Legislative Assembly 19 1908 VICTORIA, B. C. 779

## NIGHT OF RIOT

### Three Are Dead and 75 Have Been Injured

### WRONG NEGRO LYNCHED

**BAD OUTBREAK OF THE RACE WAR AT SPRINGFIELD, ILLINOIS—TROOPS ARE CALLED OUT TO DISPERSE THE CROWD—MANY HOUSES DESTROYED.**

SPRINGFIELD, Aug. 15—Two white men were killed, one negro was lynched 75 persons injured and two score of houses occupied by negroes were burned last night as the result of an attempt of a mob to lynch a negro, who had assaulted a white woman.

After a night of riot, arson and slaughter, the state troops were called out by the governor. One thousand militiamen including three companies from the city and companies from Bloomington, Peoria, Pekin and Pontiac, are parading the streets.

The trouble was brought about by an assault committed yesterday morning by a negro on Mrs. Haltan, a street railway conductor's wife. While the woman slept in her house awaiting the return of her husband, the man broke into the house, dragged her into the rear yard and assaulted her. Before noon George Richardson, a young negro, was arrested by the sheriff and charged with the act. The victim partially identified the prisoner. Crowds quickly gathered about the jail but sheriff Warner's force and the police were able to preserve order until nightfall, but with difficulty.

Shortly after 3 o'clock a successful ruse was worked by the authorities and Richardson was spirited away to safety. A false run by the fire department temporarily drew the attention of the crowd during which the negro was hurried down the adjoining alley and at the first corner was pushed into an automobile owned by Harry Loper, a restaurant keeper, who had been sworn in as a deputy sheriff.

Before the crowd realized what had happened Richardson was being rushed to a point north of the city where a Chicago and Alton train was stopped and he was put on board with a heavy guard, and conveyed to Bloomington and later was taken to Peoria, along with Mrs. Richardson and Joseph Anes, a negro prisoner in the county jail, who is accused of killing a clergyman named Ballard, a mint inspector, after attempting an assault upon Ballard's daughter. Ballard went to his daughter's rescue and was stabbed to death.

After the darkness had gathered the crowds assembled in the vicinity of the county jail. The mood of the mob was ugly and the appeals by the sheriff were without effect. The sheriff offered to let a committee from the crowd search the jail, assuring them that both negroes were gone.

"We will all go through," shouted someone in the crowd and the cry was taken up by hundreds. Then someone in the crowd mentioned that Harry Loper, the restaurant man had furnished the automobile in which the escape of the prisoners had been effected.

"On to Loper's," they shouted and by this time the maddened mob was ready for anything. A rush was made upon the restaurant, five blocks away. The proprietor was warned, but failing to appreciate the seriousness of the situation, did not attempt to escape until the mob was upon the place. He was rushed by the employees of the place, together with his wife, into a basement room for temporary safety. Short work was made of the restaurant. It was quickly turned upside down and fire was set to the building. The fire department which had been called out a half dozen times in an effort to disperse the crowds, again made a run to the restaurant, but was powerless. Every line of hose that was stretched was cut before a stream could be forced into it. The restaurant was stripped clean by the mob which destroyed without leniency until its work was nearly completed.

The local company of militia, consisting of a company of infantry and a troop of cavalry and a gatling gun which had been ordered out by the governor early in the afternoon, was busy near the jail and the local authorities had no men to spare for the Loper place, finally in a desperate effort to restore order the cavalry troop was despatched to the restaurant. Then the rioting broke loose and shots were fired and the air was full of missiles. Many fell in the melee and it was here that Louis Johnson met his death. After the mob had moved to other scenes, Johnson's body was picked up in the rear of the restaurant. After nothing of the restaurant remained, a rush was made for the levee, which is usually populated with negroes, but most of the mhad disappeared. Attacks were made upon several store buildings in which it was believed negroes had been hidden. Entrance was forced to these places and stocks of merchandise was turned topsy turvy in the search for the refugees. Shortly before midnight the mob broke into Fishman's pawn shop and secured a number of rifles, shot guns, revolvers and ammunition. With these they armed themselves and started to march the streets in control of the situation.

"Stand back, gentlemen, or I'll shoot every one of you who touches this man," were the words of Eugene W. Chafin, prohibition candidate for president, who faced a mob that had attacked a negro while Mr. Chafin was delivering an address on the East Side last night. For his act Chafin was struck on the side of the face with a brick hurled by a member of the mob. Chafin was well along in his speech when a negro, pursued by a mob, came toward the speaker, from Fifth avenue and Washington street, where he had been pulled from a street car. The mob closed in on the negro and had him on the ground beating him with their fists and clubs. The negro finally got away and jumped on the platform. It was at this time that Mr. Chafin stepped to the front and threatened to shoot any one who touched the negro. Mr. Chafin's threat had the desired effect, although he had no weapon.

During the fight the negro pulled a knife and slashed several white men. Mr. Chafin was not seriously injured but James Scott was struck by a stray bullet and almost instantly killeid.

After burning many houses in the negro quarter the mob, which became more desperate as the night passed, finally gratified its thirst for blood this morning about 3 o'clock when a negro, Charles Hunter, was lynched at the corner of 12th and Madison streets, right in the heart of the so called "bad lands." Troops arrived at the scene too late to prevent the lynching. Some members of the mob declared that the negro lynched had shot two white men. They said that in a fight with the whites the negro was forced into a corner at the saloon and grocery store on the corner of 12th and Madison streets. When retreat was cut off, the negro is said to have opened fire wounding two men and then came the cry "get the rope." All the members of the mob eagerly took up the cry. The negro was caught and dragged to the street. Here he was beaten and shot five times and then a rope was swung around his neck and the other end of the rope was thrown over a limb of a tree in the front of the store and he was swung high off the ground. He was dead in a few minutes. After riddling the body with bullets, the mob commenced to dance around the tree.

At this point a company of troops from Decatur arrived and commenced firing, causing the rioters to disperse in a hurry. By daylight the streets had been deserted and the troops were in control of the situation.

Harry T. Loper, owner of the restaurant destroyed said: "I have been through a riot in Cincinnati in 1892, the greatest in this country, when 100 men were killed. It was to avoid loss of life that I took these men out of town. I did not favor the men; I have no interest in them whatever and would go just as far to punish them as anybody, but after going through the Cincinnati riot and knowing the sheriff as I do, I knew he would be killed before he would let the jail be taken. I thought I would save lives by removing the colored men. I would not shoot a single man to protect my place, and I only shot into the crowd when in personal danger myself."

SPRINGFIELD, Aug. 15—The second lynching of the Springfield riot, according to a report to the police, occurred at Spring and Edward streets tonight. A negro whose name is said to be Parks, was strung up to a telephone pole by a mob of such proportions that the firemen and the police who responded to the first alarm were unable to handle it. Reinforceemnts of troops were sent for.

Another disturbance took place in front of the state armory where a crowd gathered and threatened to storm the building wherein were housed a number of negro refugees. Company L of the 4th infantry and troop B of the cavalry were sent to the place, charged the mob with bayonets and dispersed it. This affair was simultaneous with the lynching of Parks, four blocks away.

The negro lynched tonight has been identified as William Donegon, 80 years of age. The outrage occurred at a place within two blocks of the state capital. Governor Doneen was in his office and at once ordered the troops to scatter the crowd at all hazards. The mob broke before the cavalry.

SPRINGFIELD, Ill., Aug. 15.—Governor Deenen tonight, on a report from Gen. Young that sufficient troops were not at hand, ordered out the Second regiment, of the national guard and commanded the Seventh regiment to hold itself in readiness for a call. Both are Chicago regiments.

**Coast Lacrosse**

VANCOUVER, Aug. 15.—No lacrosse games in British Columbia today.

### WINNIPEG SITUATION

**Fifty-Two Japanese Now at Work in C. P. R. Repair Shops**

WINNIPEG, Aug. 15—Nothing startling has developed so far as the mechanics' strike, which has resolved itself into an endurance test, the company endeavoring to fill up vacancies with nonunion labor, while the men await what they claim must be the inevitable breakdown of the system when the engines begin to go to the bad after the unskilled handling they say they are receiving in the shops all through the west.

A party of Japanese from Vancouver, arrived yesterday and were put work in the local shops, where they, with other strike breakers, who now include 50 from south of the boundary, are housed and fed.

The strikers have erected posts of observation and keep continual tab on what is going on. They claim the yards are fast filling up with cars needing repair. The company apparently is handling the situation successfully so far as Moose Jaw, Calgary and intermediate points are concerned.

There are now 52 Japs employed in Winnipeg in the places of the strikers, the additional number being regular porters who have been detained in the city several days to clean coaches. There are 27 of these and they are making their headquarters temporarily in the large basement room of the depot set apart for immigrants. Twenty-one cars were brought to Winnipeg yesterday for repairs and the tracks set apart for damaged cars are filling up. Some engines have also been set apart for repairs.

### ALL TO THEMSELVES

**Lipton Cup Yacht Series Sailed at Chicago**

CHICAGO, Aug. 15—The largest fleet of 21-foot cabin yachts that has yet sailed for the Lipton trophy, started in the initial race of the 1908 series today. Eleven of the twelve entries were on hand for the contest, although up to the last few hours it was doubtful if the little Shamrock would be taken across the starting line.

The Spite, entered by the Detroit club, failed to appear for the race, leaving the Cleveland candidate of the Cleveland Yacht club, the only out of town entry. A possible exception is La Rita II., which sailed last year as the Raven, under the Royal Hamilton yacht club colors. The yachts sail twice over a sourse following the lines of an equilateral triangle, whose sides are two miles in length, or 12 miles altogether.

### COME TO GRIEF

**Dirigible Balloon Experiments at Farnsborough**

FARNSBOROUGH, Aug. 15—The British army dirigible balloon came to grief this afternoon upon returning here after an ascension. The ship had just landed when the wind caught it broadside and overturned it. Col. Capper, commandant of the balloon school at Aldershot, and Capt. F. S. Cody, an American inventor, managed to jump out of the car uninjured but the balloon was badly torn and the propellor damaged before the troops were able to capture it. When the ship had been secured Col. Capper and his assistants set to work and in a couple of hours the damage was repaired. The airship subsequently made another trip of about 20 miles with and against the wind, during which flight it behaved well.

## C. P. R. ISSUES NOTICE

**WILL ENGAGE NEW MEN ON AND AFTER TUESDAY**

**THE COMPANY MAY ABANDON ALL OLD EMPLOYEES**

(C. P. R. Dispatch.)

MONTREAL, Aug. 15—The strike of the C.P.R. machinists, boilermakers, blacksmiths and carmen, who refused to accept the award of the arbitrators appointed by the Canadian government to whom they had appealed, will have lasted a fortnight next Tuesday. The company has hitherto followed a conciliatory policy preferring to retain its old employees and give the men every opportunity to return to work, but a number of them not having done so, a notice was issued by the company today that on Tuesday next it will engage skilled labor to fill the vacancies and that offices will be opened in all Canadian cities for that purpose.

### FULFILLS ALL TESTS

**Baldwin Aairship Comes Up to Requirements**

WASHINGTON, Aug. 15.—Like a demon from the skies, its motor spitting fire and its long grey gas bag outlined against the dark sky of the night, the Baldwin airship landed in Fort Meyer tonight after a flight which broke all records for aerial navigation in this country. For two hours and five minutes the big military dirigible, built for the United States army, flew back and forth over a course five miles in length in official endurance time.

The airship is now the property of the signal corps of the United States army, a few formalities only remaining to be gone through with before being turned over to the corps. The board of signal officers who have commanded the tests were elated over today's showing. The airship has successfully withstood every test required of it by the terms of the contract between the government and Capt. T. S. Baldwin.

### MORE UNWRITTEN LAW

**Man Killed for Being Too Attentive to a Lady**

NEW YORK, Aug. 15.—Capt. Peter Conover Hains, U.S.A., son of Brig.-Gen. Peter Conover Hains, U.S.A., retired, fired five shots from a revolver into William E. Annis, of New York, owner and publisher of the Burr McIntosh Monthly and other publications, late today on the landing stage of the Bayside Yacht club, Flushing L. I.

Annis, whom Capt. Hain's brother had accused of having been improperly attentive to the captain's wife, died in the Flushing hospital a few hours after the shooting. A crowd of gally dressed women and yachtsmen, among whom was Mrs. Annis, witnessed the tragedy.

**Ashore in the Sound**

VICTORIA, Aug. 15.—Wireless messages from the U. S. steamship Colorado interpreted here report that the cruiser is ashore near Double Point. Fog, encountered between Port Townsend and Seattle, was responsible for her grounding. The cruiser is not making water and expects to be floated at high water. Telegrams have been sent to Bremerton from the Colorado asking that the tug Naujo be sent to her assistance.

**Canadian Entries**

SPRINGFIELD, Mass., Aug. 15.—At the annual meeting last night the association adopted an amendment providing that no entry for a regatta shall be accepted from Canada unless the club of the applicant is affiliated or endorsed by the Canadian or Maritime Assication of Amateur Oarsmen.

## STEADY WORK

### Goes on All Over the Mining District

### SITUATION NEVER BETTER

**SHIPMENTS FOR THE YEAR HEAVIER THAN WAS THE CASE AT THE SAME PERIOD IN 1907—FOUNDATIONS OF INDUSTRY ARE WELL LAID.**

Despite the fact that the Boundary Falls and the Greenwood smelters were practically shut down for six months of the current year and that the former is behind some 80,000 tons and the latter about 110,000 tons of the tonnage which they had received up to the middle of August, 1907; despite the low prices of metals, especially lead, which has cut down the shipments over the same periods, January to August, 1907 and January to August, 1908, about 20,000 tons from the mines of the districts other than those of Rossland and the Boundary, yet, for all that, the total output for the year is 50,000 tons in excess of that which it was in the middle of August, 1907.

The mills of the districts are putting out about the same quantity of concentrates as was the cast in 1907, the lead shipments, alone are curtailed as are also the output of dry ores. The Rossland camp is in about the same condition as it was a year ago and the increase has therefore come from the Granby mines and also in lesser degrees from other properties, notably the St. Eugene, which is shipping nearly 30 per cent more than was the case a year ago.

Since 1907 there has been a very large increase of equipment in all of the Boundary smelters. The B. C. Copper has almost doubled its capacity and the Granby is still largely increasing its ability to treat the low grade ores of the Boundary. The Dominion Copper company is not in quite as good a position, but it has started a series of improvements which will be finished at a later date and which are designed to bring this smelter on a par with the other reduction works of the Boundary country. When the improvements at the Granby are finished that smelter will have a capacity of over 25,000 tons weekly.

In a similar manner Trail is improving its plant and a big copper furnace is to be added to those already in operation so as to permit it to take the ore of the Snowshoe. So far this year the Snowshoe has not contributed a ton to the output although at this period in 1907 its tonnage was nearly 50,000.

The low market, the fact that the consumption in Canada, a consumption which is not fed wholly by Canadian mines, is far less than the production, have not militated towards the sending out of large tonnages in lead ores. There was not the incentive to do so. For all that, as it is generally believed that lead, with copper, is bound to rise, there has been a marked increase in the number of properties working and in the amount of capital that is being invested. When the time comes there will be many a property which today is marking time, is merely developing and sending out only that ore which is met with in development, which will be in a position to take advantage of the better prices, which are the hope and trust of the mining men of the Kootenay today. Moreover, it is confidently anticipated that the new treatment of zinc will prove to be a success and mines which have had so large a percentage of zinc, penalized in the lead stacks, as to overcome the value of the lead ore to such a degree that the margin of profit has been swept away, will be addded to the shipping list, the penalized zinc being converted into a source of profit.

Another marked development is that of the quartz properties, free milling gold. This branch of the mining industry has taken upon itself a new lease of life, largely due to the discoveries and strikes upon the mines in the districts between Nelson and the international boundary line.

Again, in such mines as the Blue Bell, Vancouver, Hewitt, Standard, Richmond-Eureka and some others, there has been inaugurated the same system which has proved so profitable in the low grade Boundary country, but is practically applied for the first time in the lead-silver districts and that is the system of developing a mine on such a scale that a profit is yielded even where the value of the ore is comparatively low and so that development is ever in advance of shipments in order that there shall come no time when the property is unable by its shipments to pay for the ahead development work which is necessary to make the history of operations a continuous story.

Altogether, despite the low price of metals, there was never a period in the history of the mining districts of this part of the province when hopes were brighter and more justifiably so.

The shipments from the various mines and receipts at the smelters for the past week and year to date were:

BOUNDARY SHIPMENTS

| Mine | Week | Year |
|---|---|---|
| Granby | 16,039 | 656,605 |
| Mother Lode | 10,191 | 99,225 |
| Oro Denoro | 3,450 | 32,788 |

The total smelter receipts for the week were 39,255 tons and for the year to date 1,024,573.

**Eastern Lacrosse Yesterday**

At Toronto—Montreal 7, Toronto 2.
At Cornwall—Cornwall 6, Shamrocks 4.
At Montreal—Tecumsehs 11, Nationals 6.

### SWIMMING CHAMPIONSHIP

**Won at Winnipeg by W. J. Owens in Good Time**

WINNIPEG, Aug. 15.—Swimming in splendid style, with the current, from the River park boathouse to the Norwood bridge, and finishing ahead of 26 other competitors, W. J. Owens becomes the first holder of the Bielchoyski cup, emblematic of the championship of Manitoba. The course has not been measured, but it is certainly over four miles, owing to the many bends. His time of 1:23:7 must be considered as remarkably good. C. R. Logan, a member of the 18th Mounted Rifles, crossed the line only seven seconds later. G. E. Smith was third.

## TRICKED BY MAIL CLERK

**DARING HOLDUP BY SPOKANE ROBBERS**

**SPLIT UP A TRAIN WITHIN HAIL OF THE CITY**

SPOKANE, Aug. 15—One of the most daring holdups ever attempted on a transcontinental train, befell Northern Pacific train No. 3, almost within the city limits of Spokane, after midnight last night.

Two masked men stopped the train at Otis and boarded the engine. After a brief encounter with the engineer and fireman, the mail car next to the engne, was detached and one of the men taking charge of the engine, the party came on west to Trent, where the trainmen were dismissed by the robbers.

The bandits then proceeded to within half a mile of Yardley where they robbed the mail car. The baggage car and the express car were untouched and none of the passengers were molested.

As soon as word was received at Spokane a special train was made up, consisting of a switch engine and a coach, and with several deputy sheriffs and special agents of the Northern Pacific, was rushed to Trent. Shortly afterwards a complete posse, headed by sheriff Doake, who had not been notified in time to catch the first special train, started out to scour the country.

Tricked by the wit of the mail clerk, little plunder is believed to have been secured by the two masked men.

Warned that the robbers were coming, the clerks took advantage of the time after the train had been cut in two, and threw the local registered packages into a newspaper sack, where they were not noticed. So far as reported the only booty stolen was the pouch of registered mail sent from Chicago to Spokane and one for Seattle made up along the route. The train is not known to have carried packages of any great value.

### MISS POVAH'S DEATH

**Sister of Frank Povah Formerly of Hall Mines Smelter Staff**

The sad intelligence of the death of his daughter came to John S. Povah, a pioneer resident of Vancouver last Saturday evening during his perusal of the report in the Province of the burning of the steamer Premier at Warren's Landing at the northern end of lake Winnipeg last Thursday morning, a catastrophe involving the death of eight persons. Mr. Povah's daughter was Miss Mary Elizabeth Povah, a Winnipeg school teacher. She was 35 years of age and was on a vacation trip when burned to death in the fire which consumed the steamer. The suddenness of the news, coupled with the tragic manner of his daughter's death, greatly distressed Mr. Povah, who is 84 years of age, though exceedingly active for a man of his years. Other relatives of the deceased in the west are Wm. Povah of the government service at Dawson and Frank Povah, accountant of the International Coal & Coke Co., Coleman, Alta. They are brothers. A half sister of the deceased is Mrs. Campbell of Milton, Ont.

Frank Povah for a long time was an employee in the office of the Hall Mines smelter and while in Nelson was one of the local crack oarsmen.

### IN THE CENT BELT

**Man Loses His Life Rather Than Pay a Nickel**

NEW YORK, Aug. 15.—In an effort to escape paying five cents for a ride in the subway, a man believed to have been Edwin J. Maher, was killed early today near Franklin street on the express track of the underground road. According to the story told by the ticket agent, Maher darted past the ticket chopper without putting a ticket in the box and hurried to the end of the platform.

When pursued by the ticket chopper, the man leaped from the platform and dashed through the tube and disappeared in the darkness. Later both ticket agent and chopper started on a search with lanterns for the missing man. A short distance from Franklin street they found his body, horribly crushed, on the north track. He was still breathing when found but died soon after reaching the hospital. The police arrested the ticket agent.

### SUSPICIOUS CIRCUMSTANCES

**Murder of a Saloon Keeper Attributed to His Wife**

CHICAGO, Aug. 15.—Anthony Thomson, a saloon keeper at North Forty-Second street and West Chicago avenue, was found dead behind his bar last night with a bullet in his head. A revolver, said to have belonged to him, was found lying near the body. His widow told the police that after the shot was fired she saw two men run from the front door. No one else saw the fleeing men. Acording to the police, the saloon keeper and his wife had several quarrels recently. Mrs. Thomson said that as soon as she knew that her husband was shot she ran to the home of her brother, who lives two blocks from the saloon. The cash drawer in the saloon had not been disturbed. Furman, Mrs. Thomson's brother, was arrested, and Mrs. Thomson placed under guard at her home.

### ANGELS ARE CHAMPIONS

**Brandon Wins the Professional Baseball Pennant**

BRANDON, Man., Aug. 15.—The news that the Brandon ball team had won the pennant of the Northern Baseball league was received here with a great deal of enthusiasm and satisfaction. The first intimation that the Brandonites had that the Angels had been awarded the championship and flag was given out last night while the crowd was listening to the elections news, and the goods news put everybody in the best of good humor. The citizens are proud of having won the pennant the first year they broke into professional baseball.

### KEIR HARDIE

**Will Try and Unite American and Canadian Labor**

GLASGOW, Aug. 15.—James Keir Hardie, socialist member of the house of commons, left here today on board the steamer Hesperian for Canada and the United States. The object of Mr. Hardie's tour is to try to amalgamate the American and Canadian trades unionists and socialists into one political organization, like the British labor party.

### MONTREAL DEFEATS TORONTO

**Lacrosse Players of Queen City Wake Up Too Late**

MONTREAL, Aug. 15.—In a fair exhibition of lacrosse, Montreal, defeated Toronto by 7 to 2 in a league game this afternoon. The weather was beautiful and cool and made an ideal day for lacrosse but neither team seemed to exert themselves, especially the Torontos, who only woke up in the last quarter. Montreal played fast, and after securing the lead, played slowly but carefully.

**Another Win**

(Special to The Daily News.)
Baseball at Spokane—Aug. 15.—Vancouver 8, Spokane 4.

**Zeppelin's Airship**

FRIEDERICHSAVEN, Aug. 15.—Count Zeppelin has decided to manufacture the material for the construction of his new airship at his own works, and to this end he is negotiating for an extensive tract of land close to the railroad, upon which he will erect plants for the making of hydrogen gas, aluminium and probably balloon cloth.

**Miners Out on Strike**

ZANESVILLE, Ohio, Aug. 15.—Failing to agree after an all-night session with representatives of the operators 2500 miners, the force employed in the Crooksfield district, struck today.

## LATEST POLLS

### Election Issue Possibly Is Doubtful

### LIBERALS HAVE MAJORITY

**BUT WALTER SCOTT WILL HAVE MUCH WEAKENED PARTY WITH WHICH TO MEET A CONFIDENT AND LARGELY INCREASED OPPOSITION.**

(Special to The Daily News.)

WINNIPEG, Aug. 15.—In Saskatchewan estimates last night both parties claimed Moose Jaw county and Saskatoon county, but the latest returns indicate they will be divided. In the former, Dorrell, conservative, leads by 128 on 32 polls, with 13 polls to hear from. Sutherland, liberal, has 39 of a majority in Saskatoon county with one poll to hear from and is certainly elected.

REGINA, Sask., Aug. 15.—At 7 o'clock this morning incomplete returns indicate that the liberals have 19 seats and Provincial Rights men 17 seats, with four not heard from and one to be held later.

Premier Scott carried Swift Current, a new constituency, by about 100 majority, but returns are far from complete.

Hon. J. A. Calder is likely defeated in Milestone and Hon. W. R. Motherwell's defeat is conceded in North Qu'Appelle.

Hon. A. Turgeon was defeated in Prince Albert city, but carried Duck Lake by about 75 of a majority.

With returns still incomplete, the Provincial Rights party carry 17 seats, including South Qu'Apelle, Regina county, by 400 majority; Pipestone, Moose Jaw city, Prince Albert city, North Qu'Appelle, Maple Creek, Souris, Moose Mountain and probably Milestone.

The following is the situation in the constituencies as they stand now:

Hanley—Nine pol's give McNeil, Lib., 63 majority.

Maple Creek—A. Wylie, Provincial Rights, 175 majority.

South Qu'Appelle—The returns give Mr. Haultain, from 136 polls, 270 majority.

North Qu'Appelle—140 polls give J. A. McDonald, Prov. Rts., 115 majority over Hon. W. R. Motherwell.

Moose Jaw—J. H. Wellington, Prov. Rts., 31 majority.

Yorkton—15 out of 19 polls give Carry, Lib., 207 of a majority and his election is conceded.

Cannington—18 polls out of 22 give J. D. Stewart, Lib., 166 majority.

Moose Jaw county—Incomplete returns give Dorrell, prov. Rts., 46 majority; the seat is still in doubt.

Rosthern—Ens, Lib., has 188 majority, with two polls to be heard from.

South Battleford—Incomplete returns give S. Simpson, Lib., 197 majority.

Lloydminister—Incomplete returns give W. H. Miles, Prov. Rts., 90 majority.

Weyburn—Incomplete returns give G. Reischel, Prov. Rts., 66 majority.

Phesant Mills—12 poll's give H. W. Willway, Prov. Rts., 130 majority.

Redberry—Incomplete returns give C. P. Evans, Prov. Rts., 18 majority.

Regina county—F. C. Tate, Prov. Rts., by over 400 majority; his opponent R. Sinton, will lose his deposit.

Saskatoon city—A. P. McNab, Lib. 77 majority.

Saskatoon county—Four polls to hear from;; Summerfield, Prov. Rts., has a lead of 29.

WINNIPEG, Aug. 15.—Twenty to 16 in favor of the government is the result in Saskatchewan so far as can be ascertained tonight.

REGINA, Aug. 15.—From the returns now in, the liberals apparently have 19 seats and the Provincial Righters 16, with five returns incomplete and in doubt.

In Weyburn there was no vote in one poll and they may have to hold a new election.

The last returns from Lloydminster give Miles, conservative, 20 majority.

The last returns from Weyburn give Mitchell, liberal, 23 majority and one poll out.

In Hanley, McNeil, liberal, has 31 majority and six polls out.

Sutherland, liberal, in Saskatoon county, has finally 13 of a majority.

### TECUMSEHS DEFEAT NATIONALS

**Indians Win by a Score of 11 Goals to 6**

HANLAN'S ISLAND, Toronto, Aug. 15.—The Tecumsehs and Nationals played here today in a league match. The weather was pleasant and there was a moderate sized crowd of spectators. The game was well contested throughout, but through superior, or luckier, shots on goal the Indians scored 11 against 6 secured by the Nationals.

### DALY FOR BRANDON

**Rumor That Popular P. M. Will Contest Wheat City for Conservatives**

BRANDON, Aug. 15—The rumor is being circulated that T. M. Daly, police magistrate in Winnipeg, will be the conservative candidate in the coming federal elections. No confirmation of the statement can be obtained but in the opinion of several prominent conservatives, Mr. Daly will receive the nomination.

## NEW YORK FASHION LETTER

NEW YORK, Aug. 15—While most of our fashions today are simply the modification of last season's modes, a new note was struck last winter, and though known centuries ago, goes only to show the old saw true, that "there is nothing new under the sun." The new fashion called the Greek tunic movement, was invented by those lovers of graceful lines artistic effects and symphonic wholes which makes even today the word Grecian something to conjure with. But whereas modern life is not Greek life, the Parisian, the Greek's true descendant in matters relating to artistic dress, has adapted the old into a suitable new. It is doubtful if Penelope or Helen would recognize their own costumes under the Parisian innovation, but the Greek line is there and the new name Greco-Parisian has been well given.

From Paris comes the news that these gowns are to be worn in the daytime as frequently as in the evening for receptions and dinners. The difference lies not so much in the cut as in the combination of materials, choice of color and manner of finish. Of course the Greek or tunic costume as it is sometimes called, will always be a dressy creation.

There are certain changes that must be made in the tunic costume for the same drapery will not improve the short figure that will look well on the woman of height; but where surplus cloth must be avoided, many tunic effects are gained by means of bands, folds or braidings. A second point that must be avoided is the position of the point; One woman must wear the drapery with the point directly in the center of the front and near the feet; another must have the points on each side with the drapery *opening over the front and showing the* underskirt. Again, the waistline—a thing hardly perceptible in a pure Greek costume—must fall or rise according to figure.

Of materials best suited to the new mode, are the crepe de chines, soft silks, veilings, muslins, indeed, all fabrics that fall easily in graceful lines and cling closely to the figure. For walking, carriage wear, etc., the tunic effects are suggested by bands, for the heavier or more wiry materials do not lend themselves easily to draperies.

The line of trimmings that is most generally becoming dips towards the front and rises on the sides, giving a slight plaited tunic that opens ether abruptly or slightly over the left side is worn by many with good effect.

Many of the waists of these modes carry out the drapery idea, the surplice, folds across the bust drawn across from one shoulder to some point according to fancy and becomingness; but the classic fold must be used in some fashion to get the tout ensemble effect for, who would care to see a jumper waist with a crepe de chine skirt in the Greek mode.

A new chiffon weight broadcloth is most popular in Paris for the development of the tunic skirt, and while broadcloth sounds heavy to us, the new chiffon weights are very light, pliable and soft, and with the advent of autumn days will be more and more used.

Faded tones are much used in the colorings used for the tunic costumes, as they are for the empire and princess dress. Old rose, blonde, Willowy, biscuit, amethyst, dead leaf brown, wedgewood blue and stone grey are some of the names given us, but when seen, except for slight changes, they will be recognized as old favorites.

A costume that carries out the principle of the Greek design, has an underskirt in two pieces with a seam in the center front and a habit back. The over drapery is joined to the skirt proper down the right side under a fold of silk and from the front rises to half way up the left side where it is joined to the left side under the silk fold which has continued around the bottom edge. As the drapery is cut closely about the hips but with sufficient flare at the bottom, the whole effect is one of graceful folds.

The Greek influence is particularly well exemplified n the soft lines and drapery of the wa'st. Cut in three pieces, back, two fronts cut in one with sleeves which are mere Japanese bands slashed on the top. The top of the fronts and the back are cut in deep points and the fronts are draped and drawn down under the shaped girdle in surplice style. The under blouse is of lace. Silk folds to match those on the skirt outline all edges on the waist.

For the woman who cannot wear the tunic skirt there is a new model with an applied effect obtained by the deep band of contrasting material, or better still, of the same goods as the skirt, for a contrast in materials always detracts from height. The skirt has a sheath like adjustment but flares at the bottom to a measurement of five yards. Seventeen narrow gores from the skirt give the effect of long lines. A band trimming outlines the sides of the front panel, and from this the tunic band trimming starts and slopes upward towards the back.

One of the striking features of the new skirts designs is the high waist line. This was exemplified in an old blue chiffon broadcloth . The top of the skirt above the waistline is draped in corsage style, fits closely over the hips and falls in full graceful folds from the knees downward. In the back the center back gore extends over the draped corsage top in double box plaits panel effect. When in sweep length this panel gives a most charming and effective line. The tunic effect may or may not be applied in front.

The bodice is a most attractive affair being laid in folds over the corsage. The U yoke and tight fitting sleeves are of lace. Japanese bands are part of the overwaist and the yoke outline is decorated with bands of oriental embroidery.

Yokes and sleeves of the under blouse are receiving much attention, being inset with fine motiffs of lace or beautifully embroidered or braided. When possible a bit of braiding is applied on nearly every gown on some part of it.

The high crowned hats are becoming extremely popular but unfortunately they bid fair to go to extremes just as the wide brims have done.

A smart blue linen was made quite individual by the addition of piping or real plaid. A plaid using yellow and grey with perhaps a line of black would trim a brown or grey linen effectively.

Silver laces are much used on summer gowns intended for dress occasions. Small medallions, fronts of the bodies and belt sleeve bands will be thus decorated.

All the pongee weaves are favored for tailored summer gowns. Perhaps of all the rajah variety is the most used and particularly well liked for the three piece costume.

A salient feature of all the new walking suits is the vest. They are very smart affairs being the most decorative part of the suit.

Nearly all skirts intended for any occasion other than house or strictly evening wear have coats that may be worn with them at any time.

Plaited skirts are too serviceable to lose favor easily and many varieties are to be seen on the streets. Smart little shoulder wraps are a frequent accompaniment of the dressier of plaited skirts.

CATHERINE MANN-PAYZANT.

## "ONLY MEDICINE THAT DID ME ANY GOOD"

**"Fruit-a-tives" Cured Backache After Doctors Failed Utterly.**

"I have received most wonderful benefit from taking "Fruit-a-tives." I suffered for years from backaches and pain in the head and I consulted doctors and took every remedy obtainable without any relief. Then I began taking "Fruit-a-tives" and this was the only medicine that ever did me any real good. I took several boxes altogether, and now I am entirely well of all my dreadful headaches and backaches. I take "Fruit-a-tives" occasionally still, but I am quite cured of a trouble that was said to be incurable. I give this testimony voluntarily, in order that others who suffer as I suffered may try this wonderful medicine and be cured."

Mrs. Frank Eaton, Frankville, Ont.

Be wise. Profit by Mrs. Eaton's example, and start with "Fruit-a-tives." They will quickly relieve Pain in the Back, and stop Headaches because they keep bowels, kidneys and skin in perfect order and insure the blood being always pure and rich.

"Fruit-a-tives" is now put up in the new 25c trial size as well as the regular 50c boxes. All dealers should have both sizes. If yours does not, write Fruit-a-tives Limited, Ottawa.

## FERNIE'S RFLIEF FUND

FULL STATEMENT OF ACCOUNT TO DATE

DETAILS OF EXPENDITURES AND CASH ON HAND

As announced two days ago by mayor Taylor, a detailed account of the receipts and disbursements in connection with the Nelson Fernie relief fund is published hereunder.

The statement is practically complete and has been audited by W. M. Walker. It is signed by Mr. Walker and by mayor Taylor as chairman, and secretary E. K. Beeston.

Two points should be specially remembered, viz., all goods were supplied at actual cost, no profit being made in any single case, and no charges for services were asked or allowed in any instance.

The amount of subscriptions acknowledged in the published statement, includes the sum of $248 from the city of Salmo, details of which have already been given. This amount will be separately advised to the relief fund committee at Fernie.

The bread furnished by the O. K. bakery has been donated to the fund in lieu of a subscription.

All the carpenter work connected with the fitting up of the pavilion and roller rink was given free as also was all cartage or collecting and shipping donations.

*All food sent to the pavilion was forwarded* onto Fernie and all other goods ordered were returned. The only costs in connection with the fitting up of the pavilion and roller rink was for the lumber which could not be used again.

In addition to the cash disbursed for supplies forwarded a large quantity of cooked food and clothing was given by the citizens and sent to Fernie and Cranbrook.

The following is the official statement above referred to:

RECEIPTS.

| | |
|---|---|
| Amount of subscriptions to date | $5438.45 |
| Less outstanding, unpaid | 275.50 |
| | $5162.95 |
| *Received for coal, etc., returned* | 11.60 |
| Amount received to date | $5174.55 |

The secretary reports that the amount outstanding and unpaid is all "good," and asks those who have not yet paid up to do so at once.

PAYMENTS.

As per vouchers passed by the auditing committee, Messrs. W. Irvine and E. Bailie:

| | |
|---|---|

| D. C. McMorris | 4.85 |
| J. Balding | 5.15 |
| Total | $2709.45 |
| Balance on hand with treasurer of fund | $3465.10 |

*As already announced the mayor proposes to call a public meeting later on to decide on the disposal of the balance of cash on hand.*

**A Faithful Friend**

"I have used Chamberlain's Colic, Cholera and Diarrhoea Remedy since it was first introduced to the public in 1872, and have never found one instance where a cure was not speedily effected by its use. I have been a commercial traveler for eighteen years, and never start out on a trip without this, my faithful friend," says H. S. Nichols of Oakland, Indian Territory. When a man has used a remedy for thirty-five years he knows its value and is competent to speak of it. For sale by all druggists and dealers.

## MASTERY OF THE AIR

### GERMANY TAKING THE LEAD OF ALL NATIONS

### GREAT BRITAIN IS ALARMED AT TURN OF EVENTS

In Germany there is a general desire to amend the famous utterance of the kaiser's: "The future of the Fatherland lies on the water. The hope is that it lies in the air, and that dirigible balloons will supply Germany with a new and terrible instrument of warfare, which will discount the strongest navy on earth. This dawning hope makes intelligible the intense enthusiasm of the German people over the exploits of count Zeppelin. It helps to explain why men and women wept when his great airship was destroyed last week and why a monument will be erected to mark the spot of its loss.

An Aerial Navy league has been formed in Berlin, its purpose to organize a fleet of dirigible balloons, armed and equipped like sea sailing vessels. The German government has acquired all rights in a new aerial torpedo especially adapted for discharge from a balloon. It has little or no recoil, is extremely light, and can be brought into action much more rapidly than field artillery. A cartoon in the Amsterdammer is another straw showing the direction in which the wind of German ambition is blowing. Great Britain, France and Russia are represented as building a huge wall round a tank, over which soars a German airship. Underneath is the inscription: "They may wall him up by land and sea, but they can't hem in the air."

Although the official Koelnische Zeitun gattempts to allay British nervousness by suggesting that German dominion of the air will be no more menacing to England than is British mastery of the sea to Germany, and is designed for protection. A writer in the London Times expresses alarm at the situation. He says that every day we read of some notable aerial feat by a German, a French or an Italian airship, but nothing about a British airship. Germany has five great airships, including the Zeppelin balloon, since destroyed, and France has seven. Italy has two, and Great Britain has only two, namely, the repaired Nulli Secundus, and another craft believed to be its replica.

The Writer regrets the failure of the British government and the British public to see the necessity for keeping abreast with German aeronautics. He considers it an anomaly that the government should spend as much money on experiments on tobacco growing in Ireland as on the balloon department of the army, and though the expenditure is likely to be quadrupled, even £25,000 a year is insufficient. The Times correspondent remarks that once a foreign power has attained supremacy in the air it practically destroys the usefulness of the British navy, for what could a navy do against a foe that could sail overhead, and dump dynamite down on London? Much the same view has been repeatedly expressed by Baden-Powell.

Sir Hiram Maxim, the noted inventor, does not share the fears of the military men, as is indicated by the following interview in the Times:

"Sir Hiram Maxim, in a conversation with a press representative on Saturday, gave as his opinion that the future of aerial navigation lay, not with dirigible balloons, but with aeroplanes. He was very emphatic as to the ultimate fate of all balloon airships and considers that no danger is to be apprehended to this country, notwithstanding all the talk of the progress made in Germany with dirigible balloons. He said that the ultimate conquest of the air required a vast amount of experimental work and investigation, all of which cost money. Therefore, he was of the opinion that the government ought to furnish the sinews of war."

If these dirigible balloons, employed in war, would be as destructive as is supposed, it is likely they would be put in the same class as dum-dum bullets and poisoned water. The laws of civilized warfare would debar them. Or they might be discouraged by treating military aeronauts like spies—liable to hanging. The certainty that any minor mishap to a balloon necessitating a descent to earth would result in the hanging of the areonauts would make volunteers for the work scarce. So that, on the whole, apprehensions such as those voiced in the Times seem a trifle premature.

## PRESS STRIKE COMMENT

### HOW THE EASTERN PAPERS LOOK AT THE SITUATION

### THINK A SETTLEMENT SHOULD BE REACHED

(Toronto News)

It is unfortunate that the conciliation committee failed to effect a settlement of the differences between the Canadian Pacific railway company and its machinists. It is no secret that the committee was unhappily constituted and that with more judicious management a unanimous finding could have been reported. The trouble began with the refusal of the company to renew the old agreement with the machinists. If it was not intended to reduce wages uniformly, it was at least designed to introduce a graded scale which would give a lower remuneration to less efficient workmen.

Here arises the chief grievance under the system of unionism. The union leaders cannot guarantee the efficiency of union labor, and hence the more expert and efficient workmen receive perhaps less than they could earn under free competition, while inferior workmen draw an excessive remuneration for their services. The tendency, however, is to fix wages according to the earning power of the more capable workmen and hence the advantage to the whole body is undoubted. It would be going too far to say that an employing corporation is bound under all circumstances to renew a wage agreement, as it is certain that labor will resist, and will not scruple to use its power to prevent wage reductions. The Lemieux act, therefore, was devised as a means of affording investigation into disputes between employers and employees and of bringing public opinion to bear upon all concerned. Generally the measure has been productive of the best results to labor, to industry and to the general community.

In this case it was at the instance of the workmen that the board of inquiry was appointed. The company objected to the constitution of the committee, as it objected to the proposal that the board should inquire into the conditions on the eastern as well as the western divisions. In both cases, however, the company finally submitted. Again, when the board made its award the company objected to certain of its provisions, but at length accepted the majority report. To this report, however, the representatives of the men would not agree and in order to force acceptance of the minority report, the strike was ordered. It is unfortunate, as has been said, that the report was not unanimous and the differences are so inconsiderable that with more judicious action it should have been easily possible to secure unanimity.

A unanimous report the workmen would hardly have rejected. It is out of the question that the Lemieux act can be employed merely as a club to beat capitalists and companies into submission. But when the differences are so comparatively unimportant it should still be possible for the labor department to intervene and effect a satisfactory adjustment between the company and its workmen. The authorities of the road have not been unaccommodating. They accepted the majority report of a committee to the appointment of which they were opposed and it is certain that the company values good relations with its workmen. On the other hand it is natural that the workmen should hesitate to submit to a finding to which their representative on the board would not agree, and it is easy to understand that they will not readily consent to any loss of wages or privileges which they enjoyed under the old agreement.

There is no reason to think that the Canadian Pacific management is hostile to organized labor. Indeed, the notion prevails that the company has taken pride in its good relations with its workmen and has maintained as a settled policy that its scale of wages should never fall below those of its rivals. In face of this fact and the action of the company in accepting the majority report of a board of inquiry on which it was not directly represented, it seems reasonable to conclude that terms of compromise should even now be easily arranged by the labor department, or some other independent agency and the country saved from the desperate inconveniences and the enormous losses which must follow any serious prolongation of the strike now in progress.

(Hamilton Herald)

It is asserted in behalf of the C.P.R. striking mechanics that the company is bent on disrupting their labor organizations, and that it was necessary for them to strike in order to save their organizations from extinction.

If that were the issue involved in this industrial dispute—the right of the men to organize themselves into labor unions, it would be an easy matter to decide as to the merits of the dispute. Justice and right would in such a case be clearly on the side of the strikers.

No evidence, however, has been produced to substantiate the charge made against the company. So far as the general public knows, the charge rests upon mere assertion. And it is only fair to state that responsible officials of the company declare that the C.P.R. has no desire or intention to interfere with the rights of any class of its employees to organize, and is not antagonistic to trade unionism either in principle or practce.

Public opinion is not likely to be affected much by mere assertion. If the C.P.R. company is endeavoring to break up the railway men's organizations, it ought to be possible to produce evidence to that effect; and if the evidence can be produced, it ought to be.

## SASKATCHEWAN ELECTIONS

The returns from the Saskatchewan elections, held on Friday last, received up to the time of going to press this morning are still incomplete in many of the constituencies but are sufficiently definite to disclose the undoubted fact that the liberal party in the province and the federal authorities at Ottawa, at whose instigation it is asserted this appeal to the electors was so hurriedly and irregularly made, have both received a severe rebuke and whatever the final outcome may be, it is quite clear that sir Wilfrid Laurier will be unable to see anything but a marked revolt against his administration through still another province, Ontario and New Brunswick having already declared against the liberal party.

As a result of the Saskatchewan elections, conservatives throughout the dominion, especially in the west, will go on preparing for the approaching federal contest with increased assurance of victory. The writing on the wall is plain enough for anyone who cares to read it.

## SUMMER HOLIDAYS

In a short time now the pleasant summer afternoons will be over for the season and the most should be made of the holiday opportunities before September arrives with its return to the more exacting calls of business affairs. This year Nelson people have patronized every excursion along the lake in greater numbers than ever before and launching and boating have grown rapidly in public favor, compared to the fashion in vogue a few short years ago. There is plenty of room for a further advance in making the most of the opportunities offered by as fine a sheet of water as can be found on the North American continent for rowing, canoeing and launching. On Wednesday next another regatta will come off in addition to the now popular weekly launch race and an appeal is made for a large turnout of the motor boats, as arrangements have been made to take several photographs, to be later used for advertising purposes. It is sometimes a little difficult to get people to turn out as a combination but in order that the summer situation here may be readily translated to outsiders by means of well selected photographs, every local launch owner should make a point of getting into one or more of the pictures that are to be taken. Photographs of the local fleet, if really representatives ones are obtained, will most excellently illustrate one very pleasant phase of life in Nelson, and cannot fail to picture this city as a most desirable resdential centre to outsiders who may think of coming west.

In the prairie country whole communities some times go in for a week's holiday and while that is not desirable here there seems no good reason why we should not utilize one of the last two civic half-holidays in this month by a general outing to some given point on the lake. The program might include beside a basket picnic, games of all sorts, including water sports, the attendance of the city band and an illuminated boat parade with fireworks to finsh up with. All that is wanted is for say a committee of launch owners, to start the ball rolling, call the affair the annual launch club outing, and invite all hands to join in. The steamer Moyie might be chartered for the occasion and if the matter is taken up in the right spirit the summer season might be brought to a close with a most enjoyable outing in which nearly everyone could have a share in.

## EDITORIAL NOTES

Fruit inspector Maxwell Smith at Vancouver and Capt. D. C. McMorris in this city, both take strong exception to C.P.R. freight traffic manager Lanigan's published views on the average price asked for fruit lands in British Columbia, Mr. Lanigan having said that in his opinion the price asked was excessive. The statements quoted by Capt. McMorris from provincial assessor Lucas, and the figures given by Maxwell Smith, all of which have been published in these columns, appear to answer Mr. Lanigan's strictures satisfactorily and completely. Mr. Roy Brock went into the matter early in the season, shortly after his arrival here, to take up his official duties as secretary of the Kootenay Fruit Growers' association, and the figures he then gave agree with the views now given by Capt. McMorris and Mr. Smith.

There is in many quarters a disposition to quarrel with organized labor, and to condemn the tenacity of the unions in defence of their interests. But it is useless to deny that organization of labor is necessary to the maintenance of wages and the guranatee of satisfactory conditions of employment. The whole tendency of the age is toward shorter hours of labor and higher wages and it is well that it is so. It has been said that the ideal division of time is eight hours for work, eight hours for recreation and eight hours for rest. Towards that condition we are steadily moving. It has been settled that political power shall be exercised by the masses. From this judgment there can be no appeal. It is impossible to turn backward and re-establish government by any exclusive element of the population. With the change in the balance of executive power, the condition of the people becomes the supreme question for governments. It is inconceivable that millions of the race shall forever sicken in misery and poverty, that the slum and the sweat shop shall forever fester in our civilization, that labor shall be the only portion of multitudes of mankind. The whole attention of the times is centered on social problems, and nothing is more certain than that, with every passing generation, the masses will secure a material improvement in working conditions.—Toronto News.

# OFFICIAL STATEMENTS

## ECHOES OF BRITISH OLYMPIC SPORTS

### INTERNATIONAL CODE OF RULES IS WANTED

LONDON, Aug. 16—Theodore Cook, a member of the British Olympic council, has sent a communication to the newspapers of London stating as the criticisms from America on the 400 meter race at the Olympic games, appear to be based on an ignorance of facts, he has deemed it advisable to give the exacts on which the decision was based. He then gives the statement of the various officials of the amateur athletic association which acted as starters, umpires, etc., and the evidence presented at the enquiry after the race, showing that all the starters in the race were warned at the start that watchers had been placed around the track and that any wilful jostling would result in the race being declared off.

Mr. Cook continuing, says: "The only question that can be raised is whether the Olympic games were held under the American or English rules. All I can says is that after our experiences with what the American code appears to permit, no English athlete is likely to accept it as a fair basis for international-competition."

**2 in 1 SHOE POLISH**

204

Commenting on Mr. Cook's statement, Sporting Life insists that it is necessary to compile for future Olympics a complete detailed code of regulations, covering every branch of sports after consulting all constituent countries that are to send contenders. The paper says that Mr. Cook's argument, that everything possible had been done, fails to meet the case ,because the published rules issued to the competitors in the Olympiad in numerous instances were not sufficiently explicit to cover many incidents which occur during the game. Sporting Life urges the British Olympic council to initiate a movement for international rules by frank and free discussion with foreign countres and with an absence of a desire to press English rules.

## EMPRESS OF CHINA

### Reaches Victoria With Rich Cargo—Late News by Mail of Japan

VICTORIA, Aug. 15—After escaping the disastrous typhoon at Hongkong by scarcely more than a day and experiencing good weather throughout her voyage until fog banks delayed her off Vancouver island, the Empress of China reached port tonight with 62 saloon passengers, 51 second class and 364 Chinese steerage passengers of whom 52 debarked at this port.

The cargo included raw silk and silk goods valued at a million and a quarter dollars .

While testing the comparative carrying of war stores by automobiles and horse carriage, a party of Japanese officers were severly injured near Fukushima while bound from Tokio to the north of Japan. The driver lost control of the auto whch collided with a fire station and afterward with a train at a nearby station.

Further advices regarding the sentence to death of six sealers of the seized Japanese sealing schooner Miei Maru at Nicolaiefski, brought by the Empress of China tonight, show that the 36 Japanese sealers who were arrested for poaching at Sopper island seal rookeries, attacked the Russian guards during the journey from Vladivostock several being wounded on either side. It was for this that six Japanese were sentenced to death by court martial and have appealed to St. Petersburg.

The fight occurred because the Russians insisted upon the arrested sealers walking in the roadway instead of on the boarded sidewalk. The Japanese considered this an insult and attacked the guards, the skull of one of the Russians being crushed with a stone. The Japanese government has made a strenuous protest to Russia against the execution of the sentence on the six sealers.

## JAP IMMIGRATION

### Representative Drury Returns From Tokio—Thinks Matter Settled

(Special to The Daily News.)

VICTORIA, Aug. 15—"I believe the question of Japanese immigration into Canada has now been put on a satisfactory basis," said D. L. Drury, the just returned special Canadian representative to Japan. Mr. Drury was sent out to Japany six months ago by the Canadian government for the purpose of supervising the arrangements necessitated by the Lemieux act regarding immigration of Japanese into Canada.

Continuing Mr. Drury said: "I have every confidence that Japan will observe the terms of the agreement. I must say that the various proposals made by me and formally accepted through the British ambassador, to the Japanese foreign office were met in a most friendly spirit by the Japanese authorities.

"For example, I proposed that the Japanese foreign office should furnish us monthly statements of the Japanese leaving for Canada, showing the occupation and other descriptions of the various classes of emigrants. They acceded to this request and are now sending us every month returns made out on these lines. We have our own immigration officers who keep a complete list of arrivals from Japan and if the terms of the agreement should be violated the Japanese government would be involved in self condemnation by their own returns.

"There was some misunderstanding that required clearing away, but the methods and system put into operation both in Japan and Canada are such, I believe, that there will be no longer any grounds for complaint on the score of Japanese immigration into Canada."

## DON'T HIDE YOUR "LIGHT."

### Will Your Store Stand the Test of Real Advertising?

The sort of advertising that really focuses attention on a store ,or an enterprise, a venture of any kind—that puts it squarely in the "spot-light," and holds it there—that sort of advertising is a test of the merits of the store or enterprise. And it's a hard test.

A merchant who is "doubtful" about his store had better put things right before he gets into the white light. For real publicity will never uncover defects, as well as emphasize merits, in goods, in service, in any phase of store keeping.

The stores that have thrived on big advertising have passed the severest tests. They have not been found wanting. That they continue to be big advertisers is proof of their having "won out" under the "spot lights."

When your store is ready for the test, make it boldly. To win is to be aligned with the big stores. Not to try is to never emerge from the ranks of the little fellows.

## APPEAL TO LORD MAYOR

### TEXT OF FERNIE'S CABLE AND LETTER TO LONDON

### CAREFUL WATCH KEPT ON ALL SANITARY CONDITIONS

(Special to The Daily News.)

FERNIE, Aug. 15.—Yesterday mayor Tuttle cabled to the mayor of London in the following words: "Will you open public subscription for sufferers from fire? Women, children and men homeless, destitute. Case urgent; winter approaching; writing. Today he followed the cablegram with the following letter of appeal:

"The Right Honorable, The Lord Mayor of London:

"May it please your lordship. The dire calamity that has befallen the city of Fernie, B. C., of which I hold the responsible position of mayor, encourages me to approach your lordship with the request that you will open a public subscription for my fellow citizens. Your lordship and citizens of London have had full particulars, how almost without warning this thriving city was reduced to ashes in a few hours. Fortunately this occurred in daylight, or the loss of life would have been great; rendering six thousand people homeless, destitute and without food. Had it not been for the timely help of some of the surrounding cities, as well as those of the United States these would now have been starving. The generosity of the citizens of London and other cities of the old country has been proven on similar occasions, so that I have no reason to think my plea will be in vain. The necessity is urgent; food is getting scarce; shelters must be provided for homeless women and children as winter is fast approaching. Respectfully, W. W. Tuttle, mayor of Fernie, B. C."

Tonight a citizens' meeting was held on the coal company lawn for the purpose of explaining to the rate payers the electric light and telephone questions. The mayor introduced the subject by stating that the Crow's Nest Pass Electric Light & Power Co. had lost all their equipment in the town during the recent conflagration, and thought this an opportune time to abandon the franchise to the municipality, if the city cared to undertake the operation of systems of their own. The Cranbrook power company were willing to operate the telephone and doubtless many private corporations would be anxious to secure the franchise, but it was for the ratepayers to say whether they deemed it expedient to conduct the systems themselves. It was only a meeting to let the citizens know how matters stood and to direct their thoughts to the important question, so that when the affairs of the town were in a more settled condition an intelligent expression of public opinion might be obtained. The mayor was the only speaker and no definite action was decided on but the matter will receive due consideration in the future.

The second week since the calamitous fire closes with an astonishing amount of progress having been made, probably one hundred buildings having been already erected, and many more under construction. Still the question of housing the people is a pressing one and remains unsolved though very earnest attention and deep thought is being given to the problem. What the outcome will be only the future can disclose, but there is a hopeful feelin prevalent that a satisfactory solution will soon be discovered.

A particularly gratifying feature of the condition in the city is the entire absence of crime from the fatal day when the town was swept out of existence till the present time. There is a police tent, but its only occupants are the officers of the law, nor even one case of drunkeness having been reported, nor an arrest made. Such a condition speaks volumes for the respect in which law and order are held and for the self control and self respect of the citizens.

That the sanitary conditions of the town are well watched and modern methods applied successfully is evident from the fact that there is practically no sickness in the tented city though much might reasonably be expected under the trying circumstances that exist at present. Tomorrow will be pay day for the employees of the coal company and the wages distributed will do much to add to the comfort of the sufferers.

### HAMILTON ATHLETIC MEET

#### Canadian Athletes Make Excellent Showing

HAMILTON, Aug. 15.—The Bobby Kerr athletic meet today was the biggest sort of a success. The weather was superb and the meet was patronized by nearly 5,000 people. The chief events were Bobby Kerr, in exhibition sprints, and Tom Longboat and Fred Simpson, the Indian Marathoners, who met today for the first time in a special race at two miles. Ed Archibald, the Canadian champion vaulter; the Canadian Olympic cyclists, Doc Morton, Harry Young and William Anderson of Toronto, and Ferd Meadows, of the Olympic team, and Tom Coley in a five mile race. Kerr, the world's champion then ran an exhibition hundred yards paced by Lambert, to whom he conceded five yards. Kerr won by five yards in ten flat. The auburn haired boy got a good reception. Kerr ran an exhibition 220 with Lambert. Lambert took 20 yards start and carried Kerr to the head of the stretch. Three watches caught him in 21 1-5. This is two-fifths of a second better than the world's record.

Tom Longboat is not dead yet. He won the three mile very handily today defeating his fellow redskin Simpson and all other competitors.

### DYNAMITE EXPLOSION

#### Horrible Disaster Occurs at Syracuse, New York

SYRACUSE, Aug. 15.—Five men were instantly killed and several were injured by the premature explosion of dynamite at the Benson mines and iron ore company at the Benson mines today. The Benson mines are located on the Carthage & Adirondack railway, forty-five miles from Cartham.

The workmen were engaged in preparing a blast and the dynamite was being tamped when the explosion occurred, hurling tons or rock and the five men into the air. The victims were instantly killed and the bodies scattered over a wide area. Identification was impossible from the fragments of clothing. The wildest excitement followed. There are many French Canadians in the mine and many of the foreign element became panic stricken. All of the dead men were married and their wives are almost crazed with grief. The injured were some distance from the explosion. There was only one workman in the dynamite gang that escaped uninjured and he was rendered insane by the shock. The coroner is conducting an investigation.

## BOUNDARY FALLS FIRE

### REDUCTION PLANT IN DANGER FOR SOME TIME

### SUPPLY OF COKE IS OBTAINED FROM THE COAST

PHOENIX, Aug. 15.—Fire last night destroyed the Dominion Copper company's large machine shops and blacksmith shop, totgheer with all the machinery, which adjoin the smelter at Boundary Falls.

The fire started at 9:30 and spread so quickly that no attempt could be made to save the building. The entire smelter force of men were put to work with the company's fire fighting fighting appliances to protect the smelter, and it was only after some hours of hard work on the part of the men that the reduction plant was out of danger.

The destruction of the machine shops means a big loss to the company as the plant was complete, with modern machinery for all repairing, etc., in connection with the smelter and mines.

The mines of the Dominion Copper company have been closed since Wednesday and the furnace at the smelter is out of blast as a result of coke shortage. A supply is now en route from the coast, however, and it is expected that operations will resume again on Sunday or Monday.

## A TALE OF THE NORTH

### SCIENTIFIC RESEARCHES WELL CARRIED OUT

### BUT MANY EXPLORERS MEET WITH SAD FATE

BERGEN, Norway, Aug.—The ship Denmark of the Denmar-Greenland expedition arrived at Bergen, Norway today. The body of the Danish explorer, Mylius Erichson, who perished in a storm while traveling over the ice on the north eastern coast of Greenland, was not recovered. Lieutenant Trolle, master of the Denmark made the following statement.

The Denmark-Greenland expedition carried out the objects for which it was formed, but is paid dearly in having done so. Mylieus Erichsen, the leader and lieutenants Hagen and Broenlund perished in November, 1907, in trying to return from the north coast of Greenland, by way of the Allanlee, having been obliged to remain on the north coast during the summer of that year, owing to the state of the weather.

"Broelund's body was found in a crevice near a depot. Beside it were sketches showing the work that had been accomplished, and his diary, in which was the following entry: 'Perished at 79 degrees under a trial return overland in November. Arrived here under a decreasing moon and cannot go on owing to frozen feet and darkness. The corpses of the others are in the middle fjord.' Hagen died November 15, Mylius some ten days later.

Joergen Broenlund was buried on the spot where his body was found.

"It proved impossible to find the bodies of the others on account of the heavy snowfall. Our three dead comrades having done their duty and perished in the field of honor, we erected a monument for them at Port Denmark. Everything possible was done from the ship to succor but it was beyond human power to prevent the catastrophe.

"The course of the expedition was as follows: August 13, 1906, northeast coast of Greenland. After difficult sailing through the ice our ship reached 77½ degrees north latitude. Depot supplies were landed at 77¼ degrees. A haven for the ship was found at 76¾ degrees and was called Port Denmark. It was resolved to remain here. In the autumn of 1906 ice sledge journeys were made in a northerly direction to establish sledge depots and prosecute scientific investigations. A sledge expedition to the north with a view to discovery of the unknown part of the north coast of Greenland took place in the spring of 1907, under the command of Mylius Erichsen. The expedition consisted of ten sledges, in four batches. Three of these batches returned for the summer.

"In September, 1907, a rescue expedition was sent out to find the batch that had not returned. It found an open sea at 80 degrees. The course of the autumn numerous sledge expeditions were here started and a new rescue expedition set out in March, 1908. It established the certainty of the missing party. Several other journeys were made during the spring, one over the inland sea southward to Arbencarple inlet at 83½ degrees and into Peary channel to cape Glacier. The coast line went far more east than we expected. Connection was obtained with Peary's landmark on land and on cape Glacier the Danish flag was rehoisted and the country taken possession of for Denmark and called King Fredrick VIII. land. No living people were encountered. Scientific investigations were continued, the district surrounding Port Denmark from the ship. On the road scientific researches were made and considerable physical collections made and a large quantity of scientific material and numerous sketches and photographs of the country were accumulated. Our departure from Port Denmark took place July 25 and owing to the favorable condition of the ice, a cruise to 73 degrees was made.

"The members of the expedition are all well and its collections are in good condition."

The Denmark will be towed from here to Copenhagen.

## IN TEMPERANCE CAUSE

### GRAND FORKS RESTRICTS ITS HOTEL LICENSES

### TIMBER FIRE STARTED BY RAILWAY LOCOMOTIVE

(Special to The Daily News.)

GRAND FORKS, Aug. 15.—At a meeting of the board of license commissioners held on Thursday evening last it was decided to cancel the licenses at present held by the Yale, Victoria and Valhalla hotels at the expiration of the present term, which in on January 15th next. This will still leave seven licensed houses still in the city with a population of a little over two thousand. Those who are going to build were notified by the commissioners that construction would have to be commenced within thirty days and to continue the same to the satisfaction of all the board. As all the hotels that were burned out were granted a thirty day permit only, the commissioners extended these permits to January 15, 1909.

The fire department of this city last Thursday evening gave a farewell smoker to J. A. Densmore, who ever since the organization of a brigade here has held the position of captain. The smoker took place in No. 3 hall, of which brigade Mr. Dinsmore was a member. He was presented with a beautiful diamond pin and an address by the department and after a very suitable speech from the retiring captain a sumptuous repast was furnished by the fire boys. Speeches, instrumental and vocal music, coupled with the relating of adventures by the older members of the brigade, passed a very pleasant evening, which closed with chief Sawyer proposing the health of Mr. Dinsmore.

Mr. Holmes, who has for a number of years been engaged in the commission business in California, has purchased seventeen acres of W. J. Brown's sub-division, a few miles east of the city and will move his family here shortly. Mr. Holmes has also taken an option on three other plots in the same sub-division for friends of his in Califronia, whom he expects will readily take them up just as soon as he can show them the advantages to be derived by coming to the Kettle valley and taking up fruit ranching.

Mr. Keller, who has been appointed to the principalship of the high school of this city has arrived from the east. The high school, as well as the public will re-open on Monday, August 24.

Messrs. Carlson and Harris of this city have purchased the Chisholm ranch situated about five miles east of the city and have taken immediate possession of same.

H. Mortimer Lamb, secretary of the department of mines geological survey, Ottawa, has presented the board of trade of this city with a set of geological survey reports. This donation consists of fifty large, well bound volumes and will prove a valuable addition to the library of the organization.

A fire was started today on Hardy mountain, presumably by one of the Great Northern engines on their way up the hill to Phoenix. At the time of writing it has spread considerably and may do some serious damage before being extinguished.

### SHAMROCKS BEATEN

#### Cornwalls Defeated Them by Score 6 to 4

CORNWALL, Aug. 15.—About 2,000 people were present when the whistle was blown at 3:45 p. m. for the Cornwall-Shamrock game today. The Shamrocks won the toss and played with the sun and wind behind them. Score, Cornwall 6, Shamrocks 4.

Referee, Alex Robertson, Ottawa; judge of play, Jack Sheaver, Ottawa; umpires, W. Bramley and Frank McCallum, Montreal.

#### Welsh Gets Decision

LOS ANGELES, Aug. 15.—Freddie Welsh, the English lightweight champion, was awarded the decision over Johnny Murphy of San Francisco, at the end of the 25th round in the Jeffries Athletic club at eVrnon last night. The fight afforded the greatest exhibition of gameness ever seen in a local ring. Murphy reeling through 15 rounds in a groggy condition, under a rain of blows that cut his lips and nose to ribbons and closed both eyes.

# The Best on Kootenay Lake

## An Improved Fruit Farm With Beautiful Lake Frontage and Surrounded By Every Convenience

We offer for sale the finest piece of property to be found along the West Arm of Kootenay Lake.

**HIGHLY IMPROVED AND PAYING DIVIDENDS.**

40 acres with 1-4 mile of sloplake frontage and situated on south shore, 19 miles east of the city of Nelson and 1 mile from Procter.

**A FEW OF ITS MANY CONVENIENCES AND ADVANTAGES:**

It is well sheltered from winds, is in the heart of a good settlement.

It is only one mile from railroad station, telegraph office, store, school, post office, and one-quarter of a mile from a railroad siding and sawmill. There is a good steamboat landing wharf on the property with daily boat service to Nelson and all points East and West. New Government wagon road from Procter skirts the boundary of the farm.

Its improvements consist of 15 acres of cleared land, 13 acres of which are under a high state of cultivation and with 400 fruit trees of Standard Varieties, as follows:

40 trees Northern Spies, 5 years old, bearing next year; 25 trees Spitzenburgs, 5 years old, bearing now; 25 trees Duchess, 4 years old, all bearing; 50 trees Wealthys, 5 years old, all bearing; 25 trees Rome Beauties, 5 years old, bearing next year; 20 trees Baldwins, 5 years old, all bearing; 25 trees Crab Apples, 5 years old and bearing ; 20 trees Flemish Beauty Pears, 4 years old, just beginning to bear; 20 trees Idaho Pears, bearing this year; 20 trees Bartlett Pears, bear- this year; 20 trees Peaches, Crawford's Early, 5 years old, bearing this year; 50 trees Cherries, 5 years old, Windsors and Lamberts, all bearing; 25 trees Cherries, Montmorency, 5 years old and bearing.

Also a garden orchard of 35 fruit trees, different varieties, 7 years old, all bearing, and comprising Cherries, Pears, Plums, Apples, Peaches, etc.; 1 1-2 acres Magoon Strawberries (This strawberry patch is in fine condition and it produced 900 crates of berries this year); 750 Raspberry canes, all bearing (produced 50 crates this year); 150 Currant bushes and Gooseberries; fine Vegetable Garden with a good crop; everything in the vegetable line that a family could wish for: 8 acres in clover. The whole property is fine level land; it is fenced on three sides and every foot can be plowed and cultivated without waste; the best watered piece of land on Kootenay Lake; registered water right and water ditched and flumed all over the farm.

There are several buildings, all in good shape: 1 1-2 storey frame dwelling with open fireplace and brick chimneys; 2 rooms upstairs; kitchen 14x26; sitting room 14x16; bedroom 12x16; woodshed, well stocked with wood, in rear; pure mountain water piped into the house; 1 frame stable, will accommodate team of horses and 2 cows; feedroom 10x22; hay barn 22x36, with 16 tons of clover hay stored for winter; pig pens; 7 portable colony fowl houses and scratching shed; 1 fruit packing shed and carpenter shop, 18x30; root house and good cellar;; milk house, sweet, and cool water running through it; tool and implement shed, well stocked; everything in good repair.

1 double wagon, 1 single wagon, 1 McCormick Mower, 1 rake, 2 plows, 2 cultivators, 1 garden seed cultivator, 2 harrows, 1 large spray pump, 1 stumping machine, a quantity of hand tools, harness, rope, block and tackle, also a large list of small articles which get collected around a well kept establishment and too numerous to mention.

Valuable livestock passing with the farm: 1 thoroughbred Jersey cow, 5 years old and pedigreed; 1 good work horse; 4 young pigs, thoroughbred Chester Whites; 150 hens, thoroughbred White Wyandotes.

The whole farm presents a very prosperous appearance. It has been well cared for by a practical man; the land is clean and the varieties of fruit planted are the best that money could buy.

The view of Kootenay Lake commanded by this farm could not be improved upon. Between the dwelling and the water is a beautiful grove, in fact, a natural park.

The unimproved land can be cleared for $50 per acre.

Excellent Rainbow Trout fishing at your door.

This excellent farm while yet in the infancy of its prime as a producer will at a most conservative estimate pay all running expenses next year and show a clear profit of at least $1000. Properly looked after this farm within 5 years will be worth $1000 per acre.

**It Can Be Bought To-day for $13000.00**

TERMS: $5000 CASH, BALANCE IN ONE AND TWO YEARS, 7 PER CENT INTEREST.

This is the best piece of property we have yet offered. It is the Cream of Kootenay Lake.

If you can finance the payments you will have an investment as safe and secure as the Rock of Gibraltar.

Photos sent to bona fide purchasers.

## WHAT'S DOING IN CANADA

ITEMS OF INTEREST FROM YESTERDAY'S WIRES

THE DOMINION FROM THE ATLANTIC TO THE PACIFIC

WINDSOR, Aug. 15—It is now believed that George Ferguson, under arrest for bigamy, has four wives.

TORONTO, Aug. 15—Ten year old Alex. Bailey, was drowned yesterday while bathing at the western sand bar.

HAMILTON, Aug. 15—Mrs. Ethel Ford of James street, was badly burned last night while ironing, by her dress catching fire.

OTTAWA, Aug. 15—The Canada Stove company was today bought out by the National Manufacturing company of Pittsburg.

BRANTFORD, Aug. 15—Wood, the first Canadian to finish in the Marathon race at London, returned home this evening and was given a fine reception by his townsmen.

KINGSTON, Aug. 15—Matthew Henry Folger, United States vice-consul at Kingston for over 30 years, died this morning after a lingering illness. He was 67 years old.

BROCKVILLE, Aug. 15—Harold Patterson of Oxford Mills, 16 years old, was kicked to death by a horse which he was cleaning, and by accident struck its leg with the curry comb.

SOO, Ont., Aug. 15—According to A. C. Boyce, M.P., Algoma, the rail mill of the Lake Superior Consolidated company will soon start on orders for rails for the eastern division of the G.T.P.

KINGSTON, Aug. 15—Dr. Cartwright, sir Richard's son, today stated that his father had not been offered the lieutenant governorship of Ontario and that he would not accept it in any case.

ST. JOHN, Aug. 15—Four youths rocked a boat in the bay of Fundy tonight and upset. They shouted for help and a passing steam launch heard their cries and rescued them in the nick of time.

BROCKVILLE, Aug. 15—Mrs. Louise Springer of Alice township, in attempting to stop a runaway team on her husband's farm, was struck by the wagon tongue, causing injuries from which she died. She was 25 years old.

MONTREAL, Aug. 15—Colonel Robertson and three officers and eight men of the 48th Highlanders, leave for Aldershot by the Empress of Ireland from Quebec. They will be the guests of Gordon Highlanders while in England.

GUELPH, Aug. 15—Mrs. Robert Brandon and her two children and Mrs. Donald, visitors from Toronto, were poisoned today through eating sardines from a tin. They were in a critical condition but are now out of danger.

TORONTO, Aug. 15—The report of the city assessor on three of the six wards of the city shows an increase in the value of property over last year of $8,340,773. It is expected that the increase in the other three wards will be still greater and that the total assessment for the year will be $222,128,763. The increase in the first three wards in population is 7469 and the total increase is estimated at 17,000, bringing the population of the city up to about 290,000.

MONTREAL, Aug. 15—M. Girioux was arrested last night for interfering with workmen returning from the Angus shops. He appeared before the court this morning and pleaded not guilty. The trial is fixed for next Tuesday. He was admitted to bail. No credence is placed in the rumor circulated to the effect that vice-president O'Connoll of the American Federation of Labor, is to have a conference with sir Thomas Shaughnessy. The latter is now at his summer home at St. Andrews.

MONTREAL, Aug. 15—It was Frank Baden-Powell, brother of the hero of Mafeking, who arrived at Quebec from Liverpool on the Empress of Ireland yesterday. He is a barrister, sculptor and painter of note, and is passing through Montreal on his way to British Columbia, where he hopes to do some hunting. He is accompanied by his wife and two children. Similarity of names evidently caused correspondents to cable that lieutenant general Baden-Powell had sailed for Canada.

## NELSON NEWS OF THE DAY

Work is being crowded on the new courthouse which is being finished as rapidly as possible.

The Scandinavian Aid and Fellowship society of America will meet in the K. P. hall at 8 o'clock, city time, tomorrow evening.

There will be a band concert this afternoon between 3 and 6 o'clock at the city lake park. The Blue Bell will make half hourly trips from the city wharf, the charge being 10 cents each way.

In addition to the regular weekly launch races on Wednesday next two prominent launch owners have arranged a match race of five miles for a side bet of $100, in order to settle once and for all the long dispute as to their respective speeds.

The practice shoot of the Nelson gun club yesterday afternoon brought out six competitors and there was some good shooting, Wells making a score of thirty without a miss. The scores at 50 birds were: Wells, 46; Ink, 45; Bishop, 40; Larson, 36; Macleod, 30; Johnson, 28.

It is the intention to fence the government lots on the northwest corner of Vernon and Ward streets with an iron railing, extending from the land registrar's office down to the east corner of the gaol yard. The old buildings are to come down and the place laid out in grass and garden. There is a big retaining wall to be built along Vernon street and after that a concrete sidewalk will be laid. All of which will hardly be completed until midsummer next, with particular regard to the concrete walk.

Commodore C. W. Busk of the launch club requests every launch owner in the city and on the West Arm to be on hand on Wednesday afternoon at 3 o'clock when several photographs of the fleet will be taken from the club house. It is earnestly hoped that at least 60 or 70 boats, that is to say one-half of the available fleet, will be present so that a first-class showing may be made. Even if the launches are out of repair they can be towed within range of the camera. The Publicity Bureau has arranged with Allan Lean of the Queen studio to take these pictures, which are made at the request of the Motor Boat Magazine of New York. Copies will also be on sale here.

The Minstrel Maids, who were warmly welcomed at their last performance in this city will play here again tomorrow and Tuesday evenings. They have been playing their big time in the east this summer and are bringing with them all the latest songs and musical numbers from the crack musical shows in the eastern cities. Ruby Lang is singing the latest popular hit in New York, "Gee! I Wish I Had a Girl" and is making the same big hit nightly as she did with "Blow the Smoke Away" and "I'm Afraid to Come Home in the Dark." Edith McClaire has some new jodling songs and little Halcyon Martin is doing her funny stunts just in the same old way.

Mrs. Thomas has opened a new restaurant on Hall street, first door north of Baker street and is prepared to serve meals and short orders at all hours. Your patronage solicited. 93-6t

The steam launch Creston will run between the city wharf and tht park on Sunday afternoon the 16th. First trip 10 o'clock, city time, and every 30 minutes thereafter. Fare 10c each way.

If you want any building or repair work, Phone A172 and estimates or contracts or jobbing will be cheerfully furnished by McDonald and Williams. Shop, Front and Ward Sts. opposite court house. P. O. Box 367. 271-tf.

### Diarrhoea Cured

"My father has for years been troubled with diarrhoea, and tried every means possible to effect a cure, without avail," writes John H. Zirkle of Philippi, W. Va. "He saw Chamberlain's Colic, Cholera and Diarrhoea Remedy advertised in the Philippi Republican and decided to try it. The result is one bottle cured him and he has not suffered with the disease for eighteen months. Before taking this remedy he was a constant sufferer. He is now sound and well, and although sixty years old, can do as much work as a young man." Sold by all druggists and dealers.

### Church Services Today

The services announced for today in the churches of Nelson are as follows:

ANGLICAN—St. Saviour's church, corner Ward and Silica streets. Ninth Sunday after Trinity. Holy Communion 8 a. m. Sunday school, senior, 9:45 a. m. Morning prayer and Holy Communion, 11 a. m.; Sunday school, infant, 2:30 p. m.; Evensong 7:30 p. m.

CATHOLIC—Church of Mary Immaculate, corner of Ward and Mill streets. Low mass, 8 a.m.; high mass, 10:30 a.m.; evening service 7:30. Rev. Father Althoff, priest.

SALVATION ARMY—Barracks on Victoria St., west of Josephine. Knee drill, 7 a. m.; holiness meeting, 11 a. m.; praise meeting, 3 p. m.; evening meeting 8 o'clock.

BAPTIST — Stanley Street, near Mill. Morning, service 11 a. m.; evening service, at 7:30; Sunday school, 9:45 a. m. Rev. A. N. Frith, pastor; services will be held in the Methodist church.

PRESBYTERIAN—St. Paul's, corner of Victoria and Kootenay streets. Morning service 11 a. m.; Sunday school 12:30 p. m.; evening service, 7:30 p. m. Rev. J. T. Ferguson, pastor.

METHODIST—Services held in Congregational church, corner Silica and Stanley streets. Morning service, 11 a. m.; Sunday school and bible classes, 2:30; evening service, 7:30. Rev. R. N. Powell, pastor. Services will be taken by Rev. A. N. Frith jointly with the Baptist services, but in the Methodist church building.

### FACTS WORTH HEEDING.

If your store failed to open its doors for a time it would be hard to convince people that things were prosperous. If your store ad. fails to appear for awhile it will be equally hard to make it appear that there is nothing amiss.

Look at any store in the city and try to imagine what it would be if it had never been advertised.

It is probable that some article in the stores is costing less today than it ever will again. Read the ads.

Look at some of the real estate ads. today. It may be that you are nearer ready to buy than you think.

If you expect to do a record business this fall you must match your expectations with your advertising—beginning right now.

Few stre failures but that could have been forecasted and diagnosed from the sort of store advertising indulged in.

### CANADIAN IMMIGRATION

#### An American Writer in "Canada West" for August

The August number of Canada-West brings the announcement that Emerson Hough's new serial, "The Sowing," will begin in the September number of that magazine. Especial interest has been aroused concerning this forthcoming work. Extracts already published show that Mr. Hough reviews the colonization situation as he sees it, and proposes such chages in the present policy as in his opinion will relieve this country from what he calls "the burden of unfit people now being sent here from the congested cities of the old country," and bring instead, a class of immigrants whom he says would have at least potentially the qualities of self-help and useful citizenship. The publishers of Canada-West are careful to say they do not present Mr. Hough's view and recommendations as their own, but as the earnest delivery of a qualified thinker, fortified by knowledge, actuated by a sincere belief in Canada and her future, and speaking with the freedom of an outsider. Mr. Hough's previous writings on Canadian topics have made him widely and favorably known. We are told that in the present case he assumes the attitude of a humanitarian and an Anglo-Saxon who sees in Canada the ultimate stronghold and bulwark of the race, if not of the empire, and that his work is not destructive in purpose, but reconstructive. He urges that the formative stages of our population be so guided and controlled as to secure the present against unnecessary burdens, and the future from having to do things over again. No living topic comes more sharply and insistently home to the people of Canada than this one, and the appearance of the first installment of Mr. Hough's book in the September Canada-West will be awaited with general and serious expectation of (at least) helpful suggestion.

### HOUSE FAT—A VITAL PROBLEM

Shall a fat woman decide during the sweltering evenings of midsummer to sit on the porch corseted and asphyxiated but presentable; or shall she take off her harness of a few pounds more of house fat? Here is a problem as momentous as Hamlet's "To be or not to be."

Hamlet ended where he began, however, whereas fat folks can solve their hot weather problem; they can reduce.

This does not mean hard work through exercise or a course of ascetic dieting, though. It does not mean one must take a chance of ruining his stomach with "secret" advertised "remedies." All one has to do is to take a teaspoonful after meals and at bedtime of the following simple, harmless mixture: ½ ounce Marmola, ¾ ounce Fluid Extract Cascara Aromatic, and 4¾ ounces Syrup Simplex, and in a reasonable time the loss of fat should amount to 12, or even 16 ounces a day. This home method of reducing flesh quickly and safely gets results without disturbing one's regular diet or the formation of wrinkles, and these advantages, combined with the fact that any druggist will fill it for a small sum, make this receipt unique.

### Chronic Diarrhoea Relieved

Mr. Edward E. Henry, with the United States Express Co., Chicago, writes: "Our general superintendent, Mr. Quick, handed me a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy some time ago to check an attack of the old chronic diarrhoea. I have used it since that time and cured many on our trains who have been sick. I am an old soldier who served with Rutherford B. Hayes and William McKinley four years in the 23rd Ohio regiment, and have no ailment except chronic diarrhoea, which this remedy stops at once." For sale by all druggists and dealers.

### General Booth's Eyes

LONDON, Aug. 15—An officer of the Salvation army confirms the report that has been current for some time that general Booth is suffering from cataracts on both eyes. "The general has not yet taken to wearing glasses," said the officer, "and can see better without them; but he cannot read anything but large type and he has to hold that close to his eyes.

### NOTICE

Notice is hereby given that the Corporation of the City of Nelson intends to proceed with the construction of cement sidewalks on Baker street, Nelson, B. C., opposite blocks one (1), five (5) and six (6), and that it is the intention to have the total cost of such sidewalks borne proportionally by the owners of property fronting on such proposed sidewalks and to obtain the requisite money therefor by issue of local improvement debentures. Notice is also hereby given that assessments will be made against such property so benefited by such proposed sidewalks in order to meet the principal and interest of such debentures and if any owner or owners desire to object to the proposed work on any portion thereof, the requisite petition or petitions should be filed with the undersigned within fifteen days from the first insertion of this notice in the Nelson Daily News.

W. E. WASSON, City Clerk.
Nelson, B. C., August 1st, 1908.

### "COMPANIES ACT, 1897."

Notice is hereby given that Robert S. Lennie, of Nelson, B. C., barrister and solicitor, has been appointed the new attorney of the "Hall Mining and Smelting Company, Limited," in the place of John Joseph Campbell.

Dated at Victoria, B. C., this 25th day of July, 1908.

S. Y. WOOTTON,
Registrar of Joint Stock Companies.

## NELSON NEWS OF THE DAY

Work will begin this week upon the new extension to the grand stand.

There will be a meeting of the city council tomorrow night at 8 o'clock.

The work of excavation in front of the new court house was begun yesterday.

G. F. Johnson of Montreal is staying a few days with Mr. and Mrs. J. Patrick.

Mr. G. F. Johnson of Montreal will preach in the Methodist church this evening.

Many happy returns of August 16 to R. S. Lennie, who today celebrates his birthday.

Mrs. E. D. Ireland leaves this evening via Revelstoke for Hamilton where she will spend a few weeks with her relatives.

The brushing out of the streets in residential places where there has sprung up weeds and bushes, has been taken in hand.

Rossland being unable to get a team together to send over to the football match which was to have been played yesterday afternoon was indefinitely postponed.

About 140 feet of six feet deep retaining wall along the Tremont block side walk was filled in with concrete yesterday by four men, fetching and mixing their own material.

Sometime during the week the sidewalk on the north side of Baker street, between Ward and Josephine will be taken up. It is expected that the whole of the three blocks will have been finished about a week before the fair.

All not having trained this summer for any aquatic event and who are willing to compete for a two or ten mile Marathon race at the next regatta are requested to meet at the Nelson boat club's quarters at 8 o'clock on Monday evening to arrange for the same.

The state of the city wharf is again dangerous and the place should be either cut off altogether from traffic or rebuilt, according to the teamsters, one of whom nearly broke a horse's leg yesterday through the animal putting his foot through the rotten timbers.

Last evening a large and well pleased audience at the opera house greeted the return engagement of the Porter J. White company in "Faust." The excellent impression created by the company's first production on Tuesday night was again confirmed last evening when the electrical novelties in scenic effects added not a little to the admirable acting of Miss Olga Verne as Marguerite, Mr. Wilson as Faust and Mr. Richards as Mephisto. Nelson people will be delighted to see the company here again, in the coming winter season.

WANTED—A few fresh milch cows. Must be first-class milkers. Apply manager Hume hotel 98-6t

## MAKING RAPID PROGRESS

GRANBY MINES TAKE ADVANTAGE OF THE HALT

WILL SOON BE IN A POSITION TO MAKE A RECORD

PHOENIX, Aug. 15 — The ore shipments from the mines of the Granby Consolidated for the first seven months of this year total 619,310 tons, as follows: *January*, 74,203; *February*, 80,155; March, 110,223; April, 87,202; May, 93,316; June, 85,257; July 88,960. The excess of the March shipments over any month since is accounted for in the fact that the entire battery of eight furnaces at the company's smelter were in blast every hour of the 31 days in that month, no fuel or other hindrance interfering with the consuming of ore. *In April the* improvements at the smelter were commenced, connecting the furnaces with the new steel flue dust chamber, etc., and continued through the succeeding months, seldom more than six furnaces being in blast at a time.

The shipments for the corresponding months in 1907 were: January, 34,192; February, 32,465; March, 63,826; April, 70,158; May, 5,072; June, 72,820; July, 80,216, making a total of 358,749 tons for the seven months. From this it will be *seen the tonnages this year are nearly* double those for the same period of 1907. During the first five months last year, however, one handicap followed another, and in May the furnaces were out of blast for some time, in common with all other smelters in the Boundary on account of the fuel shortage resulting from the trouble in the Crow's Nest Pass.

The shipments for the present month will also be somewhat small resulting from some of the furnaces being out of commission through fear of fuel shortage on account of the Fernie fire. Last week only four of the furnaces were in blast, while this week six are in commission.

The company, however, is making good use of the opportunity to rush the improvements at the smelter, which will probably be completed earlier than was intended and thus be ready in good time to take advantage of the rising copper market.

By the end of the year the Granby smelter should be in a position to treat 130,000 tons monthly. With the present equipment at the mines this amount of ore can be readily supplied and indeed there is little doubt that the Granby *mines can now furnish* 5000 tons of ore every 24 hours if required.

We are in a position to fill all orders for Pipes—

### BIG WHALING RECORD

Kyuquot Station Beats All Former Statistics

VICTORIA, Aug. 15.—The world's record for a week's catch by any coast whaling station was broken last week by the Kyuquot station, to which 26 whales were taken by the steamwhaler St. Lawrence. The best catch known heretofore was 22, a record also made by the St. Lawrence. The Kyuquot station has taken 234 whales since the season began. The records of whaling *stations on the west coast of Vancouver* island are far in excess of catches on the eastern coast, according to advices received by the coast whalers from the east. A total of three Newfoundland stations at St. Lawrence, Balena and Dublin Cove, is a little over a third of the catches alone of the Kyuquot station. The three eastern stations took 96 whales.

In an effort to determine the cod banks off the south end of Queen Charlotte islands with a view to the establishment of a cod fishing industry and to prospect a site for a new whaling station for the Queen Charlotte Whaling company near Rose harbor, Capt. G. A. Huff, of Alberni, and Capt. H. Balcoln left tonight by the steamer Amur for Skidegate Jedway.

### G. T. P. AT EDMONTON

Fast Work Being Done by Large Force —Will Soon Lay Steel

EDMONTON, Aug. 15.—A force of about 2559 men are at present employed by Foley, Welch & Stewart on the G. T. P. grade west of Edmonton. A large proportion of these are between this city and Pembina river. H. J. Fetter, superintendent of construction, stated that the grade as far west as Pembina would be completed and ready for steel before the frost. Mr. Fetter stated that Foley, Welch & Stewart had practically completed the grading *east of Edmonton to Battle River.* They have closed their office at Haristy, and have moved all grading gangs west of the Pembina river. There still remains a 15 mile contract at Beaver Hills, part of which is not yet completed. Contractor Jackson has charge of the work, and Mr. Fetter estimated that it would be completed about six weeks before the G. T. P. is ready to lay steel.

Street railway construction in the *city is in full swing. Contracts for grading* from Ninth street to the river were let to J. A. Baglery at 22 cents per cubic yard; for erecting poles, to Oscar Barnstead for $4450; for the electric generator, to the Westinghouse Co.; for the motor generator to the Canadian General Electric Co., for rails, copper wires, bolts, plates, etc., to Gorman, Clancey & Grindley, of Edmonton.

## Pickard's China
Our present stock of this China is the best we have had. Some of the designs are new and the colorings are, if possible, more beautiful than ever. As for price, you may judge for yourself. Some of our customers insist that it is cheaper this year.
