WEATHER FORECAST
Kootenay: Mostly cloudy with a few scattered showers. Little change in temperature. Winds light reaching southerly 20 in main valleys. Low and high at Cranbrook, 25 and 45; Crescent Valley, 30 and 45.

RUSS BLAST SHOCKS WORLD

Housing Starts Show Increase

Mortgage Lending Drop Expected To Slow Down Construction

OTTAWA (CP)—The pace of new house-building picked up in September, with 20 per cent more homes started than a year earlier. But a drop in mortgage lending signalled a possible slowdown in new construction during the winter.

Housing starts in the month totalled 8930 in centres of 5000 population and over compared with 7443 in September, 1960, Central Mortgage and Housing Corporation reported Tuesday.

This brought total starts in the first nine months of the year to 67,279, up 27.8 per cent from 52,642 for the corresponding period last year.

However, the CMHC report showed that the number of new National Housing Act mortgages approved fell to 4,435 in earlier. Virtually all the decline was in mortgages financed directly by CMHC.

DEMAND FALLING OFF

Informants said the demand for housing loans seemed to be falling off.

Earlier in the year, the number of NHA mortgage loans issued was well ahad of 1960 lvls. During the January-September period, the number of NHA mortgages issued by approved lenders—life insurance and trust companies and banks—increased to 29,434 from 13,208 a year earlier, and the number issued by CMHC rose to 20,151 from 8,549.

But in September, the approved lending companies issued 2,733 new NHA mortgages—26 fewer than a year earlier—and CMHC issued 1702 mortgages, down some 30 per cent from 2,414 in September, 1960.

The 4,435 NHA loans in September compared with 5,832 in August and the year's peak of 8,103 in June.

CMHC officials suggested that would-b borrowers are finding less difficulty getting NHA loans from private lenders, and thus fewer are having to turn to CMHC, which acts as a "residual" lender.

SEEK MORE PRIVATE LOANS

Applications for NHA loans from private lenders during September totalled 2752—up 17 per cent from 2365 a year earlier. But applications to CMHC declined to 2,041 from 2,377.

One official said there is no shortage of CMHC funds available for direct lending.

With September housing starts 20 per cent above year-earlier levels, housing completions rose less rapidly. They totalled 9,879, up seven per cent from 9,237 in September, 1960. Completions in the January - September period were 58,462, down from 66,207 in the corresponding period last year.

Red Countries Embarrassed Says Green

MONTREAL (CP)—World opinion must be mobilized to force Russia to halt nuclear tests, External Affairs Minister Howard Green said Tuesday.

He told a press conference that if Russia no longer cares about world opinion "the situation is very serious indeed."

"It may be that they no longer care," he added.

Mr. Green said Russia's resumption of nuclear testing has placed the Communist-bloc countries "in a very embarrassed position" at the United Nations.

"All the countries are against the resumption except the Communists. I don't know whether all would vote for a ban but there is no question all are against the testing."

Asked what Canada's position would be if the United States decided to resume nuclear tests in the atmosphere, Mr. Green replied that Canada's position is and has been that she is opposed to any tests anywhere by anyone.

Mr. Green was in Montreal to address a meeting Tuesday night of the Montreal branch of the United Nations Association.

Two in District Drawn in Sweep

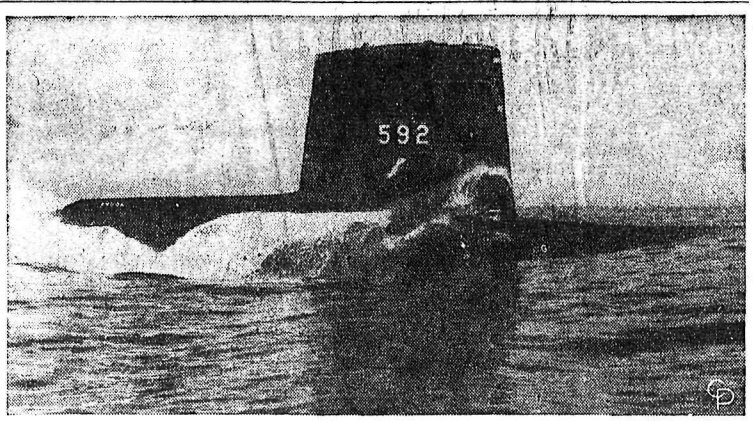
DUBLIN (CP)—Two Canadians hold Irish sweepstakes tickets on the favorite in Saturday's running of the Cambridgeshire Handicap at Newmarket, England.

Tickets on Sticky Case, 10-to-1-shot favorite among the 31 horses entered in the race, are held by Roberta W. Murray of Montreal and a Toronto resident who used the nom de plume "Moon Beam."

Six Canadians hold tickets on Rachel, at 11-to-1 the runner-up favorite, and four have tickets on Thames Trader, tied for third among the bettors' choices with Plaza at 12-to-1.

First prize in the sweepstake is £50,000, or about $145,000 in Canadian funds. Holders of tickets on the second-place finisher will win £20,000 ($58,000), while those with tickets on the third-place horse will collect £10,000 ($29,000).

Western Canadian ticket holders included: Beton-VCM 0561, Friday the 13th, Cranbrook, and Dats One-VBJ-14504, Mr. Lucky, Midway.



THE SNOOK, second in a series of five nuclear submarines being built for the U. S. Navy by Ingalls Shipbuilding in Pascagoula, Miss., goes through its paces off the Mississippi coast. The Snook is one of the world's fastest submarines.

B.C. Campaign Against Unemployment Mooted

VANCOUVER (CP)—A province-wide campaign in support of measures to alleviate unemployment was approved Tuesday by the British Columbia Federation of Labor (CLC) at its annual convention here.

The more than 400 delegates also urged the 100,000-member federation to co-operate with the B.C. Fderation of Unemployed in staging mass lobbying in Victoria at the opening of the next session of the provincial legislature and during presentation of the group's annual brief to the cabinet.

Donald MacDonald, secretary-treasurer of the 1,100,000-member Canadian Labor Congress started day-long discussions on unemployment, describing the jobless total as disgraceful and "the result of gross stupidity of the system under which we live."

He said that while prospects of employment this winter appear brighter than a year ago the average percentage of workers out of work continues to rise each fear.

The annual average has climbed to 6.6 per cent of the non - agricultural work force from 2.4 per cent in 1949.

A federation committee on unemployment outlined a 12-point program — which was later adopted by the convention—in a concerted drive to cut the unemployment toll in B.C.

SEEKS INDUSTRY REVIVAL

The program included demands for more public investment in social capital such as hospitals and schools; revival of industry in depressed areas to top mass migration of workers for workrs put out of work through technological changes; a shorter work week and immigration policies regulated to actual job opportunities.

"The labor force," the committee said, "continues to grow more rapidly than job opportunities. This has been aggravated by structural changes in industry, rapid introduction of labor-saving devices and a general trend toward automation.

"Unemployment hampers legitimate trade union activities and threatens the job security of every employed worker. Labor in its own defence must continue to champion the interests of the unemployed as vigorously as possible."

FBI Brought in On Search

KELLER FERRY, Wash. (AP) —The FBI has entered the search for missing Canadian lawyer Ian M. Sutherland, 53, whose car was found last week in the Columbia River near here.

Agents here said they have received pictures of the Vancouver lawyer from Canadian authorities and are showing them to residents near here and in Wilbur, south of here, in an effort to trace Sutherland.

A Wilbur truck driver reported picking up a hitchhiker who identified himself as a Canadian from Trail the day Sutherland's car is believed to have plunged into the river.

SEEK BANDIT

VANCOUVER (CP) — Police were searching Tuesday for a gunman who escaped with an estimated $2000 from a downtown branch of the Bank of Nova Scotia.

The man escaped on foot with the money after brandishing a gun and ordering a male teller to hand over the cash.

The man fled after an alarm sounded in the bank.

European Countries Fear Milk Contamination

LONDON (CP)—A world-wide explosion of indignation has greeted Russia's detonation of a multi-megaton nuclear bomb. Especially feared was the radioactive fall-out expected to come from the blast.

The shock over the explosion, generally estimated as having the force of at least 30 megatons, was heightened by fear of an even bigger blast to come. Premier Khrushchev has said Russia will test a 50-megaton bomb Oct. 30 or 31.

Countries in Europe closest to Monday's test at Novaya Semlya in the Arctic showed anxiety about the dangers of contamination of infants' milk from radioactive iodine.

The World Congress of Socialists at Rome protested that the explosion was a "monstrous crime against humanity" endangering the lives of those living and unborn. Hugh Gaitskell, British Labor party leader, told the congress "we feel deep disgust and cold anger."

STUDENTS PARADE

Tens of thousands of Italian high school and university students in a dozen cities left classes and paraded in protets.

A speech from the throne, read to Parliament in London on behalf of the Queen, said Britain deeply regrets Russian nuclear tests.

Defence Minister Harold Watkinson told the House of Commons the government is taking all possible precautions to safeguard the milk of Britain's babies from contamination.

Earl Bertrand Russell, 89-year-old pacifist, led a protest demonstration to the Soviet Embassy in London. Only a little over a month ago he was jailed for refusing to keep the peace at a proposed ban - the - bomb rally demanding Britain's nuclear disarmament.

Representatives of Britain's three parties in Parliament assailed the Soviet nuclear tests.

The British Medical Research Council reported the explosion of a 50-megaton device could lead to a contamination of milk by radioactive iodine "approaching the maximum allowable level."

SWISS WORRIED

The Swiss government expressed worry over a rapid increase in radioactivity although it said a sampling of air showed there was no immediate health hazard.

Canadian Prime Minister John Diefenbaker described Soviet tests as "callous international blackmail."

He said their continuation showed a disregard of the rights of mankind and "is apparently intended as a form of blackmail to frighten the free world and bring fear into the hearts of the uncommitted nations."

Sweden's Social Democratic premier, Tage Erlander, cabled Khrushchev and asked the Soviet premier to stop the super-bomb tests.

Except for Communist newspapers, the European press was unanimous in condemning the big explosion. Even London's Daily Worker, the Communist newspaper, published news of ing editorial.

Research officials in Australia, 8,800 miles from the explosion site, said shock waves were still being registered there Tuesday.

A Sizeable Tip

BUFFALO (AP) — Edward D. Parence, a porter at Buffalo international airport, helped a customer unload four pieces of luggage from an automobile Tuesday, then got a "tip" to end all tips.

"The car is your," said Jack E. Teehan of Auckland, New Zealand.

"You're kidding," said Parence.

Teehan handed over the keys, signed the title transfer, waved goodbye and took off with his wife for the long flight home.

During the negotiations it turned out that Teehan, who said he was a broker and real estate man, had been touring the U.S. for several weeks. He bought the car, a 1955 model, in Florida for $750 but had no further use for it now that his trip was over.

Fallout May Reach Here Near End of Week

WASHINGTON (AP) — Initial fallout from Russia's super-bomb test is moving in a cloud 100 to 150 miles wide and at a speed of about 80 miles an hour over parts of the Soviet Union, the United States weather bureau estimated Tuesday.

If present atmospheric wind patterns prevail, the first fallout should reach North America Thursday or Friday.

The radioactive debris in this cloud is rated as constituting perhaps as little as a fraction of one per cent of all the debris loosed by Monday's big nuclear explosion in the Arctic region. The larger component, lofted into the stratosphere, won't begin to come down until next spring.

However, the fraction subject to coming down quickly — with some of it possibly falling on Soviet territory even Tuesday — still may constitute an appreciable amount because of the initial size of the bomb, U.S. experts said.

Princess To Visit B.C.

LONDON (Reuters) — Princess Alexandra of Kent, cousin of the Queen, will leave Oct. 29 for a one-month eastern tour, Kensington Palace announced Tuesday.

The princess and her party will fly to Canada, refuelling at Montreal. She is scheduled to break her flight with a two-day stop at Vancouver and Victoria.

The princess' host will be the British Columbia lieutenant-governor, Maj.-Gen. G. R. Pearkes.

The princess is due to arrive in Hong Kong Nov. 3.

She will later visit Japan, Thailand, Burma and Aden before returning to London about Dec. 11.

POMPEI, Italy (Reuters) — Workmen excavating the ancient city here, which was destroyed by an eruption of Mount Vesuvius centuries ago, have found the skelton of a slave with chains still around the wrists, archeologists said Tuesday.

PM Hints New Job For Leslie Frost

By BRUCE LEVETT

TORONTO (CP) — Speculation that Premier Leslie Frost may return to public life — possibly in connection with the Senate — was touched off among 3000 persons attending the Ontario Progressive Conservative leadership convention Tuesday during a speech by Prime Minister Diefenbaker.

Mr. Frost bowed out as provincial party leader Monday night. A successor will be picked today from among seven candidates.

Mr. Diefenbaker said:

"I don't think I will be breaking any confidences when I say that in the days to come we shall be able to have use of his services . . . and give him the opportunity to make use of his services for the good of the province and the country."

Later, touching on election promises made and kept, he said:

"We said something would be done about reformation of the Senate. We haven't forgotten that."

Questioned after his speech as to whether his remarks could be taken to mean a Senate post for Premier Frost, the prime minister said:

"I haven't anything more to say. . . . I don't know how you happened to get on to that one."

Festival Goes in Red

VANCOUVER (CP) — Vancouver International Festival had an estimated operating loss of $212,000 for its 1961 productions, a preliminary financial report issued Tuesday showed.

The loss was reduced by grants and donations of $160,000, leaving a net deficit of $52,000.

Festival authorities said an audit takes place Nov. 1 and actual figures won't be available until then.

The loss was blamed directly on two major dramatic productions, "Men, Women and Animals," and "Do You Know the Milky Way", which did not attract large numbers of patrons in spite of drawing some critical acclaim.

Family Victims Of Thalium Poison

WINNIPEG (CP) — Government scientists have embarked on a mystifying search for the source of a poison which caused paralysis and loss of hair in a family of five at nearby Lake Winnipeg Resort community.

Mr. and Mrs. Ronald Monkman and their three children are believed to be Manitoba's first victims of thalium poisoning. Thalium is used in the manufacture of insecticides and rat poison.

The family has been forced to leave their home at Victoria Beach 74 miles north of here because of the poison attacks. They are living with relatives in Winnipeg.

DOLLAR DOWN

NEW YORK (CP) — Canadian dollar 1-64 lower at 97 5-64 in terms of U.S. funds. Week ago 97 5-64.

Pound sterling 1-64 higher at $2.81 45-64.

REBEL LEADER SAYS READY TO NEGOTIATE

TUNIS, Tunisia (Reuters)—Algerian rebel leader Ben Youssef Ben Khedda Tuesday said the insurgents are willing to resume peace negotiations with France "on a sound basis" to end the bloody seven-year Algerian war.

Ben Khedda, premier in the Algerian provisional government, told a press conference the negotiations should work out a date for Algerian independence. Discussions to define new relations between France and Algeria and guarantees for the French in Algeria would follow, he said.

Ben Khedda said the Algerians would also negotiate on a basis of self-determination if France regarded this as the best road to peace.

Diefenbaker Visits Japan To Better Trade Relations

By GRAHAM TROTTER

OTTAWA (CP)—Prime Minister Diefenbaker, hoping to cement Japanese-Canadian trade relations with personal talks, left Tuesday night for Tokyo.

He and Mrs. Diefenbaker took off aboard an RCAF Comet for Vancouver after a round of goodbyes and bon voyage wishes from members of the cabinet, the Japanese Embassy staff and and the prime minister's own office and household staff.

He told reporters:

"I think the relations between our two countries have to be nurtured in order to be maintained. We have had visits from two prime ministers of Japan and there have been repeated requests for me to return the visits.

"I think these visits bring about not only closer relationships — better understandings— but also expand and develop trade relations, which are essential to good political relations."

FIRST TIME

It will be Mr. Diefenbaker's first visit to Japan and the second by a Canadian prime minister. Prime Minister St. Laurent stopped there on his 1954 world tour.

Highlights of the prime minister's stay in Japan will be an audience and luncheon with Emperor Hirohito, a visit to the Japanese Diet while it is in session, formal talks with Prime Minister Ikeda, visits to a spinning mill and an electric appliance factory in the industrial centre of Osaka, and a tour of temples and shrines in Kyoto, the former capital of Japan.

Mr. Diefenbaker will be on the move almost throughout his stay in Japan.

He will be accompanied by Mrs. Diefenbaker. She will be at the side of the prime minister except on a few occasions, including a visit to a girls' school in Tokyo and when receiving a lesson in flower arrangement while the two prime ministers hold talks.

$1,500 A MONTH—Singer Rosemary Clooney, 33, and (far left) actor husband Jose Ferrer, 45, are shown in Santa Monica, Calif., court where she was awarded $1,500 a month support pending a divorce settlement. Beside Ferrer is his attorney, Guy Ward, while Miss Clooney confers with hers. Lewis Boies Jr. The Ferrers have five children.

Fallout Shelter Plans Circulated

VICTORIA (CP) — Plans for outdoor fallout shelters were sent out Tuesday to B.C. civil defence and municipal offices.

The plans will be available to the public by the weekend, said a provincial civil defence spokesman.

They were drawn up in Ottawa, but B.C. is the first province to circulate them, he said.

A large book contains a number of variations on a basic concrete or concrete block structure which can be built either partly underground or fully above the earth.

They include shelters designed to withstand blast pressure of from 10 to 30 pounds a square inch. All have special blast proof doors.

The civil defence official said there is no firm estimate of the cost of an outdoor shelter. But it would probably be double the cost of a basement type.

Basement shelters cost between $400 and $500.

LEAD, ZINC PRICES STUDIED

GENEVA (AP) — The world's main lead and zinc trading nations concluded Tuesday that a further drop of world market prices may be stabilized until the end of next month.

Production of the two metals has far outstripped the consumption in recent years, and the main producers and importers of lead and zinc have frequently sought to regulate production and imports to prevent a further deterioration of the world market.

Meeting under the chairmanship of Canada's Denis Harvey, the 24-nation group found that supply and demand of the two metals would be approximately on balance until the end of the first quarter of 1962. They decided to meet again here before that time to review the situation.

EIGHT INJURED

KAMLOOPS (CP)—Eight persons were injured Tuesday night when a fully-loaded tandem logging truck collided here with a bus.

Most of the injured were passengers on the bus, and two were believed seriously hurt.

The truck hit the bus with such force it toppled onto its side after being spun around.

Need Seen for Low Interest Loan for Cities

VICTORIA (CP) —Mayor Percy Scurrah said Tuesday Canada's civic government leaders will make a determined effort to persuade the federal government to establish a low-interest loan fund for municipal borrowing.

Mayor Scurrah, who will lead the delegation early next month as president of the Canadian Federation of Mayors and Municipalities, said low-interest loans are "a vital need for our urban communities."

"Low-interest loans would have a tremendous impact on our growing urban centres which must borrow huge sums to finance the ever-continuing expansion of roads, waterworks, sewer systems and treatment plants," he said.

"The drift to the cities is continuing — eventually 80 per cent of Canada's population will be urban — and low-interest loans are absolutely essenital to help us meet the almost explosive growth we are experiencing."

Retail Sales Down

VICTORIA (CP) — Retail and factory sales are still down from last year, but construction, employment, fisheries and some segments of the forest industry are showing gains in B.C. according to figures released Tuesday by the Trade Department.

Unemployment in September was the lowest percentage of the B.C. labor force since mid-1959 says the department's monthly bulletin.

There were 31,000 unemployed in B.C. or 5.3 per cent of the labor force.

BOSTON TEA PARTY PAYMENT—In London, Mrs. Bert Pree, heading a party of 17 from Jackson County, Oregon, pays $1.96 to Leslie Simons, a Davison and Newman (tea) director, as Jackson County's share of the Boston Tea Party "debt." That's supposed to be four ten-thousandths of the $4,966 bill, a pro rata share based on current U. S. population. Davison and Newman has been trying to collect for 188 years. Simons is giving Mrs. Pree a package of tea for Mayor J. W. Snider of Medford, Ore. *(Radiophoto)*

And in This Corner . . .

LOS ANGELES (AP)—A group of Arabs doesn't worry Eddie Cantor.

An Arab organization in Syria announced it was boycotting Cantor's films because of what it called his "Zionist affiliations and material support of Israel."

Said the comedian: "If they wish to boycott my pictures I just won't buy their camels."

Cantor has another reason for not worrying: He hasn't made a picture in 15 years.

LOS ANGELES (AP)—The little grey-haired lady looked as though she belonged anywhere but where she was — in front of a judge for sentencing on a narcotics conviction.

But Mrs. Betty Caroline (Grandma) Taylor, 71, stood erect and stoical as Judge Leon Yankwich sentenced her to seven years in prison Monday. She was fined $20,000. Then she looked the judge in the eye and said:

"I was never a drug peddler. If it's God's will, I will do whatever you give me."

Mrs. Taylor, widow of a onetime Los Angeles chief of detectives, had been called "This sweet, smooth-talking little lady" and "one of the major dealers in narcotics," by a narcotics agent.

A jury convicted Mrs. Taylor of selling and concealing the sale of heroin, but acquitted her of a related conspiracy charge.

Community Chest At $7000-Mark

With 80 per cent of the residential canvass and only 20 per cent of the business section completed, Community Chest campaign funds have reached the $7,000-mark.

Executive secretary J. H. Coventry, who surveyed the progress of the campaign upon his return from Vancouver Tuesday, estimated that about 33 per cent of the objective of $25,000 was on hand in cash and pledges.

Last year, a total of $15,000 was raised.

All of the residential canvass could not be completed last week and some returns are still to come. More canvassers are needed for the business drive, Mr. Coventry said. J. H. MacMillan is in charge of this canvass.

600 Students Enjoy First of Musicales

A concert by two of Canada's outstanding young musicians was presented Tuesday at L. V. Rogers High School.

Nelson centre of Jeunesses Musicales of Canada presented the first of four concerts to be held this year.

Jacques Simard, oboist, and Donald Thompson, harpsichordist, performed before some 600 enthusiastic students.

Mr. Thompson, in a brief talk on the instruments, told the students the oboe was one of the oldest known instruments.

"Much was written for the oboe in the 18th century, but it was rather neglected in the 19th century," he said. "Only in the last 25 years have contemporary composers shown renewed interest in the instrument."

"A harpsichord is not the ancestor of the piano, as some people believe," he said. "It was in use in the theatre, church and court long before the piano was heard of. The instrument is related to the lute, guitar and harp family."

Instead of being struck like a piano, the strings are plucked by means of a quill embedded in the back end of the key lever.

For their first selection, Mr. Simard and Mr. Thompson, played a duet, Sonata No. 1 in C minor by G. H. Handel. Mr. Thompson played a harpsichord solo, Prelude in A Minor by J. Ph. Rameau; Danses, excerpts from "Le Recueil d'Attaignant" and Pavan, "Earl of Salisbury" by O. Gibbons.

For an encore, the musicians played Siciliana by Bach.

Pythian Sisters Lead Rites for Mrs. Hazelwood

Funeral services were held Monday for Mrs. Ella Mae Hazelwood, who died October 20, aged 50 years.

She was born in Southwick, Idaho, March 14, 1911.

Services were conducted at Thompson Funeral Home, Rev. H. R. Whitmore officiating.

Organist Mrs. W. A. Manson played for the hymns, "The Lord's My Shepherd" and "Abide With Me." Pythian Sisters conducted the funeral under the auspices of Temple No. 10. Many members and officers of Pythian Sisters attended with large number of friends from the North Shore, Procter, Harrop and Nelson.

P. C. Carrall, N. McLeod, T. E. Homersham, A. C. Heighton, C. Walton and R. D. Boyer were pallbearers. The Pythian Sisters formed an honor guard on leaving the chapel.

Burial was in the Knights of Pythias plot, Nelson Memorial Park.

Mill Workers Questioned

TRAIL (CP) — RCMP are questioning former employees of a sawmill that was destroyed by fire during the weekend as they continue investigations into suspected arson.

Staff Sergeant Noel Beaumont said Tuesday some of the former employees are members of the radical Sons of Freedom sect of Doukhobors.

The fire, at a sawmill owned by four Orthodox Doukhobor brothers, caused $200,000 damage and RCMP said arsonists are to blame.

"They drove a truck and a loader into the building so the fire was probably started by someone familiar with the type of machinery at the mill," Sergeant Beaumont said.

Council Jottings

City council was personally invited to attend the premiere tour of the Kootenay Museum in its new quarters at the corner of Lake and Hall Streets Wednesday, Nov. 1.

W. A. Fetterley, president of the Kootenay Museum Association, invited the council and their families to make the tour.

The association has been busy preparing for an opening since June 15, when they were moved from their quarters in city hall to their present site. An official opening of the museum is planned for late spring next year.

Counsel costs of the city in the action to have the amalgamation bylaw quashed amounted to $12.45. The action was unsuccessful.

City solicitors Garland, Gansner and Arlidge said their total account amounted to $260.45, including $132.30 for the services of a Vancouver counsel. The costs of the city were taxed at $248, to be paid by the paintiffs, William Hampshire, Gordon Ferguson, John Gentles and R. C. Howard.

* * *

Letter of thanks was received from the Nelson Kinsmen Club, for the city donation to the proposed health centre, and Mrs. W. A. Gordon and sons, for a floral tribute for their father's funeral. Mr. Gordon was formerly city clerk and died recently in North Vancouver.

* * *

Circulars were received from the Workmen's Compensation Board about a seminar to be held here Thursday and Provincial Traffic Safety Workshop to be held in Vancouver, November 15-18. On the latter city works superintedent Dragutin Likar was empowered to select representatives to attend.

* * *

City building inspector D. A. Turner was delegated to attend the National Building Code Workshop in Kelowna, November 20-21.

* * *

A request that the city enter a float in Vernon's Winter Carnival was referred to the Chamber of Commerce for consideration.

* * *

This year's census of the city failed to include the three fringe areas, Rosemont, Upper Fairview and South Nelson, correspondence from the Dominion Bureau of Statistics revealed.

At its last regular meeting council refused to accept the census figures for the city proper that showed a drop of 353 persons since 1956.

It felt Monday that the bureau had failed to answer the question why there was a drop in the old city boundaries and instructed city clerk C. W. R. Harper to proceed with his invesigation to discover how many people were left off the census lists.

* * *

Permission was granted to Mr. and Mrs. Frank Yasek to have their residence at 318 Third Street rezoned as a business building. Mrs. Yasek intends to operate a beauty parlor in her home.

* * *

School financing report from the Union of B.C. Municipalities and a municipal administration brief from Dawson Creek were received and filed.

* * *

City insurance agent Robertson-Hilliard-Cattell advised council that if they wished to have further coverage on turbine No. 4 water head, they may do so by postponing payments till 1962. The present insurance on the turbine expires on November 11. It was referred to the finance committee for study.

* * *

A request from Mrs. M. E. Drew of 317 View Street for drainage improvements on View Street was referred to the public works committe and Mr. Likar for study and action.

* * *

Mayor T. S. Shorthouse and Mr. Harper were authorized to sign the sub-siding agreement between the city and Inland Natural Gas and between the city and Texaco Canada Ltd.

* * *

Ald. B. C. Affleck was appointed acting mayor for the duration of this month as acting mayor F. A. Beresford will be in Vancouver for business reasons until the expiration of his term. Ald Beresford chaired Monday's meeting in the absence of Mayor Shorthouse, who is currently in Alberta attending the Union of Alberta Municipalities annual convention as president of UBCM.

* * *

City employee F. N. Jenkins was authorized to supply photographs for the city needs when required.

* * *

A suggestion by acting mayor Beresford that, since the city assessment department has been enlarged to four persons, it should file monthly progress reports, was adopted.

* * *

Passed was Ald. J. W. McLellan's motion that: "No depreciation shall be included in equipment rental charges for work covered by money bylaw or any other class of work involving equipment rentals charges. This resolution pertains to all work under these classifications commencing January 1, 1961. Any charges for depreciation included in accounting in equipment, in accounting in equipment rentals since January 1, 1961 shall be eliminated."

NUT DRIVE CONTINUES

Peanut sales pace was maintained Tuesday night, Kiwanis Club members reported, with another 400 packages sold to bring the two-night total to 800.

The Kiwanians stage the sale annually to raise money for the club's charities. With gross proceeds to date of $800, the club members will conclude the campaign tonight.

Dismissed Commissioner To Get Council Hearing

R. N. Bradshaw, dismissed recently from the Civic Centre Commission, will be given a hearing by city council at its next regular meeting.

Dr. C. E. Bradshaw, no relation and chairman of the commission will also be invited to attend the hearing, city council decided Monday night.

Council in following a recommendation of the commission, recently asked that Mr. Bradshaw resign his position after eight months service on the board. During this time, Mr. Bradshaw has persistently pressed for revamping the lines of authority of both the Civic Centre and Recreation Commissions.

No decision was made on Mr. Bradshaw's second request for a copy of the confidential report handed to the council by the commission stating why it wished to have a university graduate of physical education removed from the board. Council implied that he will not be given a copy of the report. City clerk C. W. R. Harper said that Mr. Bradshaw had read the report already and at that time requested a copy.

Council was undecided momentarily on the attendance at the hearing, as Mr. Bradshaw alone requested a hearing. It was felt that both sides should be heard, and council will extend an invitation to Dr. Bradshaw to attend.

"I think he should know all about it. I do not think we should keep it from him," Ald. B. C. Affleck said in reference to the hearing and the report. "I do not like any suggestion of denying anybody and appeal."

"I cannot see if we are going to gain anything here, because we do not have all the facts," Ald. J. S. M. Harts said in defence of having either Dr. Bradshaw or the whole commission attend. "We should have the Civic Centre Commission here too."

"The whole problem lies in the Civic Centre Commission, not with us," Ald. Harts said, adding that council's action was only in support of a recommendation of the absolute majority of the board.

Acting mayor F. A. Beresford, council's representative to the commission, said that there were no personalities involved in the board's decision, that it was simply a matter of disagreement over policy.

UN Journey Described By Student

Left with "deeper insight and stronger convictions" was Robert Shorthouse, who told of his recent trip to the United Nations organization in New York Monday night.

He was awarded the trip after winning an intense competition sponsored by the West Kootenay district of Independent Order of Odd Fellows and Rebekah Lodge.

Mrs. Shorthouse spoke to some 75 members of the Nelson Junior High School Parent-Teacher Association.

Each year the IOOF organizes and sponsors American and Canadian high school student tours of the UN.

Mr. Shorthouse said the tour is arranged into two parts. The first was an educational bus tour encompassing six Canadian provinces and 22 American states. The other part was a tour of the UN building and organizations.

Together with eight students from B.C. and 28 from the North west states Mr. Shorthouse saw southern Canada and toured the Parliament Buildings in Ottawa and Quebec City.

The group spent a week in New York and at the United Nations. From there the students travelled through Pennsylvania and Maryland to Washington, D.C.

The return trip was through the northern states.

Mrs. C. Alexander, president of the PTA, reported a committee had been formed at the executive meeting to look into the sale of shotgun shells and other ammunition available to minors. There was nothing concrete to report from the committee at this point. Committee members will confer with the Chief of Police and Dr. A. S. Arneil.

Proceeds from the Carol Sing, to be held Dec. 10, will go to the PTA Bursary Fund, it was reported.

Renata Man Declared Dead

Mr. Justice H. L. McInnes of Vancouver officially proclaimed Neils Henry Hanson of Renata dead at a hearing in Nelson Monday.

The Renata father disappeared seven years ago and was presumed dead, due to drowning in Lower Arrow Lake.

Mr. Hanson was last seen leaving Castlegar in his 16-foot power lanuch to return home, July 24, 1954. Two hours later the empty launch was spotted churning along in the water. His body was never recovered.

Moose Meat Okay, Meet Told

Nelson Rod and Gun Club was told Tuesday night that meat from a moose taken in the East Kootenay and found to have tapeworm is not dangerous to human consumption.

The tapeworm appeared in the form of cysts around the rear flank and would not harm humans if the meat was properly cooked, game inspector C. E. Estlin told the meeting.

He said that the case spoken about was the only one of its kind reported to his department.

ANCIENT CHURCH

Original portions of the Church of St. Mary at Gateshead across the Tyne from Newcastle, England, date from the 12th century.

Minor Fined

John St. Thomas of Slocan City was fined $25 and costs in City Police Court Tuesday for being in possession of liquor as a minor.

The offence occurred Oct. 20. St. Thomas pleaded guilty.

Sportsmen Okay Licence Changes

Nelson Rod and Gun Club has shown its approval of a change of cost for general and ordinary firearms licences, as suggested by the provincial Fish and Game branch.

At Tuesday night's regular monthly meeting the club voted, after considerable discussion, in favor of writing the branch and giving its approval.

The vote went seven for and four against, with two abstainers. It was also decided to include in the letter to the department that a large percentage of the voters were in favor of keeping the old licence rates but making one change — that an ordinary licence be not refundable in lieu of buying a general firearms licence.

At present the licence rates are: $4 for an ordinary licence, which entitles the bearer to shoot game birds, deer and bear; $7 for a general licence, which entitles the bearer to shoot big game and game birds.

If a change in fees is enacted the resident game bird licence would cost $3 and the general licence, entitling the bearer to shoot bird game, bear, deer and big game, would be $6. There would be no refund.

The circular letter the club received from the branch stated that the present $4 and $7 licence fees present an increasing problem because of refunds.

It was explained that refunds occur when a hunter buys an ordinary licence and then decides to hunt big game and applies for the corresponding licence.

The club was told that in 1960 the department handled 2537 refunds.

The circular, from F. R. Butler, director of the Fish and Game branch of the department of Recreation and Conservation, stated that the branch felt the $3 and $6 licence fees, if inaugurated, would be to the benefit of those who buy an ordinary licence only to target shoot and also to those who hunt just game birds.

If the new method of licence fees was enacted it would mean an additional $66,000 revenue for the branch.

The subject is also expected to be discussed at the zone meeting in Creston Nov. 5.

Kimberley Canvass Starts

KIMBERLEY—Kimberley and District Community Chest and Projects Society are carrying out their annual drives this week with the single canvass amalgamating all appeals for funds for various purposes. The Community Chest distributes approximately $29,000 annually.

Largest single grant is $9000 for Kimberley Amateur Athletic Association, but its other local agencies are a variety of youth activities including Scouts and Guides, high school band, ambulance service, Pioneer Lodge Senior Citizens, Film Council, Army Cadets, Forest Wardens, and parks.

Its agencies in national health and welfare appeals for substantial grants include Red Cross, Heart Foundation, Arthritis and Rheumatism Society, National Institute for the Blind, Kootenay Society for Handicapped Children, Muscular Dystrophy, Tuberculosis Society, Canadian Mental Health and Cerebral Palsy.

The Projects Society, having accomplished construction and operation of the North Star T-Bar Ski Lift, and the Centennial Civic Centre, still requires funds to pay off the loans necessary for starting the facilities functioning.

Membership is largely on the basis of payroll deduction pledged amounts at regular intervals, which are matched by Cominco toward reaching the whole objective. Majority of Cominco employees contribute on this basis, and the annual canvass is principally aimed at enlisting Kimberley newcomers who are employed by the company on this basis, and also enlisting residents not employed by the company.

The canvass will continue all week.

Don't Shoot Whistlers, Hunters Warned

An "extraordinary" migration of Whistling Swans to the Slocan Valley and Nakusp areas has brought sharp warnings to hunters from the Fish and Game Department.

Game Warden R. A. (Ted) Rutherglen said Tuesday that his department feels there should be no mistake whatsoever in a hunter's indentification of the birds. If persons are caught shooting the swans an excuse of mistaking them for geese will not stand up, he said. The game department is watching the area closely.

Most years the swans go into the area in small numbers but at present there is believed to be about 50 in the valley and around Nakusp.

Hunters are advised to be sure of the birds' identity before shooting, as the Whistlers are protected under federal law. All the swans are not pure white. The young birds are still a greyish color.

Snow Hampers Search for Hunter

CASCADE—The intensive search for 62-year-old Edward Hartford, lost since Sunday near here, has been hampered by three to four inches of snow. The RCMP dog "Stoney" from the Nelson detachment has been unable to pick up any clues as to the whereabouts of the hunter.

Thirty searchers, on foot and in jeep, and aided by a plane and a few dogs owned by private citizens, were unable to find any trace of the Christina Lake hunter on Tuesday.

A crew of men were in the area Tuesday night to watch for any fire and smoke signs.

Gunshots were sounded by searchers Tuesday but no answer was received.

Searchers turned to "stripping" the area, a term used to describe searchers combing the bush only a few yards distance from one another, on Tuesday, and it is believed that is the plan of search for the main body of searchers today.

The stripping method is being employed in the event the lost hunter may have fallen down and is unable to answer calls of aid.

It was rumored that two Christina Lake lumber firms will close down operations today in order that workmen can join in the search.

Firemen to Seek Increase

A wage increase of 15 per cent will be sought by city firefighters when they open negotiations with city council for a new agreement.

Monday night they gave council two months notice of commencing collective bargaining.

Other conditions being sought by local 1343 of Nelson Firefighters association are: increase in practice pay up to $2.50 an hour; introduction of service pay in the amount of $5 per month increase after every five years of service; compassionate leave allowance of five days plus travelling time; increase of insurance to $10,000 under existing plan; union shop.

The matter was referred to the Fire and Water committee for study and recoommendation.

Mrs. Ogilvie, Well Known in District, Dies

Mrs. Jean Evelyn Ogilvie died suddenly at her home Sunday night. She was 46 years of age. She was the wife of Wilfrid Ogilvie of Harrop.

Mrs. Ogilvie, daughter of the late James Ross McDonald, was born in Fernie, May 5, 1915. She received most of her education in Kimberley. In 1922 her parents moved to Harrop and in 1924 they moved to Kimberley.

In 1932 her family moved again to Harrop where she was married in Harrop United Church in 1933.

Mrs. Ogilvie had a great interest in hobbies such as clay modellin, riding, and wood carving. She was interested in school affairs and served a term as secretary of Harrop School District before its consolidation with Nelson School District.

She was also a writer and for nearly a year was social editor and columnist for the Trail Daily Times.

Besides her husband, she is survived by three sons, Robin of Edmonton, and Ray and Ross of Harrop; and her mother, Mrs. Edith Piper of Harrop.

OVER 1000 AT CIVIC SHOW

Over 1000 persons attended the Wilf Carter and Hank Snow show Monday night.

The Western singing stars gave two performances in the Civic Centre and were backed by several supporting acts.

City Recreation Winds Up Year With $2500 Deficit

The city recreation commission will end the financial year with a deficit of $2,500.

R. A. Munro, finance chairman of the Civic Centre Commission, and Fred Boates, supervisor of recreation, told council Monday that the $15,500 allottted to the Recreation Commission budget by the city has expired in the first ten months. Civic Centre Commissioners also act on the Recreation Commission.

Mr. Munro said that commission was not asking council for funds, but was merely bringing the matter to council's attention. The deficit could be recovered through the use of funds from the Civic Centre Commission, as it was last year, he said.

But in the future, the city may have to make up the deficit as the Civic Centre operation might not be as fruitful financially as it had been this year.

Mr. Munro listed an expanded playgrounds program, opening of Lakeside Park beach for swimming, thereby detracting from pool profits, as reasons for the large deficit.

Ald. J. S. M. Harts wondered why the recreation program had not been operated within its budget and was relieved to hear that steps have been taken to rectify the matter in the future. Number one step was the consolidation of the positions of recreation director and civic centre manager under the title of supervisor of recreation.

DEEP DIVERS

The gannets, sea birds of the North Atlantic, in diving for fish from high in the air may plunge 80 or 90 feet below the surface.

Council Recommends Weekly Meetings

City council meetings almost became a weekly affair Monday.

Through the persistence of Ald. B. C. Affleck, council agreed to hold weekly meetings for the duration of the year to ease the heavy agendas presented at their bi-weekly meetings now.

Later, in committee, it rescinded the motion and recommended to the incoming council that it hold weekly instead of bi-weekly meetings.

"I suggest council consider weekly meetings so we may adjourn at a more reasonable hour," said Ald. Affleck. "I was taught to sleep at night, not in the daytime."

Ald. J. S. M. Harts was quick to support Ald. Affleck's suggestion, saying that in the last two weeks council has held four meetings.

When it was suggested that it be recommended to the incoming council, Ald. Affleck was quick to answer. "It will give an example to incoming council how this thing should be done."

"If it is all right to do it then, it is all right to do it now," he concluded.

Council agreed, then later changed its mind.

Shovelling Snow Healthy Activity, Declares Alderman

A winter works program suggestion got the cold shoulder from Alderman B. C. Affleck at city council Monday.

Mrs. Eva I. Armstrong of 707 Third street suggested that some of the unemployed be hired, under the program, to clean snow from the sidewalks of elderly residents of the city.

Ald. Affleck immediately protested against such a move for health reasons.

"Shovelling snow is good for your health," the healthy octogenarian argued.

"I shovel snow," the witty sage of council protested, then smiled, "Unless I can get my wife to do it.

City works superintendent Dragutin Likar also argued that the city could not give special consideration to one age group of the taxpayers, and not to the other.

Ald. Affleck had the last word as the letter was received and filed, "I suggest they get a pair of snowshoes and don't shovel at all."

Extensive Weekend Preparations See Demolition of Old Bridge Span

By NANCY MILES

CRANBROOK — Under the fascinated gaze of some six hundred civilian spectators, 17 Field Squadron, Kimberley, 8 Regiment RCE (M) demolished with explosives a 100-yd. long highway bridge in a narrow gorge through which the Goat River flows some 400-feet below between Erickson and Canyon. The explosion, which shook the valley's Sunday quiet, severed effectively the old Creston - Rykerts international road link, and was at request of the Department of Highways, who have recently completed a new steel and concrete bridge near the railway bridge and overpass a quarter mile up the canyon.

The old suspension box bridge of 12-inch timbers had been declared unsafe for further general traffic and was ordered closed with provision of the new bridge and mile of road, but as a further saftey measure, it was considered advisable to remove it.

Setting of the demolished bridge, which spanned the canyon with steep winding approaches north and south, provided an excellent view of the operation for the hundreds of spectators.

Major Robert Lye, 17 Squadron was officer commanding, and Major Jacobson of Lethbridge, second in command. Lieut-Col. J. W. Reynolds of Kimberley, commanding officer of the 8 Field Regiment, was in attendance.

The exercise began Saturday afternoon, when the squadron moved in under orders of 17 squadron demolition officer, Lt. Stan Hodgson, with Lt. K. V. S. Meyer in charge of the bridge's north end party and Lt. R. T. Treneman the south end party. The purpose of this operation was to lay the charges on and under the massive steel braced wooden structure, which was completed before darkness.

The charged bridge was under guard overnight by a party of three, changed every two hours, from Creston Armory and it was only during this period unanticipated difficulties occurred. An elderly hermit who lives a half-mile south of the bridge saw his approach to Creston being cut off and attempted physically to prevent continuation of guard's duties. A few other curious visitors also had to be prevented from crossing the charged bridge. Guards were armed with bayonets.

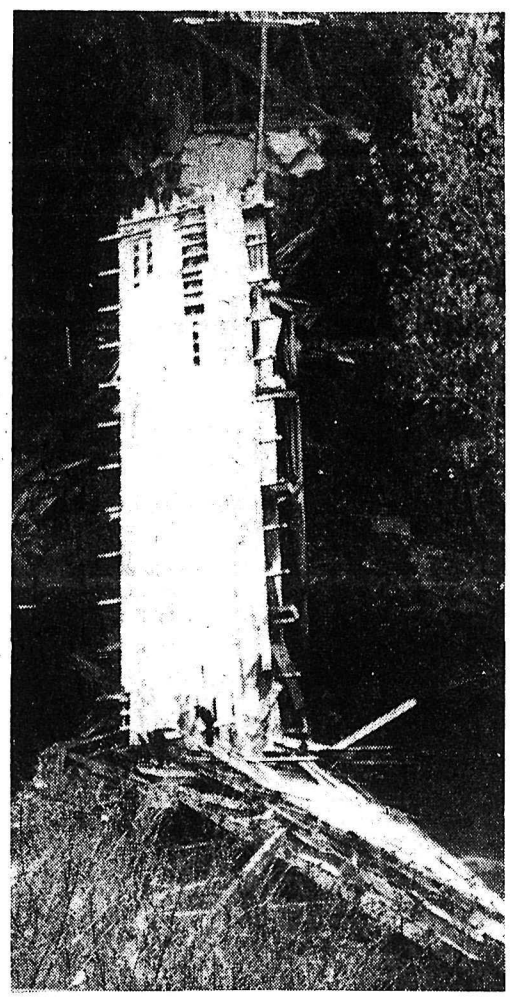
Arming of the charges began at daylight, and continued for approximately four hours during which spectators gathered and were policed to points of safety, but observing conditions were ideal. Wiring to detonate the charge was laid to a point high above on the north side of the river near the railway track, and Lt. Stan Hodgson was demolition officer.

Area was cleared to a safe distance from the bridge, but the explosion rocked the ground under the feet of those observing from above, who also could feel the heat that accompanied the flashing momentary explosion, followed by dense black smoke. As this cleared, puzzled bird noises sounded loudly protesting in the area in the canyon and the bridge was gone, except for a small section of hanging decking and tangled wooden beams charred in sections.

Precision of the 17 Squadron, which has repeatedly won for it the Western Canadian trophy for most efficient unit at annual summer militia camp, was evident throughout the operation. Attending in capacity of observers from the 8 Field Regiment were 25 Field Squadron, Edmonton, commanded by Major Keating, 113 Field Squadron, Calgary, commanded by Captain John Willshire, and 33 Field Squadron, Lethbridge, commanded by Captain O. Stubbs.

Auxiliary arrangements in the major exercise included air transport in troop carrier of personnel from Edmonton and Calgary, and vehicle transport of personnel from Lethbridge. Creston Armory srved as operation headquarters. Advance party to establish cooking and sleeping facilities moved in their Friday evening, with troops required to bring their own bedding, and eating utensils.

The exercise will include clean-up and clearing the river channel and reclaiming timber under the direction of Captain L. W. Charman, 17 Squadron, not immediately carried out. In view of the seriousness of the exercise simulated casualty part was eliminated and a Unit Aid station for any real casualties which might have occurred was as close to the bridge as possible, under command of Capt. R. T. Watkins 17 Squadron.



A landmark gone.

Socreds Leave For Annual Coast Meet

Rossland-Trail Socreds will be represented at the annual provincial convention of their party being held this Friday and Saturday in Vancouver.

A delegation, headed by Rossland-Trail MLA Don Brothers and local association president Burt Campbell of Castlegar, leaves today for Vancouver.

The convention is expected to be extra lively this year with the BCE take-over and power developments for the province sure bets for extended debate. A hotly-contested battle for B.C. League president is expected.

Noel Murphy is retiring because of ill health.

City Hall Renovation Possible Winter Work

ROSSLAND — Renovation of City Hall, inside and out, was among winter works projects suggested at city council meeting.

Ald. William Keane, chairman of the property committee, reported that an estimate of costs for this city hall job were being prepared.

Ald. J. C. Miller stated that some projects had already been submitted for assistance under the grant-aided winter works program.

These include completion of curbing on Monte Christo, and on St. Paul between Columbia Avenue and LeRoi Avenue; the continuation of the Queen Street wall to the full extent of the original plan; and the construction of steps at Esling Park.

Other projects were being considered for inclusion in the program, but final figures of costs were needed before applications could be made for grants, said Ald. Miller.

Ald. P. C. Berry, chairman of the parks committee, said that it was hoped to include several parks improvements in the winter works program.

These, he said, would involve a drainage project at Esling Park, tennis court rehabilitation; the painting of parks property; and general improvements at Jubilee and Cook Avenue Parks.

LAID OFF

In his report, Ald. Miller stated that the majority of casual labor had been laid off, only those finishing the road preparation program being retained.

He anticipated this program would be finished by the middle of the week. By that time, said Ald. Miller, it was expected that all roads planned for blacktopping early in the spring would have been made ready for the job.

Small jobs, including some urgently needed grading, had been neglected in order to concentrate on finishing the road-paving preparation program, explained Ald. Miller.

Ald. W. Wadeson, waterworks chairman, had no formal report to submit, but he stated that the waterworks program was progressing quite satisfactorily.

Drive Under Way To Aid Trail's Patterson Family

TRAIL — A drive to aid the James Patterson family is being undertaken in Trail. The Patterson home was swept by fire Monday, with all furniture, clothing and food lost in the fire.

Organizations participating in the drive are the Trail Times, Trail Relief Organization, Royal Canadian Legion, Welfare and the Jaycees.

Clothing is being left at the Trail Fire Department. Members of the family include Mr. and Mrs. Patterson, their two sons, three daughters and a one-year old baby.

The family's immediate needs have been taken care of, according to reports from Trail, and the family was to look at a house on Tamarac Avenue Tuesday afternoon.

Want Legal Survey Ninth Avenue

Ask Installation Water For Area Development

KINNAIRD—The Monday meeting of the Kinnaird Village Council heard a brief submitted by Jack Hipwell urging the opening of Ninth Avenue by legal survey and the installation of water and a road to encourage further development there.

In response, Council estimated the cost of the water alone to be roughly $10,000 for the area. Only 50 per cent of the owners in the area are in favour of subdividing, so that service of this kind, on a speculative basis, would mean considerable risk to the village in the event that the lots would remain undeveloped.

Council explained that unsubdivided property could not be assessed. They felt it was up to the owners in the area to assume risk of development because only they would stand to profit by the opening of Ninth Avenue.

It was brought to Mr. Hipwell's attention that in the instance of the Sixth Avenue development, pipe lines were laid as an immediate necessity to facilitate proper water connection to the Dumont Subdivision. The present zoning bylaw states that the subdivider is responsible for the development in a given area.

Reissuing of a lost title has been procured for T. Fourt. Chairman Carl Loeblich told the village meeting that it may be in the best interests of the village to process all lost titles at once to eliminate high costs of processing individual applications from time to time.

SIDEWALKS

Estimates on sidewalk installation are being received by the Kinnaird Village Council and work on the project, which is planned for the east side of Seventh Avenue, is to begin at the first of the year. Comm. G. Rust said at Monday's meeting, there was no reason why the project could not be incorporated into the Winter Works program during this period.

Currently in the winter works schedule is the preparation toward completion of the swimming pool.

Regarding free calling between Castlegar telephone exchange and the Trail exchange, the B.C. Telephone Company has advised Kinnaird commissioners that engineers have not yet completed their study on the proposal.

Capital Holdings, with interests in the Castleaird Shopping Centre have requested by letter a more frequent garbage collection service in the shopping centre area. Council is willing to determine a more frequent pick-up service for business establishments. After discussion centered around the present garbage bylaw, it was decided to draft a clause to the effect that council decide from time to time on the frequency of the garbage pick-up schedule.

Board, Teachers Committees to Meet Today

CRANBROOK — Cranbrook Teachers Association contract committee, with Thomas Hutchison chairman, has presented its 1962 contract proposals to the school board contract committee, of which Eric MacKinnon is chairman. The board committee is now considering its counterproposals and the two committees will meet again today to start negotiations.

Recommendations arising from the negotiations, which include proposed upward salary scale revisions and fringe benefits, will then be reported to the Teachers Association and the School Board by their respective committees. Agreement must be reached by October 31, or the dispute then goes to arbitration.

Canada's largest and most successful retail advertisers invest 82% of their advertising budgets in daily newspapers. They have proved without question that newspaper advertisements give them, by far, the best value for their money. They also know exactly what they are buying. Daily newspapers in Canada have an *audited* count of the number of copies they sell. There's no guessing or estimating, no seasonal fluctuations. Summer and winter, day after day, Canadian families buy 4,091,025 daily newspapers. And, even more important, they are read by not less than 2.5 people per family. The biggest ready-made audience for any advertiser.

Daily Newspapers—the best meeting place for advertisers and their customers.

Well Intentioned, At Least

The American government has always been hopeful that the trend towards co-operation shown by the development of the European Common Market will eventually result in something like a United States of Europe. Prospects for this seem bright, and the Kennedy administration, in a policy statement, has taken the view that Commonwealth interests should and will be recognized in the negotiations leading to British entry into the European Common Market.

The policy statement goes on to say that the administration is convinced that its view will be listened to by the negotiators, that is by the Common Market and British negotiators.

However much concern the United States may have for the solidarity of Europe and the good of the British and the Commonwealth in particular, it cannot be said that what the British and the Common Market do is any business of any other nation. The Kennedy administration, however, hopes that successful British entry into ECM on a basis which strengthens and promotes the drive for closer political and economic unity in Western Europe will be good for Britain, the ECM and the United States.

Britain and the Common Market can justly declare the policy statement is an interference in their affairs and although the altruistic ideals and intention of the U.S. cannot be questioned, may resent it much as Canada was affronted when President Kennedy in his speech to the Canadian Parliament urged Canada to join the Organization of American States.

Canada, whose government does not want Britain to join the ECM, now finds herself taking a diametrically opposite view to that of the United States. This will not make for happier relations between the governments of the two countries.

Britain and the Common Market, on the other hand, may take the American administration policy statement as it is intended, a statement of agreement and approval. They may consider it rather heavy handed and paternalistic but their sense of humor will come to their rescue and they will regard it as another example of the queer ways of the Americans. They will doubtless handle the whole matter with their usual diplomatic tact but will deal with Britain's entry into ECM solely on circumstances as they affect them.

A Pointer

Another Soviet intellectual has defected to the West, this time a scientist who took the chance of a visit to Holland to seek asylum there. The West has had instances of defection in the opposite direction, but this latest Russian instance does point up a weakness within the Soviet system — its control of the individual mind.

At its face value the current defector's reason may seem none too strong; that he couldn't pursue his pet scientific project. Even in democratic countries everyone is not always free simply to follow a personal bent. But as a scientist his was the humanitarian aim of removing a cancerous element from radioactive fallout and this doubtless increased his sense of rebellion.

The freedom he sought was thus one that gave unrestricted rein to the flow of imagination and mental effort.

This is the area in which perhaps the future of domestic Russian life may be changed. The force of educational evolution is bound to have its say.

Russia has accomplished marvels in the spread of universal education and higher learning within a few short decades. Its school programs are intensively pursued and it picks its smartest students and reserves for them the best training. Thus it has reached its present powerful national capacity.

The drawback to its system is that individual expression is harnessed to political ideology. In the arts, the sciences, and all other intellectual areas there is restriction on the free play of ideas and individual concept. The mental as well as the physical contribution of Soviet citizens is geared to the promotion of Soviet policy, national and foreign.

It is this form of repression that is bound increasingly to irritate more and more of the best educated minds of the Soviet Union. It is the history of all countries that as a nation becomes better educated—a necessary corollary of national progress and prosperity — men begin to think for themselves and in time compel a change in principles that hamper their development.

It is here perhaps that the best hope for the future of world peace may lie; that as Russians by educational process absorb wider ranges of thought and idea they will force a reorientation of policy embracing foreign as well as domestic aims.

—*Victoria Colonist.*

Let the UN Speak

The American-British resolution in the UN General Assembly which calls on the nuclear powers to resume negotiations for an inspected test ban may not prove effective, but it is perfectly in order. We do not see how the Assembly in conscience can turn it down. Reports from Formosa indicate that even the Chinese Communists are becoming concerned about fallout from the current series of Russian tests; and the Soviet rationalizations for having broken the moratorium sound weaker every day.

Interestingly enough, Yugoslavia's foreign minister spoke in the Assembly much more vigorously against the Soviet tests than Marshal Tito did at the Belgrade conference. No doubt the Yugoslavs are trying to undo the damage done by Tito's excessive toleration as contrasted with his earlier condemnation of tests by the Western powers. Foreign Minister Popovic told the Assembly the Soviet tests are an "ominous undertaking" for which Moscow "assumes a very heavy responsibility."

The longer atmospheric testing goes on, the stronger the world reaction against it will become. There is no escaping the fact that any nation which deliberately poisons the atmosphere for its own national ends commits a crime against humanity. We hope this fact will remind the Kennedy administration again and again that resumption of atmospheric testing by the Western powers — by France or Britain or the United States —could be justified only by the direst of military emergencies. Those who are demanding that the United States commit the same crime Russia is committing are asking that a strong moral position be abandoned for a weak one.—*St. Louis Post-Dispatch.*

It's Been Said

In the final choice a soldier's pack is not so heavy a burden as a prisoner's chains.
—Dwight Eisenhower.

About Books

In a thin volume of poetry, "Wind in the Pines," Viola Scott has taken the gem of living and polished it a lustre with the joys and sorrows of her life spent in the Boundary area.

It is the mention of Boundary Creek, Icicle Mountain, a peak overlooking the Kettle River, Castlegar, Rock Creek, Spokane and Christina Lake that will make the book particularly interesting to readers in this district.

With a fine sensitivity for the beauties of this area throughout its changing season, Mrs. Scott, before her death in 1934, has captured in poetry the feeling of the vast expanses of the West as well as the cosy compactness of a closely knit family living on a farm.

"Wind in the Pines," the central poem from which the book takes it name, is a jewel of lyricism, bringing the scents of pine and woodland to reader, on its breezy meter. The many other poems — humorous or sorrowful — betray the courage and spirit of a woman who was able to find beauty in all things, consolation in small things and who had a fine understanding of human hearts.

Part one of the volume was written in Indiana where she was born. After her marriage, she and her husband, Horace Scott, moved westward to the State of Washington to homestead in the Ferry country close to the Canadian boundary where the Kettle river flows past the Canadian town of Midway. It was here she wrote the book's second part. Part three, was written in her latter years in Seattle before she returned to her home in the Boundary Country in 1933 to fill out her days.

It is a pleasant little book, rich in human experience and sympathy and well worth the reading. It is published by Dorrance and Co. of Philadelphia.

Interpreting the News

By ROD CURRIE
Canadian Press Staff Writer

The weekend demonstrations in Brussels may foreshadow another eruption in the chronic struggle between the Flemings and the French of Belgium.

The old Flemish - Walloon quarrel has never been far below the surface of Belgium's politics since the country became an independent state in 1830.

Inspired by the revolution in France that year, the area that now is Belgium revolted against its connection with The Netherlands.

The Flemings, speaking their variant of Dutch, occupy mainly the northern and western areas of the country, run the ports and engage in light industry. In the south and along the border with France, the Walloons, speaking a French dialect, work in the coal-fields and heavy industries.

A third piece in this complex jig - saw puzzle is Brussels, which fuses elements of the other two into a growing distinctive whole. The official list of parliamentary deputies, for instance, names the deputies in three categories — Flemish, French-speaking and Bruxellois.

FRENCH MORE POPULAR

There are two official languages in the country and although there are more Flemings than Walloons, French is more popular in the capital—particularly among politicians and civil servants having dealings with other countries where French is understood.

The division runs deeper than just language, however, causing disunity in cultural, educational, political and social areas.

Both Flemings and Walloons are nominally Roman Catholic but the Flemings generally are more staunch in their religion while many of the French tend to be anti-cleric. Politically the Flemings are anti-Socialist, the Walloons supporting a strong Socialist party.

The system, or lack of it, for deciding on an official language for each community is the major cause of the current unrest, particularly in central areas where the population is more mixed.

The language registered for a community on the basis of the last census in 1948 is the only official one for that specific region. Often families get tax forms or other official papers in a language they cannot read.

SCHOOL PROBLEM

A number of suburban areas registered as Flemish now are populated mainly by French-speaking families and these must send their children miles to school since only Flemish education is available locally.

The 63,000 Flemish-speaking demonstrators who marched on Brussels Sunday called for equal treatment for both national languages, protested against the Gallicizing of the Flemish area around the capital and demanded a legal demarcation of the Walloon and Flemish regions.

The government already is drafting a bill for stabilizing the language frontier and to adjust it to the boundaries of the provinces. But this still may not satisfy some groups.

Under the plan some Flemish villages of the Walloon provinces would be moved into a Flemish province, and vice versa.

Aunt Het

It looks like every church has got two kinds o' folks — them that's got religion and them that disagree with everything that's bein' done.

"$65,000 a year, and he can't even get the ball in the glass!"

Chou En-Lai's Sudden Departure Seen as Snub to Russ Congress

MOSCOW (Reuters) — Sovite leaders were faced Tuesday with a new snub from Communist China following the sudden departure for home of Chinese Premier Chou En-lai.

Observers saw Chou's abrupt departure from the Soviet party congress here as a sign of a worsening quarrel between the two countries over bitter Russian attacks on tiny Albania for following "Stalinist" policies.

Chou rebuked the Soviet leaders last week for bringing their quarrel with Albania into the open and told them that disputes between Communist countries should be settled in private.

Despite the rebuke and the new snub Monday, Chou was seen off at the airport Monday night by Premier Khrushchev and other top Soviet officials.

No reason was given for his sudden departure. Chou arrived back in Peking this morning and was greeted at the airport by Communist party chief Mao Tse-tung and by the Chineso head of state, Liu Shao-chi.

HAS NEW WEAPON

As Chou left Moscow, Soviet Defence Minister Rodion Malinovsky was telling the congress that Russia has successfully developed a weapon for shooting down missiles.

He did not elaborate on the claim or indicate what kind of missiles had been destroyed in the tests.

Malinovsky repeated Khrushchev's claim that the Soviet Union has a 100-megaton bomb and said that Russia had "controlled" a 50-megaton bomb.

His statement came a few hours after observatories throughout the world recorded a blast in the Arctic Circle which some scientists said might be the 50-megaton weapon Khrushchev said would be exploded before the end of the month.

Malinovsky also said that a radical reorganization of the Soviet armed forces had been carried out and a new branch created—"strategic rocket - nuclear troops which are inconstant readiness."

Amid stormy applause he declared that if war were thrust upon Russia "the socialist camp will be victorious and capitalism will be destroyed forever."

DISPUTE CONTINUES

The dispute over Albania which touched off the quarrel between Russia and China continued to dominate the congress meetings Monday. Speaker after speaker rose to denounce the Albanians for straying away from the Soviet party line.

The speakers also continued to heap abuse on the "anti-party" group denounced by Khrushchev last week for opposing his "destalinization program."

In a dramatic incident at Monday's meeting, Bolshevik Klimenti Voroshilov, 80, former Soviet president, was reported warned to keep quiet when he interrupted a speech attacking him for belonging to the anti-party group.

The exchange involving Voroshilov came during a speech by Russian Federation Premier Dimitri Polyanski.

He charged that Voroshilov joined the anti-party group because of his complicity in prewar military purges.

PRAISE 1956 REVOLT

ROME (Reuters)—Youths in a car hurled a Molotov Cocktail—a bottle filled with flaming gasoline — outside the Soviet trade bureau here today and dropped leaflets praising the 1956 Hungarian revolt. No damage was reported.

Diefenbaker Urges Drive To Harness Natural Resources

By BEN WARD

MONTREAL (CP) — Prime Minister Diefenbaker called on the provinces Monday night to join with Ottawa in a co-operative effort to harness Canada's natural resources in a dynamic drive towards greater national prosperity.

He offered a three-part plan for getting the program under way, each part linked to a pledge of federal financial backing.

"It is vital to Canada's destiny that Canadians develop a bold and vigorous policy of national expansion," Mr. Diefenbaker told a dinner marking the opening day of the Resources for Tomorrow conference.

To translate the conference's decision into action, he proposed:

1. A National Resources Council to be set up by the federal government and involving membership from all 10 provinces. It would be concerned with resource conservation, renewal and development.

2. A full-fledged conference on resources, similar to the current week - long session, held every three or four years to review progress in resource development.

3. A national advisory land and water use board charged with making recommendations for the co-ordination of land and water use on a national scale.

Mr. Diefenbaker stressed that the new national concept of conservation and planning would in no way infringe on the province's constitutional control over their natural resources.

He recalled in his Saskatchewan boyhood the wildlife appeared to be unlimited and great whooping cranes, now almost extinct, could be seen on almost every sandhill.

But today there was a need for positive measures to preserve and develop Canadian wildlife. "Closely related to this is an increasing demand for recreation of all sorts."

Mr. Diefenbaker said pure and wholesome water is vital to the nation's future. "Unless action is taken it will be in short supply by 1980. Water shortages . . . already exist in various regions."

Premier Lesage drew applause from the largely English-speaking audience when he pledged that Quebec will co-operate in the conference's aim of organizing resource management on a national blueprint.

SPELLS OUT THEORIES

The first day of the conference, which has drawn 700 delegates from governments, industry, business and universities across Canada, was devoted mainly to spelling out the theories under which it will work.

Speakers made education a dominant theme, calling for more training in the sciences and skills to supply the kind of manpower needed to generate new development.

Prof. F. Kenneth Hare of McGill University said education is the greatest problem faced by Canadians in opening new channels of prosperity.

On the same theme, Prof. Pierre Dagenais of the University of Montreal said physical riches alone cannot create a wealthy and vigorous nation.

Human initiative was the key and the ultimate resource.

Tension Increases Along East-West Berlin Border

By ALFRED KLUEHS

BERLIN (Reuters) —Tension increased along the border between East and West Berlin Tuesday following repeated bursts of gunfire during the night and a tear-gas battle between Communist and West Berlin police.

Repeated shooting was heard during the night in the border areas, particularly those between the French sector and East Berlin.

West Berlin police, newly armed with automatic weapons and tear-gas grenades, used the grenades for the first time Monday night when the East Germans hurled five tear gas bombs at a West Berlin loudspeaker truck, smashing its windshield. The West Berlin police hurled six tear gas grenades at the Communists.

The clash came as the Communist East German government imposed new restrictions on the border to clinch its authority over all civilian traffic between East and West Berlin.

MUST SHOW PASSES

The restrictions require all foreigners entering East Berlin in civilian clothes to show passes, proving their identity.

Despite the announcement Western officials were allowed to drive into East Berlin Monday without any special identification check.

Meanwhile, West Berlin police said today that East German police were seen to fire at and injure a man trying to flee to West Berlin Monday night. He was then taken away by the East Germans.

About 30 minutes later there was rapid sub-machine gun fire in the same area but out of sight of West Berlin police.

West Berlin police said a total of 22 East Germans fled here during the last 24 hours, including three plainclothes Communist detective inspectors and a policeman.

Ottawa's Announcement Shatters Chignecto Plan

OTTAWA (CP)—A centuries-old Maritimes dream was shattered — at least temporarily—when Works Minister Walker announced Monday that the federal government is not prepared to undertake construction of the Chignecto Canal.

He called the project to link the Bay of Fundy and Northumberland Strait "very unsound economics" and said the annual cost of the canal would be at least 20 times the estimated saving in shipping costs.

It was hard news for residents of Canada's Eastern provinces who cherish the thought of having the waterway cut 500 miles off the 1,403 - mile sea voyage from Montreal around Nova Scotia to Saint John, N.B.

Premier Robichaud of New Brunswick said the people of his province have been "sold down the river on the project."

In Fredericton, Michael Wardell, honorary secretary of the Chignecto Canal Committee said the federal government's intention to put aside the plan had been evident since June, 1960, when the Progressive Conservative government headed by Hugh John Fleming was defeated by Mr. Robichaud's Liberal administration.

Both the premier and Mr. Wardell expressed dissatisfaction with the present government's study of the project.

STUDENTS START DIGGING

To illustrate just how strongly their feeling runs, students of Mount Allison University at Sackville, N.B., started digging a shallow ditch across nine miles of marsh and farmland on the Isthmus of Chignecto connecting Nova Scotia and New Brunswick.

With the support of Mount Allison President DMR. W. T. Ross Flemington, the students have undertaken the project in the hope that "some people who have looked into the situation carefully will come forth to either prove or disprove his (Mr. Walker's) statement."

Mr. Walker said preliminary estimates put the cost of the canal at $142,000,000. He said carrying the debt and operating the canal would cost $10,000,000 a year while the annual saving in transport costs would be $500,000 at the most.

He based his decision mainly on a 1933 study by a special commission which had produced "very complete" information.

The dream of a Chignecto canal is older than Canada itself. It was first referred to by an intendant of New France who wrote to the court of Louis XIV saying it could easily be done.

It was not until 1822 that the first survey was done. Many more surveys were taken and with Confederation in 1867 it became a theme in Dominion politics which recurs with undaunted persistance.

FIND STOLEN PAINTING

BRUNSWICK, Germany (AP) An original Rembrandt, stolen nearly wo years ago from West Berlin's Dahlem Art Museum, has turned up in a baggage locker of the Brunswick Railroad Station, police reported today. They said they found the masterpiece. Christ's Head, valued at $62,500, last Sunday after an anonymous telephone call.

Luthuli Awaits Permission To Collect Nobel Prize In Oslo

By HENDERSON GALL

JOHANNESBURG (Reuters) Ex-chief Albert Luthuli awaited a government decision Tuesday on whether he will be allowed to go to Oslo to receive the Nobel Peace Prize awarded to him Monday.

Luthuli, 62, is confined by law to his home area near Stanger, north of Durban, and Interior Minister Jan De Klerk said he would have to consider "the whole matter" before deciding whether or not the former Zulu chief would be granted a passport to go to Oslo Dec. 10 for the presentation ceremony.

Luthuli was awarded the peace prize for 1960 and Dag Hammarskjold, late secretary-general of the United Nations, won the prize for 1961. Luthuli's prize carries a cash award of $43,557 and Hammarskjold's $48,319, which will go to his estate.

Luthuli's citation described him as a man bearing "the stamp of his tribe's traditions and of Christianity" and declared that in his "fight against racial discrimination Luthuli has always worked for non-violent methods."

South African government leaders regard Luthuli as a dangerous political opponent because of his unremitting criticism of the nation's apartheid (segregation) policy.

Luthuli was a Zulu schoolmaster until his tribe persuaded him to become their chief. The government ousted him as chief in 1952 when he refused to resign his post as presiddent of the now - banned African National Congress.

The African leader also was fined £100 last year for burning his government pass as a protest against laws restricting the movements and employmen of Negroes.

He was given a suspended six-month jail sentence in addition but was in government custody for three months while the case was in the courts.

He also was among 155 persons arrested in 1956 on charges of high treason but was released after a preliminary examination.

Luthuli, now aging and sick, said he was "humbly glad" when he was told that he had been named the 1960 peace prize winner.

AWARD FOR ALL

He said he regarded the award as one for all people who fought to free Negroes in this country from fear and injustice.

"I receive this honor as their representative and am humbly glad to do so," he said. "This news gives me great encouragement.

"I and my friends have been tried for treason, have lost our freedom to speak and to move about freely and have been punished for our belief in right and justice," he said.

"We have not had many material triumphs but we have kept the spirit of freedom alive, both in ourselves and others."

Luthuli refused comment on an editorial of the Cape Town pro - government newspaper Die Burger which said: "We see little reason for the award of this peace prize. Black leaders who preach non - violence but whose followers practice violence are as plentiful in Africa as anthills."

Queen Deplores Russian Bomb

LONDON (Reuters) — Queen Elizabeth said Tuesday Britain "deeply regrets" the unilateral Soviet resumption of nuclear weapons tests.

The Queen, mother of three children, made the statement in a government - written address closing parliament's current session. It was read for her by a royal commission of peers.

Earlier in the day the Conservative government announced plans for distributing dried milk for babies under one year old should the current Soviet tests cause contamination of liquid milk supplies.

Defence Minister Harold Watkinson made the announcement.

He also interpreted the latest Soviet test series as a sign the Russians "have realized they are behind the Americans in the development of nuclear weapons."

In her statement Queen Elizabeth said:

"My government have worked for a resumption of negotiations on general disarmament. They have also striven for international agreement on the discontinuance, under effective control, of all tests of nuclear weapons.

"They deeply regret that the Soviet government should have initiated the resumption of these tests."

BRITISH COLUMBIA
CIVIL DEFENCE

Some of the basic principles of Civil Defence are self help, mutual aid and organized help.

About the Town

PHONE 1844

A resident of Kitimat for the past four years, and formerly from Vancouver, Mrs. K. Myskow has come to Nelson to make her home for a time and has taken up residence at 113 Morgan Street. Mrs. Myskow, who is manager of a jewelry shop here, has her daughter, Miss Eileen Campbell of Santa Monica, California, visiting her.

* * *

The recently organized Royal Canadian Legion dance committee met Monday night in the Legion hall to finalize plans for the first of its series of five dances of the 1961-62 winter season to start this Saturday. Mrs. J. F. Hogg is chairman of the committee for its first year. C. R. Higgins, secretary-manager of the Legion, was given charge of the membership tickets.

* * *

Mr. and Mrs. Roy McKenzie, 1420 Kootenay Street, have returned from Vancouver where they visited their son, George, who entered his second year at University of British Columbia this fall. Mr. and Mrs. McKenzie were accompanied by Mrs. W. S. Ramsay, 912 Kootenay Street, who was visiting her son, Tom, at the university. The occasion was U.B.C.'s annual visitors' day held on Saturday.

* * *

Horace Morgan, 522 Third Street, is a patient in Trail-Tadanac Hospital.

Engagement Announcement

Mr. and Mrs. Nick Konkin of Salmo announce the engagement of their daughter Margaret Chisan to Mr. Charles Bodkin Freeman of Vancouver, B.C.

By TRACY ADRIAN

Don Marshall, noted for his flattering little hats, designed this charming coif for wear with cocktail and dinner dresses. The hat is actually a headdress which is a circlet of velvet fashioned on a cage veil and trimmed with shaped ostrich feather tips. Both the feathers and the velvet are in brown. The mesh veil is in a lighter shade of brown.

School of Rehabilitation Medicine Opens at UBC . . .

Nelson Branch CARS Supports Chest Canvass With Display

The Nelson Branch of the Canadian Arthritis and Rheumatism Society has sponsored a window display in a downtown furniture store portraying a young boy's frustration in being kept away from the ball field by an arthritic affliction.

This window display is in keeping with the current Community Chest canvass, of which CARS is one of the beneficiaries.

In the latest C.A.R.S. Bluebird Bulletin, one of the articles reports a long-awaited event, the opening of the new School of Rehabilitation Medicine at University of British Columbia this fall.

Community funds largely donated through CARS, the B.C. Child Care and Polio Society, the G. F. Strong Rehabilitation Centre and the Vancouver Foundation paid for necessary construction and building alterations in the U.B.C. campus. Providing training facilities for therapists, it supplies a vital link in the chain of rehabilitative health services being arranged in B.C., points out hte bulletin.

In activation wings or wards of acute general hospital, the rehabilitative portion of the chronic groups of patients may now be given the treatment necessary to restore them to a life where they are up and about, rather than spending the remainder of their days in a nursing home bed.

Many communities are going ahead with plans for these units with the expectation that when they are built there will be suitably trained personnel available to staff them. Apart from the acute hospital most urban and rural areas of B.C. have been given the opportunity of observing the benefits of rehabilitation services at home and outpatient levels as applied by the C.A.R.S. therapist.

Arthritis and rheumatic states constitute only a portion of those conditions which could benefit from like treatment and medical professions will be able to arrange much more in the way of rehabilitative medical services at all levels as soon as more therapists are trained and available to work with the doctor at the school.

The School of Rehabilitation Medicine trains therapists who are capable of assisting the doctor in matters of treatment and in taking much of the responsibility for arranging the applicable rehabilitation services, more of which will be available each year. She must also be competent in instructing and supervising volunteer workers, whose assistance will be vital in the success of the rehabilitation program of any district. This is one of the reasons for requiring high entrance standards for the training course of these persons who, in future, will hold positions of such responsibility and importance in the community health structure.

With a somewhat large amount of community funds for the school was obtained indirectly through federal government rehabilitation health grants to pay for salaries and equipment, it was the voluntarily donated portion which was essential to initiate arrangements before the government funds could be tapped, the Bluebird Bulletin points out.

CONTRARY TO COMMON BELIEF, arthritis is a disease of all ages. This young housewife was badly crippled with rheumatoid arthritis. Intensive rehabilitative treatment from the Canadian Arthritis and Rheumatism Society put her back on her feet and she is now able to look after her family again.

By TRACY ADRIAN

College men and sports car drivers will enjoy these coats made for the active outdoor life. On the left is a single-breasted style with a shawl-knit collar, leather buttons, slit flat pockets and side vents. With it is worn a matching stocking cap. On the right is a new version of the ever-popular double-breasted coat. It also has a shawl collar and deep, slit, flat pockets. A darker stocking cap matches the buttons.

Films for Women to Be Shown . . .

Registrations for Well Women's Clinic Increase

Well over one hundred women are now registered with the Well Women's Clinic in Nelson, reported Mrs. Gordon French for the Nelson Kinette Club at a recent meeting of the executive of the Nelson Unit Canadian Cancer Society.

Registrations are increasing weekly, Mrs. French indicated in her report for the Kinette Club, which operates the clinic under sponsorship of the Nelson Unit.

With the last forum for women well received here, another forum is being planned for Nov. 8, when special films will be shown, "Time and Two Women" and "Breast Self-Examination". Doctors will be on hand to answer quesitons presented anonymously from the audience, which proved popular at the previous showing.

Members of the Nelson unit are canvassing for the Nelson Community Chest, of which the Canadian Cancer Society is a member.

THE WELL WOMEN'S CLINIC in Nelson is designed to help eliminate cervical cancer by early examination. Dr. H. K. Fidler is the key man behind efforts to prevent cancer of the cervix among B.C. women through screening of annual cell tests.

100 YEARS OLD

Vassar College for women was established at Poughkeepsie, N.Y. in 1861.

35 Women From District Attend Retreat in Nelson

For two days during the weekend, 35 women in Nelson had not a word to say.

The women, from Warfield, Salmo, Kaslo, Nakusp, Trail, Nelson, Rossland and Montrose, were in retreat, led by Franciscan Friar Father Mathias Kuefler of Victoria, who holds retreats in B.C. and Alberta.

Starting with supper Friday evening at 7 o'clock, the women spent two days meditating and praying in the building which was formerly a nurses' residence of the old hospital.

"It is a time for a pause, to reconsider their lives, to make new plans or discover corrections they might make. It is primarily a time to discover one's purpose in life," says Father Mathias.

The missionary holds nine conferences during the weekend. He begins the first conference by telling the women that for 363 days of the year they have their say, but for these two days he is the one to speak. He reacquaints them with basic principles of their faith. The women maintain their silence during the two days of meditation except during meals or during private conferences with their retreat leader.

A question box is available. The women asked 55 questions which were answered by the leader during a special period set aside for this purpose.

Retreats of this type are in the experimental stage in the Nelson Diocese. They have been held annually at Camp Lourdes for the past ten years.

The Franciscan will hold two more retreats in Nelson, one this coming weekend for men and one for married couples the following weekend.

He has held these quiet periods in Cranbrook and Kimberley prior to coming to Nelson and will continue on to Revelstoke, Kelowna, Penticton and Fernie.

Retreats have gained in popularity during the past ten years, says the missionary. The large retreat at Cochrane, Alta., opened ten years ago. There is one at St. Albert, near Edmonton, one is being constructed near Regina, there is one at Ladner, B.C., and one in Vancouver. These are mostly weekend retreats, although at Cochane they are held during the week also.

Old Articles Bring Interest at WI Meet

CRAWFORD BAY—The monthly meeting of the Women's Institute at the home of Miss Lorna Lytle was well attended and old items of interest examined.

Mrs. Haverstock gave the good news that the Girl Guides are still active, but marking time for the winter months ready for activity in the Spring.

Mrs. Clyde White's letter on the recent Tweedsmuir Competition winners was read. Interest was shown in the new subjects for competition, members being determined to make an early start.

Some table mats were admired. These were made by the late Mrs. Kidman (the first secretary of Crawford Bay WI) forty years ago from ponderosa pine needles stitched in a pattern with raffia.

Miss Lytle had some tiny baskets made in the same way. Mrs. Miller also remembered receiving some from Mrs. Kidman's annual Christmas tree. Forty years is a long life for a pine-needle article.

The government grant of $10 has been received showing the Institute's good standing. The sum of $10 was voted to the Salvation Army.

After a meeting a rusty old Winchester rifle was examined with interest. This old weapon had been discovered by Miss Lytle a few inches under some boards at Pilot Bay. It was near the site of one of the hotels and seemed to have been hidden and left behind. The wooden stock had rotted away, the spring to throw out the shell was open, the barrels were holed by rust. Opinion was given that its date may have been about 1891, 70 years ago, when the smelter at Pilot Bay was in full swing.

FREEZING TIP

Foods for freezing should be freshly prepared, then allowed to cool to room temperature.

Science at Work

By THE ASSOCIATED PRESS

Topics this week: Speedier computers based on a Chinese idea; projectiles to dig bases on the moon, and an armada to explore the Indian Ocean.

SPEEDUP

Borrowing from a 2,000-year - old Chinese theorem, scientists are developing a new kind of arithmetic which promises to make computer operations 20 times faster.

Known as modular arithmetic, it increases speed through a basic new way of presenting and manipulating information, explains Dr. Richard I. Tanaka of Lockheed Missile and Space Company.

Numbers need not be "carried" over from one column to another as in regular addition or subtraction, so calculations can proceed just as fast as the computer can run with no "wait" for the "craries" to catch up with the main calculations. The system could be helpful in solving space navigation problems more quickly.

EXPLOSIVE MOON BASE

The surface of the moon is inhospitable for man—boiling hot by day, freezing cold by night, bathed by radiation and meteorites.

So a scientist suggests shooting high explosive projectiles from earth to moon, with the special cannon-like shell blasting a shaft-like hole, then continuing to a predetermined depth to explode and form a chamber.

Men landing later could inflate airtight bags in the chambers, with air-locks at the surface, and dig connecting tunnels between chambers formed by two such shells, says Germando di Leonardo of General Electric Company. He said Laboratory experiments with explosive charges have produced spherical chambers in a variety of simulated moon materials.

SCIENTIFIC ARMADA

An armada of 40 shisp from 20 nations is preparing a vast exploration of the Indian Ocean in 1962-63 under sponsorship of the United Nations Educational, Scientific and Cultural Organization.

One goal is to trace distribution of marine life and the availability of fish for protein-hungry people in the region. The Indian Oce covers 28,000,000 square miles, or 14 per cent of the earth's surface, but is a great unknown scientifically, since less than two dozen oceanographic ships have studied it since 1873.

REMOVE RED FLAG

SALT LAKE CITY (AP)—The Soviet Union's flag was removed Monday from a display of flags of United Nations members in Utah's capitol. Utah Secretary of State Lamont Toronto, custodian of the building, said he ordered it removed because of complaints and "because of the insults Mr. Khrushchev has given former President Eisenhower and President Kennedy."

Paris Millinery Outrageously Becoming

By PEGGY MASSIN

PARIS (Reuters) — Paris fashion designers are proudly waving their hats this season but they are hats with a difference.

This season's hat is outrageously becoming and scorns every vestige of past eccentricities. It is made of such flattering media as fur, velvet or veiling, and its soft shape complements the new mood of feminine fashions.

At Christian Dior, the youthful theme in winter millinery approaches the point of cradle snatching. Marc Bohan, the Dior designer, makes a fetish of infantile bonnets, helmets and baby bunting hoods—not to mention saucy, schoolboy caps bedecked with sprigs of lily of the valley or a single moss rose.

The all - fur hat, which has been timidly appearing in Paris the past few winters, walks off with top honors in every millinery collection this autumn.

But it is alarming to discover that a new all - fur hat costs three or four times the price of the average dress or coat.

FUR FLATTERING

The fur hat cannot be beaten for flattery. Mink is fine if one happens to have it. But Cardin, Balmain, Ricco and others do equally effective toques and turbans with more democratic and relatively inexpensive fox skins.

Guy Laroche sets off his neat young coats and suits with pert Breton sailors or rollers tipped back off the brow. Generally the body and crown of the hat are made of felt or tweed, with the rolled-back brim faced in beaver, mink or Persian lamb.

Pierre Cardin has adapted the American pioneer's original coonskin cap. These modernized Paris versions of Davy Crockett's famous headgear are made of fox, complete with an extra long "tail" which wraps round the neck and shoulders.

Other trends at Cardin literally bring a "pointed head" into high fashion, through adaptions of Mongolian Cossack hats. They have conical or pointed crowns beneath great ruffs of fox circling the face.

WATERPROOF TOO

The reversible hat, switching from fur to waterproof fabric, is a special feature with the popular milliner, Paulette.

Jean Barthet created one of the first reversible models for Princess Grace as early as the summer. This casque turned completely inside out, contrasting a shirred side of printed silk with an explosion of filmy white organdy petals.

Finally, Balenciaga, past-master of the daring, comes up with a towering whimsy for evening, concocted of ruched veiling. This "decorative thing" shoots straight up in the air to a height of 18 inches from the top of the head, and resembles the stylized costume head-dresses still worn by peasant women in the remoter regions of Brittany.

MILITARY CONSTRUCTION

NANAIMO (CP) — Military construction in the Nanaimo area has pushed the building value up to a record $4,273,000. Of the total, almost $2,000,000 is accounted for by work at Nanaimo Army Camp. The figures cover the period from Jan. 1 to Oct. 18.

Public Speaking Points Noted at IOTA Meet

A cultural program conducted by Mrs. Herbert Miller entitled "You and Your Audience" was found interesting by members of the Iota Chapter of Beta Sigma Phi sorority meeting at the home of Mrs. R. Johnson, 1015 Eighth Street, with Mrs. W. G. Apostoliuk as cohostess.

"The speaker's manner should suggest self-reliance — that he is a master of his subject and master of himself," is Kirkpatrick's feeling on the subject pointed out Mrs. Miller, and the following important points were used by the program convener to draw interest during her talk: dress, posture and relaxation to first bring out physical poise; confidence, relaxed enthusiasm and warmth of feeling for mental poise; natural emphasis; importance of restraint and pantomime in gesture.

"For delivery of speech, you should first hold your audience with concentration on your subject by using a logical sequence of ideas and a careful choice of words, but you should also be careful in holding your audience by having a good opening phrase and emphasis on important points, for instance, inflection of words and opportune pauses. However, your delivery will not be a success if a good summary or ending is not used."

The group all participated in a pantomime of feelings to show how effectively gesture can be used.

Of importance during the business meeting were continued preparations for the fashion show, to be held November 6, which all three chapters are convening.

New tricks for Hallowe'en treats with ROGERS GOLDEN SYRUP

Dozens of candies (and desserts) are better if you make them with Rogers Golden Syrup. For example, you can't go wrong if you make Popcorn Balls for Hallowe'en with this tested recipe:

POPCORN BALLS

1 cup granulated sugar
1/3 cup Rogers Golden Syrup
4 tablespoons butter
1/3 cup water
1 teaspoon vanilla
Pinch of salt
8 cups of freshly popped corn

Place popcorn in a large buttered bowl and keep warm in a slow oven. Mix all candy ingredients except vanilla and salt. Stir in heavy pan over low heat until sugar dissolves. Cover for 3 minutes of boiling then remove cover and cook to soft crack stage (270°). Add vanilla and salt. Pour rapidly over corn and stir to coat each kernel. Dip hands in cold water and shape popcorn into balls about the size of eating apples.

Business Spotlight . . .

Canadian Industry Charged Unjustly In Package Errors

By FORBES RHUDE
Canadian Press Business Editor

The sins of American packaging are being unjustly attributed to the Canadian industry, says Lyn G. Jamison, general manager of the Packaging Association of Canada.

In the United States investigations have revealed such practices as "slack fill" and the printing of essential information in fine print where the customer may not notice it.

"These revelations," says Mr. Jamison, "have received wide publicity in Canada as well as in the United States and there is a tendency to think they apply to the situation here.

"In Canada, however, we have definite government regulations. We must give prescribed information as to contents in the proper place and zo2uc2u o a80akage must not must not give a misleading impression of the contents."

Mr. Jamison said nearly all complaints received by the packaging association have concerned imported articles, or have been of a minor nature.

STILL HAVE PROBLEM

Some problem exists, he stated, with products that fill a package at the timo of packing but which settle later, but progress had been made in solving his.

Manufacturers, he continued, naturally want packages that will help the sale of their products, and the display requirements of supermarkets have influenced design. However, all "have to live with the regulations."

Mr. Jamison made his comments in an interview preceding the opening in Toronto Oct. 31 of the three - day Canadian National Packaging Exposition.

DESIGN IS COPY

Distinctive Canadian design for export markets creates a problem. Canadian manufacturers, often subsidiaries of American firms, wish to take advantage of American advertising of a certain package, and this leads to charges that Canadian design is largely a copy of American.

One possible solution, Mr. Jamison indicated, is separate or additional labels for Canadian exports.

Another problem arises from breakage in shipping or handling. He thinks further research as to the cause of such breakage is required.

Packaging in Canada is an $800,000,000 industry, one whose product, the association comments, usually winds up crumpled and torn in the ash can.

British Financial Circles Debate On BCE Expropriation

LONDON (CP) — Frederick Ellis, financial editor of the Daily Express, says a debate is going on in British financial circles over the expropriation of the British Columbia Electric Company by the provincial government.

Ellis says the company's stock is widely held in Britain, by private as well as institutional investors.

"The B.C. government has quite arbitrarily taken the company over, naming its own takeover price and refusing arbitration.

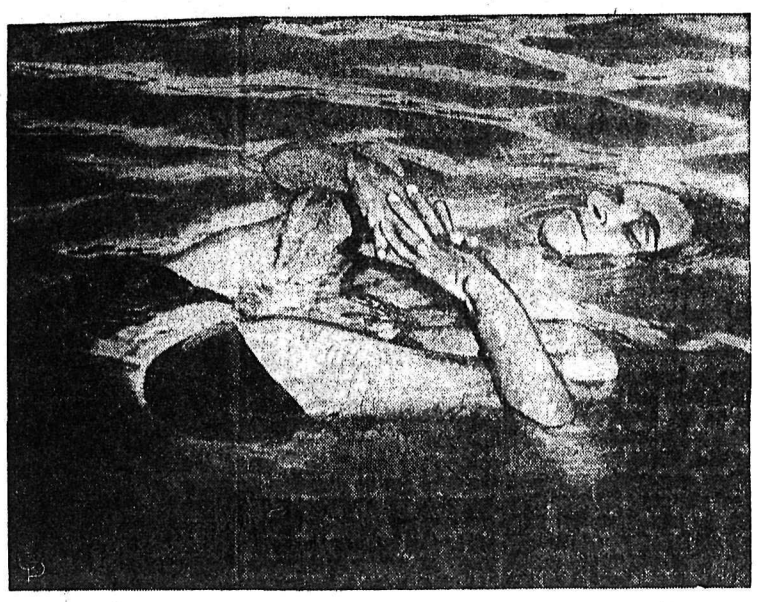
"Although the price is regarded as inadequate, there appears little than can be done by investors."

Ellis say it would be a "great pity" if an isolated action by a provincial government were to damage Canada's investment status in world financial centres.

"For the need of overseas capital to develop natural and industrial resources is one of Canada's major economic problems."

AFRICAN JUICE

The first shipment of pure concentrated orange juice ever to leave South Africa was shipped to Germany in 1961.



SWIMS 35 HOURS WITH HANDS AND LEGS TIED—Mohammed Nayebul Muslim Bhawaly, founder of the Dacca, East Pakistan, Swimming Art Club, performs one of more than 300 yoga postures in swimming which he has been practicing for 35 years. He claims he can swim 35 hours with his hands and legs tied.

BCFL Takes First Steps To Get Labor Co-Ordination

By BOB TRIMBEE

VANCOUVER (CP) — British Columbia labor has taken the first step in a concerted campaign to obtain maximum labor co - ordination in 1962 wage talks.

Delegates to the sixth annual convention of the B.C. Federation of Labor (CLC) have approved a policy conference of all affiliated unions to be held here in December.

The 100,000 - member federation's executive council told delegates Monday that interlocking directorates and legislation favorable to the vast corporations in the province has given employers increasing power.

President Robert Smeal said, "there has been no genuine attempt on the part of both industry and government to assume their responsibilities towards the workers, and it now is incumbent on the trade union movement to ensure that the responsibility is accepted by those who created a shameful waste of human resources."

Mr. Smeal said the problems of employment and labor's drive for improved 1962 contract conditions dictate that labor work out clearly defined policies which the entire movement can endorse and support with increasing vigor and determination.

OPPOSES BENNETT

He also signalled a running-fight with Premier Bennett's Social Credit government.

"Despite Bill 42, the federation has participated actively in the planning and organizational work leading to the founding convention this week of the B.C. New Democratic Party.

"We can defeat Social Credit in the next provincial election if we start organizing now. The creation of the NDP will be the first step in creating a political instrument around which we can rally the formidable force of the working people. . . ."

Bill 42, approved by the provincial legislature almost a year ago, forbids use of union dues for political purposes. Its constitutional validity is to be questioned before the B.C. Court of Appeal by the Oil, Chemical and Atomic Workers Union Nov. 15.

More than 400 delegates attended federation sessions Monday and approved 40 resolutions, including motions seeking a 40-hour work week, a $1.25 an hour minimum wage for all industry, a ban on members holding more than one job, a restriction on overtime work, changes in the National Housing Act to permit government entrance in the field of second mortgages and changes in the provincial real estate act to curtail "unscrupulous speculators who are fleecing unsuspecting buyers of homes.

MOTHER FACES CHARGE

ALBANY, N.Y. (AP) — Mrs. Angela Macris, 21, killed her newborn son, then told her husband Peter, 24, that she had had a miscarriage, police said. She was charged with first-degree manslaughter. Police said Mrs. Macris slashed the baby's throat with a razor blade after he was born Thursday night, then put the body in a paper bag and directed her husband to put it in a garbage can.

Yuri Gagarin Recovers From Illness

MOSCOW (AP) — Spaceman Yuri Gagarin, who has been ill for more than two weeks, is well again and attended the Communist party congress Tuesday, according to the foreign ministry department.

The foreign ministry insisted it did not know what his ailment had been.

Your Individual Horoscope

By Frances Drake

Look in the section in which your birthday comes and find what your outlook is, according to the stars.

For Thursday, Oct. 26, 1961

MARCH 21 to APRIL 20 (Aries) —Excellent period to get in extra innings for your favorite pastime, but of course, not neglecting regular matters. Good will pays, so does your ably-directed energy.

APRIL 21 to MAY 21 (Taurus) —You can do more with this day than estimated. Vital factors: disposition toward work and added chores, steady purpose, reserving energies at right times. Strong Venus aspect urges your best.

MAY 22 to JUNE 21 (Gemini) —Look out for those tricky little spots not clear until we are upon them. Don't try to sway by sheer force, but apply it where due. Tact, your imagination and sensitivity heightened.

JUNE 22 to JULY 23 (Cancer) —We often think some things just "don't matter." Actually, everything we think and do reflect the direction in which we are going, leading others, and will be happy in — or unhappy. The good life DAILY!

JULY 24 to AUGUST 23 (Leo) —Where you find dissension, reason it out, don't become agitated and lose the advantage your affable self gains. Mostly on your own today to make or break it for yourself. We NEED Leo's smile.

AUGUST 24 to SEPTEMBER 23 (Virgo) -- Be advised against careless statements, then finding it difficult to straighten things out. Some irritating situations. Whether you handle all adroitly is strictly up to YOU.

SEPTEMBER 24 to OCTOBER 23 (Libra) — When a matter can be attended to in brief fashion, do so promptly, and be less crowded later when unexpected items appear. You logic and sense of fair play in demand. News of interest.

OCTOBER 24 to NOVEMBER 22 (Scorpio) — If eager to get after your affairs, you will find action and interest easier to manage. If you do not have all necessary facts, get them, investigate. Your artistic touch appreciated.

NOVEMBER 23 to DECEMBER 21 (Sagittarius) — Cheery attitude will carry far, but also have knowledge of what you are doing nad firm will to succeed. Everyday work and issues may need trimming, tuning; refurbish wornout methods.

DECEMBER 22 to JANUARY 20 (Capricorn) — Reliance upon others can sometimes cause misunderstandings, misdirection. You usually are independent; keep your natural gifts up to par, heed warnings, necessary new plans.

JANUARY 21 to FEBRUARY 19 (Aquarius) — Accelerate pace only where it will not cause strain, over-excitement. Science, public affairs, change-overs, travel in forefront; fresh advantages, don't let sentimentality mislead.

FEBRUARY 20 to MARCH 20 (Pisces) — Better-than-average indications, but certain contention and obstacles due to variety of minds and ambitions. Practical deliberation, consolidated, well-directed effort will achieve.

YOU BORN TODAY are blessed by a generous God with so many of the top-success qualities that we are tempted to admonish first to beware of scattering energies, trying too many diverse occupations, and not following up any one through to the rewards possible. In your talents corner: keen perception, versatility, control, intellectual desires and aims to improve conditions about you; music appreciation. In likely-faults category: overzeal, delaying the beginning of important matters, requiring self to strain later. Go for smooth action, don't drive too hard nor too far in any direction, curtail pleasures, passions. Birthdate of: George Jacques Danton, French soldier; Eileen Lee Rossie, artist, writer.

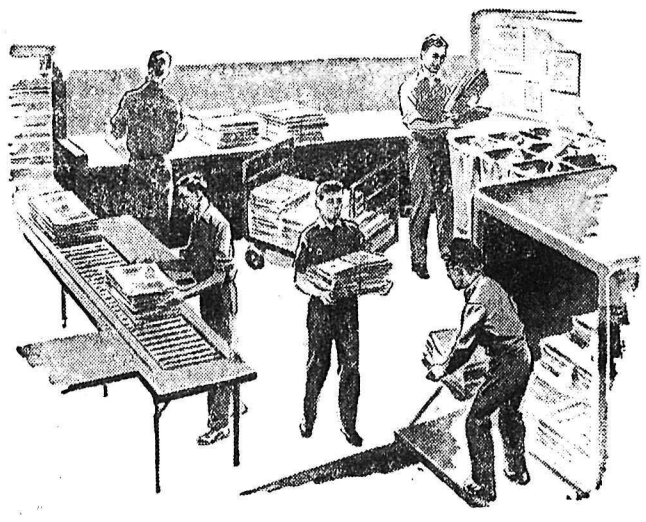
What It Takes To Keep You "In the Know"

There's more than meets the eye to the newspaper you hold in your hands. It is the end product of the concerted efforts of world-wide news and photo organizations, heads-up local reporters, experienced editors, skilled typographers, make-up men, engravers and pressmen, dependable delivery people . . . all devoted to the single purpose of bringing you fast, accurate, complete coverage of the important news of your community, your province, your country, your world!

Freedom of choice is basic to our free way of life. Freedom to know the facts is basic to choosing wisely. Your newspaper is dedicated to keeping forever open your channels of accurate, unbiased information.

Freedom of the press is the indispensable safeguard of every aspect of Canadian freedom.

The Nelson Daily News



Lower Butter Prices Urged

OTTAWA (CP) — The Canadian Produce Council has urged lower butter prices to cut the mounting butter surplus, with the federal government subsidizing the loss to farmers.

The council, continuing meetings here with emphasis on eggs and poultry, set no reduction targets. But Arthur Wilson of Moose Jaw, Sask., council secretary-treasurer, said the government now has 207,000,000 pounds of butter in storage and more is coming.

The government earlier this year studied the possibility of cutting the price to consumers below the present pegged level of 64 cents a pound for top grades, paid to farmers unable to get a better market price.

Cheaper margarines and spreads have contributed to growing inroads into annual butter consumption in Canada.

B.C. Lions Settle With Former Coach Robinson

VANCOUVER (CP) — British Columbia Lions and their former head coach, Wayne Robinson, reached a settlement Tuesday to end their association begun three years ago.

But the Western Football Conference club, in announcing the agreement had been reached, would give no details of it.

President Ralph Henderson of the Lions said the club's legal committee had reached a settlement with Robinson on the balance of a contract that had 2½ years to run when Robinson was suspended after Lions' seventh game this season.

Henderson said he could release no details.

Robinson, who has remained in Vancouver since his suspension and replacement as head coach by his former assistant, Dave Skrien, could not be reached for comment.

Some reports here said Robinson had settled for a sum of $32,000. It had been reported earlier that under the four-year contract he signed at the beginning of the 1960 season he was to get $20,000 a year.

The 31-year-old Robinson, a former Minnesota and Philadelphia player and an assistant coach with Winnipeg Blue Bombers before he came to Lions for the 1959 season, was released after B.C. had lost six of its first seven games this year.

Robinson took the team to third place and the WFC playoffs for their first and only time in 1959. The club finished fourth last year and in spite of early reve notices this year, has only one victory and a tie in 14 games.

Probe Demanded

VANCOUVER (CP) — A rowdy membe hip meeting of the British Columbia Lions Tuesday night by a 29-vote majority voted for a top-to-tail investigation of the cellar-dwelling Western Football Conference club's operation.

The turnout — about 1500 — was the largest in the club's history.

By a vote of 514 to 485, the *extraordinary meeting* approved a resolution setting up a three-businessman committee to investigate all club affairs.

The investigation's results will be tabled at another special meeting to be held before the end of the year.

The secret-ballot vote was made after a boisterous discussion lasting 2½ hours. Much of the time was taken up by a lively question-and-answer session with the team's executive.

The Lions have dashed their playoff hopes with a record of one win and a tie stacked against an impressive number of losses this season. They are in the conference cellar.

The team's new coach, Dave Skrien made a plea that the investigators don't carry their inquiry into the player ranks.

Speaking while the ballots were being counted, he said:

"If it is within the power of this group to reconsider and not interrogate the players, it would be in the best interests of the Vancouver football team."

As presented, the investigation motion included full access to the players by the investigators.

Skrien's plea was greeted by thunderous applause.

The *investigating committee* will be chosen by a board of eight who were to have been picked from the floor after the ballot.

However, 21 names were put forward. As a result eight will be selected in a mailed ballot.

Despite Lead, Stewart Still Unhappy

TORONTO (CP)—Ron Stewart, Ottawa Rough Riders' commuting football player and budding lawyer, doesn't think he's doing a good job this season for the Grey Cup champions.

The speedy, little backfielder, who gets in only one practice a week because of his law studies in Toronto, is dissatisfied although he leads the Eastern Football Conference in scoring with 60 points and is fourth in ground gaining with 696 yards, averaging 6.9 yards a carry.

"Never mind those 10 touchdowns," he said. "That doesn't prove anything. I'm not having a good season."

He doesn't think the lack of practice is what has cut his effectiveness this season. It's the tough routine he has to follow all week, which involves attending day-long classes at Osgoode Hall here Monday through Friday, studying every evening except Friday and a plane flight to Ottawa that day.

He arrives in time usually to take part in the Riders' final pre-game workout. After playing Saturday, he flies to Toronto to start the routine over again.

"It's been tough," he says, "and I'm tired."

Jones Back In Running

SEATTLE (AP)—Art Jones of Portland, last season's scoring champion, was back in the tally lead this week in the Western Hockey League with nine points in the five games his team has played.

Rudy Filion of Seattle, leader after the first week of action, dropped to a three-way tie for second with his teammate, Don Chiupka, and Nick Mickoski of San Francisco. Each has eight points.

Edmonton's Denny Riggin, giving up only two goals in the last two games, cut his average to 1.67 to lead the netminders. Larry McNabb, Spokane rookie, was the penalty leader with 35 minutes of office penance.

League headquarters listed the following scoring leaders through Oct. 23, with goals, assists and total points:

	G	A	Pts.
Jones, P	3	6	9
Filion, S	4	4	8
Chiupka, S	3	5	8
Mickoski, SF	3	5	8
Baird, S	6	1	7

Volleyball Play Lined Up

A six or eight-team volleyball league will be formed at the Civic Centre this season if the interest shown so far is a criterion.

Fred Boates, recreation supervisor, said Tuesday that teams will be formed tonight during the 7:30 to 11 p.m. session. He said that all persons interested in playing were being asked to turn out.

Because of the widespread interest, time of play had been extended and all games were scheduled for Wednesday nights so that participants could arrange their week's activities on a regular schedule. He said that the league would attempt to run off all games on the one night.

Eagles, Legion, Gyros, fire department and Simpsons-Sears had indicated they had teams ready.

The plan to schedule all games on one night will also be extended to basketball, with senior men's play scheduled for 8:30 to 10:30 p.m. on Monday nights.

A KISS FOR LUCK—Attractive Nancy McNeeley plants a good luck kiss on the cheek of her husband, Tom McNeeley, heavyweight title contender, as he participates in a Little League charity bowling tournament in Grafton, Mass. McNeeley battles champ Floyd Patterson in Toronto Dec. 4.

Gerry James Closing On Scoring Crown

By THE CANADIAN PRESS

A late-season drive has put fullback Gerry James of Winnipeg Blue Bombers within striking distance of his second consecutive Western Football Conference scoring title.

The 26-year-old veteran produced one of his best efforts of the year Monday night, scoring 17 points as the Bombers spanked Calgary Stampeders 42-7 in Winnipeg.

The total boosted him out of a second-place tie with Edmonton's Johnny Bright and gave him 77 points, 14 behind leader Jackie Parker of Edmonton. All teams have two games left.

Parker, who started the season fast, has slowed down lately, scoring 13 points in his last three games. The Edmonton quarterback has four touchdowns, 32 converts, 11 field goals and two singles.

James, on the other hand, had a slow start, scoring only 35 points in his first 10 games. He caught fire in his last four games, scoring 17, six, two and 17 points in that order.

The Regina-born player has collected four touchdowns, 25 converts, eight field goals and four singles for his 77 points.

Bright, barrelling fullback for the Eskimos, has 60 points on 10 touchdowns.

Trailing the three leaders are two Calgary Stampeders. Fullback Earl Lunsford has nine touchdowns for 54 points, and teammate George Hansen, a tackle, has 52 points on 21 converts, nine field goals and four singles.

The leaders :

	TD	C	FG	S	Pts
Parker, E	4	32	11	2	91
James, W	4	25	8	4	77
Bright, E	10	0	0	0	60
Lunsford, C	9	0	0	0	54
Hansen, C	0	21	9	4	52
Whitehouse, S	0	16	10	3	49
Fleming, BC	8	0	0	0	48
Beamer, BC	8	0	0	0	48
Lewis, W	8	0	0	0	48
Funston, W	7	0	0	0	42

Strikes 'n' Spares

Women's Matinee — Five Rads 4, Red Hots 0; Our Gang 3, Knockouts 1; Uphills 2, Luckies 2. High single and aggregate, Fran James of Five-Rads, 283 and 649. Team high single and aggregate, Five-Rads, 838 and 2364.

Senior Women's league — McLeod 1, Renwick 3; Bond 3, Morton 1; Hickey 4, Kalyniuk 0. High single and aggregate, Dot Waterer of Renwick 287 and 684. Team high single and aggregate, Bond, 978 and 2623.

Other top scorer, Betty Stewart, 653.

Junior Women's League: Flyers 1, Comets 3; Dynamoes 2, Spartons 2; Royal Bank 1, Gourmets 3.

High single and aggregate Marge Palesch of Gourmets, 262 and 659. Team high single and aggregate, Gourmets, 899 and 2479.

Litzenberger Gives Bathgate Hot Chase

MONTREAL (CP) — Andy Bathgate of New York Rangers continued his hot point-getting streak last week but failed to gain any ground on his closest pursuer—Eddie Litzenberger of Detroit Red Wings—in the National Hockey League individual scoring race.

Official NHL statistics released Tuesday show Bathgate, 29, a right winger, scored one goal and collected six assists in four games to extend his league-leading point-total to 15.

But Litzenberger, on a comeback trail after two relatively non - productive seasons with Chicago Black Hawks, did even better.

Litz, as he is known to his teammates, played only three games in which he scored three times and helped set up four other goals to run his point production to 12.

Bathgate leads the league in assists with 11 while Litzenberger is tied with Montreal Canadiens' Ralph Backstrom for the lead in goals. Each has six.

BOWER BEST IN NETS

Litzenberger's linemate, Gordie Howe, and New York's Earl Ingarfield also had seven-point performances last week and are tied with Claude Provost of Montreal Canadiens for third place at 10 points.

Veteran Johnny Bower of Toronto leads the goaltenders. Bower, winner last year of the Vezina Trophy awarded to the goalie who plays the most games for the team that allows the fewest goals, has a 1.60 average. He has given up only eight goals in five games.

Montreal's Jacques Plante is second with a 2.40 average.

Detroit is the most penalized club with 82 minutes. New York follows with 73 minutes and Boston has 71.

The leaders :

	G	A	Pts.	PIM
Bathgate, NY	4	11	15	9
Litzen'ger, Det	6	6	12	2

Leafs Drop First Game To Hustling Warriors

ROSSLAND — Rossland Warriors scored an upset 6-2 victory over Nelson Maple Leafs here Tuesday night before 550 fans. It was one of the best fan turnouts in Rossland in two years.

At the end of the first period of play, the score was 1-1; Rossland added three in the second to up the score to 4-1; while in the final frame it was two goals for Rossland and one for the Leafs, who were playing their first game of the Western International Hockey League season.

Rossland took advantage when two Nelson players were in the sin-bin to open the scoring at 11:57 of the first frame. Ray Demore netted the goal. Nelson import Reo Touzin levelled the score at 1-1 when Rossland relaxed with two seconds to go.

The middle frame was all the Warriors with rookie Owen Mailley going in for two goals and newcomer Pete Boucher adding the other.

Last year Trail-Rossland B.C. Junior A champion goalie Gerry Zanussi was star of the game when in the second period he stopped a two-man Nelson break.

Wiggy Davis sent Rossland ahead 5-1 early in the final frame when he raced the length of the ice on a passout from defenceman Joe Conn. A small fight developed at 2:32 of the last period to add to the already hot action.

Rossland's Bill Gallamore and Vic Poirier sat out five minute penalties. Reo Touzin gave the Leafs their second and final goal at 10:57 when he rushed in on the righthand side of Zanussi and faked the rookie netminder out of position. Norm Picco ended the game at 15:03 when he and Mailey broke in on the net. Mailey passed the puck to Picco, who slapped it into an open corner.

KNOCKED OUT

Tempers flared and grew hot in the final period when Owen Mailey was hit hard along the boards by Nelson policeman Ted Leboda. Mailey was laid out for a few minutes.

Rossland outshot Leafs 28-22, with an even eight penalties apiece.

Rossland: goal, Zanussi; defence, Gallamore, Andrews, McDougald and Conn; forwards, Mailey, George McIntyre, Taylor, Edwards, Picco, Reed, Demore, Boucher, Godfrey and Davis.

Nelson: goal, Wolf; defence, Leboda, Malacko, Touzin; forwards, Hornby, McKenzie, Farenholtz, Pilla, Poirier, Walker, Wales, Laughton, Carruthers, Burdett.

Summary:

First period: 1. Rossland, Demore (Davies) 11:57; 2. Nelson, Touzin (Carruthers and Leboda) 19:58. Penalties: Mailey, Rossland, Pilla, Nelson, high stick 6:04; Leboda, Nelson, 11 minutes; Touzin, Nelson, tripping, 11:47; McDougald, interference, 14:12.

Second period — 3. Rossland, Mailey (Reed) 7:27; 4. Rossland, Mailey (Conn) 15:27; 5. Rossland, Boucher (Edwards and Taylor) 17:39. Penalties: Burdett, Nelson, hooking 3:15; Gallamore, Rossland, interference, 13:03.

Third period—6. Rossland, Davies (Conn and Demore) 2:18; 7. Nelson, Touzin (Wales) 10:57; 8. Rossland, Picco (Mailey and Reed) 15:03. Penalties: Poirier, Nelson, Gallamore, Rossland, five minutes, fighting, 2:32; Nelson, Leboda, crosscheck, 5:45; Rossland, Taylor, slashing 9:39; Rossland, Gallamore, misconduct, 15:09; Rossland, Davies, high-sticking, 16:15; Mailey, Rossland, Laughton, Nelson, high sticking, 18:35; Leboda, Nelson, charging, 19:32.

Brisson Sparks Comets' Win

SPOKANE, Wash. (AP) — Gerry Brisson led Spokane Comets to a 6-3 victory over San Francisco Seals in a Western Hockey League contest here Tuesday night.

Brisson picked up two goals while teammates Red Johansen, Carl Kaiser, Max Mikilok and Del Topoll contributed singles. Barney Krake, Henry Pidhirny and Buddy Boone hit for the Seals.

CALGARY (CP) — Los Angeles Blades defeated Calgary Stampeders 5-4 in a Western Hockey League game before 2447 fans Tuesday night.

Danny Bellisle and Terry Slater both scored twice for Los Angeles with the other Blades' marker coming from Jim Powers.

Calgary's counters were divided among John Koslancic, Sid Finney, Norm Johnson and Fred Hucul.

LIEGE, Belgium (AP)—Standard of Belgium beat Valkeakosi of Finland 5-1 Tuesday night in the European Soccer Cup's second round. The return game will be played in Valkeakosi Nov. 2.

Weak Offensive May Wreck Riders

By DAVE McINTOSH

OTTAWA (CP)—If defensive linemen Gilles Archambault and Jim Reynolds get hurt, Ottawa Rough Riders will lose two-fifths of their scoring power.

At least, that's the way it appears on the basis of the last three games Riders have played, against Hamilton, Montreal and Toronto, in that order.

Ottawa's offensive team scored only three touchdowns in these three games compared with two by the defensive team.

Even to coach Frank Clair, long an exponent of a strong defence, this is placing a bit too much responsibility on the defensive platoon.

Riders' offensive team is not only punching with all the drive of a damp pillow but it is making the defensive unit's job a lot tougher by committing fumbles which the opposition rapidly converts into touchdowns.

EIGHT FUMBLES

In the last two games, the offensive team has fumbled eight times. The opposition used five of these for four touchdowns and a field goal.

Meanwhile, Reynolds, defensive left end, plucked a Hamilton fumble out of mid-air for a touchdown run and Archambault, defensive tackle, picked up a blocked Toronto kick for a touchdown dash, if a 243-pound lineman can be said to dash.

The 27-year-old Archambault in his sixth year with Riders has scored two touchdowns this season. The previous one came off a Toronto fumble.

In view of the defence's striking power, Clair's solution to his present problem would appear to be use of some of his players both ways as the other clubs have been doing.

But Clair had to work for four years here to train enough competent players so that he could use the two platoon system.

Riders can still win first place and a bye into the Big Four final.

Riders are four points behind the first-place Tiger - Cats. If they wound up in a point tie for first, Riders would automatically win the bye into the league final because they've already beaten Ti-Cats twice.

JAPAN FISHERIES

The waters around Hokkaido, most northerly islands of Japan, have long yielded big catches oof cod, herring and sardines.

LOOK to a fine future in Canada's Army!

Through its service United Nat contingents an contribution to NATO, the C dian Army plays an impo role in helping preserve w peace. Today there vacancies for young m calibre to join the m Canadian Army on a basis. Those se benefit from first training of both mind body . . . interesting, varied, well-paid work . . . unique opportunities for travel and adventure . . . the constant satisfaction of giving valuable service to their country. If you are between 17 and 23 — single and physically fit — get full details TODAY! Call, phone or mail the attached coupon to your local Army Recruiting Station at the following address:

TORONTO (CP)—Southam Co. Ltd. had net earnings in the nine months ended Sept. 30 of $3,123,956 or $1.04 a share compared with $3,095,955 and $1.03 in the corresponding period last year.

Other figures for the period, with those for the corresponding period last year in brackets, include:

Revenue from operations $29,791,469 ($28,177,357); costs and operating expenses $23,872,848 ($22,333,044); depreciation $780,189 ($836,597); income from investments $588,290 ($670,620); income tax $2,609,000 ($2,529,000); profit on sale of surplus assets and investments $253,030 ($231,792).

THEFT SENTENCE

VERNON (CP)—A 21-year-old Ontario youth Monday was given a two-year suspended sentence on a breaking, entering and theft charge. Donald Grant, 21, admitted with 18-year-old Raymond Herbert breaking into a store Oct. 12. Herbert was remanded for sentence.

How Good Are You on Double Talk?

By HAL BOYLE

NEW YORK (AP) — How good are you at double talk?

You may think you don't use double talk at all. But you do—probably many times every day.

To double talk merely means to say one thing when you actually mean something else.

Here is a partial glossary of double talk phrases—and what they really mean — which you may read or use yourself at almost any time:

"What a pleasant surprise—bumping into you this way!" (If I'd seen you coming, I'd have run the other way.)

"What's new with you?" (Don't tell me. I've got my own troubles.)

"Haven't you put on a little weight, man?" (He must eat from a trough to get that fa.)

"On you i looks good." (It couldn't look funnier if it was on a giraffe.)

"What a cute baby! Please may I hold him." (If the little monster is wet, I'll fling him on the floor.)

"We like to regard this as a team organization." (I call the signals; you get the bruises.)

"Move to the rear of the bus, please. (Then throw yourselves out the back window, for all I care.

"We must get together again real soon." (Soon after the start of the 22nd century.)

PHONE DODGE

"Sure, call me at the office anytime." (And if my secretary tells you I'm in, she'll be looking for a new job.)

"I never saw you looking better in your life." (I wonder if I ever looked that bad.)

"How do you manage to keep so young?" (Gosh, old girl, you're really falling apart fast.)

"Are you sure there isn't anything I can do for you?" (Meanwhile, you do something for me :drop dead.)

"No, I mean it. I think you're a very good dancer." (Get off my feet, you bum.)

"Cross my heart, honey, I'll be on the 6:12 train for sure." (I will if it don't leave until midnight.)

"The boss piled a last-minute job on me. I'll be at the office late." (I will, that is, if every night club in town closes.)

"Whatever gave you the silly idea I married you for your money?" (Whatever gave you the silly idea I didn't?)

It's early yet. Why don't you all stay and have one more for the road?" (What't the matter with these people? Don't they have homes of their own to go o?)

"I enjoyed your last column very much." (Who wrote it for you?)

MARKET TRENDS

NEW YORK (AP)—The stock market continued to decline Tuesday but showed some signs of a renewal of demand which put selected issues ahead on volume.

Aircraft-missile stocks posted plus signs. Some of the major oils and chemicals also were up; but the trend was generally lower for steels, tobaccos, Motors were mixed.

The Dow Jones industrial average fell 1.74 to 697.24.

The Associated Press average of 60 stocks declined .90 to 256.60.

Among Canadian issues, McIntyre Porcupine advanced ¾ and Dome Mines gained ½. Walker Gooderham lost 1 while Distillers Seagrams and International Nickel each dropped ⅝.

Prices on the American exchange moved irregularly upwards. Sapphire Petroleums gained ¼ and Brazilian Traction ⅛. Eureka was up 1-32.

TORONTO (CP) — Industrials staged a late - day rally and speculatives scored impressive gains in moderately heavy trading Tuesday.

Lake Dufault, rose $1 to $5.35 with volume of 162,125 shares on rumors of favorable findings in the second hole bored. Lake Dufault has property in Quebec's Norbeic field.

Wiltsey - Coghlan, which has property adjacent to Dufault and has trailed along behind the latter for the last month, turned over 103,700 shares and was ahead two cents to 19.

Canadian Dyno, lively after a rumor circulated 10 days ago that a rich copper strike had been made east of James Bay, added another 10 cents to $1.75 with turnover of 129,627 shares.

Mt. Wright became active last Thursday, but Thursday dropped 10 cents in profit - taking to $1.45 with volume of 134,381 shares. Murray Mining became active in late afternoon and closed at 97, up a cent, with 190,000 shares.

Federal Farms, which Monday traded more than 19,000 shares, Tuesday slipped ⅛ to 5¾ on news that the company plans to buy a 30 per cent interest in Dale Estates Ltd., contingent on approval by the Toronto Stock Exchange.

Industrial activity featured a $20-loss to $145 by Dominion of Canada General Insurance Co., listed only three days ago. Trading in the stock was light.

Industrials were sparked in the main by gains among steels, foods, refining oils and banks and financial institutions. Widespread fractional wins predominated and trading was generally light.

On index, industrials rose .23 to 595.29 and golds 1.23 to 89.70. Base metals fell 1.06 to 201.09, western oils .89 to 96.60, and the final volume was 3,081,000 shares compared with 2,516,000 Monday.

Base metals were sparked by a strongly resurgent golds group. McIntyre Porcupine, Kerr - Addison, Campbell Red Lake and Dome all advanced as much as $1.25. Hudson Bay Mining and Smelting, Noranda, Quemont and Ventures all dropped fractionally.

Western oil trading was weak with Home B, Great Plains and Dome Petroleum all off a few cents.

MONTREAL (CP) — Prices were generally lower on the Montreal and Canadian Stock Exchanges Tuesday, with papers and base metals leading the decline.

Four of the six official averages were off and declines outnumbered advances by about three to four.

Trading was light in industrials, totalling 123,200 shares, and heavy in mines and junior oils, at 791,500 shares.

Banks were the one section to improve. Royal gained ¾ to 79¾ and Imperial Bank of Commerce ¼ at 68¾.

In the mixed utilities section Bell Telephone fell 1¼ to 56⅛.

Consolidated Paper was again the biggest loser in the slumping papers. Off 1¼, Monday, Consolidated fell a point to 42¾. International Nickel led the downward trend in base metals, falling ¾ to 83¼. Hudson Bay at 51¼ dipped ¼.

Among the industrials, Canada Iron rose 1¼ to 21 after going up to 22, Dominion Engineering fell 1⅞ to 36⅛. Zellers dropped one point to 36 and General Dynamics rose ⅞ to 27.

Bornite rose 1½ cents to 14 cents on a turnover of 220,000 shares to lead mining volume. Tache Lake followed with a gain of two cents to 26 cents on 210,000 shares. Lake Dufault, though inactive, advanced 70 cents to $5.20.

Hollinger dipped ½ to 26½ and Ventures dropped ⅜ to 60½.

In western oils, Royalite rose ¾ to 11¼ on a turnover of 2,725 shares and Pacific Pete eased ¼ to 10⅜.

On index, banks rose 0.13 to 68.50, new high for 1961, utilities were off 0.1 at 143.3, industrials off 0.9 at 326.7, combined off 0.6 at 265.6, papers off 4.2 at 491.1 and golds up 85.97 at 0.62.

1961 Big Year for Dalhousie

HALIFAX (CP) — Dalhousie University, largest in the Maritimes, celebrates its 50th anniversary this year on Studley Campus in southwest Halifax.

The land was first developed in 1802 when an English settler, Sir Alexander Croke, built a large home overlooking a branch of Halifax Harbor and named it Studley Manor after his ancestral home in England.

In 1910 the Dalhousie board of governors purchased the estate from Rev. Robert Murray, grandfather of R. Graham Murray, a present - day professor at the university's law school. Classes began on the new campus the following year.

Studley Manor, destroyed by fire in the 1800s but later rebuilt, was demolished about 14 years ago to make room for a new arts and administration building.

Since classes began at Studley 50 years ago the campus has witnessed a steady growth in facilities so that this year the university was able to handle a record enrolment of 2,200 students.

Among its graduates dalhousie claims one prime minister, R. B. Bennett, more than a score of federal cabinet ministers, at least 10 provincial premiers, more than a dozen college presidents and at least 64 judges.

SOON AVAILABLE

PENTICTON (CP) — Provincial Secretary Black has advised Penticton city council that plans for large community fallout shelters will be made available soon to municipalities in B.C.

The report came up Monday night when council heard a letter from the province advising that Penticton can get $50,000 from the federal government and $25,000 from the province under the winter works program if it builds a $100,000 shelter.

Council had asked the province about the feasibility of building a mass fallout shelter and for plans for such a project.

OUTLIVES INSURANCE

BUFFALO, N.Y. (AP) — George E. Buchheit, 96, got a cheque for $1,022.51 from his insurance company Monday. He outlived his life insurance policy.

CBC Plans Gradual Change To Frequency Modulation

By DON HANRIGHT

OTTAWA (CP) — A huge transformation is in prospect for the Canadian radio broadcasting industry.

It is the gradual abandonment of the present system of standard-band AM radio broadcasting in favor of FM, which is far superior in sound quality.

FM stands for frequency modulation, in which the frequency itself wavers back and forth. AM means amplitude modulation—a rising and falling in the intensity of the broadcast signal.

FM signals can carry only a limited distance but reception is virtually free of interference that affects the longer - range AM broadcasts.

The change to FM may take years. But private broadcasters say it will happen, and even the cautious Board of Broadcast Governors has envisaged it. The CBC has taken a wait-and-see attitude, though it is experimenting.

FAVORED IN EUROPE

FM has already become the favored radio system in Western Europe and it is snowballing in the United States, where 180 new FM radio operating licences were granted last year alone.

Canada has been slow in entering this field. There are only 35 FM stations in Canada — mainly because it is unprofitable at present, due to the lack of people with FM receivers.

Only about 12 per cent of the big metropolitan populations of Toronto, Montreal and Vancouver have FM sets. The figure is lower in smaller areas, though it is growing everywhere.

The number will have to be much bigger before advertisers take to FM enthusiastically. And in private broadcasting at least, they hold the money needed to make FM something more than just an engineer's dream.

Of Canada's 35 FM stations, five belong to the publicly-owned CBC. The three in Montreal, Ottawa and Toronto now are linked in an experimental network. All five stations operate without commercial content of any kind.

The 30 private stations include 20 that simply broadcast AM programs simultaneously on an FM channel, nine that are operated by AM stations but do separate FM programming, and one that does nothing except FM broadcasting.

They have one thing in common: They're all losing money. Twenty-nine of them use AM profits to write off FM losses. The independent station, CHFI-FM Toronto, is seeking an AM licence.

Why do they stay in operation? The most common answer is that an FM licence today is a costly form of insurance. They don't dare give up the licences, for to do so may prevent entry to the FM field in the future when it becomes lucrative. More licences are being sought.

In adversity, the FM stations slowly are building a reputation for high-fidelity radio. Also on their side is the recent development of stereophonic broadcasting, the system whereby two signals are transmitted on the same channel.

FM program calibre now is high, often unrepentantly highbrow. The operators insist at aiming for what one private broadcaster has called "an adult group with money to spend and the intelligence to demand high-quality goods."

Private stations are struggling valiantly to make Bach palatable to a busy housewife and at the same time cater to lovers of light classics and jazz. Behind this approach are surveys showing that most FM listeners are in above-average income brackets.

Private stations voluntarily limit commercials—perhaps as much through necessity as choice—to six minutes an hour on most outlets, compared with the allowable 16 minutes an hour on AM radio. Some stations refuse to use commercial jingles, considering them offensive.

The CBC aims at even higher brows. Its bilingual FM network offers such programming as Vincent d'Indy's Symphony on a French Mountain Air, a talk on "Buddhism in everyday life," and even a way-out hour of "readings of poetry written by French - language Negro poets, with jazz improvisations."

Main concern of the BBG is that commercial pressure may end this sort of thing. At one point the BBG was considering writing special FM regulations but now has given up that idea and is content with licensees' program commitments.

For the engineer, it's the technical difference that counts in FM.

FREE OF STATIC

A simple example of AM's disadvantage can be found in twisting an AM radio dial at night. Dozens of stations can be picked up, one crowding out another. That just doesn't happen on FM, with its signal limited to a radius of about 50 miles.

The explanation is that AM radio has a comparatively low frequency and its signal is reflected off the ionosphere. FM, with a higher frequency, shoots right through the ionosphere and doesn't bounce back to earth, mixed up with other signals. This also explains why the FM signal is mainly a line-of-sight one, like television.

FM is not a gimmick. It has been around as a proven method of broadcasting since the 1930s, although for various reasons it has never been able to get established with the North American public.

One setback was the Second World War. Another was a 1947 international agreement changing the FM frequency range to the present 88 to 108 megacycles from the previous 40 to 50 megacycles, a step that made every existing set at that time obsolete. Since then FM radio has been overshadowed by the explosive growth of television.

Congolese Leaders Cling To Tribal Superstitions

By LYNN HEINZERLING

LEOPOLDVILLE (AP)—Sixteen months of bloodshed, political chaos and near bankruptcy —not to mention millions of dollars—have failed to awaken The Congo to reality.

Congolese leaders still cannot put aside tribal suspicions, pretensions and ideologies long enough to face their real problems as a nation.

The republic's "government of reconciliation" under Premier Cyrille Adoula has failed to reconcile.

The backyard government set up by Antoine Gizenga in Stanleyville, with the help of Communist governments, collapsed and Gizenga joined the Adoula government as vice-premier. He contributed little and has gone back to Stanleyville. Nobody knows when or whether he will return.

The army is still divided, with Gen. Joseph Mobutu commanding in Leopoldville and Gen. Victor Lundula in charge at Stanleyville.

WANTS NEGOTIATIONS

The United Nations has reached a cease-fire agreement in the secessionist province of Katanga, whose rich copper deposits are the country's greatest aset. It is desperately trying to bring President Moise Tshombe of Katanga into negotiations with Adoula.

Both Mobutu and Lundula talk vaguely of taking Katanga with their armies, although the logistic problems alone are far beyond their capabilities.

The Congolese parliament considers its most important order of business is to arrange to chop up the jungle land into still more provinces with diverse tribal urges. There are not enough skilled Congolese to run the central government and administer the present six provinces properly.

The new nation still does not have its own constitution, but is operating under a fundamental law worked out with the former Belgian colonial masters. Parliament is amending this law so that the six provinces laid out arbitrarily by the Belgians can be cut up to accommodate and perpetuate tribal groupings.

The shadow of the first premier, Patrice Lumumba, still lies across The Congo. The tall, flamboyant nationalist leader was slain in Katanga more than eight months ago while being held by Tshombe's government.

LEFTISTS SEEK POWER

Lumumba's top lieutenants—Gizenga, Minister of Interior Christophe Gbenye and chamber President Joseph Kasongo, all leftists—are contending for his mantle. They hope, too, to seize power from Adoula.

Western diplomats, who have watched the whole incredible story unfold in The Congo, believe the Adoula government is the best the country can achieve in the circumstances.

But Lumumbist youth movements are springing up. Communist money is coming into the country to finance trouble, diplomats say.

Anti-white excesses last year started an exodus of Europeans that almost paralyzed the economy and threatened to turn The Congo back to the jungle. They are coming back now—Belgian teachers, businessmen, technicians. The Congo can hardly survive without them.

Adoula must keep The Congo calm and solve the Katanga problem to survive. The central government cannot hope to operate this huge country of 900,000 square miles without a share of Katanga's rich copper profits.

United Nations officials are confident. They expect that preliminary contacts between Katangan emissaries and the central government will be followed by a meeting between Adoula and Tshombe.

TAKES SOBER VIEW

The central government, under great pressure from leftists and Lumumbists, still thinks grandiosely of sending Mobutu's troop to the Katanga border and seizing the recalcitrant province. Mobutu is known to regard such an adventure more soberly.

It was Mobutu, with the backing of President Joseph Kasavubu, who expelled Russians, Czechs and Poles from the country last year after they openly supplied war materials to maintain Lumumba in power.

Mobutu's forces do not have the equipment or the supplies for a drive to Katanga. Although the United Nations might regard such an action as a legitimate police manoeuvre of the central government, it would be bound to prevent civil war.

Mobutu and members of the central government know that a defeat or even a long stalemate could mean the end of the government. The time would then be ripe for a take-over by the extremist Lumumbists.

U.K. Defence Minister Poses New Reasons For Russ Blasts

LONDON (Reuters) —British Defence Minister Harold Watkinson Tuesday interprted the latest series of Soviet nuclear tests as a sign that the Russians "have realized they are behind the Americans in the development of nuclear weapons."

Watkinson, speaking in the House of Commons, said preliminary estimates of Monday's big Soviet blast suggested that it had a yield "of the order of 30 megatons"—the equivalent of 30,000,000 tons of TNT.

He said a close watch was being kept on any increase in radioactivity in Britain as a result of the Soviet tests. The main problem was radioactive iodine, which could contaminate milk, he said.

"The government has made plans to meet the situation which may arise if there is an increase in the level of radioactive iodine in milk beyond that considered tolerable by the Medical Research Council," he said.

"Arrangements are being made to ensure that if iodine 131 in liquid milk reaches a danger level for infants up to one year old, alternative forms of milk can immediately be made available for the necessary period.

"It is not expected that the level will be such that other children or adults will be at risk," he said.

Leaders of All Nations Shocked by Bomb Crash

LONDON (CP)—Government leaders, scientists and newspapers in nations outside the Communist bloc expressed shock and horror Tuesday at the enormous Soviet hydrogen bomb detonated in the Arctic.

The strongest condemnation of the 30- to 50-megaton blast set off Monday were registered in Japan and western Europe. And India's Prime Minister Nehru said he was "deeply pained and shocked."

The Soviet government did not report detonation of the bomb, and there was no word about it in the Moscow press. Japanese are alarmed by a warning from experts there that highly radioactive rain and dust from the blast would reach their shores around Friday.

The Tokyo government called a conference of scientists to decide whether the expected levels of radiation would be harmful to humans. The experts sought ways of coping with water and vegetable contamination.

"Japan has been protesting the Soviet tests. If it is true that a 50-megaton bomb was exploded, it is an outrage trampling on our fervent pleas," chief cabinet secretary Masayoshi Ohira said.

DEBATES RESOLUTION

The Norwegian Parliament was debating a proposed resolution protesting Soviet atmospheric tests when word of the mammoth blast was received. A Socialist deputy termed "the Soviet explosion an "abominable" act and recommended the resolution be amended to make it stronger. But the original resolution was adopted when other legislators contended that any delay might be considered weakness.

Newspapers in Scandinavia grimly noted that the atmosphere had received the largest single dose of radioactivity to date.

Nehru declared that "such tests not only contaminate the atmosphere but pollute the hearts and minds of people everywhere."

"How can peace be established if the big powers continue their armaments race?" he asked.

He called for a moratorium on all nuclear tests until the great powers reached agreement on a permanent test ban.

In Ottawa Prime Minister Diefenbaker expressed "deep concern over the . . . contemptuous attitude of the U.S.S.R. in poisoning the atmosphere and thereby bringing danger to millions and millions of innocent people everywhere in the world."

INVADE EMBASSY GROUNDS

In Copenhagen, about 50 demonstrators invaded the grounds of the Soviet Embassy Monday night and staged a sit-down protest against the new explosion. Police had to lift and carry them away.

Outside the embassy grounds, another group of about 100 demonstrators paraded with placards denouncing the explosions.

In Britain, the deputy leader of the opposition Labor party, George Brown, said that if the Russians had exploded a 50-megaton bomb it was an "immoral, shocking and horrible thing."

British newspapers denounced the blast as a wanton act of terrorism.

"It will arouse loathing throughout the earth, rather than fear of Russia's might," said The Daily Herald.

The Manchester Guardian warned:

"Though American restraint in the last few weeks has been admirable, the time must quickly be approaching when the United States will consider itself to be in an intolerable disadvantage in the testing of nuclear weapons."

Prime Minister Robert G. Menzies told the Australian House of Representatives the Soviet explosion was designed to terrorize the people of the world. He said Premier Khrushchev was not concerned if the health of thousands of people was damaged by fallout from the bomb.

SUSPENDED SENTENCE

KAMLOOPS (CP) — Alfred Maxwell Collison of Smithers Monday was given a suspended sentence with two years probation when he pleaded guilty to a public mischief charge. Police said he agreed to an arrangement whereby he would hold a lantern and be shot in the left shoulder from close range with a pistol. No reason for the Sept. 27 shooting was given.

Radioactive Fallout Backfires on Russia

By HARRY KELLY

WASHINGTON (AP)—The Soviet Union is getting a backfire of radioactive fallout from its mammoth nuclear explosion, U.S. weather bureau scientists reported.

They said the fallout was carried on winds blowing south to southeast over Russia.

The massive blast, triggered Monday in the atmosphere over the Novaya Zemlya region in the Arctic, may have been the 50-megaton explosion that Soviet Premier Khrushchev announced the Russians would test. But the U.S. Atomic Energy Commission said it doubts that the detonation was that big.

The AEC said the blast's yield "was very high, possibly as high as 50 megatons." But it added that preliminary analysis "indicates it was more probably on the order of 30 megatons."

There has been no word from Russia on the explosion.

But either size, it was the biggest man - made explosion in history. A 30 - megaton bomb releases energy equivalent to 30,000,000 tons of TNT. It would carry more punch than all the previously announced 21 tests in the current Russian series. The largest previous Soviet test was estimated at about 10 megatons. The biggest U.S. nuclear test has been reported at 15 to 20 megatons.

RUSSIA GETS FALLOUT

Robert List, chief of the U.S. weather bureau's atmospheric radioactivity project, said Russia "would get more of the immediate fallout" from the explosion than other areas.

Since it was likely the bomb was fired high in the atmosphere, List said only a small fraction of the fallout would sift down immediately.

But considering the size of blast, said List, the amount of radioactive debris blowing over Russia would be appreciable.

The scientists were physicist Ralph Lapp, who worked on the project that produced the first atomic bomb, and Nobel prize-winning chemist Dr. Harold C. Urey.

However, Urey added in a New York television interview that the fallout will be "unpleasant but not critical — not at all." He did no elaborate.

It was a notable day generally in the records of bombs missiles:

1. The Soviet Union also fired an underwater nuclear blast of low yield about two hours after the big explosion in the atmosphere. Washington officials said it obviously was a trial of an anti - submarine warfare weapon.

2. The U.S. Navy shot an advanced A-2 Polaris from a submarine for the first time. The missile travelled 1,000 miles down range from 90 feet beneath the Atlantic's surface and about 50 miles southeast of Cape Canaveral, Fla.

3. Russia claimed it had developed a defence against rockets — but did not specify what type of rockets.

4. The Soviet news agency Tass said Russia fired a multi-stage rocket 7,500 miles into the central Pacific Sunday with what Tass called "a high degree of accuracy." It was the sixth shot announced in the series.

Carss Jackshirts

These come in red, blue and green checks as well as plain red, yellow and green.

The 100% all-wool cloth in these garments has been specially treated by a shower - proofing process.

People who know quality and value have chosen Carss for over 60 years.
