GERMAN ASSEMBLY RATIFIES TREATY

COUNCIL OF AGRICULTURE IN SESSION

PESSIMISTIC STOCK AND CROP REPORTS FROM SOUTHERN ALBERTA.

HALF MILLION HEAD OF CATTLE FACE STARVATION

Manitoba to Have Bumper Wheat Harvest—Delegates Demand Fixed Prices.

WINNIPEG, July 9.—Half a million head of cattle in southern Alberta are on the verge of starvation and their plight is such that immediate steps on a considerable scale must be taken if they are to be saved. Such is the pessimistic report of delegates assembled here today for the meeting of the Canadian Council of Agriculture. The continued drought has destroyed all feed and the council today had under advisement what relief measures it could recommend the government to save the industry. Delegates from both Alberta and Saskatchewan were gloomy about the crop outlook in their respective provinces and *predict a hard winter.*

So far as the stock are concerned, suggestions are offered to the extent that if transportation is made available they can be taken to northern Alberta and even as far as the Peace River country, where feed is plentiful, or to northern Manitoba, this province *having had plentiful rains, and its* northern mixed farming areas being capable of supporting a large herd of stock.

Small Wheat Crop.

As to the spring wheat crop, it is a total failure in southern Alberta and the average yield for that province will be low. In Saskatchewan recent rains have done much to improve the outlook, but most sanguine estimates do not go beyond a 15-bushel crop for *the entire province.*

In Manitoba, on the other hand, the crop has never looked better, particularly in the central and northern districts, where yields of as high as 40 and 50 bushels to the acre are confidently predicted.

Unless unfavorable weather conditions intervene, Manitoba should harvest one of the best all-round crops of her history. The chief danger ahead is from rust, as there has been *a great deal of moisture and hot, muggy* weather might conduce to conditions favoring this disease. But at present it is cool with bracing winds.

The wheat crop is a couple of weeks ahead of the average year, and cutting will start at the end of July and harvesting should be completed in the province before there is danger of late autumn frosts.

The council of agriculture, which is attended by delegates from all over the Dominion, will be engaged tomorrow on political topics, chief among which is the price and marketing of the present crop.

Want Fixed Prices.

The delegates seem pretty much a unit in desiring that the Dominion government should get into line with the United States and other governments in fixing the price of 1919 wheat.

The fear that if this is not done they will be liable to exploitations by *the narrow market that will be con*trolled from Winnipeg, for the Winnipeg grain exchange will be practically the only open wheat market in the world, if the price is not fixed.

It is, however, more or less of an open secret that the executive of the Winnipeg grain exchange is by no means enthusiastic at the prospect of having again and under present conditions an open wheat market after the war measure close-down of the past two or three years. Such a market would have no world markets, such as Chicago and Liverpool, to lean upon, and would be in the position as far as its critics among organized farmers are concerned of seeming arbitrarily to set prices. In the interest of the future of the grain exchange itself a good many of its members feel that it would be unwise to establish an open market, especially as it would be liable to be closed down later on by the Dominion government in the event of the latter finally seeing the advisability of setting a fixed price for this year's wheat crop. Altogether there is more unanimity than might have been expected in the west in favor of a fixed price for wheat.

NEW COMPANY TAKES OVER CONTINENTAL OIL

WINNIPEG, July 9.—The Continental Oil company interests in western Canada have been taken over by a new company known as the North Star Oil & Refining Company, Limited, and the head office of the company will be located in Winnipeg, it was announced today. The deal is said to involve about $5,000,000. The Continental Oil company has operated plants in the prairie provinces at many points, including Winnipeg, Brandon, Swift Current, Regina, Saskatoon, Prince Albert and other smaller towns.

SIR THOMAS WHITE HAS NOT ACCEPTED POSITION

TORONTO, July 9.—Sir Thos. White, *who is at his home in* Toronto for a few days, stated tonight that reports which have appeared and are appearing in the press to the effect that he had been offered and had accepted an executive position with some railway corporation, or bank or life insurance company, were entirely without foundation and were unfair to the men occupying the positions which have been mentioned. The minister stated that he had made no financial plans whatever for the future.

VANCOUVER LABOR DESERTING O. B. U.

LAND SLIDE BACK TO CRAFT UNIONISM IS REPORTED, DECLARES THE SUN

Feeling Is Reflected By Replies to Circular Sent Out by Theatre Workers

VANCOUVER, July 9.—The Sun tomorrow, will say: "A land slide back to the fold of organized labor and the craft unions is reported as a result of the circularization of the Vancouver unions by the Theatrical Federation. The federation sounded local unions on the proposition to break away from the Vancouver *Trades and Labor council on account* of the assistance given the organization of the One Big Union body, and two unions in their answer are said to have reported favorably on the proposition to form a Central Trades council in case the Trades and Labor council throws up or loses its charter in the Dominion Trades Congress and the American Federation of Labor.

"Trese two unions are the Boilermakers local No. 194 and Machinists local No. 692. They are in addition to the Barbers and the Theatrical trades, including musicians, while the Cooks and Waiters are représenttd to view the proposition with some *sympathy.*

Return to Fold

"By the time the One Big Union spellbinders had finished their work *in the Boilermakers local No. 194* about two months ago, there were said to be perhaps 50 members left who remained loyal to their international. Now there are said to be more than 700 members, most of whom changed their minds about the O.B.U. The Machinists local No. 777 was practically wiped out by the exodus to the O.B.U., but starting from practically nothing it is now about 200 strong. Machinists local No. 182 is said to have practically escaped the upheaval that struck the sister union.

"Rumors in labor circles are to the effect that the Stationary Engineers *who went O.B.U. now want their old* charter back in their international, while the shipyard laborers are said to have made the switch to One Big Union and back again. The whole local of the Blacksmiths went O.B.U. and the charter lapsed, but there is said to be some movement among the membership toward taking up the old charter again.

Are Cleaning Up

"Altogether veteran labor leaders who were more or less dropped overboard by the radical element feel that things are looking up, and that despite the disastrous effect of the recent strike labor will be back *strong in the near future.*

"'We will have the house nice and clean by the time the organizing forces of the Dominion Trades Congress and the A.F. of L. reach Vancouver,' said one veteran labor man.'

PRINTERS OBJECT TO ONE BIG UNION

Saskatoon Typos Demand That Labor Council Take Definite Stand

SASKATOON, July 9.—The Typographical union of Saskatoon caused trouble in the ranks of the trades and labor council when, at the meeting of the council tonight, a letter was read from the typos demanding that the officials state clearly their stand with regard to the One Big Union. The letter further stated that members of the union who were recently elected to office on the council would be forbidden to occupy their position if the council favored the One Big Union scheme. The matter caused considerable discussion, the officials absolutely refusing to make any statement. The installation of officers had to be postponed owing to the action *of the typos' union.*

A labor church for the city was decided on and the first meeting will be held on Sunday at the city park if permission is granted.

An appeal was made for every union to vote one day pay of each member for the defense fund of the Winnipeg strikers.

AGENT IS SENTENCED

WINNIPEG, July 9.—Frank Horrock, a life insurance agent, formerly with the London Life company, was today sentenced to one year in jail with suspended sentence for defrauding his employers. *The accused was* found guilty by a jury in Mr. Justice McDonald's court Tuesday afternoon.

R-34 STARTS LONG VOYAGE TO SCOTLAND

MAJOR SCOTT EXPECTS TO RECROSS THE ATLANTIC IN 70 HOURS

BIG SHIP CIRCLES OVER NEW YORK CITY

Thousand Men Held Great Gasbag *in Leash Until* 11.55 Last Night, When She Was Released

MINEOLA, July 10.—The R-34 flew over Roosevelt Field after her cruise to New York at 1.30 a.m. at a height of about 2,000 feet. When last seen she was heading for the open sea.

Over Harlem River

NEW YORK, July 9.—The British dirigible R-34, en route to Scotland, was *sighted over the Harlem River* at 12.55 o'clock, heading south for Lower Manhattan.

Cruised Over Gotham

NEW YORK, July 10.—The R-34 was last sighted here when put out toward Long Island Sound at 1.16 a.m., after a cruise over the city, and faded from sight. She was headed almost due east.

On Return Voyage

MINEOLA, July 9. — The British dirigible R-34 left Roosevelt Field shortly before midnight on her return cruise to East Fortune, Scotland.

The great ship held in leash by 1,000 balloon men, was released at 11.55 p.m. and floated leisurely up to a height of 200 feet with motors *silent. The motors then began to* whirr and the craft, nosing upward, headed for New York. Three great searchlights played on the ship, making her clearly discernible to the thousands who had gathered to bid her bon voyage.

With three engines—port, starboard and forward — running and two others in reserve, she glided off toward the south, then swung in a westerly course bringing her nose in the direction of New York.

Three Minutes Rising

It took the R-34 about three minutes to rise to the height at which she began cruising. At 11.59 she was *about 500 feet up, barely discernible,* and with no lights visible she was skimming at a speed of about 35 to 40 miles an hour. Brig.-General Charlton, British representative in the United States, said that the ship would employ the three engines only on which she started, unless unexpected conditions arose. With favorable weather conditions, Major Scott hopes to make the voyage in 70 hours, sailing over London before he proceeds to Scotland.

The great ship presented a beautiful picture as she drifted up into the sky, bathed in the white light of the three powerful searchlights. Just *as she nosed out of Roosevelt Field* the moon appeared from behind black clouds, partially lighting up the dark field.

At 12.01 o'clock lights along the deck of the dirigible, which runs the entire length of the envelope, were switched on and the great ship herself appeared a long streak of light swinging in the radiance of searchlights.

Up to 12.01 the R-34 had drifted sideways in the current of the west wind. She then swung into the wind, sailing about 900 feet and one minute later disappeared from the view of the crowds at Roosevelt Field.

"All Clear at 11.50

It was just 11.50 o'clock when a bell rang aboard the R-34, signalling that the hour of departure was at hand, and officers on the ground with megaphones called "all clear."

Major Scott, leaning out of the port window, afterwards cried, "Cast off." Just before the departure the wireless officer stated that he expected to keep in radio touch with Roosevelt Field for two or three hours after the start.

The great ship was straining and tugging at he ropes which held her to the ground, when the start came. "Like a diver on a spring board, *taking his last breath before diving,* the R-34 is taking her last breath of hydrogen," General Charlton said. "A sudden gust of wind would take her away."

A few minutes later the command to cast off had been given, and with the British Union Jack fluttering at her bow and a naval ensign at her stern, the great ship soared aloft.

After her first disappearance at 12.02, the big dirigible again became visible at 12.05. A moment later as the ship sailed over Mineola field, musicians sounded "Taps" as a sign of good-bye. The outline of the R-34 became more and more faint, fading *finally to a spot of light* which disappeared at 12.18.

To Visit London

Favorable weather conditions were reported tonight over the Atlantic route, save for one bad spot in mid-ocean.

Forty pounds of mail is stored aboard, including two gold medals of the Aero Club of America to Captain Alcock and Lieut. Brown, who flew

(Continued on Page Two)

TRIED TO PURCHASE A TITLE WITH INVENTION

LONDON, July 9 (Canadian Associated Press).—Charles Hannan, the author, has issued the text of a curious correspondence between himself and the government regarding his claim to be an inventor of smoke boxes against submarine attack.

Mr. Hannan claims his invention was adopted, but his stipulation that the reward should be a "good old-fashioned knighthood and pension equivalent" was ignored. In February he was informed "it was not found possible to place his name in the present honor list, but you shall again receive consideration."

However, *no knighthood* was forthcoming, and Mr. Hannan now presents the correspondence to the public.

ITALIAN PREMIER LOOKS TO PEACE

TELLS CHAMBER OF DEPUTIES THAT INDUSTRY MUST BE REBUILT.

Declares Government's Foreign Policy Will Be a People's Policy—Senate Reforms.

ROME, July 9.—Premier Nitti, in a speech before parliament today, urged that the peace negotiations should be concluded and that friendly relations with the allies, especially France, be maintained.

The premier informed the deputies *that all efforts should be* made to reestablish the country on a peace footing to lower the price of necessities and bring about, orderly conditions throughout Italy.

Examining into the situation Signor Nitti said: The present state of unrest is not peculiar to Italy. Indeed, there is less in Italy than in the other nations which have just emerged from the war. The premier admonished the people to work harder and said they must aim towards a great effort of reconstruction. He declared that the country must stand now as it did before, alone against a numerically superior enemy. The people, however, he said, must know the truth—must know the situation thoroughly—so as to be able to direct all efforts toward the same object. The supreme duty of the government, Signor Nitti continued, was the defense of liberty and order, without which Italy's position would be weakened, especially *abroad,* where it had been impossible as yet to find a solution of the Adriatic question.

After repeating the government's *foreign policy as outlined to the sen*ate by Foreign Minister Tittoni, he added:

"Our foreign policy must be the true policy of the people. The epoch of secrets—the epoch in which constitutional nations entered into alliances or into war without the people's knowledge must be definitely ended for Italy."

Concerning the internal policy, Signor Nitti said he supported the reform of the senate to form it into a partially electve body. He also advocated electoral reform for the chamber of deputes. He also urged the curtailment of expenses and consolidation of revenues, and announced a new tax by which the revenues would be augmented by $500,000,000, the new revenues to be raised chiefly through a progressive income tax on incomes growing out of the war.

Premier Nitti announced that the army would be demobilized as soon *as the international situation and in*ternal order allowed. He said that the government, to save fuel, intends to electrify nearly 4000 miles of railroad, utilizing water power. The railways of the Po valley will be transformed from steam to electricity, the water falls of the Trentino being used for this purpose. Special attention will be given to aviation, the premier asserted, making Italy the "world aviator centre."

Signor Nitti deplored manifestations, "fortunately isolated," aiming to sow distrust between Italy and her allies. "Some unpleasant incidents which have occurred at Fiume and in some other cities have been explained," the premier went on. "France and Italy have many virtues in common, but also some defects, among which is that of being easily excited over small episodes. No episode can alter the relations between the two countries consecrated by blood shed *together. Democratic France must* realize that Italy trusts in her friendly cooperation for the development of her national program.

"The hour is critical, perhaps the most critical in the history of Italy. But we have firm faith that Italy possesses the energies necessary not only to surpass the present difficulty, but to give this country the place it deserves in the world. We will win because it is necessary to win, because we must win."

The Italian government, according to the premier, is losing $500,000,000 yearly in the purchase of wheat for bread, and any further reduction in price below cost would mean ruin. The present problem, he declared, consisted of approximating the cost price to consumer after the elimination of the middleman.

"Whoever speaks of revolution in the present condition of production and exchange must be considered an *enemy of the people. If revolution is* an evil in countries having sufficient raw materials it would be suicide in a country like Italy."

TEUTONS FIRST TO ACCEPT THE PEACE DOCUMENT

PRESIDENT EBERT MUST SIGN RESOLUTION BEFORE IT GOES INTO FORCE—208 VOTED IN FAVOR OF TERMS TO 115 AGAINST—ALL DOUBT OF ACCEPTANCE REMOVED—IT IS NOW POSSIBLE FOR THE ALLIES TO LIFT THE BLOCKADE OF GERMAN PORTS—COUNCIL OF FIVE DECIDES TO LIFT COMMERCIAL CENSORSHIP OF COMMUNICATIONS.

WEIMAR, July 9.—Via Coblenz.—The resolution ratifying the *peace treaty was adopted by the* German national assembly here today by a vote of 208 to 115.

CAN RAISE BLOCKADE.

WASHINGTON, July 9.—Ratification of the peace treaty by the German national assembly removes all doubt of the acceptance of the terms by Germany.

The national assembly, by ratifying the treaty, makes it possible for the allied and associated powers to raise the blockade.

Official notification was sent Germany June 29 that the blockade would be raised when the treaty was ratified. Placing this condition on the raising of the blockade was looked upon in peace conference circles as a sure plan for securing speedy ratification by Germany.

The council of five on Monday decided to lift the commercial censorship on communications with Germany simultaneously with the removal of the blockade.

EBERT MUST SIGN.

Promulgation of the resolution ratifying the treaty is dependent upon the signing of the resolution by President Ebert.

When three of the principal allied powers, *in addition to Germany,* have ratified the treaty it becomes effective for those who have ratified it. After Germany *and the three allied powers have* ratified it, the treaty will come into force for each other power on the day when it notifies the peace conference secretariat of its ratification.

The German national assembly is the first elective body in any country whose representatives signed the treaty to adopt a ratifying resolution. The treaty has been laid before the British, French and Belgian parliaments and will be placed before the senate of the United States tomorrow by President Wilson.

TEXT OF RESOLUTION.

The text of the ratification resolution as introduced in the national assembly consisted of two clauses, reading as follows:

The peace treaty between Germany and the Allied and Associated Powers signed on June 28, 1919, and the protocol belonging thereto, as well as the agreement relative to the occupation of Finland signed the same day, are agreed to.

"This law comes into force on the day of its promulgation."

"WE ARE ABOUT TO ENTER UPON A 40-YEAR MARCH THROUGH DIRT," MUELLER

WEIMAR, July 9 (The Associated Press). — Ninety-nine deputies abstained from voting on the resolution to ratify the peace treaty. Most of the ministers were present at the meeting of the assembly and there was a full attendance of deputies.

Dr. Herman Mueller, the foreign minister, in introducing the government bills, explained that hastening on the ratification order would bring about the lifting of the blockade.

"We are about to enter upon a 40 years' march through dirt," he said. "I can find no other term for the path of suffering fulfillment of the treaty prescribed for us."

Dr. Peter Spahn, leader of the Catholic Centre Party, said: "We agree to the treaty under hard compulsion, to save ourselves from anarchy and to preserve the fatherland from international ruin."

Violent Protests

Herr Kreizig, Socialist; Professor Schuecking, Democrat; Dr. Traub, National party, and Herr Kahl, People's party, all spoke, violently protesting the injustice of the treaty, the impossibility of its fulfillment and declaring that the day of Germany's liberation would come.

These speeches were greeted with such turbulent applause and hand clapping that the president of the *assembly, Herr Ferhenback,* called attention to the fact that hand clapping was against the rules. Similar speeches were made by other members and were greeted with similar applause.

The National party introduced an amendment in favor of ratifying the treaty with the reserve that the sanction of international law experts of repute be first obtained concerning articles 227 to 230, and that a court of nations be created to investigate the responsibility for the war. In the course of the debate, Pres. Fehrenback protested against Alsace-Lorraine being torn from Ger*many. He said that the treaty of* 1871 simply made good what had been taken from Germany 150 years before. He hoped that the people of Alsace-Lorraine would preserve their German character, customs, etc.

Charge Against Ex-Kaiser

Part seven of the peace treaty, comprising articles 227 to 230, relates to penalties. Article 227 arraigns the former German emperor for "A supreme offense against international morality and the sanctity of treaties."

The other article relates to the bringing before military tribunals of persons accused of having committed acts in violation of the laws and customs of war; to the handing over of these persons by Germany, and to an undertaking by the German government to furnish all documents and information of every kind bearing on these offenses and violations.

FIRST DIVORCE DECREE GRANTED IN MANITOBA

WINNIPEG, July 9.—The first decree of divorce granted in Manitoba was given today by Chief Justice Mathers in the court of King's Bench, when Myrtle Corneliuson was granted an absolute decree, divorcing her from her husband, Louis Corneliuson. The contending parties are residents *of Brandon, Man.* Grounds for divorce were infidelity on the part of the husband. The original application in case was made before Mr. Justice MacDonald in the court of King's Bench in July, 1918. A decree nisi was granted at that time, but the decree absolute was held up pending the privy council decision in the Walker vs. Walker case.

PASTOR FAILS TO DEFEND CHARACTER

Principal Witnesses to New Brunswick Divorce Action Do Not Appear.

FREDERICTON, N. B., July 9.—Rev. W. N. Stackhouse, the Baptist minister who left his Doaktown, N.B., pastorate suddenly last winter and was later named by the wife of a sol*dier overseas as the father of a child* which was born to her, did not appear in the New Brunswick divorce court this morning to defend his character as he *promised to do in letters to the* Maritime Baptist association when the case was tried.

Nor was Rev. Mr. Stackhouse represented by counsel when eight witnesses gave their evidence in the case of Captain Ralph S. Holmes versus May Jacobina Holmes, and direct evidence was given of the minister's relations with the wife of the plaintiff while he was overseas, first with the 132nd battalion and after with the 87th battalion. The star witness for the plaintiff was Miss Margaret Brown, who lived with Mrs. Holmes while her husband was overseas. She told of the frequent visits which Rev. Mr. Stackhouse paid. She gave direct evidence of infidelity on the part of the wife on one of the occasions, telling of a scene which she witnessed. *Judgment was promised before the* present session of court adjourned.

Persons in court said that Rev. Mr. Stackhouse, who has been in New *York, is now in a hospital undergoing* treatment of some kind, while Mrs. Holmes, who was formerly Miss Moorhouse, is said by one of the witnesses to be employed in a hospital in Boston. The court then took up the case of Wilson versus Wilson.

WILSON FACES SENATE TODAY

To Delivery Lengthy Address in Which He Is Expected to Urge Ratification.

WASHINGTON, July 9.—President Wilson will present the peace treaty and the league of nations covenant to the senate tomorrow. In presenting the documents Mr. Wilson will deliver a lengthy address, in which he is expected to outline the details of the negotiations recently concluded in Paris and tell why he feels that the United States sroild endorse the league of nations covenant.

His address promises ot mark the opening of one of the bitterest fights ever wages in the senate for ratification of a treaty.

Although there has been little done regarding the new treaties with France, by which that nation will be promised American help in case of an unprovoked attack by Germany, the general expectation is that it will also be presented *by the president tomor*row and will take the same course as that with Germany.

MAYOR OF CALGARY IS MARRIED TO REPORTER

CALGARY, July 9.—The marriage *of Miss Daisy McGregor,* formerly of the Ottawa Citizen, Calgary Albertan and Calgary Herald, to Mayor R. C. Marshall, took place this evening in the Pro-Cathedral, Very Rev. Dean Paget officiating. The groomsman was Chester Bloom of the Calgary Herald and the matron of honor was Mrs. J. Snowball, Regina, sister of the bride.

Hundreds thronged the church, which was decorated with a profusion of flowers. The couple will spend a short honeymoon at the coast. This is Mayor Marshall's second marriage, his first wife having been dead some years. He has *one small daughter.* Miss McGregor is a daughter of Mrs. J. McGregor of Ottawa and the late Mr. McGregor, of Metcalfe, Ont.

YOUNG MAN HAS CORNER ON LINEN

Leonard J. Martin, Dealer in Farm Machinery, Purchases Government Surplus.

LONDON, July 9.—Leonard J. Martin, a young English business man who deals in agricultural machinery, has bought for $20,000,000 from the British government about 40,000,000 yards of linen which was intended for making airplanes. He knew nothing about linen, but bought it for speculation. Today his name and picture are featured in every British paper and editorial writers are pointing out that the enterprising young man does not have to go to new countries to find golden business opportunities.

He is 37 years of age and began with a capital of about $500.

"I bought over the heads of everybody else," he said, discussing the big deal, "simply by offering a higher price than anybody else would pay. This is a one-man deal."

The stock of material Martin now controls represents three years' normal supply. He is figuring on a profit of about $5,000,000. The linen has been for sale by the government since January, under an offer to sell to the general public in 80-yard lengths and 100-yard bales.

Belfast people, said Martin, imagined they had the stuff between their two fingers.

"They went on making linen by millions of yards at 40 to 75 cents a yard after the armistice and refused to allow their contracts to be cancelled. Then they offered the government 7 cents a yard to take it back. Their price later went up to about 25 cents a yard and it was still hoped, in view of the monopoly, to sell it to the public at three shillings. They could have *equipped all the mills in Ulster out* of the profits. I have got the linen at about double the final Belfast offer."

WAR COST STATES OVER 30 BILLION

Revenues Other Than Borrowed Money Took Care of Over Nine Billions.

WASHINGTON, July 9.—The war cost to the United States was $30,177,000,000 up to June 30, 1919.

Secretary Glass made this estimate today is submitting to the congressional applications committee the pre*liminary statements of the treasury* on the condition of the nation's finances. He arrived at the estimate by subtracting the average peace time *expenses for the same length of time,* at the rate of $1,000,000,000 annually, from the total expenditures, $32,427,000,000 during the war. Taxes and other revenue than borrowed money took care of $9,384,000,000, or about 29 per cent of the war cost.

The remainder came from Liberty bond and Victory note issues and saving stamps.

CANADIAN GENERALS HONORED AT QUEBEC

QUEBEC, July 9.—The Quebec Garrison club tendered a joint reception and dinner last night to Major-Gen. Sir David Watson and Sir Henry Burstall, respectively commanders of the fourth and second Canadian divisions in the great war. They were *each presented with silver loving* cups as a token of esteem in which they are held by their fellow club men.

Anti-Flu HO-KE

Thorpe & Co., Ltd.

Phone 60.

The evening was cold and Jones got home very late.

"Where have you been till now?" asked his wife.

"Been and had my photo taken," he answered.

"And what have you done with your overcoat?" Mrs. Jones inquired.

"Overcoat!" said Jones. "They've taken that, too."

TO REWARD HEROES OF ENEMY PRISONS

Men Who Displayed Gallantry While Escaping or Attempting to Escape Eligible.

OTTAWA, July 9.—Officers and soldiers of the Canadian expeditionary force who displayed gallantry while escaping or attempting to escape from the enemy, or who rendered exceptional service whilst prisoners of war or interned, are eligible for a reward.

An order of the militia department just issued states that recommendations for such reward may now be submitted. The facts supporting each recommendation must be substantiated by statements of evidence of at least two witnesses who have first-hand knowledge of the case, and should reach militia headquarters before August 31.

Officers and soldiers who are still serving should submit their claims through the usual official channels. The claims of those who have been demobilized should be presented through the officer commanding military district in which they live.

R-34 STARTS LONG VOYAGE TO SCOTLAND

(Continued from Page One.)

the Vickers-Vimy biplane overseas from Newfoundland in the first non-stop trans-Atlantic "hop" to the British Isles. In a statement to the Associated Press tonight just prior to his departure, Major Scott declared that he would fly over New York and if favorable on the other side or an opportunity he would sail over London on his way to Scotland.

HENRY OF BATTENBURG DEFENDS THE EX-KAISER

BERLIN, July 9. — (Associated Press.)—Prince Henry of Prussia, brother of the former German emperor, is now come to the aid of the dethroned war lord, and adds his plea to that of the others for the abandonment by the allies of their project to bring the former kaiser to trial for his crimes against mankind.

Prince Henry, in a telegram to King George, begging him to desist in the effort to extradite the former emperor, pledges himself to assist the king in bringing to light "the truth regarding the war and its consequences."

In his message, he says that after his conversations with King George in July, 1914, he returned to Berlin and was with the then emperor until mobilization began. The telegram continues:

"I can testify that the kaiser and his counsellors endeavored by every means to avoid the war and disaster to mankind. I am ready to refute the calumnies regarding the German kaiser, which have circulated for years in contradiction of all truth, and I place myself at your disposal in order to assist your majesty in bringing to light the truth regarding the war and its consequences."

CABINET CRISIS MAY FOLLOW RESIGNATION

WEIMAR, July 9. — (Associated Press.)—The unexpected resignation of Herr Wissel, minister of economy, may lead to a cabinet crisis. His scheme for governmental control and economic reconstruction was defeated in the cabinet by a vote of 13 to 1.

More than 150 commercial and industrial organizations throughout Germany filed objections to the attempt to subject industry and expose trade to official guardianship. These protests were chiefly responsible for the cabinet's determination to jettison the Wissel scheme.

GRAIN BUYERS WANT ELEVATORS INVESTIGATED

MOOSE JAW, July 9.—The association of grain buyers have telegraphed the government asking that if not too late the cost of living commission investigate the methods of doing business of a number of other elevator companies. The telegram states that if the government cannot take action, the association will strive to secure publicity through the trades and labor council.

ENEMY ALIENS ON PAROLE TO BE RELEASED IN U. S.

WASHINGTON, July 9.—Signing the peace treaty with Germany has resulted in a decision by the department of justice that the great majority of German and Austrian enemy aliens now at large on parole may safely be released from all parole obligations.

FIRE CHIEF SUSPENDED

CALGARY, July 9.—Chief Smart, of the fire department, has been suspended for one month by the city commissioners for failure to provide proper equipment at one of the outlying fire stations.

SASKATCHEWAN COOPERATIVE

REGINA, July 9.—Good progress is recorded in the annual report of the cooperative branch of the provincial department of agriculture for the year ending April 30, 1919, just issued. There are now 15,132 shareholders, with a capital investment of $230,000 and an aggregate turnover of $5,278,155.

HAIL DAMAGE NEARS A RECORD ON PRAIRIES

REGINA, July 9.—That the present season is as bad as 1916, which held the record of being the worst hail year in the province, was the statement made by a leading adjuster here. He says that the claims already out number all of 1918, but that this may not mean the damage is so extensive.

TOOK FRUIT FROM CAR; IS FINED FIFTY DOLLARS

WINNIPEG, July 9.—Arthur Hodginson, charged with theft of fruit from two cars on June 22, was fined $50 and costs in police court today. The defense put up by Hodginson was that an inspector had condemned the fruit and everybody had been invited to help themselves. Sixteen other men brought up on the same charges, who were awaiting the decision in Hodginson's case, will be tried on the charges against them. Thirteen have been remanded for one week and three for eight days.

PRESBYTERIAN MINISTER DIES OF BLOOD POISON

TORONTO, July 9. — Rev. J. A. Morrison, a Presbyterian minister, died here tonight from blood poisoning. All the relatives, including a wife and daughter of the late Rev. Mr. Morrison, live in the west. Interment arrangements are being deferred pending instructions from Mr. Morrison's daughter, who is believed to be a school teacher in Rouleau, Sask. Three brothers of the late minister are believed to reside in British Columbia. He had held pastorates in the Crescent church, Montreal, and also in Manitoba.

LABOR PARTY PLANS TO ENTER WINNIPEG FIELD

WINNIPEG, July 9.—At a largely attended meeting of the labor party tonight, over which S. J. Farmer presided, it was decided to nominate candidates for every seat in Winnipeg and the territory immediately surrounding the city for the Dominion parliament and the provincial legislature, also to nominate candidates for mayor, every seat on the city council and on the public school board. A convention is being arranged for August.

GEO. ROBINSON DIES

LONDON, Ont., July 9. — George Robinson, of Robinson, Little & Olson company, wholesale dry goods merchants of London and Winnipeg, died at his home here today, aged 92. Mr. Robinson was born at Rawdon, Que., in August, 1826, and commenced his association with the dry goods business in Montreal in 1852. He removed to London, Ont., and opened a retail store in 1857, which he carried on until 1875, when the Robinson, Little company commenced operations.

JOHN WILMES DROWNED

TRAIL, July 9.—John Wilmes and not Ernest Wilmes was the victim of the drowning accident in the Columbia river on Sunday. Ernest is in Seattle.

"Easy to Eat" you'll like 'em says Bobby "So good they just slip down"

POST TOASTIES

have won their popularity because they are different from old style corn flakes.

They contain more substance and the method of toasting brings out a remarkable flavor.

HORSE BALKS ON TRACK; THREE KILLED BY TRAIN

BROCKVILLE, Ont., July 9.—Rev. John Osborne, a retired Anglican minister, living with his son two miles north of Brockville, and Miss Irene Wetherdon of Ottawa, were instantly killed today, and Miss Flossie Headley, of Smith Falls, died in a hospital tonight from injuries. A buggy in which the three were driving into Brockville was struck by the Grand Trunk mail train from the east this afternoon. The horse balked crossing the track.

AFGHAN CASUALTIES

LONDON, July 9 (Reuter's).—In the house of commons at question time today, Sir Edwin Montague, secretary for India, stated that British casualties in the Afghanistan campaign up till July 8 were three officers and nine men killed and 33 officers and 109 men wounded.

LIBERAL CONVENTION AT HUMBOLDT, SASKATCHEWAN

SASKATOON, July 10.—The Liberal convention for the constituency of Humboldt which was held last night was one of the biggest rallies held in that town, representatives from all parts of the constituency being present. The meeting, which started at 7 o'clock, did not close until after one in the morning. Addresses were delivered by Hon. C. A. Dunning, Hon. W. F. A. Turgeon, Hon. W. R. Motherwell, W. H. Paulson, M.L.A. for Wynyard; James Hogan, M.L.A. for Vonda, and J. A. MacMillan, M.L.A. for Wadena. All the speakers urged for the rallying of the Liberal party at the next Dominion election. A committee was appointed to name delegates for the big convention in Ottawa in August, the following being recommended and approved by the meeting: F. R. Hanfer, Humboldt, with Dr. D. B. Neely, alternative; G. A. Calbert, Lanigan, with T. A. Hart of Leslie as alternative; A. A. Fraser of Allen, with A. P. Paterson of Dundurn as alternative.

GENERAL STRIKE IS PROCLAIMED AT ROME

ROME, July 9.—The chamber of labor has proclaimed a general strike as from midnight Tuesday as a sign of the protest against the police and military measures adopted by the government to prevent further disorders. The chamber of labor maintains that these measures were adopted to prevent the lowering of the price of necessities as demanded by the people. During this morning the strike was not quite general because only the Popolo Romano published last night the decision of the chamber of labor to call a strike. The food shops were crammed with people today buying provisions in the fear of being caught with scanty supplies.

FOREST FIRES SPREAD TO THE SARCEE RESERVE

CALGARY, July 9. — Growing in seriousness, the forest fires are still raging at a furious pace tonight. The Elbow River fire has jumped the river to the south and has crossed into the Sarcee Reserve, where it has advanced a mile. The change of breeze in to the southeast today somewhat checked the fires, but they are making advances again. Some of the finest timber in the reserve is being threatened and part of the water shed of the Calgary water supply is burned.

BRITISH STOCK FOR ALL THE WORLD

LONDON—At all our leading ports where live stock shipping is handled there are now daily enacted scenes of great activity, in sending abroad thousands of head of pedigreed cattle, sheep, and pigs, which buyers in all parts of the globe are gathering together with a view to the expansion of the output of heat, which is regarded as a certain development in the world's trade when peace is finally declared, says the London Daily Telegraph. On the high seas, at the moment, over a thousand head of beef cattle, chosen from our leading herds of Shorthorns, Aberdeen-Angus, Herefords, Sussex, Devons, and other native breeds, are going either to ranches in Rhodesia, Argentina, Uruguay, Brazil, and other countries south of the equator, or to Canada and U.S.A., to strengthen existing herds there, reduced by the call of war conditions. Sheep and pigs, likewise, have sailed in considerable numbers to Japan, Morocco, Australasia, Canada, and Argentina; and now that "mixed" farming and the value of sheep as fertilizing agents are phases of agriculture being much better understood in all the new countries of the world, breeders of pedigree stocks in Great Britain may expect a long continued demand from both the United States and Canada.

At our ports this week there are assembled and awaiting shipment almost a dozen separate selections of Shorthorn and Hereford bulls, the like of which have never before gone oue to America, Argentina and Uruguay. They include championship winners at Perth, Birmingham, Penrith, Hereford, Cookstown, Aberdeen, Bristol, and other leading exhibitions, and though some bulls have cost over £3000 each, and others £2000 down to £600, their exporters have no fear but that on the other side of the world they will prove worth their cost in the estancias where beef raising is a far-reaching industry upon which millions of money have been expended. The stamp of quality borne by British bulls is necessary in those estancias where native or grade-bred females prodominate. The British bull puts beef in the right place upon the resultant stock, and he never loses his vigor, while his style and type are marked on future genorations, which may be spared from the butcher's block for carrying on the herds.

The story of his volume of export trade is much the same among our sheep stocks. Fleece, and its bulk and quality, however, are subjects of consideration in the specimens bought by foreign customers. While mutton raising is the fundamental object of our pedigree sheep stocks sold for abroad, Canadian and American buyers are finding that the fleece of the Romney Marsh, when crossed on the Merino, has made many cents a pound more than any other wool in the States, and as a Canadian buyer said to me last week: "When your ranch carries 20,000 sheep those extra cents on each pound of wool mean many dollars to the lucky fellow with the right goods." This gentleman is on "a big buy" over here, and is taking back with him not only Romney breeding stock, but Lincoln longwood sheep and other types which produce a dense fleece, and one which will give the sheep protection from the cold winds of the uplands of ehe States and Canada.

Argentine buyers have this year secured Lincoln sheep as quickly as English breedors could raise them; indeed, the method fused has been to buy up ever ram raised in every herd, leaving the breeder himself second or third choice. Lincoln rams have lately made £1000 each, and that price, too, has been paid for Romneys which have been sent abroad. The smart little Welsh and Scotch sheep have also been exported in large numbers. America has taken its quota of Shropshires, Cotswolds, and Oxford Downs. Berkshire, large black and large white, and Gloucester's spotted pigs have also gone to paces as far apart as Lisbon and Tokio. The world's call for stock cannot really be met, with the readiness it might be, for shipping is scarce and freightage remarkably dear. The board of agriculture, quite naturally, is carefully superintending this great volume of export business. The latest cattle buying country is Denmark, and its representatives are not averse from paying 1000 guineas for shorthorn bulls of real merit and ancestry.

At home an extraordinary development in stock breeding is taking place. New men with fresh ideas are entering this branch of agriculture, and are running it on commercial lines. Skyhigh have they sent the prices of foundation breeding stock.

The country is, despite the drain constantly made upon it, still replete with potential breeding seock. Official statistics will prove that we are this year carrying more pedigreed herds and flocks than ever. Propaganda work and publicity are being indulged in by the majority of our breed societies, and the result is noticeable in the number of fresh countries sending over buyers.

In horse breeding circles there is unwonted activity and prosperity, even the hackney typo meeting with a keen demand from Italian, Japanese, American and Spanish buyers.

A MONEY-MAKING FIGHT

VANCOUVER—The sky does not yet offer the same reward for courage and endurance as the land. The successful Atlantic flyers only received $50.50 a minute for their daring flight, while two bull-necked athletes will receive at the least $3250 a minute for chasing each other around a 20-foot ring.

A sharp cultivator tooth will cut off many woed plants, a dull one will furnish enough seed to infest at least a square rod the following year.

STOMACH TROUBLES ARE DUE TO ACIDITY

Tells Safe, Certain, Speedy Relief for Acid Indigestion.

So-called stomach troubles, such as indigestion, gas, sourness, stomach-ache and inability to retain food are in probably nine cases out of ten, simply evidence that excessive secretion of acid is taking place in the stomach, causing the formation of gas and acid indigestion.

Gas distends the stomach and causes that full, oppressive, burning feeling sometimes known as heartburn, while the acid irritates and inflames the delicate lining of the stomach. The trouble lies entirely in the excess development of secretion of acid.

To stop or prevent this souring of the food contents of the stomach and to neutralize the acid, and make it bland and harmless, a teaspoonful of bisurated magnesia, a good and effective corrector of acid stomach, should be taken in a quarter of a glass of hot or cold water after eating or whenever gas, sourness or acidity is felt. This sweetens the stomach and neutralizes the acidity in a few moments and is a perfectly harmless and inexpensive remedy to use.

An antiacid, such as bisurated magnesia, which can be obtained from any druggist in either powder or tablet form enables the stomach to do its work properly without the aid of artificial digestants. Magnesia comes in several forms so be certain to ask for and take only Bisurated Magnesia, which is especially prepared for the above purpose.

Mining and Markets

OVER $2 A BUSHEL PAID FOR CORN

Price Once Considered Fabulous Is Surpassed on Chicago Market.

CHICAGO, July 9.—Two dollars a bushel for corn, a price once regarded as fabulous, was surpassed today in the market here. Scarcity of available supplies, together with new top record quotations on hogs, had much to do with the advance, when the market closed nervous at ⅝c decline to 3½c gain, with September $1.95⅝ to $1.95⅞ and December $1.61¼ to $1.61⅝.

Oats finished 1⅞c to 2¼c up.

In provisions, the outcome was unchanged to 35c down.

WINNIPEG GRAIN QUOTATIONS

	Open	High	Low	Close
Oats—				
July	80	83⅛	80	83⅛
Oct	77½	79½	77½	79½
Dec.	76⅜	78¼	76⅜	77⅞
Barley—				
July	125⅞	127⅝	125⅞	127
Oct.	118⅝	120½	118⅝	117¾
Dec.	116	116	115½	115½

WINNIPEG LIVESTOCK.

WINNIPEG, July 9.—Cattle receipts at the Union stock yards today were light. Prices held steady at yesterday's market on all lines, occasion of light offerings. Butcher trading was a shade stronger for top qualities stuff. Bulls and oxen were fair sellers at steady prices. The demand for stockers and feeders is still slow, as the runs are light; trading will be a little unsettled for a while. The cattle market has a weak undertone and just as soon as the receipts start to get heavier prices will start to come down.

Hog prices continue steady. Trading so far this week has been fairly active for the porkers.

MONTREAL PRODUCE.

MONTREAL, July 9.—Eggs very firm. Butter and cheese easy. Quotations:

Cheese—Finest easterns, 29c.

Butter—Choicest creamery, 54c.

Eggs—Selected, 54c; No. 1 stock, 48c; No. 2 stock, 42c to 44c.

Potatoes—Per bag, car lots, 75c to $1.

TRADING IRREGULAR ON MONTREAL EXCHANGE

MONTREAL, July 9.—At today's trading on the local stock exchange the tone of the market was again irregular, although gains predominated over losses at the close. Ames improved 2¾ points at 96, with 96 bid at the close. Sugar preferred was 4½ up at 115; Cottons preferred 2 up at 85; Canners, 3 up at 57; Maple Leaf, 2¼ up at 175¼; Breweries, 2 up at 188½; Spanish River, 2¼ up at 45; Toronto RFailway, 2½ up at 50; and Tucketts, 2 up at 42½, scored the largest gains, and Asbestos Corporation, down 1¼ to 72¾; St. Lawrence Flour, down 1¼ to 19¾, scored the largest decline. Ontario Steel preferred scored a one point gain at 77, and Steel of Canada sold up ¾ to 74¾.

Riordan added 1 point at 144; Laurentide, 1 point at 222; Wayagamack, 1 point at 48, and Brompton was a fraction higher at 64⅞.

Total sales: Shares, 22,203; bonds, $343,000.

TORONTO EXCHANGE.

TORONTO, July 9.—The stock market today was not as busy as usual. The market generally was strong. The principal advances were Atlantic Sugar preferred, 4 points; Ames Holden preferred, 1¼; Dominion Canners, 2; Spanish River, 1⅝; Steel of Canada preferred, 1, and Tucketts, 3. The recessions were light. Ames common, ¼; Canada Bread, ⅛; Dominion Steel, ⅛, and Dominion Bank, ½.

BOUNTIFUL CROPS IN UNITED STATES

Plant Diseases and Other Conditions Made Heavy Inroads During June.

WASHINGTON, July 1.—Bountiful farm crops this year were indicated today in the department of agriculture's July forecasts based on conditions existing July 1. Winter wheat and rye, now being harvested, showed the largest production ever attained. Record crops of sweet potatoes, tobacco and rice also were predicted, and the production of spring wheat, corn, oats, barley, white potatoes and hay is expected to be larger than the average for the five years 1913-17. Value of the wheat, corn and oat crops combined is $8,340,622,000, based on July 1 farm prices. The value of corn is $4,768,475,000; wheat, $2,577,420,000; and oats, $994,727,000.

Plant diseases and other conditions, however, made heavy inroads during June on prospective wheat and oats production. The forecast shows a loss of 75,000,000 bushels of wheat since the June estimate, and a reduction of 43,000,000 bushels in the prospective oats crops. High temperatures caused deterioration in the condition of winter wheat in some sections, while plant diseas increased in central districts. The heat also affected spring wheat in some part of the belt where black rust has appeared and somewhat damaged the crop.

The area planted to corn, white potatoes, flax and rye is smaller than last year, while the acreage of sweet potatoes and tobacco is larger.

CANADIAN PACIFIC JUMPS NINE POINTS

Upward Movement Is Resumed on Wall Street—Money Rules Easier.

NEW YORK, July 9.—Under the influence of easier money today's stock market resumed the upward movement which marked the renewal of operations after last week's holiday sessions. Call money opened at 9 to 10 per cent, but at midday a leading banking institution offered small amounts at 6. This evidently exerted sentimental effect, rates soon declining to 6 and 6½ and closing at 5 per cent.

The tone was only moderately firm at the opening, but strengthened almost immediately on Canadian Pacific's 9 point rise, the jump in that stock being attributed to something more than a drive against the shorts.

Oils, motors and rails were next taken up, a buoyant tone prevailing at noon.

In the last half hour, after publication of the government crop report and announcement of the ratification of the peace treaty by the German assembly, the market was stirred into furious activity, numerous leaders recording best prices of the season.

Among the stocks then in favor were shippings, electric equipments, Ohio Gas, American Paper and Canadian Pacific, also breaking into new high records.

Sales amounted to 1,700,000 shares.

Pronounced improvement was shown by sterling and francs.

Bonds, including Liberty issues, were featureless, within restricted limits. Total sales, $9,300,000. Old U. S. Bonds unchanged on call.

Closing Quotations.

$22.80 BEST PRICE FOR HOGS AT CHICAGO YARDS

CHICAGO, July 9.—Hogs—Receipts, 19,000; estimated tomorrow, 38,000; mostly 10c to 20c higher than yesterday's general trade. Top, $22.80, a new record. Advances practically lost on good hogs. Heavy weight, $21.25 to $22.50; medium weight, $21.50 to $22.50; light weight, $21.65 to $22.60; heavy packing sows, smooth, $21 to $21.60; rough, $20.25 to $20.85; pigs, $18.50 to $20.

Cattle—Receipts, 9000; estimated tomorrow, 12,000. Higher. Beef steers, medium and heavy weight, choice and prime, 15.75 to $16.75; medium and good, $13.35 to $15.85; common, $11.25 to $13.25; light weight, good and choice, $14.25 to $16; common and medium, $10.25 to $14.25; butcher cattle, heifers, $6 to $14.50; cows, $7.75 to $13; canners and cutters, $6.65 to $7.50; veal calves, light and handy weight, $18.25 to $19; feeder steers, $9.50 to $10.50; stocker steers, $8.25 to $11.75.

Sheep—Receipts, 22,000; estimated tomorrow, 18,000. Unsettled. Lambs, 84 pounds down, $14.75 to $17.25; culls and common, $9 to $14.25; yearling wethers, $9.50 to $14.25; ewes, $10.50 to $14.25; ewes, medium, good and choice, $7 to $10; culls and common, $3 to $3.60.

MOORE SAYS CASH IS PAID TO HIM

Staked California in 1892 and Now Gets Another Payment on $40,000 Deal.

William Moore, who staked the California mine in 1892, stated yesterday that the payment of $12,320 which was made by the California Mining company July 1, was made to him personally and not to McKenzie & Mann. The price to be paid for the property, he said, is $40,000, of which about $25,000 has been paid, and the balance of about $15,000 will not be due until July 1, 1920.

GOLD RESOURCES OF THE NELSON MINING DIVISION

The following article on the resources of the Nelson mining division was prepared by E. A. Haggen, editor of the Mining and Engineering Record, to be read at the recent session of the International Mining convention:

Examinations of portions of the Nelson mining division between the years 1908 and 1917 impressed me with the importance of this portion of British Columbia as a probable producer of gold. My purpose in contributing this paper is to show the relative importance of the position which the Nelson mining division has occupied in gold mining in the past 24 years; and to suggest that, with such a creditable record, you have here a field of promise for the prospector and investor.

The Nelson mining division extends from the divide which forms the watershed of the Slocan and Kootenay river to the international boundary, a distance of about 50 miles in a north and south direction; and from the Columbia river on the west to the Goat river and Kootenay lake watershed on the east, an average width of about 64 miles. The division therefore covers an area of about 3000 square miles.

Economic Minerals

In this area are found the following metallic minerals: Gold, silver, copper, lead, zinc, molybdenite, manganese, tungsten and iron. The non-metals are represented by granite, used for building and construction; marble, florite, garnet, corundum and aragonite. This paper is limited to the discussion of the gold resources.

Historical

Dawson included Salmon river, Forty-Nine creek and Cottonwood creeks, in Nelson mining division, in his list, published in 1888, of the placer gold producers of British Columbia. He stated that Salmon river, near its confluence with the Pend-Oreille river, was worked in 1865 and following years with good results, and that in 1867 Forty-Nine creek yielded coarse gold to the value of $6 to $18 per man per day. A hydraulic claim on the latter stream yielded pay in 1890.

In a table attached to the report of the minister of mines for 1890, when Nelson mining division was known as "Toad Mountain Sub-Division," the yield of placer gold for the year was placed at $30,500. G. T. Tunstall, gold commissioner, reported that John Lye and partner in the same year discovered gold yielding 20 cents per pan on Hall creek, south of the city of Nelson, and that fifty companies were organized to take up and work the creek. The discovery of gold was also reported on Bird creek, heading in the same watershed as Forty-Nine creek.

Where placer gold is found, it is well known among prospectors that the source is to be located in auriferous lodes traversed by the creeks. This is usually the first step taken by prospectors following the discovery of placers. Hence we find the discovery of the Silver King mine, on Toad Mountain. In 1895 the Starlight was located near the Silver King, the vein being reported as five feet wide, and carrying an average of $15 per ton. Other discoveries made were: Primrose, three and a half miles south of Nelson, from which samples were taken carrying $3 per ton in gold; Fern, at the head of Hall creek, where values were obtained of from $15 to $25 in gold in a vein four feet wide; the Poorman; while locations were made for gold on the West Arm of Kootenay Lake, seven miles east of Nelson and on Yuill creek, 15 miles east of Nelson. In 1896 the Poorman was equipped with a 10-stamp mill and produced gold to the value of $20,000—the first recorded lode gold production of Nelson mining division. This division has since then produced lode gold to the value of about $7,500,000.

In the following year the Fern was equipped with a 10-stamp mill, and in its first run of three months produced gold to the value of $28,000, of which $16,000 was profit. The second run of 44 days produced $11,571 from 1251 tons of ore, an average value of $8.25 per ton. A dividend was paid, absorbing $16,000. The Athabasca mine shipped to the Hall Mines Smelter ore which gave a return of 3.3 oz. gold and 5 oz. silver per ton. The London and British Columbia Goldfields took up the Ymir mine, and the Canadian Pacific Exploration company of London, England, took up the Porto Rico sending a shipment of ore to the Hall Mines Smelter, from which a return of $76.25 per ton was obtained. The same company acquired the California.

By 1899 the Athabasca had become an important property, being equipped with a 10-stamp mill, employing 120 men, and producing 5400 tons of ore, from which gold was obtained to the value of $105,600, or nearly $20 per ton. The company made a profit that year of $31,504. The Ymir mine was also equipped with a mill, employed 63 men, and produced 17,000 tons of ore of an average value of about $10 per ton. Sheep Creek Camp was coming to the front and a mill built at the Yellowstone, where 63 men were employed.

Other producers were: Exchequer, on Morning Mountain, 50 tons averaging $20 per ton. Granite, on Morning Mountain, 800 tons, averaging over $10 per ton; Porto Rico, head of Barroot creek, 4000 tons, valued at $70,000; Fern, Hall creek, 300 tons, value not stated; Black Cock, Wild Horse creek, 35 to 40 tons at $25 per ton; Dundee, Ymir, 200 tons, value not stated.

The Granite employed 80 men and the Poorman 38 men.

By 1901 the Ymir mine had become the leading free milling gold property operating in the province, the mining capacity having been increased to 80 stamps and the mine force increased to 200 men. The Second Relief installed a 10-stamp mill. An amalgamation was effected of the Granite and Poorman properties, which were taken over by the Duncan United Mines, Ltd.

In 1902 the Venus was added to the list of gold producers, the Athabasca-Venus Mining company having been incorporated by Toronto investors to take over and operate the two properties. Eight hundred tons were mined and sent to the Athabasca mill, giving an average return of $17 per ton, mined from a vein running in width from a few inches to four feet. Thirty-seven miners were employed. The June, adjacent to the Venus, was under development, the vein on which the work was done being four feet in width, and carrying overage values of $20 per ton. The Granite-Poorman produced 5716 tons, of a value of $26,340. The mine force varied from 25 to 75 men.

Ymir was an active camp, the Ymir mine producing 50,000 tons, from which an average return of $6.69 in gold was obtained. A high extraction was made following the installation of the cyanide plant, the values recovered being 95 per cent. The cost of production and treatment was $4.43 per ton. The Wilcox entered the list of producers that year, a 10-stamp Hendy mill being installed. The mill was run 40 days and produced 720 tons of ore of an average gold value of $8.00. Twenty tons shipped to the smelter gave a return of $70 per ton. Other producers were:

Second Relief, 2800 tons, realizing $26,000; Arlington, 200 tons, $6000; Canadian King, 23 tons, $517; Fern, tonnage not stated, $10,000; Spotted Hodse (Barret creek), 17.5 tons, $368. Queen, 442 tons milled, $19,000, 246 tons smelted, $7500.

In 1903 the following mines were producers of gold: Athabasca-Venus, 8260 tons, realizing $92,000; Poorman, 9170 tons, $46,780; Ymir, 51,859 tons, $2223,200 gold and other values to a total of $309,000; Wilcox, 2200 tons, $22,000; Gold Hill and Silver Crown (above May and Jonnie), 10 tons, $525.

A good deal of new development was done. Among other results reported were the proving up of two veins of 9 feet and 20 feet, respectively, on the May and Jonnie, where 19,000 tons were stated to be in reserve. On the May and Jonnie a vein 3 feet wide showed free gold. On the Juno, sampling a vein four and a half feet wide gave values of $12.50 to $18. Development on the Foghorn gave values of $10 per ton. On the Gold Cup, four miles north of Ymir, giving four and a half feet wide sampled $15 per ton. The Arlington shipped 1300 tons, value not stated, but probably around $50 per ton. The Keystone shipped 250 tons, the Second Relief 1500 tons, Canadian King 90 tons. Sampling of the Lucky Strike, 12 miles northeast of Ymir, showed values of $1.75 to $12 per ton, with a pay streak running from $18.25 to $32.

In 1904 the following mines were producers:

Ymir, 32,630 tons, producing 11,160 oz. gold; Granite-Poorman, 1100 tons, realizing $22,000; Athabasca-Venus, 7479 tons, $66,260; Greenhorn, 473 tons, $4730. Porto Rico, 600 tons, $16,000; Arlington, 1068 tons, $53,400 a profit of $13.73 per ton being made; Canadian King, 33 tons, $1650; Dundee, 60 tons, $1800; Iro D. (adjoining Second Relief), 30 tons, $1857; Wilcox, 2400 tons, $38,260; Queen, 4846 tons, $33,260; Kootenay Belle, 93 tons, $51,608; Second Relief, 3081 tons, $23,000.

The Porto Rico ore was mined from a vein six inches to three feet wide. The Queen mined two chimneys from two feet to 13 feet in width, and from 120 to 125 feet in length. Development of the Yukon, at Ymir, showed the width of the vein to be from four feet to eight feet, with a pay streak of from one foot to two and a half feet, carrying values of from $10 to $20 per ton. The Bayonne camp attracted considerable attention. Development on the group of that name proving up a vein from two to 18 feet wide, and sampling from $13.20 to $16 per ton. A remarkable feature of this property was the discovery that the gessan carried gold values assaying $320 per ton.

In 1905 the production was: Ymir, 17,736 ton, realizing $32,878; Second Relief, 5582 tons, $55,820. Arlington, 1128 tons, $66,140; Poorman, 600 tons, $2880; Porto Rico, 600 tons, $11,300; Queen, 6100 tons, $64,000; Kootenay Belle, 83 tons, $4625.

The Second Relief reported a profit of $26,000, figuring cost of production at $5.30 per ton. The Arlington made a profit of $52,700 from ore averaging $58.60 per ton, and paid a dividend of a shilling a share. The May and Jennie was operating a Chilean mill with a capacity of 40 tons a day, making an extraction of 85 per cent. The tonnage dealt with has not been reported. The reserves in the mine were placed at 80,000 tons, of an average of $4 per ton. The cost of mining, tram and milling was stated to be $1.40 per ton. The Hendryx electrocyanide process was used as an adjunct to the mill. The Eureka, a copper property, made shipments which gave a return of $7 per ton in gold.

In 1908 the Second Relief produced bullion of a value of $58,080, and the Arlington shipped 1312 tons of ore, which gave a return of $53,315.

In 1905 the Ymir mine milled 1000 tons of $5 ore; the Granite-Poorman, 1000 tons, which realized $50,000; the Queen, $8845 tone, yielding gold to the value of about $100,000; the Referendum milled 250 tons, returning $2100; the Keystone shipped 71 tons, valued at $85 per ton. the Nugget shipped 21 tons, returning $110 per ton; the Second Relief milled 3000 tons for $25,000, and the Arlington shipped 1250 tons, realizing $46,350. The Yellowstone and Queen properties were amalgamated.

In 1908 the Granite-Poorman milled 8000 tons, which gave a return of $60,000. Some rich specimens were found in the mine. The Fern produced gold to the value of $2000. The Arlington shipped 1190 tons, obtaining a return of $65,000. The Canadian King shipped 88 tons, which realized $5409. The Second Relief milled 1660 tons of ore for a return of $15,700.

There was considerable activity on Sheep creek, the Queen, Nugget, Kootenay Belle and Motherlode being producers. Shipments and ore milled to 11,600 tons, realizing $195,000, an average of $17 per ton. The Queen milled 900 tons, which yielded about $100,000. The Kootenay Belle production was 1980 tone, realizing $36,960. The Motherlode shipped 124 tons, which realized $14,078. The Nugget shipped from No. 2 lever 192 tons, which gave a return of $23.50 por ton. The vein averaged seven feet wide. In addition 1000 tons were milled and yielded gold of a value of $17,068, or $17 per ton, the milling ore being mined from a stope from nine feet to 14 feet wide.

In 1909 the following mines wore shippers: Nugget, 3455 tons, realizing about $100,000; Vancoliver Group, 22 tons, averaging $102.22 per ton; Granite-Poorman, 10,000 tons realizing $2,000. Shipments from the Yankee Girl were valued at $64,000.

Nineteen ten was described in government reports as a banner year, seven stamp mills being in operation. These were the Queen, Nugget, Granite-Poorman, Athabasca, Fern, Wilcox and Second Relief. A Huntington mill was also installed on the Perrier and a Chilean mill at the Reliance on Forty-Nine creek. Production was reported as follows: Athabasca 3000 tons; California, 36 tons; Fern, 84 tons; Granite-Poorman, 7701 tons; Arlington, 1133 tons, realizing $60,905; Second Relief, 189 tons. Keystone, 17 tons; Summit, 195 tons; Vancouver, 57 tons. The Black Cock, Ore Hill, Pipe Dream, Golden Belle, Fern, Fawn and Clyde Belt were under development.

In 1911 six stamp mills were operating. Production was: Queen, 14,450 tons; Athabasca, 750 tons, valued at $9000; Second Relief, 108 tons; Call-

THURSDAY, JULY 10, 1919

GERMANY WILL FIND THINGS HAVE CHANGED.

Germany by ratifying the peace terms gains the right of free intercourse with the world, a privilege from which it shut itself out nearly five years ago.

But Germany will find that a great change has occurred since July of 1914. Germans will find that they are about as welcome in allied countries as rattlesnakes at a picnic. They will find that the allied peoples will first of all be suspicious as to whether the rattler still has his fangs, and when they find that he has had them drawn there will be evident a strong feeling that decent, normal people don't like snakes anyway.

When the German commercial traveler starts out after world trade he will see in the eyes of many whom he meets the thought that perhaps this very German is one of those who fired the torpedo which sank the Lusitania, or was one of the assassins of Miss Cavell or Capt. Fryatt, or one of the foul beasts who left a trail of murder and outraged women and children in Belgium and northern France.

The German will have to prove that he has changed a great deal before the world will be able to accept him as a person whom it is safe to associate without contamination. Germany will not be admitted to the league of nations until it has shown that it is worthy of it. Individual Germans are in the same position in relation to individual members of the allied nations.

WHY THE MATCHES WON'T STRIKE

Canada has been suffering for some time from an epidemic of poor matches. We are nearly as badly off as they are in France, where the sale of the article is a state monopoly, the government doling out matches at a rate of a cent a score or thereabouts and not guaranteeing them to strike only on the box, or indeed, anywhere else. At the present time Paris is annoyed over the appearance of a particular brand, in which, though it "strikes," eighteen times out of twenty the flame fails to fire the wood. Complaints have been so general that the authorities instituted an inquiry into the cause, when it was discovered that some one infatuated with the craze for utilizing every form of waste had supplied the matchmakers with loose ends from a shop where military huts were constructed. It was commendable enough thus to work up the stumps, but no one had remembered that the timber had been impregnated to render it fireproof.

Wonder if any of that fireproof material has been used by Canadian matchmakers?

With Montenegro in revolt against Serbian mititary occupation, mountain warfare again enlivens a summer comparatively peaceful.

Good luck to the big British airship and its gallant crew. May it establish another record by making the return trip in less time than the initial journey across the Atlantic.

Canada will float a big loan in the fall. That may be the last opportunity this generation will have to lend money to the government at such favorable terms as have existed during the war period. Now is the time to save money in order to take advantage of the occasion when the loan is floated.

A recent dispatch that told of the more or less complete collapse of the Hungarian industrial plants as run by the Soviet systems suggested that the doughty Bela Kun had not followed the advice of Lenine to avoid the social and industrial mistake of the Bolshevik pioneers, says the Philadelphia Public Ledger. But now that the National Soviet of Hungary has asked city populations to migrate into the country in order to overcome the natural consequences of Bolshevik theories carried rigidly into practice, the full incapacity of doctrinaries of the Lenine and Kun type to set up a stable, self-supporting civilization is made plain.

Bethmann-Hollweg's declaration that he and not the ex-kaiser should be punished has not been taken very seriously. Typical comment is that of the New York World, which says: "Bethmann-Hollweg's offer to bear whatever punishment the entente would impose upon the ex-emperor is another of those theatrical 'fine gestures,' like the sinking of the German ships, that seem in some mysterious way to soothe Berlin's hurt feelings without practical result. If Bethmann-Hollweg had been a real premier after the manner of free nations, and responsible to the reichstag, there might be some justice in his 'I did it.' But as he was answerable only to the emperor, and boasted of it, he can hardly pinch-hit now for his master. In these days the maxim that 'the king can do no wrong' fits best in constitutional monarchies with figurehead rulers. Wilhelm was never that; never for one moment intended to be less than the war lord."

GRASS AND THE LAW

Here is a picture of an actual scene about half-past one yesterday afternoon on University avenue in the city of Toronto. The avenue is the widest street in Canada with the possible exception of Main street in Winnipeg, but, unlike the western thoroughfare, which is a treeless, paved waste, University avenue is shaded delightfully, and in the centre between two roadways is a wide stretch of inviting grass.

It has been the custom of late on the part of the swarming foreign population in the district between Queen and College east of the avenue, where there is hardly a blade of grass or a shade tree left, to seek relief from the intense discomfort of the heated spell in the little fly-infested houses of "The Ward" by coming out to the avenue and lying under the shade of the trees. The street car strike prevents the mothers and the swarms of children to be found in the foreign quarter from taking the cars to the parks, where folk may still lie on the grass without committing lese majeste. And so, day by day, while the blazing sun baked the asphalt and the granolithic sidewalks, the folk of The Ward have found their way in growing numbers to the shaded avenue.

There is not a park bench upon it. If the park commissioner, or the street commissioner or the particular Caesar who has jurisdiction over it, ever saw the Champs Elysee in Paris, or the Boston Common, or Madison Square, or the Battery in New York, or a hundred other places in a hundred European and American cities where benches are placed for the comfort of the citizens, it must have been with feelings of pity for the officials of those cities, who could not resist the popular clamor for the placing of seats where people could make use of them frequently.

No such methods of making the civic administration popular need be feared in Toronto. The people who live up on "The Hill," with acres of close-cropt lawns beautifully framed in herbaceous borders, use the avenue en route in their motors to the heart of the city. Would they be shocked and disgusted by seeing half-naked babies—black, white and yellow—swarming about on the grass of the avenue!

Perhaps it is because of the fear of startling them that a shame-faced policman, whose duty it is this Dominion day to keep the people from sitting or lying on the grass, is walking up and down under the shade trees. He has just moved a group of foreign laborers who were sitting quietly talking together. They get up, and as they do so look over at some soldiers quartered at the Armory whom the policeman exempts from the move-on order. Out on the sidewalk, which glistens in the sun, the foreigners stand gesticulating and muttering. It is inevitable that the law in their eyes shall seem contemptible, for the law is manifestly showing favoritism.

The policeman sees fresh game. A pale-faced Jew, probably an indoor worker to whom the cool breeze of the avenue has proved an irresistible temptation, is hunted back to his kennel in The Ward. Farther up groups of equally inoffensive people scuttle off without awaiting the command of the law.

One wonders less, after seeing the harrying of these folk who should be provided with seats instead of being driven back to their horrible quarters in The Ward, that government falls into contempt. The grass patrol is stupid beyond all ordinary stupidity, especially at a time when the city's transportation system is tied up. Who is responsible for it? What good purpose is it supposed to serve? It will not in a thousand years add to the respect of the people of The Ward for the laws of their adopted land.—Toronto Globe.

COLD STORAGE.

"You simply cannot trust anybody. Everyone seems so dishonest nowadays," declared the woman. "My maid, in whom I had the utmost confidence, left me suddenly yesterday and took with her my beautiful pearl brooch." "That is too bad," sympathized the friend. "Which one was it?" "That very pretty one I smuggled through last spring."

Rastus (fleeing with the stolen chicken)—Say, niggah, why am dat swarm ob flies persistin in followin' us? Uncle Eli—Chile! Dat am no flies; dat am buckshot!

Adv. in English paper—All plain work such as soling and heeling, returned in one or two days. Toe-capping and vamping will take longer, as we do them properly.

Mrs. Casey (in Life)—An' phwat are yez doin' wid that incoom-tax paper Casey? Casey—Oim thryin' to figger out how much money I'll save by not havin' anny.

Hobson (in Judge)—That burglar client of yours doesn't seem very grateful to you for acquitting him. Dobson—He says I proved him so innocent that his pals daren't trust him with a swell job.

The youngest came crying to his mother. "Why, dearie!" she exclaimed. "What is the matter?" "Dad was lifting a big box and it fell on his toes," explained the child between sobs. "But," continued mother, "that is hardly anything to cry about. You should have laughed at it." "I did," said the boy.

THE BRITISH NAVY FROM COLOGNE VISITS THE FRENCH NAVY AT MAINZ. SCENE ON THE WAY UP THE RHINE.

GOLD RESOURCES OF THE NELSON MINING DIVISION

(Continued from Page Three.)

fornia, 33 tons; Arlington, 690 tons; Ophir, on Bird creek, 5 tons; Arlington, 690 tons, $34,500; Vancouver, 83 tons; Kootenay Belle, 31 tons, realizing $4784; Nugget, 3500 tons, realizing $70,000; Summit, 50 tons. The Kootenay Belle gave values of $108 per ton on a pay streak of from 6 in. to 13 in. on the smaller vein, and from $14 to $27 over a width of 2½ ft. The larger vein gave an average return of $14 across a width of 7 ft. 8 in.

Production in 1912 was: Yankee Girl, 750 tons, realizing $11,250; Vancouver, 17 tons; Motherlode, 13,440 tons, on which an extraction of 98 per cent was obtained; Arlington, 762 tons; Second Relief, 3500 tons.

In 1913 the Granite-Poorman yielded 3000 tons from a shoot 680 ft. long, with paystreak of 18 in.; Perrier, 15 tons, valued at $420; California, 25 tons; Motherlode, 24,266 tons, with an extraction of 96 per cent; Vancouver, 25 tons; Second Relief, 3100 tons, valued at $50,000; Yankee Girl, 3787 tons, realizing about $100,000. Development on the Wilcox was vigorously carried on, the ore being proved to a depth of 800 ft. and averaging $18 a ton over a width of 42 in.

The year 1914 saw gold mining on the down grade in Nelson mining division, as well as everywhere else, economic conditions creating a world-wide setback in the industry. Production was: California, 50 tons; Union, 12 tons; Perrier, 7 tons, valued at $16 per ton, with an ore shoot 2 ft. wide; Queen, 11,000 tons, valued at $110,000; Motherlode, 20,000 tons; Ore Hill, 50 tons, $2500. The most notable development was on the Dundee, where the ore shoot was proved up in the low level tunnel at a depth of 960 ft.

In 1915 the California produced 85 tons, valued at $2550; Perrier, 50 to 60 tons; Queen, 10,000 tons, realizing $101,800; Motherlode, 3000 tons, realizing $42,000; and Second Relief, 2000 tons, valued at $16,141.

In 1916 the California produced 30 tons, valued at $750; Granite-Poorman ore to the value of $20,000; Yankee Girl, 900 tons, value not stated; Jennie Bell, on Wild Horse creek, 16 tons, realizing $1120; Queen, 2060 tons, realizing $16,400; Vancouver, 78 tons; Spokane, 40 tons, realizing $2603.

The year 1917 saw the poorest production in 20 years, the Granite-Poorman and Yankee Girl being the main producers. Sheep Creek was entirely shut down. The Yankee Girl shipments amounted to 2300 tons, valued at $40,250, and other shippers produced gold to the value of $59,109 from about 1000 tons.

In the Bayonne camp, development proved values of 1.5 oz. gold and 18.78 oz. silver over a width of 2 ft. 3 in. on the Spokane group, and 1.96 oz. gold and 3.6 oz. silver over a width of 4½ ft. on the Bayonne. Sampling of the Bayonne dump gave values of $1.42 gold per ton.

In 1918 the Yankee Girl shipped 8000 tons; the Spokane 20 tons; the Ore Hill, where a two-stamp mill was installed, 37 tons; the Queen, 14 tons of concentrates.

Production.

The following are the statistics of the gold production of Nelson mining division to the end of 1918, as far as the figures are available:

Year.	Placer Gold, Value.	Lode Gold, Value.
1895	$ 5,500	$ 20,000
1896	5,500	4,720
1897	—	41,520
1898	—	76,459
1899	—	342,308
1900	600	653,106
1901	—	679,340
1902	—	519,148
1903	2,000	415,756
1904	3,000	291,447
1905	3,000	365,177
1906	1,000	241,364
1907	1,000	276,627
1908	1,000	359,162
1909	1,000	452,859
1910	2,000	761,359
1911	1,000	364,619
1912	1,000	361,994
1913	1,000	544,117
1914	—	316,210
1915	1,000	190,846
1916	1,000	84,891
1917	1,000	52,109
1918	—	86,000
	$31,600	$7,501,138

These figures show that the Nelson mining division has one of the most extensive areas of gold bearing ores in British Columbia, and that there is here a great and promising field for development. It is true that over the greater proportion of the auriferous area the gold-bearing veins occur in granite rocks, where the veins as a rule are narrow; but the development and production show a high average value. Such ore bodies can be, and are being elsewhere, mined at a profit. They afford an opportunity for the employment of the leasing system, which has proved successful in other camps under similar conditions. The requisites to successful operation by leasers are good transportation and convenience of reduction works. The work of the resident engineer for the district consists largely in advising the government of properties where the ore occurrences are of sufficient importance to warrant the construction of roads; and an active policy would do much to promote the increase of the gold production from the type of auriferous veins referred to. For smelting ores, the Trail smelter is a convenient market, provided transportation facilities will admit of the shipments being delivered on the ralway. The number of mills in the division should afford a means of treatment of free-milling ores from a number of properties where sufficient tonnage can be obtained to warrant placing the mills in operation.

The Sheep Creek gold belt extends a length of 25 miles by a width of five miles. The mineralization occurs in narrow fissures intersecting a series of sedimentary rocks. Where these fissures intersect the bands of quartzite they form ore shoots of from a few inches to 45 ft. in width. The values are unusually persistent with depth. From the summit of the Nugget to the lowest level of the Queen the vertical elevation is 3000 feet, and payable ore was found to the deepest ground developed on the Queen. There is no more promising field for gold mining than Sheep Creek. The values can be maintained at about $10 a ton, so that, even with the present abnormal cost conditions, a good profit can be made, depending on the tonnage and development.

The prospects of the camp have been much improved by the consolidation of the Queen, Kootenay Belle and Vancouver properties as one group, and the consolidation of the Nugget, Searchlight and Motherlode in another group. Both groups are equipped with mills and hydro-electric power plants, and are undergoing development to place in reserve an extensive tonnage before resuming operations. The camp has an excellent record, the Queen and Nugget mines having paid their way from grass roots. The following is the production of the camp:

Queen	$1,272,657
Motherlode	742,960
Nugget	292,549
Kootenay Belle	104,966
	$2,413,132

Sheep Creek has thus produced a third of the entire gold production of the Nelson mining division.

The Ymir camp is another section of the division which has an important future as a gold producer. The Yankee Girl, Dundee and neighboring properties have undergone considerable development with encouraging results, and the Yankee Girl has been an important shipper. A consolidation policy such as has been adopted in Sheep Creek would be of immense advantage to all interests concerned, and in such lies the interest of the camp.

The north fork of the Salmon river is another promising section. The prospective importance of the telluride deposits has not been sufficiently recognized, and prospectors with a knowledge of the occurrence of gold in this form are likely to obtain good results.

Morning mountain, immediately east of the city of Nelson, is certainly not exhausted as to its gold deposits. The recent strike on the California and the acquisition of the Exchequer give promise of interesting developments. The Granite-Poorman, Athabasca, Venus and neighboring properties present difficulties in mining owing to the extensve faulting encountered in development, but a detailed geological survey would do much to clear up the difficulties.

The construction of a good auto road from Nelson south into the Salmon River valley would do much to promote exploration and development of the neighboring country, and aid in creating renewed interest in gold mining in the area.

The gold mines of the Nelson mining division have paid $601,500 in divdends, or nearly 10 per cent on the value of the producton. No gold mining camp in the province has shown a better record for its production.

The Nelson mining division provided British Columbia miners with their first smelter for the home treatment of their ores; it produced the first copper, founding the industry which now leads all metal production in the province; and of the stamp mills erected in British Columbia, one-third of the total milling capacity is established in the Nelson mining division. With such an excellent record in our mineral industry, let us hope the time is not far distant when the gold mines of Nelson will again take their place in the forefront of the mineral production, and that at a time when gold production is more than ever important to the maintenance of national credit and industrial development.

E. A. HAGGEN,
Editor Mining and Engineering Record.

THEY HAVE NO HONOR

The appeals to a code of honor that civilized nations are supposed to make the basis of their relations to each other will not carry much weight in the future in any arrangement in which Germany may be a part. And if Germany shall object to being kept out of the League of Nations or shall resent being put on probation or being treated as a sort of pariah or leper state, she can blame her leaders in the war who have forever placed the stigma of bad faith on all her national policies. The admiral who ordered the scuttling at Scapa Flow scuttled many other things besides the ships in his charge. And that he and his officers are to be brought to book by the allies is but just and proper.—Philadelphia Public Ledger.

NOT SO BAD

The way Count Rantzau describes that treaty, it seems to be pretty nearly what most of us wanted.

As You Like!

Scan closely every page of our catalogue, which shows Diamond Rings if you are considering such an important purchase. Note the many styles—the single stone, two-stone, three-stone, Princess, Cluster, fancy rings, etc, etc.

In each and every one of these the gems are the very highest quality — better are not procurable.

Printed Butter Wrappers

Either With Your Name or With the Words

Dairy Butter

According to the Dominion government regulations all farmers who sell butter either to stores or privately are required to have it properly covered in a wrapper on which MUST appear in prominent letters the words

"DAIRY BUTTER"

The fact is also emphasized that all butter in such packages must be of the full net weight of sixteen ounces and in default of same a fine of from $10 to $30 for each offense is imposed. Whey butter must be so labelled even when mixed with dairy butter and dairy butter retains its label even though it be mixed with the creamery product.

If you have your own name or brand on your wrappers you gain valuable advertising for your butter. It causes people to ask for the same brand again.

PARALYSIS IN BEES

WINNIPEG—Bee paralysis is a form of disease which as yet has not appeared to a very large extent in Canada and for which there does not seem to be a definite cure known. Bees afflicted with this disease are the adult bees of a hive. The affected bees that the amount of surplus honey and their abdomens are greatly swollen. Eventually these bees make their way out of the hive into the grass, where they die singly or in groups, according to the amount of infection. Sometimes only a few colonies will be infected and it may not spread, and at other times the whole apiary may be infected. Colonies that have had the disease are so weakened in adult bees tha tthe amount of surplus honey obtained is greatly diminished for the season. The precise cause of the disease does not seem to be known but tests seem to have established the fact that bee paralysis is not transmitted by the brood or combs, but only, through the adult bees. No definite line of treatment seems to have been established, but as the trouble is much more prevalent in the south than in the northern areas, possibly owing to climatic conditions, it may be that northern beekeepers will not be handicapped to any great extent.

In conclusion, in all cases of suspected bee disease, it is advisable, in order to ascertain the exact state of affairs, that a sample of brood, say three or four inches square, be sent to the Department of Agriculture, Division of Entomology, Apiarian Branch, Ottawa, for examination. This service is free and the reply will at once determine if any disease is present. In sending in samples of suspected brood bear in mind that they must be packed in a box of such nature that it will be impossible for any leakage to take place. A wooden or tin box with a close fitting cover will do very nicely.—Farm and Home.

Know your weeds while they are young in order that you may dispose of them before they pollute your grain fields.

NOT ASPIRIN UNLESS "BAYER" ON TABLETS

Only Tablets Marked With "Bayer Cross" Are Genuine Aspirin—Others Not Aspirin at All!

"Bayer" Now Made in Canada by a Canadian Company—All Rights Purchased from U. S. Government

If anybody intimates that "Bayer Tablets of Aspirin" are German made or owned, he is playing unfair to a Canadian Industry, and to Canadian Workmen. Absolutely no German interest in Canadian Company.

Unless you see the safety "Bayer Cross" on the package and on the tablets **you are not getting Aspirin at all.** The "Bayer Cross" means **true** Aspirin—no other tablets are Aspirin.

Don't accept Aspirin in a pill box. Buy a **"Bayer Package"!**

"Bayer Tablets of Aspirin" have been proved safe by millions for Pain, Headache, Neuralgia, Toothache, Earache, Rheumatism, Lumbago, Colds, Grippe, Joint Pains, Neuritis.

Proper and safe directions are in every "Bayer" package.

Boxes of 12 tablets—Bottles of 24—Bottles of 100—Also Capsules.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that **Aspirin means Bayer manufacture,** to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the **"Bayer Cross."**

Abbey's EFFERVESCENT SALT

A Healthful Thirst Quencher

ABBEY'S SALT is more than a pleasant tonic laxative. It is an agreeable Saline; slightly tart in flavor; that makes a refreshing, sparkling summer drink, which quenches thirst and keeps the whole system in a regular, orderly condition.

BUSY DAY IN NAKUSP COURT

Farmers Fined for Having Deer Meat Out of Season—Bad Boys Are Sentenced.

NAKUSP, July 9.—The local J. P.s, F. W. Jordan and T. Abriel, had a busy session in the police court here on Tuesday evening, having before them five defendants on a total of eight charges. Gus Henke, a rancher of Glenbank, was fined $25 and costs on pleading guilty to having deer meat in his possession.

Karl Neubrand, also a rancher, pleaded guilty to having shot a deer close to his premises and dividing a portion of the carcass with Henke. He was fined $25 and costs, and dismissed on the charge of having the meat in his possession. The meat was confiscated.

Three well known boys, one of whom lives at New Denver, were charged with setting fire to a log building at Glenbank and destroying it. They pleaded guilty and were fined $20 and costs each, also $20 each for damages to the building, which the owner refused to accept, but would direct the sum to be donated to a good local cause. One of the boys was further charged with stealing a halter from a horse belonging to Saran Singh and was discharged on returning the stolen article next day. The same boy pleaded guilty to trying to set fire to a bush, which if he had successed would have caused great loss. He was sentenced to six months' imprisonment, but the sentence was suspended during his good behavior. Both justices lectured the boys severely and expressed the hope that the position they found themselves in would prove a lesson to them.

Misses Cameron and Hornell of Toronto are visiting Mrs. E. H. S. McLean for a week.

A large party left for Edgewood on Wednesday to attend a returned soldiers' banquet.

Mrs. D. T. Bulger and Miss Beryl Bulger of Vancouver arrived Monday on a visit to Mrs. Blackstock.

VICTIM OF DROWNING ACCIDENT IS BURIED

BOSWELL, July 9.—The body of little Philip Johnstone, who was drowned on Sunday evening, was recovered by Police Constable Vachon of Creston about 10:30 a. m. Tuesday, lying within a few feet of the point where he fell into the water. The funeral service was held at 11:30 a. m. on Wednesday by the Rev. J. S. Mahood of Queens Bay, the interment taking place on the hillside behind his home. The pallbearers were Miss Queen Annable, Miss Janet Carrie, Geoffrey Spence and Frank Cummings. The little casket of dark polished wood with silver mountings was almost hidden under the various floral tributes. Representatives of every family in the settlement were present at the service.

CRANBROOK TO HAVE MEMORIAL

CRANBROOK, July 9.—A meeting of the citizens of Cranbrook and district, called by Mayor Cameron for the purpose of considering the erection of a permanent memorial to those who have paid the supreme sacrifice in the war, was held in the city hall last night, and was attended by representatives from the various organizations in the city, as well as by the citizens generally. Several suggestions as to the form which the memorial should take were brought forward, including the erection of a building, a marble monument, and the securing of a park site for the city. No definite decision was reached, but a committee was formed to secure all the information and data possible, and to report at another meeting to be held in the near future and bring in recommendations regarding the form the memorial should eake.

Road to Beach

Through the activity of the Cranbrook Auto association the construction of a good road to the bathing beach at Green Bay will be undertaken by the government immediately. Members of the association executive accompanied Mr. Cummings, government district engineer, over the proposed route recently and were successful in locating a route where the construction will be very easy. The C.P.R. are also being approached with a view to having a platform built along the track opposite the beach, thus bringing this delightful resort within easy reach of those who do not own automobiles.

BOSWELL ITEMS

BOSWELL, July 9. — Mrs. James Johnstone, of Nelson, spent Tuesday here with Mrs. Harry Johnstone, but could not remain for the funeral.

Mrs. E. B. Millward returned to Nelson on Tuesday evening.

Rev. J. Hillis Wright, of Grand Forks, arrived here on Wednesday morning.

Mrs. Keatley, of Nelson, and W. Keatley, of Cloverdale, are the guests of Mr. and Mrs. W. O. Rylett.

Mrs. Godfrey and Arthur Godfrey, of Nelson, spent Wednesday in Boswell, the guests of Mrs. W. O. Rylett.

Miss Queen Annable and Miss Janet Carrie, who have been helping with the berry crops, returned to Nelson on Wednesday evening.

HALCYON NOTES.

HALCYON, July 9.—The following are registered at the Hot Springs sanatorium: Mr. and Mrs. William Oliver, Lethbridge; George Porter, Lethbridge; Mr. and Mrs. W. R. Pearce and Miss Hewton, Edmonton; A. C. Yoder, Nelson; Miss L. Manifold, Regina; Mrs. J. Herchimer and Mrs. Hopgood, Kamloops; Mrs. A. J. Graham, Graham's Landing; A. W. Cochrane, Cranbrook; W. K. Esling, Rossland; Mrs. Sutherland, Kelowna; L. A. Watson, Nelson; J. M. McKenzie, Nelson.

JULY CLEARANCE SALE

NEW SILK AND JERSEY SUITS
Clearing at $49.95

Some of the prettiest Summer Suits we have ever shown. They come in plain Taffeta or novelty Silk, as well as a few all-wool Jersey. The styles are extremely smart as usual, and come in such colors as Navy, Taupe, Copen and Bisque. Sizes 16 to 40. VALUES TO $69.00.
JULY SALE PRICE $49.95

Ladies' Coats at $24.95

Donegal Tweed and English Velour Coats in a variety of new styles, with convertible collars and belts. These come in New Blue, Navy and Tweed mixtures, and in sizes 16 to 40. VALUES TO $40.00.
SALE PRICE $24.95

WASH DRESSES, Clearing at $5.95

10 only Wash Dresses in plain colors with contrasting trimmings. Colors are Pink, Copen and Helio, and sizes 16 to 38. VALUES TO $14.00.
JULY SALE PRICE $5.95

OTHMAN KORAN OF TREATY FAME

PARIS.—A large roll of parchment yellowed by thirteen centuries and covered with ancient Arabic script, played an important part in the construction of another and formidable historical document, the peace treaty. Germany is required by this treaty to disgorge, along with provinces, billions in cash and various art treasures, among them the Koran of Othman. Just what importance attaches to this particular copy of the Koran is a question that smites the public mind as allied to secret diplomacy.

A World Magazine interviewer carried this query to Leon Camen, Orientalist, hailing from the universities of Petrograd and Oxford—a familiar of the east, well versed in the depths and shoals of -ahometanism. It was learned that the importance of the Othman Koran is of a brand to excite the profoundest admiration, and to deserve a place on any peace treaty that was ever wrangled into being.

The first element of mysterious importance is to be found in certain theological circumstances of the seventh century, A.D.

The Prophet of Islam left nothing written, for the sufficient reason that he could neither read nor write. The numerous suras, or chapters, of the Koran stand for so many sermons, so many prophetical outbursts, which, attended by flaming disciples, were fixed in the tenacious memories characteristic of the east. Only sporadically was a passage jotted down by a rare one possessed of the gift of letters.

"Book of Leaves."

These considerations gave extraordinary importance to a canonized compilation, made at Abu Bekr's command, of the revelations of Mahomet. A commission prepared the work, headed by Zaid Ibn Tabit, a young man who had been secretary to the prophet.

This first Koran, derived of scant writings, but chiefly "from the breasts of men," was inscribed on palm leaves, from which it came to be known as the "Book of Leaves." It was a very important Koran, but it was not the one mentioned in the peace treaty.

A generation later Calif Othman had another Koran problem pulling at his Islamatic beard. A number of compilations from divers unofficial sources were in circulation. All were more or less incorrect ,and much spiritual and political disturbance resulted therefrom.

Again a commision was formed, headed by the same Zaid Ibn Tabit, now an old man, who had figured in the earlier compilation episode. Based on the venerable "Book of Leaves," which had been deposited in Medina, Mahomet's birthplace, a new and authoritative Koran was drawn up. Three copies of this original were made, and all other copies of the Koran were ordered done away with. Even the sacred "Book of Leaves" was destroyed a little later. The possession of an incorrect version was pronounced heresy, an easy passport to sub-terrestrial parts.

The three copies were given to as many Moslem centres and subsequently lost. The original, known as the Othman Koran, was deposited at Mecca, where it remained through the centuries until the late war.

Transferred for Safety.

All this, however, is but a prefatory chapter in explaining the mysterious veneration which led the Turks, when the Arab insurrection and the menace of the British Suez forces made Medina unsafe, to transfer the Othman *Koran to Constantinople, for later removal* to Berlin, when the allied fleet was promising to run the Dardanelles.

This Berlin transfer was a dreadful piece of sacrilege. The Othman Koran, one of the holiest things of Islam, had reposed for centuries in its little casket at the Mosque of Medina. No infidel had ever gained sight of it. Only Sir Richard Burton, the great Orientalist, contrived to enter the holy place—by disguising himself faultlessly as an Arab. And now this sacredest of Korans was taken to Berlin.

In the month of Ramadan the pilgrims go to Mecca. From all parts of the world they take their arduous way to pray at the holy places, and thus gain for themselves the title of Haji and the privilege of wearing the green turban.

Thus it has obtained for a thousand years, with a good proportion of the pilgrims further betaking themselves to Medina to pay devotion to the Othman Koran.

Now, these pilgrims have ever been a source of large revenue. They pay admission to the holy places, and the Arabian high cost of living does astonishing tricks for their exploitation. The district of the holy shrine would be sorely grieved if permanently deprived of any considerable portion of the pilgrim patronage.

This is precisely the misfortune that the Turk threatened to visit upon the insurgent Arabs.

National Development.

The Othman Koran is essential to the economic development of the recently formed Arabian kingdom. No outlet to the sea is more necessary to a new nation than is the ancient parchment roll to the national development of liberated Arabia. It is estimated that before the war the pilgrims spent a yearly sum approaching $30,000,000. Shall much of that be diverted to Constantinople? Not if the national aspirations of the Arabs have anything to say. Hence the presence of the Othman Koran in the peace treaty.

But even more than economic security is involved—national honor.

Suppose the Germans in a raid had carried off the English royal crown. The king would still be king, but the mislaying of his diadem would be an embarrassing circumstance. A king of the Hejaz, such as has been made recently, if he were without the Othman Koran, would have more pointed questions to answer than any one but a Moslem can know.

And the home coming of this Koran will strengthen the king of the Hejaz. Its return, in the soberest light, has elements of the extraordinary, and it would take far more commonplace events than those of the past two years to deprive devout Moslems of the thrill of supernatural interpositions.

"Do you think the Germans intended to keep the Othman Koran?" I asked the Orientalist.

"I don't," he replied. "It would take a strong imagination to picture the pilgrims, in the month of Ramadan, dragging their pious Moslem feet to Berlin."

ELKO NOTES
(By Fred Roo.)

Fred Spalding, the auto trail blazer, scores the Fernie board of trade for their procrastination in advertising the beautiful scenery surrounding the old historic burg of Elko, the beauty spot of southern British Columbia, where the trout jump high and everybody wears a smile, you can't help taking a second look at. But cheer up, Fred, if they are dead in Fernie and just waiting for George Thompson to bury them, we in Elko are sure advertising. The writer is just in receipt from Toronto informing him that Miss M. E. Gilmore of Lakeview avenue, who was the guest of Mr. and Mrs. Jim Broley, Sunkist Orchards, and Miss E. May Roo of Elko, that she had given three lectures to crowded houses, showing over 50 views of the hyacinth-tinted and picturesque Roosville valley, the Elk canyon and falls, and the automobile drives, which will help some. Having to live by the kind permission of the strike committee is enough to weaken any board of trade. If the town of Fernie would just rid itself of that bolshevik element, prosperity would spread out like measles in a boarding school, and tourists would come in like Methodists to a pink tea. So cheer up, Fred, there's a good time coming. Being cheerful is like making love to a widow—you can't overdo it.

It is the duty of every Elkoite at this time to make the visitors from other provinces and states welcome to our little city—the Queen of the Crows Nest—and make them feel that we appreciate their coming. Treat them with the same courtesy and kindness that you would desire if you were a stranger visiting other provinces or states. It's great boosting to make the strangers feel they are welcome. Personal chivalry is great stuff to hand out to the stranger; and smile awhile, for while you smile another smiles and soon there's miles and miles of smiles and life's worth while because you smile.

Mr. and Mrs. Tom Letcher and son Herbert left via auto for Vancouver. Miss M. M. Anderson, teacher, with Miss Greta Millett, left for Seattle.

Mr. Tom Gorrie, manager of the Clydebank stock ranch, Roosville valley, with several horse wranglers, were in Elko this week.

Mrs. William Parnell and daughter left for Canal Flats, where she will visit with her sister, Mrs. Fred Archer.

Jim Thistlebeak say: "There are hundreds of men who wasn't raised on a farm learned all about thrashing when he was a boy."

Alex Sinclair of Mountain View ranch, Roosville valley, returned this *week from Vladivostok, where he was* sent from the military camp Valcartier, Quebec. Alex enlisted in Fernie and went to Victoria, then crossed the continent for Quebec, then back to Vladivostok, and now back home, and says he saw nothing in all his travels that looked as good as the scenery around Elko and his home, sweet home.

Constant viligance against weeds is the price required to maintain a clean farm.

HANGS BY WRIST WATCH UNTIL HE IS ARRESTED

TORONTO.—Wong Hong, a Chinese residing at 31 Elizabeth street, was arrested after a chase on a charge of shopbreaking. He was taken into custody by Detective Leavitt, with the assistance of many frightened Celestials.

A wrist watch, so the police say, delayed Wong's flight just long enough for them to reach Elizabeth street. Wong and another Chinese, whose reputation as shopbreaker is a lengthy one, climbed a fire escape to the rooms of a friend to steal, it is said, a roll of bills which he was known to keep in his room. They were frightened as they prowled about the room and started back down the escape.

As he attempted to swing himself to the ground, the leather band of the wrist watch was caught upon the ironwork of the escape. He swung there some minutes before the band broke and had only time to hide himself in a doorway when Detective Leavitt arrived.

The second Chinese eluded Detective Leavitt after a race along Queen street.

So many of us are anxious to do away with vices—in our neighbors.

Sell Your Rags

The Daily News Job Department will pay 5 cents a pound for clean cotton rags.

General News of the City

A. L. GELINAS FINDS CROWDED ROADS IN WASHINGTON STATE

Literally Hundreds of Cars on Snoqualmie Pass Road; Brings Car From Vancouver

There were literally hundreds and hundreds of cars on the Snoqualmie pass road, as we passed through,' said A. L. Gelinas, who returned to Nelson yesterday after an auto trip from Vancouver through Seattle, Tacoma, Spokane and other United States cities.

Accompanied by Mrs. Gelinas and his sister, Miss Rose Gelinas, he left Nelson ten days ago for Vancouver. He had purchased a new car and was going to Vancouver to bring it to Nelson. He left the coast city in it on July 3, the return journey taking just six days.

He arrived at Seattle the same day, and found that it was impossible to get accommodations for the night. He finally drove on to Sumner, near Tacoma, where the party stayed overnight.

July 4 was spent in driving through the Snoqualmie pass and Blewitt pass *to Wenatchee.*

Mr. Gelinas states that the Snoqualmie pass road was lined with autos and camping parties. The car licenses showed that there were travelers from at least ten states camping in the pass.

"Down there they drive just wildly,' says Mr. Gilenas. "Usually between 30 and 40 miles an hour, and there were cars in front of us and cars behind us all the way."

"When we got to the summit of Snoqualmie pass we found snow, and as we were passing one of the campers threw a snowball at us. Fancy throwing snowballs in July.

"The road through Blewitt pass is very narrow and dangerous. The line is dotted with such signs as 'Stop, Look, Listen,- 'Stop, Danger,' and similar warnings. And you have got to stop, too, and listen for ocher cars, to avoid a collision which would *probably result in a drop of 400 or 500* feet from the road.

"I had considerable difficulty in passing machines on this road. The Blewitt pass is being widened, however, and $150,000 has been appropriated for the work.

"At Wenatchee, where we arrived on the night of July 4, we had difficulty in obtaining accommodation. The town was crowded on account of the celebration. We found this difficulty most of the time, and at one time things were so bad I slept on a floor.

"We ran into a sand storm at Coulee City on Saturday, which made driving hard.

"There is plenty of fine scenery along the route. The roads, on an average, are good."

The route taken by Mr. Gelinas from Vancouver was through the following cities. Bellingham, Seattle, Tacoma, Wenatchee, Davenport, Spokane, Che*welah, Colville Nortnport, Rossland to* Nelson.

CIVIL SERVANTS NAME DELEGATES

Amendments to Constitution and By-laws of Association Discussed Last Night

Amendments to the constitution and bylaws for the presentation at the annual general meeting of the association were discussed at the regular meeting of the local branch of the civil service association held last evening.

Delegates were chosen by the meeting to attend the annual general meeting of the association. The meeting will be held in Vancouver on July 26. The delegates appointed were J. Goulding, C. McGuigan and A. E. Pickford.

Many important questions will be discussed at this convention it was stated last night, and it is expected that a full representation from other branches of the association in the interior will be in attendance.

TO ELECT QUEEN OF ROSE FESTIVAL

Each Ticket to Display Will Entitle Holder to One Vote—Contestants to Register.

"Who is to be queen of the rose festival?" The question is agitating the minds of the women in Nelson's younger set. The contestant receiving the highest number of votes before 9:30 or July 21 will be queen of the rose festival to be held on July 23 under the auspices of the Nelson Improvement association. The next two highest contestants will act as attendants.

Nominations for the honor are to be handed in to J. W. Holmes not later than 9:30 Saturday evening, July 12. Each ticket to the rose show costing 25 cents will entitle the holder to one vote for one competitor. The first handed in will receive 200 votes to its credit, and each succeeding contestant 10 votes less than the previous one.

Suitable souvenirs will be presented to the queen of the festival and her two attendants.

Plow deep and pack. It pays.

A few extra repairs may save much valuable time.

Don't forget the horses when you are taking a drink.

Money makes the mare go, but it takes good oiling to run machinery.

WEDDINGS

GRIZZELLE—AMAS

One of the prettiest weddings of the season took place yesterday at Trinity Methodist church, when Miss Beatrice Laura Amas, daughter of Mr. and Mrs. H. Amas, of Rosemont, was married to Herbert Cecil Grizzelle, son of Mrs. E. Grizzelle.

The marriage was solemnized at seven o'clock in the evening, by the Rev. J. P. Westman. The church was beautifully decorated with pink and white roses and ferns, the ceremony taking place under a huge bell formed of roses. Ferns and roses were massed over the altar rail in the form of an archway. The decorations were the work of the women members of the church.

The bride wore a dainty frock of white crepe de chene and a white picture hat. Her flowers were white roses and carnations. She was given away by her father.

Miss Catherine Vipond, of Nakusp, was bridesmaid. Her dress was of pink crepe de chene and she carried pink and white roses and carnations.

The bridegroom was attended by Fred Grant.

Throughout the ceremony appropriate music was rendered by Miss Ina Steed.

After the wedding a buffet lunch was served at the home of the bride. The newly married couple left this morning on the Crow boat for a honeymoon trip to coast cities, traveling by way of Spokane. On their return they will make their home in Nelson.

They were the recipients of numerous and costly gifts.

The bridegroom's gift to the bride was an onyx and pearl brooch. His gift to the bridesmaid was a sapphire pendant; to the best man he presented a tie pin and to Miss Ina Steed a silver coin purse.

HUNT-BRIDGMAN

On Wednesday, July 9, by Rev. F. H. Graham, rector, Thomas Edgar Hunt of Calgary, Alta., was married to Mrs. Clare Bridgman, of Worcester, Mass., U.S.A.

HARRISON—HALL

The marriage was solemnized at *Trinity Methodist church last even*ing of Miss Elvira Jane Hall, daughter of Mr. and Mrs. George Hall, and Robert Samuel Harrison, only son of Mrs. H. Harrison. The ceremony was performed by Rev. J. P. Westman.

The bride's dress was of Alice blue silk. She wore a hat to match. She was unattended.

After the ceremony the couple left on the coast train for Vancouver and other points, the bride wearing a traveling suit of navy blue serge.

They will make their home at Lucerne, B.C.

ANOTHER 900-POUND COW IN OREGON

PORTLAND.—*Oregon is the pos*sessor of another 900-pound Jersey cow, this time in the person of Rochette's Bonnie, owned and tested at the well-known Fair Acres stock farm of Messrs. John B. Stump & Son, Monmouth, Ore. Rochette's Bonnie's total production as reported by her owners is 17,381.1 pounds milk and 943.05 lbs. fat, equivalent to 1109.4 lbs. of 85 per cent butter, or 1178.56 lbs. of 80 per cent butter.

This places Rochette's Bonnie in ninth place, all ages, for fat production and eighth for milk. She is now the champion imported cow, replacing her half-sister, Rochette's Princess, which finished a few months ago with 933 lbs. fat. Incidentally her sire, Rochette's Noble, is now the only imported bull with daughters having produced over 900 lbs. fat, and the only bull, living or dead, with the exception of Golden Glow's Chief, that has two daughters to produce over 900 lbs. fat in one year. He is also the only bull, living or dead, with the exception of Hood Farm Toronto, having two daughters to milk over 17,000 lbs. in one year. Rochette's Bonnie and Rochette's Princess have exceeded both the above figures, which places them among the greatest pairs of sisters the breed has produced, and will do much to strengthen the claims of the Nobles as big producers. The two cows now hold first and second place among imported cows for both milk and fat production.

While everything connected with Rochette's Bonnie's test confirms the greatness of this little cow, much credit must be given to her herdsman, Mr. Hartzell Crosby, who, through the times of stress to get proper feed, carried her through the year without allowing her to get off feed or accident of any kind to occur, while at the same time managing the entire herd of milking cows. He very modestly gives all the credit to Bonnie, so the balance of the story is in his own words, though I was frequently on the farm and in the barn at milking time and other occasions and know personally most of what he tells, as follows:

"Rochette's Bonnie began her test May 15, 1918, at the age of eight years and two months. She began by milking some 32 lbs. on her first day's work and rose rapidly until before June 1 she had passed the 60-lb. mark. She averaged almost exactly 65 lbs. of milk per day throughout the month, reaching her maximum flow July 1, when she produced 68.8 lbs. of milk. Her best month was July, when she milked 1923 lbs., containing 100.02 lbs. of fat.

"During the year Rochette's Bonnie was fed a number of kinds of feed, but at no time was she fed anything like a variety. From May 15 to about October 1 she was fed a mixture of ground oats and linseed meal. From October 1 to December 15 she was fed a mixture of wheat bran, ground wheat screenings and linseed meal. From December 15 to about February 1 she was fed linseed meal and ground wheat screenings, after which time bran was again available and was added to the mixture. From March 15 to the end of her test she was fed wheat bran, oats and linseed meal. The feeds given represent what were available and are not intended as a sample of good feeding, as any breeder can see that such a ration could hardly be expected to produce the best results. Pasture was used during five months of the year and corn silage was fed for six months.

"Rochette's Bonnie ran in the pasture night and day until the first of *November, after* which time she was kept in a roomy shed, well bedded with straw. Throughout the year she was handled in a group of seven cows, which were being milked three times a day, and she received the same care and attention as the others. She was never blanketed nor curried, and at no time did she receive either warm feed or warm water.

"Rochette's Bonnie finished her test in splendid condition and, barring accidents, will qualify for Class AA. In addition to being a great producer she is a splendid breeder. She is dam of two good heifers in the Fair Acres herd. One of them, soon to freshen, is considered by many to be about the finest individual bred at Fair Acres in a number of years, and certainly, considering her great inheritance, she is a remarkable example of the combination of correct type with high production."

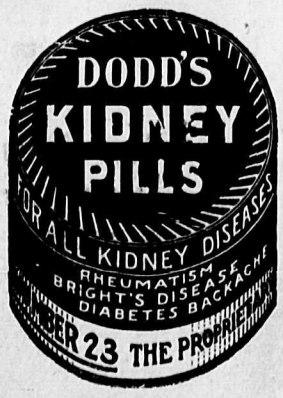
FOREST SAFEGUARDS.

FREDERICKTON. — New Brunswick is making a determined effort to safeguard her forests. Twenty-nine experienced forest rangers were appointed last week and these, with the 17 game wardens of the province, will not only fight fires that get a start, but will do their utmost to correct such conditions as cause fires. All these men are under the advisory board of the New Brunswick crown lands department. This board is erecting observation towers as strategic points and these twoers are all connected by telephone. The chief observation tower will be on Bald mountain, a site 3000 feet above sea level and the highest point in New Brunswick. From this location a wide area can be watched.



PEOPLE LEARN IN MANY WAYS

Mrs. Hotall says that to make any kind of salad dressing, she prefers Pacific Milk to even fresh cream, because it makes it more smooth and gives a pleasant richness of flavor.

Mrs. Hotall learned this from a launch trip last summer when fresh cream could not be had. Now she uses Pacific Milk in all her cooking.

INCREASE WEIGHT AND VITALITY WITH PHOSPHATE

Nothing Like Plain Bitro-Phosphate to Put on Firm, Healthy Flesh and to Increase Strength, Vigor and Nerve Force

The average person is beginning to realize more and more that the lack of physical strength and nerve exhaustion (frequently evidenced by excessive thinness) are the direct cause not only of the failure to succeed in life's struggle for the necessities of existence, but also for the handicap in one's social aspirations. Compare the thin, sickly, angular figure with the well rounded form which is usually accompanied by the bloom of health and attractiveness.

That millions of people are conscious of this handicap is evident from the continued appearance in newspapers and magazines of many suggestions proposing various remedies in food or medicine or exercises, either of which migh or might not be appropriate for a given case.

Authorities, however, agree that healthy nerve tissue is absolutely essential to a strong, robust body and mind. Weak nerves, while indicated by a multitude of different symptoms, more immediately and generally result in lack of energy, sleeplessness, irritability, depression, etc., which conditions gradually consume the healthy flesh, leaving ugly hollows, a flat chest, bony neck and scrawny arms and legs.

Our bodies need more phosphate than most of them are able to extract from the foods we eat nowadays, and many opinions affirm that there is nothing which may be taken into the human system that so effectively supplies this deficiency as the pure organic phosphate known as bitro-phosphate and sold by the Canada Drug & Book Co. in Nelson, and by good druggists everywhere.

The essential phosphoric food elements in bitro-phosphate assimilated by the nerve cells should soon produce a pleasing change in enerve enervy and hence increased vitality and strength. With the burdens of nervousness, sleeplessness, lack of energy, etc., lifted, normal weight with its attractive fulness and ruddy glow of health replace the former picture of skin and bones.

CAUTION:—Although Bitro-Phosphate is unexcelled for the relief of nervousness and attendant disorders, owing to its tendency to increase weight, one should watch the scales while taking it unless it is the desire to put on flesh.

You Can Avoid Operations
For Appendicitis and Gall Stones through the use of Hepatola, a medicine recognized as far better, safer than operations. $5.50 treatment.

EDMONTON RACES.

DMONTON, July 9.—Calgary Earl, ned by S. H. Roe of Calgary, won free for all in straight heats to- at the exhibition races. The best e was 2:08¼, beating his own time Calgary last week by a quarter nd and equalling the best time le on the Edmonton track in a , although the track record is ¼, made in a time race by Bland n 1911 and setting the Canadian mile track record. The results as follows:

irst race, free for all, purse $800—gary Earl, owner S. H. Roe, Cal-y, 1-1-1; Lady Hal, owner D. J. Donald, Winnipeg, 3-2-4; Mildred ect, Fred Johnson, Calgary, 4-3-2; nadille, Joe Huber, Bozeman, Mont., -3. Time, 2:10¼, 2:09½, 2:08¼.

econd race, 2:24 trot, purse $1000—rid C., J. F. McGuire, Denver, Colo., -4-1; Nabob, Joe Huber, Bozeman, nt., 2-4-1-2; Captain Speer, A. D. nour, Ottawa, 3-1-5; Bilston, J. A. veley, Strathcona, 5-3-2; Jetlock, llemb, Calgary, 7-6; Lotita, J. wart, Calgary, 6-7. Time, 2:15¾, 9¾, 2:19¼, 2:18¾.

hird race, six furlongs, Edmonton nt club riders only—First, Charles y, owner Frank McLean; second, . R. C. Willson; third, Conflagra-, owner Hardy Cook. Time, 1:26.

ourth race, six and a half furlongs irst, Leo -MA, owner G. K. Allen, nonton; second, Prairie, owner C. Emmert, Connors Creek; third, Top ts, owner McLeod & Powley, Sas-oon. Time, 1:23.

ifth race, six furlongs—First, Col-le, owner G. Addison, Lethbridge; nd, Chantour, owner G. Chambers, nonton; third, Hustler Joe, owner nklin, McLeod. Time, 1:18¾.

ixth race, five furlongs, three-year-s and up—First, Killarney Belle, er G. Lowen, Wetaskiwin; second, ala, owner G. Boyd, Calgary; third, man, owner J. D. Ferguson, Saska-n. Time, :59¼.

MAGNIFICENT CATTLE SHOWN AT EDMONTON

EDMONTON, July 9.—Farmers' day today at the Edmonton fair shattered all previous records for the early part of the annual event. The weather continues ideal for holidaying. The Holsteins were judged in the dairy cattle ring, but the classes are so large that the black and white cattle will occupy the attenelon of the judges for another day. The Herefords were on review and some of the most magnificent cattle in the country were shown. In the aged bulls alone there were seven animals in the ring and Frank Collicutt led with his old Gay Lad. Sixteen Shorthorns got through to the herds on Wednesday morning, Barron winning out in the graded herd with a uniform group built up to his big bull Lavender Lord. All were of his own breeding with the exception of the big roan bull. There were also some beauties shown in the Angus classes.

Winners in the Belgian and Shire classes were placed with little loss of time. With his fine string of Shires, Tom Rawlinson of Innisfall, made a clean sweep of the ribbons, starting with Saxon Lad in the four-year-old stallion evene and winding up with the championships and specials by the Shire horse Society of London, England. Coluee Princess was the champion mare, with Maggie B. a runnerup. The three-year-old stallion Dunsmore Lad was next to Saxon Lad in the big events. The beautiful yellow sorrel thoroughbred stallion, Ben Ara, strengthened his Calgary winnings, where he was awarded the Alberta championship, the grand championship and the first in the open class for his kind.

WESTERN PROVINCE IN CONNAUGHT CUP SERIES

MONTREAL, July 9.—Owing to the addition of British Columbia and Alberta to the Connaught Cup series a rearrangement for the games has become necessary. The latest idea is: British Columbia to visit Calgary and play Alberta, the winner coming direct to Montreal. Manitoba and New Ontario to do likewise, also Ontario and Quebec. This will mean three teams to appear in Montreal., One will receive a bye, and the other two play a semi-final wiehe grand final to take place on August 16th.

NATIONAL LEAGUE

PHILADELPHIA, July 9. — Tony Pasquarillo, overseas veteran and star of the army team, scored the run which broke Philadelphia's losing streak in the eleventh inning of the second game today, which the locals won 5 to 4, after they had lost the first game to Chicago 6 to 1, and tied their own National league season's record of 13 straight defeats.

First game—	R.	H.	E.
Chicago	6	12	2
Philadelphia	1	4	1

Batteries — Vaughn and Killifer; Jacobs and Cady.

Second game—	R.	H.	E.
Chicago	4	13	0
Philadelphia	5	13	3

Batteries—Douglas, Bailey and O'Farrell; Rixey and Clark.

BROOKLYN, July 9. — Pittsburg shut out Brooklyn here today 2 to 0.

Score:	R.	H.	E.
Pittsburg	2	11	0
Brooklyn	0	6	1

Batteries — Adams and Schmidt; Grimes, Smith and Krueger.

BOSTON, July 9.—Giving Sallee brilliant support, Cincinnati defeated Boston 3 to 1 today.

	R.	H.	E.
Cincinnati	3	8	0
Boston	1	8	2

Batteries—Sallee and Wingo. Cheney and Gowdy, Tragressor.

NEW YORK, July 9.—In a loosely played game with many wrangles with the umpire, St. Louis defeated New York by a score of 12 to 8 here today. Twenty-two players took part in the contest.

	R.	H.	E.
St. Louis	12	15	4
New York	8	8	2

Batteries—May, Tuero, Meadows, Sherdell and Snyder; Dilhofer; Dubuc, Ragan, Schuppe, Perritt and Gonzales, McCarty.

AMERICAN LEAGUE

ST. LOUIS, July 9.—Sothorn outpitched Mays and St. Louis took the opening game of the series from Boston today 3 to 0.

Score:	R.	H.	E.
Boston	0	7	0
St. Louis	3	7	1

Batteries—May and Schang; Sothorn and Severoid.

CHICAGO, July 9. — "Red" Faber was given credit for two victories today when Chicago defeated Philadelphia in both games of a double header 8 to 7 and 6 to 2.

First game—	R.	H.	E.
Philadelphia	7	10	0
Chicago	8	11	1

Batteries—Rogers, Kinney and McAvoy; Lowdermilk, Danforth, Faber and Schalk.

Second game—	R.	H.	E.
Philadelphia	2	6	2
Chicago	6	12	1

Batteries — Johnson, Kinney and Perkins; Faber and Schalk, Lynn.

CLEVELAND, July 9. — Cleveland defeated New York today by 2 to 0, breaking Pitcher Shawkey's winning record after he had won 10 straight.

Score:	R.	H.	E.
New York	0	7	0
Cleveland	2	6	0

Batteries — Shawkey, Russell and Hannah; Coveleskie and O'Neill.

DETROIT, July 9.—Heilman's single and Shorton's long hit to centrefield in the tenth inning gave Detroit today's game with Washington 2 to 1.

Score:	R.	H.	E.
Washington	1	3	1
Detroit	2	6	1

Batteries—Shaw and Picnich; Boland and Ainsmith.

BRITTON KNOCKS OUT DOTY

COONNELSVILLE, Pa., July 9.—Jack Britton, welterweight champion, knocked out Al Doty, of Canton, Ohio, in the second round of a scheduled 12-round bout here tonight.

WESTERN CANADA LEAGUE

At Regina—First game:	R.	H.	E.
Winnipeg	1	3	2
Regina	2	8	1

Batteries — Heath and Brown; Hewitt and Gomes.

Winnipeg	0	7	1
Regina	1	3	1

Batteries — Miller and Jordan; Hewitt and Gomes.

At Moose Jaw—	R.	H.	E.
Saskatoon	3	10	2
Moose Jaw	1	6	1

Batteries—Miller and Beyers; Eastley and Patterson.

CALGARY WOMEN FAVOR DIVORCE LAW FOR ALTA.

CALGARY—Much discussion has arisen lately as to whether the courts of the different provinces should be able to grant divorces or not, and, of course, everyone has a right to one's own views. The women of Calgary are all practically of the same opinion, and that is that each province should have the right to grant divorces.

Mrs. R. R. Jamieson, judge of the juvenile court, in speaking to a representative of the Herald, said that she thought the court of Alberta was just as competent to give the same just judgment as the senate, but that she would not like to see the law too light. "Heretofore," said Mrs. Jamieson, "the divorce laws have only been for the rich, and it has meant that people had to go to the States in order to obtain a divorce, but I would not like to see the laws of Alberta as light as in some of the smaller states. Because of the vastness of the Dominion, it seems much more rational and reasonable that the province should be able to grant its own divorces. But," said Mrs. Jamieson, "once a divorce is granted it should be Dominion wide."

Mrs. Kerby: "Marriage is a contract," said Mrs. Kerby, "and a contract made in Canada should be dissolved in Canada," but it should not cost such an outrageous sum. Justice should be always first."

Mrs. Woodhall: Mrs. Woodhall also expressed her views in sympathy with Mrs. Kerby and Mrs. Jamieson, saying that although she was in favor of divorce in a case of emergency, yet she was afraid that if thet laws were made too light that too many would apply in a hasty moment and afterwards regret the steps which they had taken. Marriage is a solemn thing," said Mrs. Woodhall, "and so is divorce; therefore the parties applying should have a very just reason for doing so."

Mrs. Fenkell: "If we are to have courts at all,' 'said Mrs. Fenkell, "it should certanly be open to all, and not only to those who can afford enormous sums of money."

A. L. WILSON

Buy a $10 Unit in Texas Oil-May Make You $100 in Short Time

ere's a chance to make big money on a $10 investment—or to lose but 0—You cant lose much if you do lose—You may make hundreds—or even ousands. Note the men back of this enterprise. *Then decide yourself.*

reat Fortunes Are Made When Oil is Struck

All the oil enterprises that are today pouring forth such vast riches were at the start speculative. This is speculative. If this were not speculative—if oil were actually spouting from wells on this property today—you wouldn't have this opportunity—your money wouldn't be needed or accepted.

Folks of very limited means—often very poor people with only a record of honesfty—and many capitalists **HAVE BEEN REAPING A FINANCIAL HARVEST** through Texas oil resources.

It is reasonable to expect that what has happened elsewhere—in other Texas oil territories—must happen here. Those who bought ahead of the drill in other sections are rolling in wealth today. Take the famous Burkburnett and Ranger districts here at one time—not many months ago—leases could be easily bought around $10.00 an acre. Deals have been reported recently as high as $195,000 an acre. Frequent deals in that field are around $25,000 an acre. An oil strike did the work.

The Men Behind This Company

You are invited to "look up" this Company through any channel you may choose. The officers and directors whose names follow are all men of integrity and reliability. They are putting their own money and faith in this enterprise, with a determination to make it a big success

HARRY C. ALBRO, President
Vice-President Universal Oil and Products Co., Buffalo, New York

G. M. YUNKER, Vice-President
Real Estate and Oil, Buffalo, New York

M. B. SHEPARD, Secretary and Treasurer
Manufacturer

FIVE WELLS TO BE DRILLED NEAR ROBY

FORTH WORTH STAR - TELEGRAM—Edition Wed., May 21, 1919:—Roby, Texas, May—Five oil well drilling contracts have been signed on blocks of leases in the country and seven more are being negotiated at this time.

Our Holdings in This Rich Field Offer Choice Locations for Many Wells

We own leases aggregating 292 acres situated Northeast of Roby, Fisher County, Texas, a short distance west of the Ranger field, where many gushers of from 1,000 to 12,000 barrels of oil per day have been brought in.

Our leases offer choice locations for upwards of 60 wells. There are four oil sands in this section, and our chances of striking a gusher are equal to any and better than most.

On the North and East we have Burkbernett, Iowa Park, Electra and Henrietta fields, and on a direct line, a short distance East the famous Ranger oil fields all big producers. The Company's land shows all the surface indications of oil that these other fields ever had. Producing wells are being brought in nearer every day—wells are now drilling to the North, East and South.

Many new locations are being made in this section—drilling rigs are being rapidly moved in and instructed to begin operations at once. The activity in this section is increasing daily and development is being rushed on a large scale. Any day word may reach us of the bringing in of these wells—**a gusher—would mean thousands or perhaps millions of dollars in increased values of our leases and the stock of this Company.**

These are some of the reasons—without going into geological or technical details—why the officers and directors of the Company have such faith in this property.

10 Cents a Share Now and Money Back in 10 Days If You Want It

To enable the Company to start drilling as soon as possible and to pay necessary overhead costs this popular subscription plan has been adopted, and this most unusual offer is made to those who will act at once. **If you will remit promptly you will pay but ten cents per share or $10 per unit of 100 shares.**

Send your money any convenient way—money order, *check, bank draft or currency by registered letter—then* look up the Company or directors or property, and if not perfectly satisfied, ask return of your money within 10 days, and it will be forwarded to you at once.

Facts concerning this proposition have been told you in brief without elaboration. **What do you think about the prospects of making your $10 in this venture grow many fold?** As good as it looks, you have not been told anywhere near all the favorable things about this immense project.

If you want a $10 unit at the ground floor price—fill out the subscription coupon (or send letter) without delay and send it with your $10—**before the price goes up.**

Buy Now--After We Start to Drill You'll Have to Pay More For This Stock

Courage, initiative ability to see and grasp opportunities—that's what makes your money make money for you—and the most of your opportunities. This is within your reach. Decide now.

WE RESERVE THE OPTION TO ADVANCE COST OF UNITS WITHOUT NOTICE

You Deal Direct With the Company (No Brokers or Agents)

The Hudson's Bay Company

INCORPORATED 1670

THS ARTIST

Ted Robinson, in Cleveland Plain Dealer

When I looked upon her photo, I was bewitched, in toto.
I was captivated to the point of mushiness!
I perused each charming feature of the fascinating creature,
And my fervent admiration verged on slushiness.
"She is charmin'—she is rippin'! She's a lily, she's a pippin!
She's the perfect peace of porcelain from the pottery!
She's a lyric—she's a Sapphic! She's the Dame that Blocks the Traffic!
She's the first prize in Life's everlasting lottery!
Gained I not an introduction, I'd have practiced self-destruction—
My passion was both terrible and tropical!
But I'd friends, and soon could bring 'em to produce this piece of gingham,
Though they did it in a manner misanthropical.
Bubbles we—and breezes bust us! Did the picture do her justice?
Is mythology constructed by machinery?
I confess to irritation—also to my admiration
For the artist who retouched that bit of scenery.

A PLATITUDE.

Physician—You are burning the candle at both ends.

Rich and Irritable Patient—Any cheap, old-fashioned doctor could have told me that. When I pay you $50 for an opinion, you ought to use a metaphor more in accordance with this age of gas and electricity.

MUSCULAR POWER VARIES WITH AGE OF INDIVIDUAL

LONDON.—Acording to excellent authority, the muscles, in common with all organs of the human body, have their periods of development and decline, our physical strength increasing up to a certain age and then decreasing. Tests of the strength of several thousand individuals have been made, and the following figures are given as the averages derived from such tests: The lifting power of a youth of 17 years is 280 pounds; in his 20th year this increases to 320 pounds; and in the 30th and 31st years respectively it reaches its height—365 pounds. At the expiration of the 31st year the strength begins to decline, very gradually at first. By the 40th year it has decreased eight pounds, and such diminutions continue *at a slightly increasing rate* until the 50th year is reach, when the figure is 330 pounds. Subsequent to this period the strength fails more and more rapidly, until the weakness of old age is reached. It is found impossible to obtain trustworthy statistics of the 50th year.—Family Herald.

AN HONOR OF PEACE.

"What are your impressions of No Man's Land?"

"I didn't get into the war," answered the morose citizen. "My only vivid idea of No Man's Land is home while spring housecleaning is going on."

DEPARTMENT OF PUBLIC WORKS, CANADA.

Tenders will be received by the undersigned up till July 30th, for the delivery at Harrop Wharf, West Arm of Kootenay Lake, of thirty (30) fir piles, 40 feet long, 12-inch tops, peeled and pointed. All piles to be of straight, sound, live fir.

J. P. FORDE,
District Engineer.

Nelson, B. C., July 8th, 1919.

Lady—Why don't you go to work? Don't you know that a rolling stone gathers no moss?

Tramp—Madame, not to evade your question at all, but merely to obtain information, may I ask what practical utility moss is to a man in my condition?

MINERAL ACT.

(Form F.)

Certificate of Improvements.

NOTICE.

Fern, Gem, Jewel, Excelsior, Standard, Iva, Black Cap mineral claims, situate in the Nelson Mining Division of West Kootenay District.

Where located: On Cultus Creek, about six miles from Kootenay Lake.

Take notice that I, A. H. Green, acting as agent for J. W. Mullholland, Free Miner's Certificate No. 14545-C, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this eleventh day of March 1919. A.D. A. H. GREEN.

NELSON LAND DISTRICT.

I, Bjorn F. Knudsen, of the City of Nelson in the Province of British Columbia, rancher, intend to apply for permission to lease ten acres, more or less, of lands bounded as follows:

Commencing at a post planted at the North West corner of Lot 4395, Group 1, Kootenay District; thence South Easterly along the shore line of the West Arm of Kootenay Lake 41 chains, more or less, to the North East corner of said Lot 4395; thence North 3 chains; thence North Westerly 41 chains, more or less, parallel to the aforesaid shore line of the West Arm of Kootenay Lake 41 chains, more or loss, to the Northerly production of the West boundary of said Lot 4395; thence 3 chains Southerly to the point of commencement.

Dated this 1st day of July, A. D. 1919.

B. F. KNUDSON.

SOLDIERS' RELATIVES GUESTS AT PICNIC

About 14 widows of soldiers, and their children, were the guests of the women's auxiliary of the G.W.V.A. at a picnic at Proctor yesterday. The party, numbering about 50, were taken in autos in the morning to the wharf, where two big launches awaited them to convey them up the lake to Proctor. They started about 9:30 and arrived at Proctor at 12 o'clock, in time for a chicken dinner at the hotel.

The afternoon was spent in sports of all kinds, both for the grown-ups and the kiddies, under ehe supervision of R. G. Joy and Sidney McDonald. Prizes were given for the sports, and not a child left the grounds without winning a trophy of some kind.

After supper at the hotel there was a tug-of-war contest and scramble for candy, the latter game proving particularly popular among the children.

The launches started on their homeward journey about 7:30 and arrived in town again about 10:30, bringing with them the picnickers.

The following were the prize winners in che sports: Rooster fight, F. Mawdsley, S. Butter; throwing baseball, women, Mrs. Rowling, Mrs. Goldsmith; egg and spoon race, women, Mrs. Wright, Mrs. Goldsmith, Mrs. Edmonson; egg and spoon race, girls, Dorothy Goldsmith, W. Brown; driving and hammer race, Miss McVicar, Mrs. Wright; young women's race, Miss McVicar, Miss Rowling; women's race, Mrs. Wright, Mrs. Rowling; tiny tots' race, S. Rowling, C. Ratcliffe, L. Butter, Jack Currie, Lloyd Ratcliffe; 50 yards, 10 years and under, Lloyd Ratcliffe, Jack Currie, Syd Rowling; 50 yards, girls under 10, Irene Edmonson, Dorothy Goldsmith, Violet Rallins; boys 12 to 14, W. Brown, Stanley Butler, W. Ratcliffe; boys over 14 to 16, F. Mawdsley, J. Rowling; girls, 10 to 14, Irene Edmonson, Grace Bonacci; boys' three-legged race, F. Mawdsley, F. Hodge, T. Halsey, S. Butler; girls' three-legged race, Githa Brous, Violet Rowling, Irene Edmonson, Dorothy Goldsmith; boys' sack race, F. Hodge, T. Halsey, girls' sack race, Irene Edmonson, H. Butler.

FREAKS OF BIRDS IN BUILDING NESTS

Some Birds Burrow Underground and Into Dead Trees—Dipper Bird Builds by Waterfalls That Keep the Nest Green.

VICTORIA.—A very considerable addition to the ornithological collection in the Natural History museum at the parliament buildings at Victoria has been made by Walter F. Burton, one of the most enthusiastic bird students in western Canada. The classification of the one hundred or more varieties of eggs included in this gift has already been completed, and the nteresting specimens may be seen by any visitor to the museum. The donor of this collection has many interesting and illuminating stories to tell about the manner in which he secured his specimens and the minute study he had to make of the different birds' domestic habits before he could discover their nests.

The only way to collect birds' eggs is to collect scientifically, watching closely the habits of the bird. Simply "taking" eggs for the sake of taking them teaches one nothing and incidentally very much annoys the owner of the nest. In this connection, however, it is interesting to learn that nearly all birds if their eggs are taken, within ten days or a fortnight will have another nest and eggs. Thus is each kind of bird fortified against annihilation of its species. Actually on Vancouver island the worst robbers of birds' nests are squirrels and bluejays, who take both the young and the eggs.

Eggs Big and Small.

The biggest egg in this case of specimens presented by Mr. Burton is that of an albatross, laid on one of the islands of Japan. It is, perhaps, the only egg in the collection which he did not get himself.

The smallest egg, on the other hand, is that of the Rufous humming bird. The humming birds migrate south in the winter and come here early in the spring to nest. The male bird will have nothing whatever to do with the nest making or hatching, and boys and girls have doubtless noticed a tendency to quarrelsomeness on the part of this beautiful and vivid colored creature. It is interesting that the smallest bird and the biggest (the bald eagle) should have some habits in common; each comes back year after year to nest in the same place, often building on top of its old house.

Another nest shows the eggs of the western winter wren. The father bird, unlike the humming bird, helps his mate extravagantly in the building, and in addition to the nest where the young are to be hatched, he flutters about building promiscuously all over the place, while the lady bird sits on the eggs. His nests are never feathered, however, and are, consequently never used. Once the baby birds are hatched he concentrates his attention on their feeding.

Decorating Nests.

Most birds have a decorative sense. The warbling vireo, for instance, always embroiders his nest with cobwebs on the outside. The vireo, it should be mentioned, is one of the very few birds that sings while sitting on its eggs, although the black-headed grosbeak, which builds a cold-looking nest of thin twigs, also sings on the nest.

Naturalists have long puzzled over the habit of the nuthatch, which smears the entrance to its hole-in-a-dead-tree nest with pitch. Perhaps some boy with good powers of observation will take up the quest for the answer after seeing the nuthatch's eggs at the museum. They are very small, white ground with reddish brown spots.

A particularly luxurious-looking nest in the collection is that of the dipper, a little bird which makes its home of moss, always near, and sometimes behind a waterfall, where the spray of the water wets the nest and keeps it green like its surroundings so that enemies do not find it easily. There are five snowy eggs in this nest, which was found at Goldstream.

Only silver wyandotte feathers were picked up in the poultry yard where the Vigors wren lived when it built the neat little house now shown at the Natural History museum. There were all manner of other hen feathers to choose from, but the wren preferred the silver wyandotte's.

Burrowing Birds.

Most burrowing birds, whether they burrow in trees or underground to make their nests, lay white eggs. Quite a number of white eggs are shown in this collection, including those of the bluebird and rhinoceros auklet. The latter is a deep-sea bird, and the nest from which the eggs shown were taken was found on Pine island. The burrow in which it was found was three or four feet down, and very long. Curiously enough, there are no birds visible about the island in the daytime. They are afraid to betray their habits, so the male bird comes in at night, in the dark, and feeds the nesting mother with fish, which they often have to re-gorge (unswallow) for the purpose.

Some eggs about the size of a pigeon's belong to the petrel, the smallest seagull, which is also a "burrow" bird. It has a habit of spitting a drop of fish oil at enemies attacking it.

The best egg in this collection is one laid by Peal's falcon on the northern Queen Charlotte island. It is a dark chocolate brown, four eggs in the nest ,and is very difficult to find. Another very difficult egg to find is that of the olive-sided fly-catcher. This is a light brown egg with a ring of mauve and brownish spots. The eggs of the eagle and the pileated wood-pecker are also difficult to find, the former building in the highest trees he can find, the latter at the top of enormous dead stumps.

One other particularly interesting egg is that of the California murre, a fresh water bird which breeds in colonies, laying eggs, one at a time, on the narrow edge of a cliff . The interesting feature of this egg is the birds lay within an inch of each other, eggs found lying side by side, never being the same color. It would confuse the mother birds to find two eggs of the same shade side by side. So they make this convenient little agreement between themselvs in order to avoid trouble.

Nelson Improvement Association Floral Festival

WEDNESDAY, JULY 23rd, 1919

WHO IS TO BE QUEEN OF THE FESTIVAL?

Nominations may be made with Mr. J. W. Holmes at The Ark, Vernon Street, not later than 9.30 Saturday evening, July 12th. Each ticket of admission to the Rose Show costing 25 cents entitles the holder to one vote for one competitor.

First nomination receives 200 votes and each succeeding contestant 10 votes less than the previous one.

The contestant receiving the highest number of votes before the closing of the ballot at 9.30 Monday evening, July 21st, 1919, will be declared Queen at the opening of the Show at 2.30, July 23rd, and the two next highest contestants will act as attendants. All three young ladies will be awarded suitable souvenirs of the occasion.

FRANCE'S DAY

France makes her final appeal through the Canadian Red Cross Society for the sick and wounded soldiers of her nation.

SUPPORT NELSON BRANCH

Tag Day, Saturday, July 12, 1919

Corporation of the City Nelson
Water Users Attention!

The City Council wishes to draw attention to the wastage of water through leaky taps and fixtures and to point out the absolute necessity of conserving the available water supply during the hot weather.

Look over your taps and fixtures and assist the City by having them repaired where necessary.

Otherwise an inspection of all premises will have to be made and services discontinued where water wastage is found and the hours regulated for sprinkling and garden services.

By Order,
W. E. WASSON,
City Clerk.

Emory & Walley

A PLAGUE OF HORSES.

MELBOURNE.—While Europe is short of horses, Queensland, in Australia, is plagued with them. The "brumbies" of Queensland are horses that have run wild on the large stations, finding their own food, and breeding in herds without the help of man.

During the years of the war, when the men on the stations went out to fight and few hands were left to do the work, the brumbies increased to such an extent that they are now not worth catching, breaking and selling. At a recent sale the highest price obtained for a brumbie was eight shillings.

In order to clear the land for cattle-breeding the station owners are engaging men to hunt down the herds of wild horses and destroy them.
