RECEIVER IS APPOINTED

Will Collect Center Star Judgment From the Miners' Union

The Shipments From the Rossland Camp for the Week Aggregate 5,785 Tons Notes of Concentration

Rossland, Aug. 20—An order was made in the supreme court at Victoria, naming Charles Vernon Jenkins as interim receiver for the Rossland Miners union to collect monies up to $12,500, the amount of the verdict in favor of the Centre Star Mining Co. The union and the trustees and officers are restrained from parting with the funds, and the monies on deposit in the Royal bank are attached under the order. Application comes up for final argument at Victoria.

Forest fires were common near Rossland during the past week, but in no instance was the mining industry endangered and the loss in timber was light. The Abe Lincoln mine buildings had a narrow escape from destruction, but escaped completely. One man was hurt while removing machinery from the headworks.

The Le Roi company has removed the last of the machinery used in the concentration experiments from the O. K. stamp mill, and Jacob Loff and associates, the lessees, are making repairs necessary to resume the milling of I.X.L. free gold ores.

The Velvet-Portland mine has started up its compressor plant and increased its crew to 33 men. The concentrator is running steadily and arrangement are complete for a series of experiments with fire concentration. A miniature furnace erected for the latter experiments is completed.

The White Bear concentrator is nearing completion, but it is now probable that the management will not succeed in getting the water section running before the end of the current month.

The July payrolls were distributed during the week, the total sum disbursed on wage roll being $71,700.

The shipments for the past week were:

Le Roi	1,775
Centre Star	1,500
War Eagle	1,140
Le Roi No. 2	340
Le Roi No 2 (milled)	300
Jumbo	300
Cliff	80
Velvet-Portland (milled)	250

Total for week 5,785
Total for year to date, 224,978 tons.

A DAUGHTER WAS BORN.

Son of a Peasant Woman Substituted For Czarina's Daughter.

New York, Aug. 20.—A special despatch to the World says: "Russian revolutionists declare positively that the empress of Russia really gave birth to a female child, for whom at her birth a male child was substituted—a peasant woman's baby. The revolutionists vouch for the truth of this statement, and astounding as it is, it comes from perfectly reliable sources. The Nihilists say the internal condition of Russia is such—and it may be more precarious by the reverses in the far east—that had the people been disappointed again in their hope of the birth of a czarevitch, a revolt would have been imminent. This danger, magnified by the probability of the fall of Port Arthur at any moment, caused the czar's advisors to take these precautions. A peasant about to become a mother was smuggled into Alexandria villa at Peterhof, where the empress awaited the immensely important event. The Nihilists aver that the czarina was blessed with a girl, the fifth, the day before a boy came to the peasant. The fact is that the czarina's accouchement was concealed until the baby boy was taken from his mother's arms, presented to the czar's relatives and the court, and placed in the imperial cradle." Improbable as this story appears, it must be remembered that the revolutionists have extraordinary underground communication all over Europe.

WILL BECOME BENDICT.

Man Who Carried Message to Garcia To Be Married.

San Francisco, Aug. 20.—Captain Andrew S. Rowan, "the man who carried the message to Garcia," is going to be married.

The lady wha has captured the captain's heart is Mrs. Josephine de Greanger, of this city. She is well known in social circles here and a prominent clubwoman.

Captain Rowan became famous the world over when he performed the feat which caused his name to be enumerated among the heroes of the Spanish war.

When the war broke out it became necessary for president McKinley to secure the co-operation of Garcia, the leader of the insurgents, who was then hidden in the mountain fastnesses of Cuba. How to get the news to Garcia puzzled the president until someone suggested Rowan as the one person who could accomplish the feat. So Rowan was sent for and given his orders. Strapping the oilskin packet containing the letter over his heart, the lieutenant set out on his journey. In four days he landed in an open boat on Cuban soil, and then plunged into the almost impenetrable jungle. It took him three weeks to pierce the country, surrounded as he was by foes on every side. At the end of that time he emerged from the jungle and found Garcia and delivered the letter in safety.

THE BOUNDARY SHIPMENTS

They Are Now Over 500,000 Ton Mark For the Year.

[Special to The Daily News.]

Phoenix, Aug. 20.—The Boundary shipments for the year are now well over the 500,000 ton mark. The shipments from the Boundary mines for the past week were as follows:

Granby mines to Granby smelter	16,660
Mother Lode to Greenwood	4,192
Emma to Greenwood, Nelson and Trail smelters	1,452
Oro Denoro to Granby	99
Mountain Boy to Greenwood	33

Total for week 16,636
Total for year to date, 515,451 tons.
Total tonnage treated during the week by the Granby smelter, 11,757 or 375,848 tons for the year to date.

DOLLAR WHEAT CERTAIN

A VERY LARGE SHORTAGE IN THE CROP OF THE U. S.

GOOD CONDITIONS FOR PRODUCERS BUT HARD ON CONSUMERS.

The sudden rise in the price of flour has caused some surprise and alarm. Like that of all other commodities not subject to monopoly the price of wheat depends upon the relation of the world's supply to the world's demand. The latter is fairly constant, so the price is practically fixed by the variations in the products of successive years. But as a matter of fact, the price rises or falls as soon as an estimate can be made of what the crop will be in the chief exporting countries.

It is now conceded that the wheat crop of the United States this year will be many millions of bushels short, not only of last year's production, but of the average production for many years. The product last year was 637,000,000 busheds, the average for the last five years has been 625,000,000 bushels, the most cheerful prediction as to this year's crop is 605,000,000, while no less an authority than James J. Hill declares that it will not exceed 540,00,000 and may be even less.

The great wheat exporting states are the Dakotas, Minnesota, Iowa and Kansas. The grain in the Dakotas and Minnesota is badly damaged by rust, and the Kansas crop is also touched. Taking estimates that are generally considered conservative, the total American crop will be over 70,000,000 bushels less than last year's and 60,000,000 bushels less than the average for the last five years.

This would be a serious enough situation is if stood alone, but although sensational reports on the New York stock exchange, that the crop of Manitoba and the territories is badly damaged, have been authoritatively denied, still there is no ground for expecting much increase over the production of last year, so that North America is certain to export less wheat than usual by the amount already mentioned.

The other wheat exporting countries of the world are Russia, Roumania, Argentina and Australia. It is too early to know anything definitely of these, but Russia and Roumania are reported to show a decrease from last year in total production, and, of course, in the amount available for export. Argentina and Australia are believed to show increases. Figures are not available, but all reports indicate favorable conditions unusually so in the case of Australia. Still the product of these countries will not appreciably affect the market until January, and even if their most hopeful anticipations be realized, their product cannot supply the deficiency caused by the partial failure in the United States.

The market has already been disturbed by the gloomy forecast. For many years dollar wheat has been the dream of American farmers, their realization has been far less. Already wheat has touched $1.08 and unless the reported damage be found to be exaggerated, it is certain to go even higher.

Within the last two weeks the Manitoba mills have raised the price of flour twice, the increases amounting to 40 cents per barrel. This is a cheering outlook for producers, but not for consumers.

CLOSE OF G. A. R. ENCAMPMENT

Boston, Mass., Aug. 20.—The most successful Grand Army Encampment of recent years is the unanimous verdict of the tens of thousands of visitors who have been attending the big gathering which came to a close today. Thousands of visitors turned their faces homeward today, but countless others will remain in the vicinity for several days yet to see the sights, visit places of historic interest and take in the seashore resorts along the New England coast. The warships in the harbor proved a great attraction today, thousands of visitors taking advantage of the opportunity to inspect them.

OLDEST TRIPLETS IN WORLD.

Clarksburg, Mass., Aug. 20.—An interesting reunion is to be held here tomorrow by three men who are said to be the oldest triplets in the world. They are Ambrose T. and Albert D. Aldrich, of Stockton, Cal., and Albert D. Aldrich, of Minneapolis. They are 57 years of age and they have gathered here for a visit to their mother, who is 88 years old.

ARE BRAVE AS LIONS

Japanese Assaults on Port Arthur Have Few Historic Parallels

Loss of Life Has Been Extremely Large But Attacks Are Continuous and Show No Sign of Weakness

St. Petersburg, Aug. 21.—2.46 a.m.—The foreign telegrams announcing that the final assault upon Port Arthur was projected for today have further stimulated in all circles the interest which has been unflagging for weeks past, concerning the fate of the fortress. The authorities continue to express confidence in the ability of the garrison to withstand the assault, but they say that should the fortress be carried, it will be at a cost unequalled in the history of the siege. The determined nature of the Japanese attacks upon what is considered an impregnable position is without precedent in military annals. No European power ever ventured to show such disregard of the lives of its soldiers. True, the allies at Sebastopol lost 12,000 men in the final assault, but the military experts admit that the Japanese have pursued the best plan, since repeated assaults are bound to exhaust the resistance of a garrison proportionately quicker than the same amount of energy spread over a longer period.

The situation at Liao Yang is creating comparatively little concern, though it is admitted they are much bound in the fate of Port Arthur. The rains in the north, it is thought, preclude the possibility of serious operations in the immediate future, while it is believed that whatever the Japanese plans may be, it will not be possible to carry them out in the face of general Kourpoatkin's strong position, unless the fall of Port Arthur releases such a mass of reinforcements as to completely turn the numerical scale of troops in the north.

The arrival of the cruiser Novik at Korsakovsk, in the island of Sakhalien, and of the cruiser Diana at Saigon, French Indio-China, clears up the whereabouts of every vessel of the Port Arthur squadron. So far as can be ascertained, the Japanese government has not yet made any reply to Russia's protest regarding the seizure at Che Foo of the torpedo boat destroyer Retshitelmi.

CAPTURED ANOTHER FORT.

Che Foo, Aug. 21. (Noon)—It is reported that the Japanese before Port Arthur have captured fort No. 25, one mile north of Golden Hill. The Japanese are not attempting to storm Liao Ti promontory. Their right wing terminates at Pigeonbay. The Russian garrison of Port Arthur is estimated at 23,000 men, covering an area of 12 miles. A junk arriving at Teng Chow, from the Miao Tao island, reports seeing yesterday five Japanese men of war pursuing two Russian warships, type unknown. They were going in an easterly directioo.

JAPAN'S POSITION.

She Defines It So Far as China's Neutrality is Concerned.

Tokio, Aug. 20.—The Japanese government today gave to the Associated Press a statement defining its attitude in the capture of the Retshitelmi and declaring its position on the entire question of Chinese neutrality as follows:

"The status of China in the present struggle is wholly unique. Nearly all the military operations are carried on within her borders. She is not a party to the conflict, nevertheless her territories are in part belligerent, and part neutral. That condition of things in the contemplation of international law is an anomaly and a contradiction. In this case it is a feature of a special understanding to which the belligerents have given adhesion with a view to limiting the area of hostilities in the interest of foreign intercourse and the general tranquility of China. The Japanese government engaged to respect the neutrality of China outside the regions actually involved in war, provided that Russia made a similar engagement and carried it out in good faith. The Japanese government considered that they were precluded by this engagement from making use, for military operations of any kind, of territory or ports of China outside of the zone which has been made the theatre of war because it seemed to them that such occupation would, ipso facto convert the places thus occupied and change from neutral to belligerent territory. It seemed to them that such occupation and use of neutral Chinese territory or ports by the Russian forces would give effect to the proviso in the Japanese engagement and justify her in considering territory or ports so occupied and used as belligerent. In other words, the Japanese government held that China's neutrality is imperfect and applicable only to those places which are not occupied by the armed forces of either belligerent, and Russia cannot escape the consequences of an unsuccessful war by moving its army or navy into those portions of China which by arrangement had been made conditionally neutral. The warships from Port Arthur sought refuge in Che Foo in asylum from attack, which her home port had ceased to offer, in this course she was abusing the agreement and Japan was fully justified in entering the harbor of Che Foo as far as the question of the Retshitelmi is concerned. The action taken by Japan with Che Foo, was a direct natural consequence of Russia's disregard of her engagement, but it is not alone in this matter, nor alone in the Che Foo matter, that Russia has flagrantly violated China's neutrality, and ignored her own engagements. Shortly after the investment and isolation of Port Arthur, a system of wireless telegraphy was installed between the beleaguered force and the Russian consulate at Che Foo. The system is still in operation, notwithstanding the protests of the Japanese government.

At Shanghai, at the beginning of the war, the Russian gunboat Mandjur, in defiance of China's neutrality, remained in the port for weeks after receiving notice to leave. Finally after long negotiations, she consented to disarmament. Again the Russian cruiser Askold and the destroyer Grozovoi have now been at Shanghai for more than a week and still refuse to disarm or leave.

The Japanese government has no intention of disregarding China's neutrality so long as it is respected by Russia, but they cannot consent that Russian warships, as a result of a broken engagement and a violated neutrality, shall unchallenged, find in the harbors of China, safe refuge from capture or destruction."

SIEGE OF PORT ARTHUR

Tallushan Declared to Be of Little Use To the Japanese.

Che Foo, Aug. 20.—Firing at Port Arthur by big guns was distinctly heard here tonight. Late advices from Port Arthur say that Palungchang, although retaken by the Russians, has not been occupied by either side. The Russian batteries have contented themselves with preventing the Japanese from reoccupying this position and planting guns which would command the Russian warships in the harbor. Russian naval officers believe that the Japanese battleship Mikasa was sunk in the engagement of August 10. They declare that while the Japanese concentrated their fire on the Czarevitch, the Russians centered theirs on the Mikasa, admiral Togo's flagship.

It was the Mikasa which the Retvizan tried to ram during the fight. The Retvizan had been receiving a gruelling, and her captain suddenly gave an order to steer in the midst of the Japanese vessels and head for the Mikasa. So fully surrounded was the Retvizan that at one time she was using every one of her guns. One Japanese shell rendered her turret unworkable, but repairs were made in ten minutes.

The Russian warships which returned to Port Arthur declare that admiral Withoft's last order was to return to Port Arthur. This disagrees with a previous statement from Tsingtau, alleging that the admiral's last order was not to return.

Commercial business at Port Arthur is said to be completely at a standstill. The people are living in bomb-proof houses. A belief on both sides of the contending forces that the other side is abusing the red cross has led to the feeling that the emblem is of little protection.

The Russians assert the Japanese use the flag to cover reconnoitering parties. Recently a Russian sharpshooter noticed an officer and a party of 15 carrying a red cross flag. He reported that he believed the Japanese were shamming that they were wounded. The Russian officer in command gave the sharpshooter permission to fire on them. The sharpshooter killed or wounded all of them. As fast as one dropped the red cross flag another picked it up.

It is also reported that the Japanese attempted to drive the Russians in Tsingshai to fire their electric ground mines by herding cattle over them in the darkness. This ruse has, it is said, resulted merely in affording the besieged with fresh supplies of beef. The Russians declare that Tallushan is doing the Japanese but little good, as they are frequently driven from that position by artillery fire. They are also unable to mount guns. Among the buildings in Port Arthur that have been destroyed by shells are the Russian church and Clarkson & Sons' American watch house.

WERE SHELLING THE RUSSIANS.

Che Foo, Aug. 20.—The steamer Prehili, just arrived here, was overhauled and boarded by a Japanese destroyer and five torpedo boats six miles off Lati promontory last night. An officer from the destroyer stayed on board for 40 minutes conversing with the Japanese consul at New Chwang, who was on board. The sound of firing was so heavy occassionally that conversation was difficult. The Japanese explained that they were engaged in shelling the Russian positions with the utmost vigor preparatory to an assault today towards daybreak. When the Prehili was permitted to proceel on her course, the firing was at its heaviest, and it was believed to indicate the imminence of a general assault.

THE ATTACK CONTINUES.

Japanese Continuing Long Assault on Port Arthur.

Che Foo, Aug. 21.—9a. m.—A reliable authority declares that yesterday's (Saturday) attack on Port Arthur was unsuccessful but continued last night, and today and will go on for one more day if the Japanese are still repulsed.

WAS ARMED AND MANNED.

Tokio, Aug. 20.—The statement of the commander of the Retshitelmi that his ship was disarmed upon arrival at Che Foo, is untrue. The vessel was fully armed and manned when visited.

BLOOD SPILT IN CHICAGO

One Killed and Three Wounded in the Stock Yards

Strikebreakers Fired on the Crowd That Jeered Them--One Man Who Fired Arrested by Police

Chicago, Aug. 20.—During a riot in the stock yards tonight, one man was killed and three others were wounded by bullets. The dead and wounded are:

Andrew Nebroutski, shot in center of forehead, died immediately.

Harry Hanson, slightly wounded.

Daniel O'Mara, shot in left leg, not serious.

A crowd of men and women strike smpathizers had gathered at 40th street and Emerald avenue, where all trains leaving the stock yards stop. A long train filled with Greeks and negroes from the yards stopped and when the strike sympathizers commenced to hoot and jeer at the non-union men, and pressed close to the sides of the cars, the men inside opened fire.

Nebroutski was killed at almost the first shot. Hanson, who was standing close to him, was wounded a second later, and Ryan and O'Mara were hit as the crowd ran away from the cars.

A riot call was turned in and 40 policemen hurried to the spot. The police ordered that every door and window of the train be closed and a party of a dozen passed through each coach in search of weapons, while the remaining force beat back the crowd. It was learned that the shot which killed Nebroutski had been fired from the third coach near the centre of the car. As the policemen entered this car they found the occupants in a panic and nearly every man had some kind of a weapon concealed about him.

A man, giving the name of Oley Everett, was arrested and charged with the shooting. A revolver with the barrel still warm and containing three empty shells was found upon him. Two others were held as witnesses.

WILL NEED THEM ALL.

Czar Has Issued an Ukase Calling Out More Troops.

St. Petersburg, Aug. 20.—The emperor has issued a ukase summoning to the colors all the reserve officers throughout the empire. The Official Messenger today announced the mobilization of the reserves in four districts of the Poltava government, two in the Ever government, one in the Samuar government, four in the Saratoff government, two in the Astrakhan government, one in the Ufa government, five in the Sambierk government, one in the Meim government, one in the Holyhnia government, and seven in the Archan government, and seven in the Olonetz government.

LESSON OF NAVAL FIGHT.

Ten and 12-Inch Guns Well Served Did Most Damage.

Tsing Tau, Aug. 20.—The correspondent of the Associated Press asked captain Matousevitchof, of the battleship Czarevitch, and the late admiral Withoft's chief of staff, in the hospital here today, what lessons he deducted from the naval fight of August 10. The captain was too weak to reply at length, but he said conclusions might be drawn from the fact that the 10 and 12-inch guns were accurately served and did the most damage.

WILL PROBABLY DISARM.

Shanghai, Aug. 20.—The report that the taotai has ordered the Russian torpedo boat destroyer Grozovoi to cease making repairs at once and leave this harbor before noon today or disarm, and the Russian cruiser Askold to leave Shanghai before noon on Monday or disarm, is confirmed. It is said to be impossible for the Askold to cross the bar before the spring tides, and official circles believe that both the Grozovoi and the Askold will disarm.

A THREE-DAY ASSAULT.

Che Foo, Aug. 21.—It is understood that the Japanese plans at Port Arthur contemplate a three days' assault. They expect to triumph on the third day It is stated that they have a sufficient force to maintain an assaulting force of 60,000 men throughout. Four thousand Japanese are reported to have landed at Dalny yesterday. It is alleged that the check of Saturday does not jeopardize the progress of the assault as planned.

SHAMROCK IV.

Sir Thomas Lipton Trying to Find a Yacht Designer.

Gourock, Scotland, Aug. 20.—Sir Thos Lipton is finding some difficulty in securing a designer for Shamrock IV. After discussing the mater with leading Clyde yachtsmen, he decided that Geo. L. Watson was the most likely to succeed and opened negotiations with him. But Mr. Watson replied that his health would not warrant his taking the strain of designing another challenger for the America's cup, and he therefore declined.

Outside pressure was brought to bear, however, and Mr. Watson visited the Erin today for another conference with sir Thomas and they will further discuss the matter tonight.

At the Clyde Yacht club, where Mr. Watson dined with Sir Thomas, the correspondent of the Associated Press was informed by a confidential friend that a definite order to design a challenger has again been urged on Mr. Watson, and that if he consents, a formal challenge will immediately be issued.

ROUND LAP BALES.

Company Owning Patent Has Made Large Investments.

New York, Aug. 20.—William Nelson Cromwell, counsel for the reorganization committee of the American Cotton company, made today a statement which says in part: "The American Cotton company began operations in 1898 upon the introduction of the new round lap bale process for baling the staple product of the south. Over $4,000,000 has been invested in the introduction of the round lap bale in the United States and in Europe it being protected by patents both at home and abroad. The company owns a large press foundry in Chicago and in nine southern cities owns 83 different plants and also leases out presses at 215 other points."

WORK IS BEING RUSHED

PHOENIX BRANCH WILL BE FINISHED THIS FALL

CURLEW EXTENSION IS SAID TO BE PRACTICALLY GRADED.

[Special to The Daily News.]

Phoenix, Aug. 20.—L. E. Shields, of the contracting firm of Seims, Shields & Co., of St. Paul, head contractors for all extensions of the Great Northern system, has just visited this camp, having gone over a large portion of the new railway line now being constructed from Grand Forks to Phoenix by the Great Northern.

Mr. Shields stated that he expected to see trains running into Phoenix this fall over the new line, if the weather did not bring heavy snows too early, and thus prevent ballasting. The grading of the Granby smelter spur is well on towards completion, and in a couple of weeks the tracklayers were expected to be at work on that part of the new line. Porter Bros., who have the contract for all the bridges and trestle work on the line, as well as for the laying of the steel, have started operations on two bridges near Grand Forks, and will increase their force steadily.

On the 16 mile extension from Curlew, Washington, to Midway, B. C., under sub-contract to Caughran & Woldson, Mr. Shields says the work is practically completed, with the exception of a little rock excavation, most of it being what is known as easy work. It is not likely, however, that the iron will be laid on that piece this year, unless the Great Northern engineering parties, now working west of Midway, secure the grades being looked for there sooner than is now expected.

The lower end of the Phoenix line is also now in an advanced state of grading, while Burns & Jordan, who with their crew of upwards of 500 men, have the terminal grounds in and around Phoenix in hand, comprising nearly ten miles of grading, are making the best of progress. Another two months or less will see them finished practically, with the exception of some rock sub-contracts, whil will take a little longer.

KILLED AT CROSSING.

Hamilton, Aug. 20.—Mrs. Leonard Lodge, of Saginaw, Mich., and Mrs. Thomas Knox, of Lyndas, Ontario, were struck and instantly killed by the Toronto, Hamilton & Buffalo-Brantford train near Jerseyville crossing last night. They were thrown in front of the locomotive. It is not known whether the horses became unmanageable, or whether they failed to notice the approach of the train.

SOCIALIST PROCEEDINGS.

Amsterdam, Holland, Aug. 20.—The international socialist and trade union congress at its final sitting today adopted a resolution calling on all socialists and trades' unions to organize a demonstration in favor of an eight hour day, and to stop work on May day. A resolution on the trusts, which was also passed, set forth that socialists, ought to direct their efforts toward the social situation of production.

HARVESTERS FOR THE WEST.

Toronto, Ont., Aug. 20.—Officials of the Canadian Pacific railway and the Grand Trunk railway are preparing for handling the big crowds of harvesters who have decided to go west. Already railways have been furnished with a list of 2,300 of Ontario's best sons who are prepared to go, and before the trains pull out of the union depot today it is expected that 500 more names will be added.

PLANS OF SIR HENRY IRVING.

London, Aug. 19.—Sir Henry Irving is anxious that it should be known that there is no foundation whatever for the report that he intends to visit South Africa. He intends to play only in Great Britain, Ireland and the United States prior to his retirement two years hence.

A NEW INCORPORATION.

Albany, N. Y., Aug. 20.—Among the stock companies incorporated today was the Alaska Telephone & Telegraph company of New York, capital $100,000. The directors are all of New York city except A. E. Boyd, of Nome, Alaska.

A HORSE THAT THINKS

Hans, a German Equine, Does Some Wonderful Things

Attracting Much Attention in Berlin by His Accomplishments--Some Think Performance a Fake

Berlin, Aug. 20.—Hans, the thinking horse, has been as much talked about this week as the quotations on the Bourse. His accomplishments in music, color discriminations, and especially in financial arithmetic, have been the subject for dissertation in almost every periodical in Germany. Some of the scientific journals see in these accomplishments fresh testimony of the kinship of man to animals. The comic papers have rhymes on the emotion of the horse, with suggestions for opening night schools for omnibus hacks and quotations from the horse thinkers' views on domestic politics or the Russo-Japanese war.

The genuineness of the animal's attainments does not go unquestioned, a minority of the faction asserting that Dr. Studt, the Prussian minister of public instruction, and the scientific persons who share with him the belief in the reality of the horse's performances, are victims of a huge joke of the animal's owner, professor Von Osten.

A cavalry captain who observed the horse's doings, affirms, according to the Morgen Post, that Von Osten signals correct replies to the question by raising his eyes as the horse goes through the alphabet and that his reading a question put in writing is a mere humbug.

PROPOSED STOCK EXCHANGE.

A meeting for the purpose of discussing the matter of opening a stock exchange will be held Monday afternoon at 3 o'clock at the office of Brydges, Blakemore and Cameron. While a majority of the brokers in town are in favor of the movement there are some who do not consider it a good proposition. However, the matter will be fully gone into on Monday and will be discussed from various points of view. All those who are interested in the matter should attend.

TORNADO AT ST. PAUL

FIVE DEAD, FORTY INJURED, $200,000 IN PROPERTY DESTROYED

THE HIGH BRIDGE ACROSS MISSISSIPPI IS WRECKED

St. Paul, August 20—Five are reported to be dead, two score injured, and property damaged to the extent of $2,000,000 by a tornado which swooped down on the city shortly after 9 o'clock tonight. The Tivola theatre was demolished, the Empire theatre raised, the high bridge, an immense steel structure, crossing the Mississippi river at a height of 200 feet, was almost totally destroyed and 200 buildings are more or less damaged.

A report at midnight that the house of the Good Shepherd, a Catholic institution, was wrecked and 25 injured there. All communication with outlying districts is cut off and it is impossible to say whether the damage there is as heavy as in the city itself.

The damage at Minneapolis is said to have been nearly as great as at St. Paul.

The storm was of short duration, lasting not more than 15 minutes, but the devastation it wrought was terrific. Buildings were unroofed and doors blown in, the interior being flooded by rain, which came in great waves along with the wind.

JEFFRIES IN GOOD SHAPE

San Francisco, August 20—Champion Jeffries left his training quarters at Harbin Springs today and arrived in Oakland tonight, where he will complete his training with the Reliance Athletic club. Jeffries is in the pink of good health and goes to his work vigorously every day. The only fear expressed by his trainer is that he may again injure himself, owing to the zeal with which he carries on all his work.

At Munroe's camp at Sheehan's tavern, a feeling of satisfaction prevails. The big miner is said to have made wonderful advances and to have never been in such condition for a battle.

DR. DAVIDSON COMING

London, August 19—Dr. Davidson, the archbishop of Canterbury, is among the passengers on the Celtic sailing for New York today. The primary object of Dr. Davidson's trip to the United States is to attend the general Episcopal convention to be held at Boston next October. The interval between his arrival and the opening of the convention will be spent by Dr. Davidson in visiting personal friends in Canada and New York.

CAUGHT 1500 FISH.

Victoria, August 20—Hon Raymond Prefontaine visited the Sooke fish traps and witnessed a lift of about 1500 salmon. The minister was the guest of J. A. Marg this evening and leaves for Vancouver on the Quadra tomorrow morning and will visit Nanaimo from there.

MISS PURCELL THE QUEEN

Rossland, August 20—Miss Mary Purcell, a beautiful Rossland girl, has been elected queen of Grand Forks street carnival. She received 3076 votes, which was 241 more than her nearest competitor, Miss Hoffman of Grand Forks.

HUDSON'S BAY COMPANY'S COFFEES

HUDSON'S BAY COMPANY — INCORPORATED 1670

Whilst we always have handled the best procurable values in Coffees, we thought that we could serve our customers still better by importing the bean in its green state and doing the roasting, grinding and canning ourselves. To obtain the best results we have started a special Coffee Department in Winnipeg, under the supervision of a skilled expert. This enables us to guarantee unchanging superior quality, superior to that supplied in the past. These coffees are very attractively packed and each tin bears our own new label.

The first shipment arrived a few days ago, and we offer it at the following prices.

H. B. C. MOCHA AND JAVA

1 lb tins, 45c; 2 lb tins, 85c; 5 lb tins, $2.00

H. B. C. TURKISH

1 lb tin, 35c; 2 lb tins, 65c; 5 lb tins, $1.50

MINING BROKERS. NELSON, B.C.

THE WHOLESALE TRADE.

Bradstreets weekly summary, published in The Daily News, of yesterday, reports that Victoria and Vancouver wholesale business is good for this time of the year. Fall orders so far have been fair and the prospects for the fall trade are encouraging. This coming from a conservative commercial agency like Bradstreets means that business in a wholesale way is good and when the wholesalers do well the retailers must perforce be doing a good business.

The wholesalers of Nelson report that they are doing a good business and they are looking for a very large trade during the remainder of the year. The mining sections are properous and when this is the cast Nelson shares in the fat times.

The amalgamation of mining interests in the Boundary, the extension of the Great Northern from Grand Forks to Phoenix, the extension of the branch of the same company from Morrissey to Fernie, the increased number of men employed in the silver-lead mines as a result of the lead bounty, the augmented number of men employed in the smelters as a result of the increased quantity of silver-lead ore produced, which they are reducing, the extension of the mining industry at Rossland through the increasing of the concentration method of treatment, the larger number of men employed in the Lardeau in consequence of the increased number of plants operating and the expansion of the mining industry there, the larger number of sawmills at work sawing lumber for export to Manitoba and the Northwest and for home consumption, together with the new rates granted by the railways, have all combined to increase the business of the Nelson wholesaler.

It is, therefore, as plain as a pikestaff that there are about 4500 more men at work in the Kootenays than there were at this time last year, and as they must be provided with supplies it is obvious that the Nelson wholesalers are getting a good share of the resulting business.

The people of the Boundary are the largest patrons of the Nelson wholesalers. That the trade is large is shown by the fact that the C. P. R. runs a mixed freight train from here to the Boundary every day in the week, besides a refrigerator service once a week which carries perishable goods.

The Crow's Nest territory comes next in importance. A large business is done with Moyie, Cranbrook, Wardner and Marysville.

Next in importance comes the Slocan. Then follows the Lardeau, where the Nelson wholesaler enjoys practically a monopoly at Poplar, Trout Lake and Ferguson. The trade of Camborne practically all goes to the coast, but still the Nelson wholesalers lately have made some gains there and hope ultimately to capture more of the custom. With Rossland considerable business is done, while Ymir, Salmo and Erie buy practically all of their goods here.

Now that a certain fixed and properly delimited section has been given by the railroads to Nelson to do business in, the merchants are making a greater effort to cater to and satisfy the wants of their patrons, and are making it as advantageous as possible for the retailers in the section to order their goods here. They realize that the interests of the wholesaler and retailer are so bound together that fair dealing and moderate profits are essential to keeping up the good relations between the two and absolutely necessary for the very existence of both. The outlook for the wholesale business never was brighter than it is at present.

Already several of the representatives of the larger houses at the coast have visited here for the purpose of looking over the ground with a view to the establishing of branch houses here. This shows that the place is growing in the estimation of the outside world as an important wholesale centre.

The struggle in the past of the wholesalers to establish themselves on a firm and enduring basis here has been a hard one, but there is now no doubt about the future.

EDITORIAL NOTES.

With all due deference to those who are interested in the grass growing at the city park, it seems to us that too much consideration is given it. It has been growing for a long time and all the growth for the season is about over. Of course it will be very nice for the agriculturally inclined portion of the city council and those whose tastes run in a bucolic direction to show the visitors some scraggy-looking grass in the recreation park when the fall fair is in progress. The park, however, was not purchased with the money of the farmers and fruit growers, but was paid for out of the funds of the city, which were derived from the people in the city. The park, too, was intended for the use of the people of the city. Under the circumstances we believe it would be a good plan to allow the lacrosse team to use the park at the present time for a place in which to practice. The park belongs to the people of this city and not to any particular set or society, and the people should be allowed to use it, notwithstanding the protests of one or two individuals who are so deeply interested in grass culture.

The excursion from this city to Grand Forks on Thursday next under the auspices of the business men promises to be a pleasant and successful affair. The idea has been taken up enthusiastically and a large number of participants are assured. In order that every business men may attend, if he so desires, it has been decided to make Thursday next a civic holiday. Grand Forks promises an aggregation of attractions which will be fully worth the journey.

The indications are that the Great Northern railway soon will traverse the Crow's Nest Pass. At present a line runs from Great Falls, on the Great Northern in Montana, across the Canadian border, through the Mormon settlements of southern Alberta, and on to Lethbridge. This line, says the Fernie Free Press, is to be turned westward and continued to Pincher creek, not far from the boundary of British Columbia. Three camps of surveyors are reported to be working on the preliminary location. Another branch line leaves Jennings, on the Great Northern, and runs up the Elk river valley, just west of the Crow's Nest Pass, to Morrissey and Fernie. This line, it is believed, will be pushed on to Michel, still nearer the pass. The next step will be to connect Michel and Pincher Creek by a line over the summit. Then Mr. Hill will have a line through the Crow's Nest Pass and southern Alberta.

THE BRUSH FIRE SITUATION.

The Smoke is Disappearing and the Fires Going Out.

The pall of smoke which has hung over Nelson for nearly a fortnight has at last disappeared. A rising barometer yesterday which gave no hope of early rain seemed to promise a continuance of conditions to which people had grown somewhat accustomed, but a high westerly wind drove the smoke away from the northwest along the river, and from the south towards Ymir, and as the fires near the former place have burned out in the immediate vicinity, and those around Ymir have probably been extinguished by heavy rains there yesterday, there is probably little further to fear.

Last night came the good news that heavy rains had fallen all along the line of the Crow's Nest Pass railway. Similar news from Slocan and Trout lake districts would be very welcome, but the reports that have come indicate at least that the prolonged dry spell is at last broken and sufficient rain may now be looked for to check and gradually subdue the fires that have so seriously interrupted work and threatened property throughout the whole of Kootenay.

LACROSSE SEASON IS OVER

Nelson lacrosse team's projected trip to the coast has finally been declared off. The American league, the management of which began negotiations with J. F. Musselman for a series of games in now in a moribund condition and not in a position to make any offer.

The lacrosse committee of the New Westminster exhibition management made Mr. Musselman the munificent offer of $250 for three games. The offer was not treated seriously, it wouldn't cover railway fares. The offer is hard to understand when it is remembered that for a trip to Kootenay and one game, necessitating a stay of only one day, the New Westminster team demanded and received $900. Under the circumstances the lacrosse season, so far as the Nelson team is concerned, is over.

Eagles' Excursion

SS. KASLO

To Kokanee Park

Tuesday, Aug 23

Leaving Nelson 9.30 a.m., 2 p.m., 8 p.m.

Returning leave Kokanee, last trip, at midnight

GRAND BIG STREET CARNIVAL

During the Race Meet at

Grand Forks, B.C.

August 24-27

(INCLUSIVE)

The most novel attraction ever held in the Boundary country. Four days of general entertainment and merry-making, in which the whole Boundary country is cordially invited to participate.

An interesting feature of the Carnival will be the coronation of the Queen, who will be elected by popular vote. Candidates are entered from Rossland, Nelson, Greenwood, Phoenix, Republic, Northport and Grand Forks, and a close and spirited contest is looked for. The successful candidate for Queen will be presented with a purse of $50.00 for preparatory expenses.

Another feature will be the Grand Midway Plaisance, which will be stocked with novelties of every description. There will also be a rock drilling contest for a purse of $200, in which the best teams in the surrounding country will meet in competition.

The Gala Attraction will be the Mardi-Gras night; when everyone is invited to mask from 7 to 11.30 p.m. For further particulars see posters. There will be SPECIAL RATES ON ALL RAILWAYS during Carnival Week.

FRED STARKEY TALKS

HAS NOT BEEN OFFICIALLY NOTIFIED O FHIS SELECTION.

NO OPPORTUNITY GIVEN HIM TO ACCEPT THE POSITION.

Fred Starkey was seen yesterday in regard to the statement made that the question of his appointment on the executive of the campaign committee having been referred to sir Hibbert Tupper and to the effect that a decision had been given in favor of William Blakemore, he said:

"I have never been notified by the executive committee of my appointment as a member of that body, and therefore have no knowledge from an official source that I have been appointed a member. I have seen the matter referred to in the newspapers, but that is all. Under the circumstances I do not see where there is an oportunity for Mr. Blakemore to make any political capital for himself out of any decision sir Hibbert Tupper may have rendered. When a man is selected to a position of this sort the privilege of accepting or rejecting it is always optional. So far I have had no opportunity of doing either."

"If the place on the executive is offered to you in the regular course of events will you accept it?"

"That would depend upon circumstances. If by accepting the place on the executice I could render any assistance to the conservative party I would do so; otherwise, I would reject it. There are other aspirants for political honors who are ready to take that place. I made up my mind some time since to keep clear of politics. They are not conducive to a man's peace of mind when he has a growing business to look after. Politics are all right for those who have plenty of leisure and sufficient time on their hands to devote the major portion of their attention to them," concluded Mr. Starkey.

MAYETTA DEAL CLOSED.

The Final Payment Has Been Made on The Property.

The deal for the Mayetta group has been closed says the Slocan Drill. This week R. J. McPhee made the third and last payment on behalf of his principals. There are nine claims in the group, viz., Mayetta, Aricle, Flyette, Biloxie, Biloxie fraction, Algy, Alfred, Algiers, and I Wonder, and were owned by F. Carlisle, who cleans up a nice little pot of money.

The claims adjoin the Ottawa on the north and both veins of the latter have been discovered and opened up on the purchased ground. All the claims do not possess these veins, for some of them have been secured because of the fine timber they carry, but sufficient mineral territory is in evidence to make the group of value, especially when worked in conjunction with the Ottawa. The east vein in particular has been opened up and stripped over a distance of hundreds of feet, and in a number of places ore is exposed. A tunnel has been driven on the Aricle for 60 feet, heading to cut a large surface cropping of quartz.

The purchasers will put on five or six men at once and will extend the tunnel mentioned, continuing it all winter. It will give 150 feet depth on the vein and the expectations are another big bunch of ore will be opened up. Good buildings are on the ground and the property is reached by trail from the end of the Ottawa, with whose destiny it will be linked for the present. The conclusion of the deal verifies the assertions of Thomas Noble, when here three weeks ago, that he and his friends would enlarge their operations in the camp. Their first move has been one of significance.

F. C. Green, of Nelson, is now on the property, surveying it and a number of adjoining side claims, preparatory to obtaining a crown grant on the bunch. It will take him about a month to complete the survey.

WHERE WILL BOYS PRACTICE?

Revelstoke has challenged the Nelson lacrosse boys for a game at Revelstoke labor day, September the 5th. The Nelson boys are very anxious to accept the challenge, but are afraid that owing to having no place to practice it is doubtful if the game can be brought off.

ND FORKS EXCURSION

BUSINESS MEN WILL ATD CARNIVAL IN BODY.

AY NEXT TO BE DECLARED A CIVIC HOLIDAY.

gestion that Nelson's business ld actively patronize the Grand rnival has been acted upon and with good will. Yesterring alderman A. H. Clements, rkey and Blake Wilson circupetition among the business presentation to mayor Hamilng him to declare next Thursinstant, a civic holiday, to portunity to business men and attend the carnival.

met with general acceptance and undoubtedly a large crowd on will attend. By corres with the management of the was learned that Thursday the best day for a Nelson exthat is the day of the horse rses with records are coming ane and from the coast cities gton, from the coast of this and from Pincher Creek, Alraces will be well filled and ntested. The other attracde day and evening will also rth seeing.

posal is to get a special train price of the round trip ticket nary single fare. The train will leave Nelson at 7 a.m. and returning leave Grand Forks at 9 p.m. It is also proposed that a special badge be worn by the Nelson excursionists in the form of a white fedora with a green band, making a prominent display of the Nelson colors. James Gilker has undertaken to furnish the hats. It will be readily seen that this plan will offer several advantages.

There are many reasons why a large number of Nelson business men should avail themselves of this opportunity. The celebration will be worth visiting for its own sake, and horseracing is a sport that seems still to lie far in the future as far as Nelson is concerned. Then the people of Boundary district deserve every encouragement in their enterprise; and finally, though it be a selfish reason, it will not diminish the attendance of outsiders at Nelson's celebrations to have it shown that her citizens accord generous support to similar efforts in other towns.

The following telegram was received from Grand Forks, from W. A. Harkin:

Grand Forks, Aug. 30.—Fred A. Starkey, Nelson, B. C.—Arranging to have Thursday a civic holiday here. The prospects are excellent for the best races ever held in B. C. Trust to see as many as possible from Nelson and guarantee good sports. Thank you for interest taken. W. A. Harkin, secretary.

Monkey Brand Soap cleans kitchen utensils, steel, iron and tinware, knives and forks, and all kinds of cutlery.

What Fruit-a-tives are

"Fruit-a-tives" are fruit juices in tablet form. They are the laxative, tonic and curative principles of fruit—combined into pleasant tasting pellets. They contain all the virtues of fruit—but by the secret process of making them, their action on the human system is many times intensified.

What "Fruit-a-tives" are for

"Fruit-a-tives" are the natural and logical cure for all Stomach, Liver and Kidney troubles. Their action is that of fresh fruit, only very much surer and more effective. Then too, they are free of fruit acids, sugar and woody fibre which often prevent fresh fruit being beneficial.

Try "Fruit-a-tives" and see how quickly they cure you of Constipation, Biliousness, Sour Stomach, Bilious Headache, Loss of Appetite and Kidney troubles.

NEW YORK FASHION LETTER

New York, August 20—The powers that invent and mold the fashions have evidently not quite decided what novelties and changes they will decree for the coming fall and winter seasons. It is true, some slight changes have been made, indicating a marked, though not radical departure from the styles of the spring and summer, but these changes are as yet only tentative and do not clearly and definitely point in a certain direction.

According to reports from Paris the characteristic bell shape of the present day skirts will be greatly emphasized or exaggerated in the fall and winter styles. The question whether they will be full or tight around the hips is not yet decided, but there is no doubt but that the flaring effect of the hem will be accentuated by using some methods of increasing the flare. In some models stiff linings in the hem are used to support the outward flare of the lower part of the skirt, while in other models the desired effect was produced by silk covered cable cords, running along the lower edge. If neither of these methods is employed, the desired result will be obtained by voluminous ruchings and ruffles along the lower part of the underskirt.

The new corset which has been introduced in Paris and is finding great favor, will soon make its way across the Atlantic. It promises to cause a marked change in the feminine form. The new corset supports the bust without raising it above its normal position and is said to give more freedom and a more natural and artistic figure than the high bust corset. Another peculiarity of the new corset is that it sharply defines the waist line, without preventing the straight line effect in front.

Another novelty which may be expected for the coming fall, is really not a novelty but a revival of modernized form. It is the redingote of long ago brought up to date by various modernizing touches and improvements. The new redingote will be either single or double breasted or open in front with a waistcoat to close the gap. The basque part of the garment is voluminous to accommodate the full skirt and the neck is collarless, with bands, turnovers and lapels. The redingote is either cut without a break in the waist line or it has a separate bodice, joined to the basque at the waist with a seam.

The revival of the redingote will undoubtedly give a powerful impetus to the popularity of the waistcoat, which promises to be much in evidence during the coming fall. It will be worn in a great variety of forms. It may be cut high or low, may form a separate garment or merely simulate one. It may be of the same material and same color, or may be used to enhance the general effect by introducing a touch of bright or contrasting color. There is practically no limitation of its decorative possibilities.

The thin silks and other sheer fabrics which are so extensively used this summer are undoubtedly beautiful and seasonable, but they have one great disadvantage. They are so light and delicate that the slightest breeze is sufficient to disturb them and only a woman who has been out walking or riding in such a gossamer dress or those who amusedly watch her frantic efforts of preserving the decency of her appearance in spite of a most aggravating and shameless breeze, will fully appreciate what the disadvantage referred to really means.

Some women were so exasperated over the antics of their skirts that they gave up the fight in despair and took to less volatile fabrics. Now, that is really too bad, as these delicate materials are exceedingly beautiful and effective. However, there is no cause to despair. There is a very simple remedy and ingenious dressmakers are making those skirts of sheer materials with wide and flannel lined hems and with a number of small lead sinkers fastened to the inside of the lining.

Those in close touch with the most prominent fashion establishments of Paris predict that dolmans will be worn a great deal during the coming fall and winter. A writer in Crerand's Journal gives the following description of some of the models of dolmans exhibited in one of the leading Paris establishments: "One of the models is of that brilliant brown cloth so fashionable just now, and is made entirely in one piece with enormous sleeves taken in the fulness of the big circular garment. There is a big capuchin turning into a stole arrangement of passementerie. Another model, retains the dolman shape, but with seams down the shoulders, has an enormous collar, making a deep point in the back of squares of guipure dyed the same shade as the cloth mounted in brown velvet and edged with sable. The dolman sleeves have extensions of straight, wide cuffs to match this. The garment may be worn with the fronts turned over to show reverse faced with brown velvet. Still another is glossy black cloth. It is of paletot shape with big puffed sleeves over which fall half a dozen little circular cape pieces. The straight fronts are faced in deer skin dyed a rich black, and thrown back, display a fitted double breasted waistcoat of the same glossy fur, trimmed with a border of green velvet touched with gold braid.

It seems that the popularity of the bolero is by no means on the wane and that it will be very much in evidence all through the coming fall and winter. The bolero has many valuable and attractive points. It is undoubtedly very chic and pretty, adds a saucy touch to the most demure dresses and more than anything else enhances the most attractive features of a good figure. But, it has another advantage, which will, undoubtedly, add to its popularity. It may save money under certain conditions. It does not cost much to make a bolero which is handsome and attractive and it costs a great deal less to cover up defects in a waist or bodice with a handsome bolero than discard the waist or replace it with a new one.

Some writer on fashions has recently called atention to the fact that American manufacturers are themselves responsible for the fact that so many American women purchase not only their clothes in Europe but the materials of which they are made also. It is a well known fact that American cotton goods excel in quality and beauty those of any other country. Yet whenever some particularly fine or handsome material is produced by American mills, it is put in the market as imported from either France or England. It is rather peculiar that English merchants, to create a demand for their goods, represent them as manufactured in America, while the French, who import most of their cotton goods from America and England, never admit that the goods are imported.

A new style of sleeve called the Jack Horner sleeve, has made its appearance in London and will undoubtedly find many admirers on this side of the ocean. It is low upon the shoulder and tight in the upper arm and gradually grows wider until at the wrist it has the circumference of a good sized pillow case. At the wrist it is finished with two full and deep ruffles of lace. It will be worn a great deal on fall coats and its effect is quite attractive.

Although a return to the close fitting coats of the directoire style is predicted for the coming fall, the picturesque long and loose coats which were worn this summer and have met with so much favor here, will undoubtedly be retained, especially for evening wear.

Although the weather in New York has been unusually rainy this year and the humidity of the atmosphere abnormally great, feathers are used very much for decorating purposes. Large and gracefully curved plumes, sometimes three plumes arranged in prince of Wales style, and various other styles are used extensively. Undoubtedly the most graceful and beautiful style is that of using but a single long plume, curving around the top of the hat and the end falling over the brim. There is every reason to believe that feathers will be the most popular style of hat decoration this fall.

ESTELLE CLAIREMONT.

HAVING A ROUGH TIME

RUSSIAN TROOPS AROUND LIAO YANG EXPOSED TO HARDSHIPS

HEAVY RAINS, DEEP MUD, TROPICAL HEAT AND UNRIPE FRUIT.

St. Petersburg, Aug. 20.—Harrowing descriptions of the effects of the heavy rains, the deep mud, and tropical heat, and the consumption of unripe fruits on the health of the Russian soldiers around Liao Yang are published by the St. Petersburg papers. One correspondent telegraphs:

"A roaring torrent of yellow waves is rolling down the Liao Yang mountain streams, which have flooded the surrounding country and in order to reach the second Russian position one has to cross them ten times. The Cossacks ford the streams on their horses, whose haunches are covered by the water, while foot soldiers undress and raise their rifles above their heads. Battalions of our troops climb hills thus wet to the marrow and jaded. Carts, guns, and two-wheeled vehicles conveying ammunition sink fast in the mud. Boots are coated with dirt, and the entire uniform is soaked through and through, in spite of macintoshes and waterproofs, in the rain which falls in torrents.

"Greeks and Tartar have opened numerous shops, in which they are selling inferior wares obtained from Yin Kow and Harbin. The railway battalion supplies us with tailors and shoemakers. Prices are pretty high, but there are workshops and stores, and everything needful can be found in Liao Yang. The Greeks have brought us German, Danish and Japanese beer, champagne and liquors. The food at the hotels is inferior, but nothing is lacking—not even billiards. The climate is homicidal. The heavy rains are accompanied by tropical heat. Sunstrokes and heatstrokes are frequent; and often produce heart paralysis.

'It is imposible to drink water from the stream, and the troops depend upon the hot tea with which they are supplied. The vegetables to be obtained, and especially the Chinese cucumbers, are most harmful, but our soldiers eat them, even on the march. Worst of all, however, is Manchurian dirt. Exposed to the rain, in slush and slimy mud, our brave soldiers perish who are otherwise able to endure all the hardships and sufferings of a campaign. Never before have Rusiasn troops been called upon to fight under such terrible conditions."

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory,

of the location.

Placer Mining.—Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims generally are 100 feet square; entry fee, $5, renewable yearly. On the North Saskatchewan River claims are either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged beds or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan River, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end of the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of a Royalty of 2 1-2 per cent of the sales of the products

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miners for a term of twenty years, also renewable.

The lessee's right is confined to the submerged beds or bars in the river below low water mark, that boundary to be by its position on the 1st day of in the year of the date of the lease.

The lessee shall have one dre operation within two years from the of the lease, and one dredge for each miles within six years from such Rental, $100 per mile for first year per mile for each subsequent year. ty, same as placer mining.

Placer Mining in the Yukon Terri Creek, gulch, river and hill claims not exceed 250 feet in length, mea on the base line or general direct the creek or gulch, the width betw 1,000 to 2,000 feet. All other placer shall be 250 feet square.

Claims are marked by two legal one at each end, bearing notices. must be obtained within ten days, claim is within ten miles of a recorder's office. One extra day is for each additional ten miles or fr

The person or company staking must hold a free miner's certificate.

The discoverer of a new mine is to a claim 1,000 feet in length, and party consists of two, 1,500 feet along on the output of which no royalty be charged, the rest of the party claims only.

Entry fee, $10. Royalty at the two and one-half per cent on the the gold shipped from the Yukon tory to be paid to the Comptroller.

No free miner shall receive a more than one mining claim on each arate river, creek or gulch, but the miner may hold any number of claims purchase, and free miners may work claims in partnership by filing notice paying fee of $2. A claim may be oned, and another obtained on the creek, gulch or river, by giving notice paying a fee.

Work must be done on a claim each to the value of at least $200.

A certificate that work has been must be obtained each year; if not claim shall be deemed to be aban and open to occupation and entry free miner.

The boundaries of a claim may be fined absolutely by having a survey and publishing notices in the Yukon cial Gazette.

Petroleum.—All unappropriated D ion lands in Manitoba, the Northwest ritories and within the Yukon are open to prospecting for petroleum the Minister may reserve for an indi or company having machinery on the to be prospected, an area of 640 Should the prospector discover oil in ing quantities, and satisfactorily such discovery, an area not exceeding acres, including the oil well and such land as may be determined, will be to the discoverer at the rate of acre, subject to royalty at such rate may be specified by order-in-council.

Department of the Interior, Ottawa, ruary, 1904.

RTY HOUR ATTACK

on Port Arthur Was a Desperate One

burg, August 20—The report that the Russians had driven out of the position at Palung- which they had been bom- forts of Port Arthur, was considerable gratification at ce, where it was regarded as at the defenders are strong ake the offensive end if the mands. For this reason the not inclined to credit the re- the Japanese have captured 4, just beyond Nagoush hill, northeast of Port Arthur. It that the possession of these render the situation of the perate.

ffice has no official information ttress going beyond August 10 likely sent through the cap- an torpedo boat Retshitelmi. is is not admitted. This re- of the desperate character of e attacks, which continued without intermission for forty ral Stoessel's report of the August 14th and 15th are ex- y hour. According to private coming from Port Arthur, by ese junks, when the Japanese flag of truce on Friday, they essages to both the general the fortress and the admiral the squadron.

to the best information, the Retvizan was the most un- n the harbor before the sortie of August 10th. Out of 135 shells entering the town five struck the Retvizan, wounding her captain and three other officers. She was also the only ship hit when the Japanese fired over Liaoti mountain (the extreme southern part of Kwangtung peninsula) during the earlier stages of the siege.

All military operations in Manchuria have, it is asserted here, been stopped by the rains. Bridges have been swept away, and even traffic on the railway is temporarily suspended during the heavy weather. General Kouropatkin has been busy inspecting the defenses of Anshanshan, Liandiasian, and Auping. It is said the garrisons of Anshanshan consists of only four divisions. The defeats which the Russians have suffered only seem to increase Russia's determination to hurry reinforcements to the front. The imperial ukase published this morning ordering the mobilization of 45 additional districts calls to the colors the reserves of about one-tenth of European Russia. Considerably over one half of the reserves of European Russia have now been called out and practically all the reserves in Siberia.

It would appear that the latest news from the front had not been made public in St. Petersburg when the above despatch was filed, as it was announced from Tokio this morning that the Japanese troops had occupied Anshanshan, and that the Russians had retreated northwards. Anshanshan is situated midway between Haicheng and Liaoyang. The latter was defended by a fortified semi-circle of positions, enabling the Russian forces to be concentrated easily and moved along inside the lines. The other main positions in the semi-circle referred to were Ping, about half way to Liaoyang and at some places 20 miles southeastward of it. Sikhaien is about 40 miles due east of Liaoyang and Liandiansian is 24 miles southeast of Liaoyang. It was pointed out in a dispatch from Liaoyang that the main Russian position would be stronger when they retired from Anshanshan.

STRIKE ON THE BARBARA

Rich Shoot of Ore Has Been Opened up on the Property

[Special to The Daily News.]

Greenwood, August 20—A very important strike has just been made on the Barbara mineral claim, under lease to Alex. Miller and associates. At a point 40 feet below where the break occurred a very rich shoot of ore was opened up yesterday. The vein is 14 inches wide of nearly solid ore. The ore is galena, zinc blend and copper sulphide in a granula quartz gangue. The ore will run nearly $100 to the ton. Little doubt now exists that the Barbara will make a mine. W. H. Jeffery, engineer in charge, is particularly pleased with the latest results of the work done and predicts a great future for the property.

STRUCK THEIR LEAD

After several months of hard work the owners of the Myrtle group at the head of Twelve-Mile creek, struck the lead in the long crosscut tunnel, says the Slocan Drill. They are now crossing the vein, about 30 feet, to the footwall, and there expect to break into a big ore body. The crosscut is above 430 feet in length, with an upraise of 36 feet to the end of the shaft for air. The men deserve every success.

LARGE IRON SPECIMEN

Specimens of iron ore are beginning to arrive for the Nelson fair. McMillan & Robinson brought in a sample of specular hematite iron ore from the McMillan-

Robinson group on Hooker creek, adjoining the Grey creek iron deposits. This specimen is now on exhibition in the drug store window, corner of Josephine and Baker streets. It is the largest specimen of iron ore ever brought to the city and weighs nearly 200 pounds. The ledge from which it was taken measures 25 feet wide and assays 58 per cent iron. This is no doubt the richest iron deposit in British Columbia and the day is not far distant when these immense iron deposits will open up one of the largest industries in this vicinity.

SIMILKAMEEN COUNTRY

Arthur Hickling Says a Railroad is Absolutely Necessary

Arthur Hickling, accompanied by F. G. Claudet, O. J. Bambridge and R. Bullin, who are recent arrivals from England, was at the Hume yesterday. Mr. Hickling has large interests in the Similkameen and Rossland and spends half the year in England and the other half in British Columbia looking after his affairs here.

Mr. Hickling said when seen by a reporter of The Daily News yesterday, that he had just come from the old country. He had visited Rossland and was going to Princeton with the party to remain some time. A large party, he says, are putting up granite posts in a cement foundation on the boundary line. These are located short distances apart so that there will be no dispute as to the boundary.

The operations of the Nickel Plate mine and mill are aiding considerably in the advancement of the Similkameen section as employment is given to a large number of men. A telephone line is being built from Nicola to Princeton and a road is being constructed from Nicola to Copper mountain.

What the country needs and must have before it can be developed to any extent, he says, is a railway. A party of surveyors is in the field at present. There have been numerous other surveying parties in the field in the past and it may mean something this time. The people there think from the visits of officials of the different railroads to the section that at last they are to have a railway. When this is an acomplished fact then the Similkameen, which is one of the most promising sections of British Columbia will enter on a period of great prosperity. Mr. Hickling inclines to the opinion that the railway at last means business and that it will not be long before a line will be constructed to the Similkameen country.

HOOKER CREEK IRON DEPOSITS

C. J. Clayton has just returned from the Hooker creek iron deposits which are situated about 12 miles from Crawford bay. Mr. Clayton reports that an excellent trail has been built to the properties of McMillan and Robinson. On this property which consistes of nine claims, the showing of specular hematite iron is very large There are six ledges varying from four to thirty feet in width. They lie in a contact between dolomite lime and conglomerate. Five claims are so located that work can be very economically done on feet can be gained giving plenty of room them as by tunnelling a depth of 1200 for stoping. Plenty of timber for mining and building purposes exists on the claims and arrangements are now being concluded to begin work this week.

Albert Mutz of Fernie, who is interested in the property visited it last week and was highly gratified with what he saw. It is proposed to build a tram from the claims to the lake and to erect an iron smelter there. The development of the iron range will mean a great deal to West Kootenay and to the coal district of East Kootenay.

FOUGHT THE FLAMES

William Allen, who has been doing assessment on his claims near Beasley Siding returned to the city Friday night after nearly a week of exciting struggle to save his property from the flames. His blacksmith shop on the Dolly Varden claim, above Bear creek was burned, and in several instances he had to take up his stakes and bury them in trenches to save them. He reports that the fire has spread northeastward clearing the valleys of the creeks of standing timber and filling them with half burned brush. In some places it has been very fierce and has destroyed everything. Mr. Allen advises the owners of claims in that vicinity to hasten to restake and reblaze their claims.

SOME MARVELOUS SHOWINGS

[Special to The Daily News.]

Greenwood, August 20—William Fowler, an acknowledged authority on high grade ore mining has just returned from a trip up west fork. Mr. Fowler speaks very enthusiastically of Wallace mountain at Beaverdell and regards the showings there as marvelous for the work done. He thinks a railway up the west fork will work wonders for that section. He also visited the Carmi and thinks that property destined to become one of the biggest in British Columbia.

CHURCH SERVICES

Anglican—St. Saviour's church, corner of Ward and Silica sts. Twelfth Sunday after Trinity. Holy communion 8 a.m.; morning prayer and holy comunion, 11 a.m.; Sunday school, 9:45 a.m.; evensong, 7:30 p.m. Rev. F. H. Graham, rector

TRIGGER AND TRAP

At the regular weekly shoot of the local club held yesterday afternoon the following scores were made:

Event No. 1, 25 birds.

C. D. Goepel	18
J. Irwin	16
C. H. Ink	14
W. A. Ward	12

Event No. 2, 25 birds

Goepel	21
Ward	14
Ink	13
Irwin	13

The committee in charge of the tournament which takes place September 28 and 29, are arranging a very attractive programme and the secretary has received seveal letters from shooters in Spokane, stating that they intend to be here for this shoot and there is no doubt but there will be a large gathering of expert shots. The club expects to add $150 to different events, besides having an individual championship cup to compete for. There will also be merchandise prizes.

SWISS DAY AT THE FAIR

St. Louis, August 19—Swiss day at the St. Louis fair was a pronounced success. Ten thousand Swiss from Nebraska, Illinois, South Dakota, Kansas, Missouri, Ohio and other states and a large contingent from Canada were present. The formal exercises at the grounds were held this afternoon in festival hall. An elaborate musical programme was carried out, the various features including selections by an orchestra, the big organ and a chorus of 800 voices. Addresses were given in five languages, German, English, French, Italian and old Roman, all of which are spoken in Switzerland. The Swiss visitors will remain at St. Louis during the next two days to take part in a grand national festival to be held in Lemp's park.

A FEW WORDS ON SAMPLING

Any one or two single pieces will very seldom give a correct average of your ore, neither will it do to break a rock and send one half to one assayer and the other half to another, and expect them to agree, as the values are never evenly disseminated, hence a variation; the better way is to take what you consider to be a fair representation of the parcel, of a number of pieces (the more the better) and break them all down to the size of corn or smaller, then thoroughly mix and take your sample from it.

NELSON'S NEWS OF THE DAY

Dr. Doherty of Ymir, is in town today.

Dudley H. Bissell of Gillett's Chemical Works, is a town.

C. McLean Fraser and bride will arrive this evening by way of Robson.

G. B. McDonald, late of Sandon but now of Spokane is staying at the Strathcona.

C. T. Cross of Silverton, one of the old timers in Kootenay, came down last night and is at the Stratheona.

Chas. C. Clark who has been up to Arrowhead for a trip on the steamer Kootenay, returned yesterday.

Some of the fruit growers of the Vernon district have signified their intention of making an exhibit at the Nelson fair.

D. Law, representing Law, Young & Co. of Montreal, importers of champagne, registered at the Strathcona last night.

J. Neelands and D. McKeeman returned yesterday from a fishing trip to Beasley. It is reported that they filled a large basket.

Max Heberlein of Denver, ore buyer for a number of eastern and European firms, is in Nelson and will visit the Slocan during the next few days.

Mss B. Thom returned from the east last night. Miss Thom visited the St. Louis fair and returned by way of San Francisco and Vancouver.

Judge Stevenson of the supreme court of Pennsylvania, is in town. The judge is interested in the Highland mine and is here looking after his interests.

The congregational church held its annual picnic at Four-Mile point on Friday. About 150 persons went up the lake in launches and a very enjoyable time was spent.

The ladies' aid of the Presbyterian church will give a launch excursion to Five-Mile point on Thursday afternoon, Aug. 25th. All kinds of sports and games will be indulged in.

J. S. Carter, district passenger agent of the C.P.R. returned last night from Crow's Nest points. He says both Cranbrook and Michel are making preparations for big labor day celebrations.

Harold Nelson, who is playing Walker Whitesides's comedy drama, "Heart and Sword" this season, will appear in Nelson shortly. He wil be favorably remembered by Nelson theatre goers.

James Bowes, after running for seven years one of the best hotels in the Slocan at Silverton, has sold out to Messrs. Thorburn & Fletcher, and has taken over a large hotel at Kelowna.

Fred Stock, the lessee of the Chapleau mine, received word from Mr. McNaught of Silverton last night saying that all danger from fire, so far as the Chapleau mill is concerned, is passed.

H. O'Connor, the superintendent of timber for the C.P.R., visited Slocan City yesterday. He reports the fires nearly all out there and the people do not anticipate any more trouble. Mr. O'Connor leaves for Grand Forks tomorrow.

S. Thomas is in from the Sabbath and Roderick Dhû group, situated at the head of Anderson creek. He says that a new ledge has been struck, which assays $56 in silver and 75 per cent copper. Active development work is being carried on.

The Nelson Boat club will hold another of its successful dances at Lake park on Monday evening if the weather is fine. Those hitherto given have been so successful that a good crowd is assured. In fine weather the pavilion is certainly a pleasant place for a dance.

G. W. B. Heathcote, who has been manager of the Nelson branch of the Canadian bank of Commerce for some time past, has been appointed assistant manager of the San Francisco branch of the same institution. John Buchan comes from San Francisco, where he has been chief accountant in the Canadian bank of Commerce, to take Mr. Heathcote's place.

At the beginning of the year a $25 cash prize was offered to the hive of the Ladies of the Maccabees which would initiate the largest number of new life benefit members during the first six months of the year. Nelson hive won the prize, and all the lodges of British Columbia and Washington competed. This is quite a feather in the cap of the local hive and the members feel proud over the incident.

A school-girl's composition story, with a pathetic truth, that would apply to many once ambitious towns in the interior, comes from the girls' school at Yale. The girls had been instructed to write compositions on their native cities or towns—there are no villages in British Columbia. One composition began "——— is a city in British Columbia, with a population of 150, but most of them have left."

Rev. W. W. Baer and Mrs. Baer returned yesterday from a visit to Greenwood where Mr. Baer was in attendance at the fall district meeting of the Methodist church. Arrangements were made at this meeting for holding a two weeks' evangelistic mission on every Methodist field in the district during the fall and winter months. No outside evangelist will be secured but the various ministers will assist each other.

T. G. Claudet of London, England, who was at the Hume yesterday, enjoys the distinction of being among the first native born British Columbians. He was born at New Westminster 37 years ago and left there 31 years ago with his parents, who returned to England and has resided there ever since. Naturally he says he is anxious to revisit the places that he knew when he was a child. He is a brother of H. H. Claudet, who introduced the Elmore oil process in this section.

A quantity of fruit imported from the United States has been condemned and destroyed during the past day or two. The result is that fruit raised in the province has had a boom. Yesterday one of the leading wholesale houses ordered 200 boxes of Duchess apples from senator Bostock of Ducks, being sure that his fruit was free from scab and other disease. There is no doubt that fruit grown in the province is equal in quality and price to that grown in the states.

WILL USE THE OLD RINK

With reference to the prospects for hockey and skating it is announced that the old rink has been thoroughly overhauled and retimbered by John Burns, the contractor. Thus the question of having a building has been settled. The hockey club is making arrangements with the Nelson tramway company to rent the building, and names are coming in of a number of curlers who prefer to play up the hill as it is convenient to their residences. This is certain to keep curling, skating and hockey alive. The old lessees of the rink allege that without curling, hockey and skating combined, the town is not large enough to support a rink. There is a strong hope that the tramway company will be persuaded to extend the track to the rink door, as the grade has been taken and it has been found that the task will be comparatively easy.

SCHOOLS OPEN TOMORROW

Nelson public school reopens tomorrow morning and parents are again reminded of the importance of sending all children to be enrolled in their respective classes. The only change in the staff is the retirement of Mr. Baird, who has been appointed to the high school staff. He is succeeded by James Watson, B. A. of Toronto university and a graduate of the Ontario normal college, who has been appointed on Mr. Baird's recommendation. Mr. Watson will take charge of the 3rd division. There will be a forenoon session only on Monday.

WILL IMPORT GAME BIRDS

J. Fred Hume and some other sportsmen of Nelson have been trying for some time past to arrange for the importation of a number of quail and pheasants to turn loose along the arm of the lake. Quail will be imported from North Carolina and negotiations are pending for the bringing in of pheasants from West Virginia. It is said that both of these game birds will do well here, in which case they should increase rapidly and give good sport to future generations. Quail are very prolific in both North and South Carolina and are very plentiful despite the fact that the country is shot over by hundreds of gunners each year. Pheasants have proved to be a success at the coast and there is no reason why they should not do well here.

HUME—A. L. Teetzel, R. S. Phillips, C. A. Godfrey, Vancouver; M. M. Prohex, Spokane; H. C. Briggs, Victoria; D. H. Bissell, J. M. Fahey, Toronto; G. H. Rothem, G. H. Barnhart, Ymir; M. Stevenson, M. Stevenson, jr., Philadelphia; W. Irwin, Vancouver; C. P. McQueen, Calgary.

PLEASED WITH THE MINES

Stockholder in the Granby Company Visits the Properties

[Special to The Daily News.]

Phoenix, August 20—Yesterday Dr. W. W. Van Baun, a well know physician of Philadelphia, left Phoenix for the Slocan country, after spending several days here inspecting the Granby mines. He was accompanied to Phoenix by Jay P. Graves, manager of the Granby company ad A. W. B. Hodges, the general superintendent.

Dr. Van Baun has been a goodly shareholder in the Granby company for over five years, but this is the first time that he has visited the properties of the company or the smelting works. With the officials named the doctor made a thorough inspection of the mines, and was free to state that, while he had not kept informed on the doings of the company, he had never really realized the magnitude of its operations before, nor the almost unlimited areas of mineralized territory that the company had developed. He was free to confess, since coming to the spot, and seeing for himself, he was better satisfied than ever with the soundness of his investment. Moreover, he believed that the day was not far distant when substantial and steady returns would be realized by those who had placed their faith and money in this enterprise.

The doctor is also a large shareholder in the syndicate which has recently reorganized and taken hold of the Rockland group on Slocan lake said to be the only gold-copper group in the Slocan district. He left here with the intention of going to the Rockland before proceeding on his way to his Pennsylvania home.

Presbyterian Ladies' Aid launch excursion, Miller's Cottage, Glenairey Beach, Five-Mile point, Thursday, August 25th. Boat leaves city wharf at 2 p.m. Tickets $1 for round trip and dinner.

FROM THE GAZETTE

The last issue of the B. C. Gazette contains the following of interest:

Civil and criminal assizes will be held at Nelson on October 3rd and at Greenwood on October 17th.

Certificate of the incorporation of the Northern Gold Mines Company, Limited, non-personal liability, is issued, with a capital of $1,500,000, in 1,500,000 shares of $1 each.

NOTICE

In the matter of an application for a duplicate of certificate of title to block 6 of lot 222, group one, Kootenay district (Map 718.)

Notice is hereby given that it is my intention to issue at the expiration of one month from the first publication hereof, a duplicate to the certificate of title to the above mentioned lands in the name of Tong Kue, which certificate is dated the 29th day of May, 1901, and numbered 335A.

H. F. MACLEOD, District Registrar
Land Registry Office, Nelson, B. C., 24th June, 1904.

Corporation of the City of Nelson

NOTICE

The use of water from the city water mains for lawn, garden or sprinkling purposes is from this date limited to the following hours: 6 to 8 o'clock a.m., and from 6 to 8 o'clock p. m. Any person found using water for the above purposes during any other than these prescribed hours will be subject to the penalty imposed for the infraction of the provisions of Bylaw N. 81—Waterworks Bylaw. By order

A. L. M'CULLOCH
Water Commissioner.

Nelson, August 12th, 1904.

FOUND

A lot of solid comfort in smoking a choice cigar or pipe of good tobacco. We sell the best.

Rich Cut Glass
Within the last few years Cut Glass has ceased to be a luxury and has become one of the necessities in household equipment.
This fact must be apparent to you. If it is not, consider for a moment that common glassware no longer meets the requirements of the cultured home; that Cut Glass is now made at prices which place it on the table of the thrifty artizan as well as the man of wealth; that it has a beauty which is necessary to the comfort of prosperous people; that it possesses sanitary qualifications not possessed by any other kind of table service.
These are facts and they support our statement.
