BOMBARDING KAI CHOU

Admiral Withoff May Have Japanese Transports At His Mercy

Togo Will Hasten to the Assistance of Transports and Engage Russians Kouropatkin Praised

OFFICIAL DENIAL.

Tokio, July 16.—The Imperial headquarter's staff officially deny the report that the Japanese lost thirty thousand men in battle near Port Arthur on July 10 or 11. Not a shot was fired on either side.

St. Petersburg, July 16.—Reliable reports from Ta Tche Kiao this evening, brought the startling announcements of the presence of Russian war ships off Kai Chou, which they are said to be bombarding, and of the arrival of Japanese transports and torpedo boats off the port of New Chwang. The admiralty was unable to confirm or deny the report, not having received any communication from rear admiral Withoft, but the officials generally were not inclined to credit them. If true it will mean that admiral Withoft had got the Japanese transports at his mercy. In this case admiral Togo would hasten to their assistance and engage the Russians. This may also explain the absence of positive news of the Japanese occupation of the port of New Chwang and the cautious advance of general Oku's column. The foreign office has received a telegram from the Russian consul McRosse, at New Chwang, dated July 14, but he did not mention the approach of the Japanese.

Ta Tche Kiao, July 16.—There is reason to believe that the whole of a part of the Port Arthur squadron has come north into the gulf of Liao Tung. The sound of firing of heavy guns is heard eastward. Warships are distinguishable firing in the direction of Kai Chou. It is surmised that they could only be Russian vessels.

The Japanese are suffering from hunger. Six of them came in and surrendered to general Mistchenko begging for food. They said that disease and famine were everywhere in the Japanese army.

According to reports from the vicinity of Liao river a disguised Japanese officer and a detachment of Japanese have come towards Hai Cheng with ten chests full of silver to pay the Chinese bandits.

ARM CHAIR CRITICS.

Russian Critics Praise General Kouropatkin's Course.

St. Petersburg, July 16.—Experts, who until recently were inclined to criticize general Kouropatkin's management of affairs in the far east, declare, as the situation developes; that his strategy has proved, so far, beyond reproach. He has successfully tided over a pressing danger, how pressing only those in close touch with the far east realize. His apparent mistakes, like the prolonged resistance offered by lieutenant general Dessulitch on the Yalu, turns out to be actions of the highest military judgment. Genaral Kouropatkin then had a few and such poor troops at Liao Yang that the Japanese would have had an easy tak to crush the main force of the Russians had they been permitted to cross the Yalu without severe punishment, and the thousands lost by Sassulitch practically saved Liao Yang. Sassulitch until disgraced, occupied an important staff position. General Stalkenberg's march was also criticized and is admitted to have been necessary. The rudiments of warfare demand that an army should be in constant touch with the enemy as otherwise it would be impossible for it to know the strength of its opponents, or to be informed of their movements. General Stalkenberg's march was a reconnaissance on a grand scale, and not only enabled general Kouropatkin to ascertain the enemy's strength and disposition, but materially disturbed the Japanese plans relative to the siege of Port Arthur. Gradually drawing the bulk of the Japanese army to follow the retreating column and thus distracting attention from the vulnerable spots, being Liao Yang and Mukden. Meanwhile the men of general Kouropatkin's headquarters are improving. Fifty thousand of the best troops from European Russia have reached Liao Yang within a month, and the Russian commander-in-chief in the far east now chooses to accept battle he will be able to inflict a heavy blow. All Russia is looking forward with confidence to the fight.

ACCEPTED WITH RESERVE

Russian Officials Think Alexieff May Have Had a Pipe Dream.

St. Petersburg, July 16.—Since the receipt from Tokio of an official denial of the report of a Japanese repulse at Port Arthur with the loss of about 30,000 men, scepticism as to the truth of the report from viceroy Alexieff's headquarters has pervaded all circles; but the members of the general staff decline to accept the denial unreservedly. While not insisting on the accuracy of the figures they claim there is good reason to believe that a severe check was inflicted on the Japaneses in front of Port Arthur and it is considered possible that general Stoessel may have made a report on the subject direct to the emperor, who will not return here until tonight.

Although still in ignorance as to what is meant by the official statement "from Japanese sources," the officials here maintain that Alexieff must have had good reason to send the report. While it is conceivable that the Japanese themselves may have spread the report for the purpose of leading general Kouropatkin to believe that they will not advance any further on Manchuria, the general staff are not disposed to regard them as guilty of such trickery. The public excitement has quite cooled down. The American embassy today forwarded to Berlin another list of names of Japanese prisoners. There are 111 at Herm, 108 at Kruger, 89 at Seolikamaka and 126 at Tomsk. The whereabouts of the 300 who were at Zea, in the Amur district and who are now scattered has not been definitely established.

JAPANESE STILL ADVANCING

Generals Oku's and Nodzu's Armies Have Joined at Tang Chi.

St Petersburg, July 16.—The Japanese are continuing their advance on Ta Tche Kiao, following a scientific plan and entrenching their positions as they move forward. They appear to be taking extra precautions in the case of Ta Tche Kiao, on account of their knowledge that general Kouropatkin is there personally.

According to a despatch from lieutenant general Sakharoff, dated July 15, and given out this morning, the wings of generals Oku's and Nodzu's armies have joined at Tang Chi, 10 miles south east of Ta Tche Kiao. The Japanese are also reported to have occupied the fortifications at Pint Zau, about seven miles north of Kai Chou, and were still proceeding towards New Chwang which had not been occupied July 15.

A detachment of general Kuroki's force is reported to have reached the village of Tszhache, 40 miles east of Liao Yang, on the Feng Wang Cheng road.

RUSSIANS SEIZE GERMAN SHIP

Berlin Papers Are Quite Wrathy Over the Incident.

Berlin, July 16—The foreign office confirms the report of the seizure of the Lloyd steamer Prinz Heinrich by the Russian volunteer ship Smolenski, in the Red Sea but declines to discuss the political features of the case at this stage and does not indicate what steps it intends to take. The Tageblatt says: "A speedy explanation of this Russian action against the emperor's flag is imperatively necessary. Steps must be taken that a disavowal is made and that the Russian arbitrary acts be avoided in the future."

The Lokal Anzeiger thinks the seizure will be most hard to justify, and that if it is found that the Russian action is contrary to the law of nations the German government will not hesitate to find a remedy in its broadest sense.

The National Zeitung declares the confiscation of the mail sacks aboard the North German Lloyd steamer Prinz Heinrich by the Russian volunteer fleet steamer Smolenski in the Red Sea on Friday, to be unjustifiable, and in defiance of international law.

ALEXIEFF'S LATEST REPORT

Places Japanese Losses on July 10 and 11 at 2,000.

St. Petersburg, July 16.—Viceroy Alexieff has forwarded a later and probably more accurate summary of casualties arising out of skirmishes in the vicinity of Port Arthur on July 10 and 11. His report says:

"Thirty-five of our soldiers were killed and 247 wounded. Colonel Rouss, who acted as chief of staff to general Stoessel, was bruised. The Japanese losses for the two days according to Chinese reports, were 2,000 men. According to a report of July 7 we captured on July 6th an advanced hill, ensuring us possession of Lunsantan pass. Our losse were two officer killed and one officers and 20 soldiers wounded. According to information received, the Japanese effected a landing at Port Dalny on July 2nd, disembarking about 20,000 men and 50 guns. The whole town swarmed with Japanese soldiers. The enemy is repairing the docks and electric station. The railway line is being repaired throughout the whole length but owing to the lack of engines the cars are worked by Chinese. The spirit of the troops is excellent."

LANDED THOUSANDS OF MEN.

Berlin, July 17.—The Lokal Anzeiger today prints a special despatch from Port Arthur stating that the Japanese since July 11 have landed about 30,000 men near Pimon bay, and escaped with the entire fleet. The Russians, the despatch says offered little resistance. A general assault is expected soon. A calm sea has facilitated the landing.

MOVEMENT OF OKU'S FORCE.

Ta Tche Kiao, Friday, July 15.—(Delayed in transmission).—The main body of general Oku's force seems to be swinging around the Russian left, after having combined with general Nodzu's army. The Japanese are also moving up the coast on the Russian right. An artillery reconnaissance has shown the country directly south to be clear of the enemy.

THE JURY'S FINDING IS AGAINST THE UNION

Assess $12,500 Damages Against the Rossland Branch of the Western Federation of Miners--Action Dismissed as Against Some Defendants--Written Arguments to be Submitted--An Appeal Will be Taken

[Special to The Daily News.]

Victoria, July 16—The trial of the Centre Star Mining Company's action against the Rossland Miners' union, was completed late this afternoon resulting in a verdict against the Miners' union, damages being assessed at $12,500.

The jury found that the Rossland Miners' union No. 38, Western Federation of Miners, Rossland branch, Rupert Bulmer, W. S. McDonald, Frank Woodside, W. G. Preston; the carpenters and joiners' union, Peter McDonald John McLaren, T. M. Beamish, and James Wilkes, maliciously conspired together to molest and injure the plaintiffs and other mine owners of Rossland.

In charging the jury, Mr. justice Duff, went very fully into the case. He said the law protected every man in the disposition, according to his own best judgment of his capital, his skill and his labor. The right to dispose of them constituted a legal duty. Every man's right to do as he would with his own was limited in conjunction with the rights of others. Just as long as a man did not use unlawful means he might within restriction, interfere with other men doing the same work in competition. This was due to competition. The question was whether the interference complained of was within lawful limits.

The jury was not to regard the stike in itself as an unlawful thing. Our law did not prevent workmen from agreeing to quit work. There was nothing to prevent them from agreeing to do so in the event of a ballot so deciding. This was subject to the restriction that no contract was broken. Although the motive might be ill-will even, he did not believe it would render the presons so concerned civilly responsible. The jury might agree that if the union decided upon a strike, and to carry on the strike by unlawful means, and that these were employed, then not only persons who did these unlawful acts, but also those connected with the combination would be liable for these unlawful acts. In establishing conspiracy, it was practically impossible to get direct evidence that the parties got together and agreed upon a definite course, but conspiracy might be proved by circumstantial evidence that all the mining companies were parties against which the strike was so directed. They might find that it was proposed to take a different line of action against the Centre Star company than against the other companies, but he did not see anything in the evidence to establish this.

The question of unlawful means, involved acts which were declared by our law to be criminal. If these were done then an action could be maintained. These unlawful acts presupposed that they were done, in order to prevent others from doing what they lawfully were allowed to do. These offenses were persistently following a person from place to place, following with others any person along a street or road and besetting and watching property. In the Horne case in which a miner was brought in by the Le Roi company, they had very direct evidence that this man was followed about from place to place. There was no difficulty in coming to the conclusion that acts were done with respect to the men coming from Winnipeg which would be unlawful under the act. If they concluded that these things were done pursuant to the original arrangement then they could not separate those directly concerned from the union, which would have to bear the responsibility. They did not require direct resolutions, etc., in such matters. The learned judge pointed out that creating what was regarded in law as a nuisance, constituted actionable wrong, apart from conspiracy. The evidence as to the "black list" and its use in intimidating men who wished to go to work, was alluded to. Under the head of justification and excuse the judge held that whether the strike was to increase wages at Rossland, or arose out of sympathy with the Northport trouble, would have an important bearing. He made an allusion also to the fact that persons concerned did not enter the box and give evidence, and intimated to the jury that they might well consider that fact.

The charge to the jury occupied over two hours.

The jury after several hours deliberation decided against the Miners' union. The blacksmiths' union, and the co-operative association, on the motion of Tupper, K. C., were struck from the action.

The jury decided that the Miners' union maintained and assisted in maintaining a strike by unlawful means, by molesting, intimidating men who were working for the plaintiffs, or for other mine owners of Rossland with a view to inducing them to cease from so working; by inducing or attempting to induce men who were willing to enter contracts of service with plaintiffs or with other mine owners of Rossland to work for them, to refrain from so working; by furnishing strike pay, or other relief or assistance; by unlawfully watching and besetting the premises of the plaintiffs and other mine owners, and the roads and railway stations, and that they maliciously conspired together to molest and intimidate the plaintiffs in carrying on their business. The jury did not find that there had been any interference with mining contracts.

Written arguments respecting the judgment are to be submitted by counsel later.

Counsel for the Miners' union intimated tonight that the judgment would be at once appealed.

The plaintiffs claimed originally $50,000 damages and it is claimed that one important finding of the jury is that relating to mining contracts which the plaintiffs alleged were broken by the strike. The jury found that the contracts were not interferred with.

The final motion for judgment on the findings of the jury will come up for argument at some future time when Mr. justice Duff has fully considered the written arguments of counsel to be submitted.

CONCENTRATING MILLS

A NUMBER OF THEM HAVE BEEN PUT IN AT ROSSLAND

CLIFF JOINS THE SHIPPERS AND OUTPUT IS INCREASED

Rossland, July 16—A year ago today concentration was a thing of the future in Rossland so far as concrete results were concerned. Today the Le Roi No. 2 has a 50 ton plant, costing $40,000 in full operation and earning profits. The War Eagle-Centre Star companies have a 200 ton plant partly running, and to be in continuous operation within ten days. The total cost of these works is estimated at a quarter of a million dollars. The White Bear Consolidated has a 70 ton plant, partly completed, and rapidly progressing. The estimated cost completed is $30,000, and the mill is expected to be crushing ore before the end of August. The Velvet has a 50 ton plant partly running. Its estimated cost is $15,000 and the works are to be operating within 10 days. The Le Roi company has a 20 ton experimental plant running steadily with the probability of a large plant at a nearly date. The site and water have already been taken up. The advances thus achieved form a creditable aggregate and contribute substantially towards confidence in the future of the camp.

The ore shipments for the week ending tonight, show an increase over the previous week. The figures are:

Le Roi	2,800
Centre Star	1,800
War Eagle	1,080
Le Roi No. 2	450
Le Roi No. 2, milled	300
Kootenay	360
Jumbo	250
Cliff	120

Total for the week, 7160; and for the year to date, 194,358 tons.

The Cliff mine came into the shipping list for the first time since the suspension four years ago. It will probably be a contiuous shipper. Two car lots are being sent to the Granby, Greenwood and Trail smelters for experimental purposes. The ore bins are under construction at the mine and the force will number 25 men within ten days.

BOUNDARY ORE SHIPMENTS

So Far This Year Granby Mines' Output Exceeds 300,000 Tons.

[Special to The Daily News.]

Phoenix, July 16—The Granby Company's mines have shipped over 300,000 tons of ore this year, although the Boundary tonnage for the week is not up to its normal level as the Granby smelter is working but four furnaces till early next week owing to repairs.

Shipments for the past week were as follows:

Granby mines to Granby	8,400
Mother Lode to Greenwood	2,560
Emma to Trail and Nelson	776
Oro Denoro to Granby	100

Total for the week, 11,836 tons; total for the year to date 431,673 tons.

During the past week the Granby smelter treated 8210 tons, making a total of 322,621 tons for the year.

FIRE AT GALT

Galt, Ont., July 16—The Metal Shingle and Siding Co.'s works with the exception of the storehouse, were destroyed by fire early yesterday, together with several freight cars belonging to the C. P. R., and a freight motor of the street railway Co. Loss estimated at about $1000, covered by insurance.

HONORABLY ACQUITTED

Prospector Kelly Clears Himself of Charge of Theft From Fife Hotelman

[Special to The Daily News.]

Grand Forks, July 16—The charge of theft preferred against James K. Kelly, a well known prospector of Fife, by Thomas Price, hotelkeeper of that place, was tried and dismissed here by police magistrate Cochrane. Price claimed to have been robbed of $64 and charged Kelly with the theft. There was not the slightest evidence adduced to connect Kelly with the theft and as he is a very well known and highly respected prospector a good deal of indignation was felt at such a charge being lodged against him and corresponding satisfaction was felt at his honorable acquital. Price undoubtedly lost $64 and it is up to the local police to investigate.

LOOMIS' BODY IS FOUND

WAS WASHED ASHORE ON DEVONSHIRE COAST YESTERDAY

BODY IDENTIFED BY CLOTHING AND CARD OF DECEASED

Kingsbridge, Devonshire, July 16—The body of F. Kent Loomis, who disappeared from the North German Lloyd steamer Kaiser Wilhelm II, on June 20, as the vessel was nearing Plymouth, was found this morning at Warren point, near the Thurleston sands, some 15 miles from Plymouth. A laborer, Thomas Sowden, was walking along the cliff at about 6 o'clock when he noticed a body tossing among the breakers on the incoming tide, some 30 yards from the shore. Sowden hurried down the cliffs and by the time he reached the beach the waves were washing the body against the rocks. Snowden grasped the clothing on the body and dragged it ashore. The remains were much decomposed. The body was bruised by contact with the rocks on which it had been hurled by the waves. It was dressed in a grey overcoat, light blue suit and white shirt. Snowden at once informed the police and neighborhood. When the body was searched a gold watch and a quantity of English and American money in notes and coins were found in he pockets of the dead man and also a card case with the name "F. Kent Loomis." The police took charge of the body and placed it in a building at Thurleston village to await the inquest which will be held on July 18.

A BIG ORE CRUSHER

Has Been Added to the Equipment of the Mother Lode Mine

[Special to The Daily News.]

Phoenix, July 16—The B. C. Copper Co. has added to its Mother Lode mine equipment by the putting in of a large ore crusher, similar to the one in use for some years. It is of the Blake-Farrel type, capable of crushing ore of a size of 36x23 inches, and was received at the mine this week from he makers at Sherbrooke, Quebec. The old crusher will be used at the company's smelter.

EASTERN LACROSSE

Shamrocks, 16, Cornwalls, 8; Capitals 5 Montreal 2; Tecumesh 5, St. Catherines 3; Brantford 7, Fergus 1; Vancouver 6, Victoria 5.

THE CLUB WILL DISBAND

THERE WILL BE NO MORE LACROSSE HERE THIS SEASON

COUNCIL REFUSED TEAM USE OF CITY RECREATION GROUNDS

Failing in its efforts to induce the city council to rescind its order closing the recreation grounds against practise and play until September 28th the lacrosse club, at a meeting held last night, decided to disband the team for the season. Seen with regard to the foregoing, the executive had this to say:

"To organize and hold together a good lacrosse team is no easy matter, even under the most favorable conditions. Without a suitable ground for systematic practise and training, it is practically impossible. As every one who has taken the slightest interest in the subject knows, we have been completely handicapped in this respect from the beginning of the present season. Before we could have one good practise in preparation for our engagement at Kaslo on the 24th of May, the council had begun the long contemplated improvement of the grounds. This we heartily approved, as the improvement was much needed, notwithstanding it prevented our entering the game with New Westminster in anything like condition. This game was witnessed by a large number of our townspeople and the score is known to all. We have an overpowering conviction that if we had been able to practise, the team we lined up on that occasion a few times under anything like the conditions that prevail in a hard fought game, the result would have been entirely different, and the ironical inquiry of a prominent citizen—to whom the lacrosse club acknowledges no obligations—"Why don't you beat a first class team once?" would have been answered. As it was, the game and the score were so interesting that the Westminsters, with that fine disregard for the most ordinary courtesies, for which they have become noted, and in flagarant violation of the word of their manager, refused to play us another game at that time, though, so far as the element of time and legitimate convenience was concerned, they might have easily done so, and when we approached them a few weeks later, having in view the 1st and 2nd of July, their reply was not only too long delayed, but the terms named were absolutely prohibitive, both of which they well know. However, all this about the Kaslo game and its sequel, is a digression and is only mentioned as a bit of history and because it justifies us in the course we have taken.

"It being realized by the 1st of July celebration committee that lacrosse would constitute an important, if not an essential feature of the day, the argument for and against June seeding and for and against closing the grounds became quite warm, with the city coucil, acting under expert advice on the affirmative side of both issues and with, apparently, a large section of the business community, backed by public sentiment; opposing with the result, from the club's point of view, an unhappy compromise, embodied in the resolution of the council to seed the ground in June and close them absolutely until the 28th September—the first day of the fair—excepting only the 1st and 2nd of July. Hence between May 24th and the 1st of July, as before the former date the grounds were not available for practise, and the team, if no worse, were certainly in no better condition on the 1st of July than it was on the 24th of May, though in the meantime an effort had been made to get the boys together, first on a tract of land in Bogustown and later on the C.P.R. flats, all to little or no purpose. The fact that the players refused to take the chances involved in practising on either of the grounds mentioned is a sufficient reason for rejecting the suggestion of the council that we utilize the C.P.R. flats. The club cannot afford to create a safe and suitable practise ground; hence it is as impossible to prepare the team for a trip abroad as it is to play a game at home without grounds on which to play it. The fact that we put up a fairly good game on the 1st and 2nd is no justification of the opinion expressed by a member of the council that we can play lacrosse on the 28th and 29th of September if we only chose to do so.

"Reverting to the recreation grounds. Laboring under the misapprehension that the June seeding had proved a failure (we are now told that the grass is doing nicely) and, therefore, that no useful purpose would be served by denying us the use of the grounds for the balance of the season, we petitioned the council, immediately after the celebration of the 1st and 2nd, to rescind the order. Our petition was considered in regular meeting on the 14th and most emphatically turned down, the council taking a decided stand for the execution of its final order. This action being regarded by us as final, we have most regretfully taken what appears to us to be the only logical course, viz., the abandonment of lacrosse for the season.

"Our discussion of this matter is absolutely without prejudice. We merely state the facts in their relation to our own interests because an account of our conduct is due our friends and supporters, and also to outside teams that contemplate seasonable engagements with us. An intelligent and carefully considered representation of the vastly larger interests of the community as a whole is left to the city council where it properly belongs, and an order conscientiously made in that behalf, as we believe the one under consideration has been, will be strictly observed by us, for in the final analysis, the good of the community as a whole cannot be other than at one with the good of its component parts. If the apparent interests of any one of the latter should conflict with this philosophy, it must be abated."

IS ALIVE WITH TOILERS

Thirteen Hundred Men are at Work on Phoenix Branch

[Special to The Daily News.]

Phoenix, July 16.—Altogether, J. W. Stewart & Co., who have the immediate contract for the construction of the V. V. & E. branch of the Great Northern from Grand Forks to Phoenix, a distance of some 26 miles, not including spurs, have about 1,300 men employed on the line and the number is constantly being augmented by new arrivals of laborers from Spokane, Seattle and other places. It is estimated that, so well have the sub-contractors been able to get at the right of way, there is scarcely a quarter of a mile of the entire line on which there are not men working. The engineers now are figuring that, some time in October, the greater part of the work will be done, though there may be some little delay at points where the rock work is the heaviest. In order to make up somewhat for this in two or three places not far from Phoenix contractors are working night as well as day forces, and in this way they are making better progres than would ordinarily be expected.

TRAINS CRASH TOGETHER

Two of the Trainmen Were Killed and Four Injured

Williamsport, Pa., July 16—The Buffalo flyer, northbound, with three cars of shriners, en route from Atlantic City, was wrecked today on the Buffalo and Allegheney branch of the Pennsylvania railway and two trainmen were killed and four injured. The flyer and a fast freight collided while in a fog, while both were running at a high rate of speed. The wreck occurred at the foot of the Keating summit grade. Thhe wrecked train had passed the point where the two trains were to have met. Suddenly the two engines on the express came thundering through the fog. The freight engine and the first engine on the express telescoped each other. The tender of the first passenger engine turned a complete somersault, caching fireman Sullivan and crushing him in his seat. Frank Corneli, fireman on the second passenger engine was also killed as he sat in his accustomed place. Life was instantly crushed out of him and his body roasted before his rescuers reached him.

KRUGER TO REST IN PRETORIA

British Government Has Given its Consent to it

Johannesburg, July 16—The British government has acceded to the request that the body of former president Kruger, of the Transvaal, might be buried at Pretoria.

TO OPEN UP THE BROOKLYN

[Special to The Daily News.]

Phoenix, July 16—The Brooklyn shaft house has been connected with the city water mains for a boiler supply, but not much work will be done until official notice is received by W. R. Williams, in charge for the Dominion Copper Co., to turn over the company's properties to the new Montreal and Boston Consolidated people.

CHEAP MINE DEVELOPMENT

[Special to The Daily News.]

Phoenix, July 16—Thirty men are working on the Excelsior group of claims, owned by F. C. Bailey and associates, in Providence camp. The men are graders on the V. V. and E. construction line, and are opening up the claims in good shape for the owners, in course of the blasting opeartions.

P. and O. STEAMER SEIZED.

Aden, July 16—It is reported that the Peninsular and Oriental company's steamer Malacca from Antwerp for Japan has been seized in the Red Sea by the Russian volunteer fleet steamer St. Petersburg.

JAP TRANSPORTS SIGHTED

Ta Tche Kiao, July 16.—The Chinese report this morning that they saw many Japanese transports conveyed by torpedo boats, going in the direction of the port of New Chwang.

STRIKE WILL CONTINUE

Chicago Packers Reject the Proposals of Union Men

Arrival of Stenographers in Omnibuses to go to Work the Cause of a Small Riot

Chicago, July 16—All chances of ending the packers' strike have vanished for the time being at least. The end of the negotiations came late today, after a conference which had lasted nearly all the afternoon. The break resulted when the union officers insisted that all the men who had gone out on strike be taken back and given their old places. The packers declined and stated that it would necessitate the discharge of all the men they had employed since the commencement of the strike, and that they could not, and would not consider it. The conference then broke up and the strike will continue.

Chicago, July 16—While the packers are preparing to act upon the latest message from the strike leaders a riot occurred on West 63rd street and Ashland avenue. It was caused by the arrival of an omnibus on which were carried stenographers to the offices of Swift and Co., Nelson Morris and Co. and the Armour Packing Co. Three men were injured by blows received from the officers' clubs. When the first vehicle was drawn up to the sidewalk, where working men were waiting for it, a strike sympathiser strode from a saloon and strode in front of the horses. The police commanded the man to move on. A crowd gathered and several policemen detailed at posts nearby, hastened to the scene, drew their clubs and charged the crowd, which gave way before them. The leaders retreated into a saloon and made their escape through a rear door. Many of the girls were so frightened that they sought refuge in the saloons, which line Ashland avenue at this point, only to be driven out by threats of men drinking at the bars.

Omaha, July 16—Several hundred new men were given employment in the packing houses in South Omaha today, and the situation is much better. Some trouble was experienced in getting the new men into the packing houses, but no violence was met with. Considerable slaughtering was done today both of cattle and hogs and the packing plants were operating in a limited way.

Kansas City, July 16—Two carloads of men from Chicago and other places were brought in today and taken into the Armour plant. The strikers at the gate made a slight demonstration, but there was no violence shown. The men were mostly unskilled laborers and many of them quit after working an hour or so. An effort was made to detain some of the deserters but they succeeded in jumping out of the windows or rushing past the guards at the doors. Later they mingled with the strikers at labor headquarters.

SHERRADEN'S NERVE.

[Special to The Daily News.]

Ymir, July 16.—What might have been a bad accident, was happily averted by the pluck of Harold Sherraden, assistant engineer for the Porto Rico Sawmill Co. here.

While the mill was in full operation yesterday afternoon, a screw in the head of the piston became loose and became jammed between the piston and the cylinder head with the result that the engine was completely wrecked, every spoke in the fly wheel was broken the main steam pipe fractured, and Mr. Sherraden at the risk of his life turned the throttle. Happily the company has on hand a duplicate engine for such an emergency and today mechanics are installing it the work to be completed so that the mill can resume operations Wednesday noon.

FROM KUROKI'S HEADQUARTERS

General Kuroki's Headquarters in the Field, via Fusan, Thursday, July 14.—(Delayed in transmission).—The newspaper correspondents are ignorant of the progress of the campaign here or elsewhere and the movements of this army, except what little is happening in the neighborhood. The rains have temporarily ceased. The country has dried rapidly and the army is able to live largely on vegetables which are ripening in large quantities in this region.

JAPANESE MAIL SEIZED

Aden July 16.—The North German Lloyd steamer, Prinz Heinerich, which arrived here from Hamburg for Yokahoma, reports that she was stopped yesterday afternoon by the Russian volunteer fleet steamer Smolensk and compelled to give up 31 sacks of letters and 24 sacks and boxes of parcels, all intended for Japan.

RESULT OF YEARS' WORK

[Special to The Daily News.]

Phoenix, July 16—The Granby company's fiscal year ended June 30th, and on that date there had been done for the previous twelve months 5998 feet of development work, including sinking, raising, drifting, and crosscutting, but not including open quarry work. In the same time the mines had shipped to the company's smelter 521,282 tons of ore, and added largely to the machinery equipment at the mines.

Ladies' Waterproof Coats

At Lower Prices Than Ever

Only about One Dozen Left, Sizes From 34 to 62 inches long.

ORIGINAL PRICE	NOW
6.50	2.00

RECIPROCITY

Promoters of the Continental Reciprocity League of North America, with headquarters in New York, are sending out literature to merchants and others in Canada and elsewhere proposing the organization of a league in the United States, Canada, Newfoundland, Mexico, Central America and the West Indies. The purpose of the league is to extend the market for the United States merchants and manufacturers throughout the continent.

It says in part in its propoganda: The value of the exports from the United States to Canada in 1903 was $135,000,000; the population of Canada was 5,000,000, (an erroneous underestimate), and the value of the exports per capita $27; to the British West Indies, $11.50; to Cuba, $19; to Mexico, $3; to Central America, $3; to South America $1; to Germany, $3; to France, $2; to China, 4 1-4 cents; to Korea, 1 7-10 cents; to all of North America, $8.33; to all Europe, $2,60; to all Africa, 25 cents; to all Asia and Oceanica, 10 cents.

One Canadian consumes as much of the products of the United States as 1500 Koreans. The trade of one Canadian is as valuable to the United States as that of 700 Chinese and the circular declares that under reciprocity it would be equal to that of 1400. It states that five reciprocity leagues are forming in the west and one in New England and it is hoped to induce them to join with the New York league so as to create an irresistible force in favor of continental commericial unity.

It is doubtful if the ambitious aims of the Continental Reciprocity League can ever be consummated, but it is certain that a much better and more advantageous adjustment of the trade relations between the two countries can be arrived at than at present prevail. The ironclad tariff policy of the United States must be modified so that the advantage of trade may not nearly all be on the south side of the international boundary line.

Reciprocity, pure and simple, will probably never prevail between the two countries, as each will continue to have so-called "infant industries" which it will be considered necessary to foster by protection. It is certain, however, if some equitable agreement can be reached, whereby both countries will have equal advantages, or nearly equal advantages, that something approaching reciprocity may prevail. Canada has many articles which are wanted in the United States, while the United States has numerous products which Canada consumes. Could some fair, square agreement be reached between the two countries for an exchange of certain products free of duty charge, there is not the slightest doubt in the world that trade between the two countries would be largely increased. The Continental Reciprocity League working along these lines might accomplish a great deal in the way of abolishing the inequalities and injustices which are characteristic of the trade relations between Canada and the United States, so far as the latter country in concerned.

EDITORIAL NOTES.

The Dominion Year Book for 1903 has just come to hand. It is up to the standard of the productions of George Johnson, the dominion statistician. In this publication are compiled many interesting facts and figures making it one of the most useful of books to those who desire to keep in touch with the progress that Canada is making.

There have been a good many things said in the papers about the Great Northern railway extending its rails into Phoenix. The best thing yet said was by Mr. Miner, president of the Granby company, who some time since remarked: "There will be all the tonnage that two streaks of rails can haul out of the Phoenix camp."

The Russo-Japanese war is productive of a number of singular things, remarks a contemproary, Japan has sent millions of gold to the United States for war supplies, and this gold, or a great deal of it, was sent to Paris to settle the Panama account. France is friendly to Russia in the present struggle and Russia is negotiating a great war loan from the French. When the loan is negotiated it will be paid in gold, and much of it will be the gold sent to the United States by Japan. If, a little later, the Japanese capture this gold, either in battle or as a war indemnity, it will have made a complete circuit of the globe.

NELSON'S COMING FAIR

NEW BUILDINGS WILL BE READY FOR COMING FAIR

THE ATTRACTIVE PRIZE LIST CAN FOR EXHIBITION

A well appointed main building 150 x 75 now practically assured for the Nelson fair, which will be opened this year on Friday and Saturday, September 28th and 29, and the entries for which will close Sunday, September 24th.

Those interested in raising funds for the new combined fair-curling building are confident that it will be erected in good time for the fair. They say they have received two offers to take the matter off their hands, but prefer to have a syndicate made up of local people, who in addition will have increased interest in both the fair and in curling.

The building will front east and west and one side will run along Vernon street for 150 feet. The cost is estimated at $6,000. The city will own the land and will only exact sufficient in the way of rental to pay interest on the purchase money and the taxes, so that those who form the building syndicate should get a good return on their investment.

The exhibition managers have thus got the most pressing problem which faced them this year very satisfactorily arranged for, and in addition, by the end of September the recreation grounds will be in shape, giving the Nelson Agricultural and Industrial Association of B. C. one of the best fair grounds and buildings in the province. The planting of trees and further fixing up of the grounds, grand stand, dressing rooms, band stand, etc., will all come in good time and each year can be made to show substantial improvement upon a well thought out and laid out plan.

In view of some of the trials experienced by the dominion day celebration committee recently the exhibition managers can see some matters to avoid and to industriously push on several items that the celebration people did not pay sufficient attention to. The fair should be properly advertised no matter what it costs. The transportation companies must be induced to give cheap rates for both days of the fair, and the special attraction features should be brought well to the front as drawing cards. People like to be amused, and a good program of sports and special attractions will draw the crowds from all parts of the Kootenays, the exhibition proper forming the base and backbone of the show. This city now has a solid grip on the exhibition idea for all this section and can hold it against all comers if the managers will work upon broad enough lines.

J. B. Annable, secretary of the association, has printed copies of the prize list for this year containing the rules and regulations which exhibitors must conform to, and a lot of useful information to those visiting the fair. Copies will be furnished to all applicants.

The prize list is a solid and satisfactory one and will well repay close examination. It includes the following:

Division A—Horses and cattle, 3 first and second and six special prizes.

Division B—Poultry etc., including special prizes for pigeons, cage birds, rabbits and eggs, besides the main list for poultry breeder.

Division C.—Fruits. Nearly 200 prizes are offered for fruits of all kinds and a special prize list also appears for fruit collections of various kinds.

Division D—Vegetables, 90 prizes offered.

Division E.—Field products. Over 70 prizes offered.

Division H.—Floral.

Division J.—Painting, etc.

Division K—Work by children under 15 years of age.

Fine arts, lace work, embroidery, etc.

The special prize list which concludes the association's program is a long one and includes all kinds of subjects.

The committee in charge of of the sports and amusements are in communication with special attractions of a novel and interesting nature, and will secure a number of out door amusements that will prove interesting and attractive to all fair visitors.

MAY RECOVER LOST TREASURE

Wreck of Steamer Islander Located—Half a Million of Gold on Board

New York, July 16—A despatch to the Times from Tacoma, Wash., says captain and manager of the Neptune steamship company, has located the wreck of the Canadian Pacific steamer Islander, which sank in Alaskan waters in August, three years ago, carrying down nearly 100 passengers and crew, besides half a million in Klondyke treasure. Finch succeeded in locating the wreck by using a big steel diving cage, invented by captain W. M. Kelly of Milwaukee. This cage was successfully used before in locating the sunken steamer Andelana lying in 30 fathoms of water in Tacoma harbor. Finch hopes to raise the Islander or recover the treasure boxes and valuables aboard. Estimates of the amount of gold in purser's charge and in the staterooms run from $400,000 to $700,000. The vessel was coming south from Skagway with scores of Klondykers on board.

NEW YORK FASHION LETTER

New York, July 16—The present fashions may have their drawbacks their incongruities and unreasonable points, but they possess one redeeming feature, which compensates to a great extent for all shortcomings; they possess artistic qualities which delight the eye of the artist. Present styles show a much greater appreciation of beauty in outlines, color, proportion and general effect, than any fashion of which we have any record. Whether the artistic tastes of the makers of fashions has improed or whether the artistic qualities of the present styles are merely an accident, the result of happy influences working harmoniously together to produce, unconsciously, an almost perfect result, I cannot decide, but the fact itself cannot be denied. The prevailing styles show a remarkable understanding of proportions, a simply marvelous appreciation of the fitness of certain materials to produce certain effects, a keen insight into the mysteries of artistic combinations of colors and delicate discernment in selecting the most effective lines.

Of course not all makers of fashions possess the qualities of the eye and taste which make the artist but the number of artists in their profession seem to be increasing from year to year. These creators of fashions have raised their profession to the dignity of an art and it cannot be denied that there is as much artistic merit in many of the modern creations as there is in the great works of painters and sculptor's.

The artistic instinct which seems to govern fashion at the present time manifests itself in many ways. First in the beauty of lines, which are as delightful to the eye as the lines of a fine piece of architecture. The beautiful curves of the healthy and normal human body are not disguised or hidden but rather displayed without accentuating them too much. The harmony of proportions is carefully considered and preserved by various ingenious artifices. Of colors there has never been a greater nor more beautiful variety than at the present time and the fashion artists display a remarkable taste for harmonious combinations. One of the most striking striking features, however, is the exquisite taste which these artists show in harmonizing the general effects of women's costumes by establishing close and artistic relations of lines and color between the various parts of the costume, including not only the skirt, waist or bodice and perhaps the coat or wrap but also the hat, parasol, shoes, gloves, belt, etc.

The fashionable dressmakers of London and Paris have inaugurated a new fad, which will probably be taken up by the fashionable artists in this country. The fad consists in giving names to the dresses they make; not trade names, which might serve for classification but individual name which, as a rule are symbolical in character. "The First Kiss," was the name of a dress constructed by one of the most fashionable dressmakers in London. It was of delicate white material, tipped with rose leaf shaded bits of crimson, probably suggesting the bright tint of a maiden's lips. Another dress, called a "Dream of Paradise," was trimmed with filmy lace, through which ran threads of silver with an occasional silver bead. Some of the gowns are named by the person for whom they are made and a beginning has even been made to establish certain harmony between the general effect of the dress and its name. "Second Thoughts," for instance was the name of a dress which was ordered by a handsome and gay young widow after her return from a house party that had been almost scandalously gay. It may be said here that the costume was of a severe and plain gray and evidently suggested the mood of the wearer. If this fad becomes popular, it may lead to the establishment of a symbolistic school of dressmaking.

Petticoats with several detachable and adjustable flounces are becoming quite popular this season and they really deserve their popularity, as they are extremely practicable. One of these skirts, recently imported, has a Jersey top with three flounces, one black, one plaid, and one of changeable blue and green material. The flounces are quite deep and frilled and ruched at the bottom. All are of taffeta and are fitted with button holes at the top, concealed by a band. The Jersey part has a row of buttons at its lower edge. Detachable flounces of fine cambric and embroidery are also used.

One of the most striking features of this summer styles is the extensive use of handpainted decorations. This new fad has opened a new field of remunerative employment for many young artists, art students and amateurs. There is scarcely any part of a womans outfit which is exempt from this fad. Stockings, hat ribbons, sashes, entire gowns, parasols, fans and even straw hats are decorated with hand painted flowers and other decorative designs. Particularly poor art students will welcome this fad, which enables them to earn enough money during the summer months to continue their studies during the fall, winter and spring months at some academy.

One of the handsomest and most artistic costumes worn at a recent garden party was decorated in hand painted designs by the hand of a clever artist. The young lady who wore the costume, a pretty and very wealthy girl attracted considerable attention by the beauty of her costume She was dressed in white and the same decorative design was consistenly carried out in every part of her costume from her skirt and bodice to her hat, parasol, sash ribbons and fan.

The general tendency to simplify all non-essentials in a woman's wardrobe and to avoid everythig that would add to bulkiness, has caused many women to dispense with corset covers, except in cases where unlined blouses are worn. In place of the corset cover many women wear gauze scarfs, which are wrapped tight around the body and fastened under the arms with small gold pins. These scarfs give ample protection to the corset, without increasing the bulk. Many girl skeep a supply of these scarfs on hand to be prepared for an emergency.

Combinations of black and white laces are worn extensively this summer and, in some cases the result is quite pleasing. White chiffon parasols, trimmed with black and white laces and hats trimmed in the same manner seem to be quite popular and some of them shown in the shops are unusually attractive.

SIMPSON'S
CHEMICAL ERASIVE

SOAP

— FOR —

CLEANING COAT COLLARS

And Extracting
Grease, Paint, Tar, Oil, Sperm and Kerosene from Silks, Cloths, Carpets, etc., of Fast Colors

Price - - 25 Cents

Directions for Use—Rub a little of the Soap on the spot or stain, dip a brush in warm water, and rub gently for a few seconds; then wipe thoroughly off with clean water and all will disappear. If the spots be hard, such as paint or sperm, rub the garment together after applying the soap.

N. B.—Simpson's Soap removes Scruff from the head, Tartar from the Teeth, Fur from the Tongue, and cures Cuts, Sores, Ringworm, Chilblains, and Outward Piles by simply washing with it.

CAUTION—See that each cake bears the words "SIMPSON'S ERASIVE SOAP, REGISTERED," in raised letters, without which none is genuine.

If your druggist does not keep it, write for sample cake, enclosing 25 cents stamps or postal note, to Australian Agency, Room 1, (ground floor) Molson's Bank building, Vancouver, B. C.

LINDSEY K.C. CRICKETER

MANAGING DIRECTOR OF C. N. P. C. CO. AN ATHLETE

TORONTO PAPER'S SKETCH OF HIS CAREER TO DATE

The Toronto News is publishing a series of articles, entitled "Younger Canadians." One of these was devoted to G. G. S. Lindsey, K. C., the managing director of the Crow's Nest Pass Coal Co., who is now very well known in this part of the province. The article reads:—

When George Goldwin Smith Lindsey went to Upper Cannada College early in the seventies, he little knew that he was going to encounter the first peril of his life. There was cricket to play, and he played it. There was football for muscle making, and he chased the pig skin. There was learning to be acquired, and he acquired it as shall be seen. But young Lindsey had an artistic tendency that he could not for the time overcome, though afterwards he fought against it and conquered. He was for a time a victim of heredity, and in his blood was the desire for writing, and for seeing that writing turned into print. His grandfather on his mother's side was William Lyon Mackenzie, journalist, fighter, and rebel or patriot—take your choice. In the days when George Lindsey was born—and afterwards, though Mackenzie's grandson is only 44—William Lyon Mackenzie swung a hefty and sharp pointed pen. George Lindsey knew this, and early in his college career he decided that he would be a newspaperman. He wrote slashing editorials for the College Times, and the circulation of that great journal went up several dozen copies. When his school days were over he went up to Toronto university. He still hankered after journalism, and he assisted in founding a paper which has attained the respectable age of 25 years. He and George Sanfield Macdonald put their heads and their purses together, and soon the undergraduates and the graduates, too, had in their hands the first copy of the now renowned Varsity. Mr. Lindsey saw that the publisher required a good business manager, and he took the place himself, while Macdonald acted as editor. In the second year the business manager became editor of the prosperous publication, and ever since Varsity has been a monument to the energy of these two men. Later, in 1882, with G. A. Brown, Mr. Lindsey founded the Canadian Cricket Field, the only paper in the interest of that sport ever published in Canada. Its life was short and merry, and with its death went out the candle of Lindsey in journalism.

It will be seen that the strenuous King's Counsel of today was a sportsman in his youth. So he is now academically. At the university he was a cricketer of renown. At point he used to bring off hair-raising catches, which were absolutely necessary, for, had they not been made, there would have been a dead Lindsey on the lawn. At football he was equally energetic. His work at quarter back was not the work of the quarterback of today, but nevertheless it was in the first rank as the game was played in the early 80's. His college days over Mr. Lindsey continued to play cricket and football with the Toronto clubs of that name. He soon ceased to chase the pigskin, but up to a few years ago hewas an ardent cricketer. Even to date he has always captained the Upper Canada Old Boys against the present in the annual match, wherein eleven moss-backs show the young idea how to bat, bowl and field. On these occasions the whiskered but energetic king's counsel is as frisky as a sixteen year old.

Before his retirement from participation in the game, Mr. Lindsey was the incumbent of nearly every office in the Toronto cricket club.

However, it must not be thought that it was a case of all play and no work. In study he was as earnest as on the field. After graduating he entered the law office of Bethune and Marsh, and in 1886 he was called to the bar, after standing first in the examinations. Latter he became a partner in the firm of Lount, Marsh, Lindsey and Lindsey. In the next year, 1887, the young barrister decided to carry out a plan which he had long cherished—the taking to England of a team of Canadian cricketers. The work of organization was carried out successfully. Every man on the team was Canadian born, and every one was, of course, an amateur. They played good cricket against the county gentlemen for the most part and won half their complete matches. With D. W. Saunders, Mr. Lindsey published on their return, a history of the tour, entitled "Cricket Across the Sea." The volume is now priced at five pounds in the catalogues of London dealers in rare books.

So much for Mr. Lindsey's training for the active business of life. With play over, work began in earnest.

Municipal politices appealed to him, and in 1890 he was elected at the head of the poll for old St. Mark's ward, Toronto, where he had passed all his days. In 1891 he was again elected, but in March of that year serious illness compelled him to journey to California, where he remained until 1892. During his term as alderman he was chairman of the street railway committee of the Toronto city council while arbitration proceedings were in progress to determine the purchase value of the railway. Mr. Lindsey after 1891, did not enter municipal politics. In the provincial election of 1894 he unsuccessfully contested West Toronto in the liberal interest. In 1900 and 1901 he was president of the Toronto Reform Association.

In the practise of law Mr. Lindsey has been very successful. In 1900 he was appointed king's counsel. He is now head of the law firm of Lindsey, Lawrence and Wadsworth, and is also general counsel and third vice-president of the Crow's Nest Pass Coal Company, with the duties of managing director as well as of the Crow's Nest Electric Light and Power Company; the Morrissey, Fernie and Michel railway, and the Crow's Nest Southern railway.

In 1889 Mr. Lindsey married the second daughter of the late James Bethune, Q.C.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory,

of the location.

Placer Mining.—Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims generally are 100 feet square; entry fee, $5, renewable yearly. On the North Saskatchewan River claims are either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged beds or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan River, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end of the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of a Royalty of 2 1-2 per cent of the sales of the products

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miners for a term of twenty years, also renewable.

The lessee's right is confined to the submerged beds or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease,

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, $100 per mile for first year and $10 per mile for each subsequent year. Royalty, same as placer mining.

Placer Mining in the Yukon Territory.—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 250 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of a mining recorder's office. One extra day is allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, $10. Royalty at the rate two and one-half per cent on the value the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant more than one mining claim on each separate river, creek or gulch, but the free miner may hold any number of claims purchase, and free miners may work their claims in partnership by filing notice paying fee of $2. A claim may be abandoned, and another obtained on the same creek, gulch or river, by giving notice paying a fee.

Work must be done on a claim each year to the value of at least $200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed to be abandoned and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum.—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory are open to prospecting for petroleum, the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 640 acres. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of $1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

DUNDONALD RECEPTION

TORONTO GIVES THE RETIRING GENERAL A HEARTY SEND OFF

GREAT GATHERING IN HIS HONOR AT MASSEY HALL.

Toronto, July 16.—Lord Dundonald was tendered a great reception in Massey hall by citizens of Toronto last night. Between four and five thousand persons were present.

In his reply to the address presented by the citizens, lord Dundonald confined himself almost entirely to answering charges made against him. He thought people should have been taken into the confidence of the government and have been permitted to know what was contained in his report of 1902. There was need, he said, of an ammunition factory in Ontario; there was need of more rifles, more training schools, a central training camp, and improved provincial training camps. His estimate for 1904-05 for schools of instruction, had been reduced from $50,000 to $40,000. He resented the charges of militarylsm and of dragoonning, and said that sir Wilfrid Laurier's plan of having corps of volunteers in every hamlet would cost much more than he himself had suggested. He declared he had never advised ruinous expenditure but had only advised on the location, etc., of fortifications, on which the government had determined before his arrival, and in addition that two important seaports, one on the Atlantic and one on the Pacific should be fortified. In conclusion he thanked the citizens for the evidence of their confidence.

When Laurier's name was mentioned by Dundonald it was greeted with hisses and counter cheers.

Addresses were also delivered by J. F. Ellis, president of the board of trade, Barlow Cumberland, vice-chairman of the reception committee, acting mayor Shaw and Rev. Dr. Potts.

After the meeting the horses were taken from the general's carriage and some of those who had attended the meeting drew his carriage to the station where generous cheering bade the general farewell as he left for Ottawa.

C. P. R. DISCRIMINATIONS

I. G. Nelson Shows That They Are Hurtful to Nelson.

I. G. Nelson of D. McArthur & Co., yesterday, in speaking about the discrimination of the Canadian Pacific railway against Nelson, was indignant. He said: "While Harry E Macdonell has always been a friend of Nelson in the past what he said in The Daily News today was simply for the purpose of smoothing over what F. W. Peters has done in giving the Crow's Nest Pass railway territory to Calgary. After all the fuss that has been made what has the C. P. R. done? It has cut out some of the common points, made some small reductions to the Boundary, and a 25 per cent reduction along the Crow's Nest line in British Columbia. They have spoiled the concessions which they have made, however, by giving the Crow's Nest territory to the Calgary wholesalers. To Fernie, for instance, the Calgary merchants can send in goods 30 cents a hundred pounds cheaper than we can. If they would even allow us to meet Calgary on even terms at Fernie it would be much better than the present arrangement.

"If the railroad companies had given us what we asked, a reduction of 50 per cent on the rate from Nelson to points in Slocan, the people of the Slocan would have been satisfied as they would get their freight cheaper than at present. Instead of that they kept the old rate in force and the people of the Slocan are dissatisfied

"I believe, too, that the merchants of Nelson would be perfectly satisfied to pay the higher through rate on the longer haul from the east than is paid by Calagray merchants for the shorter haul from the east to Calgary, provided we would be allowed the same rate to points east of Nelson that Calgary is allowed west from there. In this way we would be placed on what would be a better footing and could compete, at least, with Calgary for the trade of the Crow's Nest section. As it is it seems to me that we are out of it until we can secure better terms from the railroad, and I believe we are strickly within our rights in endeavoring to secure such terms."

FREE GOLD ON HALL CREEK

The Red Elephant Group Has 20 Feet of Rich Ore

Assays of ore from the recent strike made by Hugh McKay on the Iron Duke, one of the Red Elephant group, gave returns of $20 in gold and over 8 per cent copper. The ledge is 20 feet wide and well mineralized saye the Kaslo Kootenaian. Some of the ore, when panned, gave upwards of 60 colors of coarse gold, and free gold can be seen with the naked eye. The property is located near the mouth of Hall creek about five miles up creek on the Upper Duncan and is owned by Hugh McKay and J. W. Powers.

A number of claims have been staked by Kaslo parties since the strike. Dan McPhail and Dr. J. F. B. Rogers have located a claim immediately adjoining the Red Elephant on one side, while J. and J. Gillis, Frank McDonald and Hugh McKay have locations on the other side.

These parties have just returned from the scene of the strike and claim that the showing is a world beater. The lead for the full width of 20 feet is practically solid ore. The only difficulty experienced by the owners is the lack of a good trail They have to pack their supplies in themselves, owing to the fact that the washouts and other damage to the trails has not been repaired, and therefor horses cannot be taken over them.

The strike is on the opposite side of Hall creek from the Bannockburn group where there is said to be another large showing of the same character of ore which has never been worked.

RICH MOUNTAIN CON.

An Abundance of Shipping Ore Has Been Encountered

The force at the Monutain Con has been increased to 12 men, says the Sandon Standard. Work has recently been confined to driving an intermediate tunnel which was expected to tap the upraise yesterday. McLeod and Thompson, the lesses, are now going after the ore. They have uncovered a veritable glory hole since taking hold of the Mountain Con. Ore was found almost anywhere they drove a pick. In drifting on the intermediate 500 sacks of ore were taken out while driving 60 feet. This came from the width of the tunnel alone, the vein being passed in order to tap the upraise. The lesses have struck ore above, below, between and in fact any old place they went to look for it. They have built a hoisting station and put everything in shape for shipping. The developed ore bodies are now being worked and Power's big pack train will be kept busy in packing down the ore. The Mountain Con has proven to be an amazing bonanza since being taken hold of by experieced and practical miners, and is destined to become one of the richest mines. In addition to the ore being in abundance, it is very rich, the average assays giving returns of 220 ounces in silver to the ton

NEWS OF POPLAR CAMP

Good Sized Ledge of Rich Ore on Gilker's Claim

J. G. Devlin has just returned from Poplar, where he has been doing assessment work on a claim owned by James Gilker, merchant of this city. On the claim is a two and a half foot ledge, carrying free gold and galena. The ore is a good grade and Mr. Devlin says the property is a valuable one.

Michael Monaghan he says has located a strong ledge of quartz, carrying free gold on the Monaghan group.

Just before leaving Poplar Mr. Devlin says that a strike of high grade copper was made in the hills back of the Second Crossing. The assays are reported to run from 11 to 25 per cent copper. The claims are owned by Messrs. Roberts and Woodrow.

Shearin and Cody have a foot of high grade galena on their claims on Cascade creek. There are a number of promising properties in the vicinity of the claims owned by Shearin and Cody. The place is difficult to reach because there is no trail and because a roundabout way has to be taken to reach them. The claim owners think the government should build a trail.

CHURCH SERVICES

Anglican—St. Saviour's church, corner of Ward and Silica street. Seventh Sunday after Trinity. Holy communion 8 a. m.; Matins and holy communion, 11 a.m.; Sunday school, 9:45 a.m. Rev. F. H. Graham, rector.

MOURNING FOR KRUGER.

General Louis Botha Eulogizes the Late President of the Transvaal.

Pretoria Transvaal, July 16.—General Louis Botha, former commander in chief of the Boer forces, has publicly requested all officers, officials and burghers of the late South African republic to observe July 17 as a day of mourning for the late president Kruger. He also expressed the hope that all the old inhabitants would don mourning for a month. General Botha pays a tribute to the ex-president for his energy and his sacrifices to make the African people a nation and concludes:

"His death is the sadder because he was not permitted to spend his last days in his own country. We shall always feel this deeply but will keep silent."

SOCIALISTS ON TRIAL

Charged With Smuggling Anarchistic Literature into Russia

Berlin, July 16—A trial which the Prussian authorities began at Koenigsberg on July 12, at the instance of the Russian government against seven socialist democrats accused of smuggling anarchistic literature into Russia, attracts very much attention. The newspapers throughout Germany are printing columns of verbatim reports of the testimony. Public interest was already strikingly directed to the case through the debates on the subject in the reichstag and diet. From the evidence it appears that the documents smuggled include publications of the Russian press association of New York and the Jewish labor league. The Prussian police claim to have ascertained that there existed an extensive system for the circulation of the documents through the border towns.

BEATEN BY THUGS

Superintendent Bangs of the W. U. T. Co., Succumbs to His Injuries

Chicago, July 16—Edward D. Bangs, superintendent of the city lines for the Western Union Telegraph Company, who is supposed to have been beaten by thugs on the morning of November 28th of last year, is dead at his home of concussion of the brain. His death was a direct result of the injury suffered in November. Mr. Bangs was found unconscious on the street early on the morning of the supposed attack, and the police thinking him to be intoxicated, placed him in a cell, where he remained for several hours without medical attendance. No clew was ever found to the identity of his assailants.

AN INTERNATIONAL AFFAIR

French and Japanese Soldiers in a Drunken Brawl

Tien Tsin, July 16—Two French soldiers were killed and others were wounded and nine Japanese soldiers injured in a drunken brawl in the native section of Shan Kai Kwan last night between Japanese and French soldiers. A policeman was also severely hurt. Bayonets were used by the soldiers.

BALLOT BOX STUFFERS RELEASED

[Special to The Daily News.]

Ottawa, July 16—Samuel Thompson, Kerr and Colquhoun, connected with the municipal ballot box troubles in Toronto are to be released. A recommendation to this effect has been signed by the minister of justice.

Wash greasy dishes, pots or pans with Lever's Dry Soap a powder. It will remove the grease with the greatest ease. 36

NELSON'S NEWS OF THE DAY

Miss Ina Cummings of Seattle, is in the city the guest of Mrs. L. B. Roberts.

J. A. Baker, W. F. of M. representative in B.C. of Slocan, is at the Grand Central.

In this city on Saturday, July 16th, the wife of Fred N. McKay of Ainsworth, of a son.

At the residence, Hume Addition, on Friday, July 15th, the wife of Max McSweyn, of a daughter.

At the Home hospital on Friday, July 15th, the wife of Charles Prosser, steward of the S.S. Kootenay, of a son.

G. G. S. Lindsey, K. C., managing director of the C. N. P. C. Co., came in from Fernie last evening and is at the Hume.

The Nelson operatic society propose to produce an opera during exhibition week. A meeting will be held shortly to discuss the details.

Mrs. James Lawrence has returned from a visit to Calgary and Banff. Mr. Lawrence has decided to remain in Calgary and will shortly remove his family there.

Mr. and Mrs. C. A. Benedict returned last night from Spokane where they were married on Wednesday, July 13th, by Rev. Mr. Ramus and Rev. Father Verhagen of that place.

The two year old son of C. D. Ogilvie of Eholt, died there yesterday. The body will be brought here tomorrow evening and the funeral will take place on Monday forenoon.

A special meeting of the Women's Hospital Aid society will be held in the Presbyterian school room on Monday, the 18th July at 3 p.m. All members are requested to attend.

W. G. Gillett has secured the contract for the erection of the new exhibition curling building on the recreation grounds and will commence construction at once. The estimates and plans call for the building to be 150 x 75 and to cost about $3000.

D. C. McMorris, city clerk, returned yesterday from Kamloops where he spent his vacation of a month. The trip was beneficial to his health, which was run down previous to his departure. Miss Katie Winters, his niece, returned with him and will remain here for a time on a visit.

John Dean, who was mayor of Rossland last year passed through this city last night on his way home from a three days' visit in the Slocan. He says one of the cheering signs of the times in the district is the large increase of leased mining properties, all of which appear to be doing well.

F. M. Black, R. Hood, George Nunn, J. R. F. Rowley, I. G. Nelson, John Drew, John Watson and Fred Starkey, the committee appointed by the wholesalers' association to look after the matter of freight rates along the Crow's Nest line, held a meeting yesterday afternoon. The question of discrimination in favor of Calgary was discussed and a plan of future action outlined.

Registrar Simpkin of the supreme court, in settling the minutes of the judgment in Last Chance Mining Co. vs. the American Boy Mining Co., tried at the recent sittings found yesterday that the trespass complained of took place in January, 1903 and that the value of the ore taken upon the ruling of the learned trial judge amounted to some $350. As the defendants only paid in $350 in satisfaction of the plaintiff's claim the Last Chance Company are given the costs of the action.

DINNER AT THE ROYAL TODAY

The dinner, as usual, at the Royal today will be first class. The table will be supplied with all the delacicies of the season. The price is 25 cents.

D. BARTON THE WINNER.

Holds The Ticket That Secures a Free Round Trip to St. Louis Fair.

When The Daily News reached Castlegar yesterday morning D. Barton, a C. P. R. bridge employe, saw McNicholl & Smyth's advertisement asking for the lucky holder of their prize coupon, No. 2477, and at the noon hour, looking over the ones held by him he discovered that he held the number called for and at once wired the Queen Cigar Store proprietors as follows:

"Castlegar, July 16.—I am the holder of coupon [illegible] will be in the city in a day or so. D. Barton."

When Mr. Barton produces the coupon he will receive from Messrs. McNicholl & Smyth, according to contract, a first class railway ticket to St. Louis and return. The firm say they are well pleased with their plan of advertising their business and add that they will have another scheme to submit to their patrons before long. "Scotty" Williamson who held the 99th coupon has the satisfaction of knowing that he was a good second.

REPORT IS FAVORABLE

Concentrator is to Be Built at Kaslo and Road Extended

The Sandon Standard learns that professor Parks' report on the South Fork section is in every way satisfactory to the Great Northern railway officials. The same paper also understands that the Kaslo concentrator will be built as obstacles that imperiled materialisation have happily been removed. This means much to this section. The Kaslo plant is almost sure to be built and construction up the spur line to the South Fork will follow. The concentrator will have a capacity of 300 tons a day, and of the class of ore it will treat, large quantities abound along the K. & S. line. The rumor is also current that the lake line is to be extended on to lake points.
