## CHEAP RATES

### Government Ownership of Atlantic Cable

### GERMAN LINE TO CANADA

A FURTHER WHITTLING AWAY OF THE BRITISH PREFERENCE — PROPOSED IMPERIAL PRESS CONFERENCE IN LONDON IN NEXT JUNE.

LONDON, Nov. 11.—Referring to the proposed transatlantic line between Germany and Canada. The Pall Mall Gazette says today: "As trade develops the tendency will be for closer fiscal understanding between Germany and Canada and a further whittling away of the British preference, such as the French commercial treaty has already begun. This is one of Germany's avowed objects and it will be accomplished unless we avail ourselves in time of the commercial alliance with the Dominion which is still at our disposal."

Regarding Henniker Heaton's agitation for penny cables the Gazette says that if the Imperial aspect of the scheme is to be pressed it is obviously with the All Red system that the reforms must begin. The Aberdeen Free Press says that Heaton's appeals may serve a useful enough purpose as stimulating, but they certainly can not at this particular stage be regarded as in the sphere of practical politics. The Dundee Advertiser suggests that the British government buy one of the Atlantic cables and show what can be done with cheap cables.

Sir Wolfe Barry, presiding at a meeting of the Eastern Telegraph company today, referred to what he called "the extraordinary proposal for penny a word cables." He ventured to think that the suggestion had never been properly or reasonably thought out. The departmental commission six years ago regarded the proposal as quite impracticable and no new circumstances had arisen in invalidate that report. He did not think wireless telegraph would become a material competitor with cable telegraphs.

In Sydney, ex-premier Deacon states that every rate-lowering proposal in connection with cables will be most cordially welcomed in Australia. The Herald says it will be well worth Australia's while to join liberally in subsidizing a service. The London Times says a widespread interest has been aroused by the penny cablegram proposals, sufficient proof that it is an object which all are anxious to see advanced. The Times is glad to see that Canada, which has always led the way, shows no remission of zeal with the All Red girdle cable.

Col. Seeley sends a letter to the press stating that the report of his speech at Bradford gave an erronetus impression of his remarks concerning the alleged corruption in the Canadian parliament. He states his words were to the effect that in the course of the recent parliamentary elections charges of corruption, couched sometimes in violent terms, were frequently made and they necessarily tended to undermine the confidence of the people in the purity of public life. The Canadian press cables were drawn from the Times report of the speech.

The executive commission of the proposed imperial press conference to be held in London in June, 1909, has mailed invitations to the proprietors and editors of newspapers in various parts o fthe empire. The commission asks that representatives to the conference be selected by the various newspapers in such a manner as to make the gathering truly representative of the interests of the empire.

Victor Grayson, socialist M. P., is making arrangements to tour Canada. He has been expelled from the commons. Grayson is prohibited from sitting in the house at the present session but can next.

#### CANADIAN COMPANIES

Start in Insurance Business in Jamaica on Sound Basis.

KINGSTON, Jamaica, Nov. 11—Canadian underwriters, representing three Canadian fire insurance companies, are starting business here on a policy which does not contain the earthquake clause and with the understanding that the decision of the supreme court of Jamaica shall be final in any litigation which may arise.

#### VERY DIPLOMATIC

Official Chinese Paper Makes Satisfactory Explanation.

PEKIN, Nov. 11—In order to satisfy the pride of the Chinese people, the official newspaper controlled by grand councillor Shai Mat, explains the fact that only half the American battleship fleet, that is to say, eight vessels, visited Amoy as the guests of the Chinese government, by declaring that the fleet was dispersed by a storm on its way to the Chinese coast. The fate of the other eight vessels is unknown, only half the fleet reached Amoy. The foreigners accept this statement with complacency. The United States legion was not consulted prior to its publication.

## HEAVY PRICE TO PAY

ELEVEN LIVES LOST IN TRAIN WRECK

UNUSUALLY GRUESOME SCENES NEAR NEW ORLEANS

NEW ORLEANS, Nov. 11—It was a heavy price in human life that was paid for the error of a railroad train dispatcher today when a Great Northern express crashed into the rear of a New Orleans and Northeastern local train at Little Woods station, twelve miles from New Orleans. Eleven dead and many more injured, some of them fatally is the record of the wreck, which was attended by unusually gruesome scenes.

To add to the horror of the situation the wreck caught fire and only the heroic work of the surviving passengers prevented the cremation of those pinned in the debris.

Between Sliddel and New Orleans the Great Northern railroad trains run over the track of the New Orleans and Northeastern railroad and there was a misunderstanding as to which train had the right of way at the time of the accident. No one on the Great Northern express was seriously hurt, but those aboard the Northeastern local were thrown right and left or crushed by the express locomotive as it tore through the two rear coaches of the local. Among the sights that greeted the rescuers, was that of a small boy, apparently unable to extricate himself from the wreckage, which was fast settling down upon him. A score or more of men made a heroic effort to get the child out but the wreckage and escaping steam from the damaged locomotive interferred and they were forced to stand idly by while the child called for help until he died. This child proved to be William Attaway, three years of age, of Sliddel, La. His body was taken out of the wreck several hours later, horribly mutilated.

## RADICAL LABOR PARTY

TO FORM THE NEW AUSTRALIAN CABINET.

DEAKIN GOVERNMENT DEFEATED IN THE HOUSE

MELBOURNE, Nov. 11—Mr. Fisher one of the radical labor leaders of Australia, will form the new Australian cabinet.

The house defeated the premier, Alfred Deakin, on the division. The laborites withdrew their support because the government has not pushed labor measures radical enough to suit them.

This will be the second time the labor party has been in power in the Australian federal parliament. J. C. Watson, another of the labor leaders, was premier for a short time in 1904.

#### SERVIA'S REQUEST.

Wants Territorial Compensation and Outlet to Adriatic.

ROME, Nov. 11—Milovanvich, the Servian minister of foreign affairs, after several lengthy interviews with foreign minister Tittoni will be received next Friday by king Victor Emmanuel. Because of the occupation of the Bosnia and Herzegovina by Austro-Hungary, Servia will ask territorial compensation, in addition to an outlet to the Adriatic. It is believed, however, that the only thing she will get will be financial support for the construction of the Adriatic sea railroad through Servia.

#### EXPORT LUMBER TRADE

Eight Vessels Loading at New Westminster—Wreck on Fraser.

NEW WESTMINSTER, Nov. 11—New Westminster will again enter the export lumber trade this winter, eight cargo vessels having been chartered to load at the Fraser river sawmills for South America and Australia. The first of the fleet, the Chillean barque Ivanhoe, will arrive here 24th inst.

The river steamer Ramona, operating between this city and Chilliwack, was sunk about 20 miles up the river this afternoon. No lives were lost.

#### NOT OFFICIAL

Mr. Roosevelt Explains Why Gompers Was Not Invited.

WASHINGTON, Nov. 11—The discussion which has arisen over the dinner which president Roosevelt, is to give in the White House on Tuesday to a number of labor leaders brought forth from the executive officers of the president today an official statement, pointing out that the dinner is not an official one and declining to discuss the omission of president Gompers, vice president O'Connell, secretary Morrison and treasurer Lennon, of the American Federation of Labor, from the guest list.

The statement follows:

"As the statement has been made that this is an official dinner, it is worth while pointing out that it is nothing of the kind. The president has on several occasions had various labor leaders with whom he had been thrown in contact and whose views he wished to obtain, at dinner.

"For this occasion he had asked a number of men within and without the government service who are interested in different phases of the labor question to come to dinner. Three-fourths of these men are not members of labor organizations. Six or eight of them were called in in one capacity or another with the work of labor organizations. It would, of course, be absurd to take any notice of any discussion as to who should or should not be invited to dinner by the president."

## ANDRE'S BODY FOUND?

REMAINS DISCOVERED IN WILDS OF LABRADOR

STORY FROM COPENHAGEN THAT IS NOT CONFIRMED

COPENHAGEN, Nov. 11—There is reason to believe that the body of Prof. S. A. Andre, the Arctic explorer, who in 1897 made an attempt to reach the north pole in a balloon, has been found on the coast of Labrador.

A letter received here from the captain of the Danish steamer Inga, dated Labrador, Sept. 30, reports that Capt. Chalker the skipper of the American schooner Pelops of Conception bay, Nfld., discovered in northern Labrador a cross bearing the name Andre and that beneath this cross he found a body and a box of documents.

The letter from the captain of the Inga was sent from Indianside, Labrador, and states that the schooner Pelops arrived from Cape Mugford, northern Labrador. Capt. Chalker reports that he went inland at that place and about a quarter of a mile from shore came upon a simple wooden cross, upon which was inscribed the name of "Andre." He dug under the cross and found human remains and a box containing papers. Capt. Chalker said that he removed the cross but refused to say whether or not the papers were in his possession. He asked the captain of the Inga how the name "Andre" was spelled. On being told he took a piece of paper from his pocket on which was written the name as it appeared on the cross. It was "Andree." The place where the cross was found is an absolute desert and is rarely visited even by the Eskimos. What became of Andre's two companions, if the discovered remains prove to be his, is problematical, but light will probably be thrown upon their fate by an examination of the papers. Capt. Chalker is a half caste Eskimo, who took part in the landing of the eary expedition in Greenland.

The expedition to discover the north pole organized by Prof. S. A. Andre, a Swedish explorer, left Dane's Head, island of Spitzenbergen, in a balloon on July 11, 1897. He was accompanied by two companions, Strindberg and Fraenzel. He was prepared to drop messages relating to his progress, and various such communications were discovered in the three months following his departure.

No authentic statement, however, was received concerning the fate of the balloon or its occupants. Various rumors have been current of the finding of the relics of the expedition but none of them were ever confirmed. It has twice been reported that Andre's body has been found but neither of the statements were confirmed. Many search expeditions, some equipped at great expense, have searched the Arctic regions for the missing balloonists but not one of them was successful.

Dane's island, where Andre made his final strike for the pole, was selected by Walter Wellman of Chicago, as the point to make his start, ten years later on the second proposed endeavor to get to the pole by means of an airship. Wellman returned from the island, however, without having been able to get away.

ST. JOHN'S, Nfld., Nov. 11—No report of the finding of a body thought to be that of Andre, in Labrador, has reached St. John's. Little credence is placed here in the report of the Danish captain.

ST. ALBANS, Vt., Nov. 11—Dr. Wilfrid T. Grenfell, the noted Labrador medical missionary and explorer, who is in St. Albans tonight to deliver a lecture, said when shown the despatch from Copenhagen, containing the report of the finding of the body of the explorer Andre: "I do not believe there is any truth in it." He said he had been at Conception bay in the latter part of October and if any such rumor was abroad he would have heard it.

ST. JOHN'S Nfld., Nov. 11—Capt. James Chalker, master of the fishing schooner Pelops, said last night that while his vessel was fishing in Mugford bay, northern Labrador, about Aug .10, he started overland across the capt to Black Duck bay, three miles distant, and came upon a grave surmounted by a cross bearing the inscription "Andree Ansty, Nov. 7, 1897.... The lettering was very faint and it was difficult to tell whether the date of the month was Nov. 1 or 7, but he decided it was the latter. Capt. Chalker did not disturb the grave and did not discover any documents and does not know who is buried there. He is positive the first word was "Andree" (the French word for Andrew) and not "Andre."

It is thought that an explanation of the grave may lie in the fact that fishermen from Notre Dame bay named Ansty, fish near Cape Mugford every summer and that one of these may have died and been buried there. Against this there is the fact that Newfoundlanders always endeavor to bring home their dead from the fishing grounds.

#### Dr. Magill Resigns.

HALIFAX, Nov. 11—Dr. Robert Magill, for six years professor in Halifax college, and principal since the removal of principal Falconer, has resigned his chair and the principalship, to take effect in June. He gives no reason for his resignation.

## LAST MEETING

### Socialists Hold Rally in the Opera House

### CURTIS IS DENOUNCED

J. H. HAWTHORNTHWAITE, OF NANAIMO, PAYS HIS RESPECTS TO THE LIBERAL CANDIDATE, SHOWING UP HIS PAST RECORD.

At the final socialist rally in the opera house last night, the hall was well filled when Mr. Austin took the chair at 8:30 p. m. There were on the platform, in addition to W. Davidson, the candidate, and J. H. Hawthornthwaite of Nanaimo, A. Herrod, J. Mulrooney, J. W. Holmes and Fred. Ogle.

Mr. Davidson made the opening speech and expounded his platform against capitalism for upwards of an hour. He especially denounced Ralph Smith, M. P., who, he said, owed his position to the working classes but who had afterwards betrayed them. He made it plain that, if elected, he would represent labor only. He could not support both labor and capital. Capitalism was the great enemy of the working man.

Mr. Davidson very effectively exposed the trickery of the liberal party, who, prior to 1896, advocated free trade and, subsequently, went back on their pledges and adopted protection. He also went on to show what a sorry spectacle Smith Curtis cut Monday night at Trail when confronted with Mr. Hawthornthwaite, whom he had previously denounced. His views on the Asiatic question showed that socialists and conservatives alike are agreed on total exclusion, although he did not term it a "White B. C." Better terms were also spoken of favorably. Mr. Curtis was also condemned for deferring the election.

Mr. Davidson spoke eloquently and well, and was well received throughout.

Mr. Hawthornthwaite, who met with a very favorable reception, speedily displayed a wealth of language and rhetoric such as not been heard in Nelson for many a day. He first paid attention to Ralph Smith, who had recently defeated him in Nanaimo by virtue of the soldier and sailor vote of Esquimalt, practically at the point of the bayonet.

Then Smith Curtis received attention. "This wise guy, who lives on wind pudding," the speaker said, "should be kept at home." Mr. Curtis was a sick looking duck at Trail. The capitalist class also came in for a big roasting and were designated as a codfish aristocracy based on the enslavement and oppression of the working classes. To demonstrate this he showed that the average wage-earner produced $10 worth of labor but only received $2 for it, which meant that he labored eight hours for the capitalist and only two for himself.

Mr. Hawthornthwaite took up the record of Smith Curtis in the local house and literally tore it to shreads. This man, he said, talked about the legislation which he had put through at Victoria, whereas he was like the old hen who had been setting on a bunch of eggs and who finally succeeded in hatching one. That was all Smith Curtis had ever accomplished. He got one unimportant measure through, the balance were bad eggs.

One very important point that Mr. Hawthornthwaite made was in proving that the amendments to the Workmen's Compensation act, for which Mr. Curtis claimed the credit, were made, not by Smith Curtis, but by a lawyer. Joseph Martin drew the clauses and Mr. Curtis never saw them even.

Another salient point was that W. C. Wells, F. J. Deane, J. Fred Hume, J. Kelly of Revelstoke and Ralph Smith of Nanaimo, voted in favor of the Columbia and Western land grant.

The Kalen island deal was also held up to scorn and it was shown that every liberal in the house voted in favor of the bill, and against an amendment of the speaker's that fair wages should be paid.

#### Old Country Football.

(Canadian Associated Press)

LONDON, Nov. 11—Southern league football scores today were as follows:

Brighton 1, Queen's Park Rangers 1.

Exeter 1, Plymouth 1.

The Australian rugby team who defeated London on October 24 by one try to nil, played a return match today winning again by 4 points to 3.

#### International Horse Show.

NEW YORK, Nov. 11—Horsemen and horse show officials from various parts of the United States and Canada met in this city today and took preliminary steps toward the organization of the international horse show association. The object of the association is to promote the best interests of horse shows and generally supervise the conduct of such meetings. It was stated that at present there was no official body to which appeal may be taken for settlement on behalf of exhibitors. The committee was appointed to draft a plan for organization.

## ON LAKE TEMISKAMING

FIVE LIVES ARE SACRIFICED ON STEAMER

BOILERS EXPLODE WITH FATAL RESULTS

NORTH BAY, Nov. 11—A frightful accident occurred late this evening on lake Temiskaming, adding a sacrifice of at least five lives to the already long list of shipping casualties which have occurred in one way or another on this body of water.

Today's catastrophe occurred about 6 o'clock, when the boilers of the steamer Temiskaming, owned by the Temiskaming Navigation company, blew up as the vessel was nearing a place known as Temiskaming Landing, on her regular trip from Haileybury. From the scant details of the accident received here tonight, nothing is known as to the exact cause of the explosion, but five persons are believed to be dead and several others injured, two of them probably fatally.

The steamer was carrying passengers and freight when without any warning, her boilers suddenly exploded, wrecking the steamer and throwing the passengers and crew into a terrible panic, several being cast into the lake by the force of the explosion. The scene is very remote, Temiskaming Landing being on a branch of the C.P.R., running north from Mattawa.

It is known, however, that five met their death from the explosion or drowning, while many are injured. A special train left Mattawa to bring the injured to that place for treatment. So far as ascertained tonight the casualty list includes, McBride, a hunter from the United States, missing, J. Meanard, fireman, dead, and fireman Bergeronban, dead. McBride is supposed to be drowned, two men, names unknown will die and at least six others are badly injured.

## NOT AFRAID OF JAPAN

YOUTH OF CHINA TRAINING FOR GREAT WAR

ALL TALK OF CONCILIATION IS RIDICULOUS

PHILADELPHIA, Nov. 11 — Declaring that the youth of China, the younger and more progressive element in the nation, would in a great revolution overthrow the present dynasty, Rev. William Christie, a missionary at the Christian Missionary alliance, stated that great disturbances were about due in the celestial empire and that war with Japan was in contemplation.

Mr. Christie said: "The object of the revolutionary movement is to overthrow the present dynasty, which is hated for its conservatism and feared for its power." Mr. Christie said that during the past year there have been three attempts, each time before the movement was ripe. The unrest is being fostered by the student element. China is not afraid of Japan. The government is working night and day in the training of men for the war with Japan that eventually will come. All this talk of conciliation between China and Japan in the event of another war with western nations is ridiculous.

#### TOM LONGBOAT

Indian's First Appearance as a Professional Runner.

KINGSTON, Nov. 11—"Tom" Longboat made his first appearance as a professional in the Atkinston roller rink this evening. His manager Tom Flanagan, arrived at noon but the Indian did not arrive until five o'clock coming down from Deseronto behind a spanking team of greys, in company with an Indian girl of the reservation. Flanagan said that if weather conditions were favorable he might keep Longboat here a while to train. At nine o'clock twelve hundred people assembled to see "Tom" do five miles. The track was laid out around the outside edge of the skating surface. Thirteen laps around made a mile. Three of Kingston's best runners went after the Indian. Longboat took the lead after the first five laps and never lost it. He covered the distance in about 26 minutes.

#### TRAIL FOR GOODEVE

He is Assured of at Least Sixty Majority There Today.

(Special to The Daily News)

TRAIL, Nov. 11—The last meeting of the campaign took place here last night and was a pronounced success from the standpoint of victory for Mr. Goodeve, in whose interests it was called. The hall was crowded and the audience was enthusiastic in its support of Mr. Goodeve. The speakers of the evening were W. A. Macdonald, K. C. of Nelson and the candidate.

Trail can be counted upon to give at least 60 majority for Mr. Goodeve tomorrow.

#### SCOTCHMAN HONORED

Appointed President of the Boston Institute of Technology.

NEW YORK, Nov. 11—Richard C. MacLauren of Columbia university, selected as president of the Massachusetts Institute of Technology, was today notified of his appointment and tonight said he would accept the position. He hardly expected to begin his duties at the Boston institute before next May, he stated.

BOSTON, Nov. 11—Prof. MacLauren will assume the duties of the office as soon as his engagement at Columbia will permit. Prof. MacLauren will succeed Dr. Henry Unspritchel, who resigned the presidency to assume the chairmanship of the Carnegie foundation. Prof. MacLauren, was born in Edinburgh, Scotland in 1878. He received the degree of A. B. and M. A. from the University of Cambridge. He was formerly dean of the faculty of law in the New Zealand university. It was while holding the latter office that he accepted the chair of mathematics and physics at Columbia university. The degree of LL. D. was conferred upon him by Cambridge in 1894. Professor MacLauren, is a scientist of recognized international repute.

## PAID LAST RESPECTS

FUNERAL OF MANITOBA'S LATE PROVINCIAL TREASURER

COLLEAGUES AND MANY FRIENDS IN ATTENDANCE

WINNIPEG, Nov. 11.—The last sad respects of the public and the friends and colleagues of the late Hon. J. H. Agnew, provincial treasrer, were paid to the deceased minister this afternoon when the funeral services were conducted in All Saint's church. There was a large attendance at the ceremony, at the conclusion of which one of the largest corteges ever seen in the city formed behind the hearse and slowly followed the remains to St. James' cemetery where the interment was made. The brothers and male members of the late Mr. Agnew's family were at the head of the mourners, followed by the pall bearers and citizens of all ranks. The pall bearers were: Hon. R. P. Roblin. Col. E. A. C. Hosmer, Hon. Robt. Rogers, Hon. G. R. Coldwell, H. H. Coulter, of Virden, J. A. M. Aitkins, K. C., W. J. Tupper, K. C., and John Woodman.

Out of respect to the memory of Mr. Agnew all offices under the provincial government were closed for business at noon today and the assize and other civil courts also adjourned for the day.

#### ANOTHER ELECTION

The Newfoundland Legislature is Equally Divided.

ST. JOHN'S, Nfd., Nov . 11—Complete returns from the general elections of November 3rd. show that sir Robert Bond, the premier, and sir Edward Morris, the leader of the opposition forces will each have 18 supporters in the legislature. The situation is the most unique in Newfoundland's political record, and may be settled only by the ordering of another general election.

#### Two Tugs Wrecked.

ST. JOHN, Nov. 11—John E. Moore received word today that two of his tugboats, the Lord Woseley, and the Calluna were wrecked on Pictou island, N. S., last night. The Calluna is a total loss and the Woseley, may be pulled off the rocks, but it is doubtful. The tug Lord Kitchener, also owned by Mr. Moore, is alongside and will try to geet the Lord Woseley off at high water. Neither of the tugs ashore is insured. They were on their way to Port Mulgrave to assist the Kitchener in towing Mr. Moore's dredge, the Iroquois, from there to St. John. The Woseley is a big tug, three years old, built at Parrsboro, N. S. The Calluna was brought by Moore last spring.

#### Pullman Car Profits.

CHICAGO, Nov . 11—According to the annual statement of the Pullman Car company made public today, the company during the fiscal year ended July 31, carried for 18,603,067 passengers, compared with 18,020,379 in the year previous. The financial statement shows after deducting the expenses, dividends of $7,998,356, depreciation, etc., a net surplus for the year of $1,790,567.

#### Another Relay Race.

WASHINGTON, D. C., Nov. 11—President Roosevelt, has agreed to accept a massage to be transmitted in another relay race by the Young Men's Christian association boys to be run this time from New York to Washington. The run which is to be made in thirty hours and by five hundred boys, will take place on Saturday, Nov. 21.

#### Phonetic Spelling.

PARIS, Nov. 11—Simplified phonetic spelling upon the lines advocated by president Roosevelt is to be introduced in the public schools by M. Doumergue, the minister of public instruction.

#### Prize for Marconi.

STOCKHOLM, Nov. 11—It is unofficially stated here that William Marconi of wireless telegraph fame was to be awarded the next Noble prize in physics.

## IT WAS TRAGIC

### Very Sorrowful Plight of the Emperor

### A MOST EXCITING DEBATE

ROYAL INTERPOSITION IN THE AFFAIRS OF STATE BEFORE THE REICHSTAG — EMPEROR AND CHANCELLOR SEVERELY ATTACKED.

BERLIN, Nov. 11—The most exciting debate in a long time in the reichstag was concluded this evening with the rejection by the majority of a proposition to send an address to the emperor calling attention to the danger of his majesty's personal intervention in foreign politics. The discussion brought forth strong expressions from the representatives of most of the parties. The displeasure of the house was concentrated principally upon chancellor von Buelow. Members of several of the groups refused to accept the chancellor's explanation with regard to the emperors' interview with the London Daily Telegraph, as satisfactory, or as offering guarantees for the future, but when the proposition of addressing the emperor formally on the subject was put to the house, the government majority did not hesitate in voting against it.

Chancellor von Buelow listened unmoved throughout the whole afternoon to personal attacks against himself, only leaving the house for a short time to attend a sitting of the Prussian cabinet. It was generally expected that he would speak again today, but the chancellor disappointed the members.

Baron von Kiderlein Waechter, the acting foreign minister in his maiden speech and amid constant applause, defended the foreign office, which he declared was overworked and lacked a sufficient staff. His defense of the foreign office, which was so closely identified with the "interview," was received with loudly expressed derision by the socialists. It was stated that the emperor was receiving a full stenographic report of the proceedings.

BERLIN, Nov. 11—The reichstag was againcrowded today when the debate on the interview with emperor William, published in the London Telegraph on Oct. 23, was resumed. The house listened with undiminished attention while the constitutionality of emperor William's private interposition in the foreign affairs of the nation was discussed.

Baron Camp, conservative, said he thought that the anger and bitterness shown yesterday by Herr Liebermann von Sonnenberg, the agrarian and anti-Semite, was no way to treat such a sorrowful subject. It was tragic, he said, that a sovereign, with so many admirable qualities, should find himself in such a plight. His majesty's trouble ought rather to be ascribed to his responsible advisers, who, since the time of Bismark, never have been able to tell his majesty plainly his constitutional duties.

Konrad Hausmann, Bavarian radical, attacked the conduct of the chancellor during the entire incident of the Telegraph interview. He handled both the chancellor and the emperor severely as did several other speakers. The debate was concluded and the house rejected the proposition of the address and adjourned.

DON AUESCHIGON, Baden, Nov. 12—A telegraphic report of the proceedings in the reichstag yesterday was telegraphed to emperor William. The last installment was transmitted to the castle at 9 o'clock. Three hours later the telegraph office was busy for hours sending despatches from the castle to Berlin.

#### OPERA SEASON

Brilliant Assemblage in Metropolitan Theatre New York.

NEW YORK, Nov. 11—With all the pomp and ceremony that a brilliant assemblage of New York society folk and opera lovers of all classes could give it, the season at the Metropolitan opera house was inaugurated this week. From the diamond bedecked occupant of the stage box to the top most gallery god enthusiasm was rife on the opening night. Every seat was taken and the "S.R.O" sign was early displayed at the box office.

The premiere production of the season was "La Tosca," and the title role was taken by a newcomer of European reputation and experience, Maria Labia. She is a singer of much artistic strength and possibilities, and has a sweet soprano voice of fine range and calibre. In addition she has a beautiful face and graceful figure. Mille. Labia scored a pronounced success Maurice Renaud baritone and Giovanni Zenatello, the new tenor of last year again demonstrated what great artists they are and time and time again. to bow their acknowledgements to the tremendous applause aroused by their singing. The parts of minor importance were acceptably taken by singers of high reputation. Campanini conducted an orchestra of increased size and efficiency and demonstrated the fact that his superior nor even his equal, has ever been seen in New York. The tonal beauty and artistic pre-eminence of the orchestra was clearly marked.

The quality of the chorus has been vastly improved over that of last year. The production itself was of unusual sumptuousness in scenery, costumes and properties. No expense has been spared to make this season a memorable one in many respects. Oscar Hammerstein, the brilliant impresoria, has at last obtained the stamp of approval by the "400" upon the Manhattan opera house. The boxes were occupied by the leaders of society and the orchestra filled by a refined body of representative opera goers. Grand opera is by far the best entertainment of its own or any other class and by glancing at the repertoire of the Manhattan opera house it can be seen that New York is going to be royally entertained this winter.

#### Copper Market.

BOSTON, Nov. 11—Copper specialties showed little of active speculation today. The tone was easy with one or two features of strength. There was a slight easing of prices at the close.

# Fred Irvine & Co.

## Ladies' Tailor-Made Costumes, Winter Coats and Skirts

We have just received another shipment of very nattie tailor-made suits very latest styles and colors; these suits are well tailored and the prices are exceedingly low for them.

Another lot of those swell style of Ladies' Long Coats, tailor-made.

A fine lot of Ladies' Tailor-made Skirts.

No two garments same style nor color and as these are all so good style and value. We anticipate these will go quickly.

## See Our New Tailored Shirt Waists

### Of Interest To Women.

To such women as are not seriously out of health, but who have exacting duties to perform, either in the way of household cares or in social duties and functions, which seriously tax their strength, as well as to nursing mothers, Dr. Pierce's Favorite Prescription has proved a most valuable supporting tonic and invigorating nervine. By its timely use, much serious sickness and suffering may be avoided. The operating table and the surgeons' knife, would, it is believed, seldom have to be employed if this most valuable woman's remedy were resorted to in good time. The "Favorite Prescription" has proven a great boon to expectant mothers by preparing the system for the coming of baby, thereby rendering childbirth safe, easy, and almost painless.

Bear in mind, please that Dr. Pierce's Favorite Prescription is not a secret or patent medicine, against which the most intelligent people are quite naturally averse, because of the uncertainty as to their composition and harmless character, but is a MEDICINE OF KNOWN COMPOSITION, a full list of all its ingredients being printed, in plain English, on every bottle-wrapper. An examination of this list of ingredients will disclose the fact that it is non-alcoholic in its composition, chemically pure, triple-refined glycerine taking the place of the commonly used alcohol, in its make-up. In this connection it may not be out of place to state that the "Favorite Prescription" of Dr. Pierce is the only medicine put up for the cure of woman's peculiar weaknesses and ailments, and sold through druggists, all the ingredients of which have the unanimous endorsement of all the leading medical writers and teachers of all the several schools of practice, and that too as remedies for the ailments for which "Favorite Prescription" is recommended.

A little book of these endorsements will be sent to any address, post-paid, and absolutely *free* if you request same by postal card, or letter, of Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. Easy to take as candy.

# NEWS OF THE DOMINION

PORT ARTHUR, Nov. 11—Chief of police Conners, is seriously ill with appendicitis.

TORONTO, Nov. 11—Rev. Dr. Withrow, of the Methodist church publication society, is seriously ill.

BRANDON, Nov. 11—Judge Cumberland has granted an official recount, which will take place tomorrow.

STRATFORD, Nov. 11—The recount of ballots in South Perth, decreased the majority of McIntyre, liberal, from 35 to 29.

MONCTON, Nov. 11—Work started in the new I.C.R. shops here today, when 135 men were transferred from the old repair shops.

SAULT STE. MARIE, Nov. 11—The steamer Rosemont has been released after her cargo was lightered and sustained no damage.

MONTREAL, Nov. 11 — G.T.R. traffic earnings for the first week of November decreased by $85,415, as compared with the same week last year.

TORONTO, Nov. 11—The Rochester yacht club has accepted the challenge of the Royal Canadian yacht club to race for the Canada cup next year.

OTTAWA, Nov. 11—R. L. Borden, M.P., is in Toronto today and goes from that city to the southern states for a rest until the opening of parliament.

OTTAWA, Nov. 11—Major general sir Percy Lake has decided now to stay in Canada and to retain his position as inspector general of the militia, instead of going to England.

HALIFAX, Nov. 11—L. M. Carruthers has been committed for trial at Canning, on the charge of circulating copies of the Calgary Eye Opener, containing a libel on sir Frederick Borden.

FREDERICTON, Nov. 11—Dr. John Brittain, formerly of the provincial normal school here, but recently on the staff of the Macdonald college at St. Anne de Bellevue, has retired with a pension of $1500 a year from the Carnegie fund. He is 60 years of age and has been teaching 40 years.

VERNON, Nov. 11—J. Anderson, who has been standing trial at the fall assizes on a charge of murder, was convicted by the jury of manslaughter. The case was one for shooting, the result of a dispute over the use of water for irrigation purposes, in which a man by the name of Layton, was shot and killed.

OTTAWA, Nov. 11—A petition is in circulation in Carleton county in which sir Charles Hibbert Tupper is asked to accept the representation of that constituency in parliament in the event of R. L. Borden deciding to sit for Halifax county. The seat in perfectly safe for whoever the conservative candidate may be.

OTTAWA, Nov. 11—In the supreme court today judgments were rendered in a couple of western cases. In Hayes v. Day, an Alberta case, the appeal was allowed with costs, chief justice Fitzpatrick and sir Louis Davies dissenting. In Bridgeman v. Hesburn, from British Columbia, the appeal was dismissed with costs.

TORONTO, Nov. 11—Mrs. John Stuart of Hamilton, has lost her action against the bank of Montreal to recover $25,000 because the judges were equally divided. Mrs. Stuart sought to recover money deposited with the bank as security on behalf of her husband, claiming that she had no independent advice which was her right as a married woman.

TORONTO, Nov. 11—Rev. Dr. A. C. Courtice, formerly editor of the Christian Guardian, died at his home in East Toronto yesterday afternoon from an illness which assumed an acute stage three weeks ago, but which had been more or less troublesome to him for a long time. Asthma with complications of other ailments was the cause of death. He leaves a widow and two children.

TORONTO, Nov. 11—D. C. McCallum, was arrested tonight on a charge of stealing $16,495 from the Farmers' bank. McCallum was foreign teller at the head office. The amount which McCallum was charged with stealing has been considerably reduced by McCallum and his friends since the shortage was first discovered. Later McCallum pleaded guilty to stealing $16,495 and was sentenced to four years in the Kingston penitentiary.

OTTAWA, Nov. 11 — H. J. Logan, ex-M.P. for Cumberland, N.S., it is expected will shortly be appointed to the senate to succeed the late senator Black. E. M. Parrell, M.L.A., and the speaker of the Nova Scotia legislature, will in all probability get the second Nova Scotia vacancy caused by the death of senator Lovitt. The claims of Wm. Carney, the defeated liberal candidate in Halifax, are being urged, but the appointment is more likely to go to the speaker of the house.

CALGARY, Nov. 11—Philip J. P. Britt, whose farm is three and a half miles east of Gleichen, reports a probable yield of 100 bushels to the acre on his oats now harvested. The quality also is the very best. This land is located in the C.P.R. irrigation block east of here. This yield from virgin soil is marvellous. A party of land seekers arrived in Calgary today, brought here by the Interstate Land Co., Minot, N.D., agents of the Canadian Pacific Irrigation and Colonization company and are out looking over land in the irrigation block.

PRINCE ALBERT, Nov. 11—Sixty-five polls heard from up to midnight give Ruttan 25 majority. The four polls which came in this morning each gave Ruttan a small majority, increasing his lead to 49. There are 60 polls to come in. Seven polls will not be heard from for from one to two weeks. The balance of the polls should be in by tomorrow noon, it is considered by the liberals that Mr. Ruttan is without doubt elected and the balance of the polls to hear from will only increase his majority. The conservatives claim that the election will be very close and they still expect Mr. McKay to win out.

FERNIE, Nov. 11—The weather continues fine and warm. Building operations are going ahead fast. The work of rebuilding the new C.P.R. station and freight sheds commenced yesterday. They will be rushed to completion. The former will be ready about Feb. 1 and the freight sheds Dec. 1. The Crow's Nest Trading company's new building will be ready the last of the present month, also the new King-Edward hotel. Joseph Jean who for many years has been a resident of Fernie and proprietor of the Imperial hotel here, died very suddenly at the Pacific hotel in Hosmer last night, after a short illness. He was about 48 years of age. He leaves a widow and three small children.

VICTORIA, Nov. 11—The ships Halewood and Arranmore, which arrived today had narrow escapes during the thick fog while they drifted off the entrance to the straits for days. Two men of the Halewood's crew died during the long passage north from Panama and were buried at sea. Off Cape Flattery, where for six days the Halewood was drifting in the fog, a steamer went under her stern on Sunday night but a very short distance away. The fog whistles of the steamer were heard and when Capt. Cheyne dished out and ordered the man to blow an answering blast quickly, the drumming of the steamer's engines were heard very close and the answering whistle showed that she had gone by. The fog was so thick that they could not see more than a few yards. On Monday morning, when the fog cleared, the Arranmore,

### "THE NIGGER IN THE WOOD-PILE"

Thousands of people go through life feeling more or less miserable without ever knowing the reason. They suffer from headaches, indigestion, pains in the back, and at the slightest chill get rheumatism or neuralgia.

They try to cure these separate outbreaks, never suspecting that the root of the whole trouble is the failure of the bowels to move regularly, and in many cases the sluggish action of kidneys and skin. The result, of course, is that the whole system gets clogged with impurities, which soon turn to poison, and show their presence in various ways.

"Fruit-a-tives"—or fruit juice tablets—promptly stir up the sluggish liver, regulate the bowels, and stimulate the kidneys and skin to do their work properly. Thus they cure all these troubles by removing the cause, and make it possible to really enjoy life. 50c a box—6 boxes for $2.50. Trial size 25c. Fruit-a-tives Limited, Ottawa.

### Notice of Dissolution of Partnership.

NOTICE is hereby given that the partnership heretofore subsisting between me and George H. Wilson, as commission merchants in the city of Nelson, British Columbia, has this day been dissolved.

Dated at Nelson, B.C., this 4th day of November, A.D., 1908. ALFRED LEE.

which had been seen at times for two days, when the fog lifted, was drifted down on her, but a ship's length away, and the breakers were heard plainly on Cape Flattery, not more than seven or eight miles away.

QUEBEC, Nov. 11—At the continuation of the inquiry into the affairs of the marine department today, R. H. Gale, proprietor of the Slade Electric Co., gave evidence in effect that he had done business with the department to the amount of $10,000 during the past three years. He had paid Mr. Gregory on an average of between 3 1-2 and 3 3-4 per cent on all transactions with the department. Patrick Murphy, saloon keeper, reported that he had done stevedore work for the department for which he received $3651. He had no dealings with Mr. Gregory, but drew all his money through Mr. Odesil, Gregory's grandson, who drew about 5 per cent on all transactions. J. B. Cole, plumber, had done business with the department during the last three years, amounting to $23,000. He had business connections with a number of officials of the marine department, to one of whom he paid $200.

## AGED PEOPLE

Mrs. Sarah J. Windrom of Chicago, Grandniece of Alexander Hamilton, Who Signed the Declaration of Independence, Says:

"Vinol is a godsend to old people. I am 76 years old, but I have a hearty appetite, sleep soundly, and feel active and well today—thanks to Vinol. When I was young cod liver oil was dispensed in a greasy, unpalatable form, and it fairly gagged me to get it down. Vinol is entirely different. Very palatable and nourishing to impoverished blood. It is the finest tonic and strength creator I ever used."

Mrs. H. W. Avery, Norwich, N.Y., says: "At the age of 89 I felt the need of a tonic, something to strengthen and build me up. For some time I have taken Vinol and have found that it brings vigor and life to the aged as nothing else will."

The reason Vinol is so beneficial to old people is because it is composed of two world-famed tonics—the medicinal elements of cod liver oil—and iron. Vinol tones up the digestive organs, aids assimilation, makes rich, red blood and strengthens every organ in the body.

We will cheerfully return money to all those who try Vinol and receive no benefit. Wm. Rutherford, Druggist, Nelson, B.C.

### CURIO IN VICTORIA

#### Century Old Chair Used by Sir Walter Scott.

An interesting relic, that would probably fetch a large price in the auction rooms of London, or New York is the mahogany, worm eaten chair in which sir Walter Scott sat while writing many of his best known novels. Nearly a century old its present owner is Mrs. Cuthbert of this city, says the Victoria Daily Times. Mrs. Cuthbert's father was a distant relative of the author of Waverley, and the latter bequeathed him the chair as a momentd.

Built on the pedestal plan, it is of comfortable proportions, the back being joined to the arms by means of two rams' horns, which are the distinguishing feature of the piece of furniture.

#### Preferred Suicide.

LISBON, Nov. 11—Alberto Costa, a former member of the chamber of deputies, committed suicide here yesterday. His act has created a tremendous sensation and the police are conducting an investigation. Senor Costa was a member of the Black Cross society which was involved in the assassination last February of king Carlos and the crown prince. It is believed that this society selected Costa by lot to kill the present king Emmanuel and that Costa preferred to kill himself to committing this deed.

#### Southampton Docks.

SOUTHAMPTON, Nov. 11—The White Star line negotiations which have been in progress for some time past for the construction of an immense dock here was concluded today. The new dock is to be capable of accommodating any vessel up to 1000 feet in length.

The London and S. W. Ry company, owners of the docks, will apply at the next session of parliament for power to construct the new dry docks.

#### Dublin City Hall.

DUBLIN, Nov. 11—The council chamber of the Dublin city hall was gutted by fire today and the city hall itself had a narrow escape from destruction. All the paintings in the rooms of the chamber, many of which were of historic interest, including the well known picture of Daniel O'Connell, were destroyed by the flames.

#### To Preserve Peace.

CONSTANTINOPLE, Nov. 11—The Turkish government has given an order in Germany for three hundred million cartridges for the Mauser rifle. Delivery must be made in two years.

B. A. ISAAC R. W. HINTON

Doors, Windows, Mouldings, Shingles, Turned Works and Brackets. Complete and up to date stock always on hand. Mail orders promtly attended to.

A. G. LAMBERT & CO.

# TRIP OF MINING EXPERTS

## THE CANADIAN MINING JOURNAL TELLS OF RECENT VISIT

## IMPRESSIONS OF NELSON AND OTHER PLACES IN INTERIOR

The following account of the trip of the members of the Canadian Mining Institute and their British an European guests through the Crow's Nest, Kootenay, Boundary and other interian districts, written by one of the party, appears in the issue of the Canadian Mining Journal of Nov. 1:

FERNIE.

Mr. G. G. S. Lindsay, president of the Crow's Nest Pass Coal company, and Mr. R. W. Brock, acting director of the Dominion geological survey, joined the party at Winnipeg and accompanied it throughout the trip to Alberta and British Columbia. It is needless to say that both these gentlemen did much to make the trip a success. Having had Mr. Lindsay with us for a few days, we felt perfectly at home on arriving at Fernie, the headquarters of his company. A visit was made to Coal Creek and the mines there. Members of the party expressed themselves as being much impressed with the great coal deposits of this company. The staff took much pains in showing the excursionists through the mines and over the surface plant.

Although Fernie, a town of about 5,000 people, had been practically wiped out by fire a few weeks before our visit, the members of the party were surprised to see what had been done towards rebuilding in the interval. Building was going on not only during the daytime, but the hammers could be heard far into the night. The rapid rebuilding of the town greatly interested the visitors. They here saw something of the pluck, determination and enthusiasm of the western people.

Among the few buildings that escaped the great conflagration were the general offices of the Crow's Nest company. Mr. Lindsey and his staff arranged a smoking concert for the party in the evening. Those who are acquainted with Mr. Lindsay's skill as an entertainer need not be told that the smoker was a great success. Mr. Lindsay not only made use of his staff, but he called on his worship the mayor of the town and the chief of police. Having the chief present he was able to make some members of the party perform who had never shown any signs of possessing a "lighter vein" on the earlier stages of the trip. However, having a piper to lead us, we all succeede din reaching the cars again some time after midnight.

MOYIE.

The party left Fernie in the early hours of the morning, and spent the next forenoon in a visit to the mine and plant of the St. Eugene mine at Moyie. This is the largest silver-lead mine in Canada, and the visit was much enjoyed. Proceeding from Moyie in the afternoon, the party, after leaving the railway, crossed Kootenay lake to Nelson, where they were met by representatives of the board of trade and other gentlemen, who promised them a good time when they re-visited the town in a few days.

BONNINGTON FALLS.

Leaving Nelson in the evening, the party made a night visit to Bonnington Falls, where the power for several large mines and plants is developed. L. A. Campbell and his staff showed the party through this modern and attractive plant. The company, which is known as the West Kootenay Power and Light company, Limited, had prepared a pamphlet, giving an account of their plant, which was of much assistance to the guests on their visit, and now forms an interesting souvenir of the trip.

TRAIL.

Having to make up time lost on the earlier part of the trip, it was found necessary to visit both Trail and Rossland in one day. This was unfortunate, as all the members of the party felt that they would like to have put in considerably more time in each place.

We arrived at Trail in the morning, and were met by the staff of the smelter and refining company, who showed us through their very interesting plant. Descriptions of the plant have appeared in the press, and it is not necessary to say more concerning it than that it proved to be one of the most interesting places visited during the whole trip. The electrolytic lead refining attracted much attention.

ROSSLAND.

Leaving Trail, the party proceeded to Rossland, where they were met by the local committee, and were entertained at luncheon, afterwards visiting the various mines of the camp. The stay in Rossland was, of couse, all too brief, but the party were shown some of the typical stopes and some of the deeper levels of the mines, and were gratified to see how promising the industry is at the present time. Between the visit to the mines and the banquet in the evening, the members were entertained at the attractive Rossland Club.

The banquet, which was presided over by Mr. A. J. McMillan, was a decided success.

The Rossland Miner, of September 19, gives a full account of the visit of the Institute to Rossland, and is one of the most interesting newspaper issues concerning the excursion which was published during the trip.

GREENWOOD.

After the banquet at Rossland the party proceeded to Trail, and left for Greenwood, arriving there in the forenoon. They were met by Mr. Keffer, who was president of the institute last year; Mr. McAllister, and other representative men of the district. A visit was made to the British Columbia Copper company's mine and smelter. This mine is of a different type than any we had seen on the trip, and it was a surprise to some of the party at least, to see what was being done with ore of this grade. The ore body had been systematically blocked out and sampled. So far as the mining is concerned, there is no guesswork about the operations. The same may be said of the smelter. The party were interested in seeing how few men it took to operate this smelter.

As explained by Mr. Keffer and Mr. McAllister, the success of the operations of the British Columbia Copper company depends on several factors. Firstly, the large size of the ore body; secondly, its uniform grade; thirdly, its being self-fluxing; fourthly, little or no timber being required in mining.

In the evening a smoker was held in Greenwood. This had its special features but it is not our intention to go into details concerning any affair of this kind.

PHOENIX AND GRAND FORKS.

Leaving Greenwood, the party proceeded to Phoenix, where are situated the mines of the Granby company. At Nelson we had been joined by A. B. W. Hodges, the general manager of the Granby company. Mr. Hodges is the very active chairman of the British Columbia branch of the Institute, and had given considerable time to organizing the trip in British Columbia. At Phoenix he and his staff showed us over the extensive works and plant of the mine. Some idea of the size of the works can be gathered when it is said that 20,000,000 tons of ore are blocked out. This ore, like that of the British Columbia Copper company at Greenwood, is self-fluxing. After luncheon provided by the company at Phoenix, the party left for Grand Forks to visit the smelter of the Granby company. They were there met by the mayor and other officials of the town, and given a hearty welcome to the town. It may be added that Grand Forks does not depend on the mineral industry alone, but that the surrounding country supports a very prosperous fruit industry. The mayor and the gentlemen accompanying him made our welcome concrete by presenting us with some baskets and boxes of beautiful fruit of the district, together with several bouquets of their flowers to be used on our dining cars.

The smelter at Grand Forks handles about 3,500 tons of ore a day, and it is said that in the not distant future 5,000 tons will be treated.

In the last volume of the transactions of the Institute an account of some of the operations of the Granby company is given. The paper which Mr. Hodge read during our visit to Victoria gives further details.

NELSON.

Leaving Grand Forks in the evening, the party proceeded to Nelson, where they were met by the local committee, of which Mr. Leslie Hill was chairman, and Mr. Beeston secretary. As the members of the party had been somewhat strenuously at work since their arrival in British Columbia, the Nelson local committee thoughtfully decided to give them a day of rest. They had arranged to give them a day of rest. They had arranged to take the party on a trip up the beautiful Kootenay lake, where we got glimpses of glaciers, views of fruit orchards and mineral springs, and at one point where we stopped some members of the party deserted us to enjoy themselves fishing for a few hours. Luncheon was served on the boat, and afterwards a call was made at the Blue Bell mine, where we were received by Mr. S. S. Fowler, who was president of the institute some years ago. The Blue Bell mine is a type of ore body new to some of us. Its development and the treatment of its ore by Mr. Fowler will be followed with interest by many of the party. On the return trip to Nelson dinner was served on the boat. In fact, it may be called a banquet. Everyone was surprised at the successful way in which this large dinner was carried out on board the steamer. It is only necessary, however, to say in explanation that the service was under the direction of the C. P. R. officials.

After dinner on the boat, Mr. Hodges showed that he could do something more than run the largest metal mine in Canada and organize excursions. He showed that he had musical qualifications. He took charge of the piano, and, others assisting him, a successful musicale was given.

On arriving at Nelson about 9 o'clock it was found that our train would not leave till about midnight. The party was therefore invited to the Nelson Club to spend the intervening hours. It would not be well to describe in detail what happened at the club. Some members of the party might not be let go away from home again. One feature, however, of the entertainment at the club will long be remembered. It might be called the union of nationalities, six men, representing six different nations, standing together on what we shall speak of as an elevated platform, and one after the other making a speech characteristic of his country. The performance with the interpreter was especially good.

REVELSTOKE.

The party left Nelson and proceeded to the Arrow lakes, where boat was taken to Arrowhead, our cars having been ferried across ahead of us. From Arrowhead we proceeded to Revelstoke. The scenery on both the lake and in the vicinity of Revelstoke proved very attractive to most of the party, as did also the trip through the Fraser Canyon and on to Vancouver.

### SCALDED BY BOILING FAT

#### Couldn't Use Her Hand for a Month.

#### Zam-Buk Gave Instant Relief.

An accident in a Toronto home might have had very serious consequences had it not been for Zam-Buk. Miss Martha Green of 9 Claremont street, in taking a pan of boiling fat from the oven, spilt it over her right hand. "The boiling fat ran into the palm of my hand," she says, "and over all my fingers. I was almost wild with the pain. The hand became swollen and large blisters formed all over the palm and along the fingers. For over a month I was unable to use the hand at all. I tried several kinds of salves and liniments, but the wound seemed apparently no better. It was altogether too severe for these preparations to heal.

About this time I was advised to try Zam-Buk. I stopped using all other preparations and applied it instead. The very first application soothed my hand and seemed to draw out the fire and inflammation; and as I kept on using Zam-Buk the blisters gradually dried up and disappeared. In a very short time the scald was healed completely."

This is but one instance of the uses to which Zam-Buk can be so advantageously applied. It is equally effective for burns, cuts abrasions, bruises, sprains and stiffness. It also cures eczema, ulcers, sores, blood poisoning, ringworm, scalp sores, chronic wounds, blackheads, pimples, cold sores, chapped hands and all skin diseases and injuries. Rubbed well on to the chest in cases of cold it removes the aching and tightness, and applied as an embrocation it cures rheumatism, sciatica, neuralgia, etc. All druggists and stores sell at 50c. a box, or post free from Zam-Buk Co., Toronto, on receipt of price, three boxes for $1.25.

#### How to Cure a Cold.

Be as careful as you can you will occasionally take cold, and when you do, get a medicine of known ability, one that has an established reputation and that is certain to effect a quick cure. Such a medicine is Chamberlain's Cough Remedy. It has gained a world wide reputation by its remarkable cures of this most common ailment and can always be depended upon. It acts on nature's plan, relieves the lungs, aids expectoration, opens the secretions and aids nature in restoring the system to a healthy condition. During the many years in which it has been in general use we have yet to learn of a single case of cold or attack of the grip having resulted in pneumonia when this remedy was used, which shows conclusively that it is a certain preventive of that dangerous disease. Chamberlain's Cough Remedy contains no opium or other narcotic and may be given as confidently to a baby as to an adult. For sale by all druggists and dealers.

Best Hot Lunch at the Athabasca.

Minard's Liniment Cures Diphtheria.

NELSON LAND DISTRICT, DISTRICT OF WEST KOOTENAY.

TAKE NOTICE that I, W. S. Clark, farmer, of the city of Brandon, in the province of Manitoba, intend to apply for permission to purchase the following described land:

Commencing at a post planted on the northwest corner of the location of Maria Friesen, which corner is 80 chains north of the south west corner of the said Maria Friesen's location post, and which last mentioned post is 120 chains in an easterly direction from where Little Cayuse creek crosses the eastern boundary line of block 5817, thence north 40 chains; thence east 40 chains; thence south 40 chains; thence west 40 chains to the point of commencement, and containing 160 acres more or less.

# RELATIONS WITH ITALY

WHAT CANADA MIGHT DO REGARDING IMMIGRATION

BRITISH AMBASSADOR TO ROME TALKS ON SUBJECT

Sir Rendell Rodd, under appointment as British ambassador to Rome, who sat on the platform while lord Milner addressed the board of trade yesterday afternoon, is a diplomat of the Milner type—at least in one sense—he is an Imperial diplomat, says the Montreal Star.

Sir Rendell revealed the imperialism of his outlook on world politics and his relation to it by his explanation to the Star of the circumstances under which he came to visit Canada.

"As the ambassador of the king, I believe I am also ambassador to the empire, said he, "and therefore when I was fortunate enough to get a little time between two appointments, I took advantage of it to visit the Dominion. I have met a good many people—I had an interesting talk with sir Wilfrid Laurier yesterday—and I return to my work with a good deal of information in relation to the empire."

Sir Rendell is a little over medium height. His hair is grey and his grey moustache is expressive of alertness, which also reigns in his keen eye. As becomes the diplomatic representatives of his majesty, his address is easy yet direct. In conversation he discussed some half dozen issues in a light discursive style, touching them lightly but diplomatically.

"Yes," he said, "I should think that there was opportunity for considerable development of trade between Canada and Italy. The Italians have always had a friendly feeling for England and that should extend to the rest of the empire."

"What do you think of the European situation?" was asked.

"I am hardly in a position to express an opinion of much value," he replied. "I have been away from the scene and papers so long. But I have always been an optimist. It it unfortunate that this should have occurred at a time when Turkey was trying to put its house in order. But the change is not after all of so much real importance. It is formal rather. Yes, I am rather optimistic."

"And the kaiser's indiscretion?"

Sir Rendell Rodd smiled.

"I would rather not say anything as to that," he said. "You know diplomats are supposed to keep their mouths shut. It is their business to keep the peace; and I suppose when they do not," he added, laughingly, "they should be hanged."

Just while shaking hands with sir Rendell, the Star representative mentioned the difficulties which we have had in Canada with Italian immigrants. "A writer on immigrattion," he added, "has suggested an international agreement to regulate immigration and emigration, so that all the immigrants should be of the desirable class and and each country should keep at home its undesirables. Do you think any result could be reached with the Italian government by a conference along such lines?"

"The Italian Emigration Bureau," responded sir Rendell, "is under government control, and is an excellent institution. I think that by working through that bureau good results could be secured; and a better class of immigrants obtained if it was made clear for what purpose they were desired. I do not see that much could be gained by an international conference."

Examine the Trade Mark when you buy spoons, forks, knives, etc. If it is "1847 ROGERS BROS." you are sure of your money's worth in artistic patterns, style, finish and quality. SOLD BY LEADING DEALERS. Pitchers, urns, dishes, trays, etc., of extraordinary beauty and wearing quality are made by MERIDEN BRITA CO.

## I. C. S. Trained Men Win

The I. C. S. brings a six-million-dollar equipment and an experience of nearly 17 years in the sole business of salary raising training to the personal advancement of every one of its students. It assists these men in their own homes, in their spare time, and at a cost arranged to suit their own individual circumstances. It overcomes all obstacles of lack of time, money, or education, and secures for poorly paid wage earners such advancement as they never hoped for before. What the I. C. S. has done for thousands of other men it can do for YOU.

Room 1, Wood Vallance Block.
R. LAWRENCE, Representative.
Address: Box 741, Nelson, B. C.

### TODAY'S CONTEST

Today the deferred elections in Kootenay and Yale-Cariboo will take place, when the people of these two constituencies will have an opportunity of declaring themselves on the questions of better terms and a white British Columbia, other Dominion issues having been obliterated by the result of the general elections on Octobe 26.

The campaign in the two constituencies has been a particularly long and trying one, owing to the action of Messrs. Duncan Ross and Smith Curtis in postponing the date of the elections until seventeen days after polling in other parts of Canada. There was absolutely no excuse for deferring either of these elections. It was done by Messrs. Curtis and Ross simply and solely in the hope that the Laurier government might be returned and that that fact might influence some people to vote for them who otherwise would not. This was taking it for granted that at least a certain number of people in each of these constituencies could be induced to forget the issues of the campaign and to vote for Messrs, Curtis and Ross in answer to the plea which has been put forward that as supporters of the government they might be able to direct into Kootenay and Yale-Cariboo some of the crumbs in the way of public grants which fall from the federal table. In other words the elections in these two constituencies were deferred in order that Messrs. Curtis and Ross might have an opportunity to bribe the people of Kootenay and Yale-Cariboo by the wholesale by promises of public works to which these districts are entitled no matter who is elected today.

The time allowed by the government between the dissolution of the house and the date of the election was six weeks, ample time for the holding of the election in any riding in Canada, with the possible exception of the Yukon. The campaign was carried on in Kootenay and in Yale-Cariboo as vigorously during these six weeks as in any other part of Canada, but when, on the evening of October 26, the elections were over in all but a few other ridings, which had been treated in the same way, the people of Kootenay and of Yale-Cariboo had two weeks and a half more of campaign before them.

This time has been taken advantage of by Messrs. Curtis and Ross to import from other provinces election workers of different kinds in the determination that if they could not influence the voters one way they would in another. Messrs. A. S. Goodeve and Martin Burrell on the other hand have put up a good, clean fight and have done their best to keep the issues of the campaign, better terms and a white British Columbia, to the front. On these they and their supporters have appealed to the intelligence and the patriotism of the electors, firm in the belief that the sinister influences which their opponents have tried to exert would fail in their object.

Under the circumstances there should be no question of the election of Mr. Goodeve in Kootenay and of Mr. Burrell in Yale-Cariboo. Not only that but it is not too much to expect of the people of Kootenay and Yale-Cariboo, that, in the interests of British Columbia, they will give Mr. Goodeve and Mr. Burrell majorities of such magnitude that there will be no doubt left in the minds of the government as to where they stand on the questions of better terms and a white British Columbia.

### NEWFOUNDLAND ELECTIONS

The result of the Newfoundland elections held a week ago Monday is now known and the result is shown to be a tie, each side having eighteen members in the house, the total membership of which is thirty-six. What will be the result is a question of the future but the natural course would be the resignation of the government of sir Robert Bond and the formation of a new cabinet by sir Edward Morris, leader of the opposition in the last house, followed by another appeal to the country.

The issues in the recent campaign were largely local, although the question of confederation with Canada figured somewhat in it. the government charging the opposition with being in favor of such a step. Either the people did no ttake this charge seriously or they are beginning to favor union with the Dominion. If the latter is the case confederation may be expected to figure more prominently in the next election and the door may be opened to bringing all British North America under one government as it should be.

The manner in which elections are conducted in Newfoundland, while generally agreeing with the system in Canada, has one decided difference, and it is in regard to counting the ballots. Polls are held in various of the different constituencies the same as in Canada but when they close at 8 p. m., after having been open from 8 a. m., the deputy returning officers do not count the ballots but straightaway deliver their boxes to the returning officer who does not open any of them until he has them all in his possession. The boxes are then all opened at the same time and the ballots from all of them dumped in one heap on a table and mixed up. The returning officer then counts them all. Owing to the distances to be travelled in some cases by the deputies it is sometimes a week or more before it is known who has been elected in some of the constituencies. This explains the delay in the receipt of the returns of the late election.

One of the advantages claimed for this method of counting the ballots is that it is impossible to tell how any man has voted or how the people of any particular part of a constituency have voted. The result of the polling is a declaration by the people of the constituency as a whole and it is impossible for a successful candidate to punish any part of his constituency for having voted against him or to judge from the results whether there is any particular part which it would be advisable to cultivate by means of public grants with a view to currying favor for the next election. It is just a question whether it would not be in the public interests for Canada to copy the Newfoundland method of counting ballots. It would certainly do away with one of the evils which today affects public life in this country.

### EDITORIAL NOTES.

Vote early.

Today tells the tale.

Keep a close eye on the ballot boxes.

Success to you, Mr. Goodeve, and to you, also, Mr. Burrell.

Safeguard Kootenay's interests by voting for Mr. A. S. Goodeve.

Vote for Mr. A. S. Goodeve, better terms and a white British Columbia.

There should be no let-up until the last vote is polled. Every vote counts.

Opposition scrutineers should see to it that none of those Ontario trick ballot boxes are used.

Opposition scrutineers should insist on seeing every ballot as it is counted. Ballots have been switched before now. While the men appointed to act as deputies in Nelson would not do anything of the kind, arrangements for this kind of work may have made at outside points.

Kootenay wants better terms and demands that the Dominion of Canada control its own immigration laws. Mr. Smith Curtis and his party are opposed to these.

If the Laurier government had had its way the Chinese and Japanese in Kootenay and Yale-Cariboo would have the same right to vote today as white men.

Says the Toronto Star: "Thankful for small mercies, let us be grateful that president Taft has only three children for the magazines and newspapers to talk about."

Mr. Smith Curtis arranged to leave the election in Kootenay deferred so as to gain an unfair advantage. The voters should show Mr. Curtis today what they think of him.

The work of those Alberta and Saskatchewan politicians will be finished tonight after which they can leave for their homes. It is to be hoped, at least, that they will have enjoyed their visit.

After tonight, if nothing happens in the meantime to prevent his departure, Mr. Duncan Marshall can leave for Edmonton, to continue, as manager of the Bulletin of that city, his fight there against trades unionism.

Referring to the comments of his paper, the Victoria Daily Times, regarding Hon. William Templeman's defeat in Victoria the Montreal Star says: "We judge from the remarks dropped by Hon. William Templeman that it is not polite to pull a gentleman's chair from under him that way."

The people of Kootenay must set to work at once to offset the black eye that Mr. Smith Curtis gave the district by postponing the election and thereby proclaiming to the outside world that the country was so lacking in transportation facilities that it took seventeen days longer to distribute the ballot boxes than in other constituencies. A nice idea of the country this must give outsiders.

### GERMAN AND ENGLISH WOMEN

**Young German Girl is Essentially a Housewife.**

One of the things in which the German woman differs from her English sister is that every German girl, when she reaches the age of 17 or 18, is sent away from home to some family a long way off, who send one of their own daughters in exchange. According to the Gentlewoman, this exchange lasts for about three years.

The girl is treated as one of the family, is styled Faulein, but in every other respect is a mere servant. She has to do all the work of the house, scrubbing, washing, cooking, mending—in fact, everything that a domestic servant is required to perform.

This does not leave her with much leasure for play, and the outdoor sports of an English girl are quite unknown in Germany. A Germany lady on being told that English girls played tennis and hockey, expressed her contempt for such foolery and asked who did the housework. On being informed that no English girl or matron would dream of turning to and doing the cooking, etc., she gasped out: "Oh, Lord! What a lot of lazy huzzies!"

Every German woman has all the work of her home on her shoulders, and by this is not meant the lower class woman. No German lady thinks of having more than one servant, who gets $25 a year, and does the rough work, her mistress doing all the cooking and mending.

### NOVEL EXPERIMENT

**Professor Bell's New Air Ship Will Glide Over Water.**

HAMMONDSPORT, N.Y., Nov. 11—The aerial experiment bureau of Hammondsport, in which Prof. Alexander Bell and G. H. Curtis are interested, is planning to undertake soon a novelty in aerial experiments. The government is especially desirous of having an airship that will gain the necessary speed to soar in the air by gliding over the water. All experiments made by Mr. Curtis and his associates, the "Whitewings," "Reddings," "June Bugs," and other airships have gained this desired momentum by running over the ground on bicycle wheels until the huge wings expand, giving the desired soar. The experiment bureau will within a few days undertake experiments on lake Keuka where the airship will be propelled by its own motor over the surface of the water to get sufficient speed to expand its wings. The airship will be attached to light canvas canoes, which will be carried with the machine as it leaves the water to fly into the air. A doubtful feature of the experiment is that possibly the weight of the airship with its motors and other machinery may cause the canoes to draw so deeply in the water that the required speed cannot be obtained.

### KING EDWARD'S MONOPOLY.

**Controls Printing of Prayer Books and Bibles.**

Although no work of reference that I can find makes any mention of the fact, yet king Edward, by virtue of his hereditary office of sovereign and supreme head of the church of England, enjoys, like his predecessors on the throne ever since the reign of James I., the monopoly of printing the so called "Authorized Version" of the bible, and of the book of common prayer; that is to say, of the liturgy, writes the marquis de Fontenoy. Licenses are granted in his name to the Oxford and Cambridge university presses and to certain societies to print and publish the bible and the prayer book. But this can only be done with his permission and were he to will it, he could be a mere decree, put a stop to the printing of every Anglican bible and prayer book in in United Kingdom. Under ordinary circumstances copyright privileges do not extend beyond 42 years, or for the life of the author and seven years following, whichever may be the longer. But here is a copyright that has extended for centuries, and its continuation can best be explained by the legal fiction that the sovereign never dies, and that the so called "demise of the crown merely consists of the transfer of the royal authority from one person to another. Thus, any firm of publishers or individual taking upon themselves or himself to print and issue a bible or a liturgy of the church of England, without having obtained the sanction of the rown, would be liable to all the pains and penalties provided for infration of the copyright laws. The king also enjoys the monopoly of printing all acts of parliament, proclamations and orders of council; that is to say decrees of the privy council, and this right he farms out to a couple of publishers, who are known as "the king's printers."

### Attack Ferdinand.

SOFIA, Nov. 11—The national assembly today was the area of a notable republican demonstration during the debate on the address in reply to the royal message. The cabinet failed to control its own supporters and several members of the goernment's majority delivered the most violent attacks upon emperor Ferdinand ever heard within the walls of the assembly. The growing influence of the crown was denounced as disastrous to the liberties of the people and the ministers were warned that the nation was in no mood to pay too dearly for the new crown, or to suffer its interests to jeopardy for the gratification of monarchical ambitions. There were frequent interruptions and calls of "treason." The presiding officer and ministers exhausted every means to silence the speakers but the house bestowed a sympathetic hearing.

### NOT GUILTY

**Former Pastor of Italian Church Acquitted on Murder Charge.**

RUTLAND, Vt., Nov. 11—The prosecution in the case of Rev. Father Francis Crociata, former pastor of the Italian church here, who was indicted on a charge of being an accessory to the murder of Santaro, a Sicilian, has withdrawn all the counts relating to complicity in the killing. The state decided that there was no evidence to show that Father Crociata conspired to bring about Santaro's death. The testimony yesterday of Lena Black, a 17 year old girl, was to the effect that the priest had arranged a plan whereby Santaro was to be chastised by several fellow countrymen for his alleged objectionable attention to the girl, but that during the chastisement a quarrel arose and Santaro was slain unexpectedly.

### Bear Stole Milk.

Olivia Chester of Silverdale, B. C., whose father's farm is not far from the centre of the village, took an extra reef in her gingham dress and started out to milk. She had the pail nearly filled when along came a bear.

So suddenly did the bear appear that Miss Chester was startled and droped the pail of milk. This was the opportunity the bear had been waiting for. Miss Chester tried to shoo Bruin away, but the bear refused to move until he had drunk the milk.

When Miss Chester left the milkhouse the next evening she carried the pail in one hand and a rifle in the other. She decided that if the bear made another visit she would give him a warm reception. She placed the rifle against a tree and began to milk. While she milked she kept an eye on the timber line.

The bear did not appear until the pail was full and then he came in a hurry. Miss Olivia went through the same motions as on the previous evening and momentarily deserted the milk-pail. The bear buried his head in the pail like a pig, but at that moment Miss Chester shot him.

### Unitarian Conference.

TROY, N. Y., Nov. 11.—The twenty-fourth annual meeting of the Unitarian conference of the middle States and Canada opened today at the All Souls church here. The conference sermon was preached tonight by Rev. Ults G. Pierce, of Washington, D. C. Officers will be elected tomorrow and there will be addresses by clergymen from different parts of the country.

### Off for South Seas.

VICTORIA, Nov. 11—H. M. S. Shearwater, has left for the South seas. After a call at Sandiego she will proceed to call at Capulco where she will await the coming of H. M. S. Algerine which is expected to leave Esquimalt on 20th inst. The two vessels will then steam south and may go as far as Australia returning about next April.

## COAL
ICE, COKE and WOOD
We Have in Stock and Can Deliver Promptly the Well Known CALT COAL
The Kootenay Ice & Fuel Co. Office Phone 265 N.E. Cor. Baker and Ward

## Prepare for Christmas

Our Christmas goods are arriving daily and we already have an immense stock of Christmas goods in our show cases. We wish especially to call your attention to the fact that you can buy your Christmas presents now at prices much below what you will have to pay later on and you have the first choice from our stock.

**Protect Your Eyes**
This is the time of the year when your eyes require the most careful attention. If you consult a competent optician now it may mean all the difference between years of comfort and agony. We are prepared to give you the benefit of the most expert optical work to be had in the city.

**Watch Repairing**

If your watch or clock is out of repair bring it to us and be assured that it will be given expert attention and will in future give you entire satisfaction. We make a specialty of this class of work.

### PACIFIC TIME.

People are reminded that Pacific time will prevail throughout the entire constituency of Kootenay so far as the opening and closing of the polls in the election next Thursday is concerned. This will apply in east Kootenay and means that the polls will open and close an hour later than local time there. In Nelson legal time instead of city time, will prevail.

### FERNIE NOTES

**Former Hotelman Dead Political Meetings Over.**

(Special to The Daily News.)

FERNIE, Nov. 11—The political pot is boiling harder than ever as the date for the deferred election in the Kootenays draws near, and in this section of the riding at any rate the fight promises to be a hot one with the odds strongly in favor of the conservative candidate. Last night there were meetings of the committees of the different parties to put the finishing touches to the campaign, tonight the last guns were fired from the political platform by the conservatives and socialists. The conservatives are more enthusiastic than ever and determined to place A. S. Goodeve at the head of the polls.

It was with deep regret that the many friends of Joseph Jean, late proprietor of the Imperial hotel here, learned today of his death which occurred in Hosmer on Monday, after a short illness. Deceased had resided in Fernie for some years where his genial disposition and strict integrity won for him the respect and confidence of all classes in the community. The remains will be taken to his old home at Three Rivers, Quebec, for interment. He leaves a wife and three children to mourn his loss.

### DUE WARNING

**Hungarian Premier Says Servia Must Be Peaceful.**

BUDAPEST, Nov. 11—Speaking in the lower house of the Hungarian parliament today, president Wekerle declared that the Austro-Hungarian government had no intention of assuming any part of the Turkish national debt in connection with the annexation of Bosnia and Herzegovina. The occupation of these provinces has wasted the finances of Turkey and had proved at the same time proportionally costly to the dual monarchy. He said annexation had not in any way altered Turkey's financial position. Continuing the premier uttered a warning note regarding the bellicose attitude of Servia. He hoped these threats of war would cease before Austria-Hungary was compelled to use the resources at her command to force a cessation of these preparations for hostilities.

### REGULATE TIPPING

**Continenal Hotelmen Decide on a Scale of Distribution.**

NEW YORK, Nov. 11—Special cable dispatches from Rome say the International Hotelkeepers congress, which has been in session here for several days wound up with a discussion of tipping. The expression was practically unanimous that the habit was eradicable, the greatest obstacle to its abolition being the unwillingness of a large class of travellers to renounce the right of awarding the special attentions of servants.

It was resolved that as the custom could not be abolished, it was desired to regulate it. Therefore when travelers wished it, hotel keepers might undertake to distribute tips, charging therefore 15 per cent. of bills not exceeding $4 and 10 per cent. of higher accounts.

### DEATH VALLEY

**Earthquakes Causing Miners and Prospectors to Leave District.**

SAN BERNARDINO, Nov. 11—Death valley and the surrounding country are in the throes of a series of earthquakes which began three weeks ago and the most violent of which occurred on Wednesday causing consternation. Many miners and prospectors have fled from the region. For three weeks there has been one or two rumbles daily. The dismal crags of the funeral range seemed to totter when a more severe shock came last week. Miners were tossed from bunks, camp equipment was scattered about, horses and mules stampeded and immense boulders were thrown down.

### FOOL KILLERS

**Deer Hunters in Wisconsin Woods Shooting Each Other.**

MILWAUKEE, Nov. 11—Although the deer hunting season did not begin until today, a score of hunters already have been killed and two score wounded in the Wisconsin woods this fall. In two cases it is reported that men shot in mistake for deer were left to bleed to death, the careless hunters preferred to run away and leave their victim rather than pay the fine for hunting in the closed season.

**Tom Johnson's Finish.**

CLEVELAND, Nov. 11—Judge Taylor in the federal court this afternoon held that the municipal traction company was insolvent and said a receiver would be named tomorrow. Judge Taylor decided that the franchise of the railway company was taken away at the referendum election.

Best Hot Lunch at the Athabasca.

Minard's Liniment Cures Colds, Etc.

## HOW ZINC IS EXTRACTED

### METHOD WHICH HAS BEEN ADOPTED IN AUSTRALIA

### MAKES BIG DIFFERENCE TO THE SILVER LEAD MINES

The problem of remunerative zinc extraction at Broken Hill, New South Wales, has become almost finally solved, and the enormous wealth of Australia's silver city bids fair to become largely increased by the utilization of the immense quantities, estimated at several million tons, of what have hitherto been regarded as waste products.

There are several processes, more or less successful, but that which has attracted most attention is the one adopted by the Broken Hill Proprietary company and put in operation at the company's works at Port Pirie, which, although situated in South Australia, constitutes the shipping port for Broken Hill. The works were commenced in 1905, with a view to treating a portion of the zinc concentrates obtained from the company's property at Broken Hill, but in undertaking the task the company's officials found themselves placed at a considerable disadvantage, none of them having any experience in connection with the production of zinc. But Mr. Delprat, the general manager, and those associated with him, never entertained the slightest doubt of ultimate success. It was simply a question of time and patience.

With a view to securing the services of an expert, Mr. Delprat made a visit to Europe, where he inspected the leading zinc works in Germany and Belgium, which are reputed to be the largest zinc producing countries in the world. In Germany he secured the services of C. Arnemann, an expert of high standing, and who arrived at Port Pirie in October 1907. Simultaneously with his arrival a start was made with an entirely new plant for zinc distillation purposes. It consisted of a furnace, a gas producer for the supply of the necessary fuel, boiler for the producer and other parts of the plant, a fan for blowing in air to cause combustion in the furnace, and the stack and buildings required for the workings of the plant. It was, in fact a complete remodeling of the earlier works, and invlived considerable expense, which was readily met by the company.

In May last everything was in full working order, the furnace being the largest of its kind yet erected, and the reconstruction retort pressing plant being found remarkably efficient. With the commencement of working operations, the furnace was found capable of producing two and one-half tons of spelter per day.

Before the production of spelter could be commenced it was found necessary to procure suitable clay near the works, so that the cost of delivery should not be prohibitive, and it was with great difficulty that the right kind of clay was obtained. The importance of a suitable clay is explained by the fact that the retorts made from it have to stand a heat which at times exceeds 1,500 deg. C., and are pressed by a hydraulic press at the pressure of about 3,000 pounds to the square inch.

It is stated that the coal consumption in connection with the works does not exceed one pound for every one pound of ore treated, and to emphasize this the same coal, by using the waste gasses in the boiler, not only produces the necessary steam for working the plant, but extra steam is generated for the drying retors. It is found that Australian coa is in every way adapted to the work required.

Some idea of the magnitude of the pant may be formed from the the fact that in the construction of the furnace about 500 tons of fire bricks were employed. The fire room is about 30 feet long by 13 feet wide, with a height of 8 feet to the top of the arch. There are 144 single retorts in the furnace, and four burners supply the necessary heat. The furnace is on the same principle as that used by the firm of Schmidt & Desgraz, in Hanover, Germany, for all kinds of reverberatory furnaces for iron, steel, copper, zinc, lead, glass and ceramic purposes, the method of heating employed allowing a much larger hearth to be heated evenly than by the ordinary furnaces which are fired direct.

Another advantage is the saving of metal by using a neutral or reducing flame, thus reducing the losses occasioned by the oxidation of the metals.

The history of the Port Pirie works of the Proprietary, as a whole, has been related by Mr. Delprat, who states the smelters commenced on a small scale about 22 years ago. They did not attract much attention at first, but additions were continually required, until the works became the largest in the Commonwealth. At the present time the weekly out put of bullion is over 2,000 tons or about 100,000 per annum. The total quantity produced is equal to about one-third of the whole output of the United States, and over one-tenth of the world's production. Nearly all the Broken Hill mines are anxious to have their own ores treated at Port Pirie, but at present the works are being employed to their full capacity, and further contracts would necessitate costly extensions.

All his is apart from the work of the Zinc Corporation plants at Broken Hill, where the Elmore process is giving excellent results. It is a remarkable example of the perfection attained in automatic work. The tailings are brought in railway trucks to the works and shovelled into a large bin. With this exception the whole of the work is performed automatically.

At the bottom of the bin, which is under a railway siding, are four Challenge feeders, which feed the sands into a wide conveyor belt, which in turn feeds another belt, crossing at right angles and carrying the stuff to the top of the plant. While travelling the belt passes under a strong electro-magnet, which clears it of all iron and steel, and midway transfers through a trommel, which picks out any bits of wood, rag, etc. At the top of the mill the sand is fed into the bins by an automatic tripper, which passes from end to end of the building, feeding regularly and steadily, and reversing, of its own accord, at either end.

The whole of the work is supervised by a single employee from the time the tailings leave the railway trucks until they enter the bins which lead into the grinding section, preparatory to being treated by the Elmore process, the plant for which covers a couple of floors, and includes 16 units. Each unit comprises a circular conical settling tank, 8 feet in diameter by 8 feet in depth, which receives the pulp (the wet ground tailings) from the grinding section. This tank is fitted at its tower end with an Elmore patent pulp vave, which automatically delivers a regular charge of thickened pulp (which is continually accumulating in the tank) to the mixer, a simple horizontal trough (wooden) fitted with a shaft revolving at a comparatively slow speed, on which are mounted woden beaters.

Oil and acid in small quantities are introduced in the back end of the mixer, and become mixed with the pulp immediately on its entering from the settling tank. In certain cases, too, a limestone pulp is introduced into the mixer, in cases wher the tailings pulp requires and in creating the necessary carbon dioxide gas. (This is necessary with the Block 10 tailings now being treated. The limestone is crushed and powdered in the plant, and conveyed as a pulp by narrow lauders. The oil and acid are thoroughly incorporated with the pulp, and the mineral particles receive the necessary preparation for rendering them in a condition to separate from the gangue when sujected to the vacuum applied to the separator, into which the agitated pulp in this prepared state is next passed.

Each unit is provided with a small motor-driven vacuum pump, which drives the mixer and revolving portion of the separator. Th agitated pulp, in which the mineral is not yet floating, is subjected to a vacuum by being sucked up a long feed pipe into a circular pan (the separator.) The bottom of this is provided with a revolving rake and furnished at its circumference with an annular lauder, having four discharge pipes for the tailings. The conical cover has at its top an annular discharge lip, over which flows a small quantity of the water entering with the pulp and carrying the oiled and floating material.

The tailings discharge pipe and concentrates discharge pipe are carried down so far below the separator and into water that the vacuum is "water sealed." So a continuous discharge of both products is secured. The tailings and concentrates are delivered on to submerged draining belts, which rise on on inclined slope out of the trough, and so are partially drained. The tailings go direct to the residue dump, and the concentrates, via a roaster, to the wet mill, the treatment in which does not possess any features of special intere t. —John Plumber, M. E., in the Mining World.

## HOMESEEKERS

I have some very choice locations in the Whatsham valley unimproved but carefully classified and easily brought under cultivation. The price is based on the number of acres of 1st., 2nd. and 3rd class land in each block.

I have also some improved dairy poultry and fruit farms in "Fire Valley." Come to Needles or write for particulars.

C. B. M'ALLISTER, Needles, B. C.
Fifty miles by boat from West Robson on Lower Arrow lake.

**PHYSICAL CULTURE.**

Classes are now being formed and will be held by Miss Sanderman, at 634 Victoria Street, (next fire hall) from October 1st. For information and further particulars address Box 66, Post Office, Nelson.

We Sell the Same Goods for Less Money — One Price for Everybody and That the Lowest

Store opens daily at 8 a.m. **MEAGHER'S** Store closes at 6 p.m.

**$35.00 and $40.00 Suits for $25.00**

This is undoubtedly the biggest suit snap of the season. They're the very latest of this season's goods. The coats are 36 to 40 inches long, some tight fitting and some semi-fitting made in several tailored styles and also elaborately trimmed with braid or buttons, silk or satin lined in plain goods, or striped effects in such colors as navy, brown and green; your choice today (and it's a bargain) at ...$25.00

Corner Baker & Ward

## A Snap

15 acres of the choicest Kootenay fruit soil, level; stream of water running through the property; situated in the centre of the improved ranches at 13-mile point. Must be sold QUICK. The owner has instructed us to accept

**$75 Per Acre. Terms One-Third Cash**

It's a bargain; the land is good.

**See TOYE, TAYLOR & McQUARRIE**
Real Estate :: Nelson, B. C.

## BE UP-TO-DATE

Up-to-date boats at up-to-date prices are only possible by the use of up-to-date machinery by up-to-date men.

We employ none but the bes men in the country and a complete outfit of first class machinery will be installed in our new factory in a few days.

Our boats are not racing machines but our guarantees as to speed are backed with good hard cash all the same.

The Smalley engines are guaranteed to develope more power per unit of fuel consumption than any other engine on the market. So much for efficiency.

And they are not expensive engines either. Now is the time to order if you would be sure of quick delivery.

**The Kootenay Motor Boat Co.**

## A New 5-Roomed House and Lot for $650 Cash

This is a RUSH SALE owner NEEDS THE MONEY. And will make this great sacrifice if he can sell at once. The price on terms is $750; one-third cash.

Figure it out—A new house on Carbonate street will rent easily for $12 or $15 per month which pays over 20 per cent. on the investment. The lot alone is easily worth $350. This is a great snap and it will pay you to look the property over anyway.

# PLEASES TORONTONIANS

### SHEFFIELD CHOIR DELIGHTS A LARGE AUDIENCE

### WHAT CRITIC SAYS OF THEIR FIRST APPEARANCE

*The Toronto Mail and Empire* had the following to say regarding the first appearance of the famous Sheffield, England, choir in that city recently:

"I know him, he comes from Sheffield," was a line which became famous through the presentation of that delightful farce, "A Pair of Spectacles," by John Hare. Thereafter the phrase will have a new meaning for Torontonians. Whenever they hear a good voice they will be inclined to reiterate the phrase. The brother from Sheffield has arrived and one is obliged to look up the Latin phrase book, for this is clearly a case of "Veni—Vidi—Vici." United States newspapers have christened Toronto "the choral capital of North America," and the city proved its enthusiasm by the great throng which turned out to the Sheffield choir at Massey hall. When it is said that it surpassed all expectations and justified all the superlatives that have ever been uttered about it enough has been said. Moreover its members sang under conditions when no organization could be at its absolute best. When one considers the concert of last night one is obliged to ask, "What must this organization be at home—when it is playing on its own grounds? (to borrow a term from the sporting column). Its members arrived in a new country after a sea voyage on Sunday last. They have sung nightly and have traveled seven hundred miles by rail since then. They sang in a rink at Ottawa on Wednesday night under freezing conditions, when they were obliged to don overcoats and wraps. They sang last night in an overheated hall. It would therefore be folly to assume that they were at their best But their second best is so dazzlingly fine as to tempt one to run the gamut of superlatives. Canada has before now proven that in the technique of choral expression it can face the world, but it is to be feared that Canada never will, so long as her meteorological conditions remain what they are, be able to assemble a choir of such exquisite tonal quality in every range as this body of singers from the North of England. For the Tercentenary celebration at Quebec Mr. Joseph Vezina gathered together a body of French-Canadian singers that in one section—that of the sopranos—in sweetness and quality, made visiting conductors break the tenth commandment. But there was no balance, through the untring and enthusiastic labor of the conductor, but higher essences of tone—the quality that differentiates the great voice from the fine voice—this has been almost unattainable. In the Sheffield choir we encounter a perfect balance of tone, with voices so beautiful that it is impossible to say that one section is better than another. And unquestionably Dr. Henry Coward deserves to be known as probably the greatest of living choral conductors. Given superb material to start with, he has disciplined it, wrought upon it and developed it until it sings not with "the divine lust of song," but with an ultimate refinement of expression that makes the singing of the Sheffield choir a revelation, even in the most familiar numbers.

It was good policy to open the Toronto visitation with a condensation of Handel's "Messiah," with which every man, woman and child who takes an interest in the higher forms of music is familiar. Half the audience was competent to criticize the rendering of the chorus from this work, and spontaneous expression of delight at the wonders achieved by the conductor followed each number. The error of providing too long a program was rectified when the second part of the program was slashed. The Chorus of Demons, from Elgar's "Dream of Gerontius," the most important novelty on the bill, was sacrificed, and, apart from the Handel choruses, the most important work sung was Bach's "Sanctus," made familiar to us last winter by the noble rendering of the Mendelssohn choir.

Moreover Dr. C. A. E. Harriss, the impressario, in the daring enterprise of bringing so large a body of singers to Canada has been more than generous in the quality of soloists that come in association with the choir. One of these especially, Miss Emily Breare, the soprano soloist, ranks easily with the very gratest concert singers of the day, and all are of fine quality.

Dr. Coward himself is a man of unobtrusive personality, a plain Englishman, who gets his effects without strenuosity or affectation. His control is marvelous, and, as a drill master, he must be a man of iron. Books of words were provided for most of the audience, but these were unnecessary, because of the perfect and refined enunciation of every chorister. Indeed, this is one of the amazing characteristics of the choir. Every phrase and every accent is distinctly heard without the slightest loss of tonal or rhythmical quality. A slurred phrase is absolutely unknown. The attack, as with all good organizations, is faultless. In fact, every singer has lips apart with the note on the tip of his tongue a second before Dr. Coward gives the signal. In such a number as "For Unto Us a Child is Born," the sweet and ringing declamatory singing of the soprano balanced against the most superbly sonorous body of brass voices ever heard in this city was absolutely enthralling. Even greater enthusiasm was aroused by the exquisitely idiomatic singing of the intricate chorus, "His Yoke is Easy," which in ordinary presentations of "Messiah" wins few plaudits. The full volume and beauty of the organization was heard in the "Hallelujah," at which the audience, according to tradition, rose to its feet. It is sad that the singers can render this difficult number at a moment's notice without music.

In the Bach "Sanctus," which ended the long program, the choir showed some signs of fatigue, but even at that this divine expression of religious ecstasy received a rendering that, in its sublime enthusiasm and exquisite delicacy, left the impressionable listener trembling. A patriotic glee, "Sisters of the Sea," in which the characteristic music of England, Ireland and Scotland is cunningly interwoven, was a most effective offering, and in Eaton Faning's "Moonlight," the choristers achieved a pianissimo absolutely ravishing. Dr. Albert Ham conducted his own "Coronation Ode," a stirring composition. The choir responded splendidly to his baton and gave the number a rendering that won a deserved ovation.

The Toronto Symphony orchestra was the assisting force, and played so well and with such a beauty of tone as to win most enthusiastic applause from the choristers, who know something about orchestras, inasmuch as they have sung with the best that the world affords. Dr. Coward conducted Handel's pastoral "Symphony," and obtained an exquisitely poetic effect, while Mr. Frank Welsman surpassed his previous work with the organization in his rendering of the Mendelssohn "Ruby Bias" overture.

As has been intimated, the soloists who come from England are of very high quality. Miss Emily Breare in dignity of style recalls that great artiste, Muriel Foster. Her voice is a high soprano of great compass, beauty and warmth. Her phrasing and enunciation are exquisite in a rare degre, and in such a number as "I Know that My Redeemer Liveth," she has a tender quality of utterance that touches the fount of tears. Miss Gertrude Lonsdale has a fine presence, a contralto voice of rich and noble quality, and a highly sophisticated style. Her rendering of "He Was Despised" evoked immense applause. Mr. Henry Brearley is a robust tenor with a voice at once manly and refined, thoroughly versed in oratorio traditions. Mr. Robert Charlesworth, the basso, had contracted a cold at Ottawa, and sang only "The People that Walked?" His voice is of beautiful and noble quality and exceptionally flexible for one of its register. In the heavy work of "Why do the People," Mr. William Peacock, an accomplished baritone with a voice of fine calibre, was substituted, and did admirably with a solo pitched too loud for his natural voice.

### SPUN GLASS FABRICS.

**Would Protect Workmen From Injury in Many Callings.**

The spun glass, long known as a curiosity, and more recently employed in making ornaments, or in decoration, will come into wide use for other and more practical purposes, is prophesied by E. Lamaire in La Nature.

In recent years the electrical and chemical industries have made large use of the valuable properties of glass. In the electrical industry its non-conductibility for heat and electricity has been especially useful; in chemical laboratories its great power of resistance to reagents. Nevertheless, the applications of glass seem not to have been developed to the utmost; and in particular we have scarcely utilized at all its property of being easily spun and of thus entering into the formation of textile fabrics.

Clothing made of such textiles would be incombustible, non-conducting and resistant to acids, and would be perfectly insulating to electricity. Workmen wearing it would be proof against burns in the metallurgical industries and against injury by acids in chemical works; . . . and finally, in the electrical industries, rubber gloves, when guarded on the outside by spun-glass coverings, would absolutely prevent death from electric shock. The present use of spun-glass fabrics is not wide, but the cause should be sought in the lack of information on the subject in technical literature.

### VICTOR SARDOU.

**Burial of France's Beloved Dramatist at Paris Yesterday.**

PARIS, Nov. 11—Victor Sardou, the French author and dramatist who died on November 8th was buried in this city today. Although extremely simple, the funeral was an impressive tribute to the place which Sardou held in the hearts of the French people. He would have been gladly accorded a state funeral, but he expressed the wish that he be buried without ceremony. At his special request even flowers were omitted. He was, however, given the military honors always accorded those who have received the grand cross of the Legion of Honor. The privacy with which all the arrangements were carried out, however, were unable to prevent tens of thousands in every walk of life from coming to lift their hats and bow their heads to the memory of the beloved dramatist.

eringham. They will all be located at Pearcy and Herb's paint shop on Vernon street.

Commissioner Coombs of the Salvation army will be in Nelson next Sunday and will lecture in the afternoon and hold a special service in the evening.

Mrs. James McPhee of High street, Fairview, will be at home to her friends this afternoon and evening and in future on the second Thursday of each month.

At the special meeting of the school board held in the secretary's office yesterday, W. Irvine and R. G. Joy were elected to attend the trustees' convention to be held at Revelstoke on Nov. 17, 18 and 19. Matters pertaining to the new building were considered, and an order for the new blackboards were placed with the Canada Drug and Book Co.

The Churchmen's club of St. Saviour's church, have made arrangements to hold a grand concert and entertainment in the Nelson opera house on Wednesday, Nov. 25. An excellent program has been arranged, consisting of instrumental and vocal music, which will be followed by a Japanese song and dance, by ladies in costume and a sketch by some of the best local talent. At this concert the Nelson male quartette will make its first appearance and will render some of their best numbers. Miss Grace Blanche, a graduate of the Paris conservatory of music, will make her first appearance before a Nelson audience, while Miss Bealby will give some choice numbers on the violin. Mr. LaDelle, leader of the Nelson city band, will give a clarionet solo and Messrs Dodd and Nelson a banjo solo. Messrs. Lupton, Holloway, Johnston, Meachem and Smith will assist. Mrs. Coppen, Mrs. Antsley, Mrs. Goepel and Miss Anthony have places on the program. The proceeds will be given toward the fund for repairs on the church.

### GROOMSMAN TOO OLD.

**Made Bride Angry and Wedding Was Called Off.**

NEW YORK, Nov. 11—Because she thought that the best man was too old to fulfil his duties properly, Miss Amelia Wright, aged 21, who lives with her parents at the corner of Chestnut and McWhorter streets, Newark, called off her wedding with Thomas Cunningham, man-o'-warsman U. S. S. Dubuque, and the young man is now aboard his ship steaming away towards the Caribbean sea to forget his woes.

The wedding had been fixed for Wednesday and the minister had been summoned. Even the guests were on the way, when the bride was informed that Charles D. Phillips, proprietor of the Rock Island hotel, Newark, aged fifty, would act as best man.

Then there was a storm. The bride said he was too old and declared the wedding off, and nothing would induce her to change her mind. Reluctantly the groom announced that there would be no wedding, and went back to the shipyard and cancelled his shore leave.

### SNUB TO GOMPERS.

**Labor Men Will Not Accept Invitation to White House.**

DENVER, Nov. 11—The News today says president Roosevelt's snub to Gompers will be resented by John Mitchell, Daniel J. Keefe and James Duncan, as soon as they receive the president's invitation to attend the executive dinner at the White House next Tuesday. These three members of the executive council of the American Federation of Labor, have decided that they will refuse the invitation.

These officials have decided that if president Roosevelt wants to do anything in the interest of labor it must be done through the American Federation of Labor, recognized as the parent body of all unions in the country.

### LOST ART RECOVERED

**Old Roman Pottery is Now Being Reproduced.**

MUNICH, Nov. 11—The method by which the Roman potters secured so rich and velvety a lustre on what is known as terra sigillata ware has hitherto been a mystery, but a process which secures a similar, if not an identical result, has been discovered by Karl Fischer, of the Art pottery, Salzbach, Upper Bavaria.

For centuries potters have sought to discover the method adopted by the Romans. Mr. Fischer at length tried the application of simple engobage, or clay sludge, when the ware was in a biscuit or half-baked condition. This engobage under fire becomes highly fluid and sinks into the clay. It is then polished until the gloss appears, after which the firing process continues. Any coloring matter may be used, and thus reproductions of Roman and Greek vases can be made. Mr. Fischer's experiments have been quite successful, and so close does the reproduction resemble the original that Dr. P. M. Halm, of the National museum at Munich, states that only an expert can distinguish the one from the other.

Mr. Fischer has taken out a patent for his discovery. It is claimed that the process will create practically a new industry, as copper patina tiles can be produced, the weather having no effect on the gloss or lustre. Further, as the engobage is in a fluid state, it enables the fine details of the classic designs to be reproduced entirely. Some of the Roman and Greek vases have been reproduced with good effect, and Edward M. Borrigo, the curator of the Guildhall museum, has sent the Roman moulds in his possession to Mr. Fischer to be reproduced.

From the Output of the World's Best Makers of Inside and Outside Garments for Men, We Have Chosen, with an Expert Eye, Their Choicest Productions : : : : :

We feel justified in "shouting" some about the superiority of our choice fall garments.

Our sort of clothes are not "Just clothes" as the storekeeper said about his eggs. They're clothes of superior character. Men's underwear is specialized here. The study of the particular and different requirements of men is well understood and has received careful attention. All through our haberdashery department there prevails an air of quality, style, taste and refinement.

Whether it be shirts, neckwear, hosiery, gloves, or what not excellence will show itself in every line. We know their superiority and hence we "shout" and we've a right to.

### Editor Dead.

BUFFALO, Nov. 11—Mark S. Hubbell, editor and proprietor of the weekly newspaper, Truth, and one of the best known newspaper writers in Buffalo died last night at his home after an illness lasting for nearly a year. Mr. Hubbell was 51 years of age.

### Under the Ban.

OLYMPIA, Nov. 11—Selling pools on horse racing and maintenance of betting rings at race tracks are under the ban of the law in this state, according to a decision of the superior court handed down yesterday.

### Feast of St. Martin.

LONDON, Nov. 11—Martinmas, or the Feast of St. Martin, was celebrated in England today in the customary manner.

### Woman Hunts Lions.

The countess of Sefton, who recently shot her first lion in Abyssinia, is by no means the only society lady who has accomplished this unfeminine feat. Mrs. Alan Gardner, accompanied by her late husband, explored not only India but the wildest and most remote parts of Africa, including Somaliland in search of big game, and is one of the very few women living who has hunted both lions and tigers. Another adventurous sportswoman in English society is the duchess of Somerset, who has not only hunted bears in the western wilds of America, but perfectly revels in the rough life of camp and is an expert in camp cookery.

**The Athabasca Saloon has opened a Lunch Counter in conneciton with their bar and are prepared to serve hot lunches on short order. Give them a trial.**

The city band will be at the Alice roller rink Thursday evening from 8 to 10:30. Skating will be finished in time for the result of the polling. 172-1

To the work hunter, the date of whose next pay day is important, the want ads. are "friends indeed."

If you can add to competency and honesty enterprise in want advertising, you can find work.

Mdm. H. Groome has opened dressmaking parlors at room 6A, Aberdeen block. Your patronage is solicited. 172-6

The best tea can be utterly spoiled by exposure to contaminating influences, as bulk teas so often are. The sealed, lead packets of the "Salada" Tea Co., give you tea fresh and fragrant from the gardens to the tea cup.

WHOLESALE RETAIL

## NELSON NEWS OF THE DAY

Nelson lodge 1692, L.O.L., will meet tomorrow night in the K. of P. hall.

The I.O.O.F. Encampment will meet tonight at 8:30 in Fraternity hall.

Pythian Sisters, Nelson Temple, No. 10, will meet in K. of P. hall tonight.

The university club will hold their regular monthly meeting on Saturday evening.

C. Company, 102nd regiment will not parade for drill this evening owing to the election.

The Brotherhood of Railway Carmen, No. 98, will have their regular fortnightly meeting in Miners' union hall tonight.

The poll in Fairview today will be in C. Jiszkowicz's store on Chatham street, Geo. M. Gilchrist being the deputy returning officer.

The regular meeting of the board of trade, which was to have been held today, has been postponed for a week on account of the election.

F. C. Gamble, public works engineer for the province, will return to the city tonight and make final arrangements with regard to the court house.

The Porto Rico Lumber company has practically completed the pile bridge approach to their mill which is to be built between the foot of Ward street and the C.P.R. wharf.

The Wood-Vallance Hardware company has rebuilt its warehouse on the foreshore alongside the C.P.R. tracks, which was partially destroyed by fire a few weeks ago and new stock is being unloaded and stored there.

The moving pictures at the Arcade theatre were shown to crowded houses last night, the scenes and the illustrated songs being well rendered. The same program will be continued this evening at 7:30, city time.

All members of the Young Conservative club and conservative association who are willing to assist in getting out the vote today are urged to be on hand at the committee rooms in the K.W.C. block at 9 a.m., city time.

Ladies' night at the Churchmen's club last evening was largely attended and proved a great success. In the progressive whist tournament the prizes were won by Mrs. Lane and R. A. Coppen, and by Mrs. Chivers and J. Stevens. Another ladies' night will be held next Wednesday evening.

The work of excavating and levelling around the new court house is now completed and work will shortly commence on the stone abutments which are to extend from the registry office on Vernon street to the corner of Ward street, and from there on down Ward street to the provincial gaol fence. This abutment will be surrounded with an iron railing.

Tom Cunningham is building a fine 18-mile an hour motor boat for a resident of Ainsworth, which promises to make the local enthusiasts sit up and take notice. The new boat is constructed on the same lines as the Laugh-a-Lot and is 25 feet 6 inches over all and a 2 foot 8 inch displacement. It will be fitted with a 15 horse power Barber engine.

The well known Clark moving picture and vaudeville company will show at the Alice roller skating rink on Tuesday and Wednesday nights. Mr. Clark has the reputation of being an expert in moving pictures and his Nelson friends who have had the pleasure of seeing his show in Rossland, have advised him to come to Nelson for two nights each week for the winter. The show will start at 8 o'clock sharp, lasting three hours. The specialties are very fine.

### ITALY'S RULER.

**Victor Emmanuel Celebrated His 39th Birthday Yesterday.**

ROME, Nov. 11—Thirty-nine years ago today a son was born to Humbert I., second king of United Italy. Throughout the nation there was great rejoicing, and the spirit that was manifested then is being repeated today on the occasion of the anniversary of the birth of he who is now Victor Emmanuel III., Italy's beloved and wise ruler. All day congratulatory messaegs were pouring in upon his majesty and he was the recipient of many valuable and handsome gifts from all the royal families of Europe.

Victor Emmanuel was the only son of Humbert I., and succeeded to the throne upon the tragic death of his royal father, who was assassinated by the anarchist Bresci at Monza, July 29, 1900. He married in 1896, princess Helene, daughter of Nicholas, prince of Montenegro, and has four children, prince Humbert, the heir apparent, was born on Sept. 15 1904. The duke of Abruzzi, who has been in the limelight of late owing to his reported engagement to Miss Elkins, an American heiress, is a son of the late prince Amadeus, who was an uncle of king Victor Emmanuel.

## WIRELESS TELEPHONES

**BRITISH ADMIRALTY IS NOW EXPERIMENTING WITH THEM**

**GOOD PROGRESS ALREADY MADE IN THIS DIRECTION**

Wireless telephony is occupying the attention of the board of admiralty. Wireless telegraphy has already reached a remarkable stage in its development for use by our men of war, and the time has come for official attention to be paid to the sister marvel—the transmission of the human voice through space without the use of wires.

The demonstrations at the admiralty have been carried out by a man who has already proved his ability. Prof. Lee De Forest has equipped a number of vessels of the United States navy with wireless telephone apparatus, and has enabled conversation to be carried on between ship and ship over distances of twelve miles.

All this has been accomplished in the course of eighteen months. He began experimenting on a large scale in March, 1907, and succeeded in transmitting music from his New York laboratory to the New York Times' building—a distance of a mile and a half.

In July of the same year he reported a yacht race by word of mouth over a distance of four miles at sea, and then his experiments in American men-of-war began. He fitted three battleships, the Connecticut (flagship) with a transmitting apparatus, and the Kentucky and Illinois with receiving apparatus. They went to sea, and off Cape Cod, when eight miles apart, the messages sent out by the Connecticut were heard on board the other two ships.

Three months later this performance was eclipsed by the installation at the Norfolk navy yard. A message was sent from there to the Kentucky, in Hampton Roads, 12 miles away, and was clearly heard.

By that time it was evident that the De Forest system was something more than a plaything. Accordingly congress voted the money necessary to equip a flotilla of torpedo craft, and the six vessels Whipple, Truxton, Lawrence, Hull, Hopkins and Stuart were fitted with transmitting and receiving apparatus at a cost of $37,000.

The De Forest apparatus is quite simple, and it is portable. This is, of course, of enormous advantage, for, although speaking from the bridge or deck is easy enough even in a destroyer in ordinary weather, it is a matter of great difficulty in half a gale. Another advantage is the low voltage required. Anything between 80 and 250 volts is sufficient for the distances at present attempted between vessels at sea, and this graduation of voltage is useful in another way.

For example, two destroyers in sight of the enemy can steam abreast a few feet apart, or four cables apart, and communicate a plan of action that the enemy cannot possibly overhear or know anything about.

Wireless telephony differs from wireless telegraphy considerably in the nature of the electric waves used. In telegraphy the waves are produced with a spark gap with an alternating current. In telephony they are produced from an arc on a direct current. Valdemar Poulsen, who has been remarkably successful, uses continuous undamped waves produced by a modified and developed form of Duddell's muscal arc, and these waves he has found suffer very little weakening in traversing a distance.

On his system, with a potential of 2000 volts in the antennae, he has projected the human voice a distance of more than 160 miles, and it has been heard distinctly. Music he has transmitted 260 miles and more.

Poulsen is one of the most prominent of the continental experimenters, and his system is one that is expected to give even more remarkable results in the near future. In Italy, Professor Majorama, the head of the scientific department of the ministry of posts and telegraphs, has also been experimenting. He fitted up posts for his transmitting and receiving apparatus, 120 feet in height, at Mantemario, in Rome, and at the D'Anjio Lighthouse, a distance of thirty-six miles away, and carried on conversations between the two places.

By far the most remarkable of the continental experiments, however have been those of three young French naval officers. Working on a system very similar to that of Dr. De Forest, but with a much higher potential, they have covered 310 miles. This was done only a few weeks ago, and the extraordinary nature of the feat has never been adequately recognized by the world at large, probably on account of the modesty of the inventors and their desire to keep their secrets to themselves.

But it is known that they have since repeated the feat, which is to say that a person on the Eiffel Tower in Paris has spoken without wires to a person standing on the Pointe du Raz in Brittany. Moreover they have "syntonised" the antennae regulated to transmit and receive the Hertzian waves with which they work so that these waves are not affected by other waves, nor will they affect other antennae. In a word, they are "tuned" to a special note, just as wireless telegraphy instruments can be tuned.

In England up to the present, very little has been done towards solving the problems of wireless long distance talking. All the energies of our experimenters have been devoted to the perfecting of our system of wireless telegraphy. At Chatham dock yard, however, experiments were begun last November, and various short distances have been covered, beginning with 900 yards, and going up to a mile and a half.

The experiments that Dr. De Forest has been carrying out are understood to include attempts to communicate with the home ports and with vessels lying in the Solent. But it must be born in mind that important wireless telegraphy experiments have been going on also, and care must be taken not to confuse the results.

Three battleships of the Channel fleet—the Hibernia, New Zealand and Commonwealth—have been at sea fitted specially with high power appliances, endeavoring to break the long distance record, at present held with 1600 miles by the Indomitable. At the same time important data are being gathered as to differences in transmission in the daytime and at night, and also as to the overcoming of obstacles in the air during transmission.

"It is better to smoke here than hereafter."

For a good smoke.
