WEEK'S ORE SHIPMENTS

Output of Boundary Mines Has Passed Million Ton Mark

Contract Let for Deepening Le Roi Shaft—Centre Star Shaft Now Down 1800 Feet—Deepest in Canada

The strike situation has affected the shipments to some extent, but not to the degree anticipated. If matters are adjusted as hoped there will be but a slight difference in the tonnage at the end of the year. The Boundary shipments, as calculated at the beginning of the year, have exceeded the million ton mark, the Rossland figures being hardly more than a quarter of that amount. Locally, while the lead shipments have considerably increased, yet there is room for a great improvement. As soon as the lead mine owners find that they can also secure a market for their zinc, their mines being put then upon a more substantial and paying basis, they will undoubtedly ship to a greater extent. Locally the restarting of the Reliance mill will add to the tonnage as well as to the payroll of the district, while the blowing in of the Heberlein roaster at the local smelter will permit of that reduction works treating ore more economically.

There are several deals pending, or in process of negotiation, which are likely to make a considerable difference to the output next year.

The output of the various mines and the receipts at the several smelters for the past week and year to date in detail, are appended:

BOUNDARY SHIPMENTS

	Week	Year
Granby	17,049	705,226
Brooklyn	3,136	123,989

Rossland, Nov. 3—The contract for deepening the Le Roi shaft from the 1350 foot level for a distance of 200 feet has been let to Victor Shore, John Sepa, and Matthew Walters. The contract price is not made known. Work on the contract will be commenced just as soon as timbers, which are on the way, are received.

A four foot shoot of pay ore has been located on the Mabel which lies immediately north of the City of Spokane. S. M. McCoy is looking after the work on the Mabel in the interests of an eastern syndicate.

The shaft of the Centre Star today reached a depth of 1800 feet, and work of cutting out a station on that level will at once be commenced. This is the deepest shaft in the province.

NICOLA COAL LAND DEAL

BIG PROPERTY AT COUTLEE TO BE DEVELOPED.

COKE OVENS TO BE STARTED IN NEAR FUTURE.

(Special to The Daily News)

Vancouver, Nov. 3.—F. H. Lantz, acting for local and eastern capital, put through a deal on Friday securing the control of the coal measures of the Nicola Coal & Iron company near Coutlee. The property embraces 2600 acres and the price agreed upon runs into six figures, with a substantial payment down.

The property was acquired eight years ago by Hon. F. Carter-Cotton, W. H. Armstrong, Evans, Coleman & Evans, and Steve Tingley.

Six months ago it was bonded to Mr. Lantz and the option would have expired today.

The new company intends to develop at once with a view to making the huge deposits of low grade copper in the locality capable of being worked at a smelter to be located at the forks of the Coldwater. They also expect to take a hand in supplying the coast fuel trade when railway connection is established. The intention is to start coke ovens in the immediate future. This development probably means increased rivalry between the C. P. R. and the Great Northern to cover the fields, as the new route of the V. V. & E. down the Coquehalla passes within 15 miles of the Nicola mines, and it is almost certain that with this new development they will build a spur.

METHODISTS INDIGNANT

DENOUNCE 'FRISCO'S ANTI-JAPANESE ATTITUDE.

OUTRAGE UPON INTERNATIONAL HOSPITALITY.

Buffalo, Nov. 3.—The general missionary committee of the Methodist Episcopal church, assembled in Buffalo to make its annual appropriations to home and foreign missions, expressed itself in the strongest terms today with regard to the anti-Japanese situation in California. The resolution adopted was in part as follows: "With a sense of shame as men and a feeling of sorrow as Christians, we have heard from time to time of the indignities, insults and even violence inflicted on the natives of Japan, Korea and China by certain classes of persons who resent the presence of these foreigners on American soil. The sentiments of humanity, not to speak of international hospitality, should ever protect such strangers as are found to be lawfully within our gates, even in the absence of the obligations imposed by the solemn compacts of international treaties. We particularly deplore at this time, the reported municipal action of San Francisco, which discriminates against the subjects of a great and friendly power, action which, if rightly interpreted by our government, is in violation of our treaty obligations and the more to our discredit, because directed against a people who have shown themselves humane even to their foes, a people in whose hearts there has been for decades a growing regard for the American nation and under the strong protection of whose government Americans have found favor and safety. We are confident that we represent the entire communion of our church, three millions of Methodist-Episcopalians, in our hearty approval of the prompt measures taken by president Roosevelt to make good the treaty pledges of our nation and to relieve our nation of any complicity in or sympathy with the conduct complained of."

ZIEGLER'S MILLIONS

New York, Nov. 3—The appraisement of the property of the late William Ziegler was concluded today and shows that the gross personal estate is $11,677,148, net personal $10,986,701. The real estate amounts to $2,368,655, making the net real and personal $13,375,356. The widow's share in the personal property amounts to $3,621,807. William Ziegler, jr., an adopted son, received two thirds of the personal in addition to the remainder of the realty after the dower of the widow, amounting to $2,004,143, is deducted. Mr. Ziegler died in 1906.

OHIO MINE DISASTER

Corning, Ohio, Nov. 3.—Four men were killed and two seriously injured in an accident at mine No. 1 at Santrey today. The men were crushed in a mine cage and their bodies hurled to the bottom of the shaft 150 feet below.

FOR CHANGES IN TARIFF

Zinc Mine Owners and Others Interested Forward Petition

Government Asked to Make Such Modification as Will Facilitate Establishment of Zinc Industry in Canada

It will be observed by the petition hereunder that the zinc men have at last aroused themselves to the necessity of immediate action in the matter of securing certain changes in the tariff. The petition was finally drafted yesterday and will go forward to finance minister Fielding, who is chairman of the tariff commission, on Monday.

The Daily News is informed that the case presented in this petition has the endorsement of the principal zinc mine owners in Kootenay and fairly represents their views as to tariff changes requisite to the successful establishment of the zinc industry in this province.

It is probable that the forwarding of this petition will be followed by further action, looking to the securing of some substantial assistance from the dominion government in the work of overcoming difficulties in the way of getting the industry started on such a basis that will afford reasonable assurance of permanent success. What the establishment of the zinc industry in this province means is indicated to some extent by the facts cited in the petition to the tariff commission and it will be readily recognized that it is in the best interests of British Columbia that every encouragement should be given the efforts of those having the matter in hand.

The petition reads as follows:

Hon. W. S. Fielding Minister of Finance,
Chairman of Tariff Commission,
Ottawa:

Sir,—Your memorialists, who are interested in the mining and smelting of zinc ores in the province of British Columbia, have withheld their case for tariff changes, awaiting the report of the special commission appointed to investigate the zinc resources of British Columbia, which has only at this moment come into our hands.

During the year which has elapsed since the collection of the information embodied in that report, conditions as therein set forth have not materially changed, certainly not for the better. The tariff ruling of the United States imposing a duty of 20 per cent on zinc ores remains in force, and has been somewhat unexpectedly construed to include duty on the silver as well as the zinc contents of the ore.

The Canadian Metal Co.'s plant at Frank has produced a few tons of spelter, but is now idle and requires in addition to the sum of $400,000 already expended, a further sum of $100,000 for its completion.

The tendency of the silver-lead mines to become zinc mines has become more pronounced, but owing to the lack of market either at home or abroad, shipments have almost entirely ceased and such zinc ore as is necessarily produced in connection with lead mining is accumulating at the mines and concentrators.

The Frank plant has presently installed five blocks of furnaces, of which at least three blocks must be kept in continuous operation to secure any economically profitable result.

The total capacity of five blocks is 5500 tons per annum and the chief problem which confronts the company is that of finding a market for this quantity of spelter.

The Canadian market (vide zinc report, page 55) is good for over 3000 tons per annum, and is at present supplied largely from United States sources, the zinc smelters of New York having a freight rate of 25 cents, and those in Illinois a freight rate of 30 cents per 100 lbs. to eastern Canadian points, as against a rate of 65 cents per 100 lbs. obtainable from Frank.

The principal uses of zinc ore are as a constituent of paints, also of brass to the extent of 40 per cent; in sheets and pipes, and largely in the galvanic coating of iron and steel sheets, pipes and wire.

The Page-Hersey Iron, Tube & Lead Co., Ltd., of Guelph, Ontario, is a large, perhaps the principal importer of zinc in Canada.

Outside of Canada the only available market is the European, to reach which we must pay for freight charges a rate of 88 cents per 100 lbs., leaving, with spelter at the present high quotation of £27 per long ton, a nett return of $4.95 per 100 lbs.

This figure (vide zinc report, page 100) does not promise to afford any profit.

Unfortunately the prospect for improvement in price is not very favorable owing to the expected enormous production of the waste dumps of the Broken Hill Mines, New South Wales.

The production of 5500 tons of spelter will involve the shipment and treatment of 15,000 tons of concentrates, and this in turn would be produced from 75,000 tons of raw ore and the fuel requirement of the smelter would amount to 40,000 tons of coal, involving a turn over of over half a million dollars per annum, nearly all of which would be spent in the country for labor and supplies.

In aid of the efforts of those endeavoring to create this new industry in Canada, we beg to request that your honorable body will recommend to parliament such changes in the customs tariff as will put zinc and its products on the same basis as commodities of similar classes.

We beg to submit, subject to such revision as to details as your honorable body may see fit to make, the accompanying schedule which we believe to be substantially equitable:

Zinc and Products thereof: The first column gives the present tariff; second proposed tariff.

Nos.		p.c.	p.c.
158	Zinc White	5	30
234	Galvanized plates	5	25
251	Galvanized tubing	15	20
262	Galvanized Barbed wire	free	25
277	Zinc man. of N.E.S.	25	35
402	Brass blocks (40 p. c. zinc)	free	25
603	Wire, galvanized	free	25
633	Spelter blocks, pigs sheets, etc.	free	25

These changes to come into effect upon proclamation of the governor-general-in-council.

Referring again to the report of the zinc commission, (vide pages 53-54), we call attention to the heavy handicap against which this industry in its initial stages must contend, owing to the heavy cost (equal to about 40 per cent above that occurring in United States smelters) of all labor, and the entire lack of labor having the necessary technical skill.

We cannot guarantee that the tariff changes herein asked for will be the limit of the public aid necessary to put this industry on a stable footing.

It may become necessary, as it has in the case of iron and lead, that the dominion government be asked to aid this industry by the way of a direct bounty, but as your honorable body is concerned at present with tariff changes, we bring before you now only that aspect of the situation.

STILL NEGOTIATING.

Fernie, Nov. 3.—(Special)—Today's conference between the company's officials and president Michell's representatives did not result in any definite announcement of progress made toward the settlement of the strike. The only information given out was that negotiations were to be resumed on Monday.

A great deal of anxiety is felt here over the long negotiations, although the fact that negotiations are prolonged from day to day leads to the belief that some satisfactory solution of existing difficulties is being worked out.

LATER NEWS OF PEARY

ARCTIC EXPLORER SENDS FURTHER WORD TO FRIENDS.

MAY BE SLOW IN RETURNING BUT NO CAUSE FOR ALARM.

New York, Nov. 3.—H. L. Brydgeman, secretary of the Peary Arctic club of America, today received a telegram from lieutenant Peary sent from Battle Harbor, via Cape Race, and dated November 3. Battle Harbor is just north of the Straits of Belle Isle, on the southeast coast of Labrador and probably 250 miles south of Hopedale in an air line.

Lennox, Mass., Nov. 3.—Morris K. Jessup, president of the Peary Arctic club today received the following telegram from commander Peary: "Steamer Roosevelt now at Hopedale, repairing rudder and stern, taking ballast and awaiting arrival of mail steamer to secure coal. Return voyage an incessant struggle with ice to Cape York, September 26. The storms and head winds to Labrador coast, October 23, carried away two rudders, stern post and two blades of propellor, foretop mast and spanker boom, and we lost one boat, burned all our coal and some exterior beams, using wood and blubber along the coast. Expect to communicate again from Chateau bay. All progress will be slow so have no anxiety for our safety and give no credence to exaggerated reports. Roosevelt is returning for additional supplies and for repairs. Several tons of whale meat and dog food were thrown away last fall, after poisoning number of my dogs. Othr supplies lost by breaking of ice in April.
(Sgd.) "PEARY."

New Haven, Conn., Nov. 3.—Professor Angelo Heilprin, of the Sheffield scientific school, who led the first great Peary relief expedition in 1892, tonight summarized the achievement of Pearcy as, "the most remarkable piece of polar exploration that has ever been accomplished."

He says the combined achievement of the northward penetration and the east and west traverse sets a standard for accomplishment which few will have the courage to emulate and still fewer the bodily vigor and indomitable energy to achieve.

PROVINCIAL LEGISLATURE

Victoria, Nov. 3—It is expected that the legislature will be called together for the dispatch of business on Jan. 10, and it is further anticipated that the session will be a short one.

AMERICAN ELECTIONS

Chief Interest Centres in Fight Between Hearst and Hughes

New York's Governorship Contest Greatest in State's History—Sixtieth Congress to be Elected Tuesday

Washington, Nov. 3.—With but two full days intervening before the country will elect the 60th congress, there is decidedly a high pressure in the political atmosphere. The expert prognosticators have stopped analyzing local conditions. They have made their final claims, covering the whole area and are waiting for Tuesday.

The republican claim, emanating from the headquarters of the party's congressional campaign committee in New York, is this:

"The republicans will have a majority of 58 in the next house of representatives."

All the analyses of this claim from this source is: Sure republican districts, 222; sure democratic districts, 130; doubtful, but probably republican, 21; doubtful, but probably democratic, 13.

The democratic congressional campaign committee with headquarters in Washington, has figured out democratic gains of 67 over the party's present representatives in the house. The chairman, James M. Griggs, thinks this claim is rather too conservative. In analyzing the claim to show where the gains are expected, Mr. Griggs is quoted as saying:

"The claim of a democratic gain of ten in New York is safe. The claim of one each in Massachusetts, North Carolina, Montana, Kentucky, Delaware, Rhode Island, Connecticut, Idaho and Virginia, is good. The claim of a gain of six in Pennsylvania is too conservative. The same may be said of the claim of a gain of six in Illinois. We will gain eight in Missouri. Concessions are made to us of five or six in Ohio, but we will do better than that. The computation that put us down for only one in Indiana is in error. New Jersey is to be counted on for a gain of three, while gains will be made in Iowa, Nebraska and California."

Should the democratic prediction of a gain of 67 be realized that party would have a majority of 22 in congress. While from a national standpoint the congressional election is most important, in some localities it has been put entirely in the shade by state politics. Twenty-three states will elect governors on Tuesday. Twenty will elect legislatures, ten will elect minor officers, or justices of the supreme courts. Oklahoma will pass upon her state constiution, Arizona and New Mexico will decide the question of joint statehood. New York state, with its fight between Hughes and Hearst for the governorship, has afforded the most spectacular feature of the campaign in the entire country. President Roosevelt has made it known to the country that he wants a republican congress. All but two of his cabinet officers have taken the stump to further this desire of their chief. In New York state, the president was personally represented by secretary of state Root in a speech remarkable in character. The president will vote at Oyster Bay, Tuesday, and will reach the White House in time to receive the returns in the evening. The indications are that a large percentage of the government officers and employes here will go home to vote.

New York, Nov. 3.—Today practically closed the most extraordinary campaign for governor of New York in the political history of the state, although both candidates will continue speech making until Monday night. It has been a campaign of personalities rather than politics, of men instead of measures, and it has stirred the voters of the empire state from end to end. For vigor and vituperation, it has been without precedent among this state's campaigns, and for persistency of appeals for votes by the two candidates it stands alone. National issues, aside from the so-called "Trusts," have been entirely ignored, and state issues have scarcely received passing mention. Sensational charges have been injected into the canvass from time to time, and interest has been kept at the highest pitch for several weeks. The official close of the campaign tonight was a climax of political enthusiasm and rapid oratory. Both Charles E. Hughes, the republican nominee, and W. R. Hearst, the candidate of the democratic party and the independence league, carried out the programs mapped out for them by their respective political managers, notwithstanding that the remarkable speech making up-state has worn their voices down and left them wearied.

The close of the campaign finds a political situation unprecedented in this state.

Leader Charles F. Murphy, of Tammany Hall, insists that Mr. Hearst will carry Greater New York by a purality of from 80,000 to 100,000. The republicans claim Mr. Hughes will come to the Bronx with 200,000 majority.

The most sensational features of the campaign were the messages of Richard Croker, former leader of Tammany and now a resident of Ireland, and the remarkable speech of secretary of state Root, at Utica, on November 1. Mr. Croker cabled his congratulations to senator McCarren upon his consistent opposition to Mr. Hearst, and wished him success. Secretary Root, with the authority of president Roosevelt, as he announced, charged Mr. Hearst with inciting, through his newspapers, the assassination of president McKinley.

Max F. Ihmsen, political manager for William R. Hearst, gave out a statement tonight in which he says:

"I am absolutely confident that Mr. Hearst will win this election by 200,000 majority. The desperation of the republicans is manifest in the course they have pursued. Federal interference has been invoked and vituperation and abuse have taken the place of argument, but if vituperation and abuse fail, as they surely must, the republicans have another reliance. The reliance is money. It has been said by state chairman Woodruff that corporation contributions sent to him have been returned. I will not question Mr. Woodruff's statement, but I have not the slightest doubt that no money offered to the republican campaign managers will fail to reach the hands of those to whom it may be thought can make the best use of it on election day."

The Evening Journal, William R. Hearst's evening paper today estimates that Mr. Hearst will be elected by the plurality of 200,000.

John W. Gates has bet $30,000 to $10,000 that Hughes will be elected governor of New York state. The short end of the bet was taken by Allen McGraw & Co., members of the stock exchange, for a customer. The bet was placed on the New York curb market by Herbert T. Hedge, who represents Charles G. Gates &Co., on the curb. This is the biggest bet of the campaign so far as Wall street knows. It is now estimated that about $300,000 has been placed in wagers. Up to this time last year fully $1,500,000 had been placed on the mayoralty election. George B. Buchanan has bet $12,000 at odds of 3 to 1 on Hughes.

Boston, Nov. 3.—The Massachusetts' campaign, which closed its last week with many rallies, tonight, was in many respects the most remarkable political contest in the state in many years. The issues were sharply drawn on one side, being unique questions raised by John B. Moran, district attorney of Suffolk county, who besides being the candidate for governor of the democratic party, is also the nominee of the prohibitionists and the independence league, and on the other the answers of governor Curtis Guild, Jr., the candidate of the republican party. Interest in the state ticket has almost eclipsed the contest for membership for congress and state legislature.

Philadelphia, Pa., Nov. 3.—What has been one of the most persistently fought gubernatorial campaigns in this state for many years, practically closed with the speechmaking tonight. Local contests throughout the state have been the fight for governorship between Lewis Emery, Jr., the Lincoln democratic candidate, and Edwin Stuart, the republican candidate. Wesley R. Andrews, chairman of the republican state committee, claims that Stuart will have a majority of over 100,000. Chairman Niles, of the Lincoln party, says that the fusion candidate will be elected by at least 150,000.

New Haven, Conn., Nov. 3—The campaign in this state, which has been carried on vigorously, closed tonight with more interest in the nominees than at any time since the first day of nomination Samuel Gompers, president of the American Federation of Labor has endorsed the candidacy for congresman of Charles J. Donahue, state president of the federation and pleaded for the success of the democratic ticket.

Detroit, Nov. 3—A republican victory next Tuesday is generally conceded, the only question apparently being the size of the majority. Control of the legislature, which will elect a successor to United States senator R. A. Alger, is conceded to the republicans by a large majority. Republican success in all the 12 congressional districts is generally conceded also.

SUIT FOR $20,000,000

American Banana Company Seeks to Break Banana Monopoly.

New York, Nov. 3.—The American Banana company, an American corporation, has brought an action in the circuit court against the United Fruit Co. for $20,000,000, the New Jersey corporation charging conspiracy in restraint of trade in an alleged attempt to control the importation of bananas into the United States. Incidentally the court is asked to determine he proper boundary lines between the republic of Panama and the United States of Colombia, and Costa Rica. This question, the complaint avers, as well as the major portion of the plaintiffs' rights as an American citizen, has been repeatedly referred to the state authorities at Washington which has, it is alleged, repeatedly refused to interfere in the matter. It is further alleged that this refusal has been because of the influence of the defendant.

LAWYER COMMITTED FOR TRIAL

Fernie, Nov. 2—L. P. Eckstein was committed for trial here today on a charge of interfering with the administration of justice. Bail was granted.

The case arises out of an alleged procuring case, two young girls being brought in from Spokane. Eckstein is charged with having advised the girls to leave the country whilst the case was pending.

TO PURIFY ELECTIONS

Drastic Measures Will be Enacted by Ottawa Government

Compulsory Voting May Form Feature of Proposed Act- Tariff Revision Will be Taken Up Early

(Special to The Daily News)

Ottawa, Nov. 3.—The speech from the throne at the opening of parliament on November 22, in addition to reference to the intended tariff revision and an amendment to the Insurance Act, will promise the introduction of such legislation as experience has proved necessary for the perfection of the Canada election law.

The government has already given consideration to this and it was the subject of special inquiry last session. The act, as proposed, will certainly include clauses of the most drastic character and penalties for infraction which even the most unscrupulous party workers will hesitate before incurring. If the view of the special committee of last session prevails one feature will be a clause requiring every qualified voter to record a ballot in parliamentary elections on penalty of disfranchisement for a term of years. This may meet the case of the man who hasn't time to vote unless one of the candidates makes it worth his while.

There is another prospective feature in next session's program to which no reference will be found in the governor's speech, and that is the continuation of the opposition's search after departmental scandal. The chances are that this work will be resumed early next year and kept to the front as the opposition tried to keep it during the past session.

Finance minister Fielding will bring down his budget speech with the intended tariff changes very shortly after the house assembles, as soon, in fact as the debate on the address is out of the way.

Senators and members will give themselves a holiday vacation of some three weeks begining about December 20. It is hoped to dispose of the tariff question before this.

Notice is given of intended applications to parliament for the incorporation of three new fire insurance companies in the east, two of which are to be mutual concerns.

J. M. Bowell, collector of customs at Vancouver, has been granted leave of absence for two months. It is understood he will accompany his father, sir Mackenzie Bowell, on a trip to his old home at Belleville, Ontario.

WIRELESS CONFERENCE

Radio-Telegraph Treaty Signed at Berlin Yesterday

Berlin, Nov. 3—The international radio-telegraph treaty was signed this afternoon. The details contained in the semi-official summary of the treaty agree with the synopsis contained in the Associated Press despatches of Nov. 1. The representatives of all the powers signed the document, but Great Britain, Italy, Japan, Mexico, Persia and Portugal did not join in the special article containing the United States "proposal" that inter-communication be obligatory between ship and ship. The British delegates some days ago offered as a compromise to accept compulsory inter-communication between ship and ship upon matters pertaining to navigation alone. The United States delegates declined to agree to the compromise and were supported by the great majority of the other delegates. Great Britain, Italy, Japan, France, Spain, Denmark, Persia, Portugal and Turkey did not sign the renunciation provision, thus excepting from the provisions of the treaty such stations as these nations might select. All the other powers agree to free ship to shore intercommunication with all stations open to the public, naval and military stations excepted. The period for the raticatition of the treaty ends July 1, 1908. The next conference will take place in 1911.

STRIKING CHAUFFEUR SHOT

Was Among Mob That Attacked Street Car Containing Strike Breakers

New York, Nov. 3—Augustus Lambe, a striking chauffeur, 31 years old, was shot through the neck and severely wounded tonight, when an 8th avenue street car, in which four strike breakers and an equal number of private detectives were riding, was mobbed. Police reesrves, who had been summoned by a riot call from three stations, dispersed the mob after the rioting had continued for half an hour. Lambe was taken to a hospital and the strike breakers and detectives were arrested. The rioters escaped.

The strike breakers and detectives boarded the car near the garage of the New York Transportation company, whose electric cab chauffeurs are on strike. Strikers and sympathizers followed the car, pelting it with missiles. The mob smashed the car windows and attempted to reach its occupants. Then the detectives began firing and Lambe went down. The men arrested are charged with being suspicious characters.

Hudson's Bay Stores

Cool nights are now in order. They will invite pleasant dreams of

Hudson's Bay Blankets

We have plenty of them in red and blue.

3 1-2 Points, weighing 10 pounds, $7.50 per pair
4 Points, weighing 12 pounds - - 8.50 per pair

These blankets are justly celebrated for their excellence. We alone carry them in this city.

Also complete lines of white and gray all wool and union blankets, different sizes and weights from

$2.75 to $7.00 per pair

Headquarters for Campers, Miners, Prospectors and Lumbermen.—Pillows, Comforters, Gloves and Mits, Socks, Shirts and Underclothing, Oil Clothing, Sweaters, Miners' and Prespectors' Boots and Shoes and Rubbers. Groceries and Provisions. Everything of the best quality and prices surprisingly low.

THE ZINC INRUSTRY.

There is something doing!

A petition will go forward on Monday to finance minister Fielding, chairman of the tariff commission, asking that certain changes be effected in the tariff for the benefit of the zinc industry in Canada. It is asked that galvanized barb wire, brass blocks, wire (galvanized) and spelter blocks, pigs, sheets, etc., now admitted free, be subject to a tariff of 25 per cent; that the present tariff on zinc white, 5 per cent, be increased to 30 per cent; that the tariff on galvanized plates, now 5 per cent, be increased to 25 per cent; that the tariff on galvanized tubing, now 15 per cent, be increased to 20 per cent, and that the 25 per cent tariff on zinc man. of N. S. S. be increased to 35 per cent.

The petition briefly sets forth the grounds of these demands and refers the tariff commissioners to the report of the zinc commission for confirmation of the statements made and fuller discussion of the various phases of the subject.

It is satisfactory to know that the zinc mine owners have got down to business and it will now be our part, and that of every one interested in seeing a new and important industry firmly established in this province, to do what can be done to assist them in their efforts.

The facts briefly set forth in the petition suffice to show that the establishment of the zinc industry in this province is very much worth while. It will mean the employment of a great deal of highly paid labor, directly and indirectly; it will give a splendid impetus to the development of the mines of the Slocan and Ainsworth districts and also provide another substantial market for the coal product of the Crow's Nest Pass.

An industry that means so much for the Kootenay cannot but be beneficial to the whole province and we have no hesitation in asking our contemporaries on the coast to lend their influence towads the accomplishment of the end aimed at by the promoters of the present petition to the dominion parliament.

The dominion government has shown every disposition to deal both generously and intelligently with the mining industry of this province. It has already done a great deal and we believe that it is prepared to give heed to any good case this province can present for reasonable assistance in placing any and every branch of the mining industry upon a sound basis.

EDITORIAL NOTES.

As a rule the outside world is not greatly interested in the election of a governor for the state of New York. Yet we venture to assert that upon this occasion, the election takes place next Tuesday, there is hardly a thinking man or woman on the North American continent, who is not keenly alert to know what the outcome will be of the great contest between Hearst and Hughes. The contest is practically one between the forces of corporate wealth, represented by Hughes, and of the producers of wealth, represented by Hearst. It is the greatest fight yet waged in the United States between the plain people and the Trusts. Hearst, the people's candidate, has been unmercifully abused and is depicted as quite the vilest wretch that ever sought by chicanery and hypocrisy to induce his fellowmen to entrust him with high office. Hearst is certainly a complex character, but men who have worked with him and know him well vouch for his sincerity, even if they question his methods. One of these men, Charles E. Russell, the well-known journalist, who has had exceptional opportunities of studying Hearst's character, says of him: "If you imagine a man that, among many occupations, distractions and ambitions, still held always and first to a perfectly unaffected, unpretended and innate sympathy with the less fortunate people in the world, that was profoundly dissatisfied with existing conditions, that really desired to do something to make life better and easier for those at the bottom of the social pile, that was naturally and first of all interested in lessening the burden of misery and then was determined to follow what seemed to him the best way to better conditions, you would have a fair view of one side (and that the most important and most effective) of Mr. Hearst's character."

Are we to assume that hereafter it is to be the policy of the chief commissioner of lands and works to "authorize" the announcement of the letting of contracts for public works in the columns of government organs only? This is something entirely new in provincial politics. We are probably not exceeding the limits of truth when we remark that never before in the political history of any province in the dominion has the announcement of the awarding of a contract for some public works been specially "authorized."

"Canada" an illustrated weekly journal, published in London, England, "for all interested in the dominion," is a publication worth the consideration of the 20,000 club in placing publicity matter. This weekly is admirably printed, handsomely illustrated and appears capable of taking a really intelligent interest in Canadian affairs. Recent issues have contained excellent articles descriptive of various Canadian activities, places of interest to tourists and sportsmen, and Canadian public affairs generally. We assume that "Canada" would gladly accept articles descriptive of the scenic and other charms of the Kootenays and we recommend the energetic secretary of the 20,000 club to at once set about the preparation of a series that will tell to the large class of Britishers that is always on the move what delights in the way of river, lake and mountain scenery await the tourist who directs his steps to Nelson, B. C.

The London Times, in discussing sir Wilfrid Laurier's recent declaration in favor of Home Rule for Ireland, argues that the Irish question is essentially an internal question of that part of the empire known as the United Kingdom, and deprecates the interference of Canadian statesmen in British affairs. It says, however, that " a formal appeal from British Columbia to the imperial government in conection with its position in the dominion would, indeed have to be carefully considered." A position which the Toronto News opines will not bear examination. The imperial government has nothing to do with the relations between Canada and British Columbia. British Columbia entered the Canadian Confederation on certain terms which this country has observed, and it is for Canada to say whether or not the province should now receive additional federal aid. We are presuaded that British Columbia makes out a strong case for increase of subsidy. But it is a question betwen the provincial authorities and the federal government, and a question wherein there is no room for imperial meddling.

HERE ARE 2 BARGAINS

That should interest you now that the long evenings are here, and amusement must be sought indoors. We have 2 parlor billiard boards. They have been much coveted by many, but although we have offered them at less than cost, we find they are too expensive to sell. We have therefore decided to put them down to a figure at which we think they will sell, utterly regardless of cost.

The smallest one is 2 ft. 7 in. by 5 ft.— worth $22.50, will sell for $10.

The other one is 3 ft. by 6ft.—worth $45, will sell for $20.

You can play practically as good a game on these tables as you can on a regular billiard table, and as a parlor amusement it has the advantage over most parlor games that you never tire of it. The more you play it the more fascinating it becomes.

SANDON SYNDICATE'S SUCCESS

McAllister Group Proving a Good Thing—Firts Payment Made

A property which has all the earmarks of a big mine, says the Sandon Mining Standard, is the McAllister, one of the group of claims on the north fork of Carpenter creek, the others being the X.Y.Z., Rouse fraction, S.M.R. and Ridgway. These properties were staked as far back as 1893 and they paid right from the grass roots. The outcroppings were gouged out by the owners and two carloads of ore were shipped to the smelter, which yielded 260 ounces of silver to the ton. At this period in the history of the Slocan prospectors were locating claims with big surface showings and extracting and shipping the ore which required practically little or no mining, at a handsome profit. It so happened that the McAlister group was left after the ore in sight was extracted, although the legal assessment work has been faithfuly done and recorded every year. The owners were firmly convinced, however that the ore went down, but being men of money they could not proceed with a scheme of underground development, neither did they put a prohibitive purchase price upon their property. They were prepared to give capital almost any terms if they would come in and develop the property, but in this they were not successful. The leasing system, which has become very popular of late, is the method by which the property has again been opened up.

Where outside capital has lacked the necessary backbone to investigate, local enterprise has risked the hazard and won.

A lease and bond was secured on the property this summer by Messrs. W. Bennett, C. E. Lyons, S. J. Towgood, George Bruder and G. Clarke. A small crew of men were put to work under the direction of the last named, and the surface of the claims thoroughly prospected. By a series of open cuts it was found that the main lead ran across the whole three claims, and a tunnel was begun to tap the lead. After driving 40 feet the vein was cought which had a paystreak of 12 inches, principally grey copper. This ore body has been drifted on for a distance of 70 feet and there is no signs of its petering out.

Thirty tons of valuable ore were shipped this week, which will return the syndicate not less than $700. Stoping ore has ceased for the present, as another tunnel has been started which will give them a vertical depth of 100 feet. Work will be continued until the 1st of December, when by reason of snowslides, it would not be safe to work longer. Next spring an early start will be made and arrangements will be made so that mining can continue the following winter. The first payment on the bond fell due on Wednesday last and it was promptly met. The locators and owners were Wm. Hunter and James Fairburn of Silverton.

ARTISTIC PHOTOGRAPHY

New Quarters of the Queen Studio—An Up to Date Establishment.

Nelson business houses are noted for keeping pace with the times and being thoroughly up to date in all respects. The latest establishment to join the local ranks is the reconstructed Queen Studio in the Elliot block, Baker street west, next to Walker's Jeweiry store and opposite the Hudson's Bay stores.

Allan Lean, the proprietor of the Queen Studio, has taken a long lease of the new premises and has had them specially fitted up for the requirements Forced to leave the original Queen Studio premises further along Baker street to the east, owing to the Canadian Bank of Commerce acquiring the premises for their new building, he decided that the new Queen Studio should be equipped with all the latest improvements for the taking of artistic photographs and consequently the new premises have been arranged with that end in view.

The reception, dressing, and workrooms and studio, are all separate and in the studio the most approved shades of light can now be obtained, permitting of the taking effectively of the very latest styles of pictures.

As a natural consequence of the new state of affairs, the well known Queen Studio photos, so popular in the past, will be much improved upon and already the pressure of increased business is felt at the studio.

Some of the work on hand has necessarily been delayed during the time occupied in moving from the old to the new premises. When this is completed all new orders will be finished promptly on time. Mr. Lean will continue to do picture framing and a new stock of moulding and frames has just been received.

Mr. Lean extends a cordial invitation to the public generally and especially to former patrons to call and inspect the new Queen Studio.

Fashionable Overcoats At Cost

They say it's going to be a mighty cold winter. There will be no danger of your getting cold this winter, if you take to wearing one of our swagger overcoats. We are closing this line out and it's a chance of a life time to get a good thing cheap.

MICHEL'S PREDICAMENT

Plenty of Coal, and None to Burn—Death of T. R. Morton

(Special to The Daily News)

Michel, Nov. 3—Mrs. T. R. Morton received a telegram yesterday advising her of the death of her husband at Lethbridge. Mr. Morton went to Lethbridge several days ago to undergo an operation for cancer of the stomach. Mr. Morton was 6' years of age. He leaves a wife and two sons. Charles, the eldest son, left Michel when the mines shut down on account of the strike and his present whereabouts i unknown. Gordon, the younger son, abou 12 years old, accompanied his mother to Lethbridge on the evening train. The remains will be laid at rest in the cemetery at Lethbridge. Mr. Morton was an old timer in the Crow's Nest, having lived at Carbonado prior to coming to Michel.

A serious coal famine is threatening Michel, practically everybody is out of coal and none is obtainable from the coal company for the reason that they have none in the tipple. So far the people have been able to gather wood on the hills, but if the threatened snow sets in to any extent they will be unable to procure the necessary fuel unless they have it hauled from the outside. This is certainly a peculiar predicament, when there is an unlimited quantity of coal at hand and machinery and men ready to get it out, but not allowed to do so.

The Royal Gives the Best Values in Shoes

TO HEAR THE OTHER SIDE

Toronto, Nov. 3—Counsel for the defence at the London election trial yesterday obtained an order from police magistrate Dennison for bringing back to Toronto Frank Hutchison of London, who, it was stated, would tell of corruption on the part of the conservatives in election campaigns in London. Hutchison was here, but returned to London.

HASTINGS MAN DROWNED

Hastings, Ont., Nov. 3—News was received here this morning from Lamable of the drowning of John Murray at Crooked lake. Murray, in company with a few others from here, was deer hunting. The accident happened by the upsetting of a canoe. Murray had resided and carried on a successful business here for a number of years.

LEAD MINING IN IDAHO

SMELTER TRUST'S GRIP ON THE ORE SHIPPERS.

KOOTENAY MINE OPERATORS IN NO SUCH PLIGHT.

Editor, The Daily News: I read a quotation in the Slocan Mining Review, from your paper, giving N. J. Cavanaugh's views, regarding the reduction in smelter charges to $10 per ton. As you know I was one of the fighters for betters terms for our producers, while running the Sandon Mining Standard. A square up and up fighter must sink prejudices to the common good, and I wish to place before your readers some facts that should allow a more extensive advertising of your resources in lead, and which sroudl result in turning some capital your way. You should advertise the facts far and wide, giving your plants and railways full credit.

Please note the copy of a contract in force in the Couer d'Alenes for lead ore. This is accurate and under its terms the producer in this region is receiving but little if any more ,than what is received in British Columbia from the native plants. In other words, the price received for lead ore in British Columbia, is about the same as is received in the Couer d'Alenes, and this despite the fact of high tariff and higher prices. Taking this contract as a basis, it is easily figured out, using the ore Mr. Cavanaugh employed, viz.: 60 per cent pb. 100 oz. ag. When the question of fuel, power, timber, ore richness, etc., is considered, British Columbia has away the best of it. Here they go in for systematic deep mining. That is putting the country on its feet. If the same were done in British Columbia, there would be little doubt of success there also. I want to add my bit of commendation for the reduction of smelter charges. As to fair treatment, well you should hear the kicks here.

GEO. HUSTON.

Wallace, Idaho, Oct. 31, 1906.

The contract referred to in Mr. Huston's communication is too lengthy to publish in full, but we give the essential provisions and they certainly indicate that the Smelting Trust is not giving the lead miners of Idaho any the best of the deal:

Agreement, made and entered into this....., day of ....., 1906, by and between the ....., a corporation organized under the laws of the State of Idaho, party of the first, part, hereinafter called the mining company, and the American Smelting & Refining company, a corporation, organized under the laws of the state of New Jersey, party of the second part, hereinafter called the smelting company.

Witnesseth:

For and in consideration of the sum of one dollar, lawful money of the United States, paid by each of the said parties to the other:

I. The mining company agrees to sell and ship to the smelting company all the lead-silver ores it can produce of the required quality from the ..... mine and all other properties owned, leased or controlled by the mining company in the Couer d'Alene mining district, in the state of Idaho. It is understood that the ores deliverable under this agreement shall assay in lead between 20 per cent and 70 per cent, unless the smelting company shall give its written consent to the shipment of ores varying therefrom in lead assay.

II. The smelting company agrees to purchase and accept delivery of all the ores which the mining company shall have the right to sell or dispose of from the mines owned, leased or controlled by it, in the Coeur d'Alene mining district, in conformity with the terms of this agreement, with a maximum obligation to receive and pay therefore, as hereinafter provided for ..... tons monthly. Should the mining company produce more than the above specified tonnage monthly, the smelting company shall have the right to purchase the excess over ..... tons monthly under the same terms and conditions contained in this agreement, and in case of the refusal of the smelting company to receive such excess, then the mining company shall be at liberty to dispose of the excess, it being understood, however, that the refusal of the company to receive such excess in any one month shall apply to that month only, and shall not be construed as a refusal to receive the excess of any succeeding month, or months.

III. The value of said ores shall be fixed and shall include as follows:

Silver: For 95 per cent of the silver contents at the New York quotation for bar silver, as furnished by Handy and Harman, or their successors in business (or in case said firm and its successors shall go out of existence, by the firm of J. & W. Seligman & Co.) to the Western Union Telegraph company on the date of settlement. In the event that the above quotation for silver shall exceed 60 cents per ounce, then one-third of the excess value over 60 cents per ounce shall be deducted from the price of silver used in settlement for ores under this agreement. Nothing shall be paid for silver when the ore assays less than one ounce per ton.

Gold: For 95 per cent of the gold contents at the rate of $20 per ounce, provided that 0.05 of an ounce or more shall be contained per ton. There shall be no payment for gold, if the gold contents be less than 0.05 of an ounce per ton.

Lead: For 90 per cent of the lead contents, 90 per cent of the average sales price as made by the American Smelting and Refining company during the week preceding the date of settlement of the lot in question for common desilverized domestic lead in lots of 50 tons or more for delivery in the city of Nef York and for shipment within 30 days, so long as such an average selling price shall be $4 per one hundred pounds or under that price. Should such average selling price exceed $4 per hundred pounds, then the price to be paid for lead in settlement shall be 90 per cent of $4, plus one-half of the excess over $4 per hundred pounds. For example: If the selling price be $5.60, then the price to be used in settlement hereunder shall be 90 per cent of $4, or $3.60, plus 80 cents, or a total of $4.40 per one hundred pounds. The wet determination for lead in the button obtained by fire assay shall determine the true percentage of the lead in the ore, and such determination shall be used in settlement.

Deductions: From the value of each lot of ore delivered hereunder, as determined above, there shall be deducted a freight and treatment allowance (figured on dry weight) equal to the sum of the tariff railway freight charge per ton from the mines of the mining company to the smelter of the smelting company at Pueblo or Denver, to which said lot of ore is billed, based on the existing tariff rate per ton on said ores at the time of shipment, plus an allowance for smelting on each ton of two thousand pounds, dry weight, of $8, f.o.b. cars at Denver or Pueblo, Colo. Should the product be consigned to any of the plants of the smelting company other than those at Pueblo or those at Denver, the deduction for freight and treatment allowance shall be equal to the tariff rate on the same grade of material from the mines of the mining company in the Coeur d'Alene district to Denver or Pueblo, plus $8 per ton dry weight. A further allowance for treatment of 50 cents per ton shall be deducted by the smelting company for each per cent, or fraction of one per cent of zinc contents in excess of ten per cent.

V. Payments shall be made hereunder by the smelter to which the ore, concentrates or slimes is consigned after the lot has been sampled and assayed at said plant, as follows:

From the net value of the silver and gold as hereinbefore provided, and the value of 90 per cent of the lead figured at $3.50 per hundred pounds, there shall be deducted the freight and treatment allowance as hereinbefore provided. Should any difference be due the mining company on account of 90 per cent of the lead sales price, as specified below, exceeding $3.50 per one hundred pounds, then such difference shall be paid to the mining company on the fifteenth of the month following the settlement of the ore at the smelter at which it is consigned. Should 90 per cent of the average price at which the smelting company shall sell desilverized lead for delivery in New York in lots of 50 tons or more for delivery within 30 days, averaged over a week preceeding the date of settlement hereunder, be less than $3.50 per one hundred pounds, then in computing the value of the lead, the quotation price to be used in settlement hereunder shall be 90 per cent of the actual average selling price of the preceding week, as computed above, and not $3.50 per one hundred pounds.

XII. This agreement shall be binding upon and inure to the benefit or the successors and assigns of the respective parties hereto, and all its provisions relating to the sale of ore shall, as to the mining company, be deemed to be and considered as a covenant running with the land. The mining company in further consideration of the premises, undertakes and agrees that in the event it shall sell, lease or otherwise dispose of any or all of its mining property producing the ore covered by this agreement during the period covered by this agrement, it will cause its successors and assigns in interest in such mining property or stock to agree with the smelting company to assume, fulfill and carry out each, every and all of the covenants and agreements with respect to the sale of ore herein set forth, to be kept and performed by the mining company.

A Difference Where Difference Counts

Armour's Solid Extract of Beef

(POTTED IN CANADA)

is the Pure, Concentrated Essence of Prime Beef. Being solid, it cannot be adulterated, and is more economical, because it goes four times as far as other brands.

Other extracts and fluid beefs lack strength and quality. Fluid beefs contain water, salt and other ingredients.

Insist on Armour's, and you have what is best and most economical.

"CULINARY WRINKLES" is a booklet which tells numberless ways in which to use Armour's Extract of Beef. Send for it. It's free.

They contain all the nutriment in wheat. For sale in 5 and 10 lb. bags by all good grocers:

Columbia Flouring Mills Company, Ltd.

ENDERBY, B. C.

Why Low-Priced Teas Are Really Extravagant

Because so much more of them is required to the cup than of a high-grade tea like

Blue Ribbon

As a rule it takes about a third more cheap tea than of Blue Ribbon Tea. In other words, three pounds of Blue Ribbon Tea will go about as far as four pounds of the 30c or 35c tea. So Blue Ribbon Tea is really the most economical.

And as for flavor, there is no comparison. Cheap inferior teas can never have the rich smooth flavor and refreshing fragrance of Blue Ribbon Tea. If you have been using "cheap" tea, try one pound of Blue Ribbon and notice the difference. Lead packets, and 50c a pound.

We have the best facilities in the Kootenays for supplying

Cured Meats

during the summer weather. Wholesale and retail. Write for price list.

P. BURNS & CO.

Nelson, B.C, and Branches.

OF INTEREST TO MINERS

CORRESPONDENCE.

G. H., Nelson, B. C.—Your No. 1 sample is quartz with some small quantity of iron pyrites showing. It will most likely carry gold and silver values. No. 2 is mostly quartz and will carry only small values in gold. It is impossible to give even an estimate of the actual gold contents in these samples without having an assay made, nor can it be said whether they will improve in values when depth has ben obtained.

H. Kaslo, B. C.—The small piece of oxidised rock you send, when broken showed signs of being of a granitic nature with some specular hematite on one side. To give you fuller particulars we must have a larger sample, not under four ounces.

T .M., Beasley, B.C.—The green colored rock you send is "genthite" or garnierite. This is a silicate of nickel and magnesium, and is one of the most valuable nickel ores known, sometimes running from 25 to 35 per cent in nickel. It would be advisable to have it assayed for nickel and cobalt.

G. Salmo, B. C.—Your rock is ordinary red hematite. As you say you can never get an assayer to give you values for gold and silver in it; have it assayed for iron and silica. You will most probably find that it will make a valuable iron ore.

F. C., Bossburg, Wash.—Your sample is clay, apparently of a good quality and free from grit. You had better have an analysis made upon it, to prove whether it would make a good fire resisting clay. The fee for this will be $10.

G. M., Nelson, B. C.—If your assayer gives you gold in the sample you had better write the smelting company ,who will repeat their assay and allow you for any gold present should the amount be above the usual stipulated margin.

T. T., Greenwood, B.C.—Your sample is a piece of ordinary borax. It hardly seems likely that this could be found as you were told. Try and obtain a larger sample and confirm the statement.

M.M., Trout Lake, B.C.—Your sample is carbonate of zinc, apparently a very rich one. Have it assayed for zinc, silver and gold.

G., Sandon, B. C.—We fail to see any difference betwen the definition you give of a dyke and the one printed in these columns last Sunday, excepting the misspelling of the word igneous. Your definition does not mention the fact that dykes may be filled with volcanic matter. Probably you overlooked this point for though none of this class are found in this district, in other parts there are many.

J. H., Trail, B.C.—Your samples Nos. 1 and 2 are both ilmenite or titaniferous iron, as you will notice by the description given sometime back. The color is iron-black. It can hardly be streaked, but powders very black. It contains about 31 per cent titanium, but has no commercial value at the present time.

W. T., Camborne, B. C.—Your No. 1 sample is quartz containing bornite or horseflesh copper. Assay this for copper and silver. No. 2 sample is quartz with copper pyrites. There is also a little iron pyrites and galena showing in this sample. No. 3 is diorite. No. 4 is probably diorite which has been considerably weathered.

F., Slocan Junction, B.C.—Your No. 1 sample is magnetite or magnetic iron ore. You had better have it assayed for iron and silica. The fee for this is $3. It may also carry a little gold. No. 2 sample is a granitic rock, the blueish-black mineral on the side of it is molybdenite, but there is not sufficient present in the sample to make it pay.

C. C. C., Revelstoke, B. C.—Your sample is ordinary cube galena. Have it assayed for silver and lead. We will hold it until we hear from you. The fee will be $1.50.

M. L., Kalso, B. C.—The piece of ore you send is chiefly made up or carbonates, the light yellow variety seem to indicate zinc being present, but it is impossible to state without an assay being made. It would be advisable to have this sample assayed for silver, lead and zinc.

L. J., Waneta, B. C.—It is impossible to say whether platinum is present in your black sand without an assay being made for it. The fee for this would be $5.00

B. C., Ymir.—The best way for you to get the gold out of your babbit metal will be to dissolve the babbit metal in nitric acid. Boil the solution well and whilst boiling decant it. The gold will remain behind.

D. T. S., Creston, B. C.—Your ore is hematite or specular iron; have it assayed for iron and phosphorus.

P. N. Silverton, B. C.—Your sample is a piece of stibnite, or a sulphide of antimony. You had better have it assayed for antimony and silver.

W. W., Salmo, B. C.—The blackish rock you send is graphitic schist, whilst the dull massive white rock is calcite. Neither are of commercial value, unless you can obtain the latter in large quantities and clearer than this sample when it might be used in marble works.

G. C. S., Slocan, B. C.—Your letter was replied to last week. The sample was mainly composed of calcite and blende.

We hold a sample without any name attached and with no instructions enclosed. Will the owner please claim it.

There is still one assay certificate waiting to be claimed and upon which the fee has been paid.

IN TIME OF PEACE

In the first months of the Russia-Japan war we had a striking example of the necessity for preparation ond the early advantage of those who, so to speak, "have shingled their roofs in dry weather." The virtue of preparation has made history and given to us our greatest men. The individual as well as the nation should be prepared for any emergency. Are you prepared for a successful combat with the first cold you take? A cold can be cured more quicky when treated as soon as it has been contracted and before it has become settled in the system. Chamberlain's Cough Remedy is famous for its cures of colds and it should be kept at hand ready for instant use. For sale by all druggists and dealers.

Nervous Women

Their Sufferings Are Usually Due to Female Disorders Perhaps Unsuspected.

A MEDICINE THAT CURES

Can we dispute the well-known fact that Canadian women *are* nervous?

How often do we hear the expression, "I am so nervous, it seems as if I should fly;" or, "Don't speak to me." Little things annoy you and make you irritable; you can't sleep, you are unable to quietly and calmly perform your daily tasks or care for your children.

The relation of the nerves and generative organs in women is so close that nine-tenths of the nervous prostration, nervous debility, the blues, sleeplessness and nervous irritability arise from some derangement of the organism which makes her a woman. Fits of depression or restlessness and irritability. Spirits easily affected, so that one minute she laughs, the next minute weeps. Pain in the abdominal region and between the shoulders; loss of voice; nervous dyspepsia; a tendency to cry at the least provocation——all this points to nervous prostration.

Nothing will relieve this distressing condition and prevent months of prostration and suffering so surely as Lydia E. Pinkham's Vegetable Compound.

Miss Lelah Stowell, of 177 Wellington St., Kingston, Ont., writes:

Dear Mrs. Pinkham:—

"Your Medicine is indeed a Godsend to suffering women, and I only wish that they all knew what it can do for them and there would be no need of their dragging out miserable lives in agony. I suffered for *years with bearing-down pains, extreme* nervousness and excruciating headaches, but a few bottles of your vegetable Compound made life look new and promising to me. I am light and happy and I do not know what sickness is, and I have enjoyed the best of health now for over four years. Lydia E. Pinkham's Vegetable Compound has sent sunshine into thousands of homes and hearts."

Will not the volumes of letters from women made strong by Lydia E. Pinkham's Vegetable Compound convince all women of its virtues? Surely you cannot wish to remain sick and weak and discouraged, exhausted each day, when you can be as easily cured as other women.

Synopsis of Canadian Homestead Regulations

ANY available Dominion Lands within the Railway belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal lands may be purchased at $10 an acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2000 pounds shall be collected on the gross output.

TO WORKINGMEN
NOTICE

Whereas, at the Last Chance and Surprise mines, Chinese kitchen help is at present empoyled, to the exclusion of White labor.

Therefore, be it resolved that this organization, Sandon Miners' union No. 21 of the W. F. of M. reaffirming its opposition to the employment of Orientals within its jurisdiction, strongly condemns the position taken by the management of the properties in question, and counsels workingmen everywhere and those favorably disposed toward organized labor to be governed by this action.

NEWBRO'S HERPICIDE

It is high time that the oft repeated claim that—"chronic baldness can be cured" be filed away with the old announcement that the moon is made of green cheese. The claim is untrue, and aside from this it induces many people to ignore the chances they have to prevent baldness.

The greatest stride toward the ultimate elimination of baldness was the discovery by Prof. Unna, of Hamburg, Germany (ask your doctor about him), that most hair loss is due to an invisible growth, of vegetable character, in the scalp—literally a "dandruff germ," producing a highly contagious disease. The greatest stride toward the prevention of baldness was the recent discovery of a prophylactic fluid called NEWBRO'S HERPICIDE, which, if intelligently used—will destroy the dandruff germ and prevent baldness.

Herpicide is the original dandruff germ destroyer and its extraordinary success—for dandruff and falling hair, also dull, brittle and lustreless hair—has brought out many imitations. Even the old line hair "growers" and hair "tonics" now claim to kill the dandruff germ. Quite a tribute to Herpicide, isn't it? An exquisite hair dressing. Stops itching of the scalp almost instantly. Don't wait; try it now.

OPENING NEW COAL MINE

FLUMERFELT AND GALER SECURE ALBERTA C. & C. CO.

PERMANENT SHAFT TO BE SUNK AT ONCE.

It is reported from Frank, Alberta, that A. C. Flumerfelt and H. N. Galer, of the International Coal & Coke Co., Coleman, have secured control of the Alberta Coal & Coke Co.

The Alberta Coal & Coke company's property is located about a mile east of Lundbreck and consists of 6400 acres with seven miles on the strike of the seams. There are on the property what are said to be eighteen seams of coal, all of workable width, but engineers generally consider that the eighteen seams constitute three folds of six seams or six folds of three seams. There has never been sufficient work done on the ground to determine the facts further than that there are actually eighteen seams that might be worked from a single shaft. The coal is undoubtedly the finest lignite or domestic coal ever discovered in Alberta, in fact, according to hundreds of analyses that have been made by probably as many different parties, the coal runs so high in carbon as to virtually give it rank as a semi-bituminous. It is exceedingly hard, is very low in ash and practical tests have proven it exceptionally fine for all domestic purposes while for steaming it is not far if any behind the bituminous coals of The Pass.

The new owners now have a crew of men doing prospecting work to determine where the permanent shaft should be sunk. They are working two shifts and will sink 100 feet and then crosscut all the seams to determine the most advantageous point for the permanent shaft. When that has been decided work will begin in earnest and some coal will be put on the market at once. Though necessarily the amount cannot be large for some time, it is confidently expected by Messrs. Flumerfelt and Galer that they will have an output of upwards of 500 tons daily within a year.

The company's plans for operating are already made and the installation of a handling plant will begin as soon as the location of the working shaft can be determined and the machinery got on the ground. The plant will be similar to that of the International company at Coleman, at least will be on the general lines of that plant, and will have a capacity of 1500 tons daily. The coal will find a ready market in Saskatchewan, Alberta, British Columbia and also in Washington where a big market is open to the company by reason of the completion of the Spokane-International railroad which affords Pass coal a direct route to that territory.

A meeting of the stockholders of the company will be held in Spokane within a week when Mr. Flumerfelt will be elected president, and Mr. Galer vice-president and general manager.

NEW YORK FASHION LETTER

New York, Nov. 2—As the grim November days and frosty ones appear every woman looks to two lines of accessories to aid her in her good taste in dressing—the touch of color and the richness of fur. Even in winter color does not seem so necessary as when at this time of the year the ground lies bare and the trees look desolate and everything has taken on faded brown tints, even the leaves are sear and yellow; therefore my lady herself must give the touch of color and the feeling of warmth.

Furs are expensive in very truth, yet there are a few that may be reached by the ordinary purse; and if one cannot afford a full garment, a coat or cloak trimmed with fur is possible and in many cases it is far more serviceable. Sometimes one wrap may be made to do much service by the addition of different collars and cuffs that may be taken off and put on at will.

For jauntiness nothing is more attractive than the little fur boleros, which are to be worn a great deal this winter and as fur at its lightest is heavy, the bolero is a favorite with many women. For the new styles in the bolero there have been a few changes rather trying to some women. One of these changes is the square back which ends in a postillon formed by three plaits of fur, which for the broad shouldered woman and broad of hip, is about as unbecoming as it could be. The fronts to this new bolero are full and straight, ornamented with little pockets. A turnover collar and revered cuffs complete the garment.

For a tall woman a bolero was constructed of brown caracul in the box bolero mode, which ends a good distance above the waist line and has its closing finish beneath two rows of passamenteries which is also used on the collar and cuffs. Another idea of trimming of the furs this season is the use of velvet or motifs of brocaded silk or velvet. For instance, a fur bolero was laid over an under bolero of velvet, the fur being black and the velvet dark ruby, while the hat worn with it wa sof ruby velvet in turban shape, decorated with fur bands and a fur head. The skirt worn was a black broadcloth. This costume was worn at a driving party where the wind on the wind on the cool dark day whipped the color into the wearer's cheeks, and brightened her brown eyes until with the effectiveness of her dress people remarked upon her style and beauty.

The idea of having a brocaded vest in the coast has been carried into the makeup of the fur garment as well as in other materials and is a fine place to get the figure effect, color, or carry out the tone tints of the costume, while it does not detract from the effectiveness of the coat worn with other dresses. One model in seal skin displayed a vest of brocaded velvet showing reds, yellows and browns, from the vest extended two double revers of the velvet to the waistline and passed under a broad girdle of the velvet, while a little postillon finished the back.

Another idea that would have horrified our grandmothers is the using of lace and fur together—not as trimming alone as has been the fad for a season or two, but for the forming of a whole garment. A blouse coat of heavy Irish lace with long sleeves and high neck and collar had an over blouse or bolero of pony skin low in front with elbow sleeves double breasted and fastened with fancy buckles. A second fur bolero was made up over a yellow silk covered with dyed brown lace that exactly matched the brown caracul in the bolero. Thus, from these descriptions it is seen that the bolero is the predominating style, yet there are other cuts that will be fashionable, indeed, there must be because the bolero is not becoming to all women. For many the box coat is a better model of this order of coat was of brown caracul which had folds of brown silk, running along its seams ,forming the cuffs and collar and of which the girdle was made. Buckles of chased gold fastened the neck, each cuff and belt, thus giving a very rich appearance to this natty little wrap.

Muffs are large. From the tiny affairs of some years ago we now have those that are not only large enough for the hands but that cover the arms as well. A muff seen not long ago was made of musseline of a yellowish tint and covered with four skins, the heads uppermost and the tails forming a fringe at the bottom. The idea of using an entire skin is popular just now, especially to leave the rough outline of the animal, which means that the small sized furs are in demand.

In many instances the fur that is used in the coat, or the stole or muff, is also used in the trimming of the hat, a band, a head, or a tail or other effects. Fur hats are to be worn when intended for outdoor wear, driving, motoring or any of the various winter sports. They are always rich and warm looking and appropriate for the occasion. Again, fur is much used on the skirts, and on the whole costume as far as that is concerned; so well is fur now prepared that the tailors are able to use it almost as easily as the heavier velvets and cloths and a few bands or tabs or tails of fur certainly give an effect that can be gained in no other material.

CATHERINE MANN-PAYZANT.

AN OBLIGATORY DRESS

The Only Correct Coat for Any Day Function

The full frock coat or Prince Albert, was first brought into prominence by prince Albert, consort of the good queen Victoria, who occupied in his day somewhat the position in regard to fashion that king Edward does now.

For day dress, for day weddings, receptions or functions and especially for church and Sunday wear, the full double breasted frock coat is the only correct dress for men. It is obligatory.

Semi-ready frock suits of fine black cheviots, are sold in all the Semi-ready wardrobes at $25, $30 and $35, according to quality of cloth and silk linings. The Semi-ready frock coat for the fall is conservative and modest. The shoulders are square and of natural width. The coat falls just below the knee.

J. A. Gilker, the pioneer merchant of Nelson, secured the agency for the incomparable Semi-Ready.

CROUP

A reliable medicine and one that should always be kept in the home for immediate use is Chamberlain's Cough Remedy. It will prevent the attack if given as soon as the child becomes hoarse, or even after the croupy cough appears. For sale by all druggists and dealers.

STOCKS FOR THE WEEK

DENORO MINES IN DEMAND BUT NO SELLERS

ADVANCE IN INTERNATIONAL COAL, LIKELY TO GO HIGHER

(Reported by B. S. Mignon & Co.)

The stock market for the past week has been very steady with more than the ordinary amount of business done.

Denoro Mines was perhaps more in demand than any other stock, with very few shares changing hands. There seems to be a deadlock between the buyers and the sellers in these shares, each refusing to meet the other's price. Cariboo-McKinney was traded in on much the same line, very few sales being recorded, though inquiries from both buyers and sellers were numerous. International Coal opened steady and immediately advanced several cents, with every indication of higher prices being asked for the ensuing week's tradings. White bear, assessable shares, were in slight demand at a very low figure, but even the present quotations brought out several blocks more than the demand warranted. Rambler-Cariboo remained steady, with indications of another advance soon. La Plata continues to attract inquiries and this stock is exhibiting more strength than ever before, with very few of the shares offering. Sullivan during the middle of the week, made another sharp advance but has again declined and is holding firm at its former quotation. North Star and American Boy weakened slightly, though in the last two days they gained a point or two, with indications of being again in demand. California attracted no attention from buyers and very few sales were recorded. Canadian Smelters and Canadian Goldfields were weak, the former stock dropping several points in consequence of the close down of the Trail smelter.

Following are the approximate quotations for the week ending yesterday:

	Asked	Bid
American Boy	$ .3¼	$ .2¾
Alberta Coal	.50	.35
B. C. Copper	14.75	14.25
Breckenridge-Lund Coal	.65	.60
B. C. Standard	.20	.15
California	.8½	.7½
Cariboo-McKinney	.7	.4
Consolidated Smelters	133.00	130.00
Canadian Goldfields	.8	.7
Diamond Vale	.18	.16
Denoro Mines	.12	.9
Dominion Copper	6.60	6.00
Granby	14.50	14.00
Handy Mines	.2½	.1
International Coal	.66	.63
La Plata	.25	.20
North Star	.20	.15
Nicola Coal Mines	.7½	.5
Rambler-Cariboo	.35	.32
Referendum	.6½	.5
Sullivan	.12	.10
Tel-Kwa	.20	.15
Virginia	.4	.3

TO IMPROVE THE FAIR

Directors Will Welcome Suggestions for Modification of Rules and Regulations

It is requested by some of the directors of the Nelson Agricultural and Industrial association, who have become tacitly responsible for the formulation of new rules and regulations, or the modification of those existing, with a view to having some definite plan to lay before the adjourned meeting of Nov. 29, that those interested in any way will send in to the secretary any proposals that they have to suggest which will conduce to the betterment of the annual fair.

There has been some discussion as to various points. J. E. Annable, for instance, is of the opinion that the trouble as to the district exhibits can be entirely obviated by doing away with them as a separate display. His plan is that as each individual exhibitor is necessarily a resident in some one district or another, that prizes won by him should be counted towards his district and the district thus securing the highest number of prizes, through the individual exhibitors, should be awarded the district prize.

Against this suggestion it is urged that it would do away with the marking which is given for the best decorations in the district displays, and further that the district exhibits take up considerable space and make a brave show. On the other hand it is contended that the district displays take up too much space in an already crowded hall and split the exhibits so that apples of the same variety as well as other things, are found all over the building instead of being together. A compromise, is the suggestion that as Kootenay can never compete in vegetable production in bulk with other regions, that the district displays be restricted to fruit.

The Royal Gives the Best Values in Shoes

CHURCH SERVICES TODAY

The services announced for today in the churches of Nelson are as follows:

Anglican—St. Saviour's church, corner of Ward and Silica. Twenty-first Sunday after Trinity; holy communion, 8 a. m.; morning prayer and holy communion, 11; Sunday school, 2:30 p.m.; evensong, 7:30; Rev. F. H. Graham, rector.

Catholic—Church of Mary Immaculate, corner of Ward and Mill streets. Low mass, 8 a.m.; high mass, 10:30; evening service, 7:30. Rev. Father Althoff, priest.

Salvation Army—Barracks on Victoria street, west of Josephine. Special services will be held today. Knee drill, 7 a.m.; holiness meeting, 11 a.m.; free and easy, 3 p.m.; evening meeting, 8 o'clock.

Baptist church—Stanley street, near Mill. Morning service, 11 a.m.; evening service, at 7:30; Sunday school, 2:30 p.m.; Rev. E. H. Shanks, pastor. Evening topic, "Chosen God." The Jubilate Deo will be rendered by the choir, and a solo by Mrs. Shanks, "Dream of Paradise." Rev. C. Padley will preach in the morning and the communion of the Lord's Supper and a reception of new members will follow.

Presbyterian Church—St. Paul's, corner Victoria and Kootenay streets. Morning service, 11 a.m.; Sunday school, 2:30 p.m.; evening service, 7:30 p.m.; Rev. J. T. Ferguson, Pastor.

Methodist church—Corner Silica and Josephine streets. Morning service, 11 a.m.; Sunday school and pastor's bible class 2:30. Rev. R. N. Powell, pastor. Evening topic, "The Divine Vision." The morning service will be a children's service and the subject will be "About Birthdays." The sacrament of the Lord's Supper will be administered at the close of the evening service.

Best Kidney Remedy Known To Science

For pain in the back—scanty urine—highly colored urine — irritated bladder — irregular bowels—bad stomach — there is nothing that will bring such quick relief and so certain a cure as FRUIT-A-TIVES.

These marvelous tablets are nature's natural remedy for irritated or weakened kidneys. They act directly on the kidneys—soothe the irritated membranes—clean, heal and strengthen the organs—and help them to new vigor with their work.

Often kidney trouble is not due to any organic defect in the kidneys. If the bowels are constipated—if the skin does not throw off the tissue waste of the body—then these impurities are carried to the kidneys. In a vain endeavor to rid the system of impurities, the kidneys are overworked—the blood vessels are dilated—the nerves inflamed. That causes a host of kidney troubles.

Fruit-a-tives

OR "FRUIT LIVER TABLETS"

not only heal and strengthen the kidneys but they also increase the action of the skin, and act directly on the liver, thus curing the constipation.

FRUIT-A-TIVES are the natural and logical cure for all kidney troubles. They are made of fruit and tonics—are pleasant to take—and a guaranteed cure when faithfully used.

50c. a box or 6 boxes for $2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES LIMITED · OTTAWA.

LAND NOTICES

NOTICE is hereby given that 60 days after date I intend to apply to the Hon. Chief Commissioner of Lands and Works for permission to purchase the following described lands in the Lower Arrow lake district, about three miles above the Needles postoffice on the west side of the lake: Commencing at the southwest corner of F. B. Lucas' pre-emption, post No. 1 40 chains west to Post No. 3; thence 20 chains north to post No. 3; thence 40 chains east to post No. 4; thence 20 chains south to place of commencement.

Dated this 23rd day of October, 1906.
A. V. LUCAS. 10-27

NOTICE is hereby given that sixty days after date I, J. H. Taylor, intend to apply to the Chief Commissioner of Lands and Works, Victoria, B.C., for permission to purchase the following described lands, situate in the West Kootenay district and more particularly described as follows: On the west side of the Columbia river, opposite Makinson's pre-emption, starting at a post planted near the northwest corner of Gus. Adolph's pre-emption and on Gerhard Ludwig's south boundary, and marked "J. H. Taylor's N.E. corner," running thence west 20 chains; thence south 40 chains; thence east 20 chains to Gus Adolph's west boundary; thence north 40 chains to point of commencement.

Located this 20th day of August, 1906.
J. H. TAYLOR.

NOTICE is hereby given that 60 days after date I intend to apply to the Hon. the Chief Commissioner of Lands and Works for permission to purchase the following described lands in West Kootenay district: Commencing at a post marked "M.E.T.'s northwest post" and planted on the east line of Lot No. 3872, about one mile from Kootenay river on the south side, thence 80 chains south; thence 20 chains east; thence 80 chains north; thence 20 chains west, to point of beginning.

M. E. TAYLOR,
W. J. TOYE, Agent.
Dated this 22nd day of August, 1906.

NOTICE is hereby given that sixty days from date I intend to apply to the Hon. the Chief Commissioner of Lands and Works for permission to purchase the following described lands, situate on the lower Arrow lake: Commencing at a post planted about 10 chains east of Sand creek, marked "W.R.H.'s N.E. corner," thence 20 chains south; thence 20 chains west; thence 20 chains north; thence 20 chains east to point of commencement, containing 40 acres, more or less; said land adjoining Paul Auder's pre-emption on the north side.

W. R. HOBBS.
Located Oct. 5, 1906. 10-

NOTICE is hereby given that 60 days after date I intend to apply to the Hon. the Chief Commissioner of Lands and Works for permission to purchase the following described lands in the West Kootenay district: Commencing at a post marked "C. F. Walmsley's N.E. corner post," situated at the S.E. corner of Lot No. 3333, thence south 40 chains; thence west 6 chains; thence north 40 chains; thence east 6 chains to point of commencement.

Dated this 15th day of October, 1906.

NELSON'S NEWS OF THE DAY

Ticket No. 483 won the cushion raffled by Mrs. Hagerman.

Members of the Methodist church are preparing for the church anniversary to be held next Sunday.

W. Adams of the Windsor hotel, Rossland, has been brought to Nelson to serve a term of three months for assaulting a police officer.

The officers and guards of the L.O.Y.M. will hold a practice in the K. of P. hall tomorrow evening at 7:30. All, especially officers, are requested to attend.

The annual meeting of the curling association will be held tomorrow evening in the board of trade rooms at 8 o'clock. The objects are the election of officers and the discussion of general business.

W. A. Galliher, M.P., will leave for Toronto this evening on private business. From Toronto he will go to Ottawa for the session of parliament which opens on the 22nd.

During the week the new Heberlein roaster at the Hall Mines smelter has been installed, thus placing a valuable adjunct at the service of the smelter in its pursuit of economical reduction of ores.

There will be special services on Tuesday, Wednesday and Thursday evenings at the Baptist church, when Rev. C. Padley will preach. At the close of the Tuesday service the Baptist Young People's union will meet.

At a meeting of the Reliance Mining company held yesterday T. A. Noble was elected president and R. J. McPhee of the Ottawa, vice-president and manager. The other directors were re-elected. Mr. McPhee intends to restart work on the mill within the next few days.

In connection with the International association of Machinists, the machinists employed in the C.P.R. shops here intend before the season is much further advanced, to hold their first annual ball in Nelson. The success of last year's entertainment has served the purpose of spurring the present committee to even greater efforts and with the promised support of brothers from Revelstoke, Cranbrook and Spokane, this year's dance bids fair to surpass all previous social gatherings. The date has not yet been definitely decided on but it will be announced shortly, and in the meantime the committee is engaged in giving the finishing touches to the arrangements which are to make this the ball of the season.

All the cattle that got away from P. Burnsand company's corral at the C.P.R. depot on Hallow'en have now been recaptured, some on Anderson creek and the remainder on the Great Northern tracks. The perpetrator of the act is not known, but the boys who were first suspected are now exonerated.

Mayor Gillett had received no further intimation regarding the contract for the new court houes up to a late hour last night, other than the information given him on Friday by W. W. Baer. At the government offices no word had been received of the awarding of the contract, although there is no question that it will go to Gillett, whose tender was the lowest.

H. F. Baker, representing Crosse and Blackwell of London, one of the very few English firms that have had representatives here this year, has been in the city on business for the past few days. Mr. Baker says he finds it worth while visiting this country and says also he is obtaining an increasing market in the United States despite a 40 per cent tariff.

It is understood that the coldness of the night when the Roscians played here last week in the agricultural hall, together with the expense of fitting up the building for a theatrical entertainment, expenses that far exceeded the original estimates, are responsible for a loss to the 20,000 club on their effort to raise money for the new folder. As the previous concert only showed a small profit which has been practically wiped out by the subsequent loss, it is now up to the 20,000 club to excogitate new means of raising money for their purposes.

SHERBROOKE — R. Legault, Centramine; J. Chroad, Slocan; C. Macdonald, B. Williams, Shields; H. McNaughton Revelstoke; E. H. Dean, Winnipeg; W. J Johnston, St. John; W. H. Promore, Brandon; C. Housden, F. Word, Nakusp; S. Hobones, Midway; J. Wilson, Vancouver.

Music, good music at that, is a sure business drawing card, the effectiveness of which is daily demonstrated all over the west. The Bodega saloon is leading the fashion locally and has the very best obainable local orchestra on duty every evening from 8 to 11, turning out the latest music of the season. The large crowd attracted is the best evidence that "music pays."

Blow Yourself

to a cake or box of some of these DELICIOUSLY PERFUMED SOAPS, just received at this drug store. They're pure olive and other pure oil soaps and free from alkali. Don't buy alkali soaps that dry up and shrivel the skin and rob the pores of their natural oils. Bad soaps make the complexion pallid and tough as parchment. Buy ours and retain the roseate bloom of youth.

SELLS MORE OF CHAMBERLAIN'S COUGH REMEDY THAN ALL OTHERS PUT TOGETHER

Mr. Thomas George, a merchant of Mt. Elgin, Ont., says: "I have the local agency for Chamberlain's Cough Remedy ever since it was introduced into Canada, and I sell as much of it as I do of all other lines I have on my shelves put together. Of the many dozen sold under guarantee, I have not had one bottle returned. I can personally recommend this medicine as I have used it myself and given it to my children and always with the best results." For sale by all druggists and dealers.

Minard's Liniment Cures Colds, etc.
