DAIL EIRAIN IS NAME OF NEW IRISH HOUSE

25 Sinn Feiners Form Parliament

BURGESS TO BE SPEAKER

Appointment Committee to Present Claims to Congress

(By Daily News Leased Wire.)

DUBLIN, Jan. 21. — Twenty-five members of the Sinn Fein society elected to the British house of commons assembled here this afternoon and formally constituted themselves the "Dail Eirain," which is Irish gaelic for Irish parliament.

They elected Charles Burgess, whose Irish name is Cathal Brugha, speaker. They also adopted a declaration of independence and an address to the free nations of the world and appointed a committee consisting of Count Plunkett, Arthur Griffiths and Professor Edward DeValera to present the claims for Ireland to self-determination to the peace conference at aPris.

The last two named being in British prisons, only the venerable Plunkett can proceed to Paris, and then only provided the British government consents to give him passports.

SAYS DUKE MAY RETURN TO ENGLAND

LONDON, Jan. 21 (Canadian Associated Press).—A Sunday paper suggests that the Duke of Devonshire is shortly returning to England and will be succeeded by the Earl of Athlone. No confirmation of this claim is obtainable, though it probably sprung from the fact that the Duchess of Devonshire is in England.

SAYS DOMINION MUST GET BUSY

Hon. Arthur Meighen Tells Winnipeg Board of Trade Members That Opportunity Is at Hand

(By Daily News Leased Wire.)

WINNIPEG, Jan. 21.—Addressing the membership of the greater Winnipeg board of trade this evening at a banquet given in his honor, Hon. Arthur Meighen, minister of the interior, dwelt upon the obligation of Canada to reach out to get her share of the business of the world in order to pay her war debts and the keen competition in business she would have to face not only from the United States but from the old world. Speaking upon what the Dominion government intended to do to reestablish conditions in Canada, he said they expected to spend during the coming year $20,000,000 upon public works and $30,000,000 on the railways, the large part of the expenditure being on equipment, which would bring the lines abreast of conditions before the war. There would be no new construction except of such branches upon which construction work had already been proceeded with, he added.

Mr. Meighen reviewed the financial position of the country and outlined the policy of the government with a view to helping the Dominion secure its share of the world's trade, emphasizing that the people of Canada would have to be possessed of that courage and confidence that had won victory for their sons in the conflict just ended. The fundamental work of the country in the years immediately before them, he said, was to get business by getting trade.

"We have to purchase goods and sell them or we never in this world can pay the debts of this nation," said Mr. Meighen.

Canada, he pointed out, owed at the end of last year $1,330,000,000, including a war debt of $1,101,000,000. The rate of interest had increased so that annual liability now was $74,000,000. The war debt, he said, would run to $1,300,000,000 by the end of this year and the whole debt of the country by that time would reach $1,600,000,000, so that the interest charges by the end of the year would be somewhere between $74,000,000 and $100,000,000. In addition to that the country would soon have annual pension charge of $30,000,000. About 1000 persons were present at the gathering in the convention hall at the industrial bureau.

CALGARY, Jan. 21.—Nineteen cases of influenza has been reported in Calgary since Thursday. The school and theatre ban has been lifted.

H.R.H. PRINCE ALBERT AND MAJOR GRIEG ABOUT TO START FOR FRANCE V'A AIRPLANE

C. P. R. TRAIN DERAILED THREE ARE INJURED

(By Daily News Leased Wire.)

CALGARY, Alta., Jan. 21.—C. P. R. train No. 529 was derailed seven miles west of Settler this morning. The mail, express, baggage and three passenger coaches were hurled partly over the bank. The injured: L. H. Woodrow, mail clerk, Lacombe, badly hurt about head; Express Messenger Sheldon, collar bone broken and and shoulder dislocated; J. D. D. Palmer, travelling baggage agent, injured about head; J. Niven, conductor, head hurt.

POWER QUESTION AT PAPER INQUIRY

Diversion of Energy Generated in Canada for U. S. Industries Discussed Before Tribunal

(By Daily News Leased Wire.)

OTTAWA, Jan. 21.—Diversion of power generated in Canada for the benefit of American industries was once more a live topic of discussion before the paper control tribunal Tuesday, when Mr. Tilley attacked the United States company which controls the Fort Francis mills for starving these mills for power and devoting it to the Minnesota mills, although an obligation to protect Canadian industry was one of the conditions under which the company got its original grants. He proceeded to quote the Ontario statute of 1906, which provided that the company shall furnish "power or electrical energy" (surely including hydraulic power, he contended), for use on the Canadian side, as it provides the same for use in the United States and that no less of the said power shall be available for use in Canada than in the United States. In 1911 an order-in-council permitted the company to temporarily divert 6000 horsepower to the States so long as it had an unused 10,000 horsepower available on the Canadian side.

So far as it departed from the spirit of this order-in-council, he said that it has not even kept enough, on the Canadian side of the border to run the Canadian ground wood mills steadily. Thus the Canadian paper mill has had to use purchased ground wood hauled long distances with high freight charges, and the cost of all this has been added to the maintaining cost of Fort Francis newsprint and hence to the price which Canadian publishers must pay.

A new letter from Government Auditor G. L. Clarkson was produced by Mr. Tilley during the afternoon in connection with the averages of costs for roll and sheet news in the Booth mill in arriving at a cost for roll news, a practise which is alleged to have added $2.40 per ton to the Booth costs, as sheet news costs $12 per ton more to manufacture.

Another issue raised was as to the charge of $1.30 per ton selling commission set in the Booth mills, although they sell direct to their customers. Booth counsel qualified this the other day by saying that they sell paper in St. Thomas on a commission. Yesterday afternoon, however, Mr. Tilley declared that he had been instructed that the St .Thomas paper orders direct from the mills. This is another matter which Mr. Clarkson will look into.

Mr .Tiley made a strong attack upon the proposition that the investment in paper mills which profit is allowed should include a reproduction value at tangibles. It was absurd, he said, to figure the value of a mill as the high cost at which it would be built today.

"If the mill properties are going up in value all the time," said Mr. Tilley, "why are we conceding depreciation?"

An amusing situation arose when Mr. Tilley criticized the working capital which the Booth mills tie up by not collecting accounts promptly. They had $803,595 of accounts receivable at a given date, which represented, he said, four months credit when the terms of the trade were one month. Mr .Tilley thought two months allowance, or $401,798, would be ample.

"Then you have never done business with your own clients, the publishers," remarked George H. Montgomery, mill counsel.

"I am taking the Booth mill in comparison with others," answered Mr.

(Continued on Page Two.)

CANADA WANTS INDIVIDUAL REPRESENTATION IN THE PROPOSED NATIONS LEAGUE

(By Daily News Leased Wire.)

PARIS, Jan. 1.—(By the Associated Press)—Canada, Australia and the other self-governing dominions have began an effort for individual representation in the projected league of nations. They claim the right to enter the league with the same status as other nations.

The question is now being discussed by the British and dominion officials and it will be for the British government to say whether it shall ask the peace conference whether it shall accord the dominions individual membership in the league.

Equal With Others.

The admission of the peace conference of the right of the dominions to separate representations at the session, it is held, is in itself tacit recognition of their nationhood. The new proposal, however, goes further, and it is considered its appearance will be a formal acknowledgment by the world for the dominions existing autonomously within the British Empire and of their equality with other nations. Unofficially it is stated that England will probably approve the plan, although the matter is still the subject of grave discussions.

Sir Robert Borden, premier of Canada, gave to the Associated Press tonight the following statement regarding the claims of Great Britain's self-governing dominions to a place in the league of nations as autonomous nations of the imperial commonwealth:

"In the imperial war council, in 1917, I had the honor of moving in behalf of Canada, a resolution which was accepted by the United Kingdom and the other dominions and which declared that the readjustment of the constitutional relations of the component parts of the British Empire should be based on the full recognition of the dominions as autonomous nations of the imperial commonwealth.

"The principle thus established has been illustrated and carried into effect by the peace conference in which the several dominions have distinctive representations as members of the world-wide Brittanic commonwealth which in one sense is in itself a league of nations.

Foreign Policies.

"The resolution of 1917 to which I have alluded, declared in emphatic terms of the right of each dominion to adequate voice in the foreign policy and foreign relations with which the proposed league of nations is intimately and vitally concerned.

"It is neither necessary nor desirable to forecast the exact method by which this essential purpose shall be fulfilled in framing the constitution of the proposed league.

"In addition to the distinctive representation of the dominions at the peace congress, their delegates also have a place on the panel from which the five delegates representing the British commonwalth of nations as a whole are to be selected from time to time. By one or both of these methods, as may be determined after due consideration, the dominions may receive the recognition and exert the influence which their national status demands in the proposed society of nations."

Premier Hughes of Australia, discussing the claims of the dominions with the Associated Press said:

"We have earned the right by our

(Continued on Page Two.)

BRITISH LABOR FOR COMMITTEE

Barnes Says British Is to Propose Representatives of Workmen Be on Special Commission.

(By Daily News Leased Wire.)

LONDON, Jan. 21.—(British Wireless)—According to George Nicoll Barnes, Laborite and minister without portfolio in the British government, Great Britain is to propose representaties of British organized labor be appointed as members of the special committee which is to be named by the peace conference to give consideration to international labor problems as a part of the conference.

In any event the British labor party will be asked to send representatives to give testimony before the special committee. This committee will consider from the international standpoint regulations regarding hours and conditions of labor throughout the world.

Mr. Barnes said that the wage question is regarded as too complicated by reason of national conditions to permit of international settlement, but with regard to other matters, it was hoped to set up standards applicable to each country which would produce general uniformity of results.

The comparative energy of different nationalities, Mr. Barnes added, must be taken into account. The productive capacity of the Russian workman, for example, in a ten-hour day is no greater than that of the British workman in a six-hour day.

The British for the comittee will make clear that such difference must be taken into account. Mr. Barnes expressed the belief that the labor differences ahead can be overcome and that when the league of nations is formed, former members will be attached to a permanent committee of the league to see that in all countries the employment of labor is on a basis fair to the workmen of every nation.

EMPRESS OF BRITAIN REACHES HALIFAX

(By Daily News Leased Wire.)

HALIFAX, N.S., Jan. 22.—The Empress of Britain with troops has arrived at Halifax. The Empress entered the harbor at 2:30 o'clock this morning.

SHIP BUILDERS WALKED OUT

Over 35,000 in Seattle, Tacoma and Anacortes Quit Work, Demanding Higher Wages.

(By Daily News Leased Wire.)

SEATTLE, Jan. 21—Between 35,000 and 37,000 members of the Metal Trades unions in Seattle, Tacoma and Anacortes went on strike at 10 o'clock this morning, parlyzing the major portion of Washington's shipbuilding industry. According to a statement given out by the ship carpenters controlling council, another 8000 men belonging to the various wood working trades employed in shipbuilding, have their jobs imperilled by the strike and may all be forced out through inability of the yards to operate without the metal trades workers.

Wood yards at Olympia, Aberdeen, Hoquiam, Bellingham and Anacortes were operating today, some with short crews. Tonight it was said the ship carpenters, caulkers, fasteners and other wood workers who declined to strike were discussing the advisability of calling a strke in sympathy. The Puget Sound maritime council of carpenters publicity agent today said the men would not strike.

The strike today was orderly as could be expected. Parades and demonstrations were everywhere discouraged by labor leaders. The shipyard employers met in conference throughout the day, but announced they were simply "standing pat," and would not attempt to operate the yards.

The metal trades strike is for a basic wage of $1 an hour for mechanics and $7 and $6 a day for helpers and laborers. Through a federal wage adjustment board, known as the Macy board, the mechanics were recently granted 86½ cents an hour.

EMPRESS WILL ARRIVE AT VICTORIA JAN. 25

VICTORIA, B. C., Jan. 21.—Lieut.-Col. J. S. Harvey, officer commanding District Depat No. 11, received official information from Ottawa tonight that the Empress of Asia bound from England to British Columbia, via Panama canal, would arrive at Victoria on Jan. 25.

COUNCIL BARS RUSS DELEGATES WHILE DECIDING ON ACTION

Paris Meeting Today Will Formulate Concrete Proposal in Regard to the Russian Situation--Main Features Are Already Agreed Upon---Polish Question Will Also Be Taken Up

PARIS, Jan. 21.—(By the Associated Press.)—The supreme council of the great powers hope to formulate a concrete proposal on Russia at tomorrow's meeting. That was the definite official announcement of the communication issued tonight. The council had been considering the Russian situation continuously for the past two days. It can be added that while this concrete proposal was not finally decided and reduced to writing, yet its main features were agreed on in principle.

The members came from the session, however, feeling that there was no sovereign remedy insuring a certain cure for the difficult and dangerous situation and that it would be desirable to embody several lines of action in the proposal.

The first effect of this proposal will be that neither Sergius Sazoboff, the Russian minister of foreign affairs before the revolution nor any soviet agents will come to Paris as exponents of the Russian affairs, but that some form of inquiry or investigation of political conditions in Russia will be made without considering the presence in Paris of the adherents of either side of the question at issues. The determination is largely the result of a strong sentiment in some quarters, against having any direct dealings with the Bolsheviki.

Lloyd George's Proposal

Early indications were that Premier Lloyd George's proposal to M. Pichon, the French foreign minister, would again take form in having soviet agents come here and three names of prominent leaders were mentioned as possible emissaries. But this is now said to be definitely superceded by a plan of inquiry or investigation without involving the presence of societ agents.

The Danish minister to Russia, Harold Scavenius, made a statement before the executive session of the council today on conditions in Russia, which also had a strong influence in determining that soviet representatives should not come to Paris.

He was the last of the ministers to leave Petrograd and today he emphasized the futility of trying to conduct any intercourse with the soviet leaders.

He read an article written by one of the soviet officials declaring that Premier Lloyd George and President Wilson were too conservative and reactionary for the soviets to deal with. He also gave exact data on the Bolsheviki forces, showing that they did not exceed 90,000 armed men, the remainder being without arms or ammunition, clothing or shoes. He declared also that the red army was largely recruited from the famished peasants, who took this means to obtain food and the pay soviets seemed able to give them.

Polish Question

The Polish question will come up at tomorrow's session as well as the matter of Russia. It is understood in this connection that President Wilson has received information concerning the spread of the Bolsheviki movement in Poland, where the Bolsheviki army is nearing Warsaw. It is expected proposals will be renewed from the allied armies to help the Polish army with war materials, but this has not yet been decided.

The official communication tonight also announces that the question of procedure of the conference was again discussed. The nature of this discussion was determining the appointment of the two committees, the first to deal with reparation and damage of the war, the second to deal with the subject of the society of nations .

Another full session of the peace conference will likely be held next Friday or Saturday for the purpose of presentation of a memorial on the league of nations by President Wilson. The English and French memorials on the league of nations will probably be presented at the same time and the committee proposed today will then work out the details, while the full conference may enunciate some general expression of principle on the plan.

Afternoon Session

PARIS, Jan .21.—The supreme council's afternoon session lasted from 3 o'clock to 5 o'clock. The official statement regarding the council's proceedings states that M. Scavenius gave all the information at his disposal on Russia to the council at the morning session and that in the afternoon the discussion of the question was continued.

Great progress was made toward an agreement and the statement says it is hoped to formulate a concrete proposal tomorrow.

The council will meet again at 11 o'clock tomorrow morning. The statement reads:

"The president of the United States, the prime ministers and foreign ministers of the allied powers, assisted by the Japanese representatives, met today at the Qua d'Orsay from 10.30 to 12.45 in the morning and in the afternoon from 3 to 5.

"In the morning M. Scavenius, Danish minister to Russia, gave all information at his disposal on the various parties in Russia.

"In the afternoon the discussion of the question was continued.

"Very great progress toward an agreement was made and it is hoped to form a concrete proposal on this subject tomorrow. The question of the procedure of the conference was then discussed.

"The next meeting will take place at 11 o'clock tomorrow morning."

Little Outward Sign.

PARIS, Jan. 21.—(Special Cable from W. Dafoe)—The peace conference is at work but there is very little outward sign of what is being done. A formal meetng will not be held until late in the week, ostensibly awaiting the report of the credentials committee, but actually to permit of the continuation of informal interchanges of views between the great powers upon questions which constitute the real difficulties.

Meanwhile the various delegations in keeping with the suggestion made last Saturday by the president of the conference, are preparing written statements of their views on the three schedules set out for the first consideration of the conference, respectively for the war, penalties for the authors of war crimes and international labor legislaton.

With respect to the last two schedules the British case is virtually complete, having been prepared in London by the special committee upon which Dominion ministers served and has been given careful consideration by the imperial war cabinet.

The conference proper consists of three classes of delegates.

Inner Circle.

First, there is the inner circle of 25 plenipotentiaries representing the five great powers having general interests, then there is the second class nations, numbering 23, with 41 delegates, who are said to have particular interest, with the third class limited at yet to the fourth South American republics which have severed diplomatic relations with Germany, but took no aactual part in the war.

The conference will vary in size from a complete representation to the gathering limited to the 25 great power delegates, but in practise there is a smaller organization which will largely determine the conclusions of the conference. This body is informal and has no prescribed status in the council of Versailles, which is continuing its functions. It meets in the room of M. Pichon, the French foreign minister, where it holds what are technically called "conversations." To these gatherings are summmoned experts and others from whom information and advice are desired.

Yesterday Minister Noulens, formerly minister of France to Russia, was in attendance at those conversations, and today Ambassador Scavenius, the French minister to Denmark, who recently left Petrograd, will give the gatherings the benefit of his views about Russia.

Critical Procedure

Considerable criticism of this procedure appears in the Paris press, the Socialists in particular objecting to what they term the placing of the powers of the conference in the hands of this council of 10. Undoubtedly there has been a general expectation that this committee, which was organized before the confernce, would cease to function once the conference met. The Temps says it will remain in existence to direct the course of the conference and that it is the logical development of the methods followed during the war. There was then a war cabinet; now the conference has a cabinet of peace. It is, it says, the first outline of an international government which will evolve into more democratic forms as required by circumstances. The British representatives on this special committee of the great powers are David Lloyd-George and Arthur Balfour, but they keep in touch with all the British groups and report back to them.

FRANCE ANNOUNCES MOBILIZATION FIGURES

(By Daily News Leased Wire.)

LYONS, Jan. 21 (Havas).—The number of effectives mobilized by France from the outbreak of the war is given as follows in the report of the deputy o nthe war budget.

Aug, 15, 1914—Officers 92,828; soldiers, 3,780,000.

Feb. 1, 1915—Officers, 97,753; soldiers, 4,900,000.

Jan. 1, 1916—Officers 109,814; soldiers, 596,000.

Jan. 1, 1917—Officers, 115,004; soldiers, 5,096,000.

Jan. 1, 1918—Officers, 128,372; soldiers, 5,064,000.

On this last date, 1918, the infantry numbered 2,106,775; artillery, 899,645; aviation, 59,285; cavalry, 166,422, and engineering corps 185,110.

GRAHAM SPEAKS AT TORONTO

Says He Believes in Party Government and Asks for Former Liberals to Get Together

(Special to The Daily News.)

TORONTO, Jan .21.—With a clear call to Liberals as Liberals to enter the political arena again and with a declaration that he believed in party government for the Dominion of Canada, Hon. George P. Graham, former minister of railways, made a speech in St. George's hall here tonight in connection with the organization today of the Central Ontario Liberal association that was heartily cheered by an audience that, although small, manifested delight in his stand.

"I believe in party government," Mr. Graham said, "on general principles and because it is good for the people. The party system is the only system we should tolerate in times of peace."

Following up this idea, after a criticism of the Union government, Mr. Graham declared:

"Party government will come very shortly." He concluded by urging the Liberals to unite in anticipation of this, and the audience apparently approved of his appeal, as it was greeted with cheers and applause.

Mr Graham took the gathering, which numbered about 300 people, including a few ladies, into his confidence with reference to his attitude toward the Union government in its early days. He admitted that he had been offered a position in it. "Had I been looking for aggrandizement," he said, "or had I any selfish purpose to serve, I could have been in the Union government. And I could have been in a higher position in it than any Liberal in the Union government at the present time, but I declined the offer, and I am glad of it."

Explains for Laurier

This statement was reeceived with marks of enthusiastic approval by the audience, who cheered again when Hon. Mr. Graham explained Sir Wilfrid Laurier's remark in his recent speech in Ottawa with reference to his not rebuking Liberals who had supported the Union government. This had been said in an aside by Sir Wilfrid, Mr. Graham stated and had not been meant to be taken literally.

Sir Wilfrid Laurier wants the reunion of the Liberal party, said Mr. Graham, "and he wants the support of every man, woman and child who believes in Liberal principles."

"The time will come," he said, in enlarging on his previous reefrence to the subject, "when Liberals will be Liberals as they always were, and Tories will be Tories as they always were.

"I ask no man to apologize to me for the opinion he held during the past two years. Some people ask why did you support Union government. I did not do it. I am glad every day that I did not. I shall not give an explanation just now—perhaps the time will come when I will."

Refers to Food Notes

Mr. Graham had a little quiet fun at the expense of the Union government in connection with its propaganda and its touring ministers. He said it was the greatest advertising government he had ever known, and it had even gone so far as to run a newspaper in order to let the people know what the government was doing. The ordinary press mediums were not enough for the union government to appraise the country of its many beneficient works.

W. E. T. Sinclair of Oshawa, president of the newly-formed Central Ontario Liberal association, was in the chair.

A telegram of regret was read from Sir Wilfrid Laurier, who was unable to be present, and who sent his con-

gratulations on the staunch Liberal principles shown by the new association.

A series of resolutions was passed, beginning with a declaration of confidence in Sir Wilfrid Laurier and to his leadership of the Liberal party and touching on a number of political questions looming up for discussion at the next session of the Dominion parliament. Among them was one demanding the immediate repeal of the War Times Election act, which, according to the election, in passing it parliament descended to the lowest depths of partisanship. Another resolution was with reference to the proposed league of nations which the convention pledged itself to support to its utmost.

Asks for Harmony

One of the resolutions appealed for harmony between the different races and creeds in the Dominion, and referred to the example of our honored leader, Sir Wilfrid Laurier, whose life has been devoted to promoting Canadian unity, and suggested a "democracy in industry," by the holding of conferences between employers and employed with a view to straightening out any differences which might arise. Other resolutions were.

That in all bodies where the nations of the world are called into conference, Canada must hereafter be represented, as of right and by delegates who shall be on an equal footing with all others present.

That in the making of treaties, Canada should have the right to negotiate directly with any other country.

Our courts must have full power to deal with and finally dispose of all matters brought before them for adjudication.

We demand that no more titles, hereditary or otherwise, be conferred upon Canadian citizens.

Old C. N. R. Question

That a full investigation be held to probe the affairs of the Canadian Northern railway to find out and make public al the facts relating to the negotiations for the sale and purchase of this road.

That the outstanding duty of both parliament and the people of Canada is to make full and liberal provision for the soldiers and sailors.

That the system of granting honorary military titles to citizens should be at once abolished and also such titles heretofore granted, cancelled and annulled.

Upholding the rights of the individual citizen to be secure from an accusation of crime and from the trouble and expense and anxiety of a public trial before being indicted by a grand jury; and

The repeal of the order-in-council by which new crimes were created, extraordinary penalties imposed and trial by jury denied.

That farm implements and other articles used for farming purposes be admitted free of duty, and that machinery required for

BOYS PUT IN PRISON FOR COMPLAINING, REPORT

(By Daily News Leased Wire.)

HALIFAX, Jan. 21.—At the board of control meeting today, Mayor Hawkings discussing conditions at Rockhead city prison, said there had been since August last a number of boys incarcerated there who say that they complained at Sydney of unseaworthiness of a trawler on which they were serving. They were tried there by court-martial, brought her in irons and put in the city prison for 18 months. The mayor said he had written the minister of naval affairs in reference to the matter.

His worship said he was informed the boys had refused to go to sea in the trawler. If they had deserted they might have got but 90 days.

EBERT WILL PROBABLY GET CHANCELORSHIP

(By Daily News Leased Wire.)

AMSTERDAM, Jan. 21.—In the third Berlin district the mapority Socialists secured five seats, the independents four seats, the Democrats two seats, and the Nationalists, the Centerists and the People's party one seat each.

The final results will not be known till Wednesday, but the indications are the majority Socialists will be the strongest party and will occupy most of the cabinet seats.

Friederich Ebert is presumed to stand the best chance of obtaining the chancellorship.

Only One Kind of POST TOASTIES — says Bobby

CANADA WANTS REPRESENTATION

(Continued from Page One)

sacrifices and efforts in this great war to a place in the family of nations. We expect to come in with the same status as any other nation. So far as I understand it, President Wilson's conception of the league of nations is that all nations shall come in on a basis of equality, the nations to come in as entities and retain their sovereign rights as nations.

"That being so, of course, once the status of nationhood is established, the dominions would come in at the other nations, and would be accredited whatever right they have."

Much Interest Evinced.

The announcement of the aspirations of the British dominions is being discussed with the keenest interest in official circles in Paris. The question is being frequently asked whether this important step is to be followed later by insistence on the part of the dominions of a right as nations to have a full share in dictating the foreign policy of the Empire so far as its affects the dominions.

"The British Empire is in one sense a national entity and in another a league of nations in itself," was the way one high personage summarized the situation tonight.

Object to Delays.

PARIS, Jan. 21.—There was yesterday a two-hour joint meeting of the British delegation, at which there was an interchange of views. The Canadian representatives were Sir Robert Borden and Hon. C. J. Doherty. Among the matters discussed was the probable length of the negotiations and they gave earnest expression to the view of the Canadian delegation that the proceedings of the peace conference are being unduly and unnecessarily delayed.

There is considerable heart burning among the various national delegations over the awards of representation made by the organizing committee of the great powers. With so limited a membership it was not possible to make the representation awarded an exact index of war service, but the granting of three delegates to the three lesser powers although in the case of Belgium and Serbia strong sentimental reasons for special consideration was occasioned, makes protests certain. It is understood that the delegates from Greece are particularly exercised over the enlarged representation from Belgium.

There is still some disposition in the French press as to cavil at the representation of the British dominions which gives the British Empire a delegation of 14. They suggest that similar representations should be given French colonial possessions. Pierre Mille, the well known French writer, explains to the French people in an article in Excelsior that British dominions constitute entirely independent states, with their own parliaments, which could have declined, had they so desired, to take part in the war, whereas Algeria, the principal overseas French possession, has representatives in the French chamber and is regarded as an integral part of France.

Committee Appointed.

PARIS, Jan. 21.—(Reuter's)—Reuter's learns from an authoritative source that in order to assist the league of nations section, the British cabinet at a very early stage in the proceedings appointed a committee of representatives of all dominions to consult with the section.

Several meetings of this committee have been held, and among other things full consideration has been given to the part which the dominions will play in the league of nation committee.

Their conclusion will in due course be submitted to the British cabinet and if approved will also be submitted to the allied conference.

POWER QUESTION AT PAPER INQUIRY

(Continued from Page One)

Tilley. "The others do not carry such amounts on their books."

Mr. Tilley figures that a selling price of $46.60 per ton for roll newsprine would give the Booth mill a higher profit than it made before price fixing, and that figure is $3.40 below $50 which the publishers suggest as an alternative to the $69 fixed by commissioner Pringle.

It was announced that the issue as between publishers and mills will probably be concluded tomorrow as far as argument is concerned after which the tribunal will take up the differentials case, which is a dispute among the mills themselves.

FIRE DESTROY $10,000 WORTH OF 'PEG PROPERTY

(By Daily News Leased Wire.)

WINNIPEG, Jan. 21.—Fire late tonight completely gutted the brick building at the corner of Portage avenue east and Rorie street, occupied by the Spencer Heating company and the Winnipeg Supply and Fuel company, with an estimated loss of $10,000. The building was formerly occupied as a wholesale liquor store by George Velie.

MANITOBA MUNICIPALITIES WANT NO DAYLIGHT SAVING

(By Daily News Leased Wire.)

WINNIPEG, Jan. 21.—At the fifteenth annual convention of the Union of Manitoba Municipalities this afternoon a resolution asking that the Daylight Savings act be abolished was unanimously carried. During the discussion, it was generally agreed that daylight saving was not in the best interests of all.

FARMERS WANT FREE TRADE

Alberta Grain Growers See Advantage of Getting Agricultural Implements Duty Free.

(By Daily News Leased Wire.)

EDMONTON, Jan. 21.—A definite attack on the federal policy of a protective tariff was launched at the afternoon session of the convention of the United Farmers of Alberta. In addition to the tariff plank in the platform of the Canadian Council of Agriculture the central board of the U. F. A. submitted a resolution and no less than seven resolutions from various locals believing a lowering of the tariff was sent to the council by the resolution's committee.

A feature of the afternoon session was the defeat given James Weir, M. L. A. for Nanton, when he attempted to commit the convention to what was practically a vote of censure on the executive for delegating to the U. G. G. the right to administer estates, after such powers and privileges had been granted to the U. F. A. by the provincial legislature.

The motion was tabled by an overwhelming vote. The discussion rose from a report of legislation submitted by Solicitor Brownles of the U. F. A.

Another important report was presented by Rice Sheppard of Edmonton with respect to livestock and transportation problems, mostly dealing with express charges which the report declared were excessive.

Livestock Question.

Vice-President Baker in a report dealing with the dockage of light hogs said the committee in consequence of a visit to the local packing plants was satisfied that certain animals were justly due a dockage and also accepted the statement that the demand for certain grades was quite limited. They were, however, not prepared to say what terms in cash should represent this dockage and recommended the appointment of an official grader to grade all animals not agreed on as select.

DISCUSS QUESTION OF GRAIN CROPS

(By Daily News Leased Wire.)

WINNIPEG, Jan. 21. — Executive councils of the grain exchange and the Canadian council of agriculture held a conference with Hon. Arthur Meighen yesterday afternoon. The matter under discussion was the financing of Canada's grain crops, it being felt by the grain men that the federal government will be compelled to take active steps to insure this end, if an export market is to be found for the surplus grain grown in Canada.

Hon. Arthur Meighen promised to take the matter up with the cabinet at Ottawa and give it every support.

HUN PRINCE SPEAKS OF JUST AND RIGHT PEACE

(By Daily News Leased Wire.)

BERLIN, Jan. 21.—(By the Associatted Press)—Prince Lownisky, former German ambassador to Great Britain, today gave the following statement to the Associated Press:

"A peace of right and justice, provided it is not merely to be a phrase behind which a peace of violence conceals itself, as a Pax Britannica can only be such a peace as neither enslaves nor mutilates the conquered and which leaves him the possibility of recuperating, of paying his debts and of entering with complete confidence into the peaceful competition into a society of nations. A league of nations which has its roots only in the statutes and not in the hearts of peoples is worthless. Just as the conquerors hundreds of years ago treated France forgearingly and left in its possessions its old borders, including even German Alsace, which early had been taken away from us just so forcibly as we later took it back, so I believe that will be left to us, especially in the east, our borders, which are indispensable for us politically and economically."

QUEENSLAND'S PREMIER ARRIVES IN 'FRISCO

(By Daily News Leased Wire.)

SAN FRANCISCO, Cal., Jan. 21.—Completing the first stage of his journey to London to confer with the privy council on war time measures in his country, T. J. Ryan, chief secretary and attorney-general of Queensland, arrived here today on the steamer Ventura.

PREMIER MARTIN OUTLINES PROVISIONS OF WAGE BILL

(By Daily News Leased Wire.)

REGINA, Sask., Jan. 21.—Premier Martin outlined the provisions of the minimum wage bill for women in the legislature today, saying the need for legislation on this line was becoming apparent, although not so much in Saskatchewan, where the population was agrarian, as in other provinces.

Provision was, therefore, being made for the creation of a wage board to comprise five persons, two of whom shall be women. The board shall have authority to ascertain and declare what wages are adequate to furnish the necessary cost of living to employees and what reasonable hours for those employed in occupations, as well as to establish standards of minimum wages and hours of employment. The board is empowered to make investigations and is given all the powers of King's bench for this purpose.

NO TROUBLE TO REMOVE SUPERFLUOUS HAIR

(Toilet Tips)

It is a nasty matter to rid the skin of objectionable hair or fuzz, if you proceed as follows. Mix a paste with some water and a little powdered delatone, apply to hairy surface and in 2 or 3 minutes rub off, wash the skin and the hairs are gone. This method of banishing hairy growths is painless and does not mar the skin, but to avoid disappointment, be certain to get real delatone.

BRITISH CONCERN WANTS TO START AIRPLANE SERVICE

(By Daily News Leased Wire.)

RIO JANEIRO, Jan. 21.—Representatives of a British commercial airplane concern are seeking a concession for an aerial route from Pernambuco to near Rio Janeiro. It is intended to extend the system to Buenos Aires later.

QUEBEC LEGISLATURE ADJOURNS SESSION

QUEBEC, Jan. 21.—The legislature of the province of Quebec, which opened for business today after the usual ceremony, and routine business, formally adjourned out of respect for the memory of His Royal Highness Prince John.

Bear Traders Concentrate Their Efforts to Extend Advantages of Recent Days

(By Daily News Leased Wire.)

NEW YORK, Jan. 21.—The conspicuous feature of today's broad stock market was the determined and partly successful effort of bear traders to extend their advantage of recent days, in which they were aided by the pessimistic views attributed to industrial leaders and railway executives.

United States Steel was the pivot ground upon which the market revolved and it is likely to retain this position for another week, when the directors meet to approve the last quarterly statement of 1918 and take action on the common dividend.

In view of trade conditions, considerable conjecture exists regarding the attitude of the steel board toward future disbursements on the junior shares. This uncertainty is having an adverse effect on other stocks, including rails and coppers. During its further decline of the morning, when the whole market was in a state of depression, United States Steel fell to a new low, but rallied briskly in the afternoon, making a net gain of a long fraction.

Some twenty prominent rails suffered in the early reversal, representative issues racting one to two points and secondary shares 1 to 4. High grade rails rallied substantially later but Baltimore and Ohio, New York Central and New Haven developed fresh weakness toward the end, Studebaker also breaking.

Sales amounted to 650,000 shares.

Bonds moved with the stock list, speculative issues recording additional losses of one to 1½ per cent. Liberty bonds also shaded slightly, but internationals were firm.

Closing Quotations

BONDS CONTINUE TO LEAD ON MONTREAL MARKET

(By Daily News Leased Wire.)

MONTREAL, Jan. 21.—General characteristics of the trading on the Montreal stock exchange were unchanged today, bonds continuing the active and strong sections of the market, while stocks were dull and on the heavy side.

Heavy buying of the 1933 Victory issue continued today, with the price $1.01⅝ to $1.01¾ against a range of 101½ to 102 the previous day. The close at 101¾ represented a net advance of ¼ for the day. The 1937 five's and the 1937 5½'s closed unchanged at 97¾ and 103¼ respectively, 1927 5½'s improved ⅛ to 101⅛ and the 1931 five's ¼ to 96¾.

Total dealings i nbonds footed up to the total of $525,125 par value.

Smelters fell back ¾ to 25, the local inimum. Other moderately heavy stocks include Laurentide, ½ lower; Shawinigan, 1¼ lower at 115; and Maple Leaf Milling 1¾ lower at 132½.

Steels were fairly steady, Dominion holding at 61, while Canada was off only ½ at 62. Canadian Car was in good demand at 29⅝, a net gain of ⅝ for the day.

Business: Shares, 2817; bonds, $525,125.

BOURSE TRADING STEADY

(By Daily News Leased Wire.)

PARIS, Jan. 21.—Prices on the Bourse were sustained today. Three per cent Rentes were quoted at 63 france 35 centimes for cash.

Col Roosevelt carried $85,000 insurance.

Heart Palpitated
Could Count Every Beat.

When the heart begins to palpitate, it will beat fast for several seconds, then slow, then start to flutter and a feeling of utter depression will come over your whole system, accompanied by weak, fainting and dizzy spells.

When the heart gets into this condition, you become weak, worn and miserable, and are unable to attend to either social, business or household duties.

Milburn's Heart and Nerve Pills will give prompt and permanent relief to all sufferers from any heart weakness or nerve derangements.

Mrs. Walter Greives, Apsley, Ont., writes: "I had been run down and doctors told me I was anaemic, but did not help me with their medicines. I could not sleep nights, my heart palpitated so and I could count every beat.

"I used to have such dizzy spells I would have to go to bed. I was not able to do any work for eight months. A cousin of mine had taken Milburn's Heart and Nerve Pills and told me what they had done for her. I took eight boxes of them and now I am able to help every day with the work. I am so thankful to tell others what they have done for me so that they may try this great and wonderful remedy. I hope this may prove good to some one who is suffering the way I did."

Milburn's Heart and Nerve Pills are 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

SILVER 101 1-8 AT NEW YORK

Spelter Quiet at New York—Metal Exchange Quotes Lead Prices Lower

(By Daily News Leased Wire.)

NEW YORK, Jan. 20.—Silver $1.01⅛; at London, 48 7-16d.

Lead—St. Louis, $5.45; New York, $5.75; Montreal, $7.05; London, £35.

New York metal exchange quotes lead unsteady. Spelter weak; East St. Louis delivery, spot and January, $7.

Copper nominal; electrolytic, spot and first quarter, 20c to 23c; iron nominally unchanged.

WAR LOANS NOT SO ACTIVE AT TORONTO

(By Daily News Leased Wire.)

TORONTO, Jan. 21.—The war loans showed material falling off from the record-breaking figures of Monday and the movements of stock received more attention. Recessions extended practically throughout the list, apart from issues of purely investment character.

Cement declined ¾ to 65, Dominion Iron came out at 61¼, a loss of ¾, and Steel of Canada at 62, a loss of ½. Maple Leaf Milling at $1.33 and Canadian General Electric at 103 lost a point. Smelters sold off ⅞.

The bank shares were variable, Dominion Bank being firm at 219 and Imperial at 210, while Commerce sold off 2½ to 211 and Hamilton remained at 203.

The Victory loan issues of 1933, 1922 and 1923 were the most active. The first-named closed ⅛ lower at 101⅝, the second ¼ down at 99⅝, although the closing bid for larger tolls was strong at 100⅛ and the 1923 loan was unchanged at par. The Victory loan of 1937 made a high record at 103⅛.

Sales: Shares, 1723; bonds, $204,300.

LIVESTOCK MARKETS

(By Daily News Leased Wire.)

TORONTO, Jan. 21.—Receipts at the union stockyards today amounted to 62 cars, with 1162 cattle, 185 calves, 567 hogs and 292 sheep.

Canners were about weakest class of cattle on an extremely slow market. Trade dragged in all lines, although taking it generally there was no great recession of prices apparent from Monday.

Trade in calves was slow and even, the best calves sold at reduced figures. Sheep and lambs both extremely slow and prices another 50c off in both classes. Packers were rather noncommittal, but from conversations with them and commission men, it was gathered that a wide, and by no means settled, range of hog prices existed. Approximately they stand from $15.50 to $16 fed and watered.

Chicago

CHICAGO, Jan. 21.—Hogs: Receipts 55,000; market mostly 10c lower than yesterday's average; one fancy load of 280-pound butchers at $17.

Bulk of sales, $17.40 to $17.75; butchers, $17.55 to $17.85; packing, $16.50 to $17.45; throwouts, $16 to $16.50. Pigs, good to choice, $13.50 to $15.

Cattle: Receipts, 16,000; steers and butcher stock, strong to 25c higher; bulls, 25c lower. Calves steady. Day quotations unchanged except veal calves, good and choice, $15.25 to $16.

Sheep: Receipts 21,000. Fat lambs, 50c to 75c lower; some yearlings selling 50c lower; sheep, 25c lower. Lambs, choice and prime, $16 to $17; medium and good, $14.75 to $16.

Day quotations other wise unchanged.

MONTREAL PRODUCE

(By Daily News Leased Wire.)

MONTREAL, Jan. 21.—Creamery butter for export in demand. Cheese quiet and firm. Quotations:

Cheese—Finest easterns, 24c to 25c.

Butter—Choicest creamery, 53c to 54c.

Eggs—Selected, 57c to 58c; No. 1 stock, 53c to 54c.

Potatoes, per bag, car lots, $1.70.

CORN PRICES STRONGER

(By Daily News Leased Wire.)

CHICAGO, Jan. 21.—Word that the food administration favored maintaining the present standard value of hogs had a decidedly bullish effect today on corn. The closing was strong -⅝c to ⅞c net higher, with February $1.31⅝ to $1.31⅞ and May $1.26⅝ to $1.26¾.

Oats gained ¼ to -⅛.

Provisions finished irregular, ranging 75c decline to 25c advance.

GEORGE GIBSON TO MANAGE THE TORONTO LEAFS

(By Daily News Leased Wire.)

TORONTO, Jan. 21.—President McCaffrey of the Toronto baseball club announces this morning that George Gibson, veteran big league catcher, would manage the Leafs for the 1919 season. Waivers upon the former New York and Pittsburg backstop have gone through, and Gibson, who is a Canadian by birth and a resident of London, Ont., is expected here this week to sign a contract.

This is the first time since Arthur Irwin's time twenty years ago that a Canadian has managed the Toronto club.

TREHERNE REPORTS ON PESTS INVESTIGATION

R. C. Treherne, Vernon, of the entomological branch of the Dominion department of agriculture, has just issued a review of the year's investigations of the insect pests of British Columbia. The report is as follows:

The Pear Thrips

A bulletin on the complete life history, distribution and measures for control was published this year. This bulletin covers the work undertaken during the season of 1916 and 1917 at Victoria, B.C. (Copies of this work may be obtained on application to the Entomological Branch, Dominion Department of Africulture, Ottawa.)

Experiments were preformed at Royal Oak, B.C., testing the value of soil fumigants against the soil forms of this insect. The results do not indicate any special value from this method of control, although positive results were in part obtained. Adult thrips commenced to emerge from the soil on March 24, 1918, the maximum emergence occurring on March 30, coincident with a rise in the soil temperature. The rate of emergence declined rapidly on April 7 and a few stragglers continued to emerge until April 20. In 1917, the emergence period occurred between March 27 and April 28; in 1916 between March 27 and April 30. These dates over three years are so closely approximate that growers may be safely guided in making their first spring spray applications. Application of spray, soap nicotine, were made this year on April 3, April 10, and April 22. As a result of previous study given this insect it has become clear that spraying against the thrips is more important than against the larvae. The number of applications given, therefore, previous to lossombing, depends on the degree of infestation. Pears were commencing to bloom on April 22, 1918.

The Peach Worm

The life history, habits and control of this insect was studied this year at Kaleden and Penticton, B.C.

Minute larvae, hatched from eggs laid the previous autumn, passed the winter in the axis of one, two, three and four years old wood. Larval migration from winter quarters to the buds commenced on April 10 at Kaleden on apricots, and a few days later at Penticton on peaches. On April 16 the majority of the larvae had left their winter quarters. The bulk of the apricots were in full bloom on April 16; peaches on April 25. Larvae became full grown at the close of April and during the first week of May, at which time 25 per cent of the generation were preparing to form their chrysalids.

The main pupal stage occurred between May 17 and 30. Moths appeared between May 29 and June 19, during which time eggs were being laid. Minute worms or larvae of the second generation commenced to appear on June 19, their numbers increasing rapidly during July. These second generation larvae became full grown by Aug. 1, at which time chrysalids of the second generation were observed. The main pupal period of this generation occurred between Aug. 8 and Sept. 3. Second generation moths were in flight between Aug. 26 and Sept. 15, laying eggs which gave rise to minute worms, which, in turn, form hibernation quarters in the crotches of the trees.

Control: In the spring of 1918, fruitgrowers were recommended to spray with lime-sulphur 1-9, in the week previous to blossoming, followed by a second spray with arsenate of lead after blossoming. This same recommendation is suggested for the 1919 season, but it is thought highly probable that a combination of these two sprays (lime-sulphus plus arsenate of lead two pounds to 40 gallons) applied just previous to blossoming will ultimately prove both efficacious and more economical. The spray should be applied to the tips of the trees with good pressure and into the crotches of the finer branches.

Strawberry Root Weevil.

This insect was studied at Gordon Head, B. C. It was found that the infectation of weevil larvae in the root system per hill in one, two and three-year-old plantations averaged respectively one, 14 and 36 larvae per hill. The egg laying period extended this year from June 26 until Sept. 16, the greatest number of eggs being laid from July 15 until Aug. 15. Few natural enemies were observed, although three species of Carabid beetles occurred in fair numbers. At the present time the best information we can offer the growers is summed up in Circular 33 of the provincial department of agriculture, which may be had on application to Victoria, B. C.

Various strawbery insects, among which may be mentioned the Crown Moth (Synanthedon rutilans); the Crown Borer (Aristotelia sp); the White grub (Polyphylla decemlineata); tipulids and wireworms, were studied and their presence and distribution made known. Their life histories and habits are being further studied and information obtained as a result of the study will be published on a later occasion. Their control, for the time being, may be summed up by advocating short term strawberry growing rotations.

Wireworms Control.

Considerable injury has been caused in recent years at points in the Okanagan valley and on Vancouver island by the attacks of wireworms on onions, corn and potattoes. Extensive experiments were carried out at Kelowna in onion plantations, by the use of baits. Altogether 6707 baits were set and examined and 25,939 wireworms were collected. Baits set in land treated in a similar manner the year before yielded two wireworms per bait, whereas the baits set in fresh onion land, never before treated, yielded an average of 20 per bait.

The baits consisted in the main, of baked rice shorts and water. Various poisons were added to the baits, but no results attended their inclusion. The method of using the baits consisted of moulding the shorts in small balls which were, in turn, set in the soil two or three inches deep in rows 10 feet by five feet. The baits, then after a week or 10 days, were removed from the soil, broken open, and after the wireworms have been removed by hand, remoulded and reset in the soil for another 10 days. Two applications were supposed to suffice for the year, the first treatment taking place as the onions were just starting through the soil.

The practical results of this work indicated that the method, while tedious, undoubtedly would be to set unpoisoned baits, dig them up after 10 days and reset fresh baits. The baits might be, in this way, fed direct to chickens. The old fashioned method of using sliced potatoes in the same way is also suggested.

Seed Insects.

Study has been given the question of the insects visiting the flowers of onions, carrots, beets, mangels, persnops, and radishes at Victoria, Walhachine and points in the Okanagan valley. The object of the work was to determine the range of flight and the habits on the wing of the various visiting insects, in order that local information would be available for the maintenance of pure strains of seeds. A great deal of information has been obtained, but its value to the seed grower is more than covered by the fact that solirtary and social bees visit the blossom of all the plants named and from their activities and habits they must be considered first in the matter of the location and disposition of seed growing areas.

Onion Magogt.

Time and opportunity did not allow of any studies of the life history and habits of this destructive onion pest this year. Several growers in the Okanagan valley tested the new poison bait consisting of sodium arcentite and molasses but the results expected did not materialize. This poison bait method of destroying the adult flies is still believed to be satisfactory. The periods of application are not properly known as these periods can only become clear following a study of the life history. It is hoped that next year this study will be commenced.

It is believed, however, that the baits should be set during May and July.

Onion Thrips.

This thrips caused a great deal of trouble in onion growing districts. Spray applications of soap and nicotine should be applied as soon as the thrips appear in numbers in the axils of the leaves. This year the first spray date was about June 20. Later applications are dependent on weather conditions. If the weather is moist thrips do not multiply rapidly; if dry, breeding is rapid with a low mortality record. Information has been received from the manufacturers of spray machinery that proper onion sprayers are available. Growers are, therefore, advised to procure suitable machines at their earliest convenience.

Cutworms

Cutworms of the above species were plentiful in certain areas of the dry belt and as usual caused consternation among growers. Eggs were being laid on Aug 28. Young larvae hatched this autumn and will pass the winter in the soil. Growers who observed the flight of the moths or otherwise have reason to fear attacks from cutworms next year, should prepare themselves in proper time. Applications of Paris Green or white arsenic, molasses and bran may be worked into the soil before the crop is planted in the spring, or applications may be made after the crops are above ground. No grower has any excuse in being troubled very seriously by cutworms, and the winter time is the proper period to obtain information and prepare.

Wooly Aphis

Some spraying experiments were performed this summer for the control of the wooly aphis of the apple. Miscible Oil No. 2 (imported from California), soap and nicotine, lime and nicotine applications were tested. It was shown that 175 pounds pressure is not sufficient to effect control, and in this respect all the mixtures used gave approximately the same results. It would appear that at least 225 pounds pressure is neecssary.

Aerial colonies survived the winter in the main branches of the trees. They started to develop on May 2. Between May 1 6and 30 the white wooly masses were very distinct. By June 5 incipient colonies were apparent on the finer limbs of the trees, evidently following a migration period just previous. Spray applications should take place around June 1, as a general guide for another year. It was further shown

RHEUMATIC PAINS
Quickly Eased By Penetrating Hamlin's Wizard Oil

A safe and harmless preparation to relieve the pains of Rheumatism, Sciatica, Lame Back and Lumbago is Hamlin's Wizard Oil. It penetrates quickly, drives out soreness, and limbers up stiff aching joints and muscles.

You will find almost daily uses for it in cases of sudden mishaps or accidents such as sprains, bruises, cuts, burns, bites and stings. Just as reliable, too, for earache, toothache, croup and colic.

Get it from druggists for 30 cents. If not satisfied return the bottle and get your money back.

Ever constipated or have sick headache? Just try Wizard Liver Whips, pleasant little pink pills, 30 cents. Guaranteed.

THE DAILY NEWS

Published every morning except Sunday by The News Publishing Company, Limited, Nelson, B.C., Canada. Business letters should be addressed and checks and money orders made payable to The News Publishing Company, Limited, and in no case to individual members of the staff.

Advertising rate cards and sworn detailed statement of circulation mailed on request or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Subscription Rates: By mail 50 cents per month; $2.50 for six months; $5 per year. Delivered 60c per month; $3 for six months; $6 per year, payable in advance.

WEDNESDAY, JANUARY 22, 1919

THE PEACE CONFERENCE AND BOLSHEVISM

M. Noulens, French ambassador to Petrograd, goes only part of the way when he states that the Bolshevist regime in Russia is the enemy of the entente. It is that and more. It is the enemy of the whole civilized world.

Civilization stands for order; Bolshevism for disorder. Civilization stands for progress; Bolshevism for retrogression to a condition of worse than primeval savagery. Civilization stands for construction; Bolshevism for destruction. Civilization builds up; Bolshevism tears down.

Whether it would be wise for the entente to embark upon a complete campaign to wipe out Bolshevism in Russia is a mater for decision by statesmen advised by the men who know most of the situation in Russia.

Armed assault on the Bolshevist regime in Russia on a large scale might be misunderstood by the Russian people, skilfully misled by Bolshevist leaders. On the other hand, the people of Russia might rally to the allied standard. It is for the men who best understand the situation to say.

All the distant observer knows is that Bolshevism in Russia or anywhere else is a menace to civilization. Whether it is more expedient to try and beat it out or to let it burn itself out, as in time it inevitably will, remains to be establishe. The unfortunate thing is that if it is left to consume itself it will consume better things with it.

BRITISH COLUMBIA STANDS WITH WELCOMING HAND.

The Empress of Asia carrying about 1500 Canadian soldiers, most of whom are destined for homes in British Columbia and Alberta, are expected to reach Victoria Saturday.

These men form the first body of returned veterans to make their homecoming via the canal. This is also one of it not the largest bodies of western men to return at any one time.

British Columbia will delight to welcome these veterans of the great war to their homeland. It will feel honored to have them land on its shores on their first return to their homeland.

THE "GAS BAG'S" OPPORTUNITY.

Contrary to the expectations of the public, the aircraft that will make the first flight across the Atlantic may not be a giant biplane or triplane, but a dirigible, built after the zeppelin style, says the Toronto Mail and Empire. The British admiralty is said to be embarking on the construction of large airships, with a gas capacity of 2,500,000 cubic feet, and capable of making 60 or 70 miles an hour. These will be used for sea-scouting duties, and will be able to remain aloft a week. Major-General Sykes, of the British air staff, recently told of a German zeppelin that sailed from Bulgaria to German East Africa with 12 tons of ammunition. Finding that the German force had surrendered, it returned, being in the air four days without landing. The new improved "gas-bags" wil be capable of staying in the air perhaps ten days. If they can do that they can easily cross the Atlantic, because at 60 miles an hour, only five days at the outside would be needed to make the trip. General Brancker of the British air service, says that the air trip across the Atlantic may be made in May or June, and in any case some time this year. It is well known that Caproni and leading English and French designers and constructors of airplanes are working feverishly on the 'cross-Atlantic plane, each in the hope of winning the blue ribbon. But the problem of getting a sustained fourday flight out of an airplane using gasoline at a rate of perhaps 50 gallons an hour is no slight one. The dirigible has an equal chance of getting there first.

Bury the hammer.

Bolshevism in Russia is weakening. There are no regrets to offer.

W. Hohenzollern may get that new beard of his badly singed before the robins sing again.

There need be no more pro-Germans in this country, says the Hamilton Times, for the road to Germany is open.

The Findlay investigation and the peace conference may last for many years, says the Kamloops Standard Sentinel.

Neutrals are very anxious now to get in on the ground floor of a league of nations. If the neutrals are so anxious to argue, why didn't they do it before the armistice was signed?

Germans thought the Hindenburg line was strong enough to hold back the Canadians. There were a whole lot of defenses that the Huns thought were strong enough to break up allied attacks, but they found out differently.

Agriculture in Kootenay and Boundary is in a more satisfactory condition than at any time in the history of the province. It has made more real progress in the past two years than in the whole of the preceding decade.

WHAT THE PRESS IS SAYING

If the shade of Bismarck is rovering about, it must have discovered by this time that blood and iron make mighty poor national cement.—Chicago News.

Persistent Poppy

The poppy might almost be said to be a sacred flower, because of its association with Canadian battlefields in France. And yet those who import poppy seed should have a care. The poppy is as persistent as it is radient. —London Free Press.

Nothing Doing. They're Here.

An eastern newspaper says that the Prince of Wales might well choose a wife from among the good-looking girls between Montreal and Winnipeg. Just one word to the prince: Having braved the terrors of war it may be true that he now contemplates matrimony and if so we say to him in the immortal words of Mr. Greeley: "Go west, young man, go west." But not too far west. Canada's girls are prettiest about midway between the east and west boundaries of Saskatchewan. —Saskatoon Phoenix.

TOLD IN RHYME

MEMORY.

I know a lone spot on the Arras road
Where I shall hardly bear to walk again
For fear of waking those great souls I loved
Who struggled to a death of piteous pain.

Ah! I should hear their laughter on the way,
And round my heart their boyish sighs would creep;
Till I must long to leave the rushing world
And steal away to join them in their sleep.

For only they who tread the tortured path
Of those torn roads where swaying poplars sigh
Can dream of how God could give no greater bliss
Than the hushed peace beneath the sad French sky.

I know a lone spot on the Arras road
That murmurs with the moan of Memory's pain,
And I should grieve my heart with stifled sobs
If I could bear to walk that road again.

—Lieut. A. N. Choyce.

COLD STORAGE

Heck—Does your wife understand any language except English?

Peck—No; she can do all the talking that's necessary in that.

An architect remarked to a lady that he had been to see the great nave in the new church. "Don't mention names," the lady replied. "I know the man you refer to."

Barber (about through with haircut))—Does that suit you, sir?

Absent-minded professor — You've cut it altogether too short—a little longer, please.

"Singing is said to benefit the health."

"Indeed it does; Miss Howler next door drives us all out into the open air every Sunday afternoon."

A certain selfish man came home the other evening with an enormous bundle.

"Matilda," he said, "you know those wonderful 40-cent shirts and 15-cent neckties that you bought me, so that I could put more money into the war loan?"

"Yes."

"Well,' the man went on, "I stepped into the same shop touay and bought something for you. Its a beautiful red and green checked dress material and I got you 80 yards at 6 cents a yard. The clerk said it would make enough dresses to see you through the war."

The sailor had just told the other lady in the train what his share in the great war was. "In a submarine!" she exclaimed. "How nice! And what do you do?" "Well, mum, I runs forard and tips her up when we want to dive."

DALY AND REPATRIATION GO TOGETHER IN CANADA

Daly is the man who general-manages the varied and various departmental and voluntary activities in Canada co-ordinated to aid in demobilizing returning men and war-workers, and re-adjusting industrial and commercial conditions. Never before was there such a job to general-manage. Never before in Canada has there been such a general manager.

Repatriation is the responsibility of a committee of the cabinet of Canada, which has named Herbert J. Daly as its director of activities, but all Canadians have both a privilege and a duty in this connection.

Mr. Daly is a Peterborough product. On the sunny side of forty, he is a Canadian who has put his stamp upon Canadian industrial life at many points. His success is proverbial. Whatever he turns his hand to goes ahead.

The public and high schools of Ontario, the democracy of free education, taught him, and this training, together with natural aptitude, largely colored by Irish alertness and ambition, equipped him to battle for and win success on his own. How hardly won is that battle, those who are in the midst of it can tell.

Now that his feet are firmly placed on the pedestal of secured success, he finds pleasure in telling how he made the grade from Peterborough salesmanship to Montreal, Toronto and Ottawa prominence; what hardships he endured, what obstacles he surmounted, how laughable many of his experiences were. He tells a story well. He has humor. His sense of the incongruous is not the least quality that has made him what he is and keeps him forging ahead.

Appearance Was Against Him

As the diminutive traveler for a Montreal coffee house, he discovered that his appearance prevented him from being taken seriously by customers. He had to overcome the handicap of youth. He bought a pestle and mortar. When he entered the store of an expected customer, he took no notice of anybody, but placed his mixing apparatus on a distant part of the counter and ground coffee. This innovation brought the storekeeper to him. His interest was aroused. That's all the boy—Daly—wanted. Lend him your ears and he will persuade you to the course he wants you to take, even now. He's a business cajoller.

A month before the Ottawa fire he was in Ottawa for a wholesale grocery house. He had finished his business and was looking over the J. R. Booth paper mill. In the yard he encountered an old man who spoke to him and with whom he conversed for some time on friendly terms. The old man became interested in his story of selling goods. What did Daly want? Why, Daly wanted to sell groceries to J. R. Booth. The old man told him to go to the office and tell the Scotch manager that he had sent him. Oh, what's the use? Of course a bill of goods was ordered. Yes, and the old man was J. R .Booth, Daly found out afterwards.

One trait that makes Mr. Daly different from many men is his sense of gratitude. You cannot get him to recount his early experiences, but he freely and gladly confesses that the man who inspired him most in his youth was T. C. Doidge, B.A., high school master, Peterborough. Mr. Doidge took an interest in him, taught him after hours, and inoculated him with the fact that knowledge is power. For that, Mr. Daly is grateful to Mr. Doidge. He positively delights to express his gratitude. Gratitude is a virtue that you find typified by a good dog, but rarely laid claim to by a man. Yet, it is a rare and enriching virtue.

Has Important Post

Mr Daly, as director of repatriation, has an important post that would break anyone but a trained executive. He coordinates the various governmental activities of Canada touching the demobilizing of Canada's soldiers and war workers and the readjustment of industrial conditions. He is the first public synthetizer ever employed by the government of Canada and the mere fact that he was picked out is a tribute to somebody in authority in the government, name yet to be revealed.

It is one thing to be conversant with what the government is doing in its national task of repatriation. It is another thing to gather up these various endeavors, suggest policies that will prevent overlapping and waste motion, and direct every effort efficiently to a definite end. And it is still another thing to do all this without friction but with an intense spirit of enthusiasm and obtain dynamic co-operation from everyone concerned. Mr. Daly does all this and besides conjures up a helpful atmosphere while establishing a manageable organization that puts everyone on his mettle.

In stature, Mr. Daly is the size of the Little Corporal, and he looks like him. Study him closely and the resemblance is remarkable. Bonaparte had brains. The secret of Mr. Daly's success is brains, judgment, capacity, commonsense—call it what you will; the power to seize the essential facts of a situation, visualize a concrete objective and push through to it. It is easy to write, but personality alone achieves it.

His knowledge of human nature, gained from his experience as a salesman of many things, from coffee to department stores, has made him an astute diplomat in dealing with men. His intimate knowledge of the machinery of large industrial organizations enables him to put his finger on the weak and strong points of any community of effort.

Keen Judge of Character

As director of repatriation, he is accessible at all times to those who have serious problems to discuss. He is courteous without being gushing. While he is hospitable to new ideas, he is not too ready to speak in praise or adverse criticism. He is alert and even eager mentally, and when he has mastered a situation and drawn his conclusions he is brave in their defense. His mind is sharpened and polished by experience. He is a swift and sure judge of the essentials of a problem. He is a keen measurer of character, and once a man has proven his right to confidence he gives him his own head.

On manner, he is soft spoken, gentle and sympathetic. Behind his big, thick-lensed spectacles there sits a spirit "of thought and authority within." His eyes, in spite of their Celtic gleam, give one the sense of resoluteness. In spoken word he is never bitter, though always frank and honest. His independently plain speech, never heard above a conversational tone, is fraught with sincerity of purpose.

In method, he is never fitful. Everything he does is toward a definite goal which he sees clearly enough, but which others with less concentration may little suspert.

He has been working on repatriation for two months now, and is satisfied that the wheels of the machinery are synchronizing. After he speeds them up and tries them out a bit, he will let them run alone.

This man, Daly, is a real find, and what he is doinp as director of repatriation is invaluable national work.

A SOLDIER'S MONUMENT

A town meeting was called to consider what form the memorial to the sons of Catasauqua, who served in the war, should take. The meeting hall was crowded, and no New England town meeting was ever more representative. Bankers and ironworkers, preachers and puddlers from the furnaces, cement burners and laborers mingled with women who had rolled bandages for the Red Cross and thought of sons across the seas. The question was propounded for discusion: 'Shall we have a monument or a memorial house which will be a real community centre?" and the memorial house won by a majority so large that the votes for the monument were not even counted.

This is the plan they will follow. Every man, woman and child in the community is asked to become a shareholder in the Memorial Society by making a subscription of one, two, three, four or five cents weekly for a period of five years. With this they will build a house costing in the neighborhood of $125,000, containing an auditorium, recreation rooms, gymnasium and swimming pool. There will also be a room for permanent records of the war with a bronze tablet containing the roster of soldier sons. It will be managed by a board of governors chosen by the subscribers, and the property will be held by a board of trustees chosen for life. It is proposed to make it the centre of the community life in every way. The auditorium will have gatherings where every public question may be discussed. Here also on Thanksgiving day or other national occasions the churches of the community will gather for united worship. Catasauqua was founded by Welsh ironworkers, and the Welsh love of music has not died from the hearts of their descendants, so that it would be strange if an eisteddfod were not occasionally held there. Lecture courses of all sorts have a place in the plan. The gymnasium will afford facilities for dances of a better type than those found in the usual dance-halls. But most of all it will be a place peculiarly for the soldier who comes back, where he can gather with his comrades and recount the tale that America will never tire of hearing—of Chateau Thierry and the Argonne. This place will be his, erected in his honor, and because it is his and because he and his comrades are naturally going to lead the community in the coming years, just as his grandfather did after he came from the Civil War, so more and more the community life will centre about the Memorial House.

Catasauqua might have inflicted another monstrousity on the world, but instead it has given it a breeding-place for a better and more intelligent democracy. And what better memorial could there be for the men who made the world safe for democracy? —N. Y. Outlook.

BIG DAYS FOR DOBBIN.

The day a lovely girl warmed his freezing nose with her muff.

The day he avenged himself on his abusive driver by breaking away and upsetting him into the gutter.

The day he was sold to a country gentleman.

The day his new master doubled his allowance of oats.

The day he towed a racer several miles to a garage.

The day he found a pound chunk of maple suger in the grass.

The day he carried six little tots in the village parade.

The day his master's eight-year-old son drove him into the city all the way behind a hay wagon.

The day he was retired from active service to spend the rest of his life in a broad green pasture.—Edmund J. Kiefer.

Trustee Hambly was elected chairman of the Toronto board of education.

TO RELIEVE CATARRHAL DEAFNESS AND HEAD NOISES

If you have Catarrhal Deafness or are hard of hearing or have head noises go to your druggist and get 1 ounce of Parmint (double strength), and add to it ¼ pint of hot water and a little granulated sugar. Take one tablespoonful four times a day.

This will often bring quick relief from the distressing head noises. Clogged nostrils should open, breathing become easy and the mucus stop dropping into the throat. It is easy to prepare, costs little and is pleasant to take. Anyone who has Catarrhal Deafness or head noises should give this prescription a trial.

ATHLETICS

The athlete—he may be a baseballer, a footballer, a cricketer, a golfer,, a lacrossist, an exponent of tennis, or a hockeyist—will come into his own next year.

In view of the things achieved in Europe by the young athletes of the allied armies we can well believe that the games of the field and ring will be more popular than ever with the people, who admire physical endurance, courage and the intelligence that "playing the game" begets.

Converts to manly pastimes should be counted by the thousand in Canada. There is no room for questioning the value of athletics to a young, strong and growing nation such as Canada is. Our boys in khaki have left us with no alternative than the conviction that manly sports form one the gerat national essentials.—Guelph Herald.

Toronto estimates its population at 489,681.

FOOD BOARD FLASHES

In this country we are apt to be finicky about new foods. Instead of giving them a trial we regard them with suspicion. Families get into food ruts and insist on having only such varieties of food as they are used to, although equally valuable fare may be available at lower prices. An instance of this is the neglect of the cheaper cuts of meats. Women buy round and tenderloin steak and consistently boycott the cheaper cuts although they are quite as palatable and lower in price. Again, they buy halibut and salmon in preference to cod and haddock although the latter cost about half as much and are just as good.

Ne need to get over our food prejudices. We need to learn how to cook all kinds of staple foods and to serve them in a variety of ways. Simple dishes well prepared are better than expensive foods badly cooked.

"Pretty hat you're wearing."

"Yes, I bought it for sports."

"I'm sure all the sports who see it will admire it."—Louisville Courier Journal.

FLU SITUATION IS BETTER IN SANDON

Little City Is Hard Hit But With Assistance Now at Hand Worst Is Believed Past

(Special to The Daily News.)

SANDON, B. C., Jan. 19.—A serious outbreak of the "flu" occurred in Sandon about 10 days ago, the first case arriving at the hospital on Jan. 9. Since then they have been coming fast and furious, all accommodation having been taken in a very short space of time, so that it has become necessary to equip two additional buildings as emergency hospitals to take care of the overflow. The influenza was presumably brought here by some Italians who walked down to New Denver to attend a New Year's celebration and then walked back, in this way evading the quarantine restrictions. Those men transmitted it to some of their friends around town as well as to the men at the Noble Five mine, with the result that it has spread all over town as well as affecting several of the mines. The entire crew of the Ivanhoe mine are down the hill, most of them in the hospital, the last victim being the foreman, D. A. Mackenzie. The Noble Five man has only about three men left; the leasees at the Reco No. 1 are all in the hospital, two of them having died. There have been three deaths altogether. There are approximately 70 cases in Sandon, one-half of which are being taken care of by the hospital, the balance being around town, in some instances entire families being down.

Dr. Nash, resident physician, became indisposed immediately the influenza reached town, as did the city receiver, Mr. Turner, with the result that there was neither medical attention or quarantine restrictions. Those conditions almost created a panic among the residents for the time being. R. T. Pollock, the principal of the school, closed that institution forthwith and took vigorous hold of the quarantine arrangements. F. K. Sherriff, noble grand of the local Oddfellows lodge, got the wires busy, with the result that three experienced nurses were obtained from Nelson. He also got Dr. Gomm of New Denver to come up and attend to the patients.

Great credit is given to Mr. Pollock for the manner in which he rustled beds, bedding, etc., and fitted up the two emergency buildings to take care of the overflow from the hospital and also to Mr. Sheriff for his prompt action in securing nurses and medical attendance, thereby allaying the panicy conditions prevailing and restoring confidence, which had this not been done might have resulted in serious consequences. The thanks of the community are also being expressed to Dr. Gomm for the prompt assistance rendered, having to walk up from New Denver and down again in many instances, notwithstanding the fact that he has been so busy attending patients at lake points that he has not had an opportunity to remove his clothes or enjoy a night's rest in bed for over a week. The residents certainly appreciate his efforts on their behalf.

D. P. Morgan, the local nurse, was taken down with the "flu" some time ago and his condition was considered serious for a time.

Andy Shilland is now in charge of the hospital during the illness of Mr. Morgan. He is being assisted by two of the nurses brought in by Mr. Sheriff on behalf of the Oddfellows. Miss O'Donnell, the matron, is also down with the malady. Her duties have been assumed by Mrs. Bennett and Mrs. Taylor, who volunteered their services.

Miss Church, our postmistress, who volunteered for nursing at the outbreak, is down with the "flu." She is recovering rapidly and it is hoped will be around again in a few days.

Many thanks are being expressed to M. J. Harris, the Silversmith Mines, Mrs. H. McLeod, Robert Cunning, Mrs. Findlay and others for their generous donation of beds, bedding, etc., to the emergency hospitals. Miss Marie Murray has taken over the duties of Miss Church in the postoffice during her illness.

Clarence Cunningham, our Slocan mining magnate, who has been in Spokane undergoing treatment for a bad attack of sciatica, is expected home in a few days.

Mrs. Poole of Nelson, mother of Mrs. George Hope, is at present in Sandon assisting in caring for the influenza patients. Mrs. Poole had considerable experience with the influenza in Nelson and when the outbreak took place in Sandon was wired for by George Hope to come at once. She immediately responded to the call for assistance and is rendering valuable service. Great credit is also given to Mr. Hope for his indefatigable efforts to control the epidemic, his time as well as his horse and cutter being continuously at the disposal of the hospital board for the purpose of conveying patients to the hospital or rendering any possible assistance.

Mrs. Phil Long is recovering from an attack of influenza. The Roseberry Surprise mill at Sandon are seriously handicapped for lack of men, a large number of their staff being down with the malady.

Mrs. W. J. Macdonald is convalescent. Miss I. Millburn, who volunteered her services to the hospital at the outbreak of the "flu" having contracted the disease, is now rapidly recovering. Jack Hume, the well known hockey player, has volunteered his services and is now in charge of one of the emergency hospitals. E. Marshall of the Slocan Mercantile company, who removed with his family to Silverton last week, is expected back in a few days. Harold Lakes, superintendent of the Silversmith mill, has returned from his visit to Kaslo.

Quite a number of snowslides have run in this vicinity during the last few days owing to the thaw. No one has been caught nor any damage done, as far as learned.

Kelsen Passes Away

Jacob Kelsen, one of the old-time merchants and residents of Sandon, passed away at the hospital on Sunday afternoon. Mr. Kelsen was, it is understood, in his seventy-sixth year and had been in ill health for some time past. He will be greatly missed by the kiddies of Sandon, amongst whom he was popular, always having a kind word or something to offer them. He was always open-hearted, generous and could be depended on to do his share towards any public spirited enterprise, friends point out, to many of whom he proved a friend in need. He was an American by birth, having originally come from New York state, but has been in the west for many years.

Dr. Oliver of Victoria, who is touring the province on behalf of the provincial medical health department, arrived in Sandon on Friday's train. The doctor has taken care of the influenza cases and will remain with us for some days. There are at present only a few serious cases of influenza in Sandon.

WANETA MAN'S HORSE FALLS; RIDER'S LEG BROKEN

(Special to The Daily News.)

WANETA, B. C., Jan. 21.—Hugh Buckley was taken to Trail hospital yesterday suffering from a broken leg. The unfortunate accident happened through Mr. Buckley's saddle horse falling with him on an ice-covered trail.

Miss E. E. McDougall has arrived from Vancouver to take charge of the Nine Mile creek school in place of Miss O. V. Laurie, who is giving up teaching.

Beef, pork and several loads of apples have lately been taken into Trail by the ranchers.

Henry Adie has returned from a visit to Spokane.

Mrs. E. Stone spent some days in Trail last week.

Andrew Adie has resumed his duties as assistant postmaster.

A bashful mortal he;
Why, he's so shy he won't embrace
An opportunity.

TO WIPE OUT CHURCH DEBT

Rossland United Congregation Holds Annual Banquet—Intends to Pay Off All Indebtedness.

ROSLAND, B. C., Jan. 21.—Even a blizzard did not prevent well over 60 persons sitting down to a banquet in the United Church annex on Wednesday night. The occasion was the annual rally of the United church of Rossland. It was the unanimous opinion of all present that the ladies had well looked after their part of the evening's entrtainmnt in providing such an excellent supper. The young ladies of the congregation served in a creditable manner. After all had done justice to the feast, J. C. Robson, acting in the capacity of toastmaster, called the gathering to order. The first toast, "The King," was responded to in the usual manner. Then followed toasts to "Our Country," "The Ladies," "The Press," ably responded to by Messrs. R. D. Mitchel, W. K. Esling and W. A. Elletson, respectively. The musical end of the program was well maintained. The male quartet, composed of Messrs. Frank Armstrong, W. F. McNeill, L. M. Roberts and Dr. W. N. Gunning, rendered two selections, their last number, "Kentucky Bay," drawing forth prolonged applause. The instrumental duet by Mesdames Armstrong and Johnstone was well received, as was a solo, "The Four Leaf Clover," by L. M. Roberts. The toast "Our Church" was responded to by the pastor, Rev. E. A. Chester.

The president of the Young People's society, M. S. Morren; Mrs. W. N. Gunning and the superintendent of the Sunday school, C. F. Smith. The church treasurer, W. F. McNeill, presented the financial statement for the year 1918 in his usual businesslike manner. The total revenue for the year was well over $3000 and of this amount $300 was raised for missions. Gratification was expressed that the church debt had been considerably reduced during the year and a half of local union of the Presbyterian and Methodist congregations. It fell to the lot of T. S. Gilmour to spring the surprise of the evening. In a speech he disclosed the fact that the official board had decided personally to wipe out the entire indebtedness of the church. Not to be outdone the congregation then and there appointed a committee composed of P. R. McDonald and Mesdames Smith and Archibald to canvass the congregation for an increase in subscriptions in order that the present clean financial sheet might be maintained throughout the year 1919. The gathering adjourned about 10:30 p. m. with all joining heartily in "Praise God From Whom All Blessings Flow."

SAVE MR. OWL, SAYS WANETA FARMER

(Special to The Daily News.)

WANETA, B. C., Jan. 21.—While it is generally known that the large horned owl is often very destructive to poultry, it is not so often recognized that the smaller owls are useful friends of the farmer. C. W. Slater has lately at Hillcrest ranch observed a pair of barn owls visit his grain stack nightly to catch mice. The smallest variety, the pygmy owl, feeds not only on mice, but on grasshoppers and other insects. It is quite common in the Kootenays and may often be seen in broad daylight.

A spinster's ideal man is one who will say the word.

Afraid To Tell Mother!

The child won't play or smile. He is real sick. His tongue is white, breath feverish, stomach sour. He fears he is in for a dose of awful castor oil, calomel or pills. How he hates them. He would rather remain sick.

If his mother would only learn the value of candy "Cascarets." How children love this candy cathartic—how surely it acts on liver and bowels.

TO MOTHERS! Each 10 cent box of Cascarets contains full directions for dose for children aged one year old and upwards. Nothing else "works" the nasty bile, sour fermentations and constipation poison from the tender little bowels so gently, yet so thoroughly. Even cross, feverish, bilious children gladly take Cascarets without being coaxed. Cascarets taste just like candy. Cascarets never gripe, never sicken, never injure, but above all, they never disappoint the worried mother.

TRAIL I. O. D. E. ELECTS OFFICERS FOR YEAR

(Special to The Daily News.)

TRAIL, B. C., Jan. 21.—At the meeting of Arthur Chapman chapter, I. O. D. E., held in the G. W. V. A. rooms on Monday afternoon, the following officers were nominated:

Regent, Mrs. A. M. O'Donnell; first vice-regent, Mrs. G. F. Chapman; second vice-regent, Mrs. Charles Kelman; recording secretary, Miss Florence Binns; corresponding secretary, Miss Edna Kerr; treasurer, Miss Lavinia Weir; Echoes secretary, Mrs. J. T. Newman.; standard bearer, Mrs. R. G. S. Anthony; council, Mesdames G. F. Weir, F. G. Morin, Wade, James Williamson, A. J. Martin. The election of officers will take place on the first Monday n February.

Miss Ethel Boultbee, superintendent of military hospitals for British Columbia, is the guest of her sister, Mrs. McLennan.

C. Hicks returned Monday from a visit to Seattle.

The meeting of the Epworth league on Monday evening was in charge of the missionary department. Ensign Cox of the Salvation Army gave an interesting address on mission work in the slums of greater London.

HAW, HAW, MAJOR!

"So this is your famous Beacon street," said Major X, as he strolled with his friend along past the State House. "Frankly, I'm surprised; I had always heard that it was a very exclusive street, you know."

"Well, so it is," said the other man.

"Eh, old chap, how can you say so? Why, it positively verges on the Common."

ADVISORY BOARD HOLDS MEETING

District "F" Delegates Pass Resolutions and Hear Secretary's Report for Year

(Special to The Daily News.)

GRAND FORKS, B. C., Jan. 20.—The following is a report of the business and resolutions passed at the annual conference of the farmers' institute held at Grand Forks by the advisory board representing district F:

Mr. T. Lawrence of Grand Forks was appointed chairman.

S. T. Larsen of Rock Creek was appointed secretary.

Minutes of last meeting were read by Mr. Heaven and adopted. Communications from different institutes were read by the secretary.

In the absence of delegates from several institutes, the following were appointed to act as proxy:

Mr. McKim, proxy for Rossland; Mr. Mann, proxy for Burton City; Mr. Kerman, proxy for Greenwood; Mr. Little, proxy for New Denver.

The following resolutions were adopted:

First—Be it resolved that the strongest possible protest be sent to the railway commissioners against the proposed increae of express rates. Such increase would be prohibitive and would seriously injure the fruit growers of the province. That in case the express companies persist in their demands, the express service be taken over and run by the Dominion government in the interest of the nation.

Second—Whereas the present system of taxing improvements discourages the development of farm property, be it resolved, that we make representation to the govrnmnt for a more equitable method of assessment to be introduced.

Third—Whereas the surtax works a hardship on the farmers, we ask the government to remove the same from farm property.

Fourth—That the Noxious Weeds act be strictly enforced.

Fifth—Whereas the high cost of powder retards the development of the district, we make an earnest appeal to the government to arrange to supply stumping power through Farmers' institutes at a nominal price under a proper guarantee for economical use.

Sixth—Whereas the development of the country by clearing of brush land is a national question, we appeal to the government to offer a cash bonus to bona fide settlers for every acre cleared and brought under cultivation, the relative amount of such bonus to be based on the difficulty of clearing such land.

Seventh—Whereas, only a small percentage of the cultivatable land adjacent to developed centres is at present under cultivation and the development of such districts would involve very little increase in national services, we urge upon the government the advisability of encouraging the settlement in such districts of returned soldiers and others in preference to opening up new districts.

Eighth—Whereas, owing to the great difficulty experienced in very many institutes in getting sufficient numbers at the meetings to form a quorum, be it resolved that we request the advisory board to urge the amendment of Section 22, Cooperative Farmers' institutes, to reduce the number necessary to form a quorum, from 10 to seven.

Ninth—Whereas, a great injustice is done to ranchers through the working of the Railway act which allows no compensation to the owners of animals killed on railway right of way when they have been purposely allowed to run at large without a herder and whereas there is in British Columbia what is commonly called the "Law of the Range," which permits owners of livestock to allow them to run at large, and there is throughout the province a vast amount of unoccupied range land, be it resolved, that we urge the advisory board of Farmers' institutes to use their utmost endeavors to get the Railway act so amended as to free the owners of stock so killed from the charge of "wilful negligence," Sec. 294, in allowing his stock so to run at large and to allow compensation for his loss upon proof of breach of statutory duty by the railway companies, as per Sec. 254.

Tenth—Whereas, much damage is done by bears in some localities, we ask the closed season on bear be elim-

I. O. D. E. WILL GIVE PRIZES

High and Public School Pupils to Compete in Essay Writing—Discuss Memorial Question

Mrs. W. O. Rose has been appointed a delegate from the Kokanee chapter Imperial Order Daughters of the Empire to the annual provincial meeting which will be held in Vancouver. She was chosen to act in this capacity at a meeting of the local chapter yesterday afternoon.

The chapter has deciced to give a prize each to the public school and high school for the best essay written by a pupil in June. The subjects chosen will probably be historical and patriotic.

The committee appointed to receive nominations for officers for the ensuing year consists of Mrs. E. W. Crease, Mrs. Alex Leith and Mrs. K. Douglas.

It was decided at the meeting to vote that the proposed I. O. D. E. war memorial should take the form of a memorial hall. The provincial chapter asked all the individual chapters for opinions on the scheme.

BELIEVE SNOWSLIDE FATALITY AT GERRARD

Ole Nelson is presumed to have been buried in a snowslide at Gerrard, according to a wire received yesterday evening by Provincial Chief Gammon. As there is no police at Gerrard, Chief Gammon will send a constable from the nearest point to the town to investigate.

"Ma, I just hate this bread with holes in it."

"Don't be so fussy; you needn't eat the holes—leave 'em on your plate."

CHURCHMAN'S DINNER HELD

Annual Gathering at Strathcona of Memebers of St. Saviours Committee and Friends

About 125 men sat down to a dinner given last evening at the Strathcona hotel by the church committee of St. Saviours church. It was a "get-together" dinner, for the purpose of discussing plans for the church's work during the coming year. Members of the church committee acted as waiters.

Rev. F. H. Graham presided and in his address told his audience of the great opportunities which are before the laymen of the church for service at the present time. He urged on his listeners the need for coordination of the lay element of the church.

Among the speakers of the evening were George Johnstone, A. S. Horswill, T. L. Bloomer, R. G. Joy and W. Ebbs.

Between the speeches musical numbers were given by G. F. Stevenson, C. D. Rick and I. G. Johnston.

A large number of returned soldiers were guests at the dinner.

Three toasts were proposed, the first to "The King," the second to "The Church," and the third to the returned soldiers. After the toast to the King the entire assembly rose and sang "God Save the King." After the toast to the church, they sang "The Church Is One Foundation," and after that to the returned men the assembly enthusiastically joined in singing "For they are jolly good fellows."

The gathering closed with the pronouncing of the blessing by Rev. F. H. Graham.

POLICE COMMISSIONERS RATIFY GAMBLING ORDER

Ratification of Mayor J. A. McDonald's order that all gambling for money in the city must cease, was made by the police commissioners at a meeting held yesterday afternoon in the city hall.

HARRY CAIN BURIED IN NELSON CEMETERY

Harry Cain, who died on Saturday, was buried Monday in the Nelson cemetery. Services were held at St. Saviour's church, Rec. F. H. Graham officiating. The pall bearers were B. P. Steeves, Thomas Presley, W. Jeffs, James Welsh and F. L. Irwin.

SYRUP FROM ALFALFA SUCCESS

"Alfalfa for human food is one of the possibilities of the great agricultural states attracting attention among the farmers," remarked W. R. Thompson of Kansas at the Raleigh. "It has not been so many years ago that alfalfa as a feed for cattle came into popular use. Now I believe it will not be long until alfalfa in various forms will be served on the tables of our homes. Even now in some of the states there is alfalfa syrup which is said to be superior to other syrups. It is not sold generally, however. Alfalfa has long been recognized as a feed for cattle because of its tissue building properties, but not until the last two or three years has it been untilized in any manner for human food. As feed for cattle alfalfa is left to grow until it is about 35 or 40 days old and about half in bloom, when it is about 20 to 24 inches high and is woody and fibrous and too hard for human consumption. It has been discovered that alfalfa, if cut when it is from eight to 20 inches high and approximately 14 days old, before it has become woody and fibrous, may become a valuable human food product. Ground alfalfa combined with glucose and sugar makes, it is said, one of the finest flavoring extracts and alfalfa syrup may within a few years take the place of cane syrups and other syrups commonly in use."—Washington Post.

EVOLUTION

Pat was a greenhorn, just landed in New York. He went into a drapery establishment, there to purchase a hat, which he got. The price was a dollar, which is put on the counter to the Yankee. A monkey being employed as the cashier there, seized the gold dollar piece and put it into the till. Pat was about to go away when the assistant said: "I want a dollar for that hat, Pat, where's your money?"

"Thunder and turf man," said Pat, "didnt you see your grandfather taking it?"

AROUSED WILLIE'S CURIOSITY

Little Willie—Father, have you had another wife?

Father — Good gracious! Whatever makes you ask that?

Little Willie—Well, on the first page of this Bible it says you married Anno Domini 1880.—From the Edinburg Scotsman.

LOCATED

"Dear Clara," wrote the young man, "paddon me, but I'm getting so forgetful! I proposed to you last night, but really forget whether you said 'yes' or 'no'."

"Dear Will," she replied by note, "so glad to hear from you! I knew that I said 'no' to someone last night, but I had forgotten who it was."

Many a man fails to get there because he has dizzy feet.

Alkali in Shampoos Bad for Washing Hair

Don't use prepared shampoos or anything else, that contains too much alkali, for this is very injurious, as it dries the scalp and makes the hair brittle.

The best thing to use is just plain mulsified cocoanut oil, for this is pure and entirely greaseless. It's very cheap and beats anything else all to pieces. You can get this at any drug store, and a few ounces will last the whole family for months.

Simply moisten the hair with water and rub it in, about a teaspoonful is all that is required. It makes an abundance of rich creamy lather, cleanses thoroughly and rinses out easily. The hair dries quickly and evenly and is soft, fresh looking, bright, fluffy, wavy and easy to handle. Besides, it loosens and takes out every particle of dust, dirt and dandruff.

CLEANSES YOUR HAIR MAKES IT BEAUTIFUL, THICK, GLOSSY, WAVY

Try This!—All Dandruff Disappears and Hair Stops Coming Out.

Surely try a "Danderine Hair Cleanse" if you wish to immediately double the beauty of your hair. Just moisten a cloth with Danderine and draw it carefully through your hair, taking one small strand at time; this will cleanse the hair of dust, dirt or an excessive oil—in a few minutes you will be amazed. Your hair will be wavy, fluffy and abundant and possess an incomparable softness, lustre and luxuriance.

Besides beautifying the hair, one application of Danderine dissolves every particle of dandruff; invigorates the scalp, stopping itching and falling hair.

Danderine is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. Its exhilarating, stimulating and life-producing properties cause the hair to grow long, strong and beautiful.

You can surely have pretty, soft, lustrous hair, and lots of it, if you will spend a few cents for a small bottle of Knowlton's Danderine at any drug store or toilet counter and try it as directed.

It's a pleasure to notice that the cake of Gold Soap the grocer hands you looks larger, feels larger and *is* larger and heavier than any other cake of laundry soap you can buy at the price. You will find that the quality is better and that the soap goes farther. Higher quality and bigger quantity mean money saved. Every saving on a cake of soap counts.

Gold Soap is made in the Procter & Gamble Factories at Hamilton, Canada

The Big, Good Laundry

"Granny" Chamberlain

Influenza

"No one who has not had Influenza can realize the suffering it causes or how it defies treatment. I know of nothing that will give such prompt relief as Chamberlain's Cough Remedy, for when it is taken the pain in the chest disappears, the fever subsides and the whole body becomes more comfortable.

Then again, the after effects of Influenza are often even more distressing than the disease itself, but they can be avoided if you use

Chamberlain's Cough Remedy

Though the greatest danger from this disease is Pneumonia, I have never known a single case of Influenza to result in it when Chamberlain's Cough Remedy was freely given. The persistent cough that frequently follows Influenza can be relieved by Chamberlain's Cough Remedy, and should not be allowed to run until it becomes troublesome."

Yours for Health. —Granny Chamberlain

An Important Discovery Swollen Veins Relieved

That Absorbine, Jr., would relieve varicose veins was discovered by an old gentleman who had suffered with swollen veins for nearly fifty years. He had made many unsuccessful efforts to get relief and finally tried Absorbine, Jr., knowing its value in reducing swellings, aches, pains and soreness.

Absorbine, Jr. relieved him and after he had applied it regularly for a few weeks he told us that his legs were as smooth as when he was a boy and all the pain and soreness had ceased.

Thousands have since used this antiseptic liniment for this purpose with remarkably good results.

Absorbine, Jr., is made of oils and extracts from pure herbs and when rubbed upon the skin is quickly taken up by the pores; the blood circulation in surrounding parts is thereby stimulated and healing helped.

$1.25 a bottle at druggists or postpaid. A liberal trial bottle will be mailed your address for 10c in stamps. Booklet free.

News of Sport

SAY DR. MORAN WILL REFEREE PRAIRIE FIGHT

(By Daily News Leased Wire.)

REGINA, Jan. 21—It is stated in fistic circles in Regina that Dr. John A. Moran, of Saskatoon, who was pugilistic correspondent of the Associated Press at Philadelphia for several years, will be asked to referee the title fight to be held at the Strand theatre, Saskatoon, on Jan. 30, between Clonie Tait of Edmonton and Frankie Landers of Vancouver.

PHILADELPHIA TRADES OFF THREE PLAYERS

(By Daily News Leased Wire.)

PHILADELPHIA, Jan. 21.—Jack Coombs, manager of the Philadelphia National league club, tonight announced that Third Base man Emil Sick, Pitcher Dixie Davis and Catcher Dilhoefer had been traded to the St. Louis Nationals for Infielder Douglas Baird, Pitcher Gene Packard and Infielder J. S. Stewart.

There was no money consideration.

An eastern clergyman says kissing is a relic of the dark ages. However that may be, much of it is still done in the dark.

CURED OF DYSPEPSIA BY USING BURDOCK BLOOD BITTERS

The symptoms of dyspepsia are so numerous and diversified in different individuals that probably no description could exactly represent them as they occur in any given case, but a few of the most prominent are a rising and souring of food, pain, flatulence and distention of the abdomen, a sensation of discomfort after every meal which is sometimes followed by sickness and vomiting.

To get rid of dyspepsia a careful arrangement of the diet is necessary and due time must be given for the digestion of the meal.

You will find that Burdock Blood Bitters will help with this digestion, it does this by toning up the stomach in such a way that the dyspepsia soon disappears.

Mr. Robert Baldwin, Winnifred, Alta., writes: "I cannot speak too highly of Burdock Blood Bitters for curing dyspepsia, of which I have been a sufferer for years. I have tried a good many doctors and proprietory medicines, so one day I thought I would try something different. I got a bottle of B. B. B. from our local store, as it was about the only remedy he kept and I can certainly say that I was more than pleased with the results, as I got better right away. I will always recommend it to other sufferers."

CANADIENS ARE DEFEATED BY ARENAS IN 11-3 GAME

(By Daily News Leased Wire.)

TORONTO, Jan. 21.—The Canadiens met with a bad reverse in the national hockey league game here tonight, when the Arenas defeated them by a score of 11 to 3. The locals were all over the visitors from the beginning to the end and showed an all-around superiority that was amazing.

Newsy Layonde did not accompany the Frenchmen, and his absence had a demoralizing effect on the team. He injured his arm in the Canadien-Ottawa game last Saturday and may be out of the game for a week.

The Arenas surprised the large crowd by their good display. They outskated the Flying Frenchmen at all times and carried the play to them throughout the game.

The game was not nearly as spectacular as when these teams met here in their previous contests this season. The visitors played away below form and only Corbeau and Berlanquette were effective. The latter worked ceaselessly in his efforts to stem the tide. Line-up:

Arenas—Lindsay, Mummery, Randall, Skinner, Crawford, Noble. Substitutes—Denenny, Ritchie, Meeking and Adams.

Canadiens—Vezina, Hall, Corbeau, Couture, Pitre, Cleghorn. Substitutes—McDonald and Berlanquette.

Referee—L. Marsh.

Judge of Play—S. Vair.

HEYDLER WILL HEAR CASE AGAINST CHASE

(Special to The Daily News.)

NEW YORK, Jan. 21.—J. A. Hedler, president of the National league, announced today that he will hear the case against Harold Chase, first baseman of the Cincinnati team, on Jan. 30, instead of tomorrow, upon the request of Chase's attorney.

Chase was suspended indefinitely by Manager Mathewson of Cincinnati last August.

JAY KIRK AND COMPTON GET RELEASE FROM CLUBS

NEW YORK, Jan. 21.—Release of Jay Kirk, first baseman, and Peter Compton, outfielder, to the Louisville club of the American association, was announced today by the New York National league club.

C. C. AT CALGARY WIN ANOTHER GAME

CALGARY, Alta., Jan. 21.—The C. C.'s strengthened their hold on the senior league here last night by defeating the St. Marys to the tune of 4 to 3 in a hard fought game, full of combination play and heavy defense.

ADVISORY BOARD HOLDS MEETING

(Continued from Page Five.)

inated. That coyote hides be retained by those who receive the bounty.

Eleventh—Whereas, we have found instances where people who were not farmers have received free sample of seed from the govrnment and used the same for chicken feed, we urge the government not to distribute any seed except through the Farmers' institutes or through any other bona fide agricultural organization.

Twelfth—Whereas, the Brand Inspection act is not enforced satisfactorily to the ranchers in this district and whereas the brand inspector does not personally see cattle shipped, but in many instances gets his information from, others as to brands and number of cattle shipped. We ask the advisory board to impress upon the government the necessity of having the brand inspector present at point of shipment when stock is shipped, to ascertain the brands on such stock and number shipped and by whom sold.

Thirteenth—That the advisory board ask the government to continue gopher killing contests by children through the Farmers' institutes and to grant further aid for such purpose.

Fourteenth—Whereas, the Doukhobors do not live up to our laws and that disease and dissension have been and are being spread, we may ask that the government buy their lands and deport these people, placing the returned soldiers on such lands.

Mr. A. Harvey Smith of Nakusp was unanimously elected as representative to the advisory board. It was regularly moved and seconded that we form a district organization on similar lines as laid out by the Kamloops district organization and that we accept the constitution of Kamloops by-laws with exception of meetings, which will be decided by the executive.

The following officers were elected for the district association: President, T. Lawrence; first vice-president, S. T. Larsen; second vice-president, Mr. Endersby; acting secretary, C. C. Heaven.

The following were elected as executive pro tem: President, two vice-presidents, secretary and district representative.

Meeting was then adjourned.

S. T. LARSEN,
Secretary.

GIBSON WILL GET HIS RELEASE SOON

(By Daily News Leased Wire.)

NEW YORK, Jan. 21.—John McGraw, manager of the New York Nationals, announced today that George Gibson, the veteran catcher, will be granted his unconditional release as soon as waivers can be obtained from the other big league clubs.

HON. A. MEIGHEN WILL VISIT CALGARY SOON

(By Daily News Leased Wire.)

CALGARY, Jan. 21.—Hon. Arthur Meighen is expected here in the near future, Major Redman, M.P., states, to discuss the land settlement scheme.

IN HOSPITAL.

Hushed and happy whiteness,
Miles and miles of cots,
The glad, contented brightness
Where sunlight falls in spots.

Sisters sweet and saintly
Seem to tread on grass;
Like flowers stirring faintly
Heads turn to watch them pass.

Beauty, blood and sorrow,
Blending in a trance—
Eternity's tomorrow
In this half-way house of France.

Sounds of whispered talking,
Labored, indrawn breath;
Then, like a young girl walking,
The dear, familiar Death.

—Lieut. Coningsby Dawson.

ALSO, THEY'RE SO COMMON.

"The trouble with being a hero," said a soldier, "is the difficulty of acting up to the part." Which reminds us of what Admiral Dewey said in the height of his fame: "It is very pleasant to be a hero, but a continuous performance is hard on the nerves."

No matter how well you do a thing, you are likely to hear more complaints

BRAVE DOGS OF WAR

A certain fox terrier on the firing line in France has a record of having saved 150 lives, all fighting men, says the North Dakota Banner. There are many other dogs in France with honorable life-saving records on the battlefields. A regiment could be made up of soldiers saved by dogs that have run the gauntlet of fire to hunt for wounded and bring stretcher-bearers to them.

These dogs of war carried messages through zones of fire from trench to trench, rushing from cover to cover, but always going true to command, and bringing the messages, if not kiddel in the attempt. There are instances where dogs, after receiving mortal wounds, have crawled painfully along for hours to bring in their messages.

One of the admirable qualities of these trained dogs is the seriousness with which they take and execute dangerous missions. A well trained Red Cross dog will not be swerved from his business by hunger, fatigue or pain, obeys only his officer, and works to the point of exhaustion unless officially relieved.

Instances have never been wanting to prove that the Creator made no mistake when he made a dog; but this war brings out the fact most clearly.

SWANS OF YPRES

No town in the whole war zone has suffered more than Ypres, that old city of Western Flanders, with the exception of Rheims and Verdun. These three have been so shattered and maimed through the downright evil malice of the enemy that their streets and thoroughfares can be recognized only with difficulty.

"Pale as the Death of Ypres" is a popular saying in Flanders, that recalls the time in the Middle Ages, when Ypres was in the height of her glories and the largest manufacturing center and depot in Northern Europe of laces, silks, carpets and other costly fabrics; but only to be stricken down by the plague. Today "violent as the death of Ypres" seems a more fitting saying, because of the enemy's continuous shelling, before the retreat. Yet, though her inhabitants have been killed and dispersed, the swans of Ypres still cling to their ancient and habitual home.

Krupp's cannon have hurled their mightiest projectiles on this stricken historical town of Flanders, and bombarded her nigh continually since June, 1915, until the autumn of 1918. But still the swans are to be seen gliding gracefully on the water of the moat that surrounds the ramparts, just as if they deride the orgy of war which the German nation and their rulers provoked. These ramparts have not only withstood the wear and tear of the centuries, but also the solid brick walls have turned an unbroken face to the fiercest artillery which has ever shelled a city. Pitted and scarred they are, but in the immensity of their hardness and thickness never will be battered down.

And it is underneath the protection of these heavy walls that the swans of Ypres have lived throughout the hostilities much as they have lived throughout the past centuries. Here in the shrapnel-swept moat they have continued since the commencement of the war, surviving all the artillery assaults of these years. Here they have nested, and here they have reared their cygnets, amidst all the awfulness of the fighting around them.

Every British battalion of the Ypres area knows the swans, and when the stately birds began to make their nests last year, many were the wagers as to the probable length of their stay there. On one occasion a German shell burst within a short distance of the nest. But the brave sitting swan took no notice of the devastation, except that she fluttered a moment or two from the force of the concussion.

The triumph of the feathered pair came when, during the fearful fighting of the third battle for the city, two cygnets were hatched. So now, despite everything, there is a happy family of swans frequenting the waters of the old moat, and of the Zillebeke lake, that

large, artificial brick-built reservoir lying about 100 yards southeast of the town, and conected by an outlet with the Ypres moat. And a cheerful and pleasant sight they afford to the British soldiers' war-tired eyes.

CARELESS OF HER COCO

"Did she thro wherself at him?"

"No, she only tossed her head at him."

"Mercy! And she knew he wasn't a good 'catch'."

AT AN ARAB CLINIC

According to a writer in the Cornhill Magazine who describes a visit to Messopotamia, natives of one part of it have the rare advantages of a modern European clinic, which they all seem to appreciate greatly.

The work was not long in beginning, he says. E——, the surgeon, went into his own room, took off his coat, rolled up his sleeves and then emerged, hatless and ready for the fray. The rabble seethed round, all wanting to be attended to at once, while the interpreter vainly tried to get a clear tale of any one man's ailments. In the best Arab style E—— waved them back from him and threw his hands up in despair towards the heavens with a look of infinite distress. Then a space was made an an interpreter dragged forward a woebegone figure.

"This man say he have pain very bad in his belly, sir."

SWORD FOR KING ALBERT.

During the earliest days of the German occupation of Brussels in 1914 a project was formed to present King Albert with a sword of honor on his return to the city, says a Paris despatch. The model was made, and the artist who designed it carried it through the barrier into Holland, and from there came to Paris.

The sword has been made here. The hilt is of gold and platinum set with precious stones. It represents the Belgion lion overcoming the Teuton eagle. It will be sent to Brussels and will be there in time for the king's entry to the city. The names of the Brussels committee in charge of the project will be kept secret until the Germans have retired from the country.

PREFERRABLY THE LATTER

"Better not ask papa yet, dear; he has the gout in one foot."

"All right, I'll wait till he gets well or has the gout in both feet."

A man keeps his wife in hot water when she is forced to take in washing for him.

Mrs. W. J. Meagher and Miss McGrory will leave on the Crow boat this morning for Paris, Ont., where they have been called by the illness of their sister.

Miss Frances Emily Whitehead was married yesterday to William Graham. The ceremony took place at the home of the bride of Hendrix street, Rev. D. T. McClintock officiating. The bride was given away by her father, Albert Whitehead, of Willow Point. Robert Smith acted as best man and Mrs. J. M. Mitchell attended the bride. After a dainty lunch the couple left on the Kettle Valley train for Vancouver for their honeymoon. On their return to the city they will take up their residence on Hendrix street.

TOSS A COIN TO SEE WHO SHOULD GO TO CHAIR

NEW YORK—An alleged proposal of a murder suspect that he and four others should flip coins to "see which should take the blame for the murder and go to the electric chair" was described by William Kirk, a chauffeur, at the trial yesterday of James P. ("Bull") Cassidy, one of the four men indicted for the murder and robbery of Otto Failla, a subway ticket agent last November.

Kirk, who admitted he drove the auto used by the alleged bandits, but who has not been indicted, testified that Cassidy a pugilist, made the proposal in the district attorney's office while he, Cassidy,, and the three other suspects were awaiting examination. His refusal, Kirk sad, prevented adoption of the plan.

Kirk testified that he received $9 as his share of the $62 which the bandits obtained.

Cassidy, alleged to have been the leader of the gang, is being tried separately. The others indicted are Joseph Usehoff, James Milano and Charles McLaughlin, all of New York.

A CONDITION

Bertha—What did father say when you asked him if you could marry me?

Percy—He didn't really refuse, but he made a very severe condition.

Bertha—What was it?

Percy—He said he'd see me hang first.—Exchange.

FATE, THE OPERATOR

"Do you believe that marriage is the result of soul calling to soul?" asked the sentimental person.

"No," replied the cynic. "If that were the case there wouldn't be so many people in the divorce courts claiming they got the wrong number.

Conductress (to passenger earnestly studying ration book)—"Are you the gentleman with the two insides?"

Inquiry Into Rates at Smelter Opens; Members Go to Trail

The inquiry of the government commission composed of S. S. Fowler, chairman; Ivan DeLashmutt and James Anderson, into smelter rates, opened in Nelson yesterday. The opening session was largely of a routine nature and was devoted chiefly to preliminaries.

The chairman stated that the commission was anxious to hear the evidence of everyone who had any to offer, or who wished to make suggestions or offer criticisms. This evidence would be accepted either if given orally or in documentary form. He stated that the committee had decided that it would, if requested to do so, hear any evidence en camera and would give assurance that it would be treated as confidential. It was explained in this connection that some of those who were able to give evidence bearing on smelter rates were loath to do so if it would expose the details of their mining business or of the concerns by which they were employed. There, the commission decided that if requested to do so it would treat such evidence as confidential.

Today the commission will go to Trail smelter and begin its inquiry.

Within the next few days a circular will be sent to mining men throughout the district inviting them to give evidence to the commission. This circular is in addition to the extensive advertising which the commission has carried out, it being the desire of the commission to get into touch with every possible source of information and to hear of any criticisms or suggestions which mine operators or others have to offer.

TWO INCHES OF SKI LEADS TO DISCOVERY OF MINER BURIED BY BIG SNOWSLIDE

VICTOR NELSON'S BODY FOUND UNDERNEATH FOUR FEET OF SNOW BY GEORGE CREIGHTON NEAR MOLLY GIBSON MINE—YOUNG MAN WAS TRAVELLING ON SKIS TO KITTO'S LANDING, WHERE HE INTENDED BOARDING BOAT FOR NELSON TO SEE DOCTOR—BODY BROUGHT TO CITY LAST NIGHT

Two inches of a ski sticking out of the snow led to the discovery of the body of Victor Nelson, who had been missing from the Molly Gibson mine, since Saturday and was caught and carried to his death by a snow slide, as had been feared.

The body was found by George Creighton about 3.30 Monday afternoon, buried head downwards at the edge of the slide about 800 feet below the Milly Gibson mine. Mr. Creighton brought the body down to Kitto's Landing, a distance of about 13 miles, by tobaggan, ariving at the landing in time to put the body on board the Nasookin at about 7 o'clock. It was brought into Nelson last night.

Going to See Doctor

According to Mr. Creighton's statement, Nelson left the Molly Gibson mine, where he was employed as a miner, at 1 o'clock Saturday afternoon, with the intention of coming into Nelson to see a doctor, as he was not feeling well. He was travelling on skis and was going down to Kitto's Landing, a distance of 13 miles from the mine, where he intended boarding the Nasookin and coming into the city.

He had not left more than five minutes when a big slide occurred about on a level with the mine, but sweeping across at an angle. The slide was about 100 feet long and 300 feet wide. It was later discovered that the slide had taken out one of the towers on the tramway from the mine to the mill and also had swept away the telephone connections. At the time the slide happened little notice was taken of it, as during the recent warm weather snow has been coming down all the time.

Missed Him Sunday

No anxiety was felt about Nelson until J. Ramstad, shift boss at the mine, made his way down to the mill, a distance of two miles, Sunday noon. In the course of conversation he casually asked if the man had passed the mill on his way to the landing. On learning that Nelson had not been seen Mr. Ramstad immediately phoned to Mr. Creighton, who is in charge of the landing, asking him if the man had arrived there. Mr. Creighton replied that he had not seen him.

It was then surmised that Nelson, being an expert ski jumper, might have taken the road to Nelson. A phone call was put through to Chief of Police Long, asking him to go through the hotels to see if the man had arrived in town. After a search Chief Long telephoned that he could find no trace of the man. Chief Long also notified Provincial Chief Gammon, who stated that he believed the man had not reached Nelson.

By that time it was thought that something had happened to the man, but it was then too late in the day to institute a search party, as was decided that it would be nothing short of suicide for any men to go out at night owing to the many slides in the vicinity. However, W. M. Archibald of Rossland, manager of the company, was telephoned for instructions. He ordered a search party to be sent out first thing next morning.

Early Monday morning Mr. Creighto and another man left with shovels and snowshoes for the region of the slide.

Buried in Snow

After a long search Mr. Creighton discovered the body of the missing man buried in about four feet of snow on the edge of the slide, only two inches of his ski being visible.

He brought the body down to the boat landing and last night put it aboard the Nassokin to be brought to Nelson. It is now in the city, but no arrangements have been made for the funeral.

Nelson was a single man, about 22 years of age. No relatives are known to be living in this country. His mother lives in Sweden.

As Dr. L. E. Borden is out of the city it has not yet been decided whether an inquest will be held.

Seven of the employees are ill with influenza at the Molly Gibson mine. James Lamont, a brother-in-law of George Creighton, was taken ill with the disease at the mine, but made his way down to the landing by the mine's tramway, and is now being cared for at Mr. Creighton's home. Another man who was taken ill with influenza at Camp One came into Nelson yesterday for medical attention.

HUDSON'S BAY TO TAKE SOLDIER EMPLOYEES BACK

The repatriation question is dealt with in a letter received by W. S. King manager of the Nelson branch of the Hudson's Bay company from the governor of the company. The letter states that the company has decided that every man or woman member of the staff of the company who enlisted for service in the war shall be taken back and given work. If a position is not open at the time application is made pay is to begin at once, from the date of application. If the position held before enlistment is not available a similar position will be given. A letter to this effect has been sent to every member of the staff of the company who has enlisted.

ANOTHER FISH STORY

"But, Tommy, dear, where is the big trout you said you caught?"

"Oh, er, that one! Why-y-yes, of course—well, I took that trout, and it looked so good I choked it and ate it on the spot. And speaking of eating, Maude, I wish you'd hurry up that dinner. I haven't had a mouthful all day."

And then Maude, for the first time, doubted her husband's veracity.

HAVE THE CITIZENS OF NELSON CONFIDENCE IN THE FUTURE OF THE TOWN? IF SO, THEN

BOOST

1. Tell all strangers that business is good and that there is no place in the world like Nelson.

2. Back up your words and make business good by patronizing home business places, particularly those controlled by men who devote their time, money and ability to a score of activites which are non-remunerative but essential to the life of any city. I refer to such lines as Board of Trade, Church, Y. M. C. A., Hospital, Patriotic Work, Sports, etc.

3. Get out and work yourself. The load of carrying on the activities just mentioned has been left to a comparatively few people. Get in and carry your share, or get out. Your place is at the south end of Falls Street.

4. Be a real citizen and own your own home. Values are at rock bottom now. Anticipate the future. Buy home and improve it. Your interest in the town by owning a home is intensified. You will then urge and insist on much needed improvements, and will take an added interest in civic matters and you will be much more likely to take a lively interest in all activities tending towards the upbuilding of the city. In short, you will be a real, live, patriotic Canadian citizen.

Eyesight

One would not lose his eyesight for a million dollars, but many lose it through carelessness. Eye-weariness can be remedied by correct treatment. Don't leave it until it is too late.

J. J. WALKER
JEWELER AND OPTICIAN

TREHERNE REPORTS ON INVESTIGATION

(Continued from Page Three.)

that large apple trees covering an acre or more can be economically treated by hand during May.

The autumn flight of winged forms occurred at the latter part of September, elm trees acting as secondary host plants. Lady-bird beetles, in certain places, were active in controlling this aphis, in some instances completely cleaning the trees.

Pear and Cherry Slug

The pear and cherry slug was present in considerable numbers in many orchards of the Okanagan valley. Eggs were being laid around May 15 this year. First generation slugs appeared on June 19 and 20, and these formed pupar about July 10 until —uly 21. A second generation appeared in August. Spray application of arsenate of lead should be applied at the latter part of May or early June if considered desirable owing to pressure of other orchard operations.

Pear Psyllia

Some specimens of the pear psyllia were taken at Nelson, B. C., this spring. This insect is described in Bulletin 387 of Geneva, New York, experiment station, 1914, as "probably the most troublesome insect attacking the pear."

It is interesting to note that this insect occurs in British Columbia; although, so far as known, its presence has not yet been recorded in the west, north of California. No reports of injury by this insect have as yet been received in British Columbi its presence only being made known by casual collecting.

Alfalfa Seed Chalcis

This insect, injurious to the successful cultivation of alfalfa seed, is reported for the province for the first time this year. It was taken during the past sumer at Keremeos, Kaleden, Penticton, Kelowna, Vernon, Lytton and Lillooet, and doubtless occurs at all points in the dry belt. No information has as yet been obtained as to its life history or habits in the province of British Columbia. In some sections this past year 50 per cent infestation prevailed:

Greater Wheat Stem Maggot

This insect was taken this year at Armstrong, Enderby, Salmon Arm and Kamloops. So far as is known this is the first record in British Columbia literature. Small green maggots enter the stem just above the top joint and all points above, including the seed head wither and turn white.

Adults emerged from infested straw in July. Life history notes in British Columbia have not been carierd beyond this point, but it is believed that adults lay eggs in volunteer plants, grass and fall wheat near the soil surface. The injury to fall wheat is supposed to be more serious than the injury caused by the generation operating in June and July. Two or three geenrations probably occur in a single season.

Apple Maggot

This important insect has been taken in considerable numbers, breeding in the native snowberry, Symphoricarous racemoss, and may be found, doubtless, wherever this plant exists in British Columbia. It has been taken, for instance, this year at Victoria, Lillooet, Lytton, Aggasiz, Chilliwack, Okanagan Valley, Nelson and Creston. It ranks in the eastern sections of Canada and in Eastern United States as one of the most important apple-infesting insects. In British Columbia it has been found associated with the snowberry alone, no apple-infecting form being taken as yet. It may, therefore, rank as a psychological variety attracted to the snowberry by chemotropic relations.

Tussock Moth

The moth has been taken off Douglas fir at Chase, Salmon Arm and Hedley. In some cases it caused considerable "stripping" of the foliage, but has been recorded principally by the fact that the caterpillars' hairs cause a pronounced rash on the skin of human beings.

The Pear Leaf Blister Mite, the Tarnished Plant Bug and the Cyrant Fruit Fly have caused considerable injury to fruits they attack. Their sphere of influence, doubtless, has enlarged in recent years.

The False Chinch Bug, Nysius Ericae, occured in considerable numbers on the range land in the vicinity of Vernon during the summer of 1918. Great annoyance was caused householders in the neighborhood, but no serious results occurred.

Codling Moth

This moth has been studied during the seasons of 1916, 1917 and 1918, with a result that should the conditions arise making it necessary to publish instructions for control, the entomological branch will immediately be in a position to do so, giving local conditions and spray dates.

Unfortunately this destructive moth still constitutes a direct menace to the fruit growing industry. At Westbank and at Walhachin the situations are most hopeful. Only nine worms were taken in the former locality during 1918 and none in the latter.

At Okanagan Landing the situation has developed a most tantalizing stage. In 1915, 5000 worms were taken; in 1916, 3000; in 1917, 550; in 1918, 112. In this infestation no worms were found after the middle of August, a hopeful sign and one which offers satisfaction after the expenditure of considerable sums of money. Unfortunately, however, in orchards half a mile distant, east and north, moth migrations took place in midsummer, which resulted in 257 worms being taken after October and during November. These orchards now found to be infested were either never before infested, or had been free of infestation for two years. Band inspections and orchard patrol work, however, had been maintained during the past few years, resulting in the present degree of attack.

Furthermore, 17 worms were found in the city of Vernon. A total number of codling moth worms, chrysalids and infested apples, of 386 were found in the whole Vernon district this year over actually a wider area than ever before. The outlook, therefore, is not good and very strenuous action should be necessary during 1919 involving at least 100 acres. There are approximatey 200 acres of apple orchards in the city of Vernon limits in immediate proximity to the present known area of infestation, which are threatened and which should receive consideration this coming year. Inasmuch as this acreage is divided up among a large number of small holders, if invasion takes place eradication will be impossible unless very strenuous action is taken.

Insecticides

All fruit growers and farmers are advised to make due and proper arrangement to obtain their supplies of insecticide material for the coming season. Lime-sulphur, arsenate of lead, nicotine sulphate, bran, molasses, Paris green, white arsenic, whale oil soap, arsenate of lime, lime, and copper sulphate are among the necessary requisites.

RIOT OF COLOR

Mrs. Bacon—Where would you look for a riot of color? In the garden?

Mr. Bacon—No, in the kitchen.

"In the Kitchen?"

"Yes, in the kitchen, when the pot calls the kettle black."—Yonkers Statesman.

COULD CHARGE BIGGER FEE

"I guess that young doctor hasn't been practising long."

"Why do you think that?"

"He told a friend of mine he was suffering from 'loss of appetite,' whereas an older doctor would have called it 'anorexia'."

Hay

We have Hay for all kinds of stock, and have good hay of each kind. Our Timothy is better than the average for this year; our Alfalfa is green and well saved and our Prairie Hay is also good quality. We also have some No. 2 Timothy.
