CENTER STAR CASE IN

Non-Union Men Testify as to Conditions During Rossland Strike

Said Attempts Were Made to Dissuade Men Brought from Winnipeg Not to go to Work

Victoria, July 14.—J. R. Daniels, a mechanic of the Le Roi company at the time of the strike gave testimony in the Centre Star vs, Rossland Miners' union case to the effect that on August 30th, Messrs. Bulmer and McoDnald called on him and told him they were going to call out the firemen and engineers in the morning. "He continued working and a few evenings afterwards he told them he had decided to work. They told him he might be sorry for it some day.

Wm. Yates, a non-union man, testified that he went to Winnipeg on the 15th of September, 1901, to hire men for the Le Roi. He hired 25 men. A party from Rossland met them at Robson. The party included Frank Woodside, secretary of the Rossland Miners union. They blocked the passage into the train and he warned them to keep away. On the way the crowd was warned not to go to work and take the bread from the families of the Rossland miners. At Rossland another crowd including T. R. McDonald, E. King, and W. Bromley, used abusive language, especially towards the witness. The crowd called out scabs and interfered with the witness and his companions. Witness said he gave up working in the Le Roi at $3.50 a day, because the miners did not treat him civilly.

Ex-chief of police, J. S. Ingram, testified that during the strike in Rossland, it was generally known by the citizens that persons who chose to work were interfered with. Merchants who expressed themselves in favor of work being resumed were boycotted. Witness left on Septemebr 16th for Winnipeg to get [illegible] days he saw cards posted conspicuously, signed by Frank Woodside, secretary of the union, warning men not to come to Rossland. He had intended to come by way of the Crows Nest Pass railroad, but on getting to Moosejaw he altered his course. He repeated the story of interference. From Robson on to Rossland, witness was called "Scab herder,' The men from Winnipeg were told that if they went to work they would be taking the bread out of the mouths of the families of the miners and that they would never get work again. Referring to conditions at Rossland at the time and the necessity for swearing in large numbers of special constables, witness said that Thomas Beamish was accustomed to take his stand about the Miner office with the notorious billiard cue, and his kodak, taking photos of those coming from the hill.

When cross-examined by Mr. Taylor, witness said he had on behalf of the Le Roi paid for the transportation of men to Rossland. He had during the strike been sworn in as a special in the city. Pressed if this was not done in order that he should act for the Le Roi company, witness said that it was at the instigation of the Le Roi company in order that witness might protect himself from assaults of those people. In the police court the Horn and Morrissey affairs were brought up and men concerned in them were fined. Witness said if he had been chief of police there would have been more arrests. This was necessary in consequence of the hounding of men like himself and Charles Gregg, editor of the Rossland Miner. He had seen them at the Bank saloon, which was a union men's headquarters, attack men who went in, who did not agree with them, and send them out bleeding He had repeatedly seen men come out bleeding. It had a reputation for that kind of thing. Witness did not remember any violence being done towards the property of the companies. Referring to boycotting, witness cited among those which had been so treated M. J. O'Hearn Morrison and O'Brien, the Goodeve Drug store, Jackson, Husband's Headquarters saloon, and Thompson's restuarant. Referring to his books Mr. Taylor showed that the relief place was bought from Morrison and O'Brien on August 2nd or 7th.

In reply to his lordship, witness said Morrison and O'Brien told him of this boycott in December. Jackson, the witness said, was put out of business in Rossland in the Grand Central hotel, and afterward at Phoenix. During the strike many men carried good sized clubs. He had heard them say that if they were on the other side they would use them.

Jenkins, the last witness for the plaintiff company, gave evidence this afternoon.

DEATH OF PAUL KRUGER.

Former President of Transvaal Succumbs to Pneumonia.

Clarens, Switzerland, July 14.—Paul Kruger former president of the Transvaal died here at 3 o'clock this morning from pneumonia and supervening heart weakness. The ex-president's body was embalmed and will be placed in a vault pending funeral arrangements. Application will be made to the British government for authority to transport the remains to the Transvaal.

The post mortem examination of the body showed that Mr. Kruger died of senile pneumonia caused by sclorosis of the arteries which made rapid progress during the last few weeks. The president's state of health was kept a secret.

Berlin, July 14.—The evening papers today print warm eulogies of ex-president Kruger, but studiously avoid anti-British expressions.

London, July 14.—The announcement of Kruger's death was the main feature of all the afternoon papers here. It was accompanied by lengthy sketches of his career. All the papers devoted editorials to the former president's death, refraining from anything denunciatory and speaking generously of his remarkable characteristics.

The Westminster Gazette says:

"Enough time has elapsed between the end of our long struggle with Mr. Kruger and his death, to enable us all to pay a sincere tribute to his memory. His stubborn conservatism and tenacity to the lost cause was in many respects heroic."

The Pall Mall Gazette remarks: "Englishmen can afford to give him his due. History will be unable to deny that he was a great man."

The Evening Standard says: "A great figure has now passed finally from the worlds' stage. However baneful an influence he may have exercised on the affairs of South Africa, most Englishmen will certainly concede that his abilities entitled him to the fullest measure of respect."

MEAT PACKERS' STRIKE

UNION MEN SUBMIT PROPOSAL TO WHICH PACKERS REPLY.

AT LAST ACOUNTS NO AGREEMENT HAD BEEN REACHED.

Kansas City, July 14.—Four of the six local packing plants resumed killing today on a limited scale. On the other hand 200 box makers and laborers went out today and the union officers say that 1000 men have joined the strikers during the past 40 hours.

The proposal made by Michael J. Donnelly, for the strikers in connection with today's conference contains the following demands: "That all employes who struck shall be employed in their old positions within three days, that the to the strike, pending arbitration; that the arbitration board be composed of one representative of the packers and another of the strikers, the two to select a third, the three arbitrators to be practical packing house men; that the award in wages to be made by the arbitrators shall take effect from the time of the resumption of work, but that the award shall not, involve any reduction in wages."

The representatives of the packers replied to Mr. Donnelly as follows:

"In reply to your note in explanation of what you are willing to arbitrate we cannot accept the same. We are willing to arbitrate the whole matter covering wages and working conditions of all employes out on strike, you having the privilege of laying before the arbitrators for decision any question of wages or conditions or any other grievances you may think you have; we to have like privileges and both to abide by the decision of the arbitrators. We will retain all now at work and will re-employ all the men now out as fast as possible, giving preference in the order of application at the wages received when going on strike, pending the decision of the arbitrators."

The note was signed by Armour & Co., Swift & Co., Nelson Morris & Co., Schwartzchild & Sulzberger, Natioyal Packing Company, Cudahy Packing Co., and Libby, McNeil and Libby. This counter proposal of the packers was submitted to the members of the executive committee of the union for their consideration.

The employers tonight are waiting for an answer to the counter proposition which they submitted to Michael J. Donnelly in reply to a statement of the terms on which he would be willing to make a settlement. Mr. Donnelly tonight said that the counter proposal of the packers would be rejected and that he would in turn present a counter proposal tomorrow. Rioting commenced in the stock yards tonight, and Alfonso Andrulis was shot in the left shoulder by the police. He is not fatally hurt.

Omaha, Neb., July 14.—Twenty cars of stock were received at the south Omaha stock yards today, mostly hogs. All the packing houses were slaughtering cattle and two of them killed hogs. While the packers are hiring all the men who apply for work, they are making particular efforts to bring men from the outside. Pickets are at the entrance to turn men back who try to work.

Chicago, July 14.—There were numerous cases of "slugging" at the stock yards today by strike sympathizers. John Paterson and two other men leaving the Swift & Co. plant were attacked by 50 or more men. Paterson was severely beaten and he may not recover. His skull was fractured. His assailants were not captured. The mob was dispersed by the police. At a conference this evening between the representatives of the packing plants and union officers in an effort to reach an adjustment of the butchers' strike, the packers refused to arbitrate on the terms proposed by the union and submitted a counter proposal. By the terms of this proposition the packers agree to take the strikers back at the wages they were receiving before the strike. The packers purpose is to retain all the help that has been employed since the strike began. This reply of the packers tonight is under consideration by the executive committee of the union.

New York, July 14.—Up to the present the strike of the Amalgamated Meat Cutters' and Butchers' union of North America, has been directed only against the big western houses, which constitute the so-called beef trust. Three or four independent plants of importance in the city have been undisturbed by the troubles that have crippled their big rivals. Their contribution to the city's supply is insignificant however, the so-called trust controlling it, it is estimated has fully 95 per cent of the business here. The fact that the establishments were not affected by the strike would not, it is said, allow them to relieve the shortness in the supply materially.

Lieutenant Prim of the stock yards police force, was injured tonight by a large dog while attempting to arrest a rioter who had fled into a saloon. When lieutenant Prim stepped inside the saloon the proprietor urged a large dog to attack him. The dog lacerated Prim's leg severely. The proprietor and several other men in the place were arrested. The following policemen were injured during a fight at the stock yards tonight: Detective Rearden, jaw fractured by a brick; sergeant Boehne, chin cut by a stone; patrolman John Flynn, tendons of left foot cut by a stone. Three members of the mob were hurt.

Chicago, July 14—The first step towards peace between the seven big packing companies and their 50,000 striking employees was taken today when president Donnelly, of the amalgamated meat cutters' and butchers' union of North America, held a conference with the representatives of the packing houses, in which the strike was called. There are indications that the conference will open the way for a settlement of the strike. Both sides are in favor of a peaceful settlement upon an equitable basis and it is believed that an arrangement will be made for the men to return to work, pending an adjustment of the difficulty by arbitration.

The packers in preliminary meeting invited president Donnelly and Samuel Gompers to a conference.

A mob of about 300 strikers and their sympathisers today set upon a dozen or more non-union men who tried to enter the yards to take the place of the strikers. No blows were struck but the non-union men were led back to the gates and admonished to "go home."

Omaha, July 14—The hope uppermost in the minds of both packers and strikers was that the negotiations pending in Chicago, looking to the settlement by arbitration of the strike of packing house employees throughout the country, would reach a successful conclusion. While some slaughtering was being done at all the South Omaha packing houses it was of stock left in the pens when the strike began. Very little stock was bought by ployed at four plants today, mostly unskilled laborers and officemen.

Kansas City, July 14—Four of the six local packing houses resumed killing today on a limited scale and the management say they will increase their efforts tomorrow. The different plants here hired some new men and assert that more will be employed. On the other hand, 200 box makers coppers and laborers went out today and the union officers say that 1000 men have joined the strikers in the past 40 hours.

OUR LEAD PRODUCTION

IT NOW EXCEEDS 30,000 TONS PER YEAR

RETURNS FOR JUNE SHOW THAT 2500 TONS WERE SMELTED

"We are now producing as much lead as we ever did," said G. O. Buchanan, administrator of the dominion lead bounty, last evening.

"It may interest your readers to know," continued Mr. Buchanan, "that up to June 30th last, the end of the fiscal year, $133,000 has been earned by the lead producers under the terms of the bounty. Of this 60 per cent, or $109,800 has been paid out, and the remainder, $73,200 will be paid as soon as it is shown that the lead ore claimed for has been treated in Canadian smelters. That is my understanding of the terms imposed by the government in granting the bounty and in retaining 40 per cent of the cash payment.

"During the month of June last 1000 tons of lead concentrates have been sent from the St. Eugene to European smelters and the Hall Mines and Trail smelters have received between them 1800 tons during the month. The St. Eugene concentrates will yield about 700 tons of lead, making a total output for the month 2500 tons, or at the rate of 30,000 tons annually, equal to our best production in past years."

James Cronin, who arrived in the city after the above article was set up, says that the St. Eugene mine has shiped east for export during the month of June 1700 tons of concentrates, averaging 68 per cent lead in place of 1000 tons as above quoted. The mine is now producing pig lead equal to about 20,000 tons per year. Mr. Cronin's later figures will considerably increase the total production above given.

This looks as if the full appropriation of $500,000 per annum would be earned during the present fiscal year.

FIND ON SILVER DOLLAR

A Free Gold Lead 11 1-2 Feet Wide Has Been Tapped

J. A. Daragh states that 11 1-2 is the width of the splendid free gold lead, that was tapped on the Silver Dollar, says the Camborne Miner. Two feet of the lead is solid galena, which is a good augury of rich values, it being a peculiarity of the leads in this camp that the presence of galena in any quantity in the quartz denotes good values. Four years ago when this section first came into prominence for its rich mineral deposits, assays from the surface of the Silver Dollar lead gave $25 in gold, 180 ounces of silver and 40 per cent lead. A force of men are now drifting on the lead, and this work will be continued for some time to come. The new cabins are about completed and the erection of a 30 foot cribbed ore bin will be commenced in a few days.

RUSSIANS ARE PLEASED

Their Advices Confirm Repulse of Japanese at Port Arthur

Number of Japanese Killed and Wounded is Cut Down Many Thousands, However, in Their Account

St. Petersburg, July 15.—The people of St. Petersburg retired tonight in a happy frame of mind. The absence of a despatch from lieutenant general Stoessel, commander of the military forces at Port Arthur regarding the reported disaster to the Japanese last Sunday night is generally attributed to the delay in communication of official news, owing to the absence of the emperor. Private despatches at St. Petersburg from Russian sources in the far east confirm the reports from Mukden and Che Foo. According to an unusually reliable source the Japanese losses were 2,800 and the Russian losses 1,800. Late tonight a despatch arrived from Ta Tche Kiao communicating an undated despatch from Port Arthur received there July 13th, it did not mention the assault or the repulse, but it is quite possible that it was sent from Port Arthur earlier than July 10th so that it cannot be fairly regarded as contradictory evidence. There is a general conviction that if viceroy Alexieff decided to communicate the report to the general staff it must be true. The rejoicing in the Russian capital is increased by a foreign despatch confirming the Japanese reverse.

The news that the Vladivostock squadron of cruisers and torpedo boats are at sea again filled the Russian cup with joy to overflowing. A trained military expert says the retreat from Kai Chou was a masterpiece in tactics. He sees in Kouropatkin's strategy the flawless carrying out of military science, a departure which would have caused discouragement. The transfer of Kouropakin's staff to Ta Tche Kiao and the appearance of a active there bluff- [illegible] Japanese line revolving [illegible] attention to that quarter, leaving the more valuable line from Liao Yang to Mukden alone.

REPULSE AT PORT ARTHUR.

Report is Said to Have Emanated From Russian Consul at Che Foo.

St. Petersburg, July 14.—Under yesterday's date the correspondent of the Associated Press, with headquarters at Liao Yang, announces the reception there of the joyful news of the brilliant repulse of the Japanese assault upon Port Arthur with a loss of 30,000 men. The correspondent says whole masses of the enemy were blown up with mines, and adds that the Russian losses were 1,800, and major general Fock pursued the Japanese to the Nan Ga pass. It is possible that the correspondent is confusing major general Fock's pursuit with the attack made by him on July 5th on the Japanese right flank, when he was also reported to have driven back the enemy to Nan Ga pass. The popular jubilation in St. Petersburg over the reported great defeat of the Japanese before Port Arthur is being chilled by the failure to clear up the source of the reports.

There is now good reason to believe that the report of a Japanese disaster before Port Arthur came from the Russian consul at Che Foo. Arrangements have almost been completed for the transmission of wireless reports between the Liao Ti Shan promontory, south of Port Arthur and Che Foo, whereby St. Petersburg will be advised daily of the progress of events at Port Arthur.

HAI CHENG DOOMED.

General Kuroki's Outposts Engaged in General Flank Movement.

St. Petersburg, July 14.—A telegram from lieutenant general Sakharoff, reviewing the situation yesterday, notes the Japanese advance on Ta Tche Kiao and continuous fighting along the Siuyen road converging on Tang Chi, 10 miles southeast of Ta Tche Kiao. The Russian outposts apparently were not offering serious resistance on either of the Siuyen roads or along the line of general Oku's advance. The Japanese are utilizing Kai Chou to land supplies. general Sakharoff also reports the appearance of general Kuroki's outposts considerably south of Liao Yang indicating a general flanking movement of Hai Cheng.

HEAVY FIRING HEARD

Proving That the Russians Are Making Stubborn Resistance

New Chwang, July 14.—It is reported that the Japanese troops, advancing on Kai Chou, have entrenched and are waiting reinforcements. Heavy firing has been heard day and night, proving that the Russians are making stubborn resistance. Russian officers who come into New Chwang from Ta Tche Kaio say that place is well fortified.

There are a few soldiers here. The gunboat Sivoutch is still in the river Liao and she will assist in resisting the Japanese. Bandits and low class continentals are coming here in the hope of gathering plunder in the interim between the expected evacuation by the Russians and the occupation by the Japanese.

SITUATION AT PORT ARTHUR.

Fresh Provisions Arrive Daily—Constant Skirmishes Taking Place.

Ta Tche Kiao, July 13.—(Delayed in transmission.)—The following was received from Port Arthur today: There is no change in the position of affairs. Fresh provisions arrive daily. There are constant skirmishes in which the enemy suffer the most losses. We have no wounded or seriously injured. On the surrounding hills the Chinese are constantly heliographing. The Japanese have issued orders that instead of attempting to take prisoners of the Russians they are to be shot."

The foregoing is probably the undated despatch sent on from Port Arthur to Ta Tche Kiao and from there to St. Petersburg referred to in the Associated Press despatch from the latter place reviewing the situation. It will be noted that there is no direct communication between Ta Tche Kiao and Port Arthur and there is no explanation as to how the message was sent.

MISTCHENKO'S MEN.

Take Part in a Brilliant Engagement Near the Black Mountains.

Hai Cheng, Tuesday, July 12.—(Delayed in transmission.)—A detachment of major generals Mistchenko's army fought a brilliant engagement today near the Black mountains. Some prisoners were taken. The Japanese are entrenching themselves five miles from Ta Tche Kiao. Terribly hot weather prevails here. The Russian troops are in excellent spirits and elated over the report of the Japanese repulse in their assault on Port Arthur.

ST. EUGENE OUTPUT.

About 100 Tons of Concentrates Per Day Are Being Produced.

James Cronin, manager of the St. Eugene mine at Moyie, is at the Hume hotel, arriving there by the Crow's Nest boat last evening. In an interview had with him last evening he stated that the St. Eugene mine and concentrating mill were in full motion. There are about 300 men at work in the mine and mill, and 500 tons of ore per day are being extracted and this is concentrated to 100 tons in the mill. The concentrates average about 68 per cent lead. The new discovery recently made of ore of a higher grade, Mr. Cronin, says, is important. It has been upraised on for a distance of 50 feet and found to be of cleaner ore than where it was first found. Work on the new shoot was abandoned for the present as the tunnel on the level of the upraise made in it will have to be extended 300 feet in order to tap it. When this tunnel is extended work on the shoot will be resumed. Mr. Cronin said further that the new shoot is in the western portion of the mine where the ore is usually of a lower grade than the eastern portion. The new ore carries more silver and more lead than any hitherto found in the western part of the workings.

OUR ZINC PRODUCTION

SEVERAL MINES TURNING OUT ABOUT 45 TONS A DAY

QUANTITY IS INCREASING AND PROMISES TO GROW LARGER

Thomas Jones, ore purchaser for the Lanyon Zinc Company, of Iola, Kansas, is at the Hume. He came in from Sandon last evening. In speaking about zinc production in the Slocan he said: "The Alamo, the Idaho, the Payne, the Slocan Star and the Wakefield are all producing zinc at present. The output is considerable now. What does it amount to? The Slocan Star is producing 20 tons a day, the Idaho five, the Wakefield five and the Payne 15. That is about 45 tons a day which is a pretty large quantity when it is considered that when I first came here the mines were not marketing their zinc. In the 18 months ending July 1st, I have shipped to the company I represent at Iola, Kansas 3416 tons of zinc concentrates. Outside of this during the same period other shipments that I know of consisted of 100 tons sent to Antwerp, and 60 tons to another company at Iola. What do I think of the future of the local zinc business? Well, it looks very much to me as though it will have considerable of a future. There are quite a number of zinc buyers now in the country, where formerly there were not so many."

"You stated that you were practically the pioneer zinc ore and concentrate purchaser in this section."

"Before I came here there was but little zinc shipped out of the country. Several years since a man named Brown exported between 1500 and 2000 tons from the Lucky Jim mine to Manchester, England, and Antwerp, and there were about 200 tons shipped from the Bosun to Antwerp. These are all of the shipments of this class of ore that I know of prior to my advent in this section about two years ago," replied Mr. Jones.

CHINESE EMPEROR ILL.

London, July 14.—The Shanghai correspondent of the Morning Post, in a despatch dated July 14, says the Chinese emperor is reported to be seriously ill of dysentery.

THE ALIEN ENQUIRY

Toronto, July 14—Judge Winchester heard the evidence here yesterday of about a dozen Canadian engineers who have made application for positions on the Grand Trunk Pacific, but had received no replies. A. W. Campbell of the Ontario public works department gave evidence that the government had plenty of applications from superior Canadian engineers for positions on the Temiskamingue railway survey and construction, the line going through a conutry similar to that through which the G. T. P. will pass.

NEW WESTMINSTER BRIDGE.

The Official Opening Will Be Marked By A Notable Spectacle.

New Westminster, July 14.—The million-dollar railway and traffic bridge which has been erected across the Fraser river at this point is the largest in the west, and the citizens of New Westminster intend making the official opening on Saturday of next week the occasion of the greatest celebration of the kind ever seen in Western Canada.

The program is now almost complete. The principal feature will be the steamboat procession which will pass through the bridge in the afternoon and in which over 70 vessels will take part. It is expected the procession will be nearly five miles long. It will include all kinds of vesses from several large sea-going steamers, which are coming around from Vancouver for the occasion, to the little pleasure launches which run on the Fraser. The torchlight procession on the river at night, when all the boats will be illuminated, and the fireworks on the bridge will also be interesting sights. A notable feature will be the loosing of a fireboat in flames from the bridge.

Thousands of visitors are expected from all parts of British Columbia and Washington, and arrangements have already been made for several steamer excursions from Vancouver as well as from Victoria, Bellingham, Chilliwack, Ladner and other points. All these steamers will take part in the procession and their passengers will be allowed to remain on board during the demonstration.

The last spike which will be a gold one, will be driven with a silver hammer by the lieutenant-governor of British Columbia, and the ceremony will be attended by premier McBride and the ministers of the cabinet, the mayors and councillors of New Westminster, Vancouver and other cities, as well as many other prominent officials.

The committee having in charge the arrangements for the opening will hold another meeting tomorrow evening at which it is expected that the official program will be drafted and all the other events will be listed.

BRYAN HAS HIS DOUBTS

PLATFORM ALL RIGHT BUT PARKER MAY NOT ENFORCE IT.

CHIEF PLANKS INSERTED AGAINST HIS ADHERENTS' WISHES.

Lincoln, Neb., July 14.—William J. Bryan today made public a statement relating to the democratic platform adopted at St. Louis:

"The plank on imperialism is positive, strong and satisfactory to the entire party and this question becomes the paramount issue of this campaign. The tariff plank is good but it was made so by a close vote in the committee and largely against the opposition of Mr. Parker's adherents. The plank which was voted down favored a wise conservative and businesslike revision, made with due regard to existing conditions. The committee thought that these qualifying words emasculated the plank and left it so weak as to give no hope to the tariff reformers. The anti-trust plank is a good one. It demands the enforcement of the criminal clause of the law against trusts. It demands the abolition of rebates and discriminations, and it demands the withdrawal of the interstate privileges from trusts when once convicted. The plank is infinitely superior to the republican plank, and with a president who desires to destroy the trusts, would be a sufficient plank, but as this trust plank was also substituted by the full committee, there is reason to fear that it may not be in keeping with the ideas of the candidate. The labor plank is all that could be desired. It declares against government by injunction, it favors arbitration and the eight hour day and denounces the methods that have been resorted to in the Colorado strike, but as these planks were also added in the full committee some uncertainty exists as to the candidate's policy."

THE HAI PING SNARED

Japanese Capture Steamer Loaded With Contraband of War.

Che Foo, July 14.—A report has just been received that the China Mining and Engineering Company's steamer Hai Ping, from Shanghai, July 8th, was captured by the Japanese 10 miles north of Che Foo this morning loaded with contraband of war.

ACCIDENT IS A MYSTERY

Two Women Killed as a Result of a Gasolene Explosion

Buffalo, July 14—By the explosion of a can of gasolene in a shed at the rear of a dwelling at No. 13 Hawley street, tonight, Mrs. George W. Carbine was instantly killed and Mrs. Mrs. Alice Buckley, who worked for Mrs. Carbine, died shortly afterwards from burns and other injuries which she received. The gasolene was used in a clothes cleaning establishment. How it came to explode is a mystery.

J. TAIT PROMOTED.

Winnipeg, July 14—Announcement was made yesterday that J. Tait, city manager for the C. P. R., has been promotest to the position of assistant superintendent of the central and western divisions, under general superintendent B. S. Jenkins.

DECLINED TO PAY

Victoria, July 14—The city council tonight declined to pay $15,000, the first year's subsidy to the Victoria Terminal railway, claiming non-fulfillment of contract.

CHAMBERLAIN IS CHOSEN

Elected President of the Reconstructed Liberal Unionist Council

Two of Balfour's Ministerial Colleagues Elected Vice-Presidents--Mass Meeting in Albert Hall.

London, July 14.—Joseph Chamberlain was elected president and lord Lansdowne and lord Selborne vice-presidents of the newly constructed liberal unionist council, at a meeting in London today, which was attended by 17,000 to 18,000 delegates from all parts of the kingdom.

A resolution was passed in favor of a complete reform of the British fiscal system approving the demand for increased powers to deal with hostile tariffs and "dumping" and expressing sympathy with the proposals for preferential arrangements between the colonies and the motherland.

The resolution was adopted with practical unanimity and Mr. Chamberlain, who presided, pointed out that it must fairly represent the views of the liberal unionists as no fewer than 278 separate associations were represented at the meeting.

The part taken by lord Lansdowne and lord Selborne in the new organization, which the Evening Standard calls the "annex tariff reform league," evokes much interest. The Standard considers that the fact that the two principal members of Mr. Balfour's cabinet have become vice-presidents of an active electioneering association of which Mr. Chamberlain is chief," raises a grave constitutional question, and it is said that the opposition intends to raise the question in the house of commons and ask Mr. Balfour to explain how two members of his cabinet come to be supporting a policy so different from that enunciated by the premier himself.

Mr. Chamberlain presided over and delivered a speech, at an immense meeting in Albert hall tonight under the auspices of the liberal unionist council. The vast building was crowded in every part and was decorated with sentences from Mr. Chamberlain's previous speeches. On the platform were Mrs. Joseph Chamberlain, the marquis and marchioness of Lansdowne, the earl and countess of Selborne and a large number of the nobility and members of the house of commons and colonial representatives.

Beginning his speech Mr. Chamberlain, who was given a tremendous ovation, said that the organization of the liberal unionist council was primarily for the maintenance of the union between England and Ireland under the control of one supreme council. There was nothing in the present circumstances to justify the relaxation of vigilance in this direction. After discussing at length the fiscal question on practically the same lines as his former speeches, Mr. Chamberlain returned to the Irish question and said that the council was impressing upon the government the necessity of reform in the Irish representation. The leader of the nationalist party in the house of commons controlled some eighty votes, which were swung from side to side without regard to the merits of the case and with the avowed object of making the British government impossible and coercing the British parliament to give him what he wanted.

"He will fail where greater than he failed before him," said Mr. Chamberlain, who then asked: "Why should parliament play into the hands of John Redmond by giving him power to which he is not justly entitled?"

Mr. Chamberlain concluded by ridiculing the opposition.

Lord Tennyson moved a vote of confidence in the government and the approval of its fiscal policy, which was unanimously carried.

Lord Lansdowne briefly acknowledged the resolution and said it would greatly strengthen the hands of premier Balfour. Referring to the fiscal question he said it must be discussed freely and fully and they might see that which at present was only an ideal pass into the region of accomplishment and reality.

SENT UP FOR A YEAR

Victoria, July 14—In the police court yesterday, Francis A. Sheppard, former bookkeeper at the Driard hotel, was sentenced to one year's imprisonment with hard labor for having falsified the books of the hotel. The charge first laid against him was that of embezzlement, but owing to the circumstances of the case, the complaint was amended as above. Sheppard elected to be tried by the magistrate and pleaded guilty to the charge. He was represented by counsel.

THE WINNIPEG FOUR

Carries off the Thames' Senior Cup at Putney Regatta Yesterday

London, July 14—At the metropolitan regatta at Putney today the Winnipeg four easily won the Thames senior cup.

CZAR EXPECTED HOME

St. Petersburg, July 14—The emperor is expected to arrive here tomorrow or Saturday, from his trip to the south of Russia, whither he went to bid farewell to the troops departing for the far east.

Hudson's Bay Co.

...ING IN THE BOUNDARY

...been demonstrated in the ...y district that the low grade copper-gold deposits can be worked most profitably by large companies, operating on a big scale and owning their own reduction works. The margin of profit on each ton of ore mined and smelted is very small, but on the big tonnage handled the aggregate profits are such as to encourage mining men to invest heavily in such enterprises.

The largest and the most successful mines in the world and those which pay steady dividends are mines which produce large quantities of ore of a comparatively low grade. The Homestake, the Calumet and Hecla, the Treadwell, and the Rio Tinto mines, are mines of this character, which are operated on a large scale on ore which in no case is of a very high grade. In the Boundary the Granby Consolidated has demonstrated that the low grade gold copper ledges can be worked to advantage. This company is now the largest lode mining corporation in Canada, producing the largest tonnage of ore and with its mines well opened up and a plant capable of reducing a large tonnage each day, it has a long career of profit before it.

The latest and most important move that has been made in the Boundary, since the organization of the Granby, is the consolidation by the Montreal and Boston Consolidated Mining and Smelting Company, of several groups of claims together with the Boundary Falls smelter. Perhaps the most valuable of these properties are the Brooklyn and Stemwinder in the Phoenix camp. These properties abut the principal mines of the Granby company and explorations and development work already done show that they have extensive and valuable ledges. A combination of ores of the different mines included in the merger produces a mixture that it is said will readily flux. The new corporation has a smelter which is capable of smelting 650 tons of ore a day and as the mines acquired are nearly all fairly well developed the work of mining and smelting can be commenced at once.

As the new company has ample capital with which to carry on its operations, it will not be long before it will be producing and reducing as much ore as the Granby Consolidated. This means steady employment for a large force of men and increased prosperity for the Boundary country. Doubtless when the Boston Consolidated Mining and Smelting Company has been placed on a paying basis there will be other mergers formed to take hold of other big properties in the district in order to produce similar results.

THE LEAD BOUNTY.

Mr. E. B. Braden of Helena, Mont., representative of the American Smelting and Refining Company, in the course of a recent newspaper interview, stated that the Everett smelter would shortly be enlarged, his company anticipating shipments of lead ore from the Slocan directly the dominion government decided to extend the bounty to lead ores smelted outside of Canada.

If Mr. Braden had followed at all closely the discussions leading up to the request that the dominion government should extend operations of the lead bounty so as to cover a certain proportion of surplus lead ore exported for treatment, he would never for one moment have dreamed that that bounty would be paid on lead ores shipped to American smelters.

The silver-lead mine owners and the boards of trade of southern British Columbia had a very definite object in view in the request they made of the government. For a limited period and under certain well defined restrictions a certain proportion of the lead ores produced in Canada were to be exported to European smelters through the agency of the local smelters. In effect this provided for half the output of the St. Eugene mine being shipped to Europe. The carrying out of this proposal would undoubtedly result beneficially to the silver-lead mining industry as a whole and to the local smelting industry. To consider for one moment the payment of the bounty on lead ore exported to American smelters for treatment would be nonsensical, the chief object of the bounty would be defeated, our smelting industry would be placed in a far worse position than it occupies today. We should in effect be bonussing American enterprises to kill the Canadian smelting and refining industry and in short order place our silver-lead miners entirely at the mercy of the American Lead Trust.

Silver-lead ore shipped to Amercan smelters for treatment would go in bond and the silver and lead would find their way back into Canada and the Orient, the only markets available for the products of our local smelters. The marketing of the lead produced here is the great difficulty to be overcome and to send the ores to American smelters would be to build up the smelting industry there at the expense of the Canadian plants with the result that the latter would soon be closed down. Such a thing as the payment of the bounty on lead ores shipped to American smelters for treatment was never contemplated by those who asked that the bounty might be allowed on a limited amount of lead ore exported to Europe for treatment. Ore shipped to Europe would mean so much silver and lead taken out of the markets the local smelters desire to build up and foster, viz.: Canada and the Orient.

OUTPUT OF STRAWBERRIES

It is Estimated That 8,000 Crates Were Marketed.

The strawberry season is over in this section. The warm weather of May, June and July, with scarcely any rain, cut down the crop fully one half. The season, everyone interested asserts, was one of the dryest in the history of this section, and it might be a decade before there would be a like one. One result of the lack of rain is that wherever it is possible it has been determined by those raising strawberries to arrange for irrigating their patches. Notwithstanding the lack of rain it is estimated by manager Hood of J. Y. Griffin & Co., that 8,000 crates of local strawberries were sold during the present season. They sold that number of empty crates to the ranchers along the lake. Besides this the ranchers had quite a number of empty crates from last season. Assuming that about the same number of crates were left over this season as there were last, Mr. Hood thinks that the production was about 8000 crates. The price received by the raisers was from $1.25 to $1.50 per crate. This would aggregate a pretty fair sum from one sort of fruit when it is considered that the season was so bad.

Peaches and plums continue to come in from California, but it is thought that by next week the Wenatchee plums and peaches will begin to arrive.

The next local fruit to come in in quantities will be apples of which a considerable quantity will be marketed this year, as a number of the lake orchards are beginning to bear.

KOOTENAY IS FASTER.

Makes 127-Mile Run in Hour's Less Time Than She Used to.

The steamer Kootenay, which was at Nakusp for six weeks undergoing a thorough overhauling, since her return to her run between Robson and Arrowhead, makes the trip of 127 miles between the two places in an hour's less time than she did before she was repaired. The steamer Rossland and Minto on the same run, were overhauled some time since while at Nakusp and will be used as a relief boat whenever itis necessary to haul off either the Kootenay or the Rossland.

The steamer Moyie, of the Kootenay lake squadron of the Canadian Pacific, is being repainted and refitted. The work is being done while she is in commission.

The tug Ymir is on the ways at Bogustown. Last winter her rudder was broken off and a temporary rudder was put in place. Now that the vessel is on the ways a new steel rudder is being put in position.

FINNEY'S SAD FATE.

Left to Die in a Prison Cell—Police Thought He Was Drunk.

Spokane, July 14.—Dying from concussion of the brain, John Finney was bundled into a dark cell at the city jail last night and left alone to die. Finney is a railroad foreman and had been drinking heavily. Last evening he fell down a stairway in the Daniel block and lay unconscious. The police were called and thinking he was drunk thrust him into the cell. At 4 a.m. they found his corpse. Coroner Smith is investigating.

FATALITY AT MICHEL.

Michel, July 14.—A fatal accident occurred today in the No. 8 shaft of the Crow's Nest Pass Coal Co.'s colliery. John Micone whilst engaged with two other men in removing timbers was struck and instantly killed by falling rock.

MRS. CLEMENS LAID AT REST

Elmira, July 14—Mrs. Samuel Clemens, wife of Mark Twain, who died in Italy recently, was buried in Woodlawn cemetery this afternoon.

BAYONNE DEAL CLOSED

A VALUABLE GROUP SECURED BY A SYNDICATE OF BUTTE MEN.

THE TERMS ARE $60,000 WHEN CROWN GRANTS ARE ISSUED.

The $60,000 option on the Bayonne group of mineral claims will be taken up at once. The parties holding the bond have just paid over $7,000 under its terms and the remainder will be paid just as soon as the crown grants for the claims are procured. The parties having the bond are H. B. Winchill, George T. Magee, Albert Janczewsky, Charles F. Booth and others of Butte, Montana. The bond was taken in October, 1903, and was subsequently transferred to the present holders. A force of men was put to work developing the property. Under the direction of the bonders the tunnel on the Bayonne was extended a distance of 600 feet. On the Ohio a tunnel was driven in for 300 feet. Both were driven on ledges. On the Bayonne tunnel a shoot of oxidized ore about 150 feet in length, was exposed. On the Ohio a shoot of sulphide ore, 100 feet in length, was uncovered. The sulphuret ore carries pyritical iron and some zinc. Both of the ore shoots assay well in gold, besides carrying considerable silver values. The shoots average about three and half feet in width with backs of about 60 feet.

In the latter part of June, Messrs. Winchill, Magee, Janczewsky and Booth visited the mines, Mr. Winchill being the expert for the party. When they returned to this city on June 28th after examining the mine, the party seemed pleased with the result of their visit, although they did not commit themselves to a declaration at that time that they intended to purchase it. Mr. Winchill stated that the formation at the group is of a character favorable to the gold values remaining with depth. The country rock generally is a close-grained granite. The members of the syndicate further stated that they intended to return to Butte and there would decide by consultation with others interested with them what action they would take. The action was favorable for the owners of the group, George Harrison and Frank Rizdon, have been paid $7,000 and the remainder will be forthcoming just as soon as crown grants are issued for the claims by the government.

There are ten claims in the Bayonne group and they are located about 18 miles to the west of the foot of Kootenay lake and pretty well near the top of the divide that slopes to the westward toward the Ymir section. The property has been bonded to several parties at intervals during the past four years. Finch & Campbell of Spokane, about three years since had a bond on the group and did consilerable development work, but finally allowed their bond to lapse.

Harry Wright, member for the Ymir district, D. Cameron, road inspector for the district, and Wm. Fleet Robertson, provincial mineralogist, left yesterday for the Bayonne group. Messrs. Wright and Cameron went to look into the matter of providing a road from the lake to the group and Mr. Robertson for the purpose of examining the mine in the interests of the provincial mining bureau.

FLEET WILL ASSEMBLE.

All Local Launches Will Go to Commodore Busk's Ranch Today.

There will be a demonstration in force of the Nelson fleet at Kokanee ranch this afternoon, as the recently elected commodore C. W. Busk, has invited the members of the launch club, and their families and friends to a picnic a la Russian-Japanese.

Yesterday great preparations were in progress at the dock-yards and at 1 o'clock this afternoon the fleet will swim out under sealed orders.

Vice-admiral Togo Thurman was too busy last evening superintending the loading of fuel and provissions for the coming voyage to hand out full details of the demonstration, but the correspondent of the Associated Press was given to understand that the fleet would probably return here about 9 o'clock this evening.

It was claimed last night that captain Dimitri Hunter had been suspended for getting his battleship, The Three Sisters, on the rocks during the gale last Monday afternoon, but his friends scout the idea and say that the result of the court martial, which will investigate the matter on the ranch this afternoon, will be that captain Hunter will be slated for early promotion as a reward for saving his crew and ship under exceptionally trying circumstances, and they point out that his crew did not even get wet when the wreck took place. Captain Hunter declined to speak for publication last night but he appeared confident of acquittal today.

Commander and alderman James Arthur Gilker desires that the foolish rumor be contradicted that launches require as much repairing as automobiles. He added that the demonstration in force today would prove that the story had no foundation and he fully expected that every vessel which starts out this afternoon would reach this port again no later than tomorrow evening.

"Coaling" the fleet was in full operation last night, and it is safe to say that quite as much "coal," or gasolene to be more exact, got into the several tanks as found its way onto the decks.

The Associated Press has finally concluded arrangements with the official board to have a representative accompany the fleet today. He will take all risks and sail on board the Cigarette. Friends and relations will kindly take notice.

EXCURSION TO PORT HILL.

The trip on the steamer Kaslo to Port Hill, which comes off next Sunday morning is one of the finest and most varied that can be had in a day's journey from this city. The scenery down to Kootenay landing, splendid as it is, is more or less familiar to residents of Nelson. Once passed the landing, the Kootenay river is entered and up to Port Hill the steamer winds in and out showing many delightful bits of woodland scenery. Just now the river is flood high and the scenery can be viewed at its best. The famous trip made at this season last year on the Kaslo to Bonner's Ferry is well remembered by all who were lucky to participate in it. It had one fault that will be corrected this year, it occupied too much time and the party reached home tired out. The trip next Sunday will just fill in a pleasant day's outing, leaving here at 8.45 a.m. and reaching the city at night about 9 o'clock. The tickets are limited and should be applied for at once at the Great Northern ticket office.

Household Cares

A Sick Woman's Devotion to Duty is a Heroism which a Well Person Cannot Understand.

How distressing to see a woman struggling with her daily round of household duties, when her back and head are aching, and every movement brings out a new pain.

One day the poor woman is wretched and utterly miserable; in a day or two she is better and laughs at her fears, thinking there is nothing much the matter after all; but before night the deadly backache reappears, the limbs tremble, the lips twitch—it seems as though all the imps of Satan were clutching her vitals; she "goes to pieces" and is flat on her back.

No woman ought to arrive at this terrible state of misery, because these symptoms are a sure forerunner of womb troubles. She must remember that **Lydia E. Pinkham's Vegetable Compound** is almost an infallible cure for all female ills, such as irregularity of periods, which cause weak stomach, sick headache, etc., displacements and inflammation of the womb, or any of the multitudes of illnesses which beset the female organism. Read how Mrs. Frake wrote to Mrs. Pinkham when she was in great trouble. Her letter tells the result, and how a cure was effected by the use of

Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—I have read of your medicine making so many cures, and have been advised to write to you, but I feel that it is of no use. The doctor says that I have womb trouble, but he does not seem to help me a great deal. I have such a weakness across me most of the time—have backache, am very nervous, and am troubled with leucorrhœa. I am very weak, cannot walk any distance or stand long unless I ache all over. I would like to know if you think your medicine would do me any good."—MRS. SAMUEL FRAKE, Prospect Plains, N. J.

"DEAR MRS. PINKHAM:—I cannot thank you enough for what **Lydia E. Pinkham's Vegetable Compound** has done for me. When I first wrote to you I had suffered for years. The doctor said I had congestion of the womb, was troubled with my kidneys and bladder, my back ached dreadfully all the time, and I suffered with bearing-down feeling, could scarcely walk about to do my own housework. I stopped doctoring with the physician and took your medicine, and am now able to do my own work, have no more backache or weakness across me, and can do all my own work. I cannot praise your medicine enough, and would advise all suffering women to try it."—MRS. SAMUEL FRAKE, Prospect Plains, N. J.

$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness. Lydia E. Pinkham Med. Co., Lynn, Mass.

The Medicine that has Restored a Million Women to Health is
Lydia E. Pinkham's Vegetable Compound

GEORGIAN BAY CANAL SCHEME

[Special to The Daily News.]

Ottawa, July 14.—Sir Wilfrid Laurier informed a large delegation that waited upon him and the government today in support of the construction of the Ottawa river and Georgian Bay canal, that he was personally in favor of the government taking hold of this scheme as a government work. His view would be to commence with the French river portion of the scheme. This part will cost about $500,000, while the whole project will cost about $8,500,000.

The Similkameen and Keremeos Railway bill passed railway committee of the senate today. The Thompson River Improvement Co.'s bill was referred to a sub-committee.

CHAMBER APPLICATIONS.

Before his honor judge Forin in chambers yesterday, the following applications were heard and disposed of.

Re Ibex Mining and Development Co., Ltd., in liquidation, Lennie applied for leave to proceed with sale under county court rules as judgment is over six years old. Leave granted.

Duchene vs. Provost: O'Shea applied for payment out of monies in court. Lennie contra. Stands one week.

In re estate of W. S. McLeod, deceased, Macdonald, K.C., applied for the approval of lease from administrator to P. Burns & Co., of lot 19, block 13, town of Fernie.

CAN THIS BE BEATEN?

Editor, The Daily News: I have just received the returns from two trees, Early Richmond Cherries viz.: 418 lbs., which sold at 10c per lb. I should like to hear from any rancher on the outlet if he can beat this.

ONSLOW NEWLING.

Nelson July 14th, 1904.

BIG JUDGMENT VACATED

New York, July 13—The judgment for $75,000 awarded by a jury to Eleanor Anderson in her suit against James N. Abeel for alleged breach of promise, was vacated today by the appellate division of the supreme court, which finds that the service of summons and complaint in the case were defective.

If, by this time, you are not convinced that Blue Ribbon Tea is the best on the market, it must be the fault of the advertising, not the fault of the tea, as you cant have tried it. Blue Ribbon is, and always will be, the best

long considered inevitable, he put the Transvaal in an excellent defensive state by the purchase of large quantities of arms and ammunition, being ably assisted in his preparations by the commandant-general of the forces, 'Slim Piet' Joubert. During the first period of the war president Kruger remained at Pretoria, where he maintained order by the mere force of his personality. After the fall of Pretoria, June 5, 1900, president Kruger fled to Portuguese territory, and on October 19th sailed from Lourenco Marques for Europe in the hope of securing foreign aid or intervention. He was received with enthusiasm in France, but failed to obtain an audience with the German emperor and took up his residence in the Netherlands, making his home in Utrechut and The Hague. His efforts to secure foreign intervention failed, but he continued to exhort the Boers to stand fast to the last. Kruger first married a Miss Du Plessis, whose family is a branch of that to which cardinal Richelieu belonged. His second wife was a niece of the first Mrs. Kruger. They had several children.

LOOP THE LOOP ACCIDENT

Car Stalled and Two Young Ladies Were Badly Injured

Jamestown, N. Y., July 13—Miss Irene Broadwell and Miss Ethel Boyd, both of Cleveland, were dangerously injured in the loop the loop at Celeron this morning. The car in which they were riding became stalled at the top of the loop and both fell to the track a distance of 20 feet. The car shot backwards running over them. Miss Broadwell's chest was crushed and Miss Boyd was internally injured. Both are very low.

McNicholl and Smyth of the Queen Cigar Store will hold their prize drawing tomorrow night.

SKETCH OF PAUL KRUGER

SOME OF CHIEF INCIDENTS IN CAREER OF EX-PRESIDENT

WHOSE DEATH OCCURRED YESTERDAY AT A SWISS HEALTH RESORT

Paul Kruger, former president of the Transvaal, is dead. He passed away yesterday at a health resort in Switzerland. Particulars of his death and the arangements for the funeral appear in the cable despatches published in another column.

Paul Johannes Stephanus Kruger, was born in Colesburg, Cape Colony on the 10th of October, 1825. His ancestor Jacob Kruger, went from Berlin in the service of the Dutch East India Company in 1713, at a time when the foundations of many of the leading Boer families were being laid by immigration. In 1836 young Paul shared with his family the difficulties of the great trek, when the blunders of the British colonial administration made enemies of the leading Boers of Cape Colony and drove them to self-imposed exile which resulted in the foundation of the new South African republic beyond the Vaal. Paul's mother, who was a Steyn, died in his early youth, and his father in 1852. The young man grew to manhood amid the hardships which attended the winning of the country from the savage of the former of the tereaty which averted and personal prowess, as well as for deep religious convictions. After the Sand-river convention in 1852, when the conflict arose between two parties among the Boers themselves, Kruger cast his lot with the nationalist and orthodox party of Pretorius, and in the collision of the Pretorius party with the Orange Free state in 1857 he was one of the negotiators on the part of former of the treaty which averted hostilities. He then held the rank of commandant in the Rutenburg district. In the rivalry between the Dutch Reformed and Separatist Reformed churches he was a strong supporter of the latter as the more orthodox. He headed the movement to overthrow Shoeman, who misused his power as acting president in 1860. Elected commandant-general of the reorganized republic in 1863, Kruger put down the civil strife which had been the curse of the Boers from the time they obtained their independence, arranged peace with the Zulus and defeated the Basutos. He was vice-president of the republic under president Burgers. In 1877, when the failure of Burger's policy and the skilful diplomacy of sir Theophilus Shepstone had brought the republic to the point of a grudging reception of annexation, Kruger became the head of the protesting nationalist party, although he held office for eight months under the annexation government. He was the principal member of the deputations which protested against annexation both to the Cape and the English government. Events rapidly moved towards armed resistance of British authority, as the promises made in 1877 were not kept, and in 1880 the national committee reorganized the government with Kruger in his old position of vice-president. He was an active participant in the war which followed, and bore a prominent part in the peace negotiations. The people, having won back their independence, though under a reserved British suzerainty, elected Kruger president in 1883 over Joubert by 3431 votes to 1171. He was re-elected in 1888, 1893, and 1898. In the South African republic after he became president, Kruger was more and more a power, his influence over his own people being almost boundless. Friction with the British government increased through the development of the gold mines, the unmeasured ambitions of the British South African Company, and the discontent of the Utilanders, who had become an important factor in the Transvaal population. When the Jameson raid, at the close of 1895, produced a crisis president Kruger showed his moderation and diplomacy in the management of the difficult details of the case. Through his influence Dr. Jameson and his friends were turned over to the British government for trial in the English courts against the wishes of the more hot-headed Boers. The evident intention of the colonial office to force the republic to submission and the refusal, determined or obstinate, as one may look at it, of president Kruger to yield any thing to British suzerainty, brought on in 1899 the war of which Kruger had said that the submission of his people would be "purchased at a price that would stagger humanity." In preparation for the struggle which Kruger had

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory,

of the location.

Placer Mining.—Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims generally are 100 feet square; entry fee, $5, renewable yearly. On the North Saskatchewan River claims are either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged beds or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan River, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end of the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of a Royalty of 2 1-2 per cent of the sales of the products.

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miners for a term of twenty years, also renewable.

The lessee's right is confined to the submerged beds or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, $100 per mile for first year and $10 per mile for each subsequent year. Royalty, same as placer mining.

Placer Mining in the Yukon Territory.—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 250 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of a mining recorder's office. One extra day is allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, $10. Royalty at the two and one-half per cent on the the gold shipped from the Yukon tory to be paid to the Comptroller.

No free miner shall receive a more than one mining claim on e arate river, creek or gulch, but miners may hold any number of cl purchase, and free miners may w claims in partnership by filing no paying fee of $2. A claim may be oned, and another obtained on th creek, gulch or river, by giving no paying a fee.

Work must be done on a claim e to the value of at least $200.

A certificate that work has be must be obtained each year; if claim shall be deemed to be aba and open to occupation and entry free miner.

The boundaries of a claim may fined absolutely by having a surv and publishing notices in the Yuk cial Gazette.

Petroleum.—All unappropriated ion lands in Manitoba, the North ritories and within the Yukon are open to prospecting for petrole the Minister may reserve for an or company having machinery on to be prospected, an area of 8 Should the prospector discover oil ing quantities, and satisfactorily such discovery, an area not exceed acres, including the oil well and land as may be determined, will to the discoverer at the rate of acre, subject to royalty at such may be specified by order-in-council.

WHOLESALE ONLY

Every Bottle Warranted

Every bottle of Chamberlain's Cough Remedy is guaranteed, and the dealer from whom it is purchased will refund the money to anyone who is not satisfied after using it.

The many remarkable cures of colds and grip effected by this preparation have made it famous over a large part of the civilized world. It can always be depended upon and is pleasant to take. It not only cures colds and grip, but counteracts any tendency towards pneumonia.

This remedy is also a certain cure for croup, and has never been known to fail. When given as soon as the child becomes hoarse, or even after the croupy cough appears, it will prevent the attack.

Whooping cough is not dangerous when the cough is kept loose and expectoration free by the use of this remedy.

It contains no opium or other harmful substance, and may be given as confidently to a baby as to an adult.

THE WATER QUESTION

COUNCIL TAKES ACTIVE STEPS TO REDUCE CONSUMPTION

NEW EXHIBITION AND CURLING BUILDING AGEED TO

"It is just as well that the city council should understand the water situation," said city engineer McCulloch at the regular meeting of the city council last night. "We are now using all the present pipe system will carry. I estimate roughly that the motors in use in the city are carrying off about 1,000,000 gallons per day, or at that rate during the working day. At present there is plenty of water in the reservoir whatever may happen later on, but we are using the full pipe capacity and have nothing to spare."

The mayor thought some regulations should be enforced regarding the excessive use of water for sprinkling purposes. Ald. Smith suggested following the rules laid down by Vancouver.

Ald. Selous thought the gardens should be encouraged as far as possible, as they helped to make the city attractive. There were some 15 motors now in the city and these used up a million gallons of water a day. When the alternating electric light machine arrives back from Chicago and was put in place some change should be made about supplying water power, as whatever power the city waterworks supplied had to be repurchased from Bonington and the city was out the difference. At present 45 horse power was being supplied various manufacturers and others by the water department, but in every case those who applied for such power were informed that the city would only give the water as long as it had it to spare and not otherwise. The pipe capacity of the department was now all used up, and it would not be advisable or even possible to grant further power.

Ald. Smith thought that the factories should be encouraged in place of the gardens and would like to see the water conserved some other way.

Ald. Bird pointed out that one large motor would consume as much as all the ordinary users put together.

Ald. Selous—Other power is available. As long as we had the water to spare there was no objection to a few motors, but if we had increased to such an extent that the question had become a serious one.

After a lengthy discussion and much shifting up of city bylaws, ald. Selous seconded by ald. Gilker moved in effect that the water commissioner, i. e., the city engineer, be empowered under clause 4 of bylaw 83, to restrict the use of city water and o compel the use of meters wherever in his discretion it was in the public interest to do so. The motion passed and the council also empowered Mr. McCulloch to purchase the necessary meters, which will be rented to users.

All motors users of one h. p. or over will be required to furnish a separate connection at their own expense; to be under the control of the commissioner at all times.

The superintendent of the electric light department was empowered to meter such *large consumers of light as in his opinion* should be so dealt with.

James Johnstone and J. E. Annable on behalf of the agricultural association and John A. Turner for the local curlers, told the council that they had prepared plans for a joint building for fair and curling purposes to face east and west on the fair grounds 175 x 75. In order to put up this building it would be necessary to purchase the lot to the west of the present temporary building now erected on what was Hendryx street. If this could be done the 'farmers" and the curlers would get up a syndicate and put up a building which would answer them both and which would cost about $3000.

After the deputation departed the council decided to purchase the lot in question for the lowest price and on the best termes obtainable from the C. P. R. Owing to his official position ald. Bird went on record as not voting on the question.

The new building is to be erected in time for the fair in September. Mr. Annable stated that the plans and tenders for construction were in the hands of the agricultural society.

The council approved of the sundry current accounts sent in by the finance committee.

J. C. Thelin and Co.'s claim for $7064 for damages caused by the Ward street sewer flood, will be resisted under the advice of the city solicitor.

The city engineer was instructed to build the new Ward street sewer down the centre of the street, and to use either brick or cement in its construction.

The sisters were granted free water for school purposes as in former years.

The request of the lacrosse club for the use of the recreation grounds for practise was regretfully declined, as the grass is just commencing to show up and the aldermen thought it should have a chance to grow. The C. P. R. flats were suggested as a possible practise ground.

After some minor business was transacted the council adjourned at 10:20 until Thursday evening, July 28th.

IN THE JOPLIN DISTRICT

Production of Zinc and Lead During the Past Six Months

The production of zinc in the Joplin district during the first six months of 1904 has been the largest in the point of tonnage in the history of the district, amounting to 264,770,760 pounds, which sold for $4,364,730; the aggregate value of the six months' output being exceeded only by that of the output of the first half of 1899. The production of lead during the six months just tended amounted to 33,257,320 pounds, which sold for $924,330, thus making the six months of the current year $5,289,030. The foregoing production of zinc exceeds that for the corresponding period last year by 20,080,000 pounds, while the lead output during the past six months has been 4,336,000 pounds greater than for the same period in 1903, and the excess in value of both ores during the past six months was $332,250. The average price of zinc during the past six months has been $32.80 per ton, as against an average of $33.20 per ton during 1903, while the average price of lead during the past six months has been $35.52 per ton, as against an average price of $34 per ton in 1903. Never in the history of the world has the price of both ores remained so high for so long a time as during the past 18 months, and there is nothing to indicate that the price will be much if any lower than at present, as a majority of the mills throughout the district have shut down the past week, while some will continue the shut down for two weeks, and a number of the largest producers in the district have decided to cut off their night shifts when they do start up again; all of which will tend to materially decrease the production of ore and thereby stiffen the market. More outside capital has been invested in legitimate mining enterprises during the past six months than during any similar period since the boom days of 1899, says the Mining World and as much of it has been placed with good judgment, it is yielding excellent returns on the investments.

THE WELCOME RAIN

A Downpour Insures the Wheat Crop in Manitoba and the N. W. T.

Winnipeg, July 14—Yesterday and last night frequent showers and in many places heavy rainfalls fell throughout western Canada. While in but few districts was the wheat crop in actual need for lack of moisture, yesterday's showers will still be of great benefit to the crops.

OIL FUEL IN PLACE OF COAL

The Southern Pacific railroad company has been gradually changing from coal to oil fuel, until at the present time 780 out of 1350 locomotives owned by the company are burning oil. The 300 engines used on the line between Sacramento and Ogden, and those on the Oregon division north of Ashland, continue to use coal as it can be obtained cheaper than oil along that portion of the railroad. The change from coal to oil is comparatively easy, and should the oil supply run short or increase in price to a point which would make a return to solid fuel profitable, the burning of coal could be resumed in a short time. Oil has been substituted for coal in the company's shops at Sacramento also.

PARIS EN FETE

Paris, July 14—Today, the 115th anniversary of the fall of the Bastile, was celebrated as usual as a national holiday. The government, municipal and many private buildings were brilliantly decorated. It was unquestionably one of the greatest fourteenths of July seen for years.

The main feature of the day was the review of the garrison of Paris. The troops assembled at Longchamps at an early hour. President Loubet, while driving to the race course to witness the review, was cheered all along the route. In the presidential tribune with him were members of the cabinet and the ambassadors.

TO WAR ON CONSUMPTION

Baltimaore, July 14—The faculty of the John Hopkins university hospital has completed plans for a systematic and scientific fight against tuberculosis. It will be aided materially in carrying out its purpose by a gift of $20,000 from Henry Phipps of Pittsburg. Of this amount $10,000 will be used in building a dispensary. The other $10,000 will be used as a maintenance fund. The buildings will include a dispensary and apartments for scientific work. Guinea pigs, which are very susceptible to tuberculosis will be kept for inoculation.

BULLET PROOF CUIRASSES

Russian Government has Ordered 100,000

New York, July 14—According to the Herald's Milan correspondent, the Russian government has ordered 100,000 breast plates from a local company engaged in the manufacture of Beneditti cuirass for use by the Russian forces in the far east. The cuirass in question is a pliable breast plate, weighing about one pound, measuring a little less than one half an inch thick, and capable of resisting bullets.

CERTIFICATE OF IMPROVEMENTS

Grand Fractional Mineral Claim, situate in the Nelson Mining Division of West Kootenay District. Where located—On Toad mountain, bounded on the north by "Great Eastern" and Crown lands, on the south by "Jessie" and "Victoria," on the east by "Bid" and on the west by "Great Eastern" mineral claim and Crown lands.

TAKE NOTICE that I, Edmund C. Wragge, as agent for the Hall Mining and Smelting Company, Limited, Free Miner's Certificate No. 81640, intend, 60 days from the date hereof to apply to the Mining Recorder for a Certificate of Improvements for the purpose of obtaining the Crown Grant of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 8th day of July, A.D., 1904.

E. C. WRAGGE.

CERTIFICATES OF IMPROVEMENT

Crow Foot, Blind Canyon, Centre Star, Red Man, Johnnie and Twilight mineral claims, situate in the Nelson Mining Diision of West Kootenay district. Where located—Adjoining the Dundee mine, near Ymir.

TAKE NOTICE that I, Kenneth L. Burnet of Rossland, agent for J. S. C. Fraser, F.M.C. No. B7540; Thomas Flynn, F.M.C. No. B7588 and Thomas H. Armstrong, as administrator for Hugh Morrison, intend, sixty days from the date hereof, to apply to the Mining Recorder for Certificates of Improvements, for the purpose of obtaining Crown Grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificates of Improvements.

Dated this fourteenth day of July, 1904.

NELSON'S NEWS OF THE DAY

On Thursday morning, the wife of William Brown, Ward street, of a son.

In this city on Thursday, July 14th, the wife of A. G. Stevens of the C. P. R., of a son.

Phil J. Hickey of the Ivanhoe mine at Sandon, was a guest at the Strathcona yesterday.

At the residence on Kootenay street on Thursday, July 14th, the wife of A. Anderson, of a son.

The drawing for the ticket to St. Louis and return will take place at the Queen Cigar Store this evening at 8 o'clock.

All fees for the renewal of city hotel, saloon and wholesale liquor licenses must be paid at the city hall before five o'clock this afternoon.

On Wednesday morning at the residence on Cherry and Latimer streets, the wife of Mr. McBride of the Hall Mines smelter, of a daughter.

Mrs. Hatch has gone to Victoria for a short visit to her daughter and Miss Graham of Victoria, who has been staying with Mrs. Hatch has gone to Phoenix.

At the mining recorder's office on Thursday a certificate of work was granted to Eugene Montreuil on the Total Time, Edward A. Stopher, recorded the location of the Giant, situated between the north branch of Sproule creek and the west fork of Cedar creek.

The electric lights were unsually dim last night. This was probably to remind the ratepayers that in order to obtain 10 per cent rebate for the current quarter payment must be made not later than today. The same rule applies to water rates.

J. H. Fletcher of Ro sland, is in the city on a short business trip. He states that the Le Roi has definitely decided to construct a concentrator. Water rights have been taken up on Sheep creek and the concentrator will be on Sheep creek at a point about three miles from Rossland.

Michael O'Brien and Stephen Hawkins have struck it rich on the Goodenough claim on Forty-Nine creek. A tunnel was run in on the ledge for a distance of 25 feet. On the hanging wall a 25 inch paystreak was found, consisting of quartz, decomposed iron and free gold. Assays which John H. VanPatten had made, show that the ore ran as high as $200 to the ton. The owners are much elated over striking it so rich.

A garden party under the auspices of the altar guild of St. Saviour's church will be held next Wednesday afternoon and evening, July 20th, on the grounds of Frank Fletcher's residence on Silica street, which have been kindly loaned for the occasion. The grounds will be illuminated in the evening and the city band will be in attendance. Refreshments and ice cream will be served and a very pleasant time is anticipated.

NO SESSION THIS SUMMER

Such is the Declaration of Hon. Robert Green

Vancouver, July 14—There will be no session of the legislature this summer. That fact was indicated yesterday by Hon. Robert Green, chief commissioner of lands and works, who has just returned from a tour through Rossland, Nelson, Kaslo, and other up country points. Mr. Green started from Victoria in company with premier McBride and the latter remained with him until Kaslo was reached. There the two ministers parted company, the chief commissioner remaining at his home for a few days, while the premier visited other towns and is now at Barkerville, together with Hon. Charles Wilson.

Asked if there would be a summer session of the legislature, Hon. Mr. Green did not either reply in the affirmative or the negative. He simply suggested that there would be none. He remarked that the legislature would have been called together had the arrangements been made for the construction of the Coast to Kootenay railway. As this had not been accomplished here was no reason why the house should be called together at this time. A summer session had been suggested if there was what some people called a "railway policy" to put before the members. As there is at present no such "policy" the house will not gather during the summer. This announcement will be received with a good deal of relief. The members do not look kindly upon summer sessions.

Hon. Mr. Green is able to give the pleasing information that the upper country never looked better than it did during his trip.

Speaking of the railway work in the Boundary, he states that surveyors were out towards Midway and there was a probability of work being started soon on the Vernon and Midway railway, in which Price Ellison, M.P.P. is interested. He further asserted that the Lillooet election would not be long delayed.

A free ticket to St. Louis and return awaits the holder of the lucky number at the Queen Cigar Store prize drawing tomorrow night.

HUME—E. C. Scythis, Oshawa; Mrs. and Miss Williams, J. T. Black, G. Williamson, New Denver; E. Goodenough, A. Campbell, Kaslo; F. G. Goodenough, Quebec; Thomas Jones, Sandon; R. McPhee, Slocan; G. F. GRAND CENTRAL—Mrs. M. Penrose, McGuigan; A. A. Young, Manitoba; F. A. Smith, Jaspar Pass; R. H. Graham, E. Penrose, Camborne; J. Pells, Ferguson.

WORK ON THE CLIFF

Rossland, July 14—Ten days hence 25 men will be employed on the Cliff mine. Eleven men are now at work, and much preliminary work has been accomplished.

One glory hole is in operation, and a second is partly prepared. Blasting in the second quarry will be started soon. Two cars of ore have been shipped and a third car has been "spotted" for loading with Cliff ore.

The company will proceed at once with the erection of ore bins necessary to the economical handling of the ore. These will be completed within ten days and the enlarged force can then be reached. Andrew L. Tate, one of the owners of the Cliff, has been in the city this week in connection with operations at the property.

FISHERY REGULATIONS

An Agreement Reached Between the British and French

London, July 14—The Associated Press learns that an agreement has been reached between the British and Newfoundland governments regarding the fishery regulations under the provisions of the Anglo-French colonial treaty. The final draft of these regulations, it is expected, will b signed tomorrow by premier Bond on behalf of Newfoundland. The regulations constitute a compromise between the provisions enforced over the north sea fisheries and those now imposed by the Newfoundland government. It is understood that the French government is cognizant of the compromise and has given the British government to understand that the terms will be likely to receive the assent of the chamber of deputies. Thus the final stage of the Anglo-French treaty appears to have been completed, though the ratification cannot be secured until the French chamber meets.

PROMINENT CITIZEN DEAD

Hamilton, July 14—Alex. Gartshore, senior member of the firm of Gatshore and Thomson, manufacturers of iron pipe, and one of Hamilton's most prominent citizens is dead, aged 65 years.

CUTLERY MEN MEET

Niagara Falls, July 14—Cutlery manufacturers from all parts of the United States and Canada are meeting in convention in this city. The sessions begin today and are being held behind closed doors Matters of interest chiefly to the trade are being discussed.

MET NO OPPOSITION.

Tokio, July 14.—It is reported that Yio Kow has been occupied by the Japanese without any resistance upon the part of the Russian troops.

WILL PUT TICKET IN FIELD.

Halifax N.S., July 14.—The provincial workmen's association at a monster meeting last night decided to place candidates in the field for the house of commons at the general elections. The object of the move is believed to be to force the government to take action towards settling the difficulties between the strikers and the Dominion Iron and Steel company at Sydney.

NEW DIAMOND IN PLACE.

New Westminster, July 14.—The work of installing the new diamond for the purpose of allowing the tracks of the V., W. & Y. Ry. to cross those of the C.P.R., is now complete, and the road will soon be ready to run a train to Vancouver. The old diamond which was installed in front of the Brunette mill store, was unsatisfactory, as it was thought that the traffic on the line and the working of the mill would interfere with each other; it was on this account that the position of the diamond was moved to its present locality.

REV. JOHNSTON IN HOSPITAL.

Toronto, July 14.—Rev. Hugh Johnston, of Baltimore, formerly of the Metropolitan Methodist church of this city, is in the hospital here suffering from bladder trouble. He is well known throughout the dominion.

LIGHTNING KILLS WOMAN.

Quebec, July 14.—Mrs. Arthur Beaudoin, 30 years old, was struck and instantly killed by lightning at St. Henry de Levis. She was just going out of doors with her two children when lightning struck her and the two children also but the two latter recovered.

HARD LUCK OF A BOY.

Clayton, N. Y., July 14.—Left for two days alone on an island in the St. Lawrence river, without food or shelter, Wilbur Barnett, a 15 year old boy, was found today by a picnic party.

WILL GIVE A ROSE SHOW.

New Westminster, July 14.—The Tourist association is making arrangements for the rose show which it is proposed to hold on July 22 and 23. Alerad 30 valuable prizes have been donated, and it is expected that the first annual rose show will be a splendid success. The flowers will be exhibited in the office of the Tourist association on Columbia street.

JAPS OCCUPY YIN KOW.

London, July 15.—The Daily hronicle's Tokio correspondent says on July 14th the Japanese occupied Yin Kow and that 300 Russians who were in the town escaped with difficulty.
