NEW LAID CABLE MUST BE RAISED AT HEAVY COST

Line Stretched Across the Fraser Last Week is Not Working Properly and Will Have to be Repaired --- Expense Close to Five Thousand Dollars.

Something has gone wrong with the new cable that was run across the river less than a week ago, and it now seems as if all the work has been in vain, and the big cable, weighing over four tons, will have to be taken up again, as it is not working satisfactorily.

The fault is somewhere in the construction of the cable, and it will cost something between $4,000 and $5,000 to have it put in working order.

It is not thought that the cable has been damaged in the river, as it is heavily armor plated, and therefore the trouble must be in the core itself. The cable will be tested at various distances, until the faulty spot is discovered, when it will be repaired.

Speaking of the matter last evening, Manager Roach said that he was of the opinion that the cable had been properly laid, and did not attribute the damage to careless work. The trouble with the cable was causing the company some inconvenience, and it would take several days before the damage could be repaired. He was not prepared to state the necessary expense to which the company would be put in getting the cable repaired, but he did not think it would reach as high as $5,000. He admitted, however, that it would run well into the thousands, but he could not give the exact figures, as they were handled from the Vancouver office.

The men will be put to work today testing the cable, and it is expected that the faulty spot will be located in a day or so. The damage was only discovered yesterday, and Mr. Roach thinks that by the end of the week, all ought to be in working order again. The cable will have to be dug up at the approaches of the river, and this will delay the work considerably.

CANNER DENIES THE STORY OF TROUBLE

Yesterday morning the Daily News, on the authority of a number of reputable men, published a story stating that the fishermen on the Fraser engaged in catching spring salmon were excited by a rumor to the effect that the canners who are handling this species of fish would refuse, in spite of statements to the contrary, to pay the five cent rate which the union men had demanded. Later in the day at least one of the canners took exception to the item that had appeared in the News, asserting that he was buying spring salmon from the men right along and paying them their five cent rate. He also said that the story in the News implied that there was trouble between the canners and the men over the price to be paid for sockeyes. It is possible that such an idea may have been inadvertently conveyed by the published report, but it certainly was not intended. All the information the News has is that certain fishermen even yet persist in saying that the canners are not paying the full rate for spring salmon, while some of the canners deny the statement made by the men and others simply remain silent.

TELEPHONE CO. GETS REPRIMAND FROM COUNCIL

Civic Fathers Object to Method in Which Street Was Opened for Cable Laying—Proposition to Clean Out the Old Reservoir Sets Aldermanic Tongues On the Go.

The supply of water again occupied the attention of the city council last evening for a considerable time, and while the discussion was going on, much interesting information was gleaned. Ald. Howay set the ball rolling by inquiring whether the old reservoir had been cleaned in his absence. He also suggested that it was high time that it should be done, as it had now been in use for the last sixteen years, and had never been cleaned.

Mayor Keary, in answer to Ald. Howay's inquiry, replied that on the recommendation of the chief of the fire department and the chairman of the fire and water committee, it had been decided that it would not be wise to take chances during the dry season, as too much water is being used for irrigation purposes. He certainly would not like to take the responsibility of ordering the work done, as he did not wish to have a repetition of the fire of 1898, and while the old reservoir would be empty, there was grave danger that if a big fire started, there would not be enough water available to fight it. With the centrifugal pump which they now had, it would take about sixty-four hours to empty, clean out and refill the reservoir.

Ald. Shiles said that it would be better to wait until later in the year, when the water used was not so great. It could be emptied with safety in September or October.

Ald. Henley was of the opinion that if the old reservoir had been in use for the last sixteen years, it could be safely used for the next three or four months. It would be better to let it lie as it was for the next few months. The work could wait awhile.

In reply to certain questions by Ald. Garratt, the mayor stated that the superintendent was now inspecting all over the city for leaks. A large tank would be shortly placed at the distillery, and when this would be filled, it would reduce the volume taken daily from the reservoir. A large quantity of water is used daily at this place for cooling purposes. Ald. Henley made a remark to the effect that the cold storage establishments were also using up a lot of water at present.

(Continued on Page 4.)

A WILD SCENE IN RUSSIAN DOUMA!

Radical Wing of House Calls Minister "Liar, Assassin, Jew Baiter."

St. Petersburg, June 25.—The appearance of Interior Minister Stolypin in the lower house of parliament today to answer an interpellation about the governmental measures for famine relief, was the occasion for another exciting scene. The storm broke when M. Stolypin, turned to M. Allidyn, who had made one of his usual violent speeches, and declared that "as an executive officer of the government he refused to notice the culmnies of the left." The radicals thereupon made a noisy demonstration of disapproval, hissing and shouting "assassin, liar, Jew baiter" and "resign."

During the debate the leaders of the Group of Toil agreed on this resolution, which was adopted:

"The lower house of parliament, finding that relief of the famine stricken population has been prevented in the past by the intervention of the ministry on political grounds and will so long as the present irresponsible ministry is in power, finds it necessary to organize assistance through public establishment."

NO "AMERICAN" BEEF FOR BRITISH TROOPS

London, June 25.—Mr. Buchanan announced in the House today that all issue to the army of American brands of preserved meat would be withheld until Lieut. Col. Hobbs, the officer despatched to the United States to investigate, has reported.

DO NOT WAIT FOR KAISER

BECAUSE EMPEROR WILLIAM IS LATE HIS YACHT IS LEFT OUT OF RACE

DALLIES TOO LONG OVER STATE PAPERS

He Rushes to the Meteor in a Torpedo Boat, Only to Find Competitors Already Started.

Kiel, Germany, June 25.—On invitation of Emperor William, Congressman and Mrs. Nicholas Longworth took tea with him on board his American built yacht Meteor today. The emperor received Mr. and Mrs. Longworth as they came alongside, and showed them over the yacht. Mr. Longworth was a guest at the Kiel yacht club dinner tonight, at which there were 300 persons present, including high naval officers. Mr. Longworth had a seat at the emperor's table with other American guests, including A. V. and Ogden Armour. The emperor has been uncommonly busy with state business and the real reason he withdrew from the race yesterday, as it now appears, was because he was ten minutes late in starting. The judges did not wait for him but gave the signal precisely at 10 o'clock. The emperor, who had been busy with papers on board the Hamburg, had not allowed himself time to reach the Meteor, though he came on a swift torpedo boat.

CHAMPIONS DEFEATED.

Souris, Man., June 25.—The champion Souris lacrosse team was defeated by Regina here today, 6-5.

REVOLVER SHOTS STOP COMIC SONG

Immense Crowd in Madison Square Roof Garden, New York, Startled by Sensational Murder—Son of Railroad Vice-president Shoots Man Who Took Away His Wife.

New York, June 25.—Stanford White, a member of the firm of McKim, Mead and White, architects, was shot and killed during the performance at Madison Square roof garden tonight. The murderer was Harry Thaw, a member of a well known Pittsburg family.

The Madison Square roof garden, which has been closed for several years, was crowded with a fashionable audience. While Harry Short, who fills the principal comedy roll in the piece, was singing "I Could Love a Million Girls," a series of shots rattled in the rear of the auditorium and a man in evening dress was seen to fall cross a table at which he was sitting with a party of friends. The man who had fired the shots fled, pistol in hand, toward the nearest exit, where he was seized and disarmed by a policeman. Instantly the great audience was thrown into a panic.

"You've Ruined My Home."

Persons in the front of the auditorium where the tragedy occurred, say that they saw a man, sitting with a fashionable dressed woman in the rear, suddenly walk down towards a table in front. Stepping in front of his seated victim, the man exclaimed: "You've deserved this; you've ruined my home." Drawing an automatic pistol, he fired three shots. The first two took effect.

The woman who had been sitting with Mr. White sprang to her feet, and rushing up to his assailant, who was struggling with a fireman, threw her arms about his neck, exclaiming: "I'll stand by you." The woman was Evlyn Nesbitt Thaw, whose marriage with Thaw estranged the latter from his family. Thaw handed the policeman $100 after being arrested and asked him to notify Andrew Carnegie that he was in trouble.

Pittsburg, Pa., June 25.—Harry Kendal Thaw is about 36 years of age, and is the son of the late William Thaw, who was vice president of the Pennsylvania lines west. He was a graduate of the Western University of Pennsylvania. Since his graduation from college much of his time has been spent abroad and it was while in Paris that he met Evelyn Nesbitt, an actress, with whom he afterwards married.

FIRE RAGES IN SANDON

FIFTEEN HOUSES, INCLUDING HOME OF M.P.P., ARE NOW IN ASHES

BLAZE STARTED BY BOY WITH MATCHES

Son of Archie Macdonald Responsible for Flames That Wipe Out Cody Road Section.

Sandon, B. C., June 25.—Fire started about 10:45 this morning at Archie MacDonald's house through his son playing with matches in a bedroom. The fire got a good start before it was discovered, spreading to adjoining houses. Before the firemen could get to work it had got such a start that they were unable to stop it on the Cody Road and it nearly baffled them down towards the city. All the dwelling houses on the Cody Road from H. F. Pound's two houses to William Davidson's (M. P. P.) are completely wiped out, fifteen in all, with the loss of all furniture and contents. The fire was checked at McLeod's cottage from going further up the gulch by the bucket brigade. The fire is now confined to hill sides and is going up to the summit. Very little insurance was carried on the property destroyed. The estimated loss is about $12,000.

EXPERT REPORTS ON ALBERTA WHEAT CROP

Says Yield Will Be Heavy and Grain Will Be Plump and Firm.

Calgary, Alta., June 25.—"With no exception the winter wheat, seeding in proper time between July 20 and August 20 and well and deeply drilled on land properly prepared, is now looking well and is good for a heavy yield."

This is the verdict of the expert sent out to investigate crop conditions in Alberta for the Western Grain Growers & Millers' Association. He deals exhaustively with actual conditions and predicts that the total yield in Alberta will not surpass that of last year. The greater area under cultivation will be counterbalanced by loss through winter killing.

DRYFUS CASE AGAIN BEFORE PARIS COURTS

Paris, June 25.—In the supreme court today procurator general Baudoin began his argument in the Dreyfus case. He declared he was convinced that Dreyfus was innocent and that Major Count Esterhazy was guilty. He therefore urged the quashing of the entire proceedings without a retrial.

FALLS IN FIT FROM PITT RIVER BRIDGE

Young Man Working on Construction Gang Loses His Live in the Stream.

Thomas Marshall, a young man of about 20, employed on the construction gang at the Pitt River bridge, was accidentally drowned yesterday morning about 8 o'clock. Marshall was subject to epileptic fits, and as he was riveting on the bridge, he was noticed by his fellow workmen to stagger and fall into the water below. As he did not rise to the surface, search parties were quickly organized, but it was over an hour before the body of the unfortunate young man was found.

Chief Spain, of the provincial police went out yesterday morning, accompanied by Capt. Pittendrigh, who after viewing the body, and inquirng into the cause of the death, decided that an inquest was not necessary. D. Murchie has charge of the funeral arrangements.

A carload of pipes was received yesterday afternoon from Victoria by Gilley Bros., for use in the new sewer.

FINDS A WOODTICK EMBEDDED IN BACK

Grand Forks Man's Paralysis Is Traced to a Novel Cause.

Grand Forks, B. C., June 25.—Louis Johnson, a veteran prospector of this section, is now experiencing the recovery from a most novel illness. It seems that a few days ago he was taken with a stroke of paralysis.

Medical aid was procured, and on examination it was found the only thing the matter was the embedding in the small of his back of an immense wood tick, the removal of which was easily accomplished. The victim of this peculiar experience is now in town completely recovered.

AMERICANS ARE SAFE.

London, June 25.—The Tribune this morning states that it is informed on high authority that the Henley regatta committee is unlikely to take any steps to adopt the motion of Coach Fletcher, of Oxford to exclude Americans from future regattas.

SLAYER OF "HOLY ROLLER" ON TRIAL

Seattle, June 25.—Believing that she has had a visitation from God and that the Almighty is angry with Mrs. Starr for coming to this city in response to the appeal of her brother, Esther Mitchell, the 18-year-old sister of George Mitchell, today under trial for the murder of "Joshua" Creffield, absolutely refuses to have any communication with her married sister, Mrs. M. E. Starr, who has come to Seattle to be near her young brother in his hour of trouble.

It was upon the charge of adultery with Mrs. Starr that Creffield was convicted and served a sentence in the Oregon prison. It was also alleged that he had been intimate with Esther Mitchell and it was mainly for this reason that young Mitchell committed the deed for which he is now upon trial for his life.

Mitchell was brought in from the county jail, where he has been confined for seven weeks at 9:30 o'clock this morning. The courtroom was crowded, but contrary to general expectation, there were few women present.

RUSSIA FACES A MILITARY REVOLT

St. Petersburg, June 25.—The apprehension of the government with regard to the political agitation in the army is the direct cause of the efforts now being put forth for the suppression of the peasant organization. From Dynska and Zolotomasha comes the news of the circulation of the Black Hundred propaganda. Deputy Vinovar today received word from Rishev saying that provocators had arrived there and were spreading the rumor that Catholics had been brutally murdered by Jews. The message stated that the town was fearfully excited and that the Jews were fleeing from the probable danger. There are many rumors current tonight of disaffection. It is stated that several arrests were made at the Krasnoye Selo camp after a meeting of disaffected guards. It also is asserted that a ringleader of the revolutionary movement among the chasseurs of the guards, Sergeant Silinsky, was captured after having taken to flight. Sinister rumors are current about the morale of the Uhlan regiment of the Peterhof garrison.

Liberal Leader Sounds Clarion Call to Battle

Warns Supporters Throughout the Province that a General Election is at Hand and that the Date May Be Sprung at any Moment — Hawthornthwaite on Warpath.

The probability of an early general provincial election is becoming more and more apparent as time goes on. After the troublous session of last spring—a session in which the McBride ministry on more than one occasion faced internal disruption—it was prophesied that the premier would never again meet the house without first going to the people to see if he could not strengthen his position. True, he has nominal control of the house as it is at present constituted, but even that nominal control (which in the past was made a real one by a compact with the Socialist members) is fast slipping out of his grasp. Disaffection is rife on the government side of the house and the premier can never feel sure that he will command a majority should any difficult situation arise.

Recently (without a thought of politics, of course) the premier and Hon. R. F. Green have been making a tour of the province. They have been penetrating to every conceivable nook and cranny, carrying glad messages of appropriations for roads, trails, bridges, steamers and court houses. And now Mr. Hawthornthwaite, who has for three sessions been the premier's main prop in the house, has started out on a similar tour; but, being more worldly wise than the premier, candidly announces that he is out for politics and that he intends to organize for a coming fight at the polls.

Liberal leader J. A. Macdonald, too, is keeping a sharp tab on current events and is well aware of all that is going on. He has sent out letters of advice to liberal associations throughout the province warning them to be well organized for an election the date of which may be sprung at any moment.

Hawthornthwaite at Vancouver.

In connection with this announcement it is interesting to note the interest taken in Vancouver in the address delivered on Sunday night by Mr. J. H. Hawthornthwaite, M. P. In anticipation of an early contest in the province, Mr. Hawthornthwaite has started on a tour of organization through the interior.

It was an interesting speech which Mr. Hawthornthwaite delivered—fightful, but comparatively free from verbal extravagances. There was no mistaking the veiled irony with which Mr. Hawthornthwaite spoke of the McBride administration as "the first conservative government British Columbia ever had," nor of the sincerity of his opposition to stout John Oliver. As a government, and as individuals, the first conservative government British Columbia ever had does *not* command his respect; as an opponent, John Oliver rouses every fighting quality the leader of the Socialist party possesses. The member for Nanaimo does not make the mistake of taking the member for Delta cheap.

On Dangerous Ground.

It was the Columbia & Western land grant that made the most exhaustive demands on the skill of Mr. Hawthornthwaite as a tactician. In dealing with his record on that question he was skating on thin ice, and in spite of his adroitness and the typical Irishman's nimblenes of wit, he was plainly conscious of the unsafe and slippery foothold which, at best, it could afford him. He began his reference to this affair with a clear-cut statement which threw into bold relief the broad and deep line of cleavage between the revolutionary socialist, as he described himself last night, and the contsitutional or evolutionary reformer, of whatever complexion, place or degree. He said the land question and questions of land grants and bonuses, did not concern the laboring classes: "The worker is robbed at the point of production." And again: "Land grants and bonuses are but squabbles between rival capitalists." His bill for weekly payment of wages passed the second reading by a large majority, he said, and then came his vote on the Columbia & Western land grant. When his bill for weekly payment of wages reached the committee stage, a majority of the Liberals voted against it. This action on the part of the Liberals he was careful to impute to the fact that the vote in committee was not recorded and so could not become public immediately; he was equally careful to conceal the probability that the coolnes which the Liberals displayed towards his bill at this stage might quite reasonably have arisen from natural resentment at his unexpected stand in favor of the Columbia & Western land grant.

His "Pact" With McBride.

After he had finished his speech he was brought to bay on this matter of the land grant by a straight question from a friendly "heckler." "I would like to ask the speaker of the evening," said the questioner, "if he was compelled to vote for this land grant?" Said Mr. Hawthornthwaite in reply: "We were practically compelled. Those two bills—one to enable a man to register his vote anywhere in the province on thirty days' notice, and the other to make wages payable weekly—depended on it. We were pledged to pass those bills. The government was held up by five of its own members, who had decided to vote against it, not because they objected to land grants or bonuses, but because it meant power. We might have stood out—I honestly believe we would have stood out—if that had not been the position of affairs. Those two bills were the most important that have come up since I went into politics. They widened the franchise of the workers greatly."

BURNABY COUNCIL.

The Burnaby council met on Saturday last at the Municipal hall. Reeve Byrne presided and the whole of the members were present.

Tenders were opened for widening the Vancouver-Westminster main road from the Murchie road to the Roberts road. For sections 1 and 2 the tenders of Arth Attoe at $8.50 and $11.00 per chain respectively were accepted. For section 3 the tender of Chas. Burchell at $15.00 per chain was accepted.

The tender of W. Stevens for hauling gravel from Barnet road to Hastings road at $1.05 per yard was accepted conditionally upon the contractor agreeing to a reduction in the quantity to be hauled at the present time. The specified quantity was 350 yards whereas the ward appropriation will only permit of the expense of 200 yards.

The tender of Thos. Haddon to make both sections of the Bainbridge road at $8.50 and $9.00 per chain respectively was accepted.

The time for the receipt of tenders for slashing Cliff road was extended a week, an amendment being made in the specification.

Mrs. Wolfe's offer to supply rock for McKay road at 60c per yard was accepted.

The tender of F. E. Harmer for making section 1 of Jubilee road to Royal Oak road at $10 per chain, and section 2 at $14 per chain was accepted.

The further consideration of the Burnaby Revenue By-law (1906) was taken up. In view of the increasing demands made for opening up roads it was not thought politic to make any reduction in the taxation but to allow it to remain as in the past few years, namely 8 mills on the dollar on improved property and 20 mills on wild. The apportionment of the rate between loans and general purposes was considered and approved. The third reading of the by-law was fixed for the 30th instant.

The request of Mr. Alex. Dow for opening up of Hatch road was referred to the Councillor of the ward for report by the next meeting.

The council adjourned till Saturday next, June 30th at 2.30 p. m. being pay day.

VICTORIA REPORTS THE FIRST 1906 SOCKEYES

Capital City Canning Company Put up Seventy-five Cases on Saturday.

Victoria, June 25.—The sockeye season has opened much earlier this year. On Saturday the Capital City Canning Co.'s cannery at the outer dock put up 75 cases of sockeyes, the first pack of the season. The sockeyes came from the Short trap at Clover point. The Capital City cannery was run for the first time Saturday to put up the new salmon—the advance of the salmon run—and the new machinery worked very well. The shut door of the spiller of the Short trap was fouled after the recent lift and Diver McDonald went down to free it. He reported the trap well filled with fish, and good results are expected from the next lift when the close season expires.

The arrival of the sockeyes at this time is considered remarkable by the fishermen, as the run does not usually commence until about the middle of next month. There are now twenty-eight traps in all in the vicinity of Victoria, just twice as many as were in use last year.

Man in Hot Weather.

Man in hot weather enjoys the very blessed privilege of being able to perspire. Unlike his best friend in the animal kingdom, the dog, which does not perspire, he does not need to depend on the forced draft of panting respiratory movements to relieve himself of surplus heat.

We may breathe as effectually through our skins, in other words, during the period of high temperatures, as through our lungs. This, at least, is true, so far as it concerns the maintenance of equilibrium of our bodily temperature to that of the atmosphere.

Man, therefore, has to deal with the problem in hot weather of the rapid evaporation of bodily heat, which is aided, or retarded, by the kind of clothing that he wears. He has to consider the question of the texture, and the color of the garments that he wears. In general, the lighter colors, and more especially white, are those which naturally are suggested by the summer season.

Agricultural Conference in Jamaica.

Mr. Richard H. Frost, of Kingston, Jamaica, speaking about agricultural questions presently occupying the attention of his countryment, stated that endeavors were now being made with the view of holding an intercolonial argricultural conference in the island at the beginning of next year.

"Arrangements had been nearly completed about the middle of last year for holding a conference of this kind, but owing to a change in the Royal Mail Company's service, the project was abandoned.

"Representatives are going to England to further the scheme, and negotiations will be opened up with the sister colonies requesting them to take part in the conference.

"A gathering of this kind should do an immense amount of good, and the bringing of the agriculturists of the Empire together should help on to a great extent the much-discussed preferential trade.

"Another important feature of the conference would be the question of minor products. The great drawback in the West Indies during the past has been that too much attention has been paid to one or two industries while others, which could be developed into equal importance, have been overlooked or entirely ignored.

"A few years ago it was thought that the sugar industry was the only one to which any importance should be attached, while today people are depending too much on the fruit industry.

"The proposed conference will give our people an idea of the art of cotton-growing, the proper methods of growing rubber, and on various other subjects.

"Our great fruit trade will very shortly meet with a most decided and determined opposition from the fruit growing districts of Central anl South America, and if Jamaica is to make any progress in the future, she must lead out in new directions and develop new industries.

"The intercolonial agricultural conference is the first step in this direction."

"We have some fine sausage," ventured the waiter.

"Keep it."

"How about a taste of ham?"

"Cut it out."

"Corned beef, potted chicken, canned tongue?"

"Thunder and Mars! You must take me for an investigating committee. I came here to get something to eat. Bring me a glass of distilled water and a fumigated banana."

"Weather reports are so untruthful!"

"I don't know. They often speak about the mean temperature."

Frederic Percy Armstrong tells of his successful encounter with a fighting salmon in Quebec waters. Ashley D. Conger describes in realistic manner his thrilling night experiences while watching a deer-lick. T. P. Bresnan gives an account of a holiday at that ideal fishing ground—Temagami. E. Connor portrays a typical angling match in Paris. Miss A. R. McKee tells of two lady novices fishing a whole afternoon on Rice Lake, Ontario. L. D. Robertson descants on his hunt all by himself without guide or companion, in Quebec province. W. R. Gilbert writes enthusiastically of the true angler who does not fish for fish alone. Algonquin Park as a fisherman's paradise is described by word picture and illustrations. E. C. Woolsey tells of a fishing trip to Chats Rapids on the Ottawa River. Canadian Fishing Territories from ocean to ocean are indicated. Rev. Dr. Murdoch relates a guide's panther story. The formation of the Alpine Club of Canada is told, and its future success predicted. Quebec's Fish and Game leases, and the Government compromise thereon is given. Ontario's Game Commission report is summarised. Canada's first auto and motor boat show is described. Sports Afloat received attention. All Canada's trap news is given and comments of interest to every trap shooter is added.

Address—W. J. TAYLOR, Publisher, Box 1448, Woodstock, Ont.

TEXT OF JUDGMENT IN BRAMWELL CASE

Judge Boles' Reasons for Awarding the Plaintiff Only Five Dollars' Damages.

Judgment in the case of Kearsley vs. Bramwell has been delivered by the Hon. W. Norman Bole in the County court of Westminster as follows:

Plaintiff seeks to recover possession of a house and six acres of land situate in Burnaby let defendant for 5 years by lease from 18th March, 1905, by reason of certain alleged breaches of covenants to pay rent, taxes, repair and not cut down timber and alleges waste by cutting down trees, fences and destroying the premises and claims $69.00 for rent and $200 damages and an injunction.

The defendant traverses the plaint save admitting that $9.00 is due for rent and counterclaims for $9.80 for certain work done by him at Plaintiff's request.

The lease, which is the work of an amateur, provides in the event of no improvements being made by the said lessee, the lessee agrees to pay the lessor $60.00 yearly instead of $36.00 after the first year. There are no improvements specified in lease.

The evidence was voluminous and very contradictory. From the plaintiff's tale one might be justified in supposing that the premises in question were a recently discovered section of the garden of Eden located in Burnaby, while the defendant described it as a howling wilderness.

Some idea of the real value of the premises may be gathered from the fact that immediately before the lease in question was executed, plaintiff offered to lease the premises to a Mr. Hopkins for $1.00 a month, for 5 years and which offer was declined. Mr. Hopkins who appears to be an independent and reliable withness, well acquainted with the premises, says the place is in better order than when Bramwell leased it, and that defendant has made improvements and estimates the total amount of damage at $5.00.

As to the increased rent there might be considerable difficulty in determining, owing to the vague way in which the covenant is expressed how to give effect to plaintiff's contention if no improvements were made. Vide Kemble v. Farren, 6 Bing 141; Thompson v. Hudson, L. R. 4 H. L. 1-30; Wallis v. Smith, 21 C. D. 261; Elphinstone v. Monkland Co., 11 appeal cases 348; Law v. L. B. Redditch (1892) 1 Q. B. 133 (A); Taylor v. Portington, 7 DeG. M. & G. at 330, but as I am of opinion that defendant has made some improvements on the premises. Plaintiff on the facts alone fails to sustain his claim to increased rent. There is no evidence that defendant got any notice from plaintiff to repair. I think therefore plaintiff is only entitled to judgment for $14, i. e. $9. for rent, $5 for damages, and that he is not entitled to either forfeiture or an injunction. I give judgment on the counterclaim for $9.00. Costs in both instances will follow the event.

W. NORMAN BOLE, J.

New Westminster, B. C.,
22nd June, 1906.

Japan's Hegemony in Asia.

The military prestige of Japan has enormously increased her general influence with all eastern countries. China is not the only country in which military reorganization is going on under Japanese suggestion. The Siamese army is now being provided with rifles made in Japan, and there are rumors of an approaching betrothal of the Crown Prince of Siam to a Japanese princess. The East looks to Japan as a race champion, and this sentiment in favor will be a commercial asset of decided value in the hands of such shrewd and enterprising traders as Japanese merchants. The victory of Japan over Russia will have immense consequences in world politics, and they are already beginning to manifest themselves in the quiet and unobtrusive way which is apt to mark the operations of true power.

"A mischievous country girl wrote on an egg, along with her name and address, 'Please correspond,' and sent it to market with the others."

"Did the man who got it write?"

"Sure."

"And an engagement followed?"

"Nothing of the sort. When the egg was taken out of cold storage and sold for 'strictly fresh' the girl had been married thirteen years."

SUNDAY OBSERVANCE BILL.

It would be a hard matter to say which would be more amusing, or amazing, a selection from the parliamentary debates on the Sunday Observance Bill, or one from the editorial articles written about the said debates and the bill itself. One esteemed contemporary quotes the fourth commandment, and discusses the question whether humanity has outgrown it; and this, remember, as a contribution to the debate on the bill, which (except in an indirect way), has nothing whatever to do with the fourth commandment.

To Sunday, or more properly, Sabbath, observance there is a religious or spiritual side; but no government has any right to meddle with that, nor did the bill as introduced attempt to meddle with it. It is admitted that the toiler, and a vast majority are in that class, has a right, a natural, innate right, to one day's rest in each period of about seven days. This, as the premier said the other day, is a christian country and the first day of the week has been set apart as the day of rest. The government, then, in legisltaion designed to protect people in their right to the enjoyment of the day of rest, takes advantage of this practically universal recognition of the first day of the week; and because that recognition has a religious origin we have all this talk about the religious aspect of a matter which has no religious aspect at all, as far as the government is concerned; except that every person may be said to be acting religiously when he is doing his duty, as the government is endeavoring to do its duty in protecting people in the enjoyment of this natural right to a rest day. The principle of the thing ought to be apparent at a glance; it is when one comes to applying the principle—translating it into practice—that the trouble begins. A Chicago paper, some years ago, put the matter in a nutshell when it said "If the people who went on the excursion to (naming the place) last Sunday, find by and bye that they have to do seven days' work for six days' wages, it is to be hoped that they will know they have themselves to thank for it." Capital, always eager for dividends, and recking little of any other consideration, continually tries to abrogate the day of rest; and it is the duty of the government to step in with protective legislation; but there its duty in the matter ends. With what we have called the spiritual side, or aspect, of the matter, it has no concern.

Discussion of that aspect of the matter is hardly in place in the columns of a secular paper; but as germane to the matter it may be well to point out that it is the spirit and not the letter of the fourth commandment which applies in these days; and also that the fourth commandment does not exhaust the Sabbath legislation of the bible. Through all of it, of course, there is the embodiment of principle in outward observance; and there is the side, or aspect, of it which is directed to the affairs of this life, as well as that which concerns the next. The former has as its underlying principle the protection of those whom the greed of their fellow men would oppress; and the bill introduced by the government is an attempt to carry out this same principle—this secular side, as it may be called, of the Mosaic Sabbath legislation; which secular side of Mosaic legislation in other matters is in many instances the basis of our laws.

As has already more than once been said in these columns, working out the details of such a measure is a difficult matter in our highly developed societies and this difficulty is greatly increased by the fact that there has been no general legislation dealing with the matter in modern times, so that people have become accustomed to a sort of "go as you please" style, and are, therefore, inclined to regard legislation of a restrictive kind, however sound in principle, as an attempt to interfere with that personal liberty which our Anglo-Saxon people prize so highly and guard so jealously.

MUST HAVE BEEN AROUND.

There came to our table the other day a paper which had not previously been on our exchange list, and was therefore examined with some care. It is published away off on the other side of the continent, but as we read it the conviction was forced upon us that the editor must have had an opportunity of studying the ways and manners of some of our provincial contemporaries. For instance, he says:

"When an editor has printed an untrue story he should be willing to retract it. Some editors, though will print no denials unless the untruths they have uttered have been libelous. They pretend to believe that their stories have been true, after all.

"They are as pigheaded as the Arkansas editor who issued an obituary of the leading citizen of the town. When the leading citizen called at the office the next morning and requested that the report of his death be denied the editor refused to accommodate him.

"'We are never wrong here,' he said in a lordly way. 'We never print denials or retractions in our sheet."

"But the leading citizen protested and protested, and finally the editor said:

"'No use talking, sir, we can't deny your death. The best we can do for you is to put you in tomorrow's list of births.'"

A LITTLE SHOP TALK.

An Eastern editor has this to say about newspapers in general. He laments the exceptions, but maintains that his words are of fair application to the majority of periodical publications:

Do you know of any great industrial enterprise which has not been assisted by the newspapers of the country? I do not. Do you know of any great question affecting the material welfare of the country which has not been thoroughly discussed and the best and wisest solution of which has not been advanced by the press? I do not. Do you know of any danger which has threatened the industrial life of the country which the public has not been warned by the press? I do not. Do you know of any vice that has been fostered by the press, any sedition, any corruption in high places or low, any immorality in living? I do not. I would not have it believed for a moment that all the oracles of wisdom have been committed to the newspapers, that they are the only righteous and unimpeachable institution in the land, but they have performed good service to the state and to society and are to be counted among the great constructive and preservative forces of those advanced times in the progress of the world.

By its newspapers communities are judged, a newspaper seldom rising higher or falling lower than the level of its constituency. In the first place the newspaper must give the news, but its mission is something higher and better than being the mere channel for the dissemination of "general intelligence," as it is called. If it would lead its public into the right way its course must be at bottom dictated by an honest and fearless exercise of the faculty of clear judgment buttressed by honest conviction.

"We have heard nothing for several days about the dismissal of Hon. R. F. Green from the cabinet. Even Liberals are becoming tired of the campaign of lying about political opponents."—Colonist. In that particular respect, they were born tired; and have never therefore, attempted to compete with Conservatives.

TELEPHONE CO. GETS REPRIMAND FROM COUNCIL

(Continued from Page 1.)

After hearing the opinion of the various aldermen on the matter, Ald. Howay decided that it would not be worth while making a motion to have the reservoir cleaned at the present time, as he seemed to be in a minority of one, but he still stated that he would like to see the work done at the earliest possible convenience.

The chairman of the board of works reported that a sidewalk would be laid on Alice street, in answer to the petition received recently from several of the ratepayers of that district. The sidewalk would cost about $63. In the matter of the Sixth street sewer, and all intersecting streets, the proposed improvement has been referred to the city engineer, with a request that plans should be prepared at once. The report was adopted.

Ald. Jardine, for the finance committee, reported favorably on the grants that have been applied for by the different bands. The City Band grant, amounting to $200, it was decided to pay in monthly installments, while in the case of the Fife and Drum band, the grant asked for being only $50, and as this was wanted for uniforms, it was decided that this would be handed to them in one sum. A number of free concerts are to be given by each band.

The chairman of the water committee had prepared a rate tariff, by which persons paying a certain water rate would be exempt from the usual fire rate. The report was adopted.

Ald. Shiles verbally reported that the fender piles had been driven in position at the market wharf. The report was received.

Hay on the Park.

The grass in the park and at the crescent is fasting becoming hay, and Mayor Keary suggested that it should be cut. Much talk followed the proposal, but it was finally decided that it should be done in the near future.

Ald. Henley said that he had noticed that the crushed rock recently put down on the walks of the public library had not yet been spread, and suggested that the parties responsible should attend to it. It was decided that this should be done.

After this momentous question had been settled, Ald. Garratt inquired of the chairman of the board of works whether the crushed rock ordered for the park had reached its destination. The mayor smiled at the question, but when Ald. Henley innocently informed them that he rock would reach there in due course, his smile broadened a trifle. The mystery of that smile was explained a moment later, when the mayor informed the seeker after information that the crushed rock had been there for some time, and that the park ranger had been exercising his muscles in spreading it for the last three days.

Hit at B. C. Telephone Co.

The B. C. Telephone company had asked permission at a recent meeting of the council to open up Columbia street, for the purpose of laying a cable across. Permission had been granted, with the usual stipulation that the city should be informed of the date when they intended to dig the trench. Ald. Jardine reported that this had not been done, and that they had also dug the entire width of the road at the same time, thereby greatly incommoding traffic. In case of fire, such a proceeding would be very dangerous. He thought that the council should take the matter up. Ald. Henley said that it was after 5 o'clock when the street was opened up, and the whole of it had to be done at once, on account of the size of the cable. The clerk was finally instructed to write a letter to the company on the matter, and to call their attention to the breach of faith of which they had been guilty in not following the instructions they had been given.

The mayor spoke in connection with the recent deputation which had waited upon them from the Anti-Tuberculosis society. Dr. Fagan had suggested that the city should contribute $30 per thousand head of the population, which would amount to about $240 in all. The money was to be used for the maintenance of the sanatorium when built, and as the institution was not yet commenced, the money would not have to be paid over for some time. Other cities were contributing at the same rate, and he suggested that New Westminster should do likewise. Ald. Jardine made a motion to that effect, and this was carried unanimously, Ald. Shiles remarking that it would be binding on future councils, in case the sanatorium was not built during the term of the present members.

Communications Numerous.

A large number of communications were received, and dealt with, the first one being a complaint from Charles A. Gilbert, secretary of the Mainland Fire Underwriters' Association, asking that the tax recently increased from $50 to $100 for doing business in the city should be reconsidered, as it amounted to nearly 6 per cent. of the total net premiums written by companies members of the association. The matter was referred to the finance committee to report.

D. W. Turnbull and five others asked for a new sidewalk for Douglas Lane, as the present one was in a dangerous condition. Referred to the board of works to report.

H. C. Mark and nine others petitioned for an extension of the sewerage system from Third street to First street and Fourth avenue. Referred to the water committee to report.

George Kelly asked the council to have the broom at the rear of his residence cut, as it would soon be running into his garden. Referred to the board of works with power to act.

Henry T. Thrift sent a complaint that persons were depositing refuse and other matters in a ravine at the rear of his residence and asked that it be attended to. He also suggested that the Victoria ravine should be filled in.

Ald. Henley informed the council that it had been decided to fill up the Victoria street ravine some time ago. The other matter was referred to the health committee with power to act.

Park Wanted for Picnic.

G. G. Gibson, on behalf of the congregation of St. John's church, Vancouver, asked permission to have use of Queen's park on the occasion of their picnic on July 5. Permission to have use of the restaurant, range, benches, tables, etc., was also asked. The use of the park was granted, and the mayor and the chairman of the parks committee appointed to arrange other details.

D. E. Patterson asked permission to lay a small pipe across Front street from the boiler works to Gilley Bros.' wharf, the pipe to be used for compressed air used in pneumatic machines at the works. The pipe would be 1 or 1½ inches in diameter, and could be taken up again later, or left in the ground at the pleasure of the council. The request was granted, the work to be under the supervision of the board of works.

A. H. Cole applied for the position of poundkeeper. His application will come up with the others now before the police committee.

The B. C. Manufacturing Co., forwarded a cheque for $25 in payment of certain rent due by them, and made a request that they be allowed to renew their lease for a term of ten years from October 15, 1906, date on which their present lease expires. This was referred to the finance committee to report.

W. G. Walker, clerk of the municipality of South Vancouver wrote thanking the council for the kind offer they had made to assist them in getting a line built along the north side of the North Arm of the Fraser river to New Westminster. The communication was received and filed.

The Plumbing Question.

J. H. Leitch, of Vancouver, offered his services as plumbing inspector. This was referred to the special committee on the plumbing question.

E. C. Parry, also of Vancouver, wrote endorsing the suggestion made to the council last week by the secretary of the plumbers' union, that an examination of all candidates should be held. The letter was received and filed.

C. Henderson, on behalf of the St. Andrew's church, asked permission to use Moody Square for their annual picnic on June 27. The request was granted, under the supervision of the chairman of the parks committee.

D. E. McKenzie, market clerk, submitted his monthly report as follows:

May 31, commission sales....	$ 57.20
May 31, stalls account.....	64.80
May 31, Telephone account....	7.60

Local News Briefly Told

D. Robertson left the city yesterday afternoon on the Transfer for Westham island.

J. Flint was among the Transfer's passengers to Stevestown yesterday afternoon.

T. L. Hughes and C. L. Bugg went down to Ladner yesterday on the steamer Transfer.

Sons of Scotland picnic to Langley Monday, July 2. Adults 50 cents; children, 25c. Steamer Beaver. Highland dancing and games. *

The Ladies' Guild of St. Mary's, Sapperton, will give a garden party at the residence of Mrs. N. Nelson, Brunette street, Friday, June 29th. Ice cream, strawberries, cake and coffee will be served afternoon and evening. Everybody invited. *

Ten inches of water were applied for yesterday by F. A. Bole, the water to be used for domestic and agricultural purposes. The stream from which the water is to be taken is on the southeast shore of Bidwell Bay on the North Arm of Burrard Inlet.

On Monday the News stated in error that the crew of the Georgia had received their uniforms from Ottawa. The trimmings only arrived from that city, the making of the uniforms being done by Messrs. McRae and Aitchison of this city.

The following well known people left New Westminster yesterday afternoon on the 5:20 C. P. R. train: R. C. McDonald, for Aggasiz; Mrs. Barraclough and family, for Hamilton, Ontario; D. Rothwell and wife, for Regina and Mrs. Ostrom for Toronto.

Sam Olsen, of Squamish Valley, yesterday posted an application for 100 inches of water to be taken from Olsen Creek, and used for agricultural and domestic purposes. The application was filed by his agent, Arthur P. Judge, of the Royal Bank Chambers, Vancouver.

The merchants interested in the proposed picnic are reminded that a meeting will take place this evening in the Board of Trade room, when several committees appointed to interview the differen merchants will make their report.

Ald. Howay returned to the city yesterday after a trip to the upcountry, and resumed his seat at the usual meeting of the council last evening. He is much better in health than when he left.

Owing to the fact that next Monday will be a holiday, there will be no meeting of the city council, and the usual meeting will take place the following evening, if a quorum of the aldermen can be found. As the majority of those present at last night's meeting intimated their intention of paying a visit to Seattle on the Fourth, there is little chance that the council meeting will be held until the following Friday.

William Murray, the engineer who died on Sunday as a result of a sun stroke sustained last Saturday, will be buried this morning in the English church cemetery. The decased's brother-in-law was in the city yesterday making arrangements with D. Murchie about the funeral.

A well known character left New Westminster yesterday afternoon, when Skookumhouse Eliza was gently requested by the authorities to remove herself and belongings to Vancouver Island, where a place on the West Coast Reserve has been prepared for her.

Detective Bradshaw yesterday escorted to the brick building behind the city hall a Fort Douglas Indian, who revelled in the name of Peter James, with a long string of Indian jargon tacked on to the original cognomen. He will be charged in the police court this morning with being found in a state of intoxication in the lower quarter of the city.

The ladies of the Hospital Auxiliary will give a high tea on Saturday afternoon and evening in the old Collard store, corner of Columbia and McKenzie streets. There will be ice cream and cake in the evening, and music will be providel. A meeting of the ladies interested was held yesterday afternoon in the Board of Trade rooms, when routine details were discussed and settled.

The steamer Robert Dunsmuir, which was bought by the Gilley Bros. a short time ago, has been refitted over again as a tug boat and is now ready for service in the towing business. The Dunsmuir will be one of the best tugs on the river now, in nearly every respect. The boat will leave tomorrow for Ladysmith where a supply of coal will be taken on, after which it will proceed to Howe Sound after a boom of logs for the Fraser River Saw Mills company.

Sunday School Picnic.

The annual Sunday School picnic of the Olivet Baptist Church of this city will be held on July 3 in Stanley park Vancouver. Two large cars of the interurban type have been chartered for the occasion, so as to enable the picnickers to have sufficient room and to enjoy the ride over to Vancouver and through that city to the park. Lunch will be served on the picnic grounds by the ladies of the church. After which the afternoon will be spent by the children in bathing and other sports a large programme of which will be disposed of during the afternoon, the winners receiving prizes.

Plumbers and Plumbing Regulation By-law, 1906.

A By-law to license and regulate plumbers and to provide for the appointment of plumbing inspectors and to provide for the plumbing and drainage of buildings.

Whereas it is desirable and necessary to license and regulate plumbers in the City of New Westminster, and to provide for the appointment of plumbing inspector, and to provide for the effective plumbing and drainage of buildings;

Therefore the Municipal Council of the Corporation of the City of New Westminster enacts as follows:

1. The Council may from time to time, as occasion may require, appoint an Inspector for plumbing and any such Inspector shall be under the supervision of the Board of Health and be given renumeration for his services as the Council shall determine.

2. A Board of Plumbing Examiners shall be appointed annually by the Council. The Board shall be called together by the Plumbing Inspector, who shall be Secretary of the Board, at such times as the Council may find necessary.

3. In case any dispute arises under this By-law as to whether any person or persons employed by any licensed master plumber is a regularly educated practical and experienced plumber, as in this By-law is provided, the Plumbing Inspector may notify the said workman to appear and be examined before such Board of Examiners, whose decision as to the competency of such workman shall be final and conclusive.

4. Certificates of competency may be granted by the Board of Examiners to any plumber producing proof satisfactory to them that the applicant has undergone satisfactory training and due examination, and in absence of such proof to any applicant who shall after an examination before the said Board be considered by them to be competent, and such certificate shall be recorded in the office of the plumbing Inspector, the person receivng the same paying a fee of $1.00 therefor, and such plumber shall be a registered plumber of the city.

Provided that the Chairman of the Board may grant, on being satisfied with the competency of any journeyman plumber applying for the same, a temporary permit to such plumber for a period not exceeding thirty days, which permit shall confer on such plumber the same privilege for that period only as if he held a certificate from the Board of Examiners.

5. Under and immediately after the passage of this By-law, and in every ensuing year on or before the first day of July, any persons desiring to carry on business or trade as a master plumber within the City of New Westminster shall take out a license, which license shall be posted up in the office or shop of the master plumber at all times, for which he shall pay at the time of the issuing thereof a sum of $20.00. Except as hereinafter provided, any person may take out a license under the provisions of this By-law on behalf of a partnership, firm or company of which he may be a member.

6. No person shall receive such a license unless he has a place of business within the City of New Westminster, and furnishes a bond binding himself to the amount of $500.00 with at least two sureties in the sum of $250.00 each to the satisfaction of the Finance Committee, or a bond to the same amount from a guarantee company, that he will employ only registered plumbers who have received and hold a certificate of competency from the Board of Examiners to do all such plumbing work as he may engage to do, and whether he is a practical plumber himself or not, will not permit or allow any such work to be done in connection with the business except by such registered plumbers, and that he will not violate any of the terms and conditions, rules and regulations contained in this By-law, or in any other By-law which shall come into force from time to time in the City of New Westminster respecting plumbing, drainage, sanitary matters and water works within the said City.

7. Every person desiring such license shall file with the Inspector of Plumbing, a petition in writing giving name of applicant, and in the case of a partnership, the name of each member thereof, together with the place of business, and asking to become a licensed master plumber, and said petition shall be accompanied by the bond and fee hereinbefore mentioned.

8. Any change in firm or location of the business shall be promptly reported to the Plumbing Inspector, and the license shall be kept in a conspicuous place at the location of the business.

9. When any member of a partnership or company is licensed individually for the partnership or company, the license may be issued in the name of the firm, co-partnership or company, the said license setting out the names of the members of the firm, co-partnership or directors of the company and the date the license was granted, and no license so granted shall be transferable except with the permission of the Plumbing Inspector.

10. All licensed master plumbers shall be held responsible for all acts of their employees in connection with their business for which such bond and license is issued.

11. Every such bond and license shall be for the year current at the time of the granting thereof, and shall expire on the 15th day of January next succeeding the date of issue.

12. Upon satisfactory evidence furnished to the Plumbing Inspector that any master plumber has been twice convicted by the Police Magistrate, or a Justice of the Peace, of any violation of the provisions of this By-law, or any of the By-laws respecting plumbing, drainage, sanitary matters, or water works, his license shall be, ipso facto, forfeited and returned to the Inspector.

13. Any master plumber whose bonds and license may become forfeited shall not again be entitled to a license until the said declaration of forfeiture shall be revoked by the Plumbing Inspector and if such master plumber is carrying on his business in co-operation, or as a member of a company, the co-partnership or company shall not carry on the business of plumbing from the date of such cancellation.

14. Before proceeding to construct re-construct, alter or change any portion of the plumbing, drainage or ventilation of any building, the owner, his agent, or the master plumber constructing the same shall file in the office of the Plumbing Inspector an application for a permit therefor, and such application shall be accompanied with a specification or abstract thereof, in a blank form prescribed and supplied for that purpose by the Plumbing Inspector, stating the nature of work to be done, and giving the size, kinds and weights of all pipes, traps and fittings, together with a description of all closets and other fixtures, and a plan with a description of the locality sufficient for identification, and showing the drainage system complete. Plans must be legibly drawn in ink on a scale of 1-8 in. to the foot; provided, however, that this clause shall not apply to small repairs which do not alter the plan of the plumbing.

15. A permit shall be granted or refused within seven days from the time of filing of the application, and the permit of the Plumbing Inspector (if granted) shall be valid for six months from the date of issue.

16. If the Plumbing Inspector shall find that the said plans and specifications do not conform with the rules and requirements laid down in respect to plumbing and drainage in the By-laws of the City of New Westminster, he shall not issue any permit for the plumbing and drainage, and it shall be unlawful to proceed therewith.

17. After a plan or specification has once been approved no alteration or deviation from the same will be allowed, except with the written consent of the Plumbing Inspector.

18. From and after the passing of this By-law every owner, or agent of an owner, of any building, doing or causing to be done, any plumbing in such building shall, on the same being passed by the Plumbing Inspector be granted a certificate that such plumbing has been done in accordance with the City By-laws, and on being requested to do so shall deliver such certificate to any person proposing to purchase or occupy such building.

19. No part of any plumbing or drainage work shall be covered or concealed in any way until it has been examined and approved of by the Plumbing Inspector, to whom notice must be sent when the work is sufficiently advanced to be inspected, unless in the case of drainage below the surface of the ground, which the Inspector has failed to inspect within the five working hours next ensuing after being notified, then the ground may be filled in, in case of an emergency affecting the public safety.

20. All materials must be of good quality and free from defects and the work must be executed in a thorough and workmanlike manner.

21. The arrangement of soil and waste pipe must be as direct as possible.

22. The soil, waste and ventilating pipes and traps must, where practicable, be exposed to view for ready inspection at all times and for convenience in repairing. When necessarily placed within partitions or in recesses of walls, soil, waste and ventilating pipes must be covered with woodwork so fastened as to be readily removed. In no case shall they be so placed as to be absolutely inaccessible unless under written permission from the Plumbing Inspector.

23. When the ground is made or unsound the house sewer shall be of medium or standard cast-iron or brass pipe, with joints properly caulked with lead.

24. In sound ground, providing it is outside of the building, hard salt, glazed, vitrified pipe may be used; each length shall be wetted before being laid and the space completely filled with cement mortar, made in the proportion of two of good, clean, sharp sand and one of the best Portland cement, except in wet ground, when a gasket shall be placed around the spigot and forced down to the bottom of the socket and finished with mortar cement, as described above. Each pipe must be cleaned out with a mop after being laid. The different lengths must be laid in perfect line on the bottom and sides. All connections must be through "Y" junctions.

25. Any soil pipe passing through a building, or beneath the floor of a cellar or basement, shall be of cast-iron or brass as in section 23, and shall extend to at least five feet outside the building, and no wall shall be built leaning solidly upon the same.

26. Every vertical soil pipe shall be cast-iron or brass, and shall extend a sufficient height above the highest window, roof, or coping, or light shaft, to the satisfaction of the Plumbing Inspector.

27. No rain water down pipe, or chimney flue shall be used as a ventilator for any sewer trap, soil or waste pipe, or as a soil or waste pipe.

28. Each building in which a water closet is placed shall be provided with a main ventilating pipe of cast iron or wrought iron pipe, galvanized, of not less diameter than four inches, which shall be carried at least two feet above the highest window, opening or light shaft.

29. Soil or main ventilating pipes in an extension must be carried to and above the roof of the main building, when otherwise they would open within 40 feet of any openings of the main or adjoining house.

30. No soil pipe shall be less than four inches in diameter. A waste pipe receiving the discharge of five or more sinks shall not be less than three inches in diameter and shall have two-inch branches.

31. When lead pipe is used to connect fixtures with vertical soil or waste pipe, or to connect traps with main ventilators, it shall not be lighter than:

1¼ inches in diameter, 5¾ pounds per yard.

1½ inches in diameter, 7 pounds per yard.

2 inches in diameter, 8 pounds per yard.

2½ inches in diameter, 10½ pounds per yard.

3 inches in diameter, 13½ pounds per yard.

4 inches in diameter, 24 pounds per yard.

Trap vent pipes shall be of brass, lead, cast or galvanized wrought iron. All traps and fittings shall be equal in quality and thickness to the pipes to which they are attached.

32. All cast-iron pipes must be of the best clean grey metal, free from sand cracks, honeycomb, porous places, air holes, or other defects, and of the grade known as "Standard" which may be used below all fixtures, and for ventilating pipes the grade known as "Standard" of the heavy quality. In buildings over three stories in height the lower three stories must be fitted with the grade known as "medium." The following will be accepted:

Standards 2, 3, 4, 5, 6 inches in diameter.

Below fixtures 3, 4½, 6½, 8½, 10, 20 pounds per foot.

Above fixtures 3, 4½, 6½, pounds per foot.

Medium 5½, 9½, 13, 17, 20 pounds per foot.

All fittings used in connection with such pipes shall correspond in weight and quality. All such pipes and fittings to be coated inside and out with tar and asphaltum.

33. Before being accepted, all plumbing work shall be tested by water or other test approved by and made in the presence of the plumbing inspector. All defective material shall be removed and replaced, and bad workmanship made good, at the expense of the master plumber doing the work.

34. All joints in iron or brass sewer pipe, soil pipe, waste pipe and ventilators shall be made with a gasket of oakum, and lead, hand caulked, and be perfectly gas tight.

35. All connections of lead with iron or brass pipe shall be made with a brass ferrule of the same diameter of the lead pipe, put in a hub of the iron pipe and caulked with lead. The ferrule shall be connected with the lead pipe with a wiped joint. Vent and flush pipes of water closets shall be connected with brass couplings.

36. All connections of lead, waste and vent pipes shall be made with wiped joint.

37. All water closets, urinals, sinks, basins, wash-trays, baths, and all tubs or sets of tubs, adn hydrant waste pipes shall be separated and effectively trapped, except when a sink and washtubs immediately adjoin each other, in which case the waste pipe from the tubs may be connected with the inlet side of the sink traps. Urinal platforms if connected with the sewers must also be properly trapped, vented and automatically flushed with water from a supply tank.

38. Tanks shall be placed as near the fixtures as practicable, and in no case shall a trap be more than two feet from the fixture. All traps must have a cleaning out screw on the under side.

39. All waste pipes from fixtures other than water closets shall be provided at the outlet with strong metal stringers, and all sinks shall be provided with approved grease traps, except when such fixture is to be used for other than household purposes.

40. The waste pipes from no other fixtures shall be connected with a water closet trap.

41. All traps shall be protected from syphonage by a ventilating pipe leading from the highest and outer portion of the trap, either separate or joining the main ventilating pipe, above the highest fixture, or by a sealed syphon preventer, which will only be allowed if in the opinion of the inspector it is impracticable to provide otherwise.

42. For traps in water closets the branch vetnilating pipe shall not be less than two inches in diameter, and not less than three inches for a building of three stories or more in height. Where a bath or basin, or both, are in the same room with a water closet, the vents for the same may join the closet vent above the fixture. In no case shall more than three water closets communicate with the same ventilating pipe unless it is over two inches in diameter.

43. Overflow pipes must discharge into the open air and may have a flap on the end to keep out draught.

44. Every safe under a wash basin, bath, urinal, water-closet or other urinal, water-closet or other other fixtures, shall be drained by a special pipe unconnected with a sewer, waste or soil pipe, discharging into the open air.

45. No drain pipes from refrigerators shall be directly connected with any soil pipe, waste or sewer.

46. Water-closets shall not be placed in an unventilated room or compartment. In every case there shall be an opening to the outer air. All water-closets shall be supplied with water from special tanks, and the water from these shall not be used for any other purposes. No water-closets shall be directly supplied from the water mains or service pipes. Water closet cisterns shall be fitted with ball taps, etc., to prevent waste.

47. Where the trap of a closet is above the floor, the connection with the soil pipe shall be made with brass and rubber approved floor flanges.

48. Overflow or discharge pipes from tanks for drinking water shall never be directly connected with any soil, vent, waste pipe or sewer.

49. No closet or any other convenience which allows the escape into the house of air or gas which has been confined in any part of it, or from the drain or soil pipe, or which allows the accumulation of filth in or about it, shall be fitted up or used.

50. All water pipes must be protected from injury or settling.

51. The plumbing inspector shall have the power to enter upon any premises and examine the plumbing, ventilation and drains, and should the same, in his opinion, be in an unsanitary condition, may notify the owner, or his agents, to have the same put in a sanitary condition, and any person neglecting to do so forthwith, to the satisfaction of the pumbing inspector shall be liable to the penalties of this by-law.

52. The plumbing inspector is also authorized to receive and place on file drawings and descriptions of the plumbing and drainage of buildings executed in the City of New Westminster, prior to the passage of this by-law, and examine and give a certificate, if in accordance with the provisions of this by-law, upon request by owners of said buildings.

53. Any person guilty of an infraction of any the provisions of this by-law shall be liable, on conviction, to be fined in any sum not xeceeding $100, inclusive of costs, and in case of non-payment of the fine and costs the same may be levied by distress and sale of goods and chattels of the offender, and in case of non-payment of the fine, and there being no distress found out of which the same can be levied, such offender shall be liable to be imprisoned for any period not exceeding two months.

53A. This by-law shall come into force from and after such date as may be named by the council by resolution.

54. This by-law may be cited as the "Plumbers and Plumbing Regulation By-law, 1906."

Done and passed in open council the 4th day of June, 1906.

(L. S.) W. A. DUNCAN,
City Clerk.

W. H. KEARY,
Mayor.

PENITENTIARY SUPPLIES.

Sealed Tenders addressed to "Inspectors of Penitentaries, Ottawa," and endorsed "Tenders for Supplies," will be received until Monday, 25th June, inclusive, from parties desirous of contracting for supplies, for the fiscal year 1906-1907, for the following institutions, namely:—

Kingston Penitentiary.
St. Vincent de Paul Penitentiary.
Dorchester Penitentiary.
Manitoba Penitentiary.
British Columbia Penitentiary.
Alberta Penitentiary.

Separate tenders will be received for each of the following classes of supplies:—

1. Milk, pure fresh.
2. Beef and mutton (fresh).
3. Forage.
4. Coal (anthracite and bituminous).
5. Cordwood.
6. Groceries, Pork, Bacon.
7. Coal Oil (in barrels).
8. Dry Goods.
9. Drugs and Medicines.
10. Leather and Findings.
11. Hardware, Tinware, Paints, Oils &c.
12. Fish, fresh.

Details of information as to form of contract, together with forms of tender, will be furnished on application to the Wardens of the various institutions.

All supplies are subject to the approval of the Warden.

All tenders submitted must specify clearly the institution, or institutions, which it is proposed to supply, and must bear the endorsation of at least two responsible sureties.

Papers inserting this notice without authority from the King's Printer will not be paid therefor.

DOUGLAS STEWART,
GEO. W. DAWSON,
Inspectors of Penitentiaries.
Department of Justice,
Ottawa, May 25, 1906.

Synopsis of Canadian Homestead Regulations

Any available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans.

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY.
Deputy Minister of the Interior.

WELCOMES PASTOR TO HIS NEW CHARGE

Congregation of St. Paul's Episcopal Church Extends a Hearty Greeting to Rev. Mr. Owen—Official Address is Presented.

The reception of the Rev. Mr. Owen, the new minister of St. Paul's Reformed Episcopal church, was held last evening in the basement of the church, the Sunday school superintendent, Mr. Maxwell, occupying the chair. An excellent programme was presented during the meeting, which was opened by the chairman's few remarks of welcome. The orchestra then favored those present with a selection, after which the address of welcome, appended below, was read by Secretary-Treasurer Johnson.

Alfred Johnson sang a song entitled "The Song of the Anvil," and Rev. Mr. Vert spoke a few words of welcome to the new pastor. Miss A. Munn favored the gathering with a Scotch selection which was vigorously encored by the audience. Rev. J. S. Henderson of St. Andrew's Presbyterian church was called on by the chairman, and during his address gave some very sound advice to the congregation. He also complimented the new rector on the excellent condition in which the affairs of the church were and said that this was now the highwater mark in its history.

Rev. Dr. Taylor spoke of the church's increase during the past years and hoped that it would continue to do so in the future. Dr. Sullivan then gave a vocal selection which, like the other numbers on the programme, was well rendered.

Mr. Owen, the newly installed pastor, delivered a short address, in which he stated that although he had always been a pioneer working on the outskirts of civilization, he felt that his succes was assured, in this case. He felt deeply the kindness manifested towards him by the church.

The Venerable Bishop Cridge also addressed those who were present and remarked that he felt glad to see so many young people. He also said he was overjoyed to see men among the congregation who had given their hearts to the Lord as boys and were still living in the light of His presence.

After the bishop's speech, Miss Schaake played an instrumental selection which was creditably rendered and after refreshments, served by the ladies of the church, the gathering broke up.

Address of Welcome.

"Rev. Arthur De. B. Owen,
"Rector of St. Paul's Reformed Episcopal Church,
"New Westminster, B. C.

"Rev. and Dear Sir:

"The circumstances under which we gather tonight are exceptionally pleasing at this time. To extend to you a right hearty welcome to the pulpit of St. Paul's is the purpose for which the congregation have assembled, and we ask you to accept this assurance as proceeding from the heart of each member present as well as those of our number who are unavoidably prevented from attending this meeting.

"When some months ago the Rev. J. Alfred Seymour, who so acceptably filled our pulpit for two and a half years, intimated to the Vestry that circumstances compelled him to cease serving us, we were, indeed, puzzled to know just what to do. After careful and continued consultation the vestry's attention was drawn to the fact that there was one who was rendering excellent service in a neighboring settlement who might accept a call to St. Paul's were it extended to him. Negotiations were entered into with the reverend gentleman with the result that today we find the Rev. Arthur De B. Owen in full charge of our little church.

"We wish to point out at this time that never before in the history of St. Paul's church were the conditions in every department more prosperous than they are at the present time. We rejoice in this for the reason that this state of affairs will tend to make your labors less arduous than they would otherwise have been. We believe that many additions can easily be made to our numbers, and we feel confident that you will use your very best endeavors to promote the welfare of the church of which you have so recently taken charge.

"We welcome you, Sir, not only in your capacity as rector but also as a citizen. We have heard before now of your worth as a citizen in other places, and we believe that you will always stand up for, and be loyal to those things which tend to advance the interest of one of the prettiest cities on the Pacific coast.

"We are indeed grateful to a good and kind Providence for the happy circumstances in which we find ourselves, and our prayer is that St. Paul's church may continue to grow until its power for good will be even more effectively felt than it is today.

"We are very pleased to note the continued good health of our reverend friend, the Right Rev. Bishop Cridge, whom we are delighted to have with us tonight, and we are thankful indeed that he has been spared to again visit us for the purpose of installing you into your new sphere of labor.

"In conclusion, we wish to express the hope that our relations as rector and people may be as pleasant and enjoyable as has been characteristic of that unity which has hitherto existed between the former rectors and those who worshipped with them.

"We sincerely hope that Mrs. Owen and the children, with yourself, will find the Royal City an acceptable place in which to reside, and that your sojourn among us may be as pleasant as it is possible to be.

"Again wishing you and yours a hearty welcome to our church, we are, Sir, yours very faithfully,

"J. J. JOHNSTON,
"Secretary-Treasurer.
"S. J. PEARCE,
"Rector's Warden.
"L. THORNBER,
"People's Warden."

WINNER WILL COME TO NEW WESTMINSTER

Prize for Girl Who Scores in Nelson's Popularity Contest is Trip to the Coast.

Nelson, B. C., June 25.—Even in this age of voting contests it is seldom that a popularity contest is conducted under civic auspices. In this city there is an association known as the Twenty Thousand Club, which has for its object the boosting of the City of Nelson and the increasing of the population to 20,000 in five years. The association is semi-official in nature, but is recognized by the city council as a regular body.

With the object of getting a large membership in the shortest possible time the Twenty Thousand Club started a popularity contest on the first of this month and it closes on Saturday night next. Mayor Gillett is official referee and next Saturday night he will make his decision.

Two Popular Candidates.

Two popular young ladies are being balloted upon for the honor of being the most popular young lady in Nelson and for a trip to the coast cities. The winner will visit the cities of Vancouver, New Westminster, Victoria, Seattle, Tacoma, Portland and Spokane at the expense of the city, and, needless to say, both contestants are working hard for the double honors.

The contest is fast becoming one of the live topics of the hour in this bustling little city, and many a young man foregoes his tobacco or some luxury for a week or so to purchase a membership ticket in the club and to win the gratitude of one or other of the fair contestants.

Miss McCandlish Leads.

Miss Mabel McCandlish, daughter of the proprietor of the Silver King hotel, has a slight lead over her opponent at present, but Miss Jean Cameron is fast gaining ground. She is book-keeper in The Daily News office and is very popular among the business men, who promise to roll up a big vote in her favor next week. Miss Cameron has a bad case of "newspaper fever" and is an enthusiastic member of the "fourth estate."

The Old Soldier—Yes, sir, and I can tell you that I've had six horses killed under me in war.

The Motorist—Pooh, that's nothing! I've had a dozen pedestrians killed under me.

IN SPORTING CIRCLES

WILL AMERICANS BE BARRED FROM HENLEY REGATTA?

Proposition of Oxford Coach Raises a Storm of Controversy—Canadians Hard at Work.

Henley, England, June 25.—The residents of this riverside town who reap a rich harvest yearly from the regatta are anathematizing Coach Fletcher of Oxford. They realize that their pockets will be touched if the proposition to exclude Americans from future regattas is carried, and they do not like the prospects. There are indications that considerable opposition will develop against Mr. Fletcher's sweeping resolution. He contends that the American National Association of Amateur Oarsmen did not properly investigate the amateur standing of the vesper oarsmen. Joseph Wright, stroke of the Argonaut (Canadian) crew, denounces the Fletcher resolution as being an "insult to American colleges." He said: "If the resolution is carried, it will create a lot of bad feeling. It is manifestly unfair to cast a slur on the amateurism of over forty big rowing clubs because of one or two black sheep. Amateur rowing is the purest of sports in America and Canada."

Sir John Edwards-Moss (a high Oxford-Eton authority on rowing) is not especially hostile to American entries but he considers Henley is not the proper course for international racing, because under conditions of wind, a second rate crew might win through having a sheltered position.

The Canadians bravely faced a heavy wind this afternoon, rowing over the entire course. They started at 40 strokes per minute and finished at 38 strokes. Time 23 minutes, 35 seconds.

MONDAYS' BIG LACROSSE MATCH.

The local senior lacrosse team will on Monday next meet its old time rival, the Vancouver twelve, for the first match of the present season. The game is to be played at Recreation park, Vancouver, and promises to be a "corker" from start to finish. Vancouver is not too confident that victory will rest on her banners; but the officials of the Terminal City club have determined that everything that can possibly be done to win the notice of that coy bird will be done. As for New Westminster—well, she has her team of home growns and is satisfied. If skill, speed and knowledge of the game will suffice, success is assured.

"There will be a number of changes in the Vancouver team for the coming match," says the Vancouver Province. "Gibbons, the boy with the sure eye and ready stick, will be in goal of course, to look after anything happening around the territory of point and cover point respectively. K. Campbell and W. Payne will be on the defence field, and for the coming match Bob Springer will be seen in the green and maroon uniform again. He will play first defence, while Campbell and Payne will attend to things at second and third. General regret is expressed in lacrosse circles that Garvey will not be able to play in this match. In his place, however, will be Bob Cameron, the speedy sprinter, who will be back at his old position of centre field feeling faster and stronger than ever after the rest which he has been forced to take from the injuries which he received in the match on Victoria day. These players will in all probability constitute the team's lineup as far as centre field. For the home division there are eight good candidates—all so good in fact that it promises to be a delicate matter to choose the remaining five to make up the team. Capt. Matheson will of course be one of the five, and the seven from whom the selection will be made comprise Clarkson, Watson, Knight, Dodds, Douglas, Godfrey and Wilson, the former Brantford player. An announcement regarding the referees for the big match will be made very shortly. It is expected that local men will officiate on that occasion. Among the arrivals from the East on Saturday's delayed expres was Mr. George Tuck, a former Brantford player, who intends to make his home in this city in the future and will sign on as a member of the Vancouver club. He is a crack home field player, and will help to still further strengthen the local club in that department."
