THE DAILY NEWS

VOL. 5 NELSON, B. C., SATURDAY, AUGUST 11, 1906 NO. 95

MACHINERY IS SHIPPED

Long Delay in Arrival of Power Plant is About to End.

Allis-Chalmers Bullock Company Explains Past Hitches and Promises Speedy Completion of Contract.

His Worship Mayor Gillett is of the opinion that the long delayed installation of the hydraulic machinery at the city power plant is at least measurably in sight at last.

The mayor has been urging the company having the contract to make a definite statement, and yesterday obtained the following telegraphic message from J. A. Milne, Montreal, manager of the Allis-Chalmers-Bullock Ltd.

"Answering telegram of 9th, carload electrical apparatus, completing Montreal portion of order, shipped August 3. Allis-Chalmers Co. advised August 1 that generator would be shipped from Cincinnati about first of this week and according to instructions were to notify our Nelson office direct regarding waterwheel shipment, completion of which has been delayed owing to strike situation. Have telegraphed our district manager to see you immediately on his return to Nelson.

District Manager J. O. Gillice handed his worship the following self-explanatory communication last evening:

To the Corporation of the City of Nelson, and His Worship Mayor Gillett:

Gentlemen—Agreeable to your repeated requests relative to the delivery of the hydro-electric unit for the city of Nelson, we are pleased to submit the following information from our factories:

All the electrical apparatus, with the exception of the generator, has been shipped from Montreal under date of August 3rd, and the generator was shipped from Cincinnati under date of August 6th. The balance of the shipment we expect to make by Aug. 20, but may be delayed a little longer than this date.

This company has been handicapped on account of the general moulder's strike for the past three months, which has made it extremely difficult to secure castings on all our work. We have secured the making of all the balance of our castings for the Nelson job from outside parties, and at the rate these are being delivered all shipments will be completed before the time above specified. We have done everything possible under the circumstances to rush this work, even to trying to turn out some of this work with apprentices. This, however, resulted unsatisfactorily as the workmanship was not what we cared to send out. We have done everything possible to complete this shipment as per agreement of Aug. 1st, but the strike being a matter over which we had no control, it has been impossible for us to do so.

The above explains fully the efforts that are being made by our company to carry out their contract. Respectfully submitted.

ALLIS-CHALMERS-BULLOCK, Ltd.
J. O. Gillice, District Manager.

Nelson, B. C., Aug. 10, 1906.

While ratepayers will hardly agree with Mr. Gillice's closing statement that "the above explains fully the efforts that are being made by our company to carry out their contract," they will gather from the rest of the letter that the completion of the machinery, ordered some thirteen months ago, and its shipment here and subsequent installation, are now measurably in sight, provided of course that the company carries out the terms of Mr. Gillice's latest letter.

It was hoped at first that the power plant might be in working order for the Dominion day celebration; later it was confidently expected that the inauguration would at least take place at exhibition time, if not before. Now if the machinery is in place in October this community will be thankful.

FERNIE NOTES

(Special to The Daily News)

Fernie, Aug. 10 — J. Turnbull, general manager of the bank of Hamilton, accompanied by H. A. Aylwin, the assistant inspector of branches, was in town yesterday on business connected with the bank. While in Fernie they visited the Coal Creek mines and were much surprised at the completeness of the machinery used for handling the coal.

The bush fires around Fernie have not been altogether put out yet, but a constant gang of men are at work night and day and the fire has been prevented from spreading far.

Dr. Corsan left for the coast last night by the Great Northern, where he will join Mrs. Corsan, when they will take a holiday trip up the north coast.

Master Teddy Ambrey, who has been staying with Mrs. G. G. S. Lindsey for the past month, left for his home tonight by the Great Northern.

KOMURA IS INCENSED

Montreal, Aug. 10—Baron Komura, the Japanese ambassador to Great Britain, tonight announced, through Hon. T. Nosse, consul general to Japan in Canada, that every interview published in the Canadian press and attributed to him was fictitious. Baron Komura stated that in his position as personal envoy of the emperor of Japan to the king of Great Britain, it was out of the question that he should give any personal interviews for publication; that he had seen no Canadian newspaper men and that he was incensed at the clever but misguided enthusiasm which had led reporters in Ottawa and Vancouver, especially, to attribute ideas to him which he had never warranted, not having submitted to the interviewing since he had landed on Canadian soil on his way to the court of St. James.

WATER RESERVE IS LOW

GAIN MADE AT RESERVOIR IS NOT SUFFICIENT.

CITY AUTHORITIES ANXIOUS TO STOP WASTE.

The situation at the city reservoir remains practically unchanged. The water service has held its own, but up to 9 o'clock last night the looked for gain had not appeared.

At the hour mentioned the water level was three feet down or a foot below the danger mark.

With the reservoir full, as it should be, there are a million gallons of water in reserve—half a day's supply at the rate the water is now being used. The city engineer is of the opinion that this reserve must be maintained in order to protect the city from a fire standpoint.

Properly the reservoir should be full in the morning but this is not the case now and while a gain is being made each night it is not sufficient to make up the day's loss.

Citizens are again urged to stop all waste of water, otherwise special steps will have to be taken to limit the supply for all purposes, that for lawn sprinkling and garden use coming first.

The gain made at the reservoir tonight and particularly tomorrow night, may tide over the matter temporarily, but in any case for the balance of the season no more water should be wasted.

ORDER TWO NEW SHELLS

BOAT CLUB WANTS EXTRA SINGLE AND DOUBLE SCULLS.

NEW MORAL CODE IS LAID DOWN FOR THE MEMBERS.

An important meeting of the Nelson Boat club was held last evening at the clubhouse when matters in connection with the N. P. A. A. O. regatta were wound up and arrangements made for the future.

It was decided to order at once new single and double racing shells to be delivered as quickly as possible. This will permit more entries from Nelson in future regattas.

Several members stated that they had lost clothing and other articles from their lockers in the clubhouse during the present season and the matter was finally settled by passing this resolution:

"That any member wearing clothes which are the property of another member or opening another member's locker, without permission, be expelled from the club after a warning."

Another complaint was that several oarsmen had been rowing lately in decidedly decollette costume and the motion to fit their case reads as follows:

"That any member of the club rowing in other than full rowing costume be expelled after being warned."

Messrs. F. D. Arundel and W. H. Maudesley, being out of the city, their places on the executive will be taken by Messrs. N. S. Fraser and T. Del Des-Brisay.

The date for the club's fall regatta was set for Thursday afternoon, September 6th, and the committees are now actively at work making preparations for the event.

After passing resolutions of thanks to the citizens and others for assistance in the successful N. P. A. A. O. regatta here last month, the meeting adjourned.

Worcester, Mass., Aug. 10.—There was splendid sculling, a number of interesting races and three or four close and exciting finishes in the elimination contests that opened the thirty-fourth annual regatta of the national association of amateur oarsmen on Lake Quinsigamond today and nine events were run off without a hitch, despite the misty rain that fell frequently during the forenoon.

The association senior single sculls, run off in two heats, was the event to which oarsmen have looked forward for several months. Eleven of the fastest scullers in the country started. The survivors for the finals tomorrow are Harry S. Bennett, Springfield; Frank Vesaely, New York; E. McGee, Toronto; and John O'Neill, Halifax, N. S.

Another interesting contest developed in the first heat of the intermediate singles and as a result of it Warnock, of Springfield, and Major, of the first Bohemian, will have Henderson, of Winnipeg, and Thomas McGee, of the Ravenswood club, as competitors in the finals tomorrow.

The sport closed with a fine contest between the Argonauts of Toronto, the New York Athletics and the Wachusett of Worcester. All three were lapped as they neared the finish and while the New Yorkers spurted, they could not catch the Canadians, who won by half a length, with the Wachusetts third by three-quarters of a length.

BRADSTREET'S REVIEW

New York, Aug. 10—Bradstreet's tomorrow will say:

Canadian trade reports are still optimistic, and wheat crop deterioration in the Northwest due to heavy rains is reported slight. Harvesting has begun and the grain looks well. Quietness in country trade due to farmers being busy with their crops, is reflected in some lines of mercantile trade, but the outlook is classed excellent. Orders for and shipment of dry goods to the west are very large. Collections are fair to good. The export demand for dairy products is falling off, and the cheese output is lighter. Hides and leather tend upward. Wholesale trade at Toronto is good and the feeling is optimistic. Dairy products receipts are lighter at Winnipeg; wholesalers are busy on fall lines and there is a heavy demand for harvesting supplies. Wheat looks well despite storms. Trade is active in British Columbia, indicating brisk operations in mining and lumbering. Failures this week numbered 19, as against 19 last week, and 32 in this week last year.

HALL MINES RECEIPTS

ORE AND LEAD CONTENTS FOR THE MONTH OF JULY

LIST OF SHIPPING PROPERTIES IN DETAIL

The following is the statement of the lead receipts at the Hall Mining and Smelting company's smelter in this city for the month of July in detail. The figures are in pounds.

Mine	Ore	Lead
Arlington, Slocan	193,553	13,345
Arlington, Erie	172,853	7,736
Bismark	21,987	4,112
Blue Bell	1,058,513	374,844
Broadview	88,737	30,703
Cork	149,616	93,265
Hewitt	42,581	5,195
Kootenay Ore Co	9,445	2,645
Krao	90,361	7,952
La Plata	203,459	22,777
Majestic	33,790	22,639
Meteor	23,973	959
Neepawa	35,985	1,727
Payné	33,217	18,420
Red Fox	75,623	16,851
Regina	5,094	307
Ruth	36,065	8,296
St. Eugene	2,074,587	1,096,510
Silver Cup	39,209	3,782
Skylark	50,148	6,770
Superior Group	687	393
Vancouver	43,014	12,474
Whitewater	196,848	84,467
Whitewater Deep	36,342	21,442
Ymir	151,094	14,161
Total	4,866,719	1,871,723

WHAT THE ADVANCE MAN SAYS

In order to appreciate the importance of the claims of the managers of Richards and Pringle's famous Georgia minstrels, that they have the largest and best equipped minstrel show ever given by negro talent, a visit to Sherman's opera house on Tuesday will convince the most critical that they have eclipsed all former seasons in the way of novelties. Ever on the alert to grasp opportunities they have brought together an entire new company from the property man up to the leading artists, only retaining from former seasons the famous Clarence Powell. All others are new faces and a program of rare excellence is promised.

N. Y. Y. C. OCEAN RACE

Vineyard Haven, Mass., Aug. 10—The start in the ocean race of the New York yacht club, in connection with the club's annual cruise was made this morning. The race will be from here to Sandy Hook. Among the boats to start in the race are Wilson Marshall's Atlantic, George Lander's Endymion, Dr. Lewis Stimson's Fleur de Lys, and Edward R. Coleman's Hildegarde, the four Kaiser's cup racers; Albert C. Bostwick's Vergemere, Henry W. Putnam's Ariadne, George G. Haven's Invincible and Lloyd Phoenix' Intrepid.

THREW LAMP AT BURGLARS

Rochester, Aug. 10—A remarkable case was held before justice Benedict of Brockport this morning. The complainant was Mrs. Mary Dean, 104 years old, as active mentally and as sound as women half her age. The defendant was Roxy Halstead, charged with burglary in the first degree. On the night of June 29, Mrs. Dean discovered two burglars in her home. Being a woman of courage, she threw a lighted lamp at the intruders and they fled. Later they were arrested. The case was adjourned.

AMERICAN TROOPS KILLED

Manila, Aug. 10—First lieutenant John F. James and two privates of the 8th infantry, with contract surgeon Calvin Snyder, and international revenue collector Williams were killed yesterday afternoon in a hand to hand fight with a force of Pulajanes at Julita, island of Leyte. The detachment, which consisted of ten men, was greatly outnumbered but made a gallant fight. The Pulajanes captured three pistols and four Krag Jorgsen rifles and 300 rounds of ammunition.

BIG FIRE AT HULL

(Special to The Daily News)

Ottawa, Aug. 10—Fire broke out in Hull, Que., across the river from Ottawa at noon. It burned two hours, destroying 45 small frame houses worth from $500 to $1000 each, and one grocery store valued at $12,000. Help was summoned from Ottawa. The loss will be abut $50,000.

YANGER AND HERMAN TO FIGHT

Indianapolis, Aug. 10—Benny Yanger and Kid Herman will fight a ten round bout before the local athletic club this evening. The fight was originally booked for Terre Haute, but had to be postponed and transferred to this city owing to the interference of the local authorities in Terre Haute.

FIVE BURNED TO DEATH

Norfolk, Va., Aug. 10—Five men were burned to death in the paint locker on board the torpedo destroyed Worden here today. While driving rivets in the paint locker, one of the hot pieces of steel fell into a quantity of varnish, causing it to explode. Robert and William H. Wilson were blown through the opening leading into the paint locker and landed on deck.

SEIZES THE WHOLE CITY

Sheriff Tuck Executes a Big Judgment Against Slocan.

Mayor, Council and Clerk all Try to Resign, but can Find no One to Take Their Resignations.

Slocan City is in the clutches of the law. Sheriff Tuck has served a notice upon city clerk Morrison that an installment of a debt owed to C. E. Smitheringale must be paid before September 4 and if not he will immediately levy a rate which will cover the amount, now $560 plus other expenses of collection, assessment, advertising and traveling. This rate, Sheriff Tuck declares, immediately becomes delinquent and if not immediately paid the defaulter, each ratepayer in the city possibly, will have his property seized and sold to satisfy the alloted portion of the judgment assessed. Sheriff Tuck declares he has no option and that if the city council will not pay he will have to proceed with the stern measures outlined. This is not the worst of the matter. The present amount of the debt, $560, is but a portion of a larger debt of $2,000 for which notes have been given by the municipality of Slocan City and which are now falling due one after another.

The first note went by default and judgment was given, also by default, when proceedings were consequently taken. The suit was instituted by C. E. Smitheringale to recover for expenses incurred by him in printing a municipal delinquent tax list some two years ago in his paper, the Slocan Drill of Slocan City, now defunct. The tax list was given to Editor Smitheringale by City Clerk Smitheringale and as the two offices were united in one person the city council never disputed the amount but merely remarked that it could not be paid. After months of delinquency the debt was arranged by notes being given for the amount and when the first of these notes became due last spring it was dishonored, hence the present proceedings and the likelihood of others.

Mayor MacNeish has paid a visit to Mount Pleasant, Vancouver, in the hope of softening the heart of the newspaper man but told the sheriff that there was no response to his plaints. When the sheriff arrived in the city of Slocan he was confronted by the assertion that mayor and council had resigned and that the city clerk, Norman Morrison, had also resigned. However, the sheriff declares that the mayor cannot resign except to his successor and hence served his papers at the residence of Mr. Morrison, that gentleman carefully keeping out of sight. If the matter is not compromised, Slocan City will be in hard straits indeed as its yearly revenue is said to be less than the amount claimed with an assessment roll which at present is very small. The sheriff declares he will strike a rate of any number of mills on the dollar so as to get sufficient to cover the present installment of the debt, basing his amount on the assessment roll of the city.

The announcement of Sheriff Tuck's mission appeared in the Vancouver papers on Thursday, and provoked a good deal of bantering at the expense of Slocan City. The Daily Province published the appended skit:

Sheriff Tuck, on the way to the office of the city clerk of Slocan waving a blue paper—

"I hate to do it, my word I do! But 'tis my duty to seize the town. Smitheringale has lost all patience, and who can blame him? He should have had his money on that printing bill months ago. But the town hasn't a dollar to satisfy this execution, so I must seize the town, and—ah, here's the office."

"The city clerk is out, Mr. Tuck," replied the office boy.

"Out where?" the sheriff demanded.

"Fishing."

"The d——, ah he is." Looking at the writ, "and this must be served today. Ah, I remember, substitutional service on Mrs. City Clerk will do—hand me that municipal act, young man."

Ah, yes, section 293, that's it——

"The sheriff shall deliver a copy of the writ to the clerk of the council, or leave such copy at the office or dwelling-house of that officer with a statement in writing of the sheriff's fees, etc., etc.—"

Exit to the house.

Mayor Macnish (hectoring up and down and across his office)—To be or not to be. That is the question. Whether proud Slocan now shall assign for the benefit of creditors, lose its precious charter, and good name, or make another levy to pay off its debts and so opposing end them. Yes, and yet will the ratepayers stand for it? Ah, my soul, I fear it. By heaven, but we're up against it? Oh, how I do repent me that I hold this office. Ah, happy, brilliant, thought, Horatio, I shall resign. By heaven yes, this very 4th of August. Goes to desk, writes out resignation and rushes to office of city clerk to find that he has gone fishing.)

When the councillors heard of the mayor's action, they, too, prepared their resignations. But they are still undelivered for there appears to be no one authorized to accept them. A mayor may resign to the council or the council to the mayor, but when both go out—well, the municipal act never expected that any Canadian city would come to that.

Here the matter rests. The exchequer is empty; the council and mayor are in body in office, in mind out of it; and Sheriff Tuck is waiting for the 4th of September.

Then the thirty days shall have expired, the time the statute gives a town or city to satisfy an execution against it.

ARROWHEAD MILL SOLD

WAS PURCHASED BY EASTERN CAPITALISTS THIS WEEK.

PRICE PAID NEARLY THREE-QUARTERS OF A MILLION.

It was reported here yesterday that the Arrowhead Lumber company, operating the mill at Arrowhead, the largest concern of the kind in the interior, had disposed of its property, including the mill and timber limits, to an American syndicate headed by C. R. Lamb, of Minneapolis, who with John Pillsbury and a party of tourists, was at the Strathcona on Wednesday last.

It is added that when Mr. Avery was attending the meeting of the Mountain Lumbermen's association here on Wednesday he stated that the Lamb syndicate had had cruisers out estimating the value of the limits for some time, that a price had been quoted but the deal had not been closed.

According to information received here last night the deal has since been closed and while no definite figure was named it is understood the property changed hands at about three-quarters of a million.

SHAH GETS GENEROUS

Of His Own Free Will Grants Persia a Popular Assembly

Washington, Aug. 10—For the first time in history Persia is to have a national assembly. This information was conveyed to the Persian minister here late today in a cablegram from Mirza Nassrollah Khan Mochiredolet Sadreazame, grand vizier and minister of foreign affairs, who stated that in view of the desire of his imperial highness, the shah, for the extension of national tranquility and for the welfare of Persia, and all its inhabitants, and in order to fortify the government, had deemed it necessary to give certain reforms and an institution durable for the country and for the administration. The assembly will meet in Teheran and it is provided that all civil and constitutional laws should originate in the assembly and after the signature of his majesty will become effective.

BIG GOLD ROBBERY

Winnipeg, Aug. 10 — Mail advices from Dawson City tell of the biggest robbery ever recorded in the Yukon's history, the amount involved being $78,000. Gold dust and bars to this value were shipped on the steamer Ida May by the Washington Alaska bank to the Washington Trust company, Seattle, Wash. The mystery is a deep one, not the slightest clue to the thief having been obtained. The theory is that the box was stolen before the ship left Fairbanks and a dummy substituted and watched down the Tanana river by a confederate of the thief who threw away the box upon reaching Fort Gibson. On the voyage down the river a number of passengers remarked on the lightness of the box and could not believe it contained nearly $80,000 in pure gold. The theft was discovered at Fort Gibbon and a large reward offered by the express company turned every man, woman and child into theif hunters but without success beyond the finding of the dummy box. Several Pinkerton detectives have been sent up but as yet no trace has been obtained of the stolen money or the thief.

BABY'S ROYAL START

Berlin, Aug. 10—The king of England and the emperors of Russia and Germany will be godfathers to emperor William's grandson, whose christening has been postponed from Aug. 12 to Aug. 29. It will be recalled that the happy young father, the German crown prince, had no fewer than 31 godfathers and godmothers, among whom the late queen Victoria figured, king Edward, then prince of Wales, prince and princess Christian, the emperors of Russia and Austria, the kings of Italy and Belgium and a host of German princes and princesses.

TELLER SHOOTS HIMSELF

Chicago, Aug. 10—Frank Kowalski, for five years paying teller of the Milwaukee avenue state bank, which failed last Monday, shot and killed himself tonight in his home. Criticism by neighbors and friends who accused him of a share in the downfall of the bank, it is said drove Kowalski to suicide. When the bank failed Kowalski had $700 of his own money on deposit there and his immediate relatives had nearly $50,000.

HERMAN WON DECISION

Indianapolis, Aug. 10—Herman got the decision over Yanger at the end of a ten round fight here tonight. The conditions of the match were 10 rounds, one arm free in clinches. Abe Pollard of Chicago, was referee. Herman continued infighting tactics throughout the contest. Frequent clinches and hard hitting characterized the bout.

AUTO BUMPED POLICEMAN

New York, Aug. 10—When an automobile, owned and driven by Stewart Elliott, ran into a mounted policeman who was attempting to arrest the driver for speeding in the Bronx early today, Mrs. T. W. Noble, wife of a travelling salesman of Baltimore, one of the occupants of the car, was thrown out and so severely injured that she died tonight in the hospital. Miss Margaret Johnson of this city, who was one of the party, is still in the hospital seriously hurt. Stewart Elliot and the policeman, Harry F Smith, were slightly injured.

TWO CLASHING VIEWS

BRITISH PAPER OPPOSES LOWER CHINESE HEAD TAX.

C. P. R. OFFICIAL SAYS MOVE WOULD BE A GOOD ONE.

London, Eng., Aug. 10.—The Birmingham Post says that whoever used his eyes and nose in the Asiatic quarters in the towns and villages along the Canadian Pacific coast will have little sympathy with the petition of the Victoria salmon canners and Kootenay fruit growers for a reduction in the tax on Chinese. Asiatic immigration into Canada, the Post says, should be discouraged in every way.

Allan Cameron, general traffic agent of the C. P. R., interviewed regarding the Post's criticisms, said he could imagine no better class of settlers in a country like the west of Canada. They are strong, hardy, healthful, resourceful, capable, cheerful and obedient to law.

Washington, Aug. 10.—Chinese labor will be given a thorough test on the Panama canal. Contracts calling for 2,500 Chinamen for canal work have been prepared and advertisements will soon be issued by the isthmian canal commission asking for proposals from London agents. If the plan proves a success, it is likely that many more will be secured to do the work that is too hard for the Jamaicans now employed there in large numbers.

Organized labor has offered much opposition to the use of contract Chinese labor. The Jamaican workmen have proven inadequate and sufficient Spaniards cannot be had immediately to push the work. President Roosevelt, secretary Taft, chairman Shontz and other men prominently identified with the canal work, are known to have delayed employing Chinese until it became evident that the other help available was not equal to the demands. The administration has taken the position that the canal must be dug at any cost, and although the president urged that there be no haste in employing Chinese, he did not stand permanently in the way of the present plan.

NELSON'S NEWS OF THE DAY

A local mariner, one of the best authorities on fishing in the Kootenays declared last night that the smoke from the bush fires now prevailing, has the effect of spoiling all chances of making a good basket. The fish won't bite well until the air clears up, he declared.

Choquette Bros. of the Star bakery, are tendering their employees a complimentary picnic to Procter on Sunday. The party will leave the city in launches in the forenoon and the whole day will be spent at Procter. The Star bakery will be closed on Sunday until 8 p.m.

Mr. Ed. E. Teetzel of Vancouver, brother of Mr. A. L. Teetzel of Hood and Teetzel, is a visitor in the city, having come here with his bride on a honeymoon trip. Mr. Teetzel, who is a real estate broker in business hours, is very active in liberal circles when politics are on the wing. He is a prominent member of the Young Liberal association of Vancouver, and, as its secretary, exerts a good deal of influence upon the deliberations of the organization. He is delighted with what he has seen of Nelson. Mr. and Mrs. Teetzel intend to leave this evening on their return trip to the coast.

LYNCHER GETS 15 YEARS.

Charlotte, N. C., Aug. 10.—George Hall was tonight convicted of conspiracy in connection with the lynching at Salisbury of the three negro murderers of the Lyrley family, and was sentenced to 15 years in the state prison.

AFTER CASTRO'S SCALP

New York, Aug. 10—The Tribune tomorrow will say that general Antonio Paredes is here to plan a revolution against president Castro of Venezuela. "I came here solely on that mission," said the general yesterday, "and am sanguine of its success. I shall not return until I have accomplished the purpose of my visit."

NEGRO MURDERER HANGED

Birmingham, Aug. 10—Earl Fletcher, the negro convicted of the murder of another negro, a fellow convict in the Flat Top mines of the Sloss-Sheffield company, was executed by hanging at the county jail today.

"SLINK" CALF FOR SALE

Winnipeg, Aug. 10—The inspector of meat found the body of a "slink" calf, one taken from a slaughtered cow, exposed for sale in a butcher shop here today. A summons was issued for the arrest of the guilty party.

AUTOMATIC TRAIN DESPATCHERS

Scranton, Aug. 10—It is announced that the Delaware, Lackawanna and Western railroad will dispense with the service of telegraphers and will control the movements of trains with the automatic block signal system and additional telephones.

JOHN D. REACHES OUT

London, Aug. 11—The Times this morning says it learns that John D. Rockefeller has furnished funds for railroad development in Tanganyika, Africa.

BOUNDARY PAY DAY

Two Hundred Thousand Dollars Distributed to the Men

July Tonnage Was Low, Due to Work of Improving Plants—Rich Ore From the Skylark

(Special to The Daily News)

Phoenix, B. C., Aug. 10.—Today is pay day for the large mining and smelting concerns in the Boundary, the amount of cash to be distributed by them and by the railway companies a few days later, who haul the ores and mining supplies and smelters' products, being about the same as last month, namely, about $200,000. As nearly as can be ascertained the pay of the Boundary for the month of July is as follows:

Granby Consolidated	$ 70,000
British Columbia Copper Co.	35,000
Dominion Copper Co.	35,000
Smaller mines	20,000
C. P. R. and G. N. rlwy. men	40,000
Total July pay	$200,000

While the month has been light from a smelting standpoint, the additional number of men employed on new construction and development probably makes up the difference.

Compared with previous months of this year, the output of the mines and smelters of the Boundary for the month of July was the smallest thus far this year, by nearly 20,000 tons—due to the extensive enlargements and new work going on at the three reduction plants of this district. No smelting was done at the B. C. Copper Co.'s Greenwood plant, and the Granby Consolidated has had one more of its battery of eight furnaces out of blast while being enlarged. In the course of another month or two, however, the output will increase fast, according to the preparations being made, and before snow flies the output should be at least 5,000 tons daily, or upwards of 150,000 tons monthly. According to the figures compiled the following are the tonnage outputs of the various shipping mines of the Boundary for the month of July:

Mine	Tons
Granby mines	60,564
B. C. Copper Co.	
Mother Lode	2,134
Emma	973
	3,107
Dominion Copper Co.,	
Brooklyn-Stemwinder	14,835
Rawhide	1,392
Sunset	2,986
Mountain Rose	219
	19,432
Providence	180
Skylark	68
Total July output	83,351

A. B. Hood, treasurer of the Skylark Development Co., Ltd., has received returns from the last carload of high grade ore shipped from the company's mine in Skylark camp, a couple of miles from Phoenix, the results being one of the best cars of ore ever shipped out of any mine in the Boundary district. The ore went to the Hall Mining and Smelting Co., Ltd., at Nelson, the returns being $5,220.11 for the 25 tons of ore, or an average of $208 per ton in gold and silver. While the ore was sorted at the mine, the sorting was not very closely done. These returns are considerably larger also than any heretofore received from shipments from this property.

Two other cars of ore were sent out recently from the Skylark, one of second-class ore to the Granby smelter, which gave about $50 per ton, and another car of third-class ore, heretofore considered of little value, which returned $25 per ton, the returns from the entire three cars last shipped being most satisfactory to those interested.

Sinking of the main incline of the Skylark mine from the 150-foot level to the 250-foot level, is actively going on, about 65 feet of the work having been done. It is confidently anticipated that the ore bodies in the Skylark will be found in place at the lower level, and should this prove to be the case, it would appear to add greatly to the value and permanence of the property. The Skylark is owned by a close corporation, the members of which are nearly all mining men and, with one or two exceptions, are residents of Phoenix. They bonded the property in October, 1904, for $30,000, and have met every payment promptly from the proceeds of ore shipments, being able now to meet the last payment that is not due for several months hence. Should the mine continue to improve, it is likely that an air compressing plant will be secured and even more extensive exploitation be undertaken in the future.

CHECKING THE RAILWAYS

(Special to The Daily News)

Ottawa, Aug. 10—The railway commission intends to send out an inspector throughout Canada this fall in order to ascertain whether the railway companies have complied with the law regarding air brakes and automatic couplers. He will also examine the general equipment of each line in order to ascertain that the interests of the public are properly safeguarded.

AN IMPERIAL EMIGRATION POLICY.

Reviewing Mr. H. R. Whates' book on "Canada, the New Nation," the London Saturday Review says: "Mr. Whates studied Canada under conditions wholly novel judged from the ordinary book-making point of view. He went out as a steerage passenger to seek what work he could find as an average emigrant, the better to acquaint himself with realities and estimate the opportunities provided for the newcomer in Canada. His experiences as a 'green' hand and the difficulties which were inevitable are amusingly described. Mr. Whates, at considerable cost to himself, both in a physical and a monetary sense, acquired a grip of things colonial which could otherwise hardly be hoped for. The result is that he has much to say which both the colonial office and colonial governments may read with advantage. He urges the necessity for an imperial policy in emigration, though he fears 'a governing class which paid no heed to the emigration writings of a Carlyle and a Froude and a host of lesser men (it probably never read them!) is not likely to listen to the suggestions of an obscure journalist.' What is wanted is to turn the colonial office into a thinking, creative, and acting force. Then there might be a chance that the genuine unemployed—the landless man—in England might find the way easier to the untilled stretches—the manless land—of Greater Britain. 'The time is ripe,' to quote Mr. Whates, 'for an inquiry into the object of eliciting definite recommendations to facilitate an organised system, the settlement on the unutilised crown lands of the empire—not alone of Canada—of such people in the United Kingdom as may desire to emigrate, or for whom emigration would be advantageous to the community in England and those in lands over sea.' In other words, is it not very nearly time the empire was run on businesslike lines? In the second part of his book Mr. Whates takes a view of Canadian political thought which, though not novel, is a little disquieting and to some extent accounts for the utterances of certain politicians in the past year or two. Canada has no desire to become part of the American Republic, but her modes of thought and habits of life, says Mr. Whates, are American, geographically speaking, rather than British. So strongly pronounced did Mr. Whates find this American tendency that many Canadians, whilst prepared to tell John Bull he must come off his pedestal, talked not of Canadian absorption by the United States, but of the absorption of the United States by Canada."

EDITORIAL NOTES.

Calgary's inventive genius has triumphed over the injury to self pride caused by the publication of the federal government census returns which showed Edmonton to have a larger population than Calgary. It has now been discovered, with proper trumpetings and publicity, that Calgary's city clerk gave the census department an inaccurate map of the city, and hence those living in certain districts were not enumerated! This makes Munchausen look like a school boy.

W. F. Maclean, editor of the Toronto World, the inimitable political "Billy" of Ontario who aspires to lead a united conservative party of one in the Dominion parliament, is, as usual, making savage attacks on the corporations. Just now the Bell telephone company is feeling the vigor of his quill. Unfortunately Maclean, though fighting in a worthy cause, is not overly particular about the truth of his remarks, so long as he can further the ends he has in view. Citing the case of a province which has not yet got into the clutches of the Bell company as an example which should inspire others to throw off the yoke, he says: "The provincial service of British Columbia is working out economically and is being rapidly extended to the exclusion of the Bell." Note those words: "The provincial service," then ask the people of Vancouver what they think about it. Imagine Dr. Lefevre and Mr. Farrell as the heads of a provincial service!

Toronto, with her 17,000 telephones, or one to every 15 inhabitants, claims to use more instruments proportionately than any other city on the continent. Toronto forgets that Los Angeles, with a population considerably smaller than her own, has over 40,000 'phones installed.

If the Canadian Pacific Railway company's ocean greyhounds continue to cut the record down between Great Britain and Canada they will soon have the New York boats beaten to a standstill, and Americans who are in a hurry to get to Europe will travel via Canada. —Ottawa Citizen.

Seattle socialists have established the nucleus of a fund which is to be sent to Russia and invested in bombs for the benefit of grand dukes who represent aristocratic institutions and common people who stand for the maintenance of law and order. This is the organization at one of whose meetings Comrade Hawthornthwaite delivered an impassioned apotheosis of the red flag. Still it is claimed that the objects of socialism are entirely fraternal and benevolent.—Victoria Times.

Mayor Coatsworth of Toronto and Mayor Dunn of Chicago are to appear together on a platform as advocates of municipal ownership. They should be joined by Mayor Buscombe, the redoubtable chief magistrate of Vancouver, and by Mayor Gillett of Nelson, a town that has made greater actual progress along municipal ownership lines than any of the cities mentioned.

Sir Henry Campbell-Bannerman, premier of England, pronounced in a few words a remarkable eulogy of Russia's struggle for freedom when he said: "The douma is dead; long live the douma." Now the French academy has taken up the cry. If Nicholas would only join in he would make it unanimous.

The Toronto World (independent conservative) is energetically searching for a new leader for the Ontario liberal party in the place of Hon. Geo. W. Ross who, it is confidently expected, will shortly go to the Canadian senate. The World has practically exhausted the list of men in sight and is now getting dangerously near the day when it must make the selection it has been aiming at all the time—W. F. Maclean.

When the federal parliament assembles on November 22, the report of the tariff commission will be considered by the house. So prosperous is the Dominion at the present time, and so contented are the majority of tradesmen with the present fiscal arrangements, that no radical alterations need be expected. The evidence taken befors the commission revealed an almost unanimous opinion that no serious tariff changes are desirable.

Minard's Liniment Cures Distemper

A WOMAN'S VIEW

Editor The Daily News—The correspondence on the Chinese question in the columns of The Daily News is very interesting. There is one side of it that has not been brought out; the working woman's side of the Chinese labor problem. In no line of work is the Chinese such a detriment as to the working woman. The white man is in a great measure protected by his unions in keeping out Chinese labor but the working woman has no such protection. How is she to protect herself against the yellow peril? By simply getting out of the country—which she is doing. A white working woman will soon be a rara avis in British Columbia. In all the towns we hear of the scarcity of the working woman. Why? Because the Chinaman has run her out. No one but a working woman knows how hard it is to get work in British Columbia. With the exception of Phoenix and Moyie, all the B. C. towns are over run with Chinese in the hotels and restaurants. In the city of Rossland there is not a white woman cook nor assistant in the kitchens where a few years ago there were a good class of workers, and only a few dining room girls, where undoubtedly if they could use Chinese the white girl would not get employment. In T.J.G.'s letter he says "Canada for Canadians," but indeed Canada is not either for British or Canadian working women, but for the Chinese.

ROB RUSSIAN CHURCHES

BAND OF BICYCLISTS GATHERS FUNDS FOR REVOLUTION.

FRENCH ACADEMY CHEERS THE OUTLAW PARLIAMENT.

Moscow, Aug. 10.—A band of men on bicycles are systematically robbing village churches in this vicinity, avowedly with the intention of securing funds for the revolutionists.

Verkhoyansk, Aug. 10.—A roving band of Circassians rode into the railroad station here yesterday and robbed the cashier of $47,500.

Paris, Aug. 10.—The leading senators, deputies, former cabinet ministers and members of the academy have united in an address extoling the outlawed Russian parliament as the bulwark on which Russia's hopes are dependent. The address says history teaches that a representative government and individual liberty form the only certain means on which a nation can find progress and prosperity. "As the friends of Russia we watched with profound interest the creation of the Russian parliament and its struggle for existence. The triumph of liberty in Russia, which we hope is near, will permit the Russian and French people loyally to support the Franco-Russian alliance upon the basis of common ideals and interests. The Russian parliament is dead. Long live the Russian parliament."

St. Petersburg, Aug. 10.—The Rossia today protests energetically against the charge of insincerity hurled at the government because it has taken measures to stop the agitation of those whose real purpose was to seize the reins of power. The paper insists that the government intends to introduce reforms and says its only change of policy is the abandonment of its former passive attitude.

London, Aug. 10.—The evening Standard today announced that enquiries were being made on behalf of the Russian government among British shipbuilders with reference to the construction of battleships.

STENSLAND'S SYSTEM

HAD HIS CASHIER TAKE MONEY DURING TELLER'S ABSENCE.

KEPT A BIG STRING OF FORGED NOTES READY FOR USE.

Chicago, Aug. 10.—In addition to the discovery of a private ledger kept by president Paul O. Stensland, of the wrecked Milwaukee Avenue state bank, in which was concealed a record of $191,000 of stolen savings bank deposits, another sensational book came to light during the examination of Cashier Herring by assistant state attorney Olsen, at the bank last night. This book showed that the president was a heavy plunger in races. It contained memoranda of the campaigns on the turf. One day Stensland and some companions bet $75,000 to win $60,000 on a certain horse. The animal won. There were lots of losings, however, shown by the book. The authorities are chary of reposing implicit confidence in Herring's statement that he did not forge the names on certain notes thus by implication insinuating that Stensland did. The actual securing of money on bad paper was always put through at noon when the paying teller was at lunch. Then Herring would enter his cage, take the money and leave a debit slip on the hook. This is what happened on July 28. Herring admits that he took $1,000 from the paying teller's drawer, put the money in his pocket and put on the spindle a slip charging the sum to a mythical "Umbach." In the case of the money borrowed by Stensland from the bank, Herring said that Stensland had instructed him to make between $700,000 and $900,000 in forged notes signed with the names of prominent patrons of the bank. Also at Stensland's dictation he cared for these notes and credited interest on them from time to time and was directed by Stensland to keep them carefully away from the eyes of the note teller in order that notices should not be sent to bank patrons whose names had been forged.

BORING FOR COAL BEDS

EXPERIENCE OF DRILLERS IN THE LOWER NICOLA

OPERATOR DESCRIBES DIFFICULTIES ENCOUNTERED

Discussing the subject of boring for coal with diamond drills in British Columbia, Mr. R. C. Campbell-Johnson of Lower Nicola, writes to the London Mining Journal:

Sir—All mining engineers who have had charge of diamond drills to prospect mining ground prior to the actual mining operations for extracting the mineral encounter unlooked for local difficulties to be alone surmounted by their own experience and resourcefulness, combined with that of fellow workers whose success they can hear of. The following brief experience is recounted to help and to learn from others how to overcome these difficulties, and is doubtless one common to many. The literature on the subject seems to be scanty and not always written by those practically engaged in this method of prospecting ground.

A short description of the geology of the formation being tested will be helpful. In the Nicola valley of the province of British Columbia *are sedimentary rocks* in strata composed of volcanic pebbles (large and small), cemented together by lime, forming a conglomerate; limy grits and sandstones, some of them streaked extensively with thin lines of coal, coal shales and coal. These strata, which from the surface outcrops exposed are known to be of the eocene period, pass to what it is expected holds the lowest seams in the cretaceous, similar to other excellent coal fields in the province. These sedimentaries swim on basins of volcanic rocks (classified by the late Dr. Dawson as of triassic age), which latter had therefore ceased action prior to the formation of coal, which owed its origin apparently not to vegetation growing on the spot, but bear the signs of dried trees forming log jams.

The volcanic hills now overtower the sides of the valleys by 1000 to 3000 feet, though originally the sedimentaries overlaid every other kind of rock from mountain top to mountain top, and have still left large patches on the high places, *which have not been reached by the* glaciers and rivers, to be eroded away to this depth as in the valleys. The exact depth of the sedimentaries left in these valleys is not yet certainly known, but from dips, etc., it is calculated at from 1500 to 3000 feet in the deepest parts of the basins. In a coal gully near Coutlee there is a fault or subsidence of part of the sedimentaries, showing several excellent coal seams of a coking bituminous kind, low in ash and moisture, a good steam raiser, and affording good smelting coke. The higher seams frequently outcrop up the sides of the valleys, but in most cases the ash is high, so that the deep seams in the lowest strata hold the best commercial coal, and *necessitate deep boreholes in the valleys* to determine the overlaying ground, before sinking working shafts. In the valleys the alluvial drift is from 100 to 400 feet deep when the ancient river beds are pierced, but these leave the best seams of coal untouched, which are deep seated.

The machine used in this instance was a Sullivan diamond drill plant, capable of deep boring, run by contract with a pro rata higher charge as depth was gained, and to be supplied by the coal company with fuel and water. To 700 feet the charge was constant over an agreed amount of boring; when greater depth was gained the price increased every 200 feet, to allow for extra rods, and the time consumed in *raising and lowering them, 10 feet of core* being the longest campaign. Time consumed in going and setting up at a new hole was paid for by the employer. To penetrate the wash gravel a chopping bit similar to one used in a machine rock drill was screwed on the boring rods, raised, and dropped 1 to 2 feet, when it cleared to bottom, by the hoist of the machine to chop its way down, being followed to between 10 and 5 feet from the bottom of the hole by a 3 inch casing enclosing one of 2 inches.

This work was, naturally, most trying to the boring rods, and twisted them terribly, also jarring the casing and weakening the joints, so that on one occasion the thread half way down in a deep hole broke when the casing was being raised for blasting boulders, and caused a long delay in operations until a fishing tool recovered the lower portion of the casing, necessitating the mended casing being forced down again to its former position. A nest of boulders would bend the rods and snap off the *chopping* bit. The pump was kept washing to try and form a large cavity so that the broken bit and boulders should fall to one side and leave the course of the hole clear. Eight sticks of 40 per cent dynamite were tied double lines, let down the hole, secured to electric wires insulated and fired by an electric battery. This certainly broke up the glacial boulders and allowed them to fall aside more easily into the washed cavity. Dry waterproof seams of fine hardened clay packed round the outside of the casing and gripped it so tightly that endless turning backward and forward by long wrenches, had to be resorted to to force it down. When bedrock is reached the rods are often not fit *after this* treatment to bore a straight hole, and the shear legs for raising the rods and the foundation of the drill are in a wobbly condition, but cannot be moved or the hole is out of plumb. Probably a drill of the Keystone pattern would be a better machine to reach bedrock, but for speed later in rock, this would necessitate two complete plants, one for each variety of drill.

Even when bed rock is reached, casing discontinued, the diamond bit screwed on with a core barrel, and a core lifter fixed to bring up the perfect core, other innumerable troubles are experienced, and the result looked for, namely, a complete core of coal, uncontaminated by overlaying rock, to permit a true analysis of the coal as it exists in the seam, is unobtainable and wastage invariably happens. In the soft rocks owing to the rotating core barrel, the pressure of water, owing to depth, standing in the hole, the activity of the pump forcing water down the boring rods to clear the diamond bit and bring the sludge to surface outside the rods, these latter crumbled the core, washing away all the soft particles, and preventing a true sample for analysis. On coal particles beginning to appear in the sludge, which happens some minutes—according to depth—after the bit has struck a coal seam, since the wash water takes time to return to the surface against the down pressure, the rods are drawn up, the core barrel cleaned, the hole washed out with the pump, the rods that were down carefully measured, and every precaution taken to secure an exact result. However the core mostly crumbles as noted above, and not being complete will not give a true analysis. The sludge, therefore, is run into a clean tub as it comes up, and an analysis taken from this. As on the surface, the fact that the coal seam has been run through is not apparent for some minutes until the wash water shows it, the sludge is vitiated for determination of ash—the great essential. An examination under the misroscope of the sludge also shows that there are white particles of lime *conglomerate and sandstone present* from higher strata, jarred down by the rotating bending rods, facts also falsifying an ash test. Then, again, when the rods are lowered in deeper strata, bits of coal broken loose from the upper seams by jarring fall down ahead of the rods, and show coal particles in the sludge till they are ground up by the bit, and part taken into the core barrel. The question is how to get a complete core of the coal seams pierced that will exhibit the true state of affairs, and whether even a high ash result at one place in some coal seams should be taken as condemnatory of the whole seam when formed by driftwood dependent on water currents? Special bits *set with equal size and, therefore,* equal cutting diamonds, selected and carefully placed with as little copper foil as possible in cavities partly drilled, partly cut in the malleable iron crown bit, have been reserved to bore the coal seams, so as to make a better core, but they are only partly successful. The machine has been run slow and only sufficient water poured down to clear the bit, but not with complete success, the pressure of water being still too excessive for the coal to hold together. There is a so called stationary core barrel worked under ball bearings at the top, instead of the plug connecting barrel and rod. This kind was not tried in this instance, but in other parts of the province *it has been discarded as not overcoming* the difficulty. In boring in soft rocks justice cannot be done to the coal or mineral sought till these adverse results have been overcome.

Another difficulty is to ascertain the direction of the dips of the strata in each hole. On the core the number of degrees from the horizontal or vertical, of course, is determined by a clinometer, but the direction, even by comparison of several holes is not possible if two sides of an anticline or its opposite have been bored, or if dips conform to the edges of the basin and converge to the center. Strata encasing different coal seams are similar and not sufficient to identify the same *seam in different holes, especially when the* corresponding layers of coal and shale in the same seam also vary, as they would in a driftwood composition dependent upon their existing currents. The rods when hoisted or lowered by a screwed in plug attached to a swivel hook, rotate and cannot be made to go in a stationary vertical line to locate the lie of the core barrel, and so, though a plumb line is used on the rods, and the joints marked by a file to keep one line throughout their entire length, a base line taken and a true connection with the bottom of the hole sought to be established, the result is uncertain. A report of an apparatus to photograph the bottom of the hole has been heard of, but *without guides down the hole,* or a cross head to overcome rotation, it is uncertain whether the results are more accurate than those already obtained. These recounted troubles are probably common to most drillers, and if they have been overcome, accounts of how—generally accessible to the profession—seem hard to get.

It is regrettable that a continuous bore hole completely piercing the whole sedimentary rocks carrying the coal measures and overlaying the volcanic rocks, has not yet been put down in the Nicola valley, as several coal seams exposed—15, 5 and 4 1-2 feet through—are good, being low in ash, sulphur and moisture, and affording *around 70 per cent of firm* coke. There is a splendid market for a large tonnage of, say, 500,000 tons at present per annum, to be worked up even to a greater amount by supplying large American towns outside of Canada, lying nearest these extensive coal fields. Yours, etc.

R. C. CAMPBELL-JOHNSON.

Lower Nicola, British Columbia.

Minard's Liniment Cures Garget in Cows

MAKE HAY WHILE THE SUN SHINES

There is a lesson in the work of the thrifty farmer. He knows that the bright sunshine may last but a day and he prepares for the showers *which are so liable* to follow. So it should be with every household. Dysentery, diarrhoea and cholera morbus may attack some member of the household without warning. Chamberlain's Colic, Cholera and Diarrhoea Remedy, which is the best known medicine for these diseases, should always be kept at hand, as immediate treatment is necessary and delay may prove fatal. For sale by all druggists and dealers.

TO WORKINGMEN

NOTICE

Whereas, at the Last Chance and Surprise mines, Chinese kitchen help is at present empoyled, to the exclusion of White labor.

Therefore, be it resolved that this organization, Sandon Miners' union No. 81 of the W. F. of M. reaffirming its opposition to the employment of Orientals within its jurisdiction, strongly condemns the position taken by the management of the properties in question, and counsels workingmen everywhere and those favorably disposed toward organized labor to be governed by this action.

Synopsis of Regulations Governing the Disposal of Dominion Lands Within the Railway Belt in the Province of British Columbia.

A license to cut timber can be acquired only at public competition. A rental of $5 *per square mile is charged* for all timber berths, excepting those situated west of Yale, for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:

Sawn lumber, 50 cents per thousand feet B. M.

Railway ties, 8 and 9 feet long, 1 1-2 and 1 3-4 cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent. on the sales.

A license is issued so soon as a berth is granted, but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B.M., for square timber and sawlogs of any wood except oak; from 1-2 to 1 1-2 cents per lineal foot for building logs; from 12 1-2 to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties, and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of 21 years at a rental of 2 cents per acre per annum.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for homestead purposes may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the minister of the interior at Ottawa, the commissioner of immigration at Winnipeg, or the local agent for the district within which the land is situated, receive *authority for some one to make* entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

It is the practice of the department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property, with buildings for their accommodation, will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of th Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the Act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,
Deputy of the Minister of the Interior.

BEAUTIFUL ELKO GORGE

ONE OF THE GRANDEST BITS OF SCENIC SPLENDOR IN B. C.

A TUMBLING TORRENT OF WATER BETWEEN POLISHED WALLS.

Editor the Daily News,—Some weeks ago I observed in the columns of your valuable paper a statement that contributions, dealing with British Columbia and scenery, were respectfully solicited and in as much as the town of Elko furnishes, as your writer verily believes, one of the grandest bits of scenic beauty to be found anywhere on the American continent, the following brief description will, perhaps, give your readers some vague idea of the exquisite beauty therein displayed.

The place referred to is the Elk river canyon, gorge and falls, situated on the Elk river near the town of Elko, in the South-east Kootenay district of British Columbia. The Elk river is a prominent tributary of the Kootenay river and during the early summer months carries a large volume of water. It is a very picturesque stream for a distance of some fifty miles, but it is not until the town of Elko is reached that the scenery really becomes sublime.

At this point the river turns at right angles, being deflected from its natural course by a large mountain having, at some remote age, slid from its lofty eminence into the narrow canyon below, forcing the river to seek a new avenue of escape from that formerly traversed and from "whence the memory of man runneth not to the contrary." And it is by reason of this deflection that all the beauty referred to is wrought. Imagine, if you can, a stream with an average width of more than 300 feet being at once confined within a channel ranging from 10 to 20 feet in width, tearing its way through a sluice box of solid rock for a distance of more than a mile at a high rate of speed, constituting but one continuous chain of rapids, cascades and water falls; and as one follows along on the bluffs, far above the seething, roaring torrent below, the picture really becomes bewildering. Not only is it the foaming, dashing spray that lends enchantment to the view, but the formation of bluish gray soapstone constituting the symetrical walls of the canyon which, in places, is cut to a depth of several hundred feet and as smooth and polished as the interior of the Vatican of Rome, presents a picture seldom met with anywhere in nature's realm.

Coupled with this is to be found the sulphuric elements, emiting their gorgeous coloring along the walls of rock on either side of the grand canyon, such as that found in the Yellowstone Park, of Wyoming, causing it to be Nature's greatest art gallery of the earth. Here standing on one of the bold promontories overlooking the awful chasm far below, on a sunny day, the eye can trace myriads of miniature rainbows created by numerous small mountain streams that pour over the sides of the walls to mingle with the elements below.

The grand panorama ends when the river finally takes a fifty foot leap over a perpendicular precipice at the mouth of the gorge and the angry waters that a moment before were a foaming, frothing torrent once more glide away as peaceful and serene as the evening zephyrs following a tornado.

The Elk river gorge is not the only element of grandeur found at Elko, for no where do we find the grand old Rockies more picturesque.

Snowcapped peaks, alpine groves, and all the wildness of nature are here profusely displayed. Fishing and hunting is of the very best. The town is situated on both the C. P. R. and G. N. Crow's Nest Pass railway lines and is rapidly coming into prominence as a summer resort, being as already stated, endowed with some of the grandest scenery to be found anywhere.

If you ever have occasion to pass through Elko stop off and view the Elk river gorge and you will never regret it.

S. A. B.

Elko, B. C., Aug. 1906.

SUMMER DIARRHOEA IN CHILDREN

During the hot weather of the summer months the first unnatural looseness of a child's bowels should have immediate attention, so as to check the disease before it becomes serious. All that is necessary is a few doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy followed by a dose of castor oil to cleanse the system. Rev. M. O. Stockland, pastor of the first M.E. church, Little Falls, Minn., writes: "We have used Chamberlain's Colic, Cholera and Diarrhoea Remedy for several years and find it a very valuable remedy especially for summer disorders in children. For sale by all druggists and dealers.

Gin Pills Will Cure Your Sick Kidneys

OR MONEY REFUNDED.

Don't you want to be rid of that nagging, biting, torturing pain across the back and through the kidneys? Don't you want to sleep through the night without being disturbed by the sick kidneys? Don't you want to feel well and be well? Here's the way:

"I suffered from pain and stiffness in the back. Sharp pains would catch me unexpectedly, which were sometimes so severe as to produce fainting spells. Rheumatism followed, and the sharp pains were so severe that I had to take to the bed for several months. I started to take Gin Pills, and in five days I was up and around the house. My pains are gone now, and I have not had a return of the old trouble since. And Gin Pills gave me the first painless passage of urine I have had in two years.

"ROBT. DERRAUGH, Winnipeg, Man."

You can't honestly doubt Gin Pills after such testimony as this. Gin Pills hold out certain relief from pain. They are sold with an ironclad guarantee to cure or refund your money. 50c a box—6 boxes for $2.50. At all druggists. We will send you a trial box free if you will send us your name and address and say the paper in which you read this. Put down the paper—get a post card—and write us now before you forget it. The Bole Drug Co., Winnipeg, Man.

THE DAY'S TELEGRAMS

TEXT OF ANGLO-CHINESE THIBET CONVENTION ANNOUNCED

SPANISH GOVERNMENT LOCKS HORNS WITH THE VATICAN

BRITISH

London, Aug. 10—The text of the Anglo-Chinese convention respecting Thibet, which was signed at Pekin April 24, was issued tonight and confirms the explanation given in the house of lords May 1 by lord Fitzmaurice, under secretary for foreign affairs, that the convention did not alter the arrangements constituted by the Anglo-Thibetan treaty.

Cowes, Aug. 10—King Edward and the prince of Wales were active participants in today's racing, being among those on board viscount Iveagh's Gateona in the contest for schooners over the Queen's course. The other entries were emperor William's Meteor, Sunshine, Clara, and Adela. In the race for cutters and yawls the starters were Navahoe Naraida, White Heather, Merry Maid and Nyria. The weather on this, the last day of the Cowes regatta, continued bright with a good breeze blowing. The Adela won by one second on time allowance. As a strange coincidence, the Nyria, which was third to cross the line in the race for cutters and yawls, was also declared a winner by one second on time allowance.

London, Aug. 10—The battle of Antietam, without its mistakes, was refought yesterday on the banks of Avon, as part of the manoeuvres of the British army, and won by sheer force of numbers by the side representing the northern army. No larger force has been assembled on Salisbury Plain than appeared today for this sham battle. The umpire was lieutenant general Ian Hamilton. Thirty-five thousand troops composed of regulars and volunteers, were engaged. Major general Franklin commanded the northern army and brigadier general Allenby the southern army. General Franklin's force outnumbered those under general Allenby by two to one.

AMERICAN

New York, Aug. 10—The police today raided four stockbroker establishments in this city, charging that they were bucketshops and maintained by John A. Boardman and company of Philadelphia. Three of the establishments were on Broadway and one on 42nd street.

New York, Aug. 10—Attachments were levied on the property of the Trans-Atlantic Fire Insurance company of Hamburg, yesterday. This action was taken by attorneys retained by the San Francisco policy holders, and was due to the refusal of the company to pay claims in fire losses at San Francisco, on the ground that the destruction by fire was an act of Providence. The state superintendent of insurance has on deposit with him $565,000 of the company's money. An attachment was served on him yesterday for that amount. Considering himself in a position similar to that of a receiver of a corporation, however, he will take no action in the matter personally as the amount of the claim is over $800,000.

Des Moines, Aug. 10—The program of the annual meeting of the American league of municipalities in Chicago on September 2, includes an open discussion of municipal ownership at which mayor Coatesworth of Toronto, Dunne of Chicago, Adams of Buffalo and others will speak.

Jamestown, N.Y., Aug. 10—The federal grand jury for the western district of New York this afternoon returned indictments against the Standard Oil company of New York, the Panama Railroad company, and the Vaccum Oil company of Rochester, for violations of the interstate commerce law.

EUROPEAN

Copenhagen, Aug. 10—The conference of the international league of women suffragists today decided to hold the next conference in Holland during the year 1908. In connection with this there will be mass meetings at Amsterdam, the Hague, and Rotterdam. The conference also decided to publish an official paper in England in the interest of the suffragist movement.

Ponta del Gada, Azore Islands, Aug. 10—The Zotti line steamer Brooklyn from Marseilles, Aug. 4, via St. Michaels, Azore Islands, from New York, with 360 immigrants on board, grounded while entering port today. Efforts are being made to float her but they are meeting with great difficulties.

Constantinople, Aug. 10—The recent reports that the sultan Abdul Hamid II. is ill, are confirmed by private advices.

Beirut, Aug. 10—A good deal of excitement has been aroused in European circles by the receipt of an anonymous Moslem letter threatening the lives of all the foreign officials at this point unless they bring their influence to bear for the dismissal of Vali Khalil Pasha, who is charged with the killing, bribing and oppressing the people.

Madrid, Aug. 10—The government continues to maintain a firm attitude on the church and state question. A minister today declared that while the government was desirous of avoiding a breach with the vatican, it had determined to defend the supremacy of the state. At the first sitting of parliament the government will introduce the bill making religious orders amenable to the law controlling industrial corporations, and will also introduce a bill providing that members of orders really expelled from France, will be requested to become naturalized or leave Spain. The minister added that the cabinet was determined to carry these measures and did not fear papal excommunication.

TOURNAMENT FOR FAIR

MANAGER IS ARRANGING A SERIES OF LACROSSE MATCHES

CRANBROOK, LETHBRIDGE, ROSSLAND AND NELSON THE CLUBS

Unless present arrangements fall through there will be a big lacrosse tournament at the fair here next month. Manager Starkey states that he is now arranging for a game here between Cranbrook and Lethbridge teams and another in which Rossland and Nelson will meet, with a possibility of a third game in which Nelson would meet the winner of the Cranbrook-Lethbridge game. These games would be some of the finest ever pulled off in Nelson and would prove a great attraction for visitors at the fair.

In the big regatta at Worcester, Mass., the following results will prove of interest locally: Portland got second in the senior four race second heat, being beaten by the Ravenswood boat clug of Long Island City in the good time of eight minutes and fifty-six seconds, which is one second better than the N.P.A.A.C. record. McGee of the Toronto rowing club, got second in the first heat of the association single sculls and John O'Neil of Nova Scotia, got second in the second heat. G. C. Henderson of Winnipeg, won the second heat of the intermediate sculls in the rather slow time of ten minutes and ten seconds. St. Louis beat Winnipeg in the first heat of the senior fours. The Argonaut rowing club's intermediate eight, which won the intermediate eights at St. Kitts last week, won further honors for their club by defeating the New York athletic club in the intermediate eight oared sculls. Portland will have another race at Worcester as they were entered for the mile and a half with turn, before they left here. The race should be pulled off today.

Battling Nelson has crossed the color line, and yesterday at Goldfield, Nevada, manager Nolan signed articles for him to meet the colored champion, Joe Gans, in Goldfields on Labor day. It will be a fight to the finish and the contestants will weigh in at 3 o'clock at 133 pounds. Win or lose Nelson will take $20,000 and Gans gets $10,000 for his share. For some time past the sports have been anixous to see these two fighters get together and the fight promises to be as good as that memorable one last September at Colma when Britt and Nelson met in the ring. Nelson will easily make the weight, while the negro will have no difficulty whatever. Frisco sports will be sore at losing this fight as they were hoping that it would be pulled off in the Earthquake City.

The junior baseball players are properly elated at their victory in Trail on Thursday. Trail got on the tobogman in the second innings and the Nelson boys swatted their pitcher hard and rolled in five runs which gave them a good start and from that time on they had the game well in hand.

The lacrose boys are keeping up steady practice for their game next Thursday with Regina. While they had an easy victory over Rossland, they do not expect to have such a snap in their next game. The Regina team is a strong one and as the local boys have already demonstrated that they can go some, the game should be well worth going to see.

As a result of a conference of the executive of the B.C.A.L.A. held in Vancouver the other night the coast lacrosse troubles seem on a fair way to settlement. The Vancouver protest regarding last Saturday's match is laid over for the time being which practically means a withdrawal, but Westminster agrees to play over the game of last Saturday, at some date to be mutually agreed upon.

CANADIAN NEWS NOTES

WORLD'S BIGGEST BRIDGE WILL SPAN THE ST. LAWRENCE,

GIGANTIC STRUCTURE BEING ERECTED FOR THE G. T. P.

Quebec, Que., Aug. 10.—Work is now progressing very rapidly on what is, without exception, the largest bridge in the world. When it is completed some time next year, long before the Grand Trunk Pacific railroad will be ready to use it, the steel work used in its structure will weigh over 66,000,000 pounds, some parts alone weighing over 200,000 pounds, which are now being placed in position by the largest electric crane ever built for any purpose. This great mass of machinery stands 300 feet high and moves along as it builds its own ground. The construction of the bridge was a huge undertaking at the time to the eminent engineers called upon to study and formulate the problem and success with which they have overcome all the obstacles is one of the engineering feats of the age and has been pronounced the greatest ingenuity of the engineering world by bridge builders and others who have come from all parts of the world to watch the progress of the mammoth work. On the south side of the river some 14,000,000 pounds of steel have already been placed in position. When completed the bridge will have two centre posts, one on the south side which is now completed and one on the north side, each of which will weigh 3,000,000 pounds. These posts are 315 feet high from their "rests" and each will hold half the weight of the huge cantilever anchor and when the ornamental cap is placed in position will be 410 feet in the air.

Regina, Sask., Aug. 10.—The Masons of the province gathered in Regina today in great strength for the purpose of forming the Saskatchewan Grand Lodge A. F. and A. M. The number of delegates in attendance far exceeds all expectations, no less than 25 lodges being represented. Representatives are here from almost every province in the Dominion, including Bro. F. Broad, of New Westminster, B. C.; Right Worthy Brother Morris, of Prince Edward Island; Most Worthy Brothers McKechnie and James A. Ovas, of Manitoba, and others. The following grand lodge officers were installed with all ceremony by the grand master and grand secretary of the Grand Lodge of Manitoba: Grand master, H. H. Campkin, Indian Head; deputy grand master, O. Davidson, Prince Albert; grand senior warden, Harold Jagger, Moosejaw; grand junior warden, Rev. W. B. Tait, Qu'Appelle; grand treasurer, A. Sheppard, Regina; grand secretary, Dr. J. M. Shaw, Regina; grand registrar, A. C. Smith, Moosomin; grand chaplain, Rev. Edward Matheson, Battle Creek.

Calgary, Alta., Aug. 10.—A swinging scaffold on the public school fell yesterday, with four men upon it, a distance of forty feet. J. H. Bristowe, stone mason, hit his head against a sill, fractured his skull and died in a few hours. J. McDonald sustained a fracture of the spine and will probably die. Two others got off with light injuries.

Halifax, N. S., Aug. 10.—One hundred men at the Strathcona coal mines, Herbert river, Cumberland county, are on strike because the management, in order to offset a reduction in the price of coal to the Intercolonial railway, cut ten cents a ton off the coal cutters today.

Montreal, Aug. 10.—Word reached the city this morning that C. B. Carter, M. P. P., died on board the Allan liner Victorian last night. He had been abroad for some months, and was on his way home at the time of his death.

Delta, Ont., Aug. 10.—Emma Carr, aged about 20 years, residing in the vicinity of Phillipsville, took the contents of a five-ounce bottle of carbolic acid yesterday, living only about one and a half hours afterwards. The cause for the deed is not known.

Toronto, Aug. 10.—Raising no objection to extradition, Clinton B. Wray left yesterday afternoon for Buffalo in company with detectives on his way to Pittsburg, where he will stand trial for stealing $125,000 from the Union Trust company.

UNNECESSARY EXPENSE

Acute attacks of colic and diarrhoea come on without warning and prompt action must be taken. There is no necessity of incurring the expense of a physician's services in such cases if Chamberlain's Colic, Cholera and Diarrhoea Remedy is at hand. A dose of this remedy will relieve the patient before a doctor could arrive. It has never been known to fail, even in the most dangerous cases and no family should be without it. For sale by all druggists and dealers.

THE OLYMPIA FOR THE MIDDIES

Norfolk, Va., Aug. 10 — The protected cruiser Olympia, admiral Dewey's flagship will be assigned to the naval academy next year for use in the cruises of the midshipmen and for general instruction purposes. The Olympia is now at the Norfolk navy yard, to be put in servicable condition. A board of survey will make a report on the necessary repairs to be made before the cruiser will be fit for service. The midshipmen are now on their summer cruise, and some time will elapse before the Olympia will be in demand for such purposes. It is hardly probable that the ship will be available before next summer.

NELSON'S NEWS OF THE DAY

Mr. and Mrs. Paxton left yesterday morning on a visit to the Boundary cities.

Arthur Denman of this city has been appointed C.P.R. road foreman of engineers for district No. 3, vice E. Austin, transferred to district No. 2, at Revelstoke.

Alderman J. A. Irving visited the city reservoir last evening and returned fully impressed that no more city water should be wasted this summer.

Bush fires in the immediate vicinity of the city, particularly along the Granite road, are gaining ground daily and the first fresh breeze threatens to fan them into rather alarming proportions. At Kaslo three fires are in progress in full view of the city whenever the smoke rolls away temporarily. Incoming travelers from the Boundary country last night report many fires in that district.

Rev. G. Morton Walker, former Baptist minister here and who is now stationed at Chesley, Ont., was recently married at Kenilworth avenue Baptist church, Toronto, to Miss A. R. Sinclair, for the past four years a deaconess in connection with the Camelon institute at Falkirk, Scotland. The lady arrived from the old country in July and Mr. Walker surprised his parishioners by going to Toronto very quietly and getting married there. On the return to Chesley of the newly married couple, a week ago, they were given a great reception.

A pleasant time is in store for the friends of the ladies who are identified as members of St. Saviour's Women's Auxiliary of the church of England Missionary society of Canada. On Thursday, Aug. 16, the auxiliary will hold a launch party to Willow point, the launches leaving Astley's boat house from 4:30 to 5:30 p.m. and returning at 9:30. Tickets for the outing, including supper, are for sale at $1 each. The ladies are making an effort to combine business with pleasure and, while giving their friends an enjoyable evening, raise funds for the church.

Dr. E. C. Arthur, secretary of the school board, stated yesterday that according to his computation, the average cost to the city, exclusive of the government grant, of educating each pupil at the public school was $1.50 per school month, or $15 a year. Dr. Arthur will submit his report at the next meeting of the school trustees, when the question of admitting to the public school, pupils who reside out of the city limits, will again be taken up and presumably an arrangement will be made, whereby such pupils will be admitted on and after Aug. 27 next, when the school reopens, upon payment at the rate of $15 yearly per pupil. At the last meeting of the trustees the cost of educating outside pupils was referred to the secretary to report on, with the above result.

MINING RECORDS

At the mining recorder's office on Aug. 10 certificates of assessment work were issued to A. Long on the Free Gold; to P. Cherbo on the Rubio; to Angus Curry on the Sunset; to G. Lowenburg on the Bat; to J. Campbell on the Great Western, the Stronghold and Topsy; to D. J. Steel on the J.C.B.; to J. Harrison on the Reba.
