NELSON IS OUT OF IT

Local Cricketers Let Victoria Walk All Over Them.

Went Down to Defeat by Score of 80 to 279--Victoria and Vancouver Play the Final Today.

(Special to The Daily News)

The weeding out of the rival teams in the big cricket tournament was completed today when Nelson and the Vancouver "Burrards" went down respectively before Victoria and Portland, although a previous defeat by Nelson put the Oregonians out of the running for honors.

Victoria plays Vancouver in the final tomorrow, both elevens being materially strengthened and a fine exhibition of the English game being looked for. On Saturday what is expected to be the greatest cricket ever enjoyed in British Columbia will be provided, the victors of the tournament being pitted against a team made up of all others, in which ets for 83, and Greig 2 for 86, while son are certain to catch places.

The arrangement of the tournament by which each team on losing drops out of the race is being very freely criticized by the visitors, who contend that the standard rule should have been adopted of having each team entered play each other in the preliminary matches.

Today the surprise was the victory of Portland over the Burrards of Vancouver, over confidence being the seeming explanation of the result. Even without Lawrence, their best player, who was indisposed, the "Webteet" piled up a score of 88, against which the Burrards had but 79. Fen, of Portland, succeeded in taking three wickets in a single over, his victims being Sinclair, Dunlop and Rhodes, and this capped the climax of Vancouver's descendent fortunes.

In the Victoria-Nelson match, Victoria had something of a walkover, winning on scores of 279 to 80. Coppen 20 and Rolt 19 were the only Kootenaians to reach double figures. For Victoria, L. S. York made 76, Cobbett 49, W. York 35, Martin 47, and Barnacle 25. Among the bowlers Bourke, for Nelson, took 3 wickcomposite both Bourke and Greig of Nel-Will York, for Victoria, showed 6 wickets taken for 39 runs and Cobbett 3 for 36.

The tabulated scores in Nelson's victorious match with Portland are appended:

NIPPED IN THE BUD

New York, Aug. 22—A bold conspiracy to rob a New York bank of $200,000 or more by means of forgery, was partially disclosed today, when two men were arraigned in the Tombs police court, and held in heavy bail. The prisoners were James T. Murray, about 30 years old, and a man who said his name was Theodore J. Smith, 24 years old, of this city. Smith's real name is Schaad. The specific charge against the men is that they successfully forged $1900 worth of checks on the Union Trust company of this city. According to district attorney Lockwood, Schaad was a clerk employed in the bank of New York, and had charge of checks sent in from various sources. Some time ago he became acquainted with a clever gang of crooks who, Mr. Lockwood said, got him to hold up several checks drawn on the Union Trust company. It is charged that these checks were given to Murray, who traced the genuine signatures on them and got a man to open an account with two banking firms. The forged checks, amounting to $1900, were then deposited. Drafts were at once made on them. Schaad has turned state's evidence.

EGAN GETS GLAD HAND

(From the Victoria Colonist)

Col. J. C. Egan, the dean of the Kootenay newspaper fraternity and editor of the Rossland Miner, is enjoying a vacation in the city. The colonel is a brother of Martin Egan, who won fame as an Associated Press correspondent during the Russo-Japanese war, and is now head of the Associated's staff in the old world's metropolis. During the early days of the Rossland boom Col. Egan was in the vanguard of newspaper correspondents who flocked to the Golden City to tell the world of the new Eldorado. Practically speaking he has resided there ever since and helped guide the destinies of the Daily Miner. Few men in the southern interior have a larger circle of acquaintances than the colonel, who is withal a prince of good fellows.

GRAND FORKS EXCITED

CHANCE REMARK OF JOHN KIRKUP CAUSES TROUBLE.

GOLD COMMISSIONER PROMPTLY SETTLES THE MATTER.

(Special to The Daily News)

Grand Forks, Aug. 22.—Considerable consternation exists here locally, since it has been announced that John Kirkup, gold commissioner at Rossland, immediately upon his return from an official trip to Franklin camp, made the statement that the entire Franklin mineral belt was in the Ymir provincial electoral district. The result is that all government records of Franklin camp properties kept at Grand Forks are in a sense illegal. It is also understood that a local syndicate is about to construct a twelve mile trail up Bowman creek from the Arrow lakes to the townsite of Franklin, which is in the heart of the district.

By means of this trail Nelson could be made the main supply point for this camp. It is rumored that a reorganization of the board of trade will take place at once so that proper representation can be made to the government to endeavor to save for Grand Forks the most important mining camp in southern British Columbia.

(Special to The Daily News)

Rossland, Aug. 22.—John Kirkup, gold commissioner for the Trail Creek division, was interviewed today by the correspondent of The Daily News with reference to the rumor that Franklin camp was properly located in West Kootenay and not in Yale.

Mr. Kirkup smiled broadly when the matter was mentioned to him. "When I was over in the Boundary the other day," said he, "I jokingly remarked in the presence of a correspondent named Johnson that Franklin camp was in West Kootenay and not in Yale, and to prove my assertion I got a foot rule and showed by measurement on one of the maps that the camp was within 10 miles of the lower Arrow lake. The dividing line separating the two districts is a line running parallel with the Arrow lake and 10 miles from the lake. As a fact Franklin camp is well within the 10-mile limit. The camp, however, is also well on the western slope of the range that marks off the mining division and no possible question can arise on that score, so the Grand Forks people have no reason to get excited over the matter, or to imagine that any question of the legality of records is involved. Everyone who was present when the conversation referred to took place must have understood that I was joking."

ATTACKED BY LYNX.

C. P. R. Brakeman Has Hard Fight for His Life.

Fort William, Ont., Aug. 22.—After a desperate struggle with a lynx, which lasted fully five minutes, W. Sutherland, a C. P. R. brakeman, saved his own life by plunging a pocket knife in the animal. Sutherland, at the way station of Osceo, was sent to the rear of his train to flag. He had walked a short distance down the track when he was attacked by the lynx which succumbed only after being stabbed seven times. Sutherland was severely bitten on the shoulder and received scratches on the face, but was not seriously injured. This is the second lynx killed in this district this summer.

CAUGHT IN MAN TRAP

Carmanah Light Keeper Explains Fate of Valencia Castaways.

Large Rock Stands at Mouth of Cave over Which Boat With Living Freight was Tossed by Waves.

(Special to The Daily News)

Victoria, Aug. 22.—News received yesterday from the west coast that eight skeletons of victims of the lost steamship Valencia, a pontoon and a ship's boat had all been found, is confirmed. The skeletons are in a boat which has been located by Indians in a cave. If, as suggested, a boat load of passengers from the unlucky steamer suddenly found themselves prisoners while searching for a place of safety, their sufferings can well be imagined.

The following dispatch was received from W. Daykin, light keeper at Carmanah:

"It is impossible to identify the skeletons except by removing tons of rubbish, then something might be found which would render it possible. If the men got into the cave alive they must have later starved to death. It is a perfect man-trap. There is a large rock at the mouth of the cave, over which the boat was thrown by the sea, and there is not room enough on either side of the rock to get the boat out again when smooth, and they must have perished before they got any smooth water. I think the boat is all right except for a small hole i nthe forward air chamber near the gunwale. I am too shorthanded here to do anything."

The Valencia, it will be remembered, was wrecked while on her way to Victoria from San Francisco with a big load of passengers late in January last. In the disaster over one hundred lives were lost.

MACDONALD-PORTEOUS.

Last evening at 7:30 Miss Sara Elizabeth Porteous and Roderick D. Macdonald, both of this city, were quietly married at the residence of the groom, corner of Kootenay and Victoria streets, by Rev. J. T. Ferguson, pastor of St. Paul's Presbyterian church. The bride was most becomingly attired in a pretty costume of light blue silk, trimmed with chiffon roses and old lace. Earnest Porteous, brother of the bride acted as best man. The bride is a native of Trobolton, Carleton county, Ontario, and for the past two years has successfully managed electrical massage parlors here. The groom hails from Antigonish, Nova Scotia, and has been in the west for the past nine years. Mrs. Macdonald will be at home to her friends on and after Monday next.

ALL WENT UP IN SMOKE

ANTON PFEIFFER'S RESIDENCE IN FAIRVIEW DESTROYED.

PRCTICALLY NOTHING SAVED OF THE CONTENTS.

Yesterday afternoon shortly after 5 o'clock a fire occurred at Fairview, which completely demolished the residence and all the contents of Anton Pfeiffer. The loss will amount to about $3,000 and it is understood that some insurance was held through T. G. Procter, but details of this were not obtainablec last night.

Mrs. Pfeiffer had been in the city during the day, had withdrawn some money from the bank account, and had placed it in the drawer of the sewing machine and this was burned up with the rest of the belongings. Mrs. Pfeiffer had been chatting with her daughter, Mrs. Henry Pyke and had walked part of the way home with the latter lady. Returning to her own home Mrs. Pfeiffer lighted up the fire in the kitchen stove and then went into the sitting room. She knew nothing of the fire until her husband and son returning from work saw the rear portion of the house in flames and rushed to the rescue. Beyond a few preserves, a kitchen table and a couple of chairs, the entire contents of the residence was destroyed.

Mr. Pfeiffer and his son have been working on a contract close to the city limits and have been in the habit of quitting work at 4:30. Yesterday most unfortunately, both men worked on till 5 o'clock and returned home to find the house on fire and the fire beyond control. All that they and the neighbors could do was to prevent the flames from spreading to the out houses and this they did. The residence was a frame, two-story one and is sitdated just below the Fraser milk ranch and above where the street car track turns east for its final run to the shipyard. Mr. and Mrs. Pfeiffer have the sympathy of all their friends and neighbors over their unfortunate loss.

WITTE UNDER THE KNIFE

St. Petersburg, Aug. 22—Count Witte, the former premier, submitted to an operation on Tuesday at Frankfort-on-the-Main. He will be obliged to remain there for several weeks, in order to complete a cure.

MUST CHANGE METHODS

TORY PARTY WILL HAVE TO BE REGENERATED TO WIN.

SO SAYS HAULTAIN, LEADER OF PRAIRIE TORIES.

Winnipeg, Aug. 22.—Hon. Fred W. G. Haultain, who is visiting in Winnipeg, says he wants to see the proposed dominion conservative convention held in Winnipeg.

"It should be," said Mr. Haultain emphatically. "The west is now an important factor, ont only in the industrial, agricultural and commercial life of the dominion, but eminently so in the political life. The great questions of Canada, at least many of them, are of the west. It is questionable if the west is not more in touch with the east than the east is with the west.

"Our representation, on the basis of population even, is most unfair. The two new provinces, Saskatchewan and Alberta, should, on the basis of population, have at least twenty representatives in the house of commons at the present time, which reduces the force of the argument of our comparative insignificance as political factors.

"I may say," said Mr. Haultain, with emphasis, "and I hope I am not presumptuous in saying it, that material changes will have to take place in the policy and tactics of the conservative party if success would be obtained and better government brought about in the dominion.

"I believe that from the country west of lake Superior will come much of the motive force which will bring about that change of government."

HOT FOREST FIRES.

Serious Damage Being Done in Quebec and N. B.

St. John, N. B., Aug. 22.—Forest fires are reported as doing much damage in various parts of New Brunswick and Quebec. Campbelltown dispatches say it is reported there that the village of Caplan, Quebec, with another settlement just back of it, has been almost wiped out of existence. About seventy buildings have been destroyed and a large number of people are homeless. The damage to lumber and crops in that vicinity is heavy and the fire is still spreading. Another fire is raging near Balmoral, N. B., but has not reached the settlement, though the damage done to the lumber lands is considerable. Still another fire is burning and spreading rapidly just back of Campbelltown, near Sugar Loaf mountain.

WINNIPEG WANTS WATER

Winnipeg, Aug. 22—The board of Manitoba and Northwest underwriters convened today in an emergency meeting to hear a report of their inspector, Mr. Howe, concerning Winnipeg's water supply for fire purposes, which is believed to be dangerously inadequate. No definite action was taken by the underwriters, but it is understood that a drastic one is contemplated at their regular meeting on August 30.

NEW WORLD'S RECORD

Philadelphia, Aug. 22—A new world's automobile record for 50 miles, was established here today by A. R. Kelly of this city. Kelly covered the distance in one hour, three minutes 19 3-4 seconds.

CUT OUT MEAT COURSES

ADVICE ON EATING GIVEN BRITISH MEDICAL CONGRESS.

HORRORS OF IMPURE MILK WOULD STAGGER THE PUBLIC.

Toronto, Aug. 22.—Intense heat is prevailing. The sectional meetings of the British medical congress were largely attended this morning. The medicine discussed over-nutrition and under-nutrition with the physiciological section. Several papers on the treatment of typhoid were also read. Dr. Barbi, an Indian physician, spoke strongly against eating meat, claiming his people for thousands of years had existed without it and they were as strong physically and mentally as any other race.

Control of water and milk supplies was also discussed. Professor Harcourt, of Ontario Agricultural College, declared that if the milk business was investigated a far worse state of affairs might be brought to light than was shown by the Chicago packing exposures. He said it was practically impossible to secure milk free from germs, even with scientific methods.

Professor Glaister, of Glasgow, stated that legislation should be passed prohibiting the sale of milk that, six hours afterwards, could not be boiled without curdling.

In the pathological section a synopsis of the investigations carried on under the imperial cancer research fund was given by Dr. Bassford, who declared that cancer was not on the increase.

NO OFFICIAL BREACH

Athens, Aug. 23—There is no truth in the reports circulated in Sofia that the Greek minister to Bulgaria has been recalled.

WILL FIGHT MONROE DOCTRINE

San Jose, Costa Rica, Aug. 22—The Latin-American club today formulated its objects and views. It declares to be the purpose of the club "to work for the union of Latin-America, and to be prepared to oppose the United States in its work of annihilating Latin-American independence." The Monroe doctrine in president Roosevelt's point of view, is declared to be a menace to all the Latin-American countries.

GIFT FROM ALL CANADA

Brilliant Ceremony on Board the New Battleship Dominion.

Shield and Silver Service Accepted by Capt. Kingsmill on Behalf of the Officers and Crew.

Quebec, Aug. 22.—h. M. S. Dominion was a scene of gaiety this afternoon. At one o'clock captain Kingsmill entertained his excellency the governor-general, the dominion premier, sir Wilfrid Laurier, lieutenant-governor sir Louis Jette, the French admirals and captains of the two French cruisers and others to luncheon on board the battleship.

At three o'clock the presentation of the shield and silver service from the people of Canada, and the cup from the people of Halifax, was made on board ship in the presence of a large gathering of prominent people from all parts of the dominion.

The battleship was beautifully decorated for the occasion, and her officers and crew were dressed in their full dress uniforms. Captain Kingsmill, commander Boyle and the officers of the ship were all gathered on the quarter deck to meet the invited guests, and after this formality was gone through the crew came aft to take part in the function.

A committee from Ontario, composed of J. K. Osborne, chairman, colonel John J. Davidson, W. E. B. McMurrichy, K. C., and W. E. Beardmore, from Toronto, together with their ladies, occupied prominent positions beside the members of the Kingsmill family from Ontario, Mrs. Fisk, Montreal and Mrs. Galt, of New York.

His excellency the governor-general introduced the members of the committee and in a short speech told of the pleasure it gave him to be present at the presentation, which was not of a gift from the people of Ontario, but from the people of the whole of Canada.

His excellency introduced chairman J. K. Osborne, who said that when it became known that the admiralty had, as a compliment to Canada, named one of the newest and most powerful battleships the "Dominion," he conceived the idea that it would be a graceful, fitting and desirable act to make some kind of presentation to the ship that would be acceptable to officers and men alike, and would emphasize the kindly feeling existing among people of Canada towards the navy in general, and his majesty's "Dominion" in particular.

Colonel John T. Davidson read a dedication address, and after the applause had subsided, captain Kingsmill, on behalf of officers and crew, accepted the presents in a very happy and appropriate speech.

KISSED A STRANGER

AND SO MONTREAL DOCTOR HAS TO GO TO JAIL.

DELEGATE TO MEDICAL CONGRESS IS IN DISGRACE.

Toronto, Aug. 22.—Dr. Charles W. Wilson, of Montreal, who is prominent in medical and social circles of that city, and who is in attendance at the meetings of the British medical association here, was this morning sentenced to a week in jail without the option of a fine. It appears that Dr. Wilson, while intoxicated in the King Edward hotel, approached a group of women tourists and seized a young lady named Severance in his arms, a perfect stranger to him, and forcibly kissed her. The young woman's father had Wilson arrested. In the police court this morning Wilson said that he was drunk at the time and did not remember anything about the affair. Sentense followed in spite of his pleading to be let off with a fine.

RAISING THE WIND

Embryo Revolutionists Make Bogus Money to Fipat Their Scheme

New York, Aug. 22—On a charge of making dies to counterfeit the standard silver dollar of Venezuela, to finance a revolution in that country, secret service officers today arrested captain George Boylton, former resident manager of the Orinocco corporation of Venezuela, and R. Thompson, attorney, both of this city. Both prisoners were admitted to bail at $5000. Joseph Keller and Sydney Keller of Keller Bros., die makers, were also arrested in connection with the case.

So important did the federal authorities regard the arrests that chief Wilkie of the secret service, came over from Washington to be personally on the ground when the men were apprehended. With chief Wilkie was a foreign looking gentleman, who was said to be the secretary of the Venezuelan legation in Washington. Wilkie was assisted by Flynn of the New York division of the secret service.

Captain Boylton came to New York in July last to finance and lay preliminary plans for the revolution against president Castro. He had with him an authorization which purported to bear the signature of a leading revolutionist appointing him a special commissioner to America with power to do practically everything necessary to get the movement started. Captain Boylton it is said, was the local and resident manager of the Orinocco concern, capitalized at $5,000,000. It is also charged that captain Boylton undertook to put in operation a plan similar to that whereby the revolution against Don Pedro in Brazil was said to have been financed, that of getting dies, buying bullion, and turning out what silver coin was necessary. Later, if the movement proved successful, the issue would be legalized. If unsuccessful, no one would be injured, it was argued, as the coins were to be made of the same fineness as those regularly coined by the government.

REBELS CAPTURE CUBAN CITY

Havana, Aug. 22—The insurgents in the province of Pinar del Rio captured the first city here today. At 10 o'clock this morning the force led by Pino Guerras, who is an ex-congressman and an influential man, and who was thought to be many miles eastward, and sundry other insurgent bands, attacked San Luis, which is situated on the railway about ten miles west of Pinar del Rio. A sharp and decisive engagement followed, during which a number of men were killed or wounded. The town was defended by less than 100 rural guards, 50 of whom surrendered to the insurgents and are now prisoners. The insurgent forces are now in possession of the railroad station and of the town, wehich is resuming its normal condition. In the capture of San Luis, which has a population of about 10,000, the insurgents have obtained an important base for future operations.

NO STENSLAND THERE

El Paso, Texas, Aug. 22—Chief of police Deludon of Ciudad Jures, opposite El Paso, received this message from Aguas Calcentas, Mexico, today: "No truth in the report of the arrest here of Paul O. Stensland, the embezzling Chicago banker. No man of that description here."

ASHORE IN VANCOUVER HARBOR

Vancouver, Aug. 22—U.S.S. Princeton, here to convey the body of rear admiral Train from R.M.S. Empress of China south, ran ashore in the Inlet for a few hours yesterday, but got off uninjured at high tide.

THINK CANADA IS O. K.

BRITISH RAILROAD MAGNATES PRAISE THE C. P. R.

AND INCIDENTALLY SPEAK WELL OF THE DOMINION.

Winnipeg, Aug. 22.—Every day notable Europeans are passing through Winnipeg. Yesterday a party of prominent railway men arrived. They include Mr. S. Fay, general manager of the English Great Central (who has constructed a quadruple track into London, which is, perhaps, the finest road in Europe); Mr. H. Holmes, superintendent of the London and Southwestern, upon whose line at Salisbury the recent railway disaster occurred; Mr. S. T. Dutton, engineer of the East Indian railway, Calcutta; Mr. J. P. O'Donnell, engineer and master; S. E. Fay, son of the general manager of the Great Central. The company travelled from Montreal in a special saloon car, which was furnished with every convenience for the journey. Today they proceed westward to Vancouver, whence they will go south to California and back through Salt Lake City, Yellowstone Park, St. Paul, Chicago, Buffalo, Rochester and New York.

Discussing railway communication, Mr. Fay remarked: "Of course, your problems in Canada are different to ours. I think, however, you tackle them pretty well; you hae immense distances to cover and heavy traffic in bulk. I do not think your railway policy could be materially altered. I think great credit is due to the C. P. R., which is very progressive with its steamboats, hotels, etc. We have not been out of their hands since we left Liverpool, and we are going to Vancouver with them. If we wished to extend our journey to China, we might do so, and still remain under the C. P. R.'s care. The running on their lines is very smooth."

Mr. Holmes: "We are very much struck with the enterprise of the company in building such a splendid hotel as they have in Winnipeg. There is a beautiful hotel in Quebec—the finest in the world."

Mr. Dutton said the Canadian railways could well be compared with the Indian roads: "If Indian railways were being constructed today," he added, "they would follow the same general lines. The engines would be bigger and the cars would have a greater carrying capacity. We are not carrying half as much per train as you are. Our biggest train is a thousand tons. The tendency of today is to provide for a heavy traffic."

Mr. Dutton remarked that several Indian railway officials had been to America in the last few years, and the result had been that several alterations had been made in the general working of the Indian railways.

KICK AGAINST CANADA

Washington, Aug. 22—Captain Ross of the revenue cutter service of the United States treasury, today reported to the department of commerce and labor, that the Canadian cruiser Vigilant was destroying the nets of American fishermen in the great lakes.

DUNLOP-HODSON.

Yesterday morning at St. Saviour's church, James R. Vetch Dunlop, Greenwood, third son of the late James Vetch Dunlop, Colombo, Ceylon, was married by the rector, Rev. F. G. Graham, to Edith Rose, second daughter of the late R. Lyster Hodson, Irish land commissioner, Dublin. Cranbrook and Calgary papers please copy.

ANOTHER FAILURE

Big New York Brokerage Firm Closes Its Office Doors.

"M. J. Sage & Co." the Bucket Shop System Operated by Ex-Convict Al. Adams, is in Trouble.

New York, Aug. 23.—M. J. Sage & Co., brokers, of Jersey City and this city, at the close of business hourse today, posted a notice at their Jersey City office, informing their correspondents that they had discontinued business.

Sage & Co. was incorporated under the laws of the state of New York in 1904 with a capital stock of $50,000. The object of the company, as set forth in the incorporation papers, was to conduct a stock commission business.

The president of the firm is Maurice J. Sage, a young man who came to this city twelve years ago from Binghamton, New York. The officials and directors of the company are Edward L. Bradbury, secretary; Charles W. Cannon, treasurer; David Hobard, and H. Newman.

The firm, together with the Guanaja mines, amalgamated into one company and occupied joint offices at 42 Broadway up to May 1st. The latter company is the property of Albert J. Adams. After his release from Sing Sing he purchased this mine, located in Guanaja for a sum estimated at $1,000,000. Shortly after this Adams went to Mexico and now lives near his mines. Albert Adams, Jr., has been manager for the Sage company. His office is located at 17 Broadway. It is stated that the Sage system consisted of a string of at least 300 branch offices stretching from Maine to New Orleans, and in some quarters the failure was declared to involve possibly $2,000,000. The business done in the main office was in the way of receiving orders from the many out of town correspondents and agents. When the main office was located in Manhattan thirty telegraph operators were engaged in caring for the out of town business. Although a great business was done by this firm, it has no exchange member here.

During the sensational times in the cotton market about the time of the panic the speculation in cotton in the south was enormous. The Sage system got a great volume of business through the southern branches and as a result of the campaign the firm came out a winner to the extent of $2,000,000. This sum, with the oncoming of a bear campaign in the stock market, enabled the firm to recover all its previous losses.

Formal application for the appointment of an assignee will be made tomorrow, it is said.

ANOTHER STUMPING TOUR.

Premier McBride Again Heads for the Interior.

Victoria, Aug. 22.—In the course of an interview accorded to the Colonist yesterday, premier McBride communicated the details of his intended visit to the mainland. He will leave here the first week in September for Agassiz, where he will open the annual fair, after which he will make a short trip into the interior and at the special request of the various up-country conservative associations will visit them.

AN HISTORIC SKELETON

Plattsburg, Aug. 22—A skeleton, which is doubtless that of a member of a famous British regiment, the Royal Enniskillen Fusiliers, was unearthed by road workers a mile north of here today. It is considered more than likely that the soldier was killed in the battle of Plattsburg, in September, 1814, when the American general MacComber, repulsed a British land force. With the skeleton was found the remnants of military decorations, eight Spanish dollars of dates from 1787 to 1806, and several buttons bearing the word "Enniskillen."

INJURED IN A RUNAWAY

Edinburgh, Aug. 23—While a party of American tourists were driving down a mountain near Blairgowrie, county Perth, the horses bolted, wrecking the carriage. Miss Van Norden of New York, was thrown out and sustained serious injuries about the head and spine. It is feared she will not recover. Miss Van Norden is the daughter of William Van Norden, a prominent financier of New York.

THEY KILL A COUNT.

Warsaw, Aug. 22.—Count Fermer, a colonel of the general staff, was fatally wounded today by revolutionists. A patrol came up immediately after the affair and discharged a volley into the crowd, killing one man.

FOREST FIRES CHECKED

St. John, N.B., Aug. 22—Rains last night checked the progress of the forest fires, but not, however, before great damage had been done.

DALNY A FREE PORT.

Tokio, Aug. 22.—The Japanese government notified the foreign governments today that Dalny would be a free port from September 1st.

UNION LABEL

A THEATER FOR ART.

The acceptance of the designs of Carrere and Hastings, architects for the New Theatre, marks the first tangible stage in the realization of a theatre in New York city conducted for artistic rather than commercial ends. It is pointed out by Mr. Henry Tyrrell that while New York has "more than fifty of the most sumptuous playhouses in the world, supported by an amusement-loving population of five millions, who spend more money for stage entertainment than any other community," yet there is "not a single legitimate stock company, not one repertoire theatre." The remedy is at hand in the scheme of the New Theatre. This house, endowed by a coterie of wealthy New Yorkers, will be devoted to the higher forms of the drama.

The theatre is to have a stage 100 feet wide and 85 feet deep, forty commodious dressing rooms, four chorus rooms accommodating thirty persons each, and two rooms for supers, accommodating fifty each; a ballet practice room of not less that 1,600 square feet; three rehearsal rooms, the largest to have an area of 2,000 square feet; a central green room, or artists' reception salon; a general wardrobe salon, having 1,600 square feet of floor space; two rooms for musical directors, and three rooms for stage managers; carpenter shops, paint rooms, scenic ateliers, and quarters for janitors and charwomen. A separate wing, or possibly a building wholly detached , will house a school of drama and opera, having its own stage, concert hall, and a dozen or more class rooms. Finally, provision is made for a library annex, in the nature structurally of a fire-proof vault, in which will be kept copies of all plays and scores forming the repertoire, together with standard works on the literature of the drama, music, costumes, etc., which will this enterprise, Mr. Tyrrell, gives in outthe school, and accessible from the street for the use, on occasions, of the general public. Architecturally, the interior of the New Theatre will embody features of representative modern European playhouses of the first class. Although the greatest dictance between the curtain and the line of the front of the boxes is not to exceed sixty-five feet, the seating capacity of the auditorium will be 2,000, exclusive of the boxes, which may number fifty. Grand staircases, and a foyer placed approximately on the level of the upper tier of boxes, will help to give scope for an architectural ensemble of decorative designs, mural painting, and sculpture, befitting an institution intended, eventually, to be what the Theatre Francais and the Opera of Paris are to France—a national monument.

The fundamental guiding principle of contemplates an alternation of classical line as follows:

"It is to establish a threatre which shall be run for the sake of art, and not in any way for the sake of profit—a theatre not planned in anybody's interest or anybody's behalf, except on behalf of the community and in the interest of the higher drama. Its mission will be to foster and stimulate art and to exercise those elevating and refining influences which make the stage, if properly conducted, an educational influence second to none in effectiveness. The specific program, as now outlined, contemplates an alternation o fclassical repertoire with modern plays of genuine merit—not to be confined, presumably, to the works of English writing authors alone—to be mounted and performed by a stock company, not necessarily all-American, in a manner worthy of the best traditions of the stage. Such a theatre, intended to combine in some degree the functions, say, of the Theatre Francais, Opera Comique, and Conservatoire of Paris, would be a proper place for the performance of light operas of real quality and distinction, especially those put forth by our younger native composers and librettists. Any net profits—and the scheme of limited subscriptions, with one or two weekly soirees des abonnes (subscription evenings,) as in all the French government theatres, augurs well for the financial soundness of the proposition—will be turned back into the treasury of the theatre for the creation of an endowment fund, scholarships in the school of dramatic art, an actors' fund, and similar altruistic uses."

EDITORIAL NOTES.

The old, old mistake of eating toadstools for musrooms has once more been committed—with the usual fatal results. Cecil Carrick, of Camlachie, Ontario, a lad of thirteen, is the victim.

The new liberal government of Saskatchewan is displaying a good deal of commendable aggressiveness. To advertise the merits of the baby province, an exhibit of agricultural products and natural history specimens is to be made at the Halifax fair.

Russian revolutionists are neither very gentle nor very aesthetic in their methods. After killing the commander of the Borissor regiment at Sanara yesterday, they saturated his body with methylated alcohol and then set fire to it. Siberia is a little too good for such men.

King Leopold's bungle in the Congo Free State is growing more serious than ever and promises to result in international complications. Forty British missionaries have appealed to the foreign minister, sir Edward Grey, for the British government's immediate assumption of insular jurisdiction in order to protect British subjects.

While Nelson the beautiful is enjoying cool, pleasant weather, eastern Canada is in misery with the heat. Montreal sweltered yesterday as usual, though the thermometer readings did not show as high as for the last few days, the high mark being 84.8. One fatal prostration was reported but the feature of the day was that all the longshoremen, except those engaged on ships due to sail today, quit work, putting in their day's work at night. They will continue to do this until the weather moderates.

For those who have a penchant for figures and statistics, it is an interesting exercise to compare the comparative expenditures of leading nations in given departments. The war (military and naval) budgets of the foremost military nations of today show that Great Britain and her ally, Japan hold the head and foot of the list. The figures are:

Great Britain	$300,000,000
Russia	185,000,000
Germany	157,000,000
France	133,000,000
United States	112,000,000
India	98,000,000
Austria	84,000,000
Italy	55,000,000
Japan	30,000,000

A great deal of deserved attention is being bestowed by the prairie provinces (and British Columbia too, for that matter) upon the approaching visit of the Canadian manufacturers' association to Winnipeg, and afterwards to the coast. The program for the entertainment of the association delegates in Winnipeg, on September18th, 19th, and 20th, is now complete. A cable message has been received from sir Daniel McMillan the lieutenant-governor, who is now in England, stating that he would be home about the first of September and would be pleased to entertain the visitors at the government house on Tuesday evening, September 18th. Winnipeg is planning to give the manufacturers an entertainment worthy of the traditions of the city, hoping thereby to attract some of them toward the west.

Justice is very blind and very slow sometimes, but occasionally she grinds as finely and as surely as the mills of the gods. About two years ago the bank of Yarmouth, N. S., closed its doors and later, when it was wound up, the shareholders had not only to endure the loss of the amount of their stocks, but they had to pay double liabilities. This brought ruin to many Yarmouth people, though no business house, so far as known, was seriously involved. Following the failure of the bank, cashier D. W. Johns was arrested, and a year ago was tried on the charge of furnishing wilfully false returns to the government under the banking act. The sequel to this came yesterday, when senator John Lovitt, of Yarmouth, the president of the defunct bank, and S. A. Crowell, vice-president, were arrested under similar charges of making wilfully false and deceiving returns to the finance department regarding the affairs of the bank.

NIP IT IN THE BUD.

First Appearance of Dandruff a Forerunner of Future Baldness.

That such is the case has been conclusively proven by scientific research. Prof. Unna, the noted European skin specialist, declares that dandruff is the burrowed-up cuticle of the scalp, caused by parasites destroying the vitality in the hair bulb. The hair becomes lifeless, and, in time, falls out. This can be prevented.

Newbro's Herpicide kills this dandruff germ, and restores the hair to its natural softness and abundancy.

Herpicide is now used by thousands of people—all satisfied that it is the most wonderful hair preparation on the market to-day.

Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

FIELDING'S UNSEATING

EXPLANATIONS GIVEN CANADA'S LEADING POLITICAL PAPERS

DESPATCHES TO GLOBE AND MAIL AND EMPIRE REPRODUCED

(From the Toronto Globe.)

Halifax, Aug. 17—Chief justice Weatherbe and judge Russel, comprising the court which tried the petition against the return of Hon. W. S. Fielding, minister of finance, as member for Queen's and Shelburne, at the election of November, 1904, tonight gave decision at Liverpool, dismissing the personal charges of corrupt acts against Mr. Fielding, but declaring the election void, the court holding that the agency of E. M. Farrell of Liverpool had been established, and the payment of $550 by the latter to John Seldon a week before the election was an illegal act, although Seldon swore that the money was expended for legitimate election purposes.

The chief justice, in delivering judgment, said that he was impressed with the hardship of making a statesman, whose sole desire was to serve his country, responsible for the corrupt acts of a few agents among so many persons who innocently assisted in securing his election. The rules of agency were relaxed in election cases, and it was important that the judge inform himself of the practice of the election courts. He was sorry to relax the rules, but he felt himself bound by the decisions to hold that Farrell was an agent, and that Mulhall and Seldon were also agents. Mr. Fielding had to depend on these men; if not, on whom could he depend? The money paid to Seldon was paid without the knowledge of the liberal association and was evidently a secret fund. Proof was clear that it must have been used illegally.

Judge Russell reached the same conclusion, but read a lengthy opinion. He was in doubt whether the other persons mentioned were agents, but it was unnecessary to decide whether they were or not, as Farrell clearly was. It was clear that the respondent did not authorize the corruption of any person, and there was no evidence that he had any knowledge of such acts. Nevertheless he was bound by the authorities to decide that the election was void. An order was made dismissing the personal charges with costs and voiding the election. Mr. Ritchie, K.C., very strongly contended for all the costs, but the court thought he was not entitled to costs of witnesses improperly summoned and examined.

The vacating of the seat will be of no advantage to the conservative party, as Mr. Fielding will probably be returned by acclamation, and by a large majority if, indeed, any opposition be offered to him. Mr. Fielding has always been so scrupulously careful in complying with the provisions of the election law that his unseating on account of the unauthorized act of a supporter is regretted by the best men of both parties.

(From the Mail and Empire)

Halifax, Aug. 17—The election of Hon. W. S. Fielding, minister of finance, as the parliamentary representative for Queen's and Shelburne, is null and void. So decided chief justice Weatherbe and Mr. justice Russell, who have been sitting at Liverpool for three days conducting the trial. The election is voided on the ground of corrupt practices by agents. E. M. Farrell, speaker of the Nova Scotia legislature, has been absent from Liverpool for several days and could not be served with a subpoena, but notwithstanding this, the court has come to the conclusion that there was evidence enough to unseat Mr. Fielding, though that gentleman has sat through two sessions of parliament. The taking of evidence was completed yesterday. On the opening of court today the chief justice asked to hear counsel as to the agency of E. M. Farrell. It was then contended that Mr. Farrell was not an agent within the act, that he was not in the riding during the election, and that the evidence did not disclose any corrupt act on his part. J. J. Ritchie replied on behalf of the petitioner, urging that agency had been fully shown by men who had acted corruptly on Mr. Fielding's behalf. The court then adjourned until 9 o'clock tonight, when the decision was given that the election was void on account of corrupt acts by agents. The personal charge under which it was sought to disqualify the minister of finance, had been withdrawn.

MAY DAM THE STRAITS

Big Project for Improving Eastern Canada's Climate

Ottawa, Aug. 22—The project for a railway to Belle Isle and thence by tunnel under the straits and across to Newfoundland, is now receiving considerable attention; in fact, negotiations are in progress between certain well known and financially strong English concerns, interested, along with the government of Newfoundland, in the development of timber and other resources of the Labrador region and of Newfoundland, on the one hand; and the Quebec and Lake St. John railway on the other.

The negotiations have been carried on for some time and it is believed a successful solution of the problem has been reached. The Quebec and Lake St. John railway will extend their present system to Belle Isle on the north shore of the St. Lawrence, and thence tunnel under the straits of Belle Isle, a distance of some 20 miles, to Newfoundland.

It is stated that there is every possibility of a successful issue to the pending negotiations. If so the completion of the work would have a marked effect upon the shipping business to and from this country, amounting almost to a revolution in the trade along the Canadian and American Atlantic seaboards, as the project would shorten the Atlantic voyage to Europe to between two and three days.

The daming of the straits of Belle Isle is also discussed. This would be done not only for the purpose of affording a crossing for a railway to Newfoundland, but would greatly benefit the climate and navigation of eastern Canada by preventing Arctic ice from passing through the straits into the gulf of St. Lawrence.

CHARLES MORRISON

IN SPORTING CIRCLES

PRACTISE OF JUNIOR BASEBALL TEAM THIS AFTERNOON

HARVARD AND CAMBRIDGE READY FOR THE BIG BOAT RACE

All members of the junior baseball team are requested to report for practice at the recreation grounds this afternoon at 2:30 as the team has three games now arranged for to take place in the near future and it is important that the players be in good condition. The boys have had some hard games this season and their manager-player-press-agent Cummins, states that an endeavor is being made to arrange a series with the other teams of the Kootenay. The local boys have won four out of seven games played this year and all of them have been well contested with one exception. The games which have been arranged are as follows: Rossland to visit Nelson on Thursday next, and Nelson to go to Kaslo to play the intermediates there on Labor day. For the attraction at the fair the boys have arranged for the crack Northport juniors to visit Nelson and give an exhibition of their national game. The local boys have no doubt in their own minds that they will trounce the young Americans and expect to convince the local fans by the act of doing so.

Newport, Aug. 22—Holcombe Ward and Beals C. Wright, in the national tennis championship doubles today, defeated F. B. Alexander and H. H. Hackett 6-3, 6-3 6-2, retaining the title.

Bourne, Aug. 22—This was Harvard's and Cambridge's last day at Bourne, it being the intention to move to Putney this evening. The betting is 6 to 4 on Cambridge.

A recently devised pair of "water-shoes," each of which is a small boat, is described by Mr. Glen Fling in the Technical World Magazine (Chicago, August). These "aquatic shoes" we are told, enable the wearer to walk on water as easily as a ship sails the sea. Says the writer:

"When a foot is slipped into each, and the wearer gives a slight hunch forward with the body, and a light push with first the right foot and then the left, and the shore begins to slip behind him as if he were wearing the famed seven leagued boots, size is of no consideration. A long pull, a strong pull, first with one foot and then with the other, and he is slipping downstream as easily and poetically and as noiselessly as sneaks the Indian in his birch bark canoe.

"Lieutenant Arthur T. Sadler of the United States volunteer life saving crew at Charlesbank, Mass., is the discoverer of this new sport, and he is also the inventor of the novel boat shoes. 'Footcraft,' he calls his invention; and his call 'Come on, boys, bring out the craft and have a tread,' always produces a hearty response, for the sport has found favor with all who have tried it.

"The shoes are light, and the very newest are much shorter than the original ones. A 'carry' with this, or more correctly speaking, these, novel craft, is much easier than with even the lightest canoe.

"Mr. Sadler has proved that his water shoes are perfectly manageable. He has turned directly about in them, rounded a bend in the river with ease, pull a long stroke or take a short step, stand perfectly still, or slide along with a tide at will."

"His longest trip has been two miles in tide water, but he declares that there is no reason why eight or even ten miles could not be accomplished at a stretch without fatigue."

Walking on water, we are told, is now one of the favorite amusements of the life saving crew. They even use the shoes in making rescues when they chance to be treading water, but it takes longer to buckle on the shoes than to push out a boat or dive into the water after a drowning man. Except for an expert it is impossible to make as good time as by rowing, but a practised "treader" can outdistance an experienced and skilful oarsman. Mr. Sadler is quoted as saying:

"As a novelty in water sports, I think walking on the water beats them all. I conceived the idea of doing so when I was about 16, but did not carry out my idea until this year. I have been successful in walking with the tide, against the tide and across the tide. I carry neither paddle nor oar with me, and go out dressed in my street clothes never fearing an upset. Of course, accidents will happen in shoes as well as in boats, but not a bit more easily.

"I have had only one spill in my experience, and that was accounted for by one of my foot straps breaking. As I can swim I was none the worse for my breakdown. Even if a treader cannot swim, he need not fear an upset for the shoes can be used for a raft or float should anything happen to the bearing of either or both shoes.

"I have successfully taught a number of college fellows how to use the shoes, and they are wild over the sport, declaring it to be the most exciting amusement yet found. Later on, it is my intention to introduce them in water carnivals and regattas. I have no doubt they would make a very amusing race. Imagine a single or double race with these treads. Then picture two crews, say four or six to the crew, the width of the stream determining the number, all standing perfectly motionless in their boot boats, awaiting the signal to start. Picture them off on a mad race down the stream. Yes, a shoe race would be an exciting and amusing spectacle both to onlookers and participants. We are preparing to hold one on the Charles river when Harvard opens in the fall.

"I don't claim the shoes to be a valuable addition to the many useful craft now on the water, only as an interesting and exciting sport. The shoes can be used in all weathers as long as the water is free from ice. They are very easy to manage, three lessons being all that is required to insure success, proficiency and speed coming with practice as in any other sport. The hardest feature I had to master was turning around, but I have got so now that I can turn with very little effort.

"I got my idea for these water shoes from watching the way a duck uses its feet. When one is going ahead it is closed and the other pushing back is open; just so with the valve-like flappers under my shoes.

Toronto, Aug. 22—George Finlayson of the Montreal lacrosse club, was committed for trial at this morning's police court on the charge of committing an aggravated assault on Charles Querrie of the Tecumseh lacrosse club, in a match here. Bail was furnished at $200 for Finlayson's appearance at the September sessions. Testimony shows that Querrie was badly cut on the nose and mouth, requiring several stitches. Querrie said he did not know who struck him. Referee Quinn had ordered Finlayson off the field for fouling.

SLEEP IN THE HILLS

VALPARAISO PEOPLE AFRAID TO GO BACK TO CITY

EARTH CONTINUES TO QUAKE, THOUGH NOT VERY HARD

Berlin, Aug. 22 — A sharp earthquake shock was felt today at Zaborze, near Dattemitz, upper Silesia. Doors were forced open, pictures and mirrors fell to the floor, and the frightened inhabitants fled to the streets. The walls of a number of houses were cracked.

New York, Aug. 22—A cable message received from Valparaiso, by way of Lima, Peru, by Grace and company, this city, today, reads as follows: "The city (Valparaiso) is almost annihilated. Fires are ravaging the place." The message was dated at Lima today, having been received there from the firm's representative in Valparaiso.

New York, Aug. 22—Adolfo Ortuzar, consul general for Chile, said yesterday that he believed Valparaiso would be rebuilt within six months and that trade would be completely re-established before that time. The Chilian representative's optimistic prediction as to trade was favorably seconded by several merchants who do business with the stricken city, though they do not believe that the damage done by qake and fires could be repaired in the time set by the consul general.

London, Aug. 22—A cable despatch filed late last night by the agent at Valparaiso of Huth and company, says that slight shocks continue and that further large fires have ocurred there.

Valparaiso, Aug. 22—The greatest damage occurred in the province of Valparaiso at Aconcagua. The town of Abarca suffered severely. Llolliol is reported to have entirely disappeared and Limache and Hierro Viejo have been almost totally wrecked. At Vinal del Mar, three quarters of the houses are in ruins. The losses in the entire country are estimated at $50,000,000. The authorities at Valparaiso have taken over the feeding of the people, and provisions are being brought in from places that were not destroyed. Slight earthquake shocks continue. The people have not yet returned to their homes, but are sleeping around the surrounding hills and on the squares.

Valparaiso, Aug. 22—The loss of life by the earthquake of Thursday, probably will not be short of 3000, while the property destroyed is estimated at $100,000,000 and possible is far in excess of that sum.

Order is maintained with the utmost severity by the military authorities, police the Chilian patrols, who are empowered to shoot looters on the spot. The authorities are showing the utmost energy in the protection of property.

With the first terrible shock of the earthquake, buildings collapsed, their walls falling with tremendous noise. The inmates in many cases were unable to escape. The shock was followed almost immediately by a fierce storm, the wind prostrating walls that had been weakened by the earthquake, and these broke trolley wires, which flashed incessantly. The second shock was even heavier than the first. Five minutes after fires started in every direction, and immediately the town was illuminated with the splendor of gigantic flames. There was little water, as most of the mains had been broken by the earth tremor. The Victoria theatre succumbed to the earthquake and fire. The church of Lamarced, city hall and many other buildings were destroyed by the earthquake. The destruction by fire, however, was infinitely larger, and probably 60 per cent of the commercial houses were totally ruined. In Brazil avenue alone, nearly 30 blocks of buildings, from three to five stories high, were destroyed.

CUBA'S INSURRECTION

Government Says it is Over—But Rebels Think Not

Paris, Aug. 22—The Cuban legation has received an official despatch from Havana dated today, stating that the government has suppressed the rebellion by a few mutineers in three localities situated in the provinces of Havana and Pinar del Rio, and that "absolute quiet has been restored everywhere in the republic."

Havana, Aug. 22—A new party of 50 insurgents appeared today at Santa Cruz del Notre, Havana province.

Havana, Aug. 22—Louis Herez, the last liberal governor of the province of Pinar del Rio, has joined the insurgent forces in that province. According to reliable advices received here this afternoon, the insurgents captured the city of San Luis in the province of Pinar del Rio.

Havana, Aug. 22—Later in the afternoon the report of the capture of San Luis was confirmed. Pino Guerras, for the insurgents, appeared outside of San Luis this morning. A severe fight followed, during which several were killed or wounded on both sides. Eventually the insurgents captured the town and 50 rural guards, who are being held prisoners Guerras is now in complete control of San Luis, which is reported to be quiet.

It became known later in the day that practically all the inhabitants of the town of Aguacate have, with the mayor, declared themselves against the government.

A later despatch from Racho Veleoze, province of Santa Clara, says that a band of insurgents has been organised there under colonel Reinco, and it is believed that the Mendieta is with them. Governor Nonez of Havana province, says that the organization of his loyal bands has begun.

BOGUS DOCTOR ARRESTED

Fernie, Aug. 22—Dr. Kanyam a Chinese doctor from Nelson, was arrested here yesterday on a charge of practicing medicine without a license. He was released on bail and will appear before magistrate Whimster on Thursday, Aug. 23.

This district has been blessed by a most acceptable rain for the last twelve hours and as a result many of the smaller bush fires are already extinguished, and if the wet spell continues for a few hours longer it will be the means of saving thousands of dollars to the owners of timber limits in the Pass.

KEEPS HIS LITTLE SECRET

New York, Aug. 22—E. D. Ward of the American Sculptors' association, was showered yesterday with congratulations on his recent marriage. The noted sculptor has passed his 78th mile stone in life's journey and has been married twice before. Mr. Ward declined to gratify the curiosity of earnest enquiries as to the identity of the bride.

VALEDITORY TO NELSON

DR. NORTHROP HAS ENJOYED HIS VISIT HERE.

PREDICTS A POPULATION GREATER THAN 20,000.

Editor The Daily News: I came to your public spirited city for two purposes—to deliver lectures and addresses at the summer assembly in charge of my friend Rev. E. L. Shanks, and to enjoy a month's vacation with my family.

I desire space in your valuable journal to express my sincere thanks to the press, the business men, the officials of the Canadian Pacific railway and the steamer Kuskanook for many marked favors to me and mine during my stay. Though I am an American I have found the British Columbian warm of heart, keen of intellect, charitable of spirit, and best of all, free from class or clanish spirit. I have been treated, therefore, as well as my family, with uniform courtesy and considerate attention by everybody, and shall return to my pastorate with only the kindest feelings toward the citizens of Nelson. I believe as a tourist, and one who has been in close touch with public affairs for a score of years, that Nelson has a most promising future, and is sure to pass her ideal mark, "20,000." Your city and its environments, has an enviable climate, and is indeed "beautiful for situation," destined to be "the joy of the whole earth." Nestled as she is between lovely mountains, and cooled by charming lakes and cascades, she cannot fail to be a great center for commercial and social life. Fruit and "good things to eat" can be profusely raised in your valleys, luscious enough for a king and sufficient for a peasant.

Your railways and steamships, however, must get in closer sympathy with the building up of your charming city and lessen freight prices so that living expenses will be in keeping with the purse of those who make up the bone and sinew of a prosperous community, and thus make possible a great city, and I am certain that your enterprising press and the 20,000 club will do their utmost to create popular sentiment to bring this about on the part of the officials of these great corporations that depend so much on the products and patronage of a thriving country.

After enjoying a couple of weeks' recuperation on the banks of your elegant lake just opposite your city, my good wife and myself were splendidly entertained in the house-like hotel Outlet, kept by Mr. and Mrs. Snow at Procter—a healthy suburb of Nelson. Inasmuch as they have had practical experience in making the public feel at home, feeding the most fastidious epicurean with choicest viands, they well deserve a large patronage. Their hotel is located on an ideal hill-side spot, within easy touch of passing boats. Nelsonites and tourists cannot fail to enjoy a good rest and delightful outing here. Fishing, too, is first-class, both for amateur and expert.

If any of the good people of Nelson ever visit Los Angeles, the ideal spot for fruit flowers and climate, do not fail to call me up by phone on your arrival, or attend my church, the popular church of the tourist, and I will assure a royal welcome and a glad handshake, both by my congregation and myself. Wishing every Nelsonite the best of success, I remain, yours for God and humanity,

S. A. NORTHROP, D.D., L.L.D.

(Dr. Northrop is pastor of the First Baptist church, Los Angeles, California, author of "A Cloud of Witnesses," and "The Johns Who Have Made History." —Ed.)

EVEN HANDED JUSTICE.

Harold Selous, J. P., Uses Magisterial Discretion With Good Results.

Harold Selous, J. P., acting police magistrate, held his first court yesterday and dispensed justice with an even hand. Mr. Selous was of the opinion that the ends of justice would be best served in the case brought before him by his taking a brief adjournment and allowing the parties to mutually agree to withdraw the charges preferred. Some people may think the procedure irregular, but no one will question the common sense view of the move, and the J. P.'s long suit is, as is generally known and recognized, common, every day, sense. The case was an involved one in which a dozen chickens, all of a celebrated breed, two rabbits and four naughty boys, were all mixed up together.

W. Spratley, a city resident was preparing to move to Erie. He went away for a day last week leaving his prized chickens and two rabbits carefully locked up. Upon his return the chickens and rabbits had mysteriously disappeared. The aid of the police was obtained and subsequently four small boys, Charlie Wilkinson, T Madden, Fred Grant and T. Boyes, were asked to explain matters. Just what they pleaded will probably never be known, but their respective parents took a hand in the matter, and when the case came up yesterday, Mr. Selous suggested that it would not be a bad idea if reparation were made and he left the bench, probably to consult with the city treasurer over the tramway returns.

An animated discussion followed between the owner of the lost chickens and those who appeared for the boys. By degrees matters were straightened out. The two rabbits were delivered to their lawful owner. One chicken, unfortunately dead, was accounted for and the only question to be settled was the price to be paid for the fowls that disappeared. The owner set a price and stood out for it, while those who had to pay offered a smaller sum than the one asked. Finally the dispenser of justice sauntered in and intimated that if the parties were not prepared to do business he was, and the effect of the intimation was electrical. Mr. Spratley accepted, and was promptly paid $20 in full of all demands and the proceedings were withdrawn.

FACE SERIOUS CHARGES

Toronto, Aug. 22 — Police magistraate Kingsford yesterday sent up for trial Edmund Bridant and Mrs. Lillian Miller, accused of the murder of Mrs. Agnes Bridant, wife of Edmund Bridant, by the use of pills and instruments employed in attempted abortion.

FOOL'S FOOLISH FOLLY

Niagara Falls, Ont., Aug. 22—An Italian laborer, employed with a gang of linemen on the power company's transmission lines, yesterday received a shock of 6000 volts. In a spirit of fun he threw a light wire across the high voltage wires and received the full force of the high voltage. He was restored to consciousness after three hours of hard work.

FRUIT LANDS

160 Acres of excellent fruit land, situated one third of a mile from Beasley Siding, seven miles west of Nelson. Can be cleared for $20 per acre. This property is certainly worth looking at as it has a very fine location and is an excellent piece of land. Price $10 per acre. Can give easy terms.

320 Acres of fine waterfront property, situated on Lower Arrow Lake. Price $10 per acre. Easy terms.

40 Acres of land opposite Procter. Price $10 per acre. Easy terms.

60 Acres near Procter. Price per acre $10. Easy terms.

10 Acres situated at 13-Mile Point on Kootenay lake. Plenty of water. No waste ground. Price $75 per acre. Reasonable terms.

20 Acres situated on wagon road four and one half miles west of Nelson, 100 yards from Kootenay river. Stream running through it, also good spring. Price $30 per acre.

For fuller information concerning these lands apply to

NELSON'S NEWS OF THE DAY

Ernest Kilby was elected at the meeting of the local Carpenters' union last night as a delegate to the convention of the Dominion Trades and Labor congress which will be held at Victoria on Sept. 17.

It is understood that today will be observed as the last summer half holiday but one, next Thursday being the end of the season. The majority of the stores will close today as usual after the noon hour.

at 9:30 a.m. Free accommodation will be held today at Shannon's park, 5-Mile point, the launches leaving Adams' boat house at 9:30 a.m. Fre accommodation will be provided for the scholars and their families. Others who desire to attend should get particulars from Rev. Mr. Shanks.

F. E. Nulsen of the Inosouria Malleable Iron company, East St. Louis, has engaged the C.P.R. house boat for a party of 11 in number from Monday next. The party is now in Portland but is expected here by the end of the week. They will spend a week or ten days up the lake fishing.

Miss Lind, a trained nurse, and a graduate of Bellevue hospital, is prepared to give *massage* and electrical treatment. The lady has studied the masseuse methods in France and her terms of treatment are reasonable. She can be seen at Mrs. H. Fotherby's, Carbonate street, or can be engaged through any physician in the city.

The Pringle company, which is announced for Sherman's opera house next week, has been meeting with great success at Tacoma, Portland, Seattle and Victoria, according to the advance agent, and as their *repertoire is extensive*, theatregoers of Nelson, will have an opportunity of seeing an excellent company at moderate prices. Their opening bill on Monday evening will be "The Convict's Daughter."

A year ago the 1st of last August Florence Ford, colored, was arrested here for stabbing a colored companion named Frank Ford, in one of the houses in the restricted district. The woman subsequently pleaded guilty to the charge, and after making further inquiries into her history, police magistrate Crease, on Aug. 3, 1905, sentenced her to 23 months imprisonment in the provincial jail. Since her incarceration, the woman has professed reformation and the local Salvation army officers have for some time endeavored to get the sentence imposed, shortened. Yesterday the warden of the jail received instructions from the department of justice to relase the woman on ticket of leave, and she was set at liberty conditionally, during the day, after serving a little more than half of the sentence imposed.

J. H. Dennitt, a waiter on the steamer Moyie, was arrested by provincial constable Young on the charge of stealing $100 in cash from Joseph Fearnehough, a fellow waiter on the Kuskanook on Monday last, and lodged in the provincial jail. Dennitt pleaded guilty and the cash was recovered. The case has been sent on for trial before judge Forin and will probably be disposed of by his honor on his return from Kaslo today.

The regular weekly dance of the 20,000 club at the tramway park, preceded by a band concert, will come off as usual this evening under the patronage of the ladies who presided over the affair last week. There will be a prize Schottische dance competition this evening for the best couple, the prizes being on exhibition today in R. H. Ewert's window. Next Thursday it is proposed to wind up the series of summer dances given by the club, which have proved so enjoyable. A large attendance is looked for this evening.

At the mining recorder's office on Aug. 22 certificates of work were issued to J. P. Swedberg on the Silver Stone and Silverstone *fraction; to J. Munro on the* Elba; to N. Deharnais on the Norah, Free Silver and Standard, and to H. Mason on the Cherry, Irish Lion and Effie L. O. Anderson recorded the Mistake on Stewart creek; C. E. Wilson the Lone Hand on Wilson creek; T. Unfried the Blue Star on Sheep creek; L. A. Pellet, the Twin Lode and Forty-Nine on Forty-Nine creek, and Gus Schwinke the Colorado on Sheep creek.

The annual picnic of the Methodist Sun*day school will be held at tramway park* this afternoon. The children are requested to meet at the church at a quarter to one, and there they will find the officers and teachers who have undertaken to look after them and provide a program of sport and fun. At the park tea and coffee will be provided but the friends of the school who attend are expected to take their own provisions. Those who do not should see that their little ones are provided with baskets. The scholars will have their fares paid on the street cars.
