ACCEPT CUT, URGE JOINT RAIL HEADS

DISORDERS IN CUBA FATAL TO 8 MORE PEOPLE

Enemies of Old Regime Seek Out Its Supporters for Vengeance

PRISONERS PROTEST AND ARE FIRED AT

New Evidence Adminstration Has Support of Other Governments

HAVANA, Aug. 15 (AP)—Eight more persons met violent deaths today in post-Machado disorders as the new government of President Carlos Manuel de Cespedes labored to set its political and economic house in order.

Although the frenzied mob activity which broke out three days ago in celebration of the downfall of President Gerardo Machado had largely abated, enemies of the old regime still sought out its supporters to exercise vengeance upon them. The total number of dead was raised to 65 since Saturday morning.

Several inmates of Principe prison were wounded when they were fired upon by guards and soldiers after they had protested the placing in the penitentiary the aides of the former president.

The disorders became to violent

MINIMUM PEGGED PRICES ARE OFF TODAY, CHICAGO

CHICAGO, Aug. 15 (AP)—Trading on Chicago grain market resumes tomorrow with the minimum "pegged" price removed on futures, the only restriction being a maximum five cents per bushel fluctuation up and down.

Directors of the board of trade met this afternoon but took no action to rescind their previous announcement that the "pegging" of prices at the average close of July 31 would be removed.

In Washington Secretary Wallace said the administration would keep hands off and permit open markets but would strive to aid wheat and grain farmers in other ways.

The prices on the local mart were "pegged" for a second time last month to curb a decided price break.

Pending expiration of the continuous minimum price limit in Chicago, all business here in future delivery of grain and provisions was virtually at a standstill today. The recent usual ceremony of blackboard exhibition of fictional quotations took place, but the figures were stationary, with no high or low point and unchanged.

However, as the day progressed, a general feeling became manifest among traders with abolition of continuous absolute minimum prices, the normal factors of supply and demand would soon again become the dominating market influence.

A large amount of spreading between different future deliveries was done and prices for immediate delivery wheat here were firmer.

Handles Lands

HON. JOSHUA HINCHLIFFE,

acting minister of lands, is in Kootenay on departmental matters.

HINCHLIFFE ON LAND MISSION

Here on Departmental Work; Has No Dope on Politics

Coming here not as a minister of education but as acting minister of lands, Hon. Joshua Hinchliffe arrived in Nelson Tuesday night direct from Victoria, and was met at the train by Dr. L. E. Borden, M.P.P.

Spending only a few hours here, the minister left for Cranbrook, to look into some departmental matters that require straightening out.

On his return trip he will stop off at Penticton and go to Oliver, in connection with complications arising from the death of a civil servant there.

"I have nothing whatever to say on political matters; my trip is wholly concerned with the administration," declared the minister.

Mr. Hinchliffe would not venture to guess as to when the government's platform campaign would begin. "I would like to know myself," he remarked.

Special Corps Will Work on Assessments

VICTORIA, Aug. 15 (CP)—A special corps of chartered accountants were sent at work by the British Columbia government this week in the Victoria and Vancouver offices of the assessor and collector to catch up with assessments which fell behind when the regular staffs were engaged in making refunds due under the 1 per cent levy of the income tax. Six of the accountants were appointed taxation auditors in the Vancouver office and two in Victoria. Upward of $250,000, overcollected in connection with the 1 per cent income levy, figures in refunds made out of the finance department last spring, the distribution going to approximately 50,000 persons. The vast amount of extra work entailed by the necessity for the disbursement overtaxed existing staffs, which have had to be augmented to bring their regular work up to date, it was explained.

GANG OF KIDNAP SUSPECTS SLIP THE POLICE NET

300 Chicago Police and Federal Authorities Foiled

ABDUCTORS ESCAPE IN 2 AUTOMOBILES

Machine Gun Fire Fails to Check Them; Hold Two Men

CHICAGO, Aug. 15 (AP)—A gang of wily kidnap suspects tonight apparently had slipped through one of the most elaborate police traps ever devised, enriched by a package of decoy ransom money, the amount of which was undisclosed, but which was reported to be approximately $50,000.

Ironically, the money was paid over to the mobsmen, suspected of implication in the abductions of Charles Urschel, millionaire Oklahoma oil man, and John Factor, Chicago speculator, by a policeman. The officer was disguised as a messenger boy as part of the police strategy to apprehend the suspects "with the evidence."

The money was understood to have been part of a sum Factor promised to pay his abductors after his release several weeks ago.

300 OFFICERS

Instead, he informed authorities of the demands and at the appointed

(Continued on Page Eight)

Dispute Arises at Corbin From Use, Power Shovel

VICTORIA, Aug. 15 (CP)—Introduction of a power shovel to strip earth from the surface of a coal seam, with claims by the miners that this violated their agreement with the company, led to a labor dispute at the Corbin colliery and calls for provincial intervention, Hon. W. M. Dennies disclosed today.

As soon as he was notified of the facts, Mr. Dennies sent Adam Bell, deputy minister of labor, to Corbin. He was advised today that amicable settlement of the dispute was being arranged.

The miners claimed that the power shovel would displace numbers of men, and that use of this class of machinery was against the terms of their agreement with the company. Mr. Bell has reported that both sides are drawing to a near settlement, and that satisfactory outcome of the argument is fully expected.

Banff Delegates Discuss Shipping

BY CHARLES A. HAYDEN
Canadian Press Correspondent

BANFF, Alta., Aug. 15 (CP)—Round table conferences at the fifth biennial convention today of the Institute of Pacific Relations discussed the shipping question with opinions expressed governments were seeking merchant marines in the event of another war.

Other points developed at the round table included the fact governments also want a lower cost of transportation with the effect of lowering the cost of commodities and they also wish to capture markets and shipping.

Shipping subsidies, the meetings showed, could not be regarded as a help to an infant industry but might contribute to a higher standard of living. The Japanese expressed the opinion, however, if it were not for subsidies Japan could not boast of her present mercantile service with its modern ships.

Trend of discussions, held to arrive at a distinction between conflict and competition, tended to show United States subsidized its New Zealand shipping to hold this sphere of the industry against Great Britain. Discussions also revealed United States, in subsidizing the Dollar lines and the Australian ships, required two-thirds of the crews should be American citizens.

According to the round table opinions, it was believed Japanese and United States governments were spending more money than they could afford.

3 Women on Scotland Yard Detective Staff

LONDON, Aug. 15 (AP).—Three women have been appointed as permanent members of the detective staff at Scotland Yard for the first time in the history of the metropolitan police.

The innovation, latest of many reforms recently initiated by Lord Trenchard, chief commissioner, followed experimental tests of women's aptitude for criminal investigation which proved eminently successful.

JUDGE UPHOLDS PRINCIPLE OF RECOVERY LAW

WASHINGTON, Aug. 15 (AP)—The national recovery law, bulwark of President Roosevelt's economic rehabilitation program, was upheld in principle today by Justice Joseph Cox of the district of Columbia supreme court.

Without passing formally on the question of the constitutionality of the law raised before him, the jurist denied a plea of Texas Refiners for an injunction against recent orders of Secretary of the Interior Ickes prohibiting interstate shipment of oil produced in violation of state regulations.

FLOOD TAKES 1000 PEASANTS

New Dyke Break North-East of Kaifeng Takes Big Loss of Life

KAIFENG, China, Aug. 15 (AP).—A thousand Chinese peasants who lived and farmed northeast of here were reported dead today, their lives snuffed out in a few minutes when a new break occurred in dykes along the Yellow river.

In many great areas along its 2600-mile course, the great Yellow river has broken over its banks in the past two months. Recently almost daily reports have told of fresh floods and the death toll and property damage are believed enormous.

The break northeast of here occurred Monday night and the river continued raging today. Sandbags have been piled along the city's walls here. Kaifeng is 27 feet below the level of the river now. Normally, as in the case of numerous other towns along the river's course, the city is below the river level, but usually only about seven feet.

Danger that the high-running river will return to the bed it deserted 80 years ago by changing its course at Langfeng seemed to have slightly lessened. The waters were reported remaining principally in their present channel and also flowing southward in lesser streams.

Cities and towns within the former valley, from Lanfeng eastward, were hastily throwing up emergency dykes.

GRAIN PRICES ARE PEGGED ON WINNIPEG MART

Exchange Takes Steps to Halt Debacle of Selling From Chicago

MOVE LIKELY TO BE ONLY TEMPORARY

Necessary Due to Abnormal Conditions of Surrounding Markets

WINNIPEG, Aug. 15 (CP). — Pegged minimum prices, for the first time in the history of the exchange, tonight were imposed on all grain futures on the Winnipeg grain exchange in an effort to halt a debacle of selling brought on as Chicago traders poured selling orders into the local pit.

Members of the exchange meeting in emergency session before the market opening today, decided to set as a minimum closing prices of Monday, August 14. All bids and offers privileges were cancelled or suspended for the time being.

At the same time, confidence was expressed the drastic and unprecedented move would be only temporary. Exchange officials hoped stability would develop at Chicago shortly and that the restrictions imposed on trade here could be removed before long.

Encouraged by the intervention on their behalf, wheat prices bounded upward as the opening gong rang, half an hour late.

A resolution passed unanimously by the exchange said the pegging measure was necessary "due to abnormal conditions surrounding other grain markets" and the detrimental effect such conditions "might have" as far as producers were concerned. It was to remain in effect until further notice.

Action of Chicago traders in pouring selling orders into the Winnipeg pit for the past three sessions brought the situation to a head. Prices slumped 12 cents be-

(Continued on Page Eight)

Markets at a Glance

By the Canadian Press

Toronto and Montreal— Industrial stocks closed lower.

Toronto mines—Sagged slightly.

New York— Stocks irregularly higher.

Winnipeg—Wheat closed higher.

Toronto—Bacon hogs off car up 10 to 15 cents at 6.60 to 6.65.

London—Bar silver, cooper and tin lower, lead unchanged, zinc higher.

New York—Bar silver and tin lower, copper, lead and zinc unchanged.

New York—Rubber and sugar higher, cotton lower, coffee unchanged.

New York—Canadian dollar unchanged at 94⅝.

FIND TRAIL MAN'S BODY

Angus McDonald Found Drowned; Wife Leaves Nelson for Trail

TRAIL, B.C., Aug. 15.—A body identified as that of Angus McDonald, who disappeared at an early hour of the day some five weeks ago, and who was believed to have jumped into the Columbia river, was found last evening at Deadman's eddy, Northport, and brought back to Trail Tuesday. He will be buried tomorrow morning.

Mrs. McDonald, who has been a visitor in Nelson for several weeks, and who was just planning a trip to the old country, was called to Trail this morning.

McDonald, on the morning of his disappearance, had talked to an acquaintance near the river bank just before a woman in East Trail saw a man jump into the river at the rear of the Rialto theatre. Though the police made a search of the area, there was nothing to indicate that anyone had committed suicide, yet they strongly believed that such a fate had befallen McDonald. He did not appear at work that morning and had given no reason for not doing so. He leaves a wife and daughter.

JONES FLOATS A $3,000,000 LOAN

VICTORIA, Aug. 15 (CP)—Hon. J. W. Jones, minister of finance, announced this afternoon that he had floated a loan of three million dollars at a cost to the province of 5.67 per cent.

One million dollars of 20-year five per cent bonds was sold outright to a syndicate here. This sum will be used for unemployment relief.

The same syndicate took an option on the additional two million dollars on the same terms.

Horse Dopers Get Penitentiary Term

CHICAGO, Aug. 15 (CP)—Three of the prisoners seized by the government in the recent horse doping raid at Arlington park pleaded guilty today and were sentenced to the penitentiary today by federal Judge Walter C. Lindley. All were charged with illegal possession of narcotics.

While the three, called "minor figures" by the federal narcotic agents who charge that at least 200 horses have been drugged at various tracks during the past year, were sentenced, the government continued its investigation with a threat to indict the "higher ups."

Cretzu Is Remanded on Extortion Charge

VANCOUVER, Aug. 15 (CP)—Arrested in connection with the attempted extortion of $500 from I. Koosis, Main street manufacturer, Charles Cretzu appeared before police Magistrate McKay today and was remanded to August 21.

Bail was set at $2500.

Hall and Hungerford Ask Employees to Accept Cut in a Spirit of Cooperation

State Prospects Are Increasingly Disturbing and Railways Must Deal With Actualities; Compare Living Costs

MONTREAL, Aug. 15 (CP)— "The employees may have every confidence that, as in the past, they will be dealt with fairly," says a statement issued tonight asking employees of both Canadian National and Canadian Pacific Railways to "accept wage reductions in a spirit of co-operation with the management." The statement was issued by Grant Hall, vice-president of Canadian Pacific Railway and S. J. Hungerford, acting president of the Canadian National Railways.

Addressed to "all employees on the two railroads employed as locomotive engineers, locomotive firemen, hostlers, conductors, trainmen, yardmen, train despatchers, telegraphers, assistant agents, linemen and levermen," the statement reviews the whole situation in connection with the dispute between the railways and their employees. A second 10 per cent wage cut brings total wage reductions affected during the past two years to 20 per cent.

PROSPECTS DISTURBING

After reviewing economic difficulties confronting both roads, the statement goes on to say: "Prospects are disturbingly uncertain and the railways must deal with actualities. Under such conditions the railways cannot reasonably be expected to pay 90 per cent of the wage rates established at the peak of railway and general prosperity.... It is not possible for them to undertake to adjust wages of Canadian railway employees on the basis of conditions existing in United States."

Only in 1916 were railway revenues as low as they were in 193[illegible] the statement continues. Despite the fact the Canadian cost of living is now below that of 1916, railroad employees' "per hour rates of compensation . . . even after the application of the second deduction of 10 per cent, having increased over the average 68 per cent over the rates in effect in 1916 . . . it should be remembered that, insofar as comparison may be made with other employees in Canada, railway employees have fared favorably."

Concluding, the statement says: "The railways are seeking in the wage deductions to meet existing conditions and the basic rates for calculating pay are being preserved so consideration may be given to lowering of the present rate of deduction as soon as conditions warrant. The managements are not without hope the employees will recognize the facts of the situation and will accord the companies the cooperation they so gravely need."

LITTLE CHANGE IN RELIEF PACT

VICTORIA, Aug. 15 (CP)—The new agreement between the Ottawa government and this province in respect to unemployment relief, was laid before the cabinet this morning by Hon. W. M. Dennies, minister of labor. It is little changed from the one already in effect and provides that the federal authorities will contribute one third of unemployment relief costs in municipalities from August 15 until March 31, 1934.

In unorganized districts the share will be 50 per cent. In disorganized or bankrupt municipalities the Ottawa government also will contribute up to 50 per cent. There will be no change in the status of single, homeless men. Forty cents a day will be allowed for upkeep of the physically unfit on a 50-50 basis with the province.

In short, the old agreement continued in more specific terms. But before it is signed representatives of the city of Vancouver and the executive of the Union of B. C. municipalities will be consulted. This conference will take place later in the week, if all parties can arrange to be here, stated Mr. Dennies.

Nudist Cult Refused Use of Swimming Pool

PHILADELPHIA, Aug. 15 (AP).—Request of a nudist cult for permission to gather at a mid-city swimming pool twice weekly was refused today by Mayor J. Hampton Moore.

He said the cult had more than 200 members.

BURNS FATAL TO SASKATOON WOMAN

SASKATOON, Aug. 15 (CP)—Mrs. Bella Alexander, 74, of Sutherland, near here, succumbed tonight to burns received when her clothes caught fire as she was burning rubbish in the back yard of her home.

Wounded Victim Tells of Lynching

TUSCALOOSA, Ala., Aug. 15 (AP)—The Tuscaloosa News today gave a description of the lynching of two Negroes, Dan Pippen, jr., and A. T. Harden, 16, and the wounding of another which the paper said was obtained from an authoritative source from Elmore Clark, the wounded victim.

Clark said when Harden was asked who killed the young woman, Miss Vaudine Maddox, daughter of a farmer, the Negro pointed to Pippen.

At this point, Clark said, the three, handcuffed together, were lined up and shot. Clark fell beneath the bodies of Pippen and Harden. He was slightly wounded.

China Is Suffering Over-Population Says Dr. Wong; Half Acre Cultivable Land Per Person

BANFF, Alta., Aug. 15 (CP)—Despite its vast area, China is suffering from an overpopulation more acute than that of any other country. This fact was the basis of a report on the distribution of population and land utilization in China presented today to the fifth biennial conference of the Institute of Pacific Relations by Dr. W. H. Wong, director of the National geological survey of China.

Due to climatic and topographical conditions, a large proportion of the area of China is not suitable for agriculture, the basic industry of China, Dr. Wong indicated. Less than half receives sufficient rainfall to obviate the necessity of irrigation and more than one third is mountainous country not adapted to farming. As a result 83 per cent of the population is concentrated in the five great agricultural districts which comprise only 17 per cent of the area. The density in these regions is 500 persons per square mile while in the remainder of China it is only 35 persons.

Mr. Wong declared there is about half an acre of cultivable land per person in China, which at best will produce only the equivalent of six bushels of wheat per year.

Only solution to such a situation is the decrease of the concentration of population, Mr. Wong pointed out. He analyzed the potential capacity of the few remaining cultivable districts. In the north and west there are five relatively small areas where agriculture is possible with irrigation. He estimated these might absorb from eight to 10 million.

This means emigration to Manchuria is the only solution to China's population problem. Although such migration has taken place since the end of the Ming dynasty, the average density of population to Manchuria is only 80 per square mile at present, Mr. Wong stated. He estimated the great plain of Manchuria can support a minimum of 20 million more people and added, "the Chinese are well qualified for the agricultural exploration of Manchuria."

1000-ACRE FIRE BURNING IN TIE SLASH NEAR YAHK

50-Acre Fire in Pend d'Oreille on Boundary Line; Small One Above Lambert's Planer at Taghum; Lightning Fires on Fry Creek

A fire covering 1000 acres of railway tie slash, in the Yahk district, starting about 6 p.m. Monday, is the largest of a number of lightning fires reported to the forest branch here Tuesday, all from "dry" or rainless electrical storms.

The Yahk fire is a couple of miles east of Hawkins creek and a couple of miles from the international boundary, southwest of Yahk. A high wind made the efforts of fire fighters a waste of money, and crews put on in the morning by the forest branch were later withdrawn, until they could work effectively. This will be when the fire gets to the top of the ridge looking down on Hawkins creek.

INTERNATIONAL FIRE

Where the Pend d'Oreille river crosses the international boundary a 50-acre fire, of which one-third is in Canada, was being fought Tuesday, the forest branch holding this end of it with 18 men. It also broke out Monday, though not reported to headquarters till Tuesday.

At 2 o'clock Tuesday afternoon a small fire was reported on Sproule creek, about a mile up from Lambert's planing mill at Taghum. It covered about four acres, and men were put on it. It started on the place of a Doukhobor named Barikoff.

Two lightning fires showed up on Fry creek, on the northern portion of Kootenay lake, late Monday. Men were put on each of them.

The fire just north of Nakusp was reported Tuesday morning to be under control.

Reports from the Boundary stated the Sutherland creek fire, southeast of Fife, was being successfully headed away from timber and up the divide between Sutherland and Big Sheep creeks.

It was stated the Beaverdell fire was also being held. The Lakevale one is being patrolled.

From Invermere came word that the Toby creek fire was quiet.

WIND AT CRANBROOK

No rains were reported from any part of the Kootenay to relieve the intense heat. A strong wind sprang up in the Cranbrook district Tuesday morning, but is believed to have been yargely local, as no wind was mentioned in the Windermere report.

PROFESSOR CARROTHERS RECOMMENDS CENTRAL ORGANIZATION FOR CANADA CORRESPONDING TO A CENTRAL BANK

Commission Chairman Questions Him Extensively

By FORBES RHUDE
Canadian Press Staff Writer

VANCOUVER, Aug. 15 (CP)—Some sort of central organization corresponding to a central bank was recommended for Canada in a brief presented to the royal commission on banking here today by Prof. W. A. Carrothers of the economics department of the University of British Columbia.

This central organization would have sole control of currency issue, rediscount bills Dominion and foreign, legal reserves, carrying of public accounts, carrying of balances abroad and be the sole medium for export and import of capital.

Professor Carrothers had no quarrel with the commercial aspects of the present banking system which apparently had been carried on satisfactorily, he said. The contracts of commercial banks with business interests would be the same as today and loans would be made on recognized banking principles.

PUBLIC WELFARE

The central organization, however, could make loans to the Dominion, provinces, and municipalities, including such bodies as school boards without regard to profit and solely from the point of view of public welfare.

Professor Carruthers was questioned extensively by Lord Macmillan, chairman, and other members of the commission to bring the implications of his brief into clear prospect.

Lord Macmillan asked if it was not necessary that Canada should have a united financial policy, to which Professor Carrothers agreed. The chairman presented the case where a province might be set upon getting a loan abroad while the central bank disapproved.

MUST SEEK SOLUTION

Professor Carrothers remarked that the system of provinces had merit from a political point of view which it lacked from an economic standpoint. If the constitution of the country interfered with the formulation of a proper economic policy some way must be found to solve the difficulty.

"In the long run, wouldn't it depend upon the prestige of the central body?" asked the chairman.

Professor Carrothers thought so and was of the opinion there were men in Canada who could quickly

(Continued on Page Eight)

INCOME TAX COLLECTIONS OFF FOR FIRST FOUR MONTHS OF FISCAL YEAR

OTTAWA, Aug. 15 (CP).—Income tax collections for the first four months of the present fiscal year totalled $41,705,588, decrease of $5,731,147 from the corresponding period last year, according to a report issued today by the department of national revenue. Of the 19 income tax districts of Canada, six showed an increase in tax payments, while 13 declined. The increases were in Charlottetown, Saint John, Quebec, Ottawa, Kingston, Belleville, Regina and the Yukon.

The increase in Ottawa was the largest, amounting to $141,854, while that of Quebec was $59,851.

Montreal showed the largest decline—$1,980,327, with Toronto second with a drop of $1,717,318.

Arrest Fleeing Man in Connection With Apparent Death by Poison of 3

MALVERN, Ark., Aug. 15 (AP)—A man and a woman and two small children were found dead, apparently of poison, in their automobile after it had left the highway and ran into a ditch near here late today. Prosecuting Attorney Millar Halbert said the victims were Alvin and Ethel Coolie and their children, Clement, 10, and Clyde, 7, formerly of Akron, Ohio, who had been living at Hot Springs.

A three-year-old child also was in the car but apparently was not poisoned.

Officers later arrested a man who they said fled from the car after the accident. Prosecutor Halbert said he was Mort Sank, 30, of Akron. A bottle said to have contained liquor was found in the car and officers planned to have it analyzed.

Machado Charged With Exactions, Swindles, Homicides and Murders

HAVANA, Aug. 15 (AP).—A cause filed this afternoon in the second section of the criminal court accused Gerardo Machado, deposed president, and five associates of "misappropriation of public funds, frauds and legal exactions, falsities and swindles, homicides, murders, personal attempts and use of firearms against certain persons."

Dr. Joe Garcilasu de la Vega, lawyer, filed the charges posting a $500 bond.

The accusation set forth the plans for committing the crimes charged had been laid in the presidential palace.

Accused along with Machado were former secretary of the treasury Octavio Averhoff; Orestes Ferrara, former secretary of state; Antonio B. Ainciart, former chief of police; Octavio Zubizarreta, former secretary of the interior, and former chief of the central district, Jose Izwuierdo.

OTTERELL TO VISIT SLOCAN

Will Look Over Restoration Work; Coast Picking Up

An inspection of the Slocan portion of the Canadian Pacific's system, Wednesday, will mark the conclusion of the present inspection trip being made by General Superintendent C. A. Cotterell.

Covering the through line from Nelson and Forks to South Slocan by track-motor Tuesday in daylight, accompanied by District Engineer Frank Lee and Division Superintendent William Manson, Mr. Cotterell made the last stage of his trip by the incoming Kettle Valley train. On account of the line in the Slocan still being broken at various points, though the main part of the rehabilitation from the washout damage has been completed, Wednesday's inspection will have to be carried out from a motor car, and Mr. Cotterell and party will go to both Sandon and Kaslo.

"My inspection is a routine one, it being desirable about this time of year to see how our summer's work is shaping up, as we like to have everything in good winter shape before the fall rains begin," explained Mr. Cotterell, when seen on his arrival here.

He stated that things were on the up grade at the coast, and expressed a keen interest in the wide activity in gold mining in the Nelson district.

Mr. Cotterell will leave for the coast Thursday morning.

EXPECT LINDBERGHS IN THREE WEEKS

COPENHAGEN, Denmark, Aug. 15 (AP)—Messages received from Norway today indicated Colonel and Mrs. Lindbergh were expected to arrive there in about three weeks.

FINANCE DEPARTMENT DRAFTS REGULATIONS NECESSARY IF U.S. ORE SHIPMENTS PERMITTED

OTTAWA, Aug. 15 (CP)—Officials of the finance department were engaged today drafting regulations which would be required if the request of United States miners for permission to ship gold concentrates and gold ore into the Dominion were granted. The cabinet probably will reach a decision on the application next Thursday.

The impression here is the request will be granted. Gold producers across the border could then ship their gold concentrates and ore to Canada, have it smelted and refined here after which the gold would bring world prices. The par for gold is $20.67 an ounce whereas the price in Canadian funds in the open market has been around $29.50.

The movement would mean a large revenue to the Canadian mint and to Canadian firms in refining charges. The U.S. production ranges from $40,000,000 to $50,000,000 a year.

King Declares Premier Bennett Has Gone Too Far in Increasing Tariffs

By RAY BROWN
(Canadian Press Staff Writer)

ASSINIBOIA, Sask., Aug. 15 (CP).—From this section of Saskatchewan in which drought and grasshoppers have taken tremendous toll of the farmer, people gathered in large numbers tonight to hear the Dominion Liberal leader. An audience estimated at close to 2000 faced Rt. Hon. W. L. Mackenzie King when he rose to give his first speech on the return journey through Saskatchewan.

The Liberal leader opened his speech with a reference to the length of time he had been in public life.

"Too long," came a voice from the rear of the hall.

"Did I hear someone say too long?" asked Mr. King. "If that was intended as a rudeness I would like to say it is the first rudeness which I have received since coming to western Canada. But I don't think it was intended as a rudeness, I think it was intended as one of those pleasantries which sometimes enliven a political meeting."

The main purpose of his visit to the west was "to see those places in which people had experienced the hardest struggle," Mr. King said. "I have not come to ask you to vote for the Liberal party or to vote against the Conservatives or the C.C.F.," he said.

He wished to try and understand the problems of the people.

"I am going to say something which I think the majority of the Conservative party agrees with," the Liberal leader went on. "I think Mr. Bennett has gone too far in increasing tariffs. If Mr. Bennett had as much knowledge of political economy as he has of law, he would not have made that mistake."

Mr. King expressed pleasure at receiving on his arrival in Assiniboia a letter of welcome to "a worthy political opponent," from the Conservative association of Willow Bunch. He did not propose to attack the prime minister, but it was necessary for him to disagree very definitely with Mr. Bennett's policies.

Parishioners Hold Picnic, Rossland

ROSSLAND, B.C., Aug. 15—The picnic grounds at Sheep Creek made an attractive setting for the annual outing of Sacred Heart parishioners and their friends. The 200 picnickers found the cool breezes from the creek a welcome contrast to the sultry heat they had left behind them in the golden city. There were races for everybody and the softball games provided plenty of amusement.

Ice cream and cool drinks were dispensed free in copious quantities, but the capacity of the youngsters was unlimited.

The pie eating contest was as usual, the center of attraction, and the wee girlie who won the first prize is believed to have established a record, in disposing of half a huckleberry pie, in a minute and a half.

The following committees were in charge:

Transportation—Thomas J. Supple, John Walker; refreshments, Mrs. H. deL. Reaney, Mrs. Herbert L. Christian, Thomas Beaulieu, P. Molinero and William E. Costello; sports, Emil LeDuc, M. Bouget and J. B. Cammozzi.

Following were the winners of the various events:

Horseshoe, ladies—Miss Bubbles Sdao and Miss Fannie Profili.

Mens—J. B. Cammozzi and Emil Leduc; R. Jones and H. Beaulieu.

Pipe race—E. L. Conroy first, A. Bouget second.

Rabbit race, under 8—W. Coulter first, Mona Connor second.

Under 12—W. Bourdon first, Isabel Bourget second.

Fat ladies—Mrs. F. Spring first, Frances Blaso second.

Pie eating—Mona Connor first, Rita Fourt and Kate Dorey, tied for second.

Sack race—James Connor first, Ed Cullinane second.

Races:

10 and under, boys—Jack Laface first, George Lucien second.

Girls—Florence Corrade first, Mona Connor second.

Boys 10 to 15—Wilfred Bourdon first, Gerald Ham second.

Girls—Marjorie McDonell first, Isabel Bourget second.

Girls 16 and over—Miss Delphine Vetere first, Katherine McLean second.

Girls' relay—Miss Eda Vetere and Miss Delphine Vetere first, Miss Bubbles Sdao and Miss Dorothy Laface second.

Practising Air Force Gunner Slays Girl

SHEERNESS, Kent, Eng., Aug. 15 (AP).—Jean Chesterton, a 17-year-old girl, was shot to death by a Royal Air Force machine gunner today when she rowed out into the sea to recover the lost ball of a child.

The gunner mistook the boat rowed by Jean and her sister for a target and fired upon it from an auxiliary plane.

The Chesterton girls, going out from Leysdown beach to search for the ball which floated out, were a quarter mile from shore when five planes roared overhead and began shooting at a string of buoys.

One of the planes made the boat its target, taking it for a buoy.

War Debt Talks to Start on October 1

WASHINGTON, Aug. 15 (AP)—The perplexing war debt problem rose again today before the Roosevelt administration in official word that preliminary discussions on the subject would begin with the United Kingdom early in October.

With another payment of $127,670,765 due from Great Britain December 15, Secretary of State Cordell Hull announced Sir Frederick Leith-Ross, chief economic advisor to the British government, would come to Washington about October 1 to discuss the obligation.

Great Britain will probably be the first of the European debtors to negotiate for revision of agreements under which they are obligated to pay United States more than $11,000,000,000.

The United Kingdom's total obligation to United States under its funding agreement is approximately $4,500,000,000 and it has paid in excess of $2,000,000,000.

Great Britain and other powers which made partial payments on their installments last June, renewed their plea for revision of their agreements and asked for further opportunity to explain the impossibility of meeting their obligations under present economic conditions.

BRUHN HERE FOR A NIGHT

R. W. Bruhn, late minister of public works, arrived here by car Monday night, and registered at the Hume as from Sicamous. He left for the west early Tuesday morning.

LAPORTE TAKES THE BIKE LEAD

KINGSTON, Ont., Aug. 15 (CP)—Thirty-six marathon cyclists rested here tonight in preparation for their run to Montreal tomorrow, after trudging wearily over the road from Toronto.

Joe Laporte of Montreal, fourth in the race when the cyclists left this morning, had moved up to first place when the day's grind was completed. "Torchy" Peden, lanky Victoria rider, was fourth.

The marathoners covered 50 miles at the fair grounds after arriving here and Ewald Wissell of Berlin, Germany, outlasted his tired opponents to win. The riders will leave at 7 a.m. tomorrow.

Amy Pilots Plane to Washington

WASHINGTON, Aug. 15 (AP)—Amy Johnson Mollison, the British woman pilot, who with her husband flew the ocean east to west, today piloted a big commercial air line plane almost into Washington from the south.

Then the blonde, blue-eyed Amy went straight to a fashionable tea at the National Geographic society headquarters wearing the same saucy white beret and smart black gown, with big plaid organdie bow at the side of her throat. She came here from Atlanta where she made a study of aviation facilities. She plans to remain here until Thursday.

"There was a British passenger on the plane," explained Mrs. Mollison. "He hadn't flown with a British pilot since the world war, and he wanted to fly with one."

Mrs. Mollison pronounced the United States a "Pilot's Paradise," because of being able to fly long distances without producing passports at boundaries.

"And I can come down anywhere and still be understood," she added. "In my life abroad, every time I come down I find them speaking a different language."

"I was disappointed in only one thing—American airports," she said. "I had an idea all American airports were enormous."

Fellow passengers with Mrs. Mollison and also guest of honor at the Geographic society reception was pretty Miss Elvy Kaler, who 3½ years ago was the first civilian pilot in her own country.

Carnera Censured When He Fails to Appear at Court

NEW YORK, Aug. 15 (AP)—Primo Carnera failed to appear today at a hearing on his voluntary bankruptcy petition and was soundly censured by Federal Referee Peter Olney.

Max Roxmore, counsel for "Da Preem," reported the champion went to Maine a-fishing, thinking the hearing was for Thursday.

Referee Olney, noticeably put out, peremptorily docketed the case for August 29. Roxmore demurred, saying the ponderous Primo had to be in Hollywood that day.

"I don't give a d—m if he has," shouted the referee. "You must excuse my English—but he'll have to be here."

Roxmore persisted. The referee stood firm.

"I can't help it if he has another engagement," Olney declared. "He must learn he can't run around bumble-headed when there is a serious case to be taken up."

Industry and Labor Captains Flare Up

WASHINGTON, Aug. 15 (AP)—The long seething issue between captains of industry and labor over United States industrial recovery act broke into the open today with President William Green of the American Federation of Labor angrily denouncing spokesmen of the great steel plants.

Charging representatives of the industry had walked out of an N.R.A. conference with Secretary Frances Perkins because he was present, Green told newspapermen he regarded the action as "a challenge to the government." The conference was called to adjust controversies over labor provisions of the pending steel code.

"The question is," Green said, "is whether steel is to dictate to the government or whether the government is going to set up machinery under the industrial recovery act and require industry to work with that machinery."

In the conference room when Green entered were such steel leaders as W. A. Irvin, president of United States Steel; Eugene G. Grace, president of Bethlehem Steel; E. T. Weir of National Steel; L. E. Block of Inland Steel; Hugh Morrow of Sloss-Sheffield, and Tom Gridler of Republic Steel.

ROSSLAND BUYS ITS OWN BONDS

ROSSLAND, B. C., Aug. 15 — Feeling that the needs of Rossland, Trail and Nelson are similar, and would be more easily obtained by presenting a united appeal, the city council decided Monday night to try to arrange a get-together of the councils of the three cities, with a view to presenting their claims to the Municipal commission which will meet in Nelson September 11. The meeting will probably be held in Trail as the most central point.

The city has purchased $1500 of its own debentures for sinking fund purposes. These bonds will be worth 100 cents on the dollar in 1937 and were purchased at $87.07 thus netting the city a nice little profit.

R. W. Clark and J. Thompson, residents of Nickel Plate flat appeared before the council with a complaint that water pressure to their houses was very poor. The council was of the opinion that too much sprinkling in the neighborhood was to blame, but the fire, water and light committee and City Foreman John Newman will investigate and try to remedy matters.

H. deL. Reaney appeared on behalf of himself and neighbors, Mrs. L. Stinson and Mrs. E. C. Young, with the complaint that when one of the three were using water, the other two could not get any. An effort will be made to connect these houses with the six-inch main on LeRoi avenue, approximately 150 feet away. A similar complaint was received from Mrs. A. T. Nichols on Thompson Heights and an effort will be made to remedy conditions there.

The request of Rossland Lodge No. 21, Knights of Pythias, for a light in front of their hall on Columbia avenue, was referred to the fire, water and light committee, and at the request of Samuel Reid to have brush cleared from the street in front of his lots on Third avenue and the water extended to these lots was referred to the board of works. This part of Third avenue has not hitherto been in use.

A grant of $25 will be made to the newly organized Rossland City band in appreciation of the pleasure they are affording the residents of the city. The band has also been granted the use of the council chamber for their practices.

The offer of Andrew Holaboff of $3 per lot for lots 16-20, block F, was accepted on condition that Mr. Holaboff pays the court registration. These lots are pretty well out in the bush and Mr. Holaboff wishes them for grazing purposes.

Mayor W. A. Turner will call a public meeting in the near future to arrange for the transfer of the city's interest in the X-ray machine to the Mater Misercordiae hospital. The hospital has recently expended a large sum of money on the machine, making it the equal of any machine in the interior of British Columbia. A meeting of the council and the hospital board is also to be held shortly, to consider the advisability of paying the hospital a flat rate per month, instead of the 70 cents per day per patient now being paid.

Roosevelt and Forbes Discuss Trade Relations

WASHINGTON, Aug. 15 (CP)—Important conversations regarding future commercial relations between New Zealand and United States were held today by Prime Minister G. W. Forbes of New Zealand and his minister of industries and commerce, Hon. D. Masters, and high officials of the American department of state and department of commerce.

At the luncheon tendered by President Roosevelt, opportunity was taken by the president to mention the question of reciprocal trade between the United States and New Zealand. The subsequent discussion with the minister of industries and commerce was reported to be of a most frank and friendly nature.

Later Mr. Masters met a representative group of the executive officers of the department of state. Appreciation was expressed on behalf of the New Zealand government at the action taken by the state department in the lifting of the embargo against New Zealand fruit, and the view was strongly expressed by Mr. Masters that it should be possible to come to a satisfactory agreement whereby New Zealand producers could exchange some of their products for lines of American goods of a special nature, and to the mutual advantage of both countries. The market of New Zealand wool in the United States and the problem of augmenting sales was closely studied, while other main New Zealand products were analyzed and discussed.

There are over 200 rooms, including 40 bedrooms, in Buckingham palace.

Manufacturers Move in Own Protection

MONTREAL, Aug. 15 (CP).—With several hundred dress-cutters now out on strike, Montreal dress manufacturers today formed the "Manufacturers Protective association to keep control of manufacturing plants in the hands of the employers."

The strike began today when the unions failed to obtain a 44-hour week, time and a half for overtime, and a minimum wage scale.

60,000 GARMENT WORKERS STRIKE

NEW YORK, Aug. 15 (AP).—A strike affecting 60,000 dress and waist makers in New York City was called tonight by the International Ladies' Garment Workers union.

Union demands include a 30-hour week, enforcement of existing wage agreements and elimination of middle men in dealings between workers and contractors.

Strike Threatens Perishable Fruit

SAN FRANCISCO, Aug. 15 (AP)—At least 2900 California ranch and cannery workers were idle tonight at a result of the swiftly-growing strike movement that has affected pear, peach, lettuce and cotton pickers in several counties and resulted in a call for state highway police in one district.

The highway patrolmen were sent to the great Tagus peach ranch in Tulare county to supplement a sheriff's posse, where court aid was invoked against the strikers in an effort to save thousands of tons of perishable fruit and vegetables.

Seven hundred Filipino lettuce pickers working in the Salinas valley struck today in protest against a 20-cent-an-hour wage. They were replaced at once, but P. H. Carongay, president of the Philippine labor chamber of Salinas, said 1000 more workers would strike unless the wage controversy were adjusted.

Three peach canneries, two at Hanford and one at Armona, were closed down by the orchard strike, throwing 1500 employees out of work. Three other canneries in the Fresno district are working only two and three hours a day.

Five hundred pickers in the Santa Clara valley pear orchards quit work and 200 cotton pickers on two ranches in the San Joaquin valley were out in sympathy. There were reports that agitators were seeking to spread the strike to grape areas and to sugar beet workers.

New Facts Revealed in Micro Wave Tests

ROME, Aug. 15 (AP)—Communication with micro waves a foot and a half long over distances greater than the range of vision and through or around physical obstacles has been reported here before the science department of the Royal Academy by Guglielmo Marconi, noted wireless inventor of Italy. Previous tests had indicated these waves would travel only as far as could be seen in a straight line.

In a series of tests conducted between the inventor's yacht in the Tyrrhenian sea and inland Italy, Marconi said both radiophone and radiotelegraph messages had been exchanged with the experimental station at Santa Margherita, 94 miles landward, a distance three times further than he had been able to get heretofore.

FAINT MESSAGES

Even with the Electra anchored at Porto Santa Stefano, a distance of 161 miles from Santa Margherita, faint code messages on a 60-centimetre wave were picked up on the yacht despite two intervening mountainous promontories, indicating the micro waves were not hindered by such opaque objects.

Twenty-five watts of power were used, Marconi said, in a newly developed micro-wave combined transmitter and receiver. He added he hoped through the development of more sensitive apparatus to be able to bring about further important advancements in the art of radio communication.

This latest announcement by Marconi would indicate the heretofore generally accepted theory micro waves are limited only to the range of vision did not hold altogether true.

Engineers had believed such opaque objects as buildings, mountains, etc., had the same effect on these waves as would be in the case with a searchlight or other form of light beam.

PARADES OF BLUE SHIRTS CANCELLED

DUBLIN, Irish Free State, Aug. 15 (CP)—Yielding to ecclesiastical intervention, Gen. Owen O'Duffy tonight cancelled church parades planned next Sunday for his blue shirts national guard. Fears had been widely expressed the parades might lead to armed clashes between the national guard and government forces, with possible serious results.

HEAT ABATES IN U.S. BUT DEATH TOLL HITS NINE

Near All-Time Records Established Along the Pacific Northwest

SAN FRANCISCO, Aug. 15 (AP)—Heat that was somewhat abated in limited areas pressed down upon the Pacific coast today from Canada to the Mexican border.

At least nine deaths were reported during more than two days of high temperatures and forests flamed like tinder in parts of California's Sierra as electrical storms varied the sun's onslaught.

Mrs. Alice Ellen Kentzel, 47, of San Francisco, died at Hanford, Calif., en route to San Francisco from Yosemite valley. She died of heat prostration after the temperature mounted to 115 degrees.

NEAR ALL-TIME HIGHS

Near all-time heat records were reported from the Pacific northwest today. At Portland, where the temperature reached 103 degrees, it was the hottest ever recorded in August and the hottest on record except for July 10, 1926, when the mercury registered 104. At Medford, Ore., it was 106 during the afternoon. Hood River reported 100. Eugene reported 96, the hottest this year, and Klamath Falls 99.

A forest fire near Forest Grove, Ore., was out of control and at least 11 other fires were being fought by C.C.C. workers in the Sierra national forest of California, where lightning touched off nearly a dozen stands of fine timber in rapid succession.

Seattle, Wash., reported 90 degrees this afternoon, the highest in two years, but lower temperatures were predicted for tomorrow. At Spokane the temperature at 3 p.m., was 94 degrees and it was still rising.

SCATTERED RAINS

Scattered rains modified the heat wave in southern California. A downpour in the Imperial valley accompanied by violent winds followed a temperature there of 119 degrees. The average maximum in the southern California metropolis for August 15 is 82 degrees.

San Francisco was cool with an an overcast sky.

Mrs. Virginia Clementson, 44, of San Francisco, died at a hospital here today from heat prostration suffered early in the day at Willows, Calif. She was en route to Seattle with her husband, Charles B. Clementson, Union Oil company executive.

The death brought the toll of the two day heat wave to nine.

100 MEN BATTLE FIRE ON ISLAND

VICTORIA, Aug. 15 (CP)—Fire burned over a mile and a half front in the Kapoor Logging company's holdings at Sooke yesterday afternoon and last night. More than 100 men battled the blaze all night to keep it under control.

The fire started about 2:30 o'clock in the afternoon among the slashing, and with the heat well above the 90 mark, quickly spread among the tinder dry limbs.

Before all the fighters could be stationed around the fire, the blaze jumped from the slashings into some green timber, but here it was held back as the fighters got into action.

Up to a late hour last night the crew had managed to keep the flames under control, and unless a breeze springs up the green timber should remain out of danger.

The Kapoor Logging company is situated between the city's two watersheds, and although neither watershed was threatened the patrol along the flow lines and near the danger zone was strengthened so that reinforcements could be dispatched to the scene if necessary. No estimate of the damage done by the fire was obtainable last night.

DURING BABY'S TEETHING TIME
The Bowels Become Loose
Diarrhœa, dysentery, colic, cramps, manifest themselves; the gums become swollen, and cankers form in the mouth. This is the time when the mother should use
Dr. FOWLER'S EXT-OF WILD STRAWBERRY
and perhaps save the baby's life.
On the market for 88 years.
Price, 50c. a bottle at all druggists or dealers.

THE GUMPS—

ON URGENT BUSINESS

Chemical and Bacteriological Warfare

The Character of a New War

By Rev. W. J. Silverwood

During the last week or so several references have appeared in the Nelson News regarding Preparations for a Future War. Friday's edition contained information to the effect that all is in readiness for any future conflict. Monday's edition gives an idea of the atmosphere around Metz. As I read the account of these preparations I mused to myself—"Yes, but this is not even 100th part of the whole story. The story in connection with future warfare is so well nigh complete, nationally and internationally—that I could not help recalling the familiar lines of the Rubaiyat of Omar Khayyam:—

The moving finger writes; and, having writ moves on;
Nor all thy piety nor wit,
Shall lure it back to cancel half a line,
Nor all thy tears wash out a word of it.

The future character of a new war has been writ and all the facts concerning it are available for those who wish to acquaint themselves with them. Now I am not a person who is fond of rushing into print. At the same time there are certain facts, interesting and startling facts, that all should know that it will do nobody any harm to learn about. So here are some of them. Poison gas constitutes an essential, if not the most important factor, in the preparations for a fresh war. Committees for chemical warfare have been set up in diferent countries, consisting of representatives of the chemical industry, chemical experts and officers of the land, sea and air forces. In most countries the chemical industry is directed toward military aims by officers of the national armies who have men specially trained in the technique of gas-warfare. In the United States, for example, for the preparation of chemical warfare an officer of the reserve is attached to every chemical factory. The report of the chief of the chemical warfare service in the United States, Brigadier General Fries, remarks on the excellent progress which has been made in research and development in this service, which led to the Geneva Protocol prohibiting the use of poison gas in warfare being returned unratified by the committee of the senate for military affairs.

The chief opposition to ratification came from manufacturers and chemists, as is shown by the decisions of the annual meeting of the American Chemist society in Los Angeles in 1925. The report actually stated that the absolute prohibition of training men in the use of chemical weapons in the widest sense would put an end to chemical and medical studies and research, so that such a measure could not possibly be put into practice. It is not surprising that those who stand to gain by war should believe that chemical and medical research have waited for them to dictate their further possibilities of development.

If we study the systematic gas propaganda carried out in exactly the same way in every country we find that the effects tally in every detail with those of the competition in armaments prior to 1914 and must sooner or later lead to war.

Now if we select merely a few of the ever growing figures which reveal the sins against humanity to which this systematic gas propaganda drives the great powers, this is what we find (these figures apply to England only):—

In the period from May 14, 1923 to Jan. 31, 1926, the following animals were used in England for testing the effectiveness of poison gas:—5 horses; 6 apes; 58 goats; 124 cats; 1136 rabbits; 406 guinea pigs; 227 rats; and 167 mice, of which 447 died during or immediately after the experiment and 1132 in the course of the month as a result of the poison gas.

In the country in which the Washington disarmament conference was held which once again prohibited the use of poison gas, the gigantic plant of the state arsenal at Edgewood swallowed up most of the budget allowance for chemical defence measures in America, which in 1924-25 amounted to $8,700,000.

EXPERTS VIEWS ON THE EFFECTS OF CHEMICAL WARFARE

The effects of poison gas, which in themselves are sufficiently terrifying, become all the more fearsome and deadly when combined with other destructive agents used in modern warfare; fire bombs filled with white phosphorus, petrol and additional substances to increase the incendiary effect, the high explosive bombs which have a greater content of more destructive explosive than during the last war, as well as all the technical progress which has been made for utilising these means of destruction by developing bombing planes and aeroplanes controlled from a distance and generating gas.

In an address to a congress held recently at Ithac, near New York, Sir Max Muspratt stated that the chemical industry was now in a position to destroy unlimited areas completely in a very short time.

General Sir Reginald Hart writing in the Hibbert Journal in 1924 said that in any future war large cities and extensive areas, with men, women and children, would be annhilated. Millions of human lives would be lost in a few hours by gas bombing attack, as was pointed out by General Groves. Along with this opinion goes that of Lord Thomson of Accrington, former English Air Minister.

Professor Cannon of the Medical school in Harvard University, one of the experts who prepared the report on chemical warfare for the preparatory disarmament commission, said that so far as the civil population is concerned in any future conflict mass murder will run alongside the destruction of industrial centres. This same fact has been emphasised recently by Captain Villiers Stuart in the Journal of the Royal United Service institution.

The German Military expert, Lieutenant-Colonel Bolke, expresses the same view in a letter to the famous originator of gas-warfare, Professor Haber, in Berlin.

The report of the German Red Cross to the 13th International Red Cross conference at the Hague in 1928, referring to the newly invented bombs with time fuses which explode after 4, 6, 8, 12, 18, 24 or 36 hours, stated:—

It is obvious that all rescue and protective measures would be practically useless if such a bomb exploded in a town after several hours or days.

Lieutenant-General Altrock writing in the official magazine of the German Army, the Militarwochenblatt describes the effects of an air attack:—"The population over a large area may expect destruction at any moment. The next war will take the form of mass murder of the civilian population rather than a conflict between armies." The writer goes on to describe the effects of the high explosive bombs weighing 500 kilogrammes each, to be used by the French Goliath planes, not to mention the super bombs of 1000 and 1800 kilogrammes which have been constructed by the French and Americans.

He also mentions the effect of the incendiary bombs which weigh only one kilogramme. They have only to strike a roof, and then the thermite (a magnesium alloy) with which they are filled develops a heat of 3000 degrees; the outer covering also burns, and this glowing mass can eat its way even through steel. Water merely increases the incendiary effect, and no extinguishing appliance has yet been discovered. The destructive effect will also be felt in the streets. Flames as high as houses will burst forth from the gas mains which are laid along the streets and the population will be thrown into a state of panic, a condition which is always a definite military object. The civil population, in a word, would completely be deprived of any remains of self-control. Ludendorff, the former Field Marshal of the German Army, states in his memoirs that in 1918 preparations were being made to set fire to London and Paris by air bombs which were filled with Magnesium Powder and Ferric Oxide. It is not difficult therefore to understand the statement of Lieutenant Seiger, inspector of the German Air Fleet, in the Berliner Illustrierte Zeitung when he says that a few aeroplanes containing electric bombs would be sufficient to reduce the capital of any great state to ashes.

The Berlin Bombs, prepared for use in the 1919 campaign, but never used, are said to be so deadly, and experiments prove the case, that they could kill every person in the open within from 6 to 800 metres from the spot where they exploded.

General Groves, referring to the use of Lewisite gas says that three drops are sufficient to kill a man if they come into contact with any part of the skin. No reasonable person can hope that General Groves was mistaken when he said that millions of lives could be lost in a few hours.

With regard to the effects of poison gas, Lord Halsbury, chief of the explosives department of the British Ministry of War, during the Great War, informed the House of Lords on July 14th, 1928 that 40 tons of Diphenylcyanarsine would suffice to destroy the whole population of London. Diphenylcyanarsine is a gas of the Blue Cross type which was commonly used during the last war. The effects of the new gases which have been invented are, according to Brigadier-General Fries, 50 times superior to those of the gases used during the war. This statement is made by the general in a communication to the Aviation committee of the American House of Representatives. Field Marshal, Sir Hugh Trenchard, Commander of the British Royal Air Force, has estimated the probable weight of the bombs which will be dropped in one day in the next war at 300 tons. That is equal to the weight of all the bombs which were dropped on London during the last war.

General Squier mentioned recently at a congress in Philadelphia that science was able to put a whole nation to sleep for 24 hours by gases given off from aeroplanes controlled from a distance. In a publication of the Russian Aviachim Society for Chemical Warfare we read this: "A modern city with about half a million inhabitants (i.e. an inhabited area of about 200 square kilometres) could, if unprotected, be turned into a field of corpses by a squadron of 40 to 50 aeroplanes."

It is not only pacifists who are alive to this terrible situation. In every state military men and politicians in responsible positions are coming gradually, but unfortunately all too slowly in view of the danger, to the conviction that matters simply cannot be allowed to continue as at present. The senselessness of the sacrifice that would be involved cannot and must not be further concealed.

Anyone who still believes that war is humane or can possibly be made humane, or that we must fold our hands and cry "Deus Vult," and that these terrible forecasts are myths, notwithstanding the reports of the League of Nations and the Red Cross, should reflect on the different means of destruction during the Great War.

MEDICAL EFFECTS OF POISON GAS

The first poison gas which was used to any extent was Chlorine, first tried at the battle of Ypres, in April, 1915. The use of this caused the death of 6000 men. The effects of Chlorine are well known, namely the destruction of the blood vessels leading to a terrible agony of suffication, which may continue for hours or weeks and ends with the coughing of blood which means death.

If the advocates of gas warfare did not aim at the death of their enemies as they sanctimoniously maintain when pressing the alleged humaneness of gas as a weapon, the course of development of gas warfare would probably have been the exact opposite of what it actually was. Chlorine as most people know is a composition of irritants. These irritants were later eliminated and therefore not noticed by the enemy, so that he became a victim to the most serious gas poisoning. Among these is Carbon Oxychloride (Cocl) which is widely used in the chemical industry. Since it is formed in light from a combination of monoxide and chlorine it is referred to as Phosgene. Phosgene, together with the German Tricholormethylchlerformate (Cl.COO.CCl3) which is known at Green Cross gas causes what the English soldier named, Dry-Land Drowning. In principle, death by Green Cross gas is in no way different from what happens when a mouse is drowned in a trap except that death by Green Cross gas is infinitely more painful because the torture lasts for several hours. The effect of this gas is that the lungs of its victims become literally filled with blood which means that the victim dies a gradual and painful death by drowning in his own blood.

Another gas which resembles Green Cross gas is Chloropicrin. This gas, which is ready for application on a large scale in future wars, causes dropsy of the lungs. With Chlorpicrin there is great risk of apoplectic attacks as a result of choking of vessels by coagulation. General uneasiness, contraction of the pupils, muscular spasms, screams and rapid breathing, a fall in temperature, a state of collapse, or paralysis of the lower limbs may also occur.

Perhaps the most devilish form of gas is that known as Arsenic-Gas available on a large scale for use in chemical warfare. Experiments with this gas reveal the following effects:—

1. A mixture of one part Arsenic gas with 10 million parts of air puts a man out of action within one minute.

2. In 1918 a very dilute mixture of this gas was passed, for experimental purposes, over a herd of goats in an enclosure. All the animals save four were killed by the gas, and these four crushed in their own skulls by butting them against the enclosure.

3. A colleague of Major Nye entered a cloud of such low concentration that for the moment he had no suspicion of a gas mixture. A few minutes later he was overcome by violent nausea and pains. After four days a chronic arsenious inflamation of the skin appeared and his nerves suffered such a shock that the athletically built man soon became a broken wreck. Three months later he succumbed to the effects of the gas.

This brand of Arsenic gas is to be used in 5 lb generators, of which 600 form the complete load of a commercial aeroplane.

Finally, to this list of war poisons must be added Cacodylisocyanide; AS(CH3)2NC, a highly toxic substance, one breath of which can prove fatal. It is clear that military chemists will not ignore such poisons as Lead Tetrethyl, Diethyl-Telluride, which according to Professor Zangger have a toxic effect which is 100 times greater than that of strychine. Work on this poison cost the lives of all the 38 workers in a factory in New Jersey.

Below Surface in Mine Dispute

Anxious to secure first-hand information about conditions in the coal mines for presentation before General Johnson's N.R.S. hearing, Judge M. A. Mussmanno, Pennsylvania county jurist, is shown taking a noon-day snack during his visit to the depths. The judge, attired in a miner's outfit, swung a pick during his adventure among the black diamonds.

JUDGE NISBET TO HEAR ELECTIONS

With four accused persons entitled to elect a speedy trial if they so wish, Judge W. A. Nisbet, it is stated, has tentatively set Thursday for a county court sitting to receive elections.

Those entitled to this privilege are, Charles Fontaine, the Taghum rancher charged with shooting with intent to do grievous bodily harm, who is out on bail; Fritz Hamblim and George L. Fleming, Deer Park ranchers charged with shooting a horse; and Thomas Allen, who is charged with breaking and entering the Cork-Province mill last October.

URE RELIEVES, KASLO OFFICE

R. F. Ure of the government office staff at Nelson is now relieving at the Kaslo office. He is acting in the absence of W. H. Dunn, mining recorder, who is at present on his holidays.

WHEN DE VALERA TOOK A SHOT AT GANDHI ON UPPER COLUMBIA

(By ROSE WILLIAMS WRIGHT)

Such celebrated seamen and master mariners as Old Father Noah and Christopher Columbus could perhaps tell many funny tales of the sea. But to my knowledge there is no record of any humorous anecdotes in connection with their different ships or trips.

The only trip on record of the ss. Ark is still spoken of as a masterpiece of navigation, without the aid of chart or compass Old Father Noah brought his ship through and anchored in a high and dry port, which piece of navigation was worthy of mention, especially in those stormy days. Now if it had not been for the superior seamanship of this Rev. Old Gentleman, I should not be recounting this anecdote of life abroad ship in later years.

It was not my intention to attempt a history of the mariners of the world, but to try to tell a little incident which was told to me by a captain of one of the paddle-wheel steamers of the Upper Columbia. It is with regret that I say the dear old days of the steamboat are departing. The ever increasing highway and bus lines have taken the romance as well as the dividends out of steamboating, and this old-time mode of travel is rapidly going the way of the old side-wheeler on the Father of Waters—the ever romantic Mississippi.

This funny little tale happened quite a number of years ago on the old stern-wheel steamer Kootenay, whose hull now lies bleaching on the shores of the Upper Columbia. Looking backward 20 years, when the steamer was the only means of travel in that upper country, the passenger list was always long and varied. The boats sailed from West Robson to Port Arrowhead, and in those days time was not so important as today, and the run was made in varying degrees of time, according to the amount of express and freight to be handled and mud landings to be made.

WELCOMED TO GANGWAYS

It seems it had been the rule for years past for the captain to stand on the lower deck and sort of greet the passengers as they came aboard. And, as Capt. Walters told me, this night was his turn on the reception committee. And among the passengers to come up the gangplank were 12 to 14 Hindus who were going to Port Arrowhead to work in the sawmills. They had all been indulging, not wisely but too well, in the native wine of India, if there is such a wine. However, it had the required effect of making merry.

Also among the list of passengers to meet the captain at the gangplank was a friend of his, a Mr. Manson, who every year in the grouse season made a trip up to the Whatsham valley to hunt. He would arrive at his destination somewhere around three or four in the morning—as I said before, according to the amount of freight to be discharged and taken abroad.

On a previous trip Mr. Manson had had a rather trying encounter with a bull belonging to the farmers of the valley, and only that Mr. Manson was a young man the winer of many a hundred-yard dash, this story might never have been told. September was usually the month he chose to hunt grouse, and at this early hour of the morning it was dark when he disembarked from the ship, and it was in this weird morning light that he had the argument with Mr. Bull as to who should have the right of way across a certain clover field. However the bull won, and Mr. Manson had to walk many miles to reach the cabin of his friend.

PREPARED FOR BULL

So, as he came aboard the old steamer Kootenay this night he said, "Well, Captain, I'm ready for Mr. Bull this try. I've got the old double-barrel shotgun loaded with bird shot; and there won't be any argument with the gentleman cow when I get off your ship tomorrow morning." With these few words he wished the captain "Good Night", and proceeded up the stairs, got his stateroom ticket from the purser, and hurled off to bed, as 4 o'clock in the morning came pretty early and he was anxious to get as much sleep as possible so as to start the day's hunting in the best possible shape. Before going to his stateroom, however, he put the shotgun, along with a bundle of blankets and a small camping outfit, on an improvised baggage rack atop of the steam dome of the ship's boiler.

The humble Hindu passengers did not take a stateroom but laid down to rest all around on the chairs and benches of the forward cabin, using their ever-present black turban as their pillow.

FIGHTIN IRISH

Also among the passengers this night was a somewhat inebriated Irishman, who very quickly got into very serious one-sided argument with the Sons of India, who spoke not the language of Pat, and made only spurious motions in response. This so incensed the Son of Erin that he proceeded to take off his coat and invite as many Hindus as wished to come and have the "everlasting stuffing knocked out of them."

The captain finally ordered the mate, a great burly fellow of 265 pounds, to go up into the cabin and handcuff Mr. Irishman and take him below, or else make him promise to be quiet as he was disturbing the slumbers of passengers in rooms adjacent to the forward cabin. "Big Bill," the mate, in his usually persuasive manner, very soon succeeded in calming the fighting Irish, and along with his enemies, the Hindus, he soon fell asleep on the bench.

SHOT RINGS OUT

Everything was peaceful and quiet again except for the exhaust of the Kootenay as she puffed her way up the swift waters of the Columbia, when all of a sudden a shot rang out in the stillness of the ship's cabin. Mr. Manson's loaded shotgun had become overheated from the steam of the boiler, and along with the vibration of the boat had caused it to slip off the baggage rack, and in so doing discharged, hitting several of the Hindus in the shiny portion of the trousers.

Pandemonium reigned for a few moments in that ship's cabin. The Hindus were so startled by their rude awakening that some were praying, some weeping, and others cursing. This Hindu bedlam aroused the sleepin Irishman, who jumped up as quickly as his tipsy legs would allow, and shouted, "hurrah, mate, that's the stuff. Give the sons of guns the other barrel!"

Well, the trip continued, the Irishman left at Snag Bay, where he was going to work in a logging camp. Mr. Manson disembarked at Christie's Landing with the shotgun reloaded for bull, and three of the Hindus were occupying staterooms with a doctor who happened to be abroad busily engaged in picking bird shot from the south-by-east ends of the howling sons of India.

MALONEY HAS GOOD FISHING, BALFOUR

BALFOUR, B. C., Aug. 15.—M. Maloney, who is summering at Balfour, accompanied by C. Maloney of Proctor, brought in a fine catch of 23 trout recently. They also caught two small salmon.

Mr. McLarin of Trail arrived at Balfour on Sunday to take back Mrs. McLarin and daughter Betty, who have spent the past six weeks at Balfour, the guests of Mrs. Ed. Hall.

Mrs. Bishop and Mrs. Yale and family of Trail returned home on Thursday after spending a few days at Balfour.

Mrs. Caldicott and Mrs. Bastin of Trail are spending a vacation at Balfour Beach.

Mr. and Mrs. O. Gray of Nelson spent the week-end at Balfour the guests of Mr. and Mrs. J. C. Forbes.

J. C. Forbes who is constructing a summer home here, spent the week-end with his family.

Mr. and Mrs. Palmer and family of Trail are spending a vacation at Balfour.

Mr. and Mrs. Wallenger and son Peter who have spent the past month at Balfour returned to their home in Trail on Sunday.

Mrs. McCallum of Trail, accompanied by her family, is spending a few days vacation at Balfour.

A. Stringer and a party of friends from Nelson motored to Balfour on Sunday.

DRAPERS VISIT CRAWFORD BAY

CRAWFORD BAY, B. C., Aug. 15.—Mr. and Mrs. Draper of Nelson are the guests of Mr. and Mrs. James Derbyshire.

Sidney Horswill of Nelson who has been visiting Mr. and Mrs. A. H. Deverson, has returned to his home accompanied by Dennis Deverson.

Mr. and Mrs. Peter Thorsen and their niece, Miss Nelligan of San Diego, motored up and are the guests of Mr. and Mrs. Neal.

Mrs. G. Jameson and two little sons are the guests of Mr. and Mrs. Craft of Nelson.

RAINS RUIN CHERRY CROP

Packing Shed Closes—Procter Social Events

PROCTER, Aug. 15.—Mrs. J. Dosenberger and Mrs. H. McCarthy were hostesses recently at an enjoyable beach party at Sunshine Bay in compliment to Mr. and Mrs. C. Sewell of Vancouver, who are visiting at the home of Mr. Sewell's parents, Mr. and Mrs. J. Sewell, Cherry and Dick Sewell, Mr. and Mrs. J. Chell, Dick and Joe Chell, Mrs. W. Hodge, Joan Hodge, Mr. and Mrs. N. Dosenberger, Mr. and Mrs. W. Soles, Kenneth Soles, Mr. and Mrs. J. Dosenberger, Capt. and Mrs. H. McCarthy, Stanley McCarthy, Betty, Bernice and David Hale.

Mr. and Mrs. N. Dosenberger of Sunshine Bay were week end visitors to Nelson.

Mr. and Mrs. Maurice Major have returned from a visit to the coast.

Mrs. R. Hale, who is the guest of her sister, Mrs. H. McCarthy of Sunshine Bay, spent a couple of days at her home in Nelson.

Mr. and Mrs. W. Bennett and family accompanied by Mrs. D. Malone were Nelson visitors on Monday.

Mrs. F. Schofield and P. Schofield of Trail are guests at the Outlet hotel.

Mr. and Mrs. P. Bennett and daughter Elsie, and Mrs. R. Walton have returned from a motor trip to Vancouver.

Mrs. H. Severn and daughter, Mrs. Rinheim and children of Trail left for home after spending several weeks in an Outlet hotel cottage.

Lan Carne of Sunshine Bay is the guest of his grandparents, Mr. and Mrs. J. T. Bealby.

Mrs. E. Brasch has returned from several days visit in Nelson, the guest of her parents, Mr. and Mrs. J. Ryan.

Mr. and Mrs. G. S. Rees have returned to Nelson after a two weeks vacation in Procter.

Mr. and Mrs. G. Barwis of Sunshine Bay are fishing at Coffee Creek.

The Sunshine Bay packing shed has ceased operations owing to the recent rains ruining the local cherry crops.

Fifty-six pounds of quicklime, 74 pounds of slaked lime or hydrated lime, and 100 pounds of finely ground limestone have exactly the same values from a standpoint of correcting soil acidity.

The horse in his attitude to man differs from all other classes of stock in that he produces energy and not food.

The Record Route of the French Fliers

This map shows the route taken by the French fliers, Maurice Rossi (left) and Paul Codos (right), in their plane "Joseph le Brix" in setting a new long distance non-stop flight record from New York to Rayak, Syria. The air-line distance is approximately 5600 miles, which the Frenchmen covered in a little over 55 hours.

WEDNESDAY, AUGUST 16, 1933

SENOR MACHADO GETS OUT

Under pressure not only from his own people but of the United States, Great Britain and Spain, President Machado of Cuba has resigned and has given way to a provisional presidency, whose first duty is to re-establish law and order and whose second duty is to bring about a return to constitutional government in Cuba.

For approximately two years and a half the people of Cuba have been under partial military rule. They have been denied the right of free speech, free assembly, habeas corpus, and a free press. Political assassinations have been frequent, and there have been sporadic uprisings against these conditions, which President Machado has put down by the use of military force. Matters have grown from bad to worse.

It had been thought that the mediation of Sumner Welles, the new United States ambassador to Cuba, had persuaded President Machado to put a stop to political violence and terrorism, which threatened violent revolution, by the restoration of constitutional guarantees and by the signature of an amnesty bill to free political prisoners.

Machado has been in office since 1923. A constitutional convention was convened in March, 1928, and it approved various changes in the constitution, including a proposal to increase the President's term to six years without right of re-election. Machado was inaugurated for his second term on May 20, 1929, and it expires on that date in 1935.

It is interesting to note that Cuba, except for a brief period of British occupancy, in 1762-63, remained a Spanish possession from the date of its discovery by Columbus until nearly the end of 1898, when the sovereignty was relinquished under the terms of the Treaty of Paris, which ended the armed intervention of the United States in the struggle of the Cubans against Spanish rule. After this, of course, Cuba became an independent state.

An arrangement was reached with the United States, incidentally, which forbade Cuba to engage herself to any understking with a foreign power which would jeopardize her independence. There were also financial considerations which, in modern parlance, demanded that Cuba live within her means, while the United States obtained certain rights in regard to naval stations. A reciprocal commercial treaty which was negotiated in December, 1903, further strengthened the ties between Cuba and the United States. There followed, however, a good deal of political disturbance and an American commission formed a provisional government in the summer of 1906. This was continued for more than three years, when national governmental institutions became established on a fairly sound basis.

United States early association with Cuba, therefore, naturally is responsible for such intervention in the latter's internal affairs as was reflected in President Roosevelt's hint to President Machado.

CRIMINAL CARELESSNESS SHOULD BE PUNISHED

Within a few weeks the hunting season will open in British Columbia and unless we are unusually fortunate there will be the usual crop of fatalities due to the carelessness of hunters who "thought it was a deer".

Every year the hunting season brings its tragedies in which hunters are slain in mistake for deer. Those who have gone out for a few days' sport in the bush have become targets for the rifles of their companions who have seen something stirring through the trees, have jumped to the conclusion that it must be a deer, and have blazed away at the moving mark.

We have become accustomed to such stories, told in a paragraph or two. They may tell how the person who did the shooting is all broken up over the occurrence, mention the family left by the dead man, and give the date of the funeral. Unless there is an inquest, that is probably the last the public hears of such an event. If there is an inquest a verdict of accidental death may be taken for granted.

But a court sitting in Amherst, N. S., had before it an incident of this kind which had a somewhat different ending. Out early in the morning, a hunter had seen what he took to be a deer; he had fired, and a women was killed. The hunter was arraigned on a charge of manslaughter. The court found that the shooting was entirely accidental, but the judge emphasized the fact that the hunter had taken in sufficient precautions and sentenced the accused to jail for 12 months.

Hunters know that other hunters are likely to be in the woods on the same mission as themselves, and that it is not improbable that other persons may be following their occupations in the bush. Before they discharge the shot, the purpose of which is to cause death, it is essential that they should be absolutely sure that their target is the animal they are after. It is only right that the hunter who takes a chance at the expense of the life of a fellow-being should be dealt with by the law without sympathy. He should pay the penalty provided for criminal carelessness.

"Between You and Me"

By "J.B.C."

Mrs. A. M. Williamson, London novelist, intends to pick up all the American slang available so she told a New York interviewer.

American slang, Mrs. Williamson finds, is highly profitable. Her latest book, which she began writing at the age of 18 when on her honeymoon, has sold to the extent of one million copies. She attributes the book's success to the fact that it contained "gobs of your funny American language."

"In fact," the novelist added. "I used so much slang that it made my publisher fighting mad."

"You have no idea," she went on, "how all of London is speaking your new tongue. Just before I sailed I was talking to an English judge when he surprised me with, 'See you.' The latest saying in London when I left was 'It's okay by me, chief.'"

• • •

"I have been nearly run ragged," she observed, "since last January, when I got mixed up in that Dartmoor Prison outbreak at Princetown, England. You see, about 300 convicts decided one night to mutiny.

"Well, there was a convict by the name of Graham who refused to join the mutineers. He battled the mad convicts and actually saved the life of the prison governor, who in turn was badly injured. Graham stood off the other convicts until overcome. He was then tossed by the convicts into a burning building. He escaped with a broken arm and severe burns.

• • •

"I thought his bravery unparalleled. So I decided to do something about it. The first thing I knew I had Graham on my hands. I was his nurse, his bodyguard and what have you. Not only the prisoners who survived the outbreak swore they would kill Greham but relatives on the outside said they would too.

"I found myself not only his benefactor, but in the role of his protector. Only last week I saw him off to join the Foreign Legion.

"The last words he said to me were, 'Are you going to Hollywood? Then please take a long look at Marion Davies and Joan Crawford. They are all I care about in the world.'"

• • •

Too many gals twine their arms around a feller merely to string him.

• • •

Our girl friend down the street tells us that she has given her boy friend his walking ticket. She asked him to buy her a lap dog for a birthday present and he sent her a St. Bernard.

AUNT HET

"It's right educational to go through Ella's kitchen an' pantry. I didn't know there was that many kinds o' bugs in the world."

"MARY FAITH"

By BEATRICE BURTON

CHAPTER VII

It was half past nine when Mary Faith walked into the office that morning.

Jean Bartlett and the other stenographers looked up at her and smiled when she opened the door. Something in Jean's smile made Mary Faith turn a quick half-frightened glance at the door of her own little room. . . . Suppose the girls were giving her an engagement shower! A shower like the one they had given Miss O'Keefe last year just before she left to be married!

"I hope they haven't—Oh, I do hope they haven't," Mary Faith prayed silently.

But the second she opened the door she saw that the thing she feared would happen had happened. Her desk was covered with white packages tied up with satin ribbon and her glass flower vase was filled with long-stemmed bride's roses.

She stood gazing at them in agony for a second. Then she closed the door and went into Mr. Mark Nesbit's office without stopping to knock.

He was sitting at his desk, doing nothing. His letters lay in a neat stack before him. She saw that they had not been opened. She had always opened his letters for him.

"I'm sorry I'm late," she said, and then: "May I speak to you a moment?"

He nodded.

"Mr. Nesbit, yesterday afternoon I told you I was going to leave you at the end of the month. . . . I'd like to stay on if it's all right with you. I've changed my plans."

He glanced up at her.

"You mean that you're not going to be married in two weeks?" he asked sharply. So sharply that it did not occur to her at the time that this was anything but a business-like question.

"I'm not going to be married at all," she answered quietly. "I've broken my engagement."

"I see." He got up and stood beside the desk, his hands in his pockets. "Everything here goes on just as it usually does, then. . . . Well, thats fine, Mary Faith."

He never had called her Mary Faith before.

Everything had always been perfectly business-like and matter-of-fact between them. She had done his work and he had paid her her salary. They had always been "Miss Fenton" and "Mr. Nesbit" to each other.

"Please send Miss Bartlett in," he said as Mary Faith turned to go out of his office. "I spoke to her just now about taking your position when you left. . . . I'll tell her you're staying on. That will save you any embarrassment."

In her own little room once more Mary Faith stood looking at the white tissue-paper packages on her desk.

One of them smelled of gardenia sachet powder. The heavy scent rose to her nostrils and made her think of the little bunch of gardenias, tied with silver ribbon, that Kim had sent to her last Easter. Once again she could see the pale watery sunlight of Easter Sunday morning when she and Kim had walked side by side to church. Kim—There would be something to remind her of him always. . . .

She was picking up the white packages from her desk when the door of the room flew open and Jean Bartlett came in.

"What's this Mr. Nesbit's been telling me?" she asked, shutting the door behind her. "You're not going to leave after all?"

Mary Faith shook he head, her face white and still above the bride's roses on her desk.

"Well, what on earth—? What's happened?" asked Jean. "Aren't you going to be married?" Her black eyes were wide with curiosity.

She was one of those frank, cheerful, talkative people who have no secrets. She told everything there was to tell about herself to anyone who would listen to her. Mary Faith knew all about her love affairs, her home life, her friends, and her bank account.

And because she had no secrets of her own, Jean had no qualms about poking her nose into other people's business. But she was lovable and loyal and amusing, and she and Mary Faith had been great friends for four years.

"No, I'm not going to be married," Mary Faith told her with lips that felt stiff although they were trembling. She looked down at the packages in her hands, and when she looked up again her eyes were shining under a film of tears.

"What happened? Did Handsome change his mind?" asked Jean, who knew Kim and frankly admitted he was the best-looking man she had ever seen.

Mary Faith nodded slowly. Then she came around the desk with the engagement presents in her hands.

"These presents. . . . It was mighty nice of the girls to bring them to me," she said. "You give them back to them, Jean, please. I can't—" She shook her head, unable to go on.

Jean fairly snatched the packages from her. Then she seized the bride's roses by their long stems and shook the water from them.

"Oh, but I'd just like to tell Kim Farrel what I think of him!" she said, bristling all over. "It's too bad you haven't a father or a brother or somebody to go around and give him the best sock on the nose he ever had, Mary Faith. That's what he needs. . . .To do a thing like this to you!"

She dropped the roses into the waste basket and picked up the waste basket.

"Buck up, Mary Faith. Don't take it this way!" she went on. "Plenty of mothers have sons, you know. A girl's a fool to break her heart over one man when the world's so full of them. . . You'll find somebody else pretty soon and in six months you'll have forgotten you ever knew Kim Farrell. I know. I've been engaged twice—and I wouldn't shed a tear over the best man alive!"

When she had gone, taking the waste basket of roses and the engagement presents with her, Mary Faith ran downstairs to the rest room where she cried bitterly as she washed the scent of gardenia sachet from her hands.

All day long as she went back and forth in the office she could feel the curious eyes of Jean and Miss Saxe and Miss Kelly upon her. She knew that they were all wondering just what had happened between herself and Kim.

And Miss Gilday, who operated the switchboard, had put through telephone calls from Kim to her every day for almost four years. . . Miss Gilday must be wondering what had happened, too.

(To be Continued.)

WHAT DO YOU THINK?

Objects to Thought of Intelligence as Apart From a Being

To the Editor:

Sir—The correspondence in your paper some weeks ago by "Believer" and others was so interesting and thoughtful as to make one sorry when it ceased. "Realist" supplied the lighter relief with his droll objection to quotations. It was pleasing to see the discussion taken up again by others in your issue of August 9 and 10.

A large proportion of the scientific men of our time believe in God, but there are many other people who say they believe in some universal directing intelligence, but do not believe in God. But how can intelligence exist except as the intelligence of some living, conscious being? Intelligence is an abstract noun like beauty, joy and sorrow, love or hate. Beauty cannot exist except as the beauty of something and there cannot be joy or sorrow, or love, or hate except that which is felt by some living being. The idea of some great intelligence floating about on its own and unconscious of its own existence seems due to confused thinking. They obviously personify the abstract and then deny the personification and withal did not explain anything.

If we examine or take to pieces a cleverly made machine, or other work of man, we see the intelligence of the man who made it, but we do not find the man; yet we do not deny the existence of the man who made it, and say it was made by the intelligence we found in the work existing on its own. We would regard such a statement as absurdity.

The study of physical science reveals intelligence that fills men with wonder and reverence. Whose intelligence is it? We believe it is the intelligence of God. Physical science tells us how a great many things take place, but tells us little of the why and wherefore. Look at the beauty of the world and think of God; the wonder of the flowers; a landscape on a summer day when "the sky openeth; the wind runeth wild; laughter passeth o'er the earth". Look at the trees and the mountains in summer, or when the white peaks stand out clear cut against the blue in winter: "The frozen silence of star yearning heights."

Watch a sunset or a sunrise on the prairie and think of the lines. "Thou that makest the outgoings of the morning and evening to praise Thee". Listen to the wind among the trees, the sound of running waters, the song of birds. Feel the joys of love and friendship, of finding unexpected goodness and noble purpose, or thrill to the greatest poetry or music composed by man; the feeling is borne in upon us that all these things lead off into the infinite, and what we perceive is an earnest of greater things beyond.

"I have had thoughts in the valley
That never could float into speech,
I have heard songs in the valley
That music never could reach."

—RBW

Twenty Years Ago

(From The Daily News of August 16, 1913.)

The foundation of the new Kaslo school house is about complete.

• • •

The Steelite Explosives Limited, has purchased a site for a new powder plant on Mill creek, immediately across from New Denver.

• • •

Mrs. A. S. Horswill and sons Hugh and Jack will leave Tuesday for a visit to Hedley.

• • •

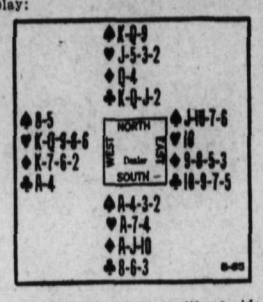
F. E. Merry, manager of the Silver Cup mine at Ferguson, is a guest in the city.

Auction and Contract Bridge

By the World's Leading Authority, MILTON C. WORK

THE TIME FACTOR

In the following hand played by a quartet of experts before several expert kibitzers in a prominent New York club a situation arose which illustrates most forcefully the importance of the time factor in the play:



The bidding with neither side vulnerable, was South one No Trump, West two Hearts, North three No Trumps.

To trick 1 West's lead was the Eight of Hearts. The bid and the card led enabled Declarer to place the King and Queen of Hearts in the West hand and the Ten in the East, so dummy's Jack took the first trick. Appreciating that the chances were against a 3-3 division of either the adverse Spades or Clubs and that the Ace of Clubs was marked by the bidding as being in the West hand, Declarer led the Nine of Spades, taking with South's Ace, and followed with a Club through West Dummy won with the Jack and led the Queen of Diamonds, South, with Ace-Jack-10 finessed. West's King of Diamonds won and a second Heart was led, clearing that suit. After that Declarer had no option but to lead a Club. West won with the Ace and cashed his good Hearts, defeating Declarer by one trick.

THE CORRECT PLAY

The kibitzers and the other players at the table had a good time (possibly North not quite as enjoyable a time as the others) at the expense of South who had thrown away a game by bad timing. It was a fatal error to permit West to establish his long Hearts before Declarer established four minor tricks. The chances favored West's having the King of Diamonds; so it was clear that on trick 4 South should have played the Ace of Diamonds, refusing a tempting finesse, and to trick 5 led a second Club. If West did not play the Ace on this trick, North would win, lead another Diamond and thus insure the taking of three Spades and two tricks in each of the other three suits. With the Ace of Clubs played on the second trick, Declarer can fulfill his contract because he will book three Spades, two Hearts, one Diamond, and three Clubs before West gets his Hearts going.

Told in Rime

THE SONG I CANNOT SING

While multitudes to-day are met
My great Redeemer's praise to sing,
My Soul; Canst thou His gifts forget—
Hast thou no song of praise to bring?

But how shall human words declare
The love of Him who died for me—
Who in His holy flesh did bear
My guilt upon the shameful tree.

I sing forgiveness—blest relief
To hearts by sharp conviction riven—
Pardon for sins beyond belief
So dearly bought, so freely given.

How passing precious is the Blood
That cleanses me from every stain;
This Gospel is the power of God
That frees me from sin's tyrant chain.

I sing His perfect righteousness,
The spotless robe to cover me
And fit me for that glorious place,
Where I His blessed face shall see.

I sing afflictions bright design—
At first—the surgeons dreaded steel,
But guided by the Hand divine,
The lancet always hurts to heal.

I sing unnumbered gifts besides
Of daily providential care—
Of all the favorite winds and tides
That speed my bark to "Heaven's Fair."

Of Sabbaths full of holy peace
Of kindred hearts with love aglow
And joys that ever shall increase
Which from His great salvation flow.

So though I may not join the throng
That makes His house with praises ring,
Deep in my heart He reads the song
My broken accents cannot sing.

—KATE MCNEILL

What the Press Is Saying

DOMINICAN REPUBLIC

Beggars are multiplying, and are troubling much the merchants, especially the sellers of comestibles. Pedestrians and vehicular traffic are scarcely less annoyed by these importunate hordes who desist their supplication only when a gratuity has been bestowed.

There is at Moca, not far from this metropolis, an asylum where the aged and destitute are given a refuge. Those also impoverished, but young and vigorous, are considered able to find ways to support themselves by honest toil.

There is also on the register of ordinances ratified by the municipal council a provision which makes mendicancy on the street illegal. This ordinance might as well have made it incumbent upon a large portion of the populace to beg, insofar as any constraints appear to be placed upon such vovations.—La Opinion, Santo Domingo.

For all litters of pigs and particularly fall litters, direct sunlight is necessary. Straw sheds or colony houses should be placed so as to provide shelter with the opening towards the south.

THAT BODY OF YOURS

By JAMES W. BARTON, M.D.

ASTHMA AND HAY FEVER

I sometimes wonder what hay fever and asthma sufferers must think as they read daily of the wonderful cures being obtained by various physicians throughout the world, and yet despite the various treatments they have received, they still suffer with hay fever and asthma.

What are the various "cures" that are thus recorded?

The cures are first aimed at the causes of these two ailments—sensitiveness to certain foods, furs, feathers, pollen of plants, various dusts in the home, ailments or deformities in the nose, throat, or bronchial tubes, acute infections such as influenza, bronchitis, pleurisy, scarlet fever, whooping cough, measles.

Before treatment is undertaken the patient is thoroughly examined and tested by the various substances, now known to be hundreds in number. Treatment is then given according to what the examination and various tests show.

This treatment consists of various drugs, of which adrenalin stands first; proper attention to diet, rest, and outdoor exercise, vaccines, the surgical removal of adenoids, tonsils, growths, or deformities in nose and throat, the use of pollen extracts before and during the hay fever season.

Dr. T. S. Heaton, Toronto, who made a study of the various causes and different methods of treatment, gives conclusions reached after reviewing some of the work and writings of 65 physicians doing research work on hay fever and asthma.

He believes that the treatment of hay fever and asthma by the avoidance of the substances that cause these conditions is the best method at this time. Rooms in which these substances cannot enter and the use of air filters are of great value in fighting these ailments. Avoiding the foods known to cause hay fever or asthma is the best method of treating this particular type. "Certainly asthma and hay fever are difficult to cure. Certainly too, the special treatment by extracts can help many at any age."

So if you are an asthma or hay fever sufferer and think you have tried everything, just ponder over these remarks by Dr. Heaton, and try to discover if there is not something you have left undone.

Ten Years Ago

(From The Daily News of August 16, 1923.)

Temperatures yesterday were 52 and 88 degrees.

• • •

In the joint regatta of the Kootenay Launch club and the Nelson Rowing club yesterday, a Nelson crew composed of E. Murphy, L. DesBrisay, G. Armstrong and H. Francis beat a Kelowna crew.

• • •

Tre Creston board of trade is arranging for a big delegation to be present at the official opening of the Ymir road on August 29.

• • •

Mr. and Mrs. W. E. Keyt returned last night from a visit to the Windermere.

• • •

Miss Pauline Sloan, who has been connected for years with the Canada Drug and Book company here, has left for Grand Forks.

25 Years Ago

(From The Daily News of August 16, 1908.)

The Grand Forks fire department last week, gave a farewell smoker for J. A. Dinsmore, who ever since the organization of the brigade has been captain.

• • •

It is the intention to fence the government lots on the northwest corner of Vernon and Ward streets and to build a large concrete retaining wall along the Vernon street side.

Commodore C. W. Busk asks that every boat owner in the city, that is about 140, be on hand Wednesday to have their craft photographed in a group picture.

• • •

About 140 feet of six feet deep retaining wall along the Tremont block sidewalk was filled in with concrete yesterday by four men, fetching and mixing their own material.

Frost on the 20th of July damaged garden crops in some places of British Columbia.

THE RHYMING OPTIMIST

By ALINE MICHAELIS

THE SYMBOL

You are the symbol, nothing more,
Of something not on sea or shore,
Some fairer thing than man has gained,
The dream forever unattained.
You are the symbol and through you
The beauty not of earth we woo;
Not that of self, but selfless grace
Is written on your form and face.

As haunting melodies suggest
A far and half-remembered quest
Across strange seas and lands unknown
Where once the seeking soul has flown,
So you call forth dim memories
Of brighter, better realms than these.
Of loveliness none can express
You are the symbol, nothing less!

HUCKLEBERRY CROP LARGE

Hundreds of Pounds Gathered Near Yahk

YAHK, B. C, Aug. 15—Mrs. James Vigers and Miss Marcelle Nedelic returned home Saturday from Green Bay and Moyie Lake.

John Wardrope, jr., Jens Ringstad, Alan Verch, Jack Brown, Alex Brogan and James Vigers spent the weekend here, returning to Canal Flat Sunday.

Mrs. Alex Brogan was a weekend visitor in Cranbrook.

Miss Thelma Peterson returned to her home after visiting Mr. and Mrs. Anderson at Canyon.

Mrs. Joe Nedelic, who has been a patient at the St. Eugene hospital for the past 10 days returned home Saturday.

On Friday a court whist drive and dance was held in C. P. R. hall under the auspices of the members of Anglican church Women's auxiliary. Whist prizes were won by Miss Hazel MacCartney, Harry Erskine, Mrs. Kimpett and S. J. MacCartney. Miss Helen McGrath and Miss Vera Setter supplied music for the dance.

Harry Cross has returned home after spending the past month at the home of his uncle and aunt, Mr. and Mrs. C. Taylor at Kimberley.

Miss Evelyn Revans spent the weekend at the home of her parents, Mr. and Mrs. Bert Revans. She accompanied Mr. Brogan on his return to Cranbrook, to the home of her aunt, Mrs. L. P. Williams.

Mr. and Mrs. J. Lindberg, accompanied by Mrs. G. Frederstrom of Bull river, motored to Yahk Saturday to visit Mr. and Mrs. Tom Evjen.

Oscar Frederickson of Canal Flat motored to town over the weekend.

Bert Revans who is employed at Lumberton spent the weekend with his family here.

W. Kotz of Kimberley is visiting town.

Isabelle Renstrom returned to Wardner Monday after visiting Mr. and Mrs. Hugh McInnis. She was accompanied home by Florence McInnis who will visit Wardner before visiting her elder sister, Miss Agnes McInnis of Mayook.

Huckleberry pickers are still journeying out on the mornings to return in the evening with pails of the wild fruit. Gallons of berries have been picked at Camp 10, Little Moyie and Goatfell. The crop is just ripened at Camp 27, so more berries will be brought out. Some men from out of town camp at the various patches and ship or sell to local people a large quantity of huckleberries.

Mrs. Hugh McInnis entertained a few children Saturday in honour of Isabelle Renstrom of Wardner. The girls present were, Rae Wardrope, Florence McInnis, Margaret Wardrope and Isabelle Renstrom.

Mrs. Harry Patterson and son are visiting at *Mrs. Patterson's mother's* home, Mrs. Ray Burlingham, enroute to Trail after visiting in Lethbridge.

Mr. and Mrs. Taylor and family and Mr. and Mrs. Morris of Kimberley spent Sunday visiting Mrs. Taylor's parents, Mr. and Mrs. Himpett. They were accompanied back by Beatrice Taylor and Mary Cross.

Paul Rushcall of Wynndel spent the weekend here.

A French scientist has developed a method of forecasting cyclones based on the phases and declination of the moon and its distance from the earth.

Thanks to Life Insurance ... kept in force

He is Headed for Success

HERE is a young man who has reason for confidence in *himself and in his future.* Back of him are definite financial resources—created by savings wisely invested in Life Insurance.

As a result, he is sure of money for tomorrow's needs. He can favorably impress his employer. He can take advantage of business opportunities that come his way.

In short, he is headed for success.

Look ahead, and you will see the wisdom of saving regularly, and investing in Life Insurance.

Life Insurance is cash property—it gives you credit standing in business—it is a necessity for every man.

Consult a Life Insurance representative today.

READ WHAT A LEADING BUSINESS MAN SAYS:

"I have always advocated that young men should avail themselves of Life Insurance at the commencement of their earning power, when the cost of Life Insurance is low. The habit of saving and investing thus begun is in many cases the most valuable business asset that men have in later life."

T. A. RUSSELL,
President, Massey-Harris Co., Limited.

CALL COLEMAN'S BROTHER-IN-LAW

Inability of the authorities to locate Richard Ball, father of Henrietta Ball, the waitress killed here July 17, has resulted in the issue of a subpoena to Horace Algene Hughes, of Mission Road, near Natal, to give evidence here Wednesday at the adjourned preliminary hearing of Merton Coleman on a charge of murder. Hughes is a *brother-in-law of Coleman.*

Mr. Ball left Natal for Edmonton without giving an address, and his failure to be here when the preliminary hearing opened a week ago resulted in an adjournment after seven witnesses had testified.

Five commonly used alkaline soap builders, namely caustic soda, soda ash, modified soda, sodium metasilicate, and trisodium phosphate, have been tested for detergent efficiency in full-scale power laundry tests. The above sequence represents their decreasing order of efficiency.

As soon as turkey poults are strong enough they are allowed to range, but up to the time of about six weeks of age, care should be taken to see that they are not allowed out in wet weather, as they are liable to become chilled.—Dominion Poultry Husbandman.

Society

This column is conducted by Mrs. M. J. Vigneux. All news of a social nature, including receptions, private entertainments, personal items, marriages, etc., will appear in this column. Telephone Mrs. Vigneux at her home, 519 Silica street.

Miss Louise Cunliffe, Observatory street, made a delightful hostess Monday afternoon when she entertained at a beach patry at Queen's Bay in honor of Miss Aloise Wragge who is holidaying here from Ottawa, also for Miss Ottilie Wragge and Miss Eve Dewdney, whose marriages take place shortly. Miss Cunliffe's invited guests included Miss Jean Waldie, Miss Helen Murphy, Mrs. Reginald H. Dill, Miss Jean Hunter, Mrs. T. H. Bourque, Miss Margot Blaylock, Miss Gale Taylor, Mrs. Louis Biggar of Pasadena, Calif., Miss Dorothea Graham, Miss Ruth Craufurd, Mrs. Harry H. B. Horton, Miss Mollie Green, Miss Irene Kerr of Longbeach and the three honor guests.

Social News of Rossland

The following column of social news and happenings in Rossland is conducted by Mrs. Bessie B Ferguson. Phone Mrs. Ferguson at her home in Rossland and give her details of events of interest to this column.

ROSSLAND, B. C., Aug. 15,—Miss Mary Surina of Kaslo is a visitor in the city.

• • •

Mr. and Mrs. J. Tyllia, Misses Josephine and Wanda Tyllia, and Francis Tyllia of Northport were week-end visitors in the city.

• • •

Miss Betty Gilmour and Miss Pauline McDonald spent the week-end at Christina Lake.

• • •

Mr. and Mrs. Percy Hunt of Ritzville, Washington are in the city today.

• • •

Mr. and Mrs. R. E. Crerar of Spokane were the week-end guests of Mrs. Crerar's parents, Mr. and Mrs. Martin Daly.

• • •

George Wilson, W. C. Stevens and party spent the week-end at Christina Lake.

• • •

Mrs. A. L. Acorn and sons Fred and Garfield have returned from a holiday at Port Angeles, Washington. They were accompanied on the return trip by Mrs. Acorn's mother Mrs. E. A. Morrish and her sister-in-law, Mrs. W. Morrish.

Fall-born heifers from six to 10 months of age should be provided with a good grass paddock during their first summer says the Dominion animal husbandman.

Protect their tender skin

With the safe, soothing olive oil in Palmolive

CHILDREN'S sensitive skin demands special care. That is why Palmolive is the ideal soap for youngsters, and for you, too. Its secret blending of olive oil keeps tender skins safe, clear, soft, healthy.

Every night and morning, massage a rich lather of Palmolive Soap and warm water gently into the skin of face, throat and shoulders. *Rinse well, dry carefully.*

Here's what happens. Palmolive's soothing olive oil *penetrates* every pore, floats out the dust and dirt gathered daily by the skin. This is true foundation cleansing which brings out the healthy, radiant, natural colouring of the complexion.

Buy 3 cakes of Palmolive today. Remember, *only* in Palmolive will you find this rich, cosmetic blending of olive oil. Use Palmolive for only two weeks. Note how the skin has become radiant, soft, lovely.

Now it costs less to keep that Schoolgirl Complexion

MADE IN CANADA

NEW YORK LIST DRAGGY AGAIN

Ticker Drones Out Price Changes of Fractional Unimportance

BY JOHN L. COOLEY
Associated Press Financial Writer

NEW YORK, Aug. 15 (AP)—Stock market gave another slow and listless performance today with the ticker generally droning out price changes of fractional unimportance.

In Chicago grain market, too, trading was inert, and quotations unchanged, obviously awaiting the lifting of price restrictions scheduled for tomorrow. Cotton sold off at the close, while the dollar was firm in foreign exchange dealings. Bonds were irregular and commodities generally steady. Most stocks attracted only meagre professional followings. Turnover was only 907,300 shares.

Even a stronger U. S. dollar—attributed partly to the normal seasonal demand to cover fall commercial transactions and to a lessening of inflationary psychology—created no more than a ripple of interest in the financial community.

While still operating at a deficit, American Locomotive company—in its six month's report—showed it had improved its position substantially over a year ago. Moreover, unfilled orders, as of June 30, 1933, were more than double the amount of the corresponding date a year ago.

LIQUORS FINISH ON THE UPSIDE

TORONTO, Aug. 15 (CP).—Summer dullness persisted in today's Toronto stock exchange session and in the general lethargy prices found the easiest course was downward. Volume was at a low ebb, less than 16,000 shares changing hands.

Walkers common, Industrial Alcohol and Brewers and Distillers finished on the up side and Distillers Seagram dropped ⅞ to 27.

Smelters closed ¼ higher at 130½. Nickel closed at 19.90, off 10 cents, C.P.R. down ⅜ and Ford "A" and Brazilian lower.

International Pete was firm in the oils. Recessions of ⅛ to ½ were recorded for Imperial, British American, and McColl Frontenac.

In banks, Commerce advanced a fraction but Toronto was down ½. Utilities were unchanged or fractionally higher. Massey Harris and Cockshutt Plow slipped small fractions.

Active Issues Off in Draggy Session

VANCOUVER, Aug. 15 (CP)—Active issues dragged through one of the dullest sessions on the Vancouver stock exchange today in weeks. At the close price changes were generally lower.

Reno and Wayside in the golds, came in for a slight flurry of selling with the former issue dropping four cents to 1.45. Wayside dipped three to 53. Cariboo lost 10 to 3.10 and Pend Oreille was off four to 1.12.

Oils were listless. C. and E. corporation eased five to 1.49. Home lost a like amount to 1.95.

Silvers were fractionally higher.

EGG MARKETS

OTTAWA, Aug. 15 (CP)—Continued firmness was again evident today in eastern Canada egg markets.

TORONTO — Market firm. Graded shipments from the west were offered at extras 18½, firsts 15½, seconds 12½.

MONTREAL — Receipts 1271 cases compared with 1514 cases for corresponding day last year. Due to light receipts the market was firmer. Graded fresh shipments sold on spot extras 20, firsts 16, seconds 12½.

HALIFAX— Market firmer and more active. Dealers quoted producers and country shippers extras 17-18, firsts 12-14, seconds 9-11.

SAINT JOHN—The market displayed a firmer undertone but the only change in price has been a one cent advance in the paying price for extras. Dealers quoted producers and country shippers at extras 18, firsts 13, seconds 10.

Apples are sizing well in Nova Scotia, and a considerably larger crop than last year is indicated.

METAL MARKETS

NEW YORK, Aug. 15 (AP)—Copper quiet; electrolytic, spot and future 9.

Tin easy; spot and nearby 43.75; future 43.90.

Iron quiet; unchanged.

Lead steady; spot, New York, 4.50; East St. Louis 4.35.

Zinc quiet; East St. Louis, spot and future, 5.00.

Antimony, spot 7.50.

Bar silver ¼ lower at 35⅝.

At London:

Copper standard, spot £35 15s; future £36; electrolytic spot £40 5s; future £50 15s.

Tin, spot £214 7s 6d; future £214 7s 6d.

Lead, spot £12; future £12 7s 6d.

Zinc, spot £16 15s; future £16 7s 6d.

Bar silver quiet, 1-16 lower at 17¾d.

POUND DROPS FOUR CENTS

NEW YORK, Aug. 15 (CP)—Seasonal demand for United States dollar was the principal reason for the pound sterling's decline in trading on the foreign exchange market today. The pound lost 4¼ cents at a cable rate of $4.39¾, while the Canadian dollar displayed a firm trend.

The Dominion's currency fell back to its previous closing rate of 94⅜ cents. This was a premium in United States funds of 6 per cent against Canadian money.

French franc lost .01¼ of a cent at 5.24¼ cents. The American dollar, in terms of the franc, was valued at approximately 74.68 cents compared with 74.59 cents yesterday.

CALGARY LIVESTOCK

CALGARY, Aug. 15 (CP).—Receipts: 11 cattle; 4 calves; 42 hogs; 73 sheep.

Steers: Up to 1050 lbs., good and choice $3 to $3.50; medium $2.50 to $2.75; common $1.50 to $2.25.

Steers: Over 1050 lbs., good and choice $3 to $3.50; medium $2.50 to $2.75; common $1.50 to $2.25.

Heifers: Good and choice $3 to $3.25; medium $2.50 to $2.75; common $2 to $2.25.

Cows: Good $1.50 to $1.75; medium $1.25 to $1.35; common $1 to $1.10; canners and cutters 50c to 75c.

Bulls: Good $1.75 to $2; common $1 to $1.50.

Stocker and feeder steers: $2.25 to $2.75; common $1.50 to $2.

Stock cows and heifers: Good $2.25 to $2.75; common $1.50 to $2.

Veal calves: Good and choice $3 to $3.50; common and medium $1.75 to $2.75.

Hogs: Off cars, select bacon $5.85; bacon $5.35; sows, No. 1 $3.10.

Lambs: Good handyweight $4 to $4.25; common $3 to $3.50.

Sheep: Fat ewes $1.50 to $1.75; good handyweights $1.75 to $3; yearlings $1 to $1.

BUTTER PRICES SLIGHTLY EASIER

MONTREAL, Aug. 15 (CP)—Wholesale butter prices on Montreal dairy and produce market were slightly easier during today's trading. Butter was quoted at 18¼ to 18½ cents a pound yesterday. Receipts totalled only 217 boxes.

Cheese market was firmer at 10 to 10¼ cents a pound for Ontario and 9½ to 9¾ cents for Quebecs'. The weekly auction of butter and cheese will not be held tomorrow.

MINES OFF

TORONTO, Aug. 15 (CP)—Buyers lowered their bids and worked Standard mining market down a little today, 90 per cent of the listings closing with narrow losses. Eldorado took a loss of 45, closing at 3.40.

Nipissing recovered all its loss but two cents to close at 2.08. Mining corporation and Castle dropped a point each.

Gold and base metal leaders were shaded about equally. Nickel, Noranda and Hudson Bay were off about 25 cents each and Base Metals corporation 10.

Montreal List Off in Light Trading

MONTREAL, Aug. 15 (CP)—In the lightest trading since the comparative boom a few months ago, Montreal stock exchange finished today with losses holding a narrow margin over gains.

International Nickel closed unchanged at 20.00. Montreal Power advanced ⅛ as did Canadian Pacific railway. Canadian Industrial Alcohol issues both gained ¼. Consolidated Smelters rose 1¼ points while Bank of Nova Scotia was up two points.

Brazilian Traction lost ⅛ at 13⅝. Viau Biscuit preferred lost 30 points to a new low at 40.

Lambs: Good handyweight $4.50-$5.00.

Sheep: Good heavies $1.50-$1.75; good handyweight $2.00-$2.25.

Bonds Spiritless

NEW YORK, Aug. 15 (AP)—Definite prices trends generally were lacking in the bond market today as most listed loans milled about in a spiritless manner. Sales totalled only $7,997,000, par value.

Most of the recent favorites were inclined to follow an extremely narrow range, a few secondary railway lines sagged, but prime carrier maturities were steady to firm.

GRAIN-PEGGED PRICES AND EXPORT BUSINESS SEND GRAIN PRICES HIGHER

WINNIPEG, Aug. 15 (CP)—Remaining in force until further notice, minimum prices prevailed on grain exchange today and this, coupled with an export business estimated at 1,000,000 bushels, restored confidence to the grain trade and sent prices upward to close 1⅜ to 1⅞ cents above the previous finish.

Top levels were not held for long but the market retained gains of about a cent all morning, October closing at 71½, December at 73⅛ and May at 78¼ cents. Opening quotations were 4⅜ to 1½ cents higher as export buying entered the pit but under liquidation at the high points values reacted a little.

HAS DESIRED EFFECT

New regulations, set today at an emergency meeting of exchange members, imposed yesterday's close as the minimum to which wheat and coarse grain futures may descend and had the desired effect of drying up offerings.

Liverpool displayed firmness largely on improved export and fixing of prices here. Closing quotations were ¼d to ⅞d higher. Chicago continued to be a dead market and there was an absence of selling pressure from the south which has featured trading here for several days. Volume of business was not large and aside from flurries of activity at the opening and the close, the market was rather dull.

SASKATOON, Aug. 15 (CP)—Any price fixing that would be permanent and assure the farmer at least cost of production would be welcomed by the United Farmers of Canada, Frank Eliason, secretary, said in commenting on the action of Winnipeg grain exchange in fixing minimum prices. It would stabilize conditions, he considered.

NGLAND SCORES DECISIVE VICTORY

LONDON, Aug. 15 (CP Cable)—gland today scored a decisive tory over the British West Indies the third and last cricket test tch between the two teams, nning by an innings and 17 s in a game that saw the tors collapse beneath the trundg of the home forces. England red 312 to 100 and 195 for the tors.

Victory went to England in the t match, but the second was wn when the time limit expired.

The West Indies were unable to ster deliveries of the English lers although in their second ings yesterday they got off to a d start when G. A. Roach, first the batting order, got 56. George adley, star West Indian batsman, caught by L. E. G. Ames off C. Clark yesterday for only 12. Da Costa was second best with es of 35.

ngland's total, not a large one test cricket, came after a bad t when C. F. Walters was out two, but A. H. Blakewell, his t-wicket partner put on 107 and J. Barnett, who was run out, 52.

esuming with an overnight score their second innings of 190 for of eight wickets, the visitors e able to add only five before y were all out.

ume Hotel Cinches Second Half Honors

he Hume Hotel softball nine won r fifth straight game in the nd half of the men's softball on Tuesday evening, by handthe Trafalgar Giants a 16-1 aming. By their win the Hume el team *cinched the second half* ors. Both teams went scoreless the first inning, and the Trafalteam went into a 1-0 lead in second inning. The Hume nine the score in the third and ed another in the fourth. The e stood 2-1 at the start of the n. From then on the game was a kaway for the winners who scored runs in the sixth, six in the enth and four more in the th, and held their opponents eless. Joe Fierro on the mound the Hume pitched a good game, had the Trafalgar team sending weak flies throughout the game. dy Romano with four runs was leading scorer. Realya scored e runs and Bell, Benwell, Bird Fierro two each. McEachren *ed the only run for the losers.*

HOME RUN STANDING

By The Associated Press

Home runs yesterday: Fox, Tigers; Cramer, Athletics; Vosmik, Indians, one each.

Leaders: Foxx, Athletics 35; Ruth, Yankees 26; Berger, Braves 20; Gehrig, Yankees 20; Klein, Phillies 19.

League totals: American 460; National 328; total 788.

BASEBALL'S BIG SIX

By the Associated Press

Bill Terry moved into fourth place in the big six and second in the National league batting race by taking a day off yesterday while Spud Davis let his average fall off a point to .343 by getting only one hit in four times at bat against St. Louis.

Chuck Klein had the same trouble while Jimmie Foxx lost two points with one hit in five tries. Al Simmons and Heinie Manush tightened up the American league race, each hitting twice in four attempts for one point gains.

The standing:

	G	AB	R	H	Pct.
Klein, Phillies	107	428	70	160	.374
Foxx, Athletics	106	411	94	148	.360

O.C. CRICKET

LONDON, Aug. 15 (AP)—Kent defeated Sussex and Gloucester won from Leicestershire in the only clean-cut victories in first class county cricket ending today.

Scores were:

Kent 230 and 216; Sussex 169 and 128 (Freeman eight for 57) at Hastings.

Gloucestershire 278 and 340 for eight declared; Leicestershire 437 and 135 (Goddard six for 41) at Cheltenham.

Worcestershire 466 for nine declared; Somerset 387 for eight (J. Lee 193 not out); at Weston-Super-Mare.

Nottinghamshire 561 for four declared (Harris 234); Middlesex 353 and eight for none at Nottingham.

Lancashire 297 and 27 for two; Hampshire 271 (Mead 113 not out) at Manchester.

Northamptonshire 238 and 257; Surrey 232 and 191 for five at Northampton.

Derbyshire 245 and 330 for eight declared (Townsend 100); Yorkshire 218 and 187 for two at Chesterfield.

Glamorgan 416; Warwickshire 276 and 248 for two (Kilner 104); at Birmingham.

Big Four Will Have Early Knockout Series

VANCOUVER, B. C., Aug. 15 (CP)—Marking an innovation in British Columbia Canadian football, representatives at the annual meeting of the Big Four have adopted a lengthened schedule for the coming season and decided to choose the coast representatives in the Dominion playdowns by means of a knockout series a month after the season opens.

Previously the team leading the league at the termination of the season entered the interprovincial playdowns.

Under the new rule four teams will engage in a knockout series, and the winning team, to be decided by *October 21*, will travel east in quest of Dominion honors.

While British Columbia's representatives are en route east early in November the regular Big Four schedule will carry on until December 2.

BRITISH GIRLS WIN EASILY IN OPENING ROUND

Dorothy Round Loses the First Set but Rallies; No Upsets.

FOREST HILLS, N. Y., Aug. 15 (AP)—There was the customary absence of fireworks today as international stars got down to business in the 46th renewal of the Women's United States championships at the West Side tennis club.

Most of the British women won their matches, but the erratic playing of Dorothy Round in her first set against the comparatively inexperienced Eugenie Sampson, unseeded player from Winnetka, Ills., came in the nature of a surprise. The British star, considered a serious threat to reach the final, rallied after losing the opening set to win 4-6, 6-1, 6-2.

Betty Nuthall, second seeded British star and winner of the American title three years ago, played brilliantly in defeating Jane Sharf of Pasadena, a student of Mercer Beasley, by scores of 6-3, 6-3. Mary Heeley of England won a long, drawn-out base-line duel from Norma Taubele of New York, 6-1, 6-2, while her teammate, left-handed Margaret Scriven, won from Clare Smith, of Pine Orchard, Conn.

JOAN WINS EASILY

Another British star, Joan Ridley, easily won her match from Helen Jones, Beach Bluff, Mass., 6-1, 6-2. Mrs. L. R. C. Michell of England also defeated Barbara Stoddard, New York, 6-1, 6-3.

Moving about easily and unhurriedly, apparently still a little cautious of the spinal injury which kept her out of the recent Wightman cup matches, Mrs. Helen Wills Moody disposed of her initial rival, Dr. Esther Bartosh of Los Angeles, 6-1, 6-2.

In addition to turning loose a powerful game to crush Eunice Dean of San Antonio, Texas, 6-0, 6-0, Helen Jacobs, defending champion, gained what may prove lasting fame by playing in "shorts", the *first woman ever to eschew* the convential skirt and blouse on the stadium court.

BROWN DEFEATS ALF SAVARY

CALGARY, Aug. 15 (CP).—One of the coast's leading tennis stars, Harold Brown, of Vancouver, this afternoon stumbled into the hard drives of Alf Savary, tennis-playing scribe of Calgary, and was forced to the limit before he downed the stylist Savary 8-6, 6-2 in the western Canada tennis tournament singles.

Brown found Savary in the way of most of his shots in the first set as the Calgarian threatened to upset the forecasts and eliminate the Vancouver favorite from the singles. Savary, however, went off his game in the final set and fell before the Vancouverite's overhead smashes.

TRAIL SOCCER TEAM CHOSEN

TRAIL, B.C., Aug. 15. — Trail's team for the East and West Kootenay title classic to be played at Kimberley September 10 has been chosen and is to go into training at once for the battle.

Choice of players was restricted by the rules governing play for the Blaylock bowl, under which only those who have played in the West Kootenay league are eligible for the Trail team. But the lineup as announced today is one that will hold its own in fast company. It is:

Goal—Routledge.

Backs—Lilley and Cruickshank.

Halves—Alex Paterson, Barr and Fish.

Forwards—Hayes, Ferguson, Smith, Laurie and Jim Paterson.

Spare defence—"Spud" Thompson.

Spare forward—Bell.

TRAIL BOWLING TEAM IS NAMED

TRAIL, B.C., Aug. 15. — Trail-Tadanac Lawn Bowling club will send four teams to Nelson Saturday for theh third interclub match of the annual series for possession of the Kootenay Breweries cup. The rinks have been chosen and announced. Selected players unable to make the trip should advise Secretary Pat Partridge in order that substitution may be made in plenty of time.

Following are the teams for Saturday:

Bob McGhie, "Dod" Watson, *James Thompson*, Bill Rae.

James Deans, Robert Weir, H. Johnson, Alex Laurie.

G. C. McKay, Dave Chalmers, Reg. Varcoe and J. Craig.

G. B. Watson, Bill Aitken, Emilio Pisapio and William Campbell.

Women's Softball Players to Practice

The local women's softball team will start practices on Thursday evening in preparation for the coming series with the Trail club, as well as with other outside teams. The following players as well as any others who wish to make the team are asked to be at the junior high school grounds at 6:15 Thursday evening: Maybelle Stephenson, Jean Bell, Clara Talberg, Elvera Matheson, Dorothy Titsworth, Isabel Oughtred, Martha Allan, Eileen Fletcher, Evelyn Crahan, Gertie Woods, Peggy Gibbons, Edna McKenzie, Kay McDougall, Naida Perrier, Jeannette LePage, Rosa Stewart, Agnes Stewart, Lena LePage.

BURKE WINS RAPID FIRE

Hamilton Infantry Team Takes Disappearing Target Shoot

By HARRY ECCLES
(Canadian Press Staff Writer)

CONNAUGHT RANGES, Ont., Aug. 15 (CP).—Two of the stiffest competitions of the week were put on at Connaught rifle ranges today as the Dominion of Canada Rifle association's annual meeting proceeded.

Just as he did in the Ontario meeting at Long Branch last week Lieut. Desmond Burke of the governor-general's foot guards, Ottawa, former winner of the King's prize, topped all others in the rapid firing competition, the Borden Memorial here, calling for 10 shots within 50 seconds at the 300-yard range. Burke scored 47 out of a possible 50.

HAMILTON WINS

The Gzowski match in which teams advanced and receded from all ranges to fire at rapidly disappearing targets, was captured by the Royal Hamilton Light Infantry team which aggregated 332 out of a possible 400 points. Honors in the big individual shots of the day, the Bankers and the Walker cup matches, were well shared. Sgt. F. V. Shepard of Stevenson Place, Ont., former Bisley shot, displayed one of the meetings nicest exhibitions of marksmanship when he posted a perfect score at both ranges to win the Walker cup match, getting a silver medal and $20.

In the Bankers, completed today at 600 yards, H. G. Bass of Windsor captured first money award of $20, but he will have to shoot off with two other marksmen who equalled his 99 out of a possible 100 for the Patterson cup and the D.R.A.'s silver medal. These are Lieut. Col. C. W. Gibson of Hamilton and Lieut J. Neal Dow of Saint John.

Sergeant T. R. Davies, Vancouver, placed third in the Borden Memorial, with 45 out of a possible 50. Sixth place went to Lieut. G. A. Molecy, Winnipeg, with 41. Lieut. E. Johnson, Calgary, was eighth in the Walker cup event while Cadet B. H. Tupper, Wayne, Alta., was second in the Green match.

JOHNNY GOODMAN'S PUTTING STANCE

BY AL DEMAREE

Johnny Goodman, national open champion really won the title with his great putting.

As Bobby Jones said afterwards, he was the only man who putted well during the three-day tournament.

Goodman stands with his feet quite close together, with the ball opposite his left heel. As can be seen by the above drawing, his left forearm lines up straight with the shaft of his putter. Johnny keeps his hands quite close to his body with the right elbow touching his right thigh. He uses the orthodox overlapping grip for all strokes up to the green, but in putting keeps the forefinger of his left hand on the little finger of his right hand.

I asked Johnny after his final round why he carried two putters in his bag.

"I use the heavy one for my approach putt and the light one for the next three," he answered.

The boy had a sense of humor as well as a good golf swing.

TWENTY YEARS AGO TODAY

Aug. 16, 1913—Joe Tinker threatened to quit as manager of the Cincinnati Reds. Tinker claimed he was being "gagged" by President Garry Herrmann.

Youthful Manager

Meet Joe Cronin, manager and shortstop, Washington Americans. The youngest major league manager, Cronin keeps on starring in the field and at the bat despite the predictions that the addition of managerial worries would cause his playing to suffer.

Ball Entertainers Play Here Tonight

Tonight the Colored Giants, a team of diamond entertainers from Detroit, Mich., will play a game at the Recreation grounds. As late last night the Trail ball team had not returned from its tour there is a possibility that an all-Nelson team will be fielded against the Giants. In this event Con Cummins, business manager, will attempt to bring the Giants back to the city on Friday to play an all-star team of Trail and Nelson players. The colored ball players are reputed to be real entertainers and of a higher calibre than the last colored team which played here.

LITTLE WINS MEDAL ROUND

DENVER, Colo., Aug. 15 (AP)—Lawson Little, San Francisco, continued his sensational golf to take the medalist honors by a good margin, in the Colorado state amateur golf tournament held at Cherry Hill club here. He carded a 70-71—141 for 36 holes, four strokes ahead of his nearest rival, 18-year-old Rufus King of Denver, who had a 72-73—145 for his two days qualifying play.

Push Matches in Newport Tourney

Play Proceeds With Only One Mild Tennis Upset

NEWPORT, R.I., Aug. 15 (AP)—Running a day behind schedule, the unwieldy field in the Newport casino tennis tournament was forced to do double duty today to reduce its membership from 32 to 20 and bring the high class competition to a boiling point.

The opening play, held up for 24 hours by yesterday's rain, ran out without upsets and the only result that caused anything more than mild surprise was the straight set elimination of Jack Tidball, intercollegiate champion, by H. G. N. Lee, the young Britisher who topped the short foreign seedings list.

Ted Avery, another seeded English player, managed to keep a bracket ahead of Lee all day as frantic tournament officials prodded players into completing a total of 62 matches and fill 12 of the brackets in the round of 16. During this court orgy, seven of England's nine entries went down to defeat.

Two victories placed Ellsworth Vines, the national champion striving for his third consecutive casino victory, in the third round. Seven other players, including the seeded Sidney Wood, Gregory Magin, Johnny Van Ryn and Lee, the unranked George Lott, America's Davis cup doubles ace, Bryan Grant and R. Norris Williams, kept company with the California titlist.

West Indies Hope to Win Next Time

LONDON, Aug. 15 (CP Cable)—Hope some time not too far in the future the West Indian test cricket team would be in the position of "wishing our opponents better luck next time," was expressed tonight by Captain G. C. Grant of the West Indies team following defeat by England in the third and last test match.

The captain thanked the people of England for the welcome they had given the West Indians adding "We congratulate the English eleven on its success.

66 NOMINEES SEEK 26 SEATS IN NOVA SCOTIA ELECTION

HALIFAX, Aug. 15 (CP).—Battle lines for the provincial election on August 22 were being drawn officially today and at noon it appeared there would be 66 candidates in the field for 30 seats in the Nova Scotia legislative assembly.

Nomination day proceedings were going forward smoothly, with the promise of more excitement at joint debates in some constituencies before nightfall.

Both the Conservative government forces and the Liberal opposition planned to have 30 candidates—one for each seat. Three-cornered fights loomed in six ridings, the big parties having one Labor, two Cooperative Commonwealth Federation and two United Front candidates to add to their worries.

Premier Gordon S. Harrington was standing in Cape Breton South. Angus L. Macdonald, 43-year-old oppositon leader, who never has been a member of the house, was nominated in the constituency of Halifax South.

NOMINATIONS

Annapolis: *Hon. O. P. Goucher, Cons.; J. D. McKenzie, Lib.

Antigonish: John A. Walker, Cons.; *Dr. J. L. McIsaac, Lib.

Cape Breton Centre: Neil R. McArthur, Cons.; Michael Dwyer, Lib.; Tom Ling, Labor.

Cape Breton West: Dr. W. W. Patton, Cons.; *A. A. Martell, Lib.

Cape Breton East: *D. R. Cameron, Cons.; L. D. Currie, Lib.; D. Fraser, C.C.F.; J. B. MacLachlan, United Front.

Cape Breton South: *Hon. G. S. Harrington, Cons.; M. A. Patterson, Lib.; D. McKay, C.C.F.

Cape Breton North: *Hon. J. MacDonald, Cons.; Luke Daye, Lib.; J. MacDonald, United Front.

Colchester: G. Y. Thomas, *W. A. Fleming, Cons.; Edgar McLeod, Dr. T. R. Johnson, Lib.

Cumberland: *Hon. F. C. Black, Archie Terris, Cons.; J. S. Smiley, E. B. Paul, Lib.

Digby: J. L. P. Robichaud, Cons.; *J. W. Comeau, Lib.

Guysboro: L. W. Fraser, Cons.; *C. W. Anderson, Lib.

Halifax Centre: Russel McInnes, Cons.; G. Murray Logan, Lib.; Joe Wallace, United Front.

Halifax East: *Hon. J. F. Fraser, Cons.; Geoffrey Stevens, Lib.

Halifax West:* Dr. A. McD. Morton, Cons.; George Hagen, Lib.

Halifax North: Gerald P. Flavin, Cons.; Gordon Isnor, Lib.

Halifax South: *Hon. G. H. Murphy, Cons.; Angus L. Macdonald, Lib.

Hants: *Hon. A. Parsons, Cons.; **A. S. MacMillan, Lib.

Inverness: Hubert Aucoin, Cons.; *Dr. M. E. McGarry, Lib.

Kings: *G. C. Nowlan, Cons.; John A. MacDonald, Lib.

Lunenburg: Dr. W. N. Rehfuss, M. M. Gardner, Cons.; *Gordon Romkey, Dr. F. R. Davis, Lib.

Pictou: *Hon. John Doull, J. W. MacLeod, Cons.; J. H. MacQuarrie, Don F. Fraser, Lib.

Queens: S. M. Bartling, Cons.; R. M. Irving, Lib.

Shelburne: J. W. Maddin, Cons.; *H. R. L. Bill, Lib.

Yarmouth: Alvin Chipman, Cons.; *L. C. Gardner, Lib.

Richmond: Dr. B. A. Leblanc, Cons.; Dr. G. R. Deveau, Lib.

Victoria: F. A. Baldwin, Cons.; *D. B. McLeod, Lib.

*—Sitting member.

**—Sat in last legislature for Digby.

RADIO SINGER IN CRANBROOK

Vacation Season Brings Many Visitors

CRANBROOK, B. C., Aug. 15 — Miss Haynes, whose home is in Edmonton, and who sings at the Edmonton radio broadcasting studio, is visiting Cranbrook, the guest of her sister, Mrs. Fouracres.

Mr. and Mrs. W. W. Bride were in Cranbrook over the week end. They left Monday for Boswell where they are visiting Mr. and Mrs. E. S. Home.

Mrs. C. S. Sarvis of Winnipeg arrived in Cranbrook Friday to visit Mr. and Mrs. J. T. Sarvis for a few days. She will later visit in Vancouver.

A. Graham is spending a short holiday with Mrs. Graham and children at Vancouver.

Gilbert Blumenaur left Monday for Sirdar where he will visit his brother.

Mr. and Mrs. A. W. Dickenson are holidaying at coast points. They travelled by motor.

Mrs. H. A. McKowan, Miss Dorothy, Miss Aubrey and Miss Ruth McKowan left Monday for McBain's lake.

Eric Woodland of Revelstoke arrived in Cranbrook Monday to visit his grandmother, Mrs. Woodland.

Miss Nora Miles, who has been visiting friends on Kootenay lake for three weeks, returned Monday.

Mrs. J. Kemball and small son, Billy, have returned to Cranbrook from Green Bay.

Mrs. E. A. Hill had as her visitor last week, her sister, Mrs. Schwanz of Calgary. Both have been visiting Spokane.

Fred Large left Sunday for Perry Creek.

Mrs. George McDonald, who has been visiting in Regina, has returned home.

Miss Mildred Shook returned to her home in Regina Monday after visiting her grandmother, Mrs. McKay, and her aunt, Mrs. Clapp.

TOOK PASSENGERS WITHOUT LICENCE

A prosecution under part V of the highways act, the first of its kind here, resulted in the conviction in provincial police court Tuesday of R. Howard Collier of South Slocan for conveying passengers for fares when *not a holder of a public* passenger carriers' licence.

Mr. Collier, who has a freight truck licence, pleaded not guilty, but was convicted on evidence of Pete Popoff, Ed. Chernoff, and Mrs. Helen Pereveresoff, three Doukhobors among a group of passengers he had in his truck, bound for the prairie, when stopped on the Granite road by Provincial Constable J. G. M. Lock, who also testified.

Stipendiary Magistrate John Cartmel fined him $10.

Four-fifths or 87 per cent of cow's milk is water. The remainder is made up of milk, sugar, fat and protein.

VANCOUVER ASKS SIMILAR FACILITIES FOR ADVANCES ON CITY SECURITIES FROM DOMINION AS BANKS NOW ENJOY

By FORBES RHUDE
Canadian Press Staff Writer

VANCOUVER, Aug. 15 (CP)—The city of Vancouver through its corporation counsel, G. E McCrossan, today presented a resolution to the royal commission on banking to the effect that "application be made to the Dominion government for legislation to provide that municipalities shall have similar facilities for advances on municipal securities from the Dominion government for temporary financing as are now given to banks under the finance act."

The preamble of the resolution states that "the *Dominion government* under section five of the finance act is making advances of funds to Canadian chartered banks against municipal securities at an interest rate of 3 per cent, and a portion of these funds are in turn borrowed from the chartered banks by cities and municipalities at interest rates of from 5½ to 7 per cent." Further, that "the chartered banks are making a profit of from 2 to 4 per cent on approved provincial and municipal securities."

SOUND CONDITION

Mr. McCrossan stated that the suggestion put forward by Vancouver, which also represented the opinion of other communities, might appear somewhat radical in the light of past practice, but he felt it was a matter the commission should consider. The privilege suggested would be limited, of course, to municipalities *in sound condition.*

Mr. McCrossan thought the suggestion made by Prof. W. A. Carrothers earlier in the day concerning establishment of a central banking organization would in large measure cover the Vancouver request.

GREEN COUCH DIES, NELSON

Well Known Negro in the District 30 Years; Ardent Fisherman

TRAIL, B. C., Aug. 15 —Green Couch, well-known Negro of Trail, Rossland and Nelson for over 30 years, died at 1:30 a.m. today at Nelson hospital.

Couch was widely known among the old timers of the district. For years he had a shoe shine stand at Martin's barber shop here, back to the time when Mayor Martin had the shop. He also had a shoe shining stand in Walter Shackleton's barber shop at Nelson years back.

An ardent fisherman, Green Couch was well known to Isaac Waltons. Year after year he fished the river banks of Trail and vicinity.

He was also an enthusiastic tenpin bowler. When younger and at Nelson he scored consistently in the 200's but latterly had not the strength for the game, though he continued to play up to a year or so ago.

Couch was six feet, four inches tall.

Old timers describe Couch as having been a "cheerful character" and a good citizen. He was about 71 years old.

He was single and leaves only a nephew and niece in Pennsylvania.

Ottawa Senators to Play This Winter

OTTAWA, Aug. 15 (CP).—Senators of the National Hockey league will operate again this winter in Ottawa. An option on the league franchise and Senator players, held by E. Harvey Pulford of Ottawa, acting for a group of Baltimore sportsmen, expired at midnight tonight. It called for $220,000 in Canadian funds.

Franklin Ahearn, president of the Senator Hockey club, said plans would be made immediately to appoint a manager and strengthen the club for the coming winter. Cy Denneny, one of the old stars of the game, was manager last winter when the club finished last in the Canadian section of the league but whether he would return was problematical.

Some weeks ago the Senators sold Hec Kilrea, left-winger, to Toronto Maple Leafs, but remaining on the roster are such stars of the game as Cooney Weiland, Frankie Finnigan, Sid Howe, Billie Beveridge and Allan Shields. It has been reported two Niagara Falls amateurs would receive try-outs here this winter and possibly one or two Ottawa amateurs.

HANSON PINS SAM CORDOVANO

ALBANY, N.Y., Aug. 15 (AP)—Charley Hanson, 200, Seattle, pinned Sam Cordovano, 202, Buffalo, with a bar arm lock and body press in 42 minutes, 32 seconds of a wrestling match featuring a card in the International league ball park here tonight.

ARRANGE FUNERAL BETTY CHILCOTT

TRAIL, B.C., Aug. 15—Dr. Boyson of Spokane, brother-in-law to Mrs. Betty Chilcott, who died last Wednesday when she was shot by Sidney Hunt as the result of a suicide pact, is in Trail making arrangements for the burial of Mrs. Chilcott.

QUOITS SINGLES BEGIN IN TRAIL

TRAIL, B.C., Aug. 15—Opening games of the Trail Horseshoe and Quoits club quoits singles competition were played here Tuesday night, DePasquale defeating Thompson 21-15 and W. Aitken defeating Harris 21-18.

MORE ABOUT CARROTHERS

(Continued From Page One)

acquire such prestige as the heads of the proposed body. The body must be free of both political and private banking control, though in the last instance it must be amenable to the elected representatives of the people. He suggested it should be controlled by representatives of the people. He suggested it should be controlled by representatives of the main economic groups, together with experts on banking, government finance, and trade. Appointments would necessarily be made by the government.

EXPRESS APPROVAL

J. D. McCormick, president of the British Columbia Lumber Manufacturers association, Alex. Mercer, vice-president of the Fraser Valley Milk Producers association, and A. L. Hager, of the canned salmon section of the Canadian Manufacturers association, all expressed approval of the manner in which banking accommodation had been extended to them.

Mr. McCormick thought the people of Canada should be very thankful for their banking system, especially as compared to that to the south. He laid the cause of the depression in the lumber industry to the devotion to production of war products during the war period. There followed a period of eight to nine years in which building was done which ordinarily should have covered 14 years.

This resulted in a boom which could not last.

In regard to the United Kingdom market there was a handicap in transportation cost of 50 per cent of the price of the lumber laid on the docks in British Columbia. Operation had been carried on for three years without regard to profit.

ONE IN 1500

Austin Taylor, mining promoter, said he and associates had examined 1500 mines in British Columbia and found one. If branch managers were instructed to help prospectors and mine owners to the extent these felt their holdings to be worth, there would not be enough money in the Bank of England to satisfy the demand.

"If we find a mine we spend our own money to develop it and then pass it on to the public."

POUND IS OFF AT MONTREAL

MONTREAL, Aug. 15 (CP)—Again following the lead of New York, pound sterling declined in Montreal foreign exchanges today. Other currencies were generally lower.

Pound sterling later climbed to $4.68⅝ where it closed with a loss of 3 9-16 cents. United States dollar closed at a premium of 6⅛ per cent, a gain of 1-16 of one per cent. The French franc eased .03 of a cent at 5.56 cents.

Visiting Golfers at Seattle Forge Ahead

By FRANK G. GORRIE

TACOMA COUNTRY AND GOLF CLUB, Tacoma, Wash., Aug. 15 (AP)—Spokane and Everett ladies were anything but "ladylike" today as they helped eliminate seven of the 11 Seattle contestants in the first round of the Washington state women's golf tournament and were lined up against the remaining four Seattle golfing queens in the quarter finals tomorrow.

Led by Mrs. Willard Mader of Spokane, who equalled par for the short distance she had to go, defeating Mrs. J. A. Rhodes, Everett, 9 and 7, all three of the Spokane qualifiers moved along with the winners in the 18 hole matches.

Highest Prices for Fish Are Effective

KETCHIKAN, Alaska, Aug. 15 (AP)—The highest prices of the season for king salmon and cohoes have been put into effect here by the Ketchikan fish buyers.

The new prices, for purchase on the fishing grounds, are 10 cents a pound for large reds, five cents for small reds, 3 for whites and 3½ for cohoes; delivered to buyers prices are 12, 7, 4 and 4½ cents, respectively.

The previous price on the grounds was 8, 4, 2 and 2½ cents. Only a small amount of troll caught salmon has been received during the past few days.

TWO STEAMERS IN CHURCHILL PORT

OTTAWA, Aug. 15 (CP)—The radio branch of the marine department today reported both the Pennyworth and the Hudson's Bay company steamer, Nascopie, in port at Churchill.

The S.S. Thomas Walton was early today 195 miles from Churchill, with the S.S. Brandon and the S.S. Rio Claro 245 and 300 miles respectively from that port.

The S.S. Sirentz was 130 miles east of Resolution island.

Lord Bessborough Visits Military Camp at Petawawa

This picture, taken when the governor-general visited Petawawa camp, shows his excellency observing artillery fire through powerful glasses while Major-General McNaughton, chief of the general staff, looks on. On the right of the picture can be seen Lord Duncannon, son of Lord Bessborough.

MORE ABOUT KIDNAPPERS

(Continued From Page One)

time today, more than 300 police and federal authorities concealed themselves about the rendezvous near suburban La Grange.

The officer with the ransom package arrived in a taxicab accompanied by another detective dressed as a driver. Approached by the extortionists, he handed over the money and at the same time signalled his companions waiting in ambush.

The gangmen, about seven in number, occupying two automobiles answered a command to halt with pistol fire and careened away under a volley of a police sub-machine gun.

About 20 shots were exchanged and in the general excitement the band disappeared into a nearby woods, abandoning one small sedan. One of the men was believed to have been wounded.

CLOSE IN DRAGNET

The big dragnet closed in on the woods, directed by wireless messages from three army airplanes overhead attempting to trace the flight of the other car and the path of the fugitives.

Traffic, clogged by incoming world's fair visitors, was snarled for miles as police blocked off the area of the search. An entire square mile of underbrush was combed. The result was the arrest of two men who claimed they were out for a hike. They were taken to headquarters for questioning.

Meanwhile detectives came upon the abandoned sedan and traced its licence to the proprietor of a west side saloon. Police went there, arrested five men and took them to the detective bureau for questioning.

Build Highway Near Kingsgate

Camp Being Built to Accommodate 125 Men

KINGSGATE ROAD CAMP, Aug. 15—Peter Dustin of Camp Lister has taken up his duties here as storekeeper succeeding Ralph Ringstead.

Paddy Shannon, caterpillar engineer arrived from Cranbrook to operate the portable rock-crusher to supply crushed rock for the Kingsgate highway which is being reconstructed.

Several of the men at the relief camp here left for the harvest fields during the past week. 60 men are still registered here.

Tom Brown of Moyie is one of the late arrivals to join forces here.

Ralph Church of the kitchen-staff is spending his vacation in Kimberley.

A forest fire of unknown origin broke out on the little Moyie, between Glenlily and Kingsgate on Sunday. Several men were taken from the Relief camp under Larry Pieper, foreman.

Those spending the weekend at Cranbrook were Malcolm Horie, Mack Kirkland, Jimmie Allen, Mr. Blinstrom and Charlie Hall.

Much progress is being made on the construction of the Kingsgate relief camp. Some 32 buildings have been erected so far, some of which are cabins to accommodate from 6 to 10 men while kitchen and dining rooms for 125 men have been built in three separte wings. A bathroom and wash house with hot and cold running water are provided. Several more cabins are to be built giving room for upwards of 125 men. When completed the cabins will form a four square outline while the kitchen and dining rooms are within the centre of the cabin formation.

BOWLING RINKS PLAY TO A TIE

J. Armstrong's rink of J. Ball, M. Baskin and S. Bate clinched 16-all with the J. Draper rink of E. Penwill, J. Lemon and W. Graham in an Argyle cup lawn bowling game Tuesday evening. Draper's bowlers scored four points on the last end to tie up the match.

Visiting Cricketers Suffer First Defeat

TORONTO, Aug. 15 (CP).—Visiting Cambridge Vandals suffered their first defeat of their tour when a Toronto cricket council team defeated them by two wickets in a one-day match today. Vandals scored 136, while the council eleven knocked up 139 for eight wickets.

BOAT HOUSE NOT TO BE DISTURBED

At a special meeting of the Kootenay Launch club Monday night the governors of the club again gave their unanimous approval that Marcus Martin leave his boat livery shed on its present site. L. F. Gilbert, who has launched several protests that the building was blocking the view from his water front summer home, asked the club to have the building moved elsewhere. Mr. Martin will not be disturbed for another year at least.

Former Architect of Calgary Buried

SANTA MONICA, Calif., Aug. 15 (AP)—Funeral services will be conducted here Thursday for John Bernard Richards, 80, noted designer and builder, who died while en route by automobile to Los Angeles last Saturday, from a heart attack.

For nine years Mr. Richards was city architect of Calgary, Alta., and many of the leading business buildings, homes and bridges of that province were designed by him. He was a native of Chigwell, England, and moved to Calgary shortly after his marriage to Mary A. Kench in 1906. He came to southern California 10 years ago and was in charge of the construction of the Riviera Country club and several of the chain of club buildings for the Los Angeles Athletic club.

Besides his widow, Mr. Richards leaves five daughters.

SCHOFIELD CUP SOCCER FRIDAY

TRAIL, B.C., Aug. 15—The third game of the Schofield cup football series will be played here Friday night when the Thistles meet the Hornets, the only two teams in the series. So far the Thistles are ahead, having drawn the first game and won the second.

COLORED TEAM TO PLAY TRAIL

TRAIL, B. C., Aug. 15—Trail baseball fans are due to see a sprightly bit of action Thursday when the Detroit Colored Giants appear on the Butler park diamond, with Trail seniors as their opponents. It will be the locals' first appearance after their Okanagan tour.

MIDGET WOLGAST BEATS SANSTOL

NEW YORK, Aug. 15 (AP)—Midget Wolgast of Philadelphia, recognized here as flyweight champion, won the judge's decision from Pete Sanstol of Norway, in a 10-round nontitle bout tonight.

Whale oil from the salmon canning industry has been found to contain more vitamin D than does cod liver oil.

MORE ABOUT GRAIN PRICES

(Continued From Page One)

tween Thursday night last and Monday night.

Sydney T. Smith, president of the exchange, said the emergency thus created called for emergency action and the fixing of a minimum price seemed the most satisfactory way to deal with it. The exchange head, however, expressed his firm belief in the open market.

"The grain trade is making an extreme effort on behalf of the western producer," said Mr. Smith. Development of good export buying on the slump was taken as an indication that Canadian futures prices were not out of line with those of other countries.

Stake Claims on Porcupine Creek

Prospecting interest still seems to be concentrated on the Porcupine creek where a great many claims have been staked. H. Stevens has been agent for a big portion of the staking.

The following claims have been recorded recently:

Porcupine creek and forks: E. V. Lakes was agent for the following owners—E. V. Lakes, Iliad, Harr: O. Anderson, Idaho, Galoy, Lander, Kara; H. Stevens, Gada, Iden, Howe, Lang, Kane; S. R. Smith, Hood; Ed. Emilson, Hero, Labat; Hazel M. Smith, Horn; Edna McKergow, Hebe; H. Lakes, Hart, Lark; Ed. Emilson, Galt, Kant; Barbara Lakes, Laurel; A. Lakes, Lapis, Kent.

Wildhorse creek: Archie Guffin, Arthur Campbell, agent, Fairview.

Fawn creek: D. H. Lougheed, Thomas Brown, agent, Bluebird.

Sheep creek: Arthur J. Campbell, Thomas Brown agent, Emperor Frac.

Wolf creek: C. E. Witter, Margaret.

Hidden and Hall creeks: R. G. McLeod, W. J. Sturgeon, agent, Rough.

East Fork Sheep creek: J. C. Hansen, Sunrise.

Bayonne creek: J. C. Hansen, Lakeview; S. A. Batalden, Black Trail and Sunset.

BANK BOYS TO PLAY SOFTBALL

Deeming that supremacy cannot be found in the lists of hockey alone, the bank boys have again sent out the cry of challenge and will take up the softball bat at the junior high grounds this afternoon.

The Montreal and Commerce "Dons" will match their diamond skill with the Imperial and Royal boys and as the bets stand its a toss-up.

LOOK FORWARD TO BIG ENTRY

Enquiries About Labor Day Program; Miners to Take Part

Possibilities of a big day for the Nelson Amateur Athletic association in the presentation of its sports program in September, loom larger every day as inquiries about the day's festivities arrive in greater numbers.

A. M. Banks, president of the Nelson association, forwarded entries for track and field events to the various towns and cities of the Kootenay and Boundary Saturday and expects to have them back any day. August 25 is the last day for entry.

Crow towns including Fernie and Cranbrook will be represented. Five men will come over from the Forks and it is hoped that several girls will also be able to make the trip. Trail and Rossland as usual will be well represented.

The Nelson track and field aspirants have been going through their paces three nights a week and expect to take their share of the laurels.

Bicycle races and the tug-of-war will be interesting events. Mining men of the district are expecting to turn out en masse and competition between the various camps as well as the cities will be keen.

MORE ABOUT HAVANA

(Continued From Page One)

that the guard, unable to cope with the situation, summoned soldiers. Several of the prisoners were shot and a number of others beaten before order was restored.

HAS SUPPORT

Evidence became increasingly manifest today that the De Cespedes administration would have the support of other governments and it was considered a matter of certainty formal recognition would be speedily forthcoming.

One of the outstanding problems which the new regime faces is that of its bonded indebtedness, estimated at approximately $160,000,000, and there was considerable talk of seeking a moratorium or a refunding operation whereby payments may be decreased and extended over longer periods of time.

President De Cespedes authorized Maritinez Saenz, his secretary of the treasury, to deal directly with the United States through Ambassador Sumner Welles in all financial and economic questions mutually affecting the two countries.

While municipal governments throughout the island were being shaken up in an effort to force out all officials who served while Machado was in power, President De Cespedes named Major Alfredo Doffil to be Havana's new chief of police.

Major Doffil commanded one of the artillery units which participated in the army revolt to overthrow President Machado. A group of demonstrators at the city hall today seized a large portrait of Machado, chalked upon it "You will die like a dog" and paraded it through the city tied to the back of an automobile.

CALGARY DEAN VISITS TRAIL

TRAIL, B.C., Aug. 15.—Dean H. S. Ragg of Calgary was in Trail today en route from the Okanagan to his home. Dean Ragg was rector of St. Andrew's Anglican church in Trail 13 years ago. It was but a short time ago he was appointed dean of Calgary.

Gen. MacRae to Inspect Alaskan Gold Fields

FAIRBANKS, Alaska, Aug. 15 (CP)—To inspect Alaskan gold fields Gen. A. D. MacRae, member of the Canadian senate, arrived here today from Vancouver by airplane. The senator was accompanied by his mining engineer, Ira B. Joralemon. On their northern flight the party made an examination of several gold developments in the Skeena, B.C., districts.

Hand to Hand Battle on Milk Strike Front

Clubs of state troopers and axe handles of the embattled farmers were plied with telling effects in this fracas between the police and striking dairymen near Oriskany, N.Y., where the milk strike developed into something like open warfare. At the left is Sergt. Harold Kemp of the state police, after he had been rendered hors de combat, and at right, one of the farmers injured in the affray.

Sued for Breach of Contract

MARY PICKFORD

NEW YORK, Aug. 15 (AP).—A summons in a $250,000 breach of contract suit against Mary Pickford, motion picture actress, was filed today in the New York county clerk's office.

The action was brought by Edward Hemmer, but the papers filed contained no details of the case.

Counsel for Hemmer said his client was once Miss Pickford's manager and charged she broke the contract.

MERCURY HITS 95 AT NELSON

Making up for the cool, rainy weather of the earlier spring and summer, the past week has been uncommonly hot and dry. Tuesday was the seventh consecutive day of 90-degree weather, the mercury spurting to 95 to better Monday's high by three degrees. The low point for the day was 52 degrees.

CRYSTAL GAZER ARRESTED, TRAIL

TRAIL, B.C., Aug. 15—Bruce Hendon, better known to Trail radio fans as "Mahdi" was arrested by Constable P. E. Burroughs Monday night and lodged in the city jail.

It is understood Hendon is held on a charge of conducting a lottery at Assiniboine, Sask.

Hendon recently conducted a crystal gazing question and answer system over the Trail radio station, and also gave a few performances at a local theater.

Rotarian Speaks at Trail Meeting

TRAIL, B.C., Aug. 15—W. O. Webster, Vancouver, one of the three surviving charter members of the Rotary club of that city, addressed the Trail Rotarians Tuesday on "Reminiscences of Rotary with side lights on the inception of Vancouver Rotary club."

He told of the vicissitudes of the early days of Rotary and dwelt with the influential part Canada has taken in the development of this great service club, whose ramifications now embraced the world.

L. F. Tyson and J. H. Young were appointed as a committee to arrange for a delegation of Trail Rotarians to attend the district meet which will be held in Creston next month.

BRAKE BOWLERS WIN CLOSE GAME

In a recent lawn bowling game Y. Brake's bowlers nosed out J. Armstrong rink 11-10. C. F. Fish, J. Moon and W. Calbick bowled the winning rink and J. Ball, Baskin and S. Bate on the losing rink.
