NICOLA'S FOUR C's

ADVANTAGES OF NICOLA DISTRICT DUE TO VARIED RESOURCES.

Climate, Crops, Coal and Copper, a Unique Combination in Which Future Possibilities of the District Lie.

There are few districts in this province which can vie with that of Nicola in the matter of climate and varied resources both mineral and agricultural. That there are enormous possibilities before this district no one who has studied the subject and gone over the ground, will deny, but for these possibilities to be realized, a few things are requisite and necessary. One of these is transportation and this so far as a railroad is concerned is settled and for the shipment of produce of any kind, so far as certain sections of the district are concerned, it can be used for this purpose now and has been for some time, but it will probably be a few months yet, before the railroad will tap all parts of the district as far as Aspen Grove. In addition to the railroad, good wagon roads tributary to it are also necessary for the hauling in of machinery and freight. Nowhere will this be more necessary than in Aspen Grove and Ten Mile where the handling of heavy pieces of machinery for use in the mines would be an absurdity over some of the present trails.

Of equal if not greater importance towards the realization of the possibilities of the district is the temperament of the residents, and their attitude towards the district itself. Capital may interest itself in its resources and railroads may build, opening up new districts but if the residents are pessimistic as regards the future of their locality, it is very hard for the locality to go ahead as it should. While it is well to be conservative as regards one's opinions of the future possibilities of the district, local residents should be the very last to throw cold water on any scheme which has for its ultimate aim the good and prosperity of the district.

While some pin their faith to the coal deposits, others to the copper and other mineral resources, and others again to the farming and agricultural possibilities, it can surely be seen that the success of the district does not lie in one individually but in a combination of these, and it is just this combination that gives the Nicola district the palm over many much advertised localities, which have nothing like these advantages.

It is for the readers of The Nicola Herald to think thls matter over carefully, and if they once realize that they have one of the finest districts in the province to back them, the rest is easy. What has built up the large cities and towns of the Pacific Slope? What made the name of the Okanagan Valley a synonym for fruit, sunshine and health? What is making Vancouver one of the first cities in the Dominion? Nothing, but the fact that coupled with its natural advantages the inhabitants of each place havean abiding faith in their locality and do their best by advertising and other means to bring these advantages before the outsider. It is to be remembered too, that in some cases there were no natural advantages to speak of and the only thing that told was the dogged pertinacity of the inhabitants who believed in their city.

There is no reason why the Nicola district should be behind hand in advertising its advantages. That it has them there is no gainsaying and if the inhabitants of the district like they can very soon bring a large influx of popnlation to this district, which is one of the first things desired.

ASTRONOMICAL SURVEY.

The long series of astronomical observations necessary to fix the boundry line between Canada and Alaska have now been completed by Dr. Klotz, F. R. A. S. the distinguished astronomer of the Department of the Interior who has been engaged for the last month at Brocton Point on his work.

The observations have beed carried on simultaneously with those of Mr. McDiarmid the observer at Boundary, a station about ninety miles west of Dawson as close as possible to the anticipated line of the 141st Meridian. The two series of observations will now be subjected to a process of calculation, which will disclose not only the longitude of Boundary but also the possible limit of error. The systematic longitude work of Canada was inaugurated by Dr. Klotz in 1885 and the determinations which have deen made since that time, rank with the best examples of such work in any part of the world while to the experts of other nations the Canadian methods are models of convenience and accuracy.

Hunting in Nicola.

The season is still young and the bags of those who have already tried the shooting have been small. The change in the weather will however make some difference for the better more especially as regards duck shooting. Hunters from the outside are beginning to come in and doubtless will get their fill before they leave. The end of this month should see the hunting at its best as there are sure to be plenty of ducks by that time, and those lucky enough may get a pot at the geese on their way south.

Everyone Works In Our House.

In a letter to the Liverpool Daily Post-Mercury, Miss Bert, who has just returned from a trip across Canada, warns everyone going to the Dominion that it is no place for those born tired. All work in Canada, she says, from the president of the C.P.R. down.

LOCAL NEWS.

Dr. Ker, railway medical officer was in Nicola today.

Frank Bailey of Hedley was a visitor to Nicola last week.

B. Osen and Alex McPhaul of Aspen Grove were visitors to Nicola this week.

Messrs. Lodwig and Guthrie returned this week fromRevelstoke and went out to Otter Valley.

It is reported that a handsome addition will soon be made to the places of business in Nicola.

W. R. Maxwell C. P. R. agent at Spences Bridge has been promoted and will act as agent at New Westminister.

Billy Swakin was fined $20 and costs on Tuesday of last week at Hedley for being drunk on thg Chu-chu-way reserve with liquor in his possession.

Mrs. Maxwell of Spences Bridge accompained by her sister-in-iaw Nurse Maxwell were is Nicola today, and will leave shortly for New Westminster.

A meeting of the executive committee of the Nicola Athletic Association will be held in the Bank Cottage on Tuesday evening the 18th inst. at 7.30 o'clock. A full attendance of the committee is requested.

CAMBRIDGE WINS

LIGHT BLUES BEAT HARVARD. SUCCESS DUE TO TRAINING.

Well Known Lecturer Will Give Experience "Eleven Years Among Indians of Northern B. C. and Alaska."

The race between crews representing Cambridge and Harvard Universities took place last week, at Putney England. The two boats got off to an admirable start the light blues immediately after showing to the front. At the one mile post Cambridge was leading by over a length and this was increased to over two lengths in the next half-mile. Harvard tried hard to reduce the advantage gained by their opponents but it was no avail Cambridge winning by two lengths in 19 minutes and 16 seconds.

Experts say there is but one explanation for the result, that of the superiority of English oarsmanship and of the English stroke. Harvard, they declare, was one of the finest crews physically, ever seen on the river, but they were unable to overcome the training which English oarsmen receive from childhood. The Cambridge crew in addition had Stuart one of the best strokes an English university has produced. In the evening the crews dined together and many distinguished guests were present.

Well Worth Hearing.

Rev. S. S. Osterhout, Ph. D., of Kamloops, who is chairman of the District Conference of the Methodist Church, will deliver an interesting lecture on "Eleven Years Among the Indians of Northern B. C. and Alaska." The lecture will be given in the Presbyterian church Nicola on Friday September 14th, at 8 p. m., and in the Methodist Church, Lower Nicola on Saturday, September 15th, at 8 p. m.

Rev. S. S. Osterhout has a well deserved reputation as an able lecturer and we advise everyone who can possibly attend to do so. On Sunday, September 16th, Dr. Osterhout will preach as follows: Lower Nicola at 11 a. m. and 3 p. m., and at Nicola in the evening at 7:30 o'clock.

Australian Duties.

Canada will be the chief country affected by the increased duties on agricultural implements, the duties being increased in many cases 25 per cent. Very few orders are going forward for agricultural machinery except from Australian branches of over-sea manufacturing houses. Owing to premature disclosures, the government has determined to increase the duties from seven and a half to twelve per cent above the rates hitherto ruling on agricultural machinery.

RICH PEACE RIVER COUNTRY.

The Dominion Government exploration party, which has returned to Edmonton after a two years campaign in the Peace River country, brings a story of gold discovery which bears every indication of being the biggest thing ever struck on this side of the divide. Crude assays made with improvised mortar, quick silver and nitric acid, indicated values running all the way from $7.50 to $32 a ton. A. J. Macdonnell, leader of the party brought out several sacks of rock, which he is taking to Ottawa to have subjected to an accurate laboratory test. Mr. Macdonnell describes the dyke as being eight miles in length, as far as the explorers were able to learn, and he believes that it extends back to the old river bank at the foot of the hill, in half-moon fashion, at a width of nearly 5,000 feet. It ranges in thickness from 50 to 200 feet, with gravel above and below. The rock is very soft, crumbles freely in the hand. The theory is that it was a silt deposit which hardened.

The mission of the explorers was the selection of 4,500,000 acres of land, which the Province of British Columbia owes to the Dominion Government. Their work kept them in the neighborhood of Peace River for many months. In April of this year they made the discovery. They found that a large dyke of sedimentary slate situated below Fort John, 17 miles on the British Columbia side of the Provincial boundary, was gold-bearing. An immediate stampede followed. The members of the exploration party, headed by Mr. Macdonnell located seventeen claims along the river, where the dyke out-crops. Members of the Mounted Police party, who are putting the Peace River road through to Atlin, also located claims. Mr. Macdonnell believes that the discovery outrivals the Rand.

Information regarding this gold bearing dyke was in the hands of the provincial department last spring, but it was thought advisible to dispatch mineralogists to the scene before making the news public. Prof. Robertson has accordingly been there all this summer. The location of the shale deposit is shown in one of Dawson's reports of twenty years ago.

An important point to remember in connection with the discovery, is that while the Dominion owns three million and a half acres in this valley, this does not affect the rights of the Province, which has control of all the precious metals. There is plenty of timber and coal in the neighbourhood so that all facilities are present for making a great gold field, should the accuracy of the report be establishhd. News is expected daily from Prof. Robertson.

The Golden Sovereign.

L. Hibbert of Montreal, who is interested in the Golden Sovereign copper property paid a visit last week to this section and made a trip to Aspen Grove.

He made an inspection of the Golden Sovereign while there and was well pleased with the development work already done on the property. After a brief stay in Coutlee, Mr. Hibbert accompanied by John P. McConnell left for Vancouver. It is the intention of the owners to at once commence extensive operations on the Golden Sovereign and it is mainly with a view to this that a visit to the coast is being made.

Cloudburst on Howe Sound

A very heavy cloudburt was reported on Howe Sound last Friday night. Several houses were overturned by the sudden rush of waters at Brittania. No one was hurt. The water on Saturday lay twelve feet deep on the Squamish Valley road and people were traveling over it in canoes instead of wagons.

RAILWAY ADVANCE

CONTRACTORS PUSHING WORK ON. MORE MEN COMING IN.

Sir Thomas Shaughnessy May Pay a Visit to This Section—Line Completed to Nicola Early in November.

There is evidently an intention on the part of the contractors to push the work on the railroad to an early finish so far as regards Nicola. Men are being brought uq on almost every train and yesterday about seventy meu came up, and were distributed over the various camps. J. A. Macdonell the head of the contracting firm made a short visit over the completed line this week, and inspected the progress made.

The fencing gang are within two miles of Coutlee now and the ballasting of the already laid track is well forward. Track laying on part of the grade bejween the Forks and Nicola may be expected to begin very shortly, and there is every reason to believe that the whistle of the locomotive will be heard in Nicola early next month.

As regards the completion of the line to Nicola the date already given in these colums early in November will see the practically completed and long looked for line to Nicola. There is a probability of Sir Thomas Shaughnessy paying this district a visit in the near future if his engagements permit, and there is every ikelihood of him inspecting part of the line at least on his next western tour.

The engineering party under H. Carry are now at Aspen Grove and will shortly have finished the survey of the location line as far as W. A. Dodd's ranch. There is an element of uncertainty as to future movements of the survey party but we are advised on fairly good authority that a preliminary survey will be made from Aspen Grove to some point near Princeton.

It is very evident that the C. P. R. intend carrying out their plan of being the first railroad in the Similkameen, and from the progress already made, we may be sure that this will prove no idle boast.

The Origin of "Bridge."

Some twenty years ago, when the game of bridge was unknown in London clubs, two families, who played the game under the name of "Russian Whist," were living in neighboring houses, near Great Dalby in Leicestershire, England. They were in the habit of visiting each others's houses on alternate evenings to play this fascinating game, and the only road of communication between the houses lay over a broken down and somewhat dangerous bridge, which was very awkward to cross in the dark. It was a frequent occurrence for the departing guests to say to their host, "Thank goodness, it is your bridge tomorrow," meaning that the other party would have to cross the dangerous bridge the next night. Hence is said to have arisen the title of "bridge."

Quebec Bridge.

There will be 66,000,000 pounds of steel in the Quebec bridge, which when completed will be the largest bridge in the world. it will be ready for traffic next year. From the water to the top of the centre span of the bridge the height will be 410 feet In the work of construction an electric crane standing 300 feet high is used. This is the largest crane ever built.

James Corbett of Aspen Grove was a visitor in Nicola yesterday.

THE NICOLA HERALD

NICOLA, B. C. SEPTEMBER 13, 1906

EDITORIAL NOTES.

The Nicola Herald is in receipt of a handsome brochure from the pen of the well known journalist Percy F. Godenrath. The publication is entitled "Canada's National Playground" and is a guide and souvenir of Banff and the tourist resorts of the Rocky and Selkirk mountains. The publication is worthy of commendation and reflects great credit on its compiler.

Hon. James Dunsmuir, lieutenant-governor of British Columbia, has offered to give $10,000 as a donation to a Provincial sanitarium for incipient consumptives, provided the committee now working on the project are successful in raising $50,000 for the building and equipment. This announcement was made last week at a meeting held in Vancouver in the interest of the sanitarium.

An exchange has the following: To run a newspaper without occasionally publishing an item that is wrong or gives offence to some one is like running a railroad without having accidents or smash-ups. To do so is a physical impossibility. No man on earth is to so great an extent constantly at the mercy of both friends and enemies as the editor of a newspaper. Pushed continually with work' he must get the most of information concerning transpiring events second or third hand or not at all. Frequently statements are received from supposedly trustworthy sources which are subsequently found to be without foundation. Not one editor in a thousand wilfully injures either friend or foe by misrepresention.

The Dominion parliament will probably be called for Thursday, November 15th, which will permit of at least a month's sitting before the Christmas vacation, which will be of not more than three weeks duration. The government has promised an early discussion of their scheme of tariff revision. After the speech from the throne has been discussed, the most important features of the session will be the departmental estimates, revision of the Electoral Act, amendment of the Insurance Act, and the readjustment of the provincial subsidies, in case the government accedes to the demand. The minister of finance, the minister of customs and the minister of marine and fisheries are now at work on the revision of the tariff, assisted by John Bain, secretary of the Tariff Commission. The sub-committee to meet the provincial premiers on the subsidy question will probably consist of Sir Wilfrid Laurier and the ministers of finance, customs, marine and fisheries, and justice.

Four Years For Agent Hobbs.

David M. Hobbs, the C. P. R. Customs agent at Montreal, who was recently found guilty of defrauding the company of $60,000, has been sentenced to four years in the penitentiary. Hobbs was traced for months by a corps of detectives, and finally located in New York city.

NEW U. S. ARMY BULLET.

It would seem that in the type of bullet about to be adopted by the United States army there is a potent argument for peace. This bullet is a third lighter than any now in use, but it is far more deadly. Its penetrating power is such that at the distance of a mile it would pass through fifteen men, if these had the mischance to stand in front of it. At short range it will go through 39 inches of seasoned oak. At 500 yards thirty two inches of white pine fail to stop it, and at 1,000 yards it pierces fourteen and a half inches. The day when safety lies in dodging behind a tree seems to be passing

The strong point about the new bullet is its flat trajectory.

With those at present in army use, fired at a target 1,000 yards distant, one could stand with perfect immunity at many points between the muzzle and the target, as at 500 yards the missle would pass fifteen feet over his head. The new bullet shows only a ten foot rise at this distance. Almost the entire space between muzzle and target would be a zone of danger.

NOTICE

Thirty days from date I intend to apply to the chief commissioner of lands and works for a license to cut and remove timber from the following described land. Beginning at a post about one mile west of Spious creek in the Nicola division of Yale district marked Andrew McGoran's N W. corner and joining a stake on Dominion survey marked 9-13-23 and following along Dominion survey south 80 chains, east 80 chains, north 80 chains, west 80 chains to point of beginning, 640 acres

Beginning at the S W corner of above location and following Dominion survey S 80 chains E 80 chains, N 80 chains, W 80 chains to point of beginning. 640 acres.

Sept. 10, 1906. ANDREW MCGORAN, Locator.
J. E. Shivel, Agent

NOTICE

Thirty days from date I intend to apply to the chief commissioner of Lands and Works for a license to cut and remove timber from the following described land. Beginning at a post on east bank of Spious creek about eight miles from mouth of creek and about three miles N W of Siwash Meadows in Nicola division of Yale and running N 60 chains, E 80 chains, S 80 chains, W 80 chains, to point of beginning. 640 acres.

Beginning at S W corner of above location and running N 80 chains, E 80 chains, S 80 chains, W 80 chains to point of beginning, 640 acres.

FRENZIED FINANCE.

A Philadelphia Concern Defrauds Depositors Wholesale.

Charged with having defrauded the depositors of the Real Estate Trust Company of Philadelphia out of many million dollars, Adolph Segal, a promoter of many enterprises; William F. North, the treasurer of the Trust Company. and Marshall C. Collingwood, Assistant treasurer, were arrested last Thursday at the instance of District Attorney Bell, who has spent nearly a week in investigating the affairs of the wrecked institution.

Segal was held in $25,000 bail, and the two Trust Company officers in $10,000 each. They entered bonds and were given a hearing on Thursday.

President Hupple's plaintive cry from his grave, "Segal got all," has aroused the depositors to a high pitch of indignation. Lawyers representing many hundreds of them are taking an active part in the investigation of the affairs of the Company and facts are coming to light almost hourly revealing new forms of duplicity on the part of the men entrusted with the depositors, money and the trust funds of large and small estates. Investigation shows that the looting of the Trust Company will cost the Presbyterians less than $100,000. The leaders of that church are congratulating themselves that their funds and deposits were low at the time.

To determine the responsibility of the directors of the wrecked Real Estate Trust Company, the affairs of which have afforded sensations for over a week, State Banking Commissioner Berkey has appointed as special Bank Examiners Charles M. Vollum and Meyer Goldsmith expert registered accountants, who with the consent of Receiver Earle, will begin a through examination to narrow of the assets and liabilities of the concern. Receiver Earle after a consultation with the directors to day issued a statement that he hopes soon to reopen its doors and that all depositors will be protected Mr. Earle says the directors have responded to his solicitations to help reorganize the Company. He would not state what amount of money they have guaranteed.

To Bridge Seymour Naarows.

Interviewed at the coast regarding the question of bridging Seymour Narrows, Hon William Templeman said: "Four months ago the minister of railways and canals authorised H. P. Bell the engineer, well known to Victorians to prepare a report and an estimate of cost on the construction of a railway bridge between the head of Bute Inlet on the Mainland and Vancouver Island crossing Seymour Narrows. Mr Bell has been continously engaged upon this task and before I left Ottawa he informed me that the report would be ready for submission to the minister of railways and canals in a fortnight. He did not make a special survey for the purpose of the report, but from data in his possession and that of the department he feels that he can make a satisfactory report. Necessarily the cost of such an undertaking would be large, seven or eight bridges being required at a high elevation for railway purposes. According to Mr. Bell's view, the main bridge would have to be a suspension bridge. When the report is presented to the minister of railways and canals a copy will be forwarded to the Victoria board of trade at whose request it is being prepared.

The Brothier Case.

The Vancouver Daily World in its issue of Tuesday has the following: Desire Brothier appeared before Judge Henderson this morning and changed his election, asking for a speedy trial, and on Thussday he will again appear and a day for trial will be set. D. G. Macdonell, Brothier's counsel, appeared and wished the trial to proceed at once, but as no counsel was present to represent the the crown, Judge Henderson decided to wait until Thursday to fix a day for trial. Chief Constable Campbell stated that he would be unable to get witnesses by Thursday, and the trial will probably commence next Monday.

John Bowron Dead

The death occurred at the family residence No 40 Fernwood road Victoria, Friday evening, of John Bowron the well known Cariboo pioneer. Deceased had a most interesting career being for 35 years gold commissioner for Cariboo A widow, three daughters and two sons mourn his loss The funeral announcement will be made later.

E. Shivel's E. line, described as follows: Commencing at a post marked R.H.W., S.E. corner, thence north 80 chains, thence east 40 chains, thence south 80 chains, thence west 40 chains, to point of commencement.

Aug. 22, 1906. R. H. WINNY.

BIRTH.

FRASER.—At Nicola, B. C., on Thursday, September 6th, 1906, to Mr. and Mrs. Ric. A. Fraser, of a daughter.

LOCAL NOTES

S. Kirby of Quilchena was a visitor to Nicola on Tuesday.

H. S. Cleasby, J. P., of Coutlee was in Nicola on Tuesday.

Captain Flick of Lower Nicola was a visitor in Nicola on Monday.

Miss Wey of Vancouver who has been visiting in Nicola left yesterday for the coast.

Remember the lecture at Nicola Friday evening, at Lower Nicola Saturday evening.

R. C. Campbell-Johnston and family moved into the residence of J. Shivel at Forksdale.

A. R. Carrington, general merchant, is on a business trip to Aspen Grove and Otter valley.

Mrs. Joseph Marshall returned last Thursday to Forksdale after a visit with friends up the Coldwater.

J. A. Lundy, who for some time conducted the Otter Flat Hotel, left for Otter Valley on Friday's stage.

Joseph Guichon of Quilchena, accompanied by Mrs. and Miss Maggie Guichon were visitors to Nicola and Mammette lake this week.

R. B. Skinner of Vancouver, arrived in Coutlee on yesterday's train. He intends paying a visit to the Bear creek mines before returning.

R. P. McLennan, of McLennan, McFeely Co., arrived in the valley yesterday. He will spend a few days in the district and will visit Bear creek.

M. L. Grimmett barrister and solicitor arrived from Sandon last week and has opened up a law office in Nicola. Mrs. Grimmett and family will arrive ater.

A Special school meeting was held in the school house last Saturday and the sum of $110 voted for salary and incidential expenses from June 30th to Dec. 31st 1907.

Rev. Mr. Chalmers of Clinton has been the guest of Rev. and Mrs. Allan for the past week. Mr. Chalmers conducted the service in the Presbyterian church last Sunday.

Mrs. Thompson accompanied by her niece, Miss Biggar of Hamilton, Ont., left yesterday for the east. Miss Biggar has been visiting with Mr. and Mrs. A. E. Howse at "Pinehurst" for several weeks.

J. N. Moore of Beaver ranch accompanied by Mrs. Moore were in Nicola this week. With them were a party of relatives from Victoria who are visiting at Beaver ranch: Mr. and Mrs. Wm. Moore, B. Moore and A. Whittaker.

Mayor Gordon of Kamloops and Gus. Gowan of the firm of Lea & Gowan gents furnishers, Victoria, were iu Nicola yesterday on their way to Coutlee. They spent a few days at Minnie lake shooting, and will remain a few days around Mamette lake proceeding to Kamloops via Savona.

C. B. Sword fisheries inspector New-Westminser and J. T. Edwards of Kamloops were in Nicola Valley this week and investigated the different streams. Fish traps were reported in the Nicola river near Shulus and they made a trip to that section. They will spend several days in the valley.

J. G. Murray returned on Friday's stage to Otter Valley.

The regular meeting of Court Nicola A. O. F. will be held tomorrow evening.

C. F. Law passed through Coutlee Tuesday on his way to the Bear creek mines.

J. W. Bell, M. E., returned on Tuesday's stage to Spences Bridge en route for Montreal.

Moving On.

A striking tribune to the progress and prospects of the Nicola district is found in the announcement that Mr. M. L. Grimmett, the well known and highly respected barrister of Sandon, has removed to Nicola, and will in future practise there. Mr. Grimmett is a man who can be trusted.
