LOCAL JOTTINGS

For Tracing Cloth go to the R. Boyd Young Co.

The steamer Native returned from a trip Friday afternoon.

The Princess May went south Friday morning at 10 o'clock and had a full list of passengers.

A last report from the outside world states that copper has dropped to 8 cents per pound.

The steamer Vadso entered on Friday evening late, and after unloading coal all night left for the north.

R. O. Jennings and John Milligan have gone to Swamp Point, Portland Canal, to do assessment work.

Judge Young left on the May for Victoria, where he expects to remain for a month, and then return here for court again.

Geo. Matheson and Ed. Murphy have gone down to Prince Rupert and from there they will go over to Porcher island on a prospect trip.

Miss Johnson of the Metlakatly Mission, came up on the Native Monday last, bringing a sick Home girl as a patient to she hospital hero.

The D. G. S. Falcon left Essington a few days ago for Vancouver. It is supposed the Falcon will run all winter, cruising beyond Queen Charlotte sound.

Thursday afternoon the Lottie N. was seen passing the entrance to the harbor towing a large boom of logs for the Seal Harbor mill near Prince Rupert.

The D. G. S. Kestrel was in at the beginning of the week awaiting the arrival of the mail steamer here from the south. She left Tuesday morning for a cruise coastwise.

Mayor Rudge is much missed from the social and political circles here, and it is learned with regret that before returning he contemplates a trip with his family to his old home in New Brunswick.

Everyone interested in the coming concert in connection with the exhibition to be held on the 31st, will be pleased to hear that Mr. Richards of the Hotel Northern, is on the program for a vocal solo.

Mr. William Millar returned recently from a trip in bonny Scotland, where he has been for a year enjoying life in the old country. Evidently Scotland is all right in its way, but does not weigh much when Mr. Millar prefers the west once more.

It is reported that all the cheques given out lately by the Brown-Alaska company at Maple Bay, Portlanal Canal, have been dishonored at the bank and that the traders here, who are out a good deal on this account, have put the matter in the hands of the law.

By the last trip of the Princess Royal from the north a party of fifteen prospectors arrived from Atlin with the intention of catching the Amur here and going to Skidegate. The Amur, however, called at that point on the up trip, leaving the Atlinites stranded here—and to look out for the next best chance.

The first ladies to visit our office since the North Coast came into existence were in on Wednesday last in the persons of Mrs. Capt. Magar and Mrs. Capt. Watson, chaperoned by Mr. Jennings. The intricacies of printing were too much for them, but they tried hard to learn. Ladies, there is nothing dangerous about a print shop, don't be bashful.

Miss E. I. Knox, lady superintendent of the Port Simpson general hospital, returned last Monday by the Princess May after a vacation of three months on a tour throughout Europe. Miss Knox is looking much better after her trip, and everyone is pleased to welcome her back again. During her long absence the hospital has been without a trained nurse and under the management of three probation nurses. This, indeed, seems a poor arrangement, when all this time there has been a trained nurse in town available, but idle. At the next meeting of the hospital board this question will be brought up, and no doubt the board will arrange for the appointment of government nuoses to oversee the institution, instead of probationers paid by the Methodist Mission Society of Canada.

Empress of China Sinks at Wharf in Vancouver—Big Smelter to Be Built—Other Items of Interest by Special Wire.

(The North Coast Special Service)

VANCOUVER, Oct. 26.—While at the dock on Wednesday evening last, the Empress of China sank. The theory of the disaster is that the sea-cock, which takes water to the condenser, was left open while loading, and an inrush of water caused the vessel to sink to a point where the water flowed through an open deadlight in the quarters of the Chinese crew. All night a salvage steamer worked on the vessel, which was raised Friduy.

VANCOUVER, Oct. 26.—Frank Watson has bonded the Gold Peak group of mineral claims on Moresby island to Trethway Bros. for $10,000.

VICTORIA, Oct. 26.—The Provincial legislature will meet on January 16th.

VICTORIA, Oct. 26.—A smelter costing $140,000 will be built at Uclucklecut harbor in connection with the copper mines owned by the Southern Cross Mining company.

Mr. M. I. Stewart, who is in town on business, reports the Stewart group of mineral claims at the head of Portland Canal, bonded to a New York firm for $220,000. Work will best arted early in the spring on these claims by their new owners, when a good turnover should result, judging from the rich showings of native silver and gold values. Mr. Stewart intends leaving for New York shortly.

Mr. C. W. D. Clifford, ex-M. P. for Skeena, has arrived at Victoria from England, accompanied by Mrs. Clifford. Miss Clifford remained in England for the purpose of attending school. Mr. Clifford says that in England he found a growing interest in British Columbia and thinks there should be an increasing number coming to the province. Mr. Clifford will shortly visit the north.

Mr. Little came up on the Camosun from the Claxton cannery for a final treatment on his hand, which was so badly mutilated last spring while working at the machinery in the cannery, and which kept him in the hospital here for the greater part of the summer. Mr. Little said good-bye to his friends here and then returned by the same steamer to spend the winter in Vancouver.

Wellington Claw, one of the oldest of the Simpseans, and first convert of Rev. Mr. Duncan, is becoming more famous every day. Last week the old man pulled dewn his old shack and commenced the erection of a new dwelling on the premises when he was stopped by the representative of the Hudson's Bay Co. here, who claims that the company's property extends beyond what old man Claw considers his lawful possession. As a result the Indians are in an uproar over the affair and it is believed the argument will be settled in council.

Hotel Arrivals.

Arrivals the past week at the Hotel Northern were: W. Ellis, Skeena; S. Boys, G. S. Mayer, Vancouver; W. J. McKee, Atlin; J. C. Calhoun, Victoria; W. H. Vickers, Prince Rupert; J. Lehan, J. Little, Vancouver; W. B. Stephens, Georgetown; R. J. Bond, Portland, Ore.; W. C. Stewart, J. Flydden, Stewart City; T. Coulter, Ketchikan; J. L. Van Valkenburg, Discovery, B. C.

AS TO OUR WHARF.

A Correspondent Grows Effusive and Wants a Few Changes, Also Wants a Letter Box, Electric Lights, Porters, Etc.

I wrote an article for this paper the other evening, and, of course, like everything else I do, I showed it to the old man. What an article that was! judged by the amount of polishing it got, it was one of the best ever written. There was a good deal of poetry and pathos in it; just the kind that makes your maiden aunt give that peculiar smile of hers and calls forth the remark, "What a sweet creature he must be!" Whenever you hear your aunt use this expression you may be sure her emotions have been stirred to their deepest depths. I thought I should have knocked the old man off his feet by the eloquence of my pen. There was a lot in it about the setting sun and golden pathways and burnished waves and shimmering light, and soft shadows and sun-kissed peaks, something after the style of the old masters. But what do you think the old man said? He did not snuff copiously, or use his pocket handkerchief, like Uncle Toby, when under the influence of a great excitement. My descriptive powers had not the slightest effect upon him. The pathos which even made my own blotting pad damp, never stirred his soul. The golden evening and tinted peaks were to him mere blurred patches of earth lifted too high up to be of much value as a townsite or a fruit ranch. Like that silly old sailor in the poem, "he fixed me with his eye," and said: "What's all this stuff about, Quinteas?" "It's about the wharf," said I. "There's very little wharf in it." said he. "And sure that is just what is the matter," said I. "The little that is in it is getting less every day." "But what has the Port Simpson wharf to do with the setting sun, anyhow?" "I don't know," said I, "unless it is very likely to follow the sun's example and sink in the west." This was a sore point with the governor. The wharf and he are practically the same age, and every rotten plank that is removed from it acts on him like the pulling of a tooth from an aching jaw. It is, indeed, wonderful how attached we get to things as we grow old. I think there ought to be some legislation on this matter. Either people should be prevented from growing old, or else their attachment to things should be neutralized after the age of 50. The advice of a Roman writer to a young man who had been jilted by his sweetheart, and was bothered by the attachment that still swelled his youthful bosom, to the exclusion of all else, was, "think of her faults and try to magnify them." Now, every right minded person, except a politician, or real estate agent, can see what a far sweeping reformation the above precept would produce if faithfully put into practice. Think what would be the effect of thinking of the faults of our wharf without trying to magnify them. Why, we wouldn't sleep for weeks. Anyone can see how an old fogy in his own frail person may by interposing some trifling and silly sentiment, stop the proud march of civilization and progress and keep back even the wheels of time. One man refuses to put up a neat, servicable and modern iron gate, and prefers to keep a few rickety wooden bars together by means of means of tin, tacks and pieces of string, merely because in his old age he likes to think how, when he was young and ardent, long ago before the first sprinkling of the snows of age fell on his brow, on a certain moonlight evening he had leaned over the thing that was once a gate, and taken the face of his Jane between his hands, and looking into her eyes, saw something there that he has never forgotten, and never will forget, and that venerable wreck must stand there a mere delusion and a snare and a reproach to the community, all on account of the above mentioned occurrence. Would it not be a wiser course for that sentimental old party to take in his gate,

THE DEPARTMENT OF MINES.

The organization of a Ministry of Mines in the Federal government is a matter of interest and importance to the whole of the Dominion, remarks the Vancouver News-Advertiser. To no part of Canada will it be of more importance than to British Columbia, which, as regards the value of her mineral productions, leads all the other provinces of the Dominion. In the past we have not been accustomed to regard Ontario as much more than a region great in its agriculture and with large tracts of valuable timber. But the development of the rich mineral resources of New Ontario, and the foundation of mining camps like Cobalt in that district, have changed that, and the Premier Province of Canada is destined to take high rank as a mineral producer. It would be a bold presumption to say that other sections of Canada are not likely in the future to become known as having great deposits of minerals, and there is little doubt that when explorations are made of the vast regions in central and northern Canada further additions will be made to the immense wealth in minerals that this country is already known to possess.

It is only reasonable, therefore, and a matter of wise policy that this important source of national wealth should have representation in the cabinet by the creation of a Ministry of Mines. There are some who urge that such a department is unnecessary, because the provinces which contain minerals and have developed a mining industry have Provincial mineral bureaus, the object of which is to foster and aid their own local mining interests. But, while these are useful in their particular spheres, indeed essential if the needs and interests of their local industries are to be provided for and protected, there are other matters which can only be fully and completely dealt with by the establishment of a national department charged with the oversight of the mining interests of the whole country. The complete and thorough exploitation of the country, geological surveys and other matters pertaining to the industry are subjects that cannot be properly handled by the various Provincial administrationss. Concerning as they do, the interests of the whole country, the responsibility and the cost of such matters should devolve on the Federal government.

The development of our mineral resources will entail an enormous expenditure of capital, and we must look for most of the requisite money outside of Canada. Nothing will assist more in securing this capital than authentic and exhaustive information on the mineral resources of the country, compiled by and issued on the authority of the central government. Working in conjunction with the various mining bureaus of the Provincial governments, the Federal Department of Mines will add completeness and symmetry to the reports issued at regular intervals, and impress on outsiders the value of the immense mineral resources which exist in Canada, and the field for profitable enterprise that is to be found in their development.

GARNET MINES.

Capitalists Will Take Out Stones for Manufacturing Purposes.

Alaska will soon have a new industry, the mining of garnets, and it is the expectation of the management of the Alaska-Yukon-Pacific exposition, which will be held at Seattle in 1909, to have not only a full and inclusive exhibit of Alaskan garnets, but also to have a representation on the grounds of the mine from which the garnets are taken.

The capitalists interested in the new garnet mining company are women. No man has any part in the organization of the company or the management. It is their intention to start to work soon on a large scale. The mine is situated at what is known as the Horn Blend Garnet ledge, at the mouth of the Stikene river, seven miles from Wrangell. The garnets will be shipped in their native form to Minneapolis, and there manufactured into jewelry of all kinds. The Alaska garnets are, it is claimed, harder and larger than any others at present on the market, and in hardness, it is said, they are very little below the standard of the Kimberley diamond.

The Man from Kentucky.

At the junction of Whittington and Park avenues, Hot Springs, Ark., is situated the magnesia spring. At this spring the patrons are given all the water they can drink for five cents.

The other day a man walked in, drank some three or four big glasses of water and tendered the proprietor a half-dollar in payment. It was early in the morning and there was no change for this money in the cash register.

Turning to a man sitting near, the proprietor asked for change for the money.

"Sir," replied the man, "I am from Kentucky; if I had change for half a dollar, do you suppose I would be drinking water?"

It is folly for a man to marry a woman who is a good cook unless he is willing to supply the raw material.

AS TO OUR WHARF.

(Concluded from first page.)

decorate it with ribbons, the same colors his sweetheart wore on that momentous night, and put it on the sideboard along with the rest of the tokens of his prowess. I think that my idea, along with being unique, is reasonable, and I am going to recommend the same course to my governor with regard to the wharf. Why must our lives and property be placed in jeopardy simply because my old man was accustomed to "gallivant" on the wharf head in his young days? Why not follow the same line as the man with the gate and tie it to his watch chain and let us have something in keeping with the times. We want a wharf that will slope down when you are going to the boat, and slope down still more when you are coming back with a heavy load on the truck. You see, the structure itself struggles with this idea, only it hasn't intelligence enough to work it out properly. You will notice, when a boat comes in, it starts to go up and down, but the trouble is that when it goes up it does not stay up long enough to let you get to the other end with your load. I heard a man say once that he believed it went out to sea at night. If it does, some time or other it will forget to come back, and what a nice pickle we will be in then. I am inclined to agree with the belief of that man, for I left a knife on the end of it one night and I couldn't find it next morning; it must have fallen off in a rough sea while it was out.

Why should we not have a wharf with lights, and porters with brass buttons and a conscience? In these days of refinement and progress I can't see why we should not have a band stand, which would also serve as an admirable place for members of parliament to address their constituents from. And above all, there ought to be a letter box on the pier head, so that letters too late for the usual mail bag, might be posted at any hour of the night. After I had posted my ordinary letters for the last mail, I remembered, about 10 o'clock in the evening, that I wanted a stiff shirt from my washerman in Vancouver. It was too late to go and rouse up the postmaster, just because I wanted a boiled shirt. I wrote my letter. I couldn't go to bed, as I would never hear the boat come in, and I wanted that shirt, so I put on a good fire and waited and waited. The boat came in at 6 o'clock in the morning. If a letter box had been placed there I could have posted my letter and gone to bed like a reasonable human being. Q.

The Exposition.

The 31st of October is coming near, and there is quite a stir in our little town. A little excitement of this kind is always productive of good results. The incoming and outgoing of the mail boats, taken as the chief amusement and recreation of the inhabitants of Port Simpson, has a tendency to become monotonous. But there is strong evidence, however, that full advantage is to be taken of the variety offered by the holding of the exhibition on the above date. It is understood from reliable sources that the support yielded to this deserving undertaking from outside sources is very encouraging, and if the Port Simpson Council will strive to do their duty in this respect in the same manner in which the outside public has done, it will place the holding of the exhibition beyond the experimental stage. Exhibitors are reminded that they are expected to assist the officials as far as lies within their power by observing the conditions laid down, particularly that of having all exhibits in the hands of the secretary by 2 o'clock on Wednesday afternoon.

Stole a Letter.

A short time ago the Indian trader here made out an order on the Ames Holden Co., of Victoria, to the amount of something like $90 for supplies for his store. It seems that two of the Indian Home boys saw him make out the list, and after the man had dropped the letter in the box at the postoffice these young rascals with the aid of a piece of wire, fished out the letter and opened it, but not finding money, as they expected, they did what they thought to be the next best thing, and added their names to the money order enclosed and mailed it again. In the course of a few days time Mark Luther received a letter from Ames Holden explaining the nature of the order and asking for advice. The trader was about to have the boys in question arrested, but the missionaries here begged the boys off with the promise of giving the boys a talking to. Everyone in this place with any tact at all, knows what effect a good lecture has upon an Indian boy. In this case they should have all that is coming to them through the courts of justice to prevent any further meddling with the mails at the postoffice.

WHY

Does a slow steamer, leaving Vancouver on a Friday, and calling at every port on the coast, including the round of the Q. C. Islands, carry the mail for Port Essington, Prince Rupert and Port Simpson, when the fast Skagway boat leaves the next day and makes the direct run to above ports?

WHY

Does the C. P. R. change the schedule, at the last moment, on their northern boats, reversing their run to the Q. C. Islands and in consequence leave a bunch of ten men stranded at Port Simpson for two weeks, with even then a long chance of getting to their destination?

ANSWER

The old story—a cinch, working overtime.

Canoe Service on Copper River.

The demand for transportation on the Skeena river has resulted in the formation of the Copper River Canoe Express. J. B. Hartstone, supply agent for railroad construction camps at Copper river, where 200 men are at work, was paying Indians $100 to transport freight up river by canoe. The Indians were delighted—for a time. Then they discovered they had a monopoly and raised the price to $200. Mr. Hartstone then went to buying canoes. At Port Essngton the Indians upheld the canoe trust by refusing to sell, but at Port Simpson and Skidegate many canoes were secured, and now there is quite a fleet in service under his direction.—The Province.

Strange Sea Monster.

Near Tacoma, recently, a sea monster weighing 700 pounds was caught in a net at Big harbor by Anton Berry and his crew of six fishermen. It required their combined efforts to land the hideous animal, which has ugly eyes, a large, cruel mouth, two strong-looking prongs in the head, an enormous oval body and two finlike propellers. The flesh resembles wax. In some ways the monster looks like a gigantic snake, but it is a puzzle to all the fishermen.—The Province.

Painting Extraordinary.

Painted once every six years, the Eiffel tower claims an average of five victims every time the operation is performed. It is the most dangerous job in the world. When, after five painters had met a terrible death by falling headlong from the structure, the directors proposed that ropes and belts would be provided for the men at work on the tower, the painters rebelled. It was a matter of professional honor and trade vanity with them. In the repainting carried out in 1895 seven men fell, their bodies crashed deep into the earth. In 1900 the directors endeavored to obtain the services of men who had previously painted the tower, deeming that their experience would diminish the danger of accident. The men were obtained and agreed to work for the usual pay, provided only that they were not required to disgrace themselves with life-saving belts and rigging.

SIMPSON - - B. C.

-LOTS-
IN
Pt. Simpson

Are a good "gamble." The Canadian Northern, or some other railway, is sure to take advantage of the magnificent harbour. We are now offering some very choice, well located lots at from

$90 to $200

On land beautifully situated, facing on the harbour, adjoining the Hudson's Bay Co.'s land, and only half a mile east of present wharf. These lots may be worth from $1,000 to $10,000 each in a few years. PORT SIMPSON is likely to be a second VANCOUVER.

Maps and price list furnished on application.
