience of the proposed concrete houses. It costs now about $3,000 to put up a brick house of the same description. Neither a frame nar a brick house is anything like so durable as the concrete houses will be. To reproduce one of them in stone would cost $15,000."

Minard's Liniment Cures Garget in Cows

MAKE HAY WHILE THE SUN SHINES

There is a lesson in the work of the thrifty farmer. He knows that the bright sunshine may last but a day and he prepares for the showers which are so liable to follow. So it should be with every household. Dysentery, diarrhoea and cholera morbus may attack some member of the household without warning. Chamberlain's Colic, Cholera and Diarrhoea Remedy, which is the best known medicine for these diseases, should always be kept at hand, as immediate treatment is necessary and delay may prove fatal. For sale by all druggists and dealers.

Twenty minutes from the time you leave Baker street you can be on the ranch that Taylor and McQuarrie are offering for sale in this issue.

THORPE'S LITHIA cures and prevents gout.

THORPE'S LITHIA cures and strengthens the bladder and kidneys.

CZAR IS A SPIRITUALIST

HAS FIFTY SEANCES WITH THE FAMOUS PAPPUS.

MEDIUM'S NERVES ARE WRECKED BY THE STRAIN.

New York, Aug. 8.—A cable despatch to a morning paper from Vienna says: "It is rumored that it is the Czar's intention to abdicate. The circulation of this report is ascribed to the reactionary councillors violently opposing Premier Stolypin's reform scheme which the Czar supports. The story adds that the Czar will appoint Grand Dukes Vladimir and Nicholas Nicolaevitch as coregents.

Sosnowice, Russia, Aug. 8.—A bomb was thrown today into a crowded waiting room at the railway station. One man was killed and many were wounded. A panic ensued, resulting in injury to many other persons. Women fainted and children were trampled upon. The thrower of the bomb escaped.

Moscow, Aug. 8.—The strike here is virtually ended; most of the factories at which strikes were declared have resumed work. The prefect of police has ordered the proprietors of factories to refuse to pay the strikers for the time the factories were closed.

Warsaw, Aug. 8.—The territorists are continually attacking and robbing post-offices, government spirit shops, treasuries and the mail. The governor-general has ordered that henceforth the inhabitants of villages, communities and cities in or near which crimes occur shall pay the losses resulting from such robberies.

St. Petersburg, Aug. 8.—Premier Stolypin has gone to Peterhof to secure the Emperor's approval of the appointments of Prince Vassilchikoff as minister of agriculture, M. Filosoff, as minister of commerce and M. Iswolsky, brother of the foreign minister, as procurator general of the Holy synod.

Premier Stolypin's organ, explaining today the failure of Count Hayden and others to enter the cabinet, says that the emperor does not recognize the principle of the responsibility of the portfolio holders to dictate terms. At the same time, he admits the desirability of the co-operation of the non-bureaucrat elements in the inauguration of a policy which will have due regard for the national economic and ethical interests of the whole people. The Bourse Gazette announces that Pappus, the spiritualist, who is said to have had great influence over the emperor, has gone abroad for medical treatment; his nervous system is shattered by the press revelations. According to one paper, Pappus gave fifty seances to the emperor, receiving $27,000 as compensation.

Help for the Kidneys Through Gin Pills.

A GUARANTEED CURE.

Read this letter. Read it twice. You have never heard such good news before—if your kidneys are sick. It tells how to be free of pain—how to have all your old-time health and vigor.

"I have been for years a sufferer with pain in the back and across the kidneys. There was scarcely a minute, day or night, that I was free of pain, and when I attempted to pass urine, the pain was almost unbearable. A friend of mine in Portage la Prairie, who was similarly afflicted, strongly advised me to try Gin Pills, as they had cured him. I bought a box of Gin Pills, and in less than a week, to my great delight, found myself without pain. I have had to go as often as every 20 minutes to urinate and several times during the night. Since taking Gin Pills, I sleep through the entire night and am not more than ordinarily inconvenienced during the day. I can earnestly recommend Gin Pills to anyone suffering from pain in the back, kidneys or bladder.

Mr. G. O. C. GOWLER, Portage la Prairie."

Your druggist has Gin Pills, or will get them for you. 50c box—6 for $2.50.

If you will send us your name and address and tell us the paper in which you have read this we send you a trial box of Gin Pills absolutely free. You will get such relief that you will gladly continue the treatment until cured. Do it to-day—now—and start to cure yourself.

Address The Bole Drug Co., Winnipeg, Man.

BRINGS CRACK PLAYERS

ROSSLAND TEAM WILL HAVE EASTERN MEN ON THE FIELD.

TODAY'S GAME SHOULD PROVE A VICTORY FOR NELSON.

The big lacrosse match between the Nelson and Rossland teams to decide the tie which now exists between these two teams will be played at Recreation park this afternoon, commencing at 2 o'clock.

Over the 'phone last evening, Dr. McDonald, of the Rossland team, stated that they would make no announcement as to their lineup until they arrived here but he stated that on it would be some Eastern players, one of whom is Sangster, now en route from the East to play in Vancouver.

One thing is certain, the Rossland bunch will be strong. They will be even stronger than when Nelson went up against them in Rossland on July 16th.

Chief Deasy came into the News office last night with the lineup of the Nelson team. He left the lineup but went out still wearing that same smile. Here is the team which he figures will win today:

Goal, F. Bell; point, A. Jeffs; cover point, Joe Thomson (Capt.); first defence, Steart; second defence, Perrier; third defence, Davidson; centre, Bishop; third home, Steele; second home, C. Jeffs; outside home, R. Bell; inside home, Wallace.

They are trained down to the minute. Their manager has kept them in strict training for this match and that with Regina next week. The way Bert Davidson looked at a "coffin-nail" when it was laid down on the postoffice wicket yesterday was sad to see.

When Joe Thomson was told last night that there would be some Eastern players on the Rossland team he said that he didn't give a fig if there were a dozen.

The Nelson junior baseball nine go down to Trail this morning to play a game with the Trail team. The smelter team will visit Nelson for the return game during the fair. The Nelson team will line up as follows: R. Bard, catcher; W. Ebbs, pitcher; B. Stevens, 1st base; W. Brown, 2nd base; W. Sturgeon, s.s.; L. Jackson, 3rd base; S. Newitt, right field; J. Miller, centre field; F. Miller, left field. E. Ellis will accompany the team.

Los Angeles, Cal., Aug. 8.—Harry Baker, of San Francisco, amateur featherweight champion, and Frankie Neil fought 20 rounds before the Pacific Athletic Club here last night and Baker was awarded the decision. Tommy Burns refereed the bout, and his verdict in favor of Baker was loudly cheered. When the decision was announced against him, Neil stood in the centre of the ring dumbfounded. H then rushed to his corner, loudly protesting against and denouncing the decision. Neil showed severe marks of the encounter. His right eye was badly battered and swelled and his left eye and his mouth also showed evidence of having received hard punishment. Baker showed no marks at the conclusion of the fight. They were both strong. The fight was at catch weights.

LIGHT BUOYS FOR B. C. CHANNELS

Editor, The Daily News: One of the first steps in opening up a country is to make good roads, and in a city, or suburbs, the better the roads are lighted, the more rapidly does the traffic become developed. The same conditions prevail in regard to coast traffic. The peculiarity of the waterways of British Columbia render it imperative that every device known to the maritime world should be considered, and wherever it is possible improvements should be made.

New York has in preparation a wonderful electric highway for ocean steamships, which is to be 2000 feet wide, 40 feet deep and eight miles long, and as brilliantly lighted as a boulevard. "Ambrose Boulevard" is the name already bestowed upon it by navigators and sailing masters.

The plans for the new channel, which is to take the place of the present tortuous one for steamships approaching the lower bay from the ocean, have already been completed by the lighthouse board, and a $521,000 appropriation to build the highway has been made.

"The new channel," colonel Roselle, the engineer in charge, said, "will place New York far in the lead of all other ports. While gas buoys will be used largely, the general effect will harmonize with the electric lighting of Manhattan and the beaches near by.

"The plans in detail call for the location of modern light vessels at the sea entrance of the channel and directly in line with it a beacon light on Staten island. Midway in the channel, at what is known as the Bend, two range lights will be placed so that the navigator can never lose his range, no matter whether it be in fog, rain or snow. In addition to the principal lights small buoys will be fixed all along the course, making the ocean boulevard as light as day."

The lights will be evenly placed along both sides of the channel for its entire length of eight miles. On the Brooklyn and Coney Island side the lights will be red; those on the Staten island side will be white. Viewed from a distance they will look like two long parallel lines of fire, one red and one white, between which the incoming steamers must steer a course for port.

Beyond the small buoys which are to be equipped with lights of great intensity, other great lights will be seen above the water, and to the navigator in his darkened pilot house they will be so arranged that the lights at the entrance and the end of the channel will be constantly in line, and when the ship rounds a bend the turning lights can be readily held in place.

The plans for lighting the channel to be carried out are, in detail as follows: At the sea entrance of the channel a light vessel, cost not to exceed $115,000, is to be stationed. This is to give the navigator his bearings at the very mouth of the passageway. Directly in line with the light from the light vessel the navigator will sight a beacon on Staten island.

A new light house will be constructed on the hills of Richmond at a cost not exceeding $100,000. Midway in the channel at Swinburne island at what is known as "The Bend" there will be two powerful range lanters and structures for range lights.

In British Columbia we are peculiarly situated inasmuch as we have such splendid facilities for obtaining electrical power derived from natural water courses and it is within the range of possibility that the various channels on the coast could be electrically illuminated with power derived from the water falls, etc., in the vicinity. It must not be presumed that I am either dogmatically or dictatorially dealing with this question, but simply with a view of opening up discusson and bringing it to the notice of those so much more able than myself.

FRANK RICHARDS, J. P.

HENDERSON WINS.

Appeal of Lumber Company Dismissed by Full Court.

In Henderson vs. Canadian Timber and Sawmills the full court at Victoria by unanimous judgment have dismissed the appeal of the defendant company with costs. The registrar reported to counsel the judgment yesterday.

Wm. Henderson was the company's general manager at Trout Lake, under engagement entered into with Cecil Ward, while the company was being organized, the terms being that if he proved satisfactory he would be retained at $200 per month after the mill was constructed and running. The mill was running about a month before Henderson was discharged; and in the meantime the company was organized and had taken over the property. About the time the mill had commenced to run Henderson had been working one year and continued beyond the year without any other agreement. The company having gotten into difficulties, discharged Henderson without notice, and afterwards claimed incompetency, and disobedience to directors.

The case was tried before the county court judge and a jury at Revelstoke, and Henderson was awarded damages to amount of $600, in lieu of three months' notice. The defendant company appealed and this appeal is now dismissed. The appeal was argued in April last, at Vancouver. E. P. Davis, K. C., appeared for the defendants, appellants, and S. S. Taylor, K. C., for the plaintiff, Henderson.

WHAT THE ADVANCE MAN SAYS

If you desire to participate in an evening of rare enjoyment go to Sherman's opera house on Tuesday next and see the high grade performance of Richards and Pringle's Famous Georgia Minstrels.

People sometimes say, "All minstrel shows are alike," but this is a superficial blunder. Go and see for yourself and you will proclaim that the "Georgias" are in a class distinct and by themselves. This season they bring an entire new show, retaining only Clarence Powell from last year.

See the big parade at 11.30 a.m.

Somebody is going to get a rare bargain in the fruit ranch which is being offered for sale by Taylor and McQuarrie.

We stand back of everything sold in our stores. If there is any dissatisfaction we want to know it and make it right. Canada Drug & Book Co.

ASK TWO PER CENT TAX

ROSSLAND CORPORATION WANTS GOVERNMENT'S SHARE.

NOVEL REQUEST FROM THE BOARD OF TRADE.

The corporation of the city of Rossland wants the provincial government to hand over to them the annual two per cent tax on certain mines, now paid into the provincial treasury. According to the figures published in the Miner the sum to be abandoned by the government for the benefit of the city amounts to about $35,000, or a little better.

The Rossland board of trade and the city council will join in a memorial to the government asking for the proceeds of the two per cent tax. The Miner says: "The city is equitably entitled to this sum from the province and should have it." It is also suggested that the mines in question would not object to the tax being devoted to city purposes.

The secretary of the Rossland board of trade, in a letter to the mayor and council, outlines the proposal as follows:

I beg to advise you that at a general meeting of the Rossland board of trade the matter of a readjustment of financial arrangements by the city of Rossland with the provincial government was brought up, with a view to obtaining for the city a substantial share of the taxes now collected by the province from the mines within the limits of the city, under the so-called two percent tax.

Messrs. A. H. McNeill, K. C., K. E. Mackenzie, the president and secretary, were appointed a committee to deal with the matter and draw up a memorial from the board of trade, submitting same to the city council, or to act with a committee from the council in presenting a joint memorial to the government at Victoria.

A strict inquiry into the city's rights in the matter should be made, as the claim is based on principles of justice and fair dealing between the city and the province, and is not a favor. In a word, it is this: The city of Rossland is deprived of the right to tax all the real estate held by private individuals within its limits. Every other municipality in British Columbia has such a right (excepting as to railways). Some sound reason should exist for making an exception of Rossland; and there does not appear to be any reason. The provincial government collects what is in effect a real estate tax in the city from the shipping mines; the city gets none of this, although it has to undertake all municipal burdens.

It would, no doubt, not make any difference to the mining companies paying the tax, whether the same went to the city or to the provincial government.

In this contest the citizens should recognise that they will get no support from any other quarter. It is Rossland's fight, and should be prosecuted with vigor.

The Rossland board of trade therefore hopes that the city council will co-operate with its special committee in drawing up a suitable memorial and carrying to a successful issue a vigorous campaign for the city's rights.

At their last meeting, the Rossland city council joyfully received the proposition and promised hearty co-operation. It will be interesting to note what the government will do with the memorial in question, when they receive it.

PASTOR FIGHTS IN CHURCH

Strikes Member of Congregation Who Opposes Him.

Sault Ste. Marie, Mich., Aug. 8.—Mutiny in the ranks of the Frist Baptist church reached a sensational climax Thursday last wen Rev. C. C. Marshall engaged in a fight in the aisle of the church, striking a member of the church in the mouth, then leaving the church, followed by a hundred friends. Charges will be preferred against Mr. Marshall and the matter will be taken up by the Upper Peninsular Baptist association in an effort to drive him from the pulpit.

The trouble was started soon after the revival last winter by Rev. Dan Shannon. It is alleged that under the pastoral of Rev. Mr. Marshall the membership fell off until it became the smallest in the city. Last night in the pulpit Mr. Marshall asked all on his side to rise. When they had done so, he asked them to follow him from the church. He was stopped in the aisle by Jap Turner, who accused the preacher of being a scoundrel. Marshall then struck Turner in the face, inflicting painful bruises. The pastor and the deserters are trying to get another building in which to hold services.

FERNIE NOTES

(Special to The Daily News)

Fernie, Aug. 8.—Just before noon yesterday there occurred what might have proved a bad accident. Engine 542 of the Morrissey, Fernie and Michel railway, broke loose from her tender while starting a heavy train, smashing the air couplings and leaving the rest of the train completely. The train, luckily, happened to be on a level piece of road at the time or a serious smash up could hardly have been prevented.

Mrs. G. G. S. Lindsey entertained a few friends at dinner last night to meet Mr. Foster-Brown. Mr. Foster-Brown is an English mining expert travelling through this country taking notes on the Canadian system of mining. He leaves tomorrow for Vancouver, where he will catch the Empress of Japan for the Orient, returning to this country in the fall.

Mr. and Mrs. F. Ambery left last night by the C. P. R. on an extended trip to the east.

Mr. and Mrs. D. Davies entertained a number of young people at Edgecliffe last night. Dancing was the order of the evening. The lawn with its myriad twinkling lights and shady nooks overlooking the river, formed a delightful scene. Mrs. Davies hospitality is proverbial and the dancing was kept up till an early hour.

REFUGEES TO ORGANIZE

'FRISCO EARTHQUAKE SUFFERERS ARE INCORPORATED

INTEND TO PROTECT THEIR INTERESTS FROM GRAFTERS.

San Francisco, Aug. 8.—The United Refugees are now a legally incorporated body. By an instrument signed July 18th, sworn to before a notary July 31st and filed yesterday with country clerk H. T. Mulcrevy, the purposes of the organization are made known as follows:

We, the undersigned, a majority of whom are citizens and residents of the state of California, have this day voluntarily associated ourselves together for the purpose of forming a scientific and charitable association under the laws of California, and under the act of legislature of the state of California, approved March 27th, 1895; and

We hereby certify:

First—That the name of the said corporation shall be the United Refugees.

Second—That the purposes for which it is formed are:

To protect the rights, privileges and immunities of its members and to defend them against deprivations of their rights, privileges and immunities.

To establish and maintain co-operative scientific and charitable business enterprises of every kind, character and description and to conduct and carry on the same.

To transact the business of dealing in real estate and all kinds of personal property wheresoever the same may be situated, and to lease and from time to time let the same to members of the corporation and other persons and corporations.

To carry on and conduct co-operative stores, factories, bakeries, restaurants, commission houses, farms, poultry growing, cattle raising, horse raising, sheep raising and any other co-operative enterprise of any kind, character or description.

Fourth—That the term for which said corporation is to exist is 50 years from and after the date of its incorporation.

Sixth—That the amount which each member shall pay, upon admission, as membership fee, is one dollar, and that the parties signing these articles have each paid said fee and that the right of each and every member shall be equal; and that said corporation shall have no capital stock.

Mrs. Mary Kelly, chairman of the grievance committee and also endolling clerk, who lives in Jefferson square, and who was a leader in the procession of 2500 refugees protesting against the feasting of Dr. Devine at the St. Francis on Tuesday evening, said yesterday:

"Now we can go to work. We have the law on our side. We shall keep it there. The United Refugees have incorporated for 50 years. The first thing to be done is to thoroughly organize, retaining in our ranks all earnest, honest persons and discarding the discreditable element. We shall proceed as American citizens. As a great-granddaughter of general Zachary Taylor, I have, or should have, enough of good stock and good fighting spirit in me to uphold me in the work I have undertaken. I was one of the first women to volunteer as nurse when Mechanics' Pavilion became an emergency hospital for victims of the fire. I was the last one to leave there. Fire chief Sullivan was the last one to whom I ministered. Then, when flames drove me from the home that I tried to re-enter, I said goodby to the pictures of my father and mother on the falling walls and came to Jefferson square.

"Of course it was hardly polite to interrupt Dr. Devine's enjoyment of his Blue Points at that last banquet, but I feel that we did what was only right and proper in marching there. We did not want the outside world which has been so generous to San Francisco, to read of that loving-cup feast without reading the other side of the story—the dark side of mismanagement and abuse of a great trust."

FRISCO'S FEMALE FAGIN

GIRL CRIMINAL BRIBES YOUNGER GIRLS TO STEAL JEWELRY

REWARDED THEM WITH GIFTS OF CANDY AND MONEY

San Francisco, Aug. 8.—A Fagan in petticoats is wanted by the local police.

Elsie Sangari is the feminine counterpart of Dickens' famous character. Only 17 years old, but twice that age in criminal acuteness and knowledge of the world, Elsie is at her old tricks in San Francisco. Young girls are her pupils and her dupes. Her practice is to send them, as Fagan in fiction did the youngsters in his toils, into residences which she hase selected as the most likely places to loot, then to reward her emissaries with car fare, candy or other trifling knicknacks and send them home, first arranging for another rendezvous and the next day's plundering expeditions.

One of Elsie's catspaws was caught on Thursday. She gave several names including that of Annie Elsworth, Mabel Earnington and May Miller, but the police booked her as Annie Miller, aged 14, living at 4 Ridgley place.

Annie admitted that her companion was named Elsie and that the latter's latest scheme was to watch the advertisements in the daily papers giving the numbers of houses where furniture was on sale, then send her (Annie) to the premises on pretext of seeing the goods in order to give a description of them to "her mother." The object was to steal whatever might be handy and portable and give the booty to the older girl waiting in the neighborhood. Annie said: "I was given candy and money by Elsie and told to go into houses to take money and gold things and anything that looked like what she had shown me in jewelry store windows."

ELECTION FRAUD REVELATIONS

Denver, Colo., Aug. 8.—George Nordway, election commissioner, was sent to jail by judge Lindsey today for contempt of court in refusing yesterday to give the ballot boxes to the sheriff on order of the court. Henry Dougherty, president of the Denver Gas and Electric company; Fred A. Williams, former chairman of the republican central county commission, and J. Cook, Jr., real estate dealer, who refused to testify in the election contest, were also committed to jail for contempt.

Minard's Liniment Cures Distemper

SUMMER DIARRHOEA IN CHILDREN

During the hot weather of the summer months the first unnatural looseness of a child's bowels should have immediate attention, so as to check the disease before it becomes serious. All that is necessary is a few doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy followed by a dose of castor oil to cleanse the system. Rev. M. O. Stockland, pastor of the first M.E. church, Little Falls, Minn., writes: "We have used Chamberlain's Colic, Cholera and Diarrhoea Remedy for several years and find it a very valuable remedy especially for summer disorders in children. For sale by all druggists and dealers.

WIVES GO ON STRIKE

Chicago, Aug. 8.—The first family strike to be recorded in the labor movement in Chicago began yesterday when 250 janitoresses voted to go to the aid of their husbands to win an increase in wages demanded by the window washers in large buildings down town. The vote was practically unanimous in favor of laying down mops and brooms in 20 skyscrapers today.

NELSON'S NEWS OF THE DAY

While the circus was here one of the young coyotes had its leg broken in transferring from one cage to another and at the request of the circus people the police shot the animal and put it out of misery.

Two evenings ago, a visitor at one of the hotel bars unwisely flourished a loaded revolver, and otherwise is said to have acted foolishly. He was gathered in by the police last evening and will have to explain the circumstances to the police magistrate this morning.

C. E. Gillan, Rossland's city solicitor, has resigned and gone into partnership with F. C. Elliott, of Trout Lake. Mr. Gillan will practice at Revelstoke and his former duties will be undertaken by W. J. Nelson, police magistrate of the Golden City.

P. M. Starnes, of Chicago, ex-prelent of the National Life Insurance company of that city, and J. C. Eberhart, of South Bend, Indiana, a large manufacturer, are at the Hume. They are friends of judge J. M. Miller, of Trout Lake, who is looking after them during their visit here.

A. H. Green, brother of F. C. Green, P. L. S., has returned from spending nearly a year in Siam, where he was sent for by the government to institute a survey department along the lines of the Canadian department. Mr. Green successfully carried out his mission and had an interesting time in doing so.

Everyone complained of the heat yesterday, but the official glass recorded 88 as the highest point reached, or a drop of two degrees from the previous day. The smoke from the bush fires, and the general closeness of the atmosphere made the heat more unusually felt. The minimum reached up to 10 o'clock last night, was 54.

A large party of American tourists from Minneapolis arrived at the Strathcona last night, including John Pillsbury and C. R. Lamb. Mr. Pillsbury was interested more or less extensively in wild lands in Kootenay some time ago and these lands were widely advertised by the Western Canada Land company, causing some comment here last spring. When the real facts of the case were drawn to the attntion of the company the advertisements were *promptly* withdrawn and all deals were cancelled. Mr. Pillsbury and his party will have a good opportunity of now seeing Kootenay fruit lands along the lake at their best and of forming an excellent idea of the possibilities here for fruit raising.

Paul Couldrey, of the Le Roi No. 2 company, Rossland is in the city arranging for the taking over of the Vancouver property, the deal for which was announced in these columns last Sunday morning. The Le Roi No. 2 company will acquire M. S. Davys' *lease and option on the Slocan silver-lead* proposition referred to.

The Royal Lumber company, J. P. McGoldrick's proposition, have concluded their work of laying out their nine miles of railway in from Crawford Bay to their timber limits. W. S. Drewry, of New Denver, who has been in charge of the survey, arrived in the city yesterday and all the men engaged have been paid off. About two and a half months have been occupied in laying out the road and a good sum of money has so far been expended. When *completed and in running order* this bit of railroad will play an important part in helping to develop the well known mineral resources of the section involved. There is plenty of ore awaiting shipment at the Silver Hill mine, which the line will tap, and several iron properties that will benefit by the construction of the road, to say nothing of other promising claims that are known to exist.

A GENTLEMAN'S WANTS

FOOT COMFORT
is something that everyone is looking for. We can fit you out with a pair of the comfortable Walkover shoes and you will not be sacrificing style either. These shoes are the best on the market.

NECKWEAR
Distinctive—exclusive—new styles and at prices about a third less than you would pay elsewhere. An excellent assortment. See our window.

HATS
"Put on the lid." Step in and get a fine new straw or Panama Hat. Syles galore. Prices to suit.

SUITS
Semi-Ready Clothing is known all over Canada. It is just what it is named—tailored clothing all ready to be fitted to the man and completed in a few minutes. Why pay $30 for a made-to-order suit when $15.00 will buy one made-to-fit at our store.

J. A. GILKER
MEN'S FURNISHINGS BAKER STREET

A MONEY MAKER FOR SOMEBODY

We have for sale one of the best Fruit Ranches in this part of the country. This ranch lies opposite the C.P.R. shipyard, within 1 1-2 miles of Nelson, and contains over 47 acres of elegant fruit soil; 500 fruit trees planted, of which 300 are three years old; 100 which were planted this year, and 200 small fruit bushes, comprising raspberries, currants, gooseberries, etc. Also has a stream of water running through the premises and a frontage on the river of 300 feet. You can get this property at a bargain price.

TAYLOR & McQUARRIE
Baker Street P. O. Box 3 'Phone 234

PIANOS

are an essential part of the equipment of every home. The

MASON & RISCH PIANO

is the best on the market. We sell these pianos on easy terms—$10 down and $10 per month. If you cannot play get a Pianola. It is almost a human piano player.

The STANDARD FURNITURE Co.
COMPLETE HOUSE FURNISHERS AND UNDERTAKERS.

BUY RAMBLER

We believe this stock is a good buy at present price. We strongly advise the purchase of Rambler.

We have 1,000 shares at 25 cents.

McDermid & McHardy

APPEARANCE COUNTS

Because your eyes are defective there is no need of wearing glasses that are a positive disfigurement.

We can make you up a pair that will add to, rather than detract from, your personal appearance, and at the same time give you sight and comfort. M. Mecklenberg, M.A., Expert Eye Specialist in charge.
