BRAKEMAN MANGLED BENEATH FREIGHT CAR

Harry Haliburton Badly Mangled in C.P.R. Yards Last Night.

A bad accident occurred in the C. P. R. yards here about nine o'clock last night, when Harry Haliburton, a brakeman, was crushed beneath a freight car, suffering such injuries that his right leg had to be amputated.

Haliburton was working on the night shift in the vicinity of Twelfth and Thirteenth streets, where some cars were shunting, when in some manner he fell beneath a moving freight car. The trucks of the car went over his prostrate body, grinding his right leg to pieces and breaking his arm in several places.

Doctors Manchester, Kenny and Walker were at once summoned and the injured man was taken to the Royal Columbian hospital. It was evident that the only hopes of saving his life lay in amputating his leg. and Dr. Walker performed the operation within an hour or two of the accident.

Haliburton is an American, who has been in New Westminster for about three months, during which time he has been employed with the C. P. R. He is about twenty-eight years old and unmarried. He has a brother, a G. N. railway conductor, running out of Everett.

Just as The News is going to press word is received from the hospital that Haliburton died at four o'clock.

CITY LOTS IN DEMAND.

Property in West End Is Attracting Attention Just Now.

Though acreage has not been in such demand the last few days, city lots have been sold freely and there is quite a movement in lots in the West End, particularly in city blocks 23 and 11, and the prices here have jumped considerably during the last few weeks for no particular reason except that there were inquiries for property hereabouts for a manufacturing firm.

There is also a speculative demand for Sapperton lots at the extreme northeast corner owing to the probability of the B. C. Electric Ry. cutting through there.

A new Sapperton subdivision will shortly be put on the market by Evans & Darke with lots at very reasonable prices and terms to tempt the speculator.

The B. C. Securities report a steady business during the last few weeks in city lots, and the National Finance company has done a big business in Burnaby, buying there being chiefly from Vancouver.

Cloverdale has been receiving considerable attention owing to the tram facilities which are looming up and the heavy advertising from Vancouver. There is cheap stuff to be picked up there that will pay small investors.

THEATRE PATRON SITS DOWN ON HAT PINS

Los Angeles, May 3.—Percy Van Dyke, a visitor from New York, entered a darkened motion picture theatre yesterday, pushed his way along a row of seats occupied mostly by women, sat down and instantly leaped into the air, yelling. He had come down on a phalanx of long, sharp hat pins.

His body shot into the darkness and he landed in the lap of a woman in front. This woman's escort immediately leaped upon Van Dyke and there were signs of panic in the twilight of the house, when the police were called.

Van Dyke was taken to the receiving hospital.

WORRY IRISH LANDLORDS BY DRIVING CATTLE AWAY

London, May 3.—Cattle driving, that novel form of political agitation, has been resumed in Ireland, in county Westmeath, where until the passage of the liberal government's land bill of a year or two ago it had been rife.

The plan usually followed is for a party of peasants to descend on the ranch of a landholder who by letting his land for pasturage has incurred the ill-will of his neighbors, most of whom favor the abolition of this system. Then the cattle are collected and driven for miles across country at night. Usually they are recovered, but occasionally they cannot be found. None are ever stolen.

The cattle-driving campaign was originated by L. Ginnell, a nationalist member of parliament, who was a warm supporter of the abolition of the present Irish land tenure system.

JAPANESE THREATEN STRIKE IN HONOLULU

Honolulu, May 3.—A great strike of Japanese plantation laborers throughout the islands is threatened, according to Japanese leaders here today.

A Japanese in touch with the situation said today that the laborers are organizing that all will quit work when the order comes.

"This territory will be paralyzed when the strike comes,' declared the speaker.

WHITE PLAGUE FOES DISCUSS PROBLEMS

Experts in Washington Try to Find Out Causes and Cure of Disease.

Washington, May 3.—Whether tuberculosis is caused by milk or meat infected from bovine sources and what may be the best employment for tubercular patients, were the subjects discussed today at the session of the national association for the study and prevention of the disease. Discussion on the former topic was started by Dr. William H. Park, of New York, and on the latter by Dr. A. M. Foster, of Louisville, Ky. Dr. Park held that pulmonary tuberculosis among adults was not the result of impure milks or foods.

Dr. Adolphus Knopf, of New York, attacked the Nebraska law which requires indigent consumptives to submit to the serum treatment, and also the action of the Oklahoma state board of medical examiners which forbids any physician to practice in the state if he is suffering or has suffered from tuberculosis.

Dr. Park's paper was followed by wide discussion. Dr. Marshall Fayban, of Boston, presented the story of two cases of human tuberculosis in which the bovine type of bacillus was associated.

Following Dr. Knopf's paper in the clinical section, Dr. Albert P. Francine, of Philadelphia, declared that all medical colleges should make tuberculosis a special branch and give it a permanent place in the curricula.

TROUBLE IN MATUATU.

Deposition of King of Wallis Island Annoys Natives.

Victoria, May 3.—Because they deposed the king of Wallis island and placed another chief on his throne, the blacks of the South Sea islands are to be visited by a French warship in June, according to news brought by the steamer Makura, which reached port today.

It was expected there would be a big tribal fight over the deposition, but the king had no following. The trouble arose over the French residents banishing a prominent chief in the king's name. The banished man's friends went straight to Matuatu, the king's town and removed him forcibly.

Wallis island is a French protectorate.

Cheap Sunday Paper.

Boston, May 3.—Announcement was made by The Boston Journal today that it will issue a one-cent Sunday edition beginning with next Sunday morning.

GEORGIAN BAY SCHEME DISCUSSED IN COMMONS

Large Sum of Money Will Be Spent in French River Section—Earning Power Guaranteed.

Ottawa, May 3.—The amended propositions of the Montreal, Ottawa & Georgian Bay Canal company were completed in the house of commons this morning. These apply only to the Georgian bay French river section and are as follows:

1. The control and ownership of the canal to be in the hands of the company, the government, if so desiring, to be represented.

2. The company to construct and operate the canal.

3. The capital to be $100,000,000 of bonds, and $50,000,000 stock, of which $25,000,000 bonds and $12,500 000 stock would be applied to the French river section.

4. The government to guarantee to the bondholders that the net earnings of the canal shall not be less than 3 1-2 per cent. per annum, of which 3 per cent. would go to the bondholders and one-half per cent. be applied as a sinking fund, the government guarantee to be limited to $750,000 per annum.

WORKMEN HURT.

Over Twenty Workers Injured in Philadelphia Explosion.

Philadelphia, May 3.—More than a score of workmen were injured this afternoon in an explosion in the tenting house of the fertilizer works on M. L. Shoemaker & Co., Ltd., at Delaware avenue and Venango streets, in the northeastern portion of the city. A report that several men were killed is being investigated.

KASLO HOTEL COLLAPSES.

Building Leaves Supports and Drops to Ground Suddenly.

Nelson , May 3.—Yesterday afternoon the Great Northern hotel at Kaslo left its supports and dropped between three and four feet. At the time several men were sleeping in the building and luckily escaped with a severe shaking.

The adjoining Opera Comique building is leaning over very badly and to save any serious results the city is to take steps for its removal.

WESTMINSTER LADY TO BE GIVEN DEGREE OF CHIVALRY

Coveted Odd Fellows' Decoration to Be Conferred in This City for the First Time Tonight.

For the first time in the history of New Westminster Odd Fellowship, the degree of Chivalry will be conferred in this city this evening, when Mrs. W. E. A. Gilley will be decorated, little Miss Dorothy Adams, daughter of George Adams, pinning on the jewel.

The ceremonies incidental to the conferring of the degree will be performed by Canton New Westminster No. 4, assisted by Vancouver Canton No. 1. C. S. Keith, P. M., P. G. R., will command the local canton, assisted by Major George Adams.

Dancing and refreshments will follow the decoration.

CUSTOMS OF APRIL SHOW BIG INCREASE

Ottawa, May 3.—The customs revenue for April totalled $5,054,770, an increase of $1,093,092, or over twenty-five per cent. compared with April last year. Imports continue to break all records.

Hon. George E. Foster resumed his seat in the commons yesterday morning after six weeks' illness, following his libel action against The Globe. Foster is convalescing slowly from a serious nervous breakdown, and will spend the summer quietly at his old home in New Brunswick. This morning he was given a hearty reception by fellow members in the house, his appearance being greeted with vigorous and continued applause.

The bill to incorporate a retail merchants' association of Canada was passed after a stiff fight.

COTTON DISPUTE SERIOUS.

Lancashire Mills Will Announce Five Per Cent. Wage Reduction.

London, May 3.—The Lancashire cotton dispute is serious. The masters will probably announce a five per cent. reduction in wages today.

The operatives demand that this action, if deemed necessary by trade conditions, be postponed for one year. The employers are willing to postpone action until September, but this compromise is not favored by the operatives.

EMPIRE DAY MOVEMENT.

Earl of Meath Tells of Growth of Imperial Sentiment.

London, May 3.—Lord Meath predicts that the 7,500,000 scholars who last year observed Empire Day will be largely increased in number this year. Many poor schools throughout the Empire have no flag, he says. He asks a supply from believers in a movement for a healthy national influence being a non-party, non-aggressive effort to awaken all British peoples to the magnitude and seriousness of the responsibilities of British citizenship.

NOTE WAS DISRESPECTFUL.

Peruvian Minister Must Revise Terms of His Resignation.

Lima, Peru, May 3.—The note of resignation which the Peruvian minister to the Argentine Republic, E. de Lariva Aguero, presented to the government has been returned to him returned to him because of its alleged disrespectful terms.

In resigning the minister said that the direction of foreign affairs in Peru had been characterized by many mistakes during the past nineteen months.

Another Dreadnought at Sea.

London, May 3.—The tenth Dreadnought which is named the St. Vincent, was placed in commission today.

AGNEW'S BETTING BILL MODIFIED IN SENATE

Albany, N. Y., May 3.—The senate today, on motion of Senator Agnew, amended his bill prohibiting the publication of betting odds so as to make it apply solely to bookmaking on horse races as introduced.

The bill was interpreted to include in its prohibition betting odds on boat races, football, baseball and amateur sports.

Senator Bracket offered an amendment eliminating the words "with or without writing" as applied to bookmaking and substituting "prepared by writing or other records or displays, lists or memorandum of odds offered to bet."

NEIGHBORS PLANT CROP OF NORTH DAKOTA MAN

Des Lacs, N. D., May 3.—One hundred acres of land plowed and sown in a single day represents the generosity of the neighbors of E. W. Straley, a farmer residing five miles from Des Lacs, who has been sick all winter and spring.

With twenty-two outfits on the field at once, and with the wives and daughters of a number of the neighbors engaged in the work present to prepare meals, yesterday's sight was a unique one.

Bringing gang plows, harrows, drills and one even coming with a steam plow, the neighbors did their work in a rapid manner. At noon dinner was served by the women on the lawn. Mr. Straley was able to be out for the first time in many months.

MANY TURNED AWAY FROM OPERETTA "TRIAL BY JURY"

Large Crowd Greets First Production of Pleasing Performance at St. Barnabas.

The presentation of the operetta "Trial by Jury," given by the St. Barnabas Dramatic club, last night was a huge success in almost every particular save that of accommodation. St. Barnabas hall proved much too small to accommodate the crowd, many of whom were standing and many more of whom were seated so uncomfortably that they could not possibly enjoy the performance. Chairs were crammed into the aisles in such a way that exit would have been impossible in case of accident.

However, those who did get a glimpse of the show saw something well worth attending, and those who did not see, but were able to hear, were also fortunate, though in a lesser degree. Probably the most noticeable feature of the production was the beauty of the bridesmaids, who were summoned as witnesses in the old but ever-new attempt of the fair spinster to collect damages from a nervous youth with backsliding propensities. Charming is a mild work to apply to the six young ladies, Miss Jeanette Peele, Miss Elsie Emett, Miss MacGowan, Miss Norah Armstrong, Miss Josephine Martin and Miss Corbould, who backed up the rejected bride in her preposterous but successful claims.

The fair plaintiff, Miss Vera Corbould, acted her part exceptionally well and her singing was appreciated. The judge, Bernard Hill, was fine, and Nigel O'Bifian, as counsel for the plaintiff, made a great hit. His singing was splendid. H. Mackness as the defendant shone in a difficult role. The other parts were well taken.

The playing of Frank Major, who acted as accompanist, was a factor in making the performance the success it was.

Previous to "Trial by Jury" there was a short musical program which was much enjoyed by the audience.

Over $80 was realized at the performance.

The operetta will be given again next Tuesday night in the Burnaby municipal hall under the auspices of St. Alban's church.

INVESTIGATION.

Causes Leading to Paper Mills Strike to Be Probed.

Albany, N. Y., May 3. — Attorney General O'Malley today designated Deputy Attorney General James S. Kiley to act as counsel for the state board of mediation and arbitration in an investigation ordered by the state commissioner of labor into the dispute between the International Paper company and its employees who have on strike for several weeks.

By ordering the investigation the commissioner of labor hopes to get at the cause of the strike, and possibly bring about a settlement of the difficulties.

This is the first time such an investigation has been ordered by the state since 1899. John Lundrigan and P. J. Downey, of the state labor department, members of the boards, went to Corinth tonight, accompanied by Mr. Kiley, where the first hearing will take place at 11 a. m. tomorrow.

FOUR HUNDRED GARDEN LABORERS MAY STRIKE

Newport, R.I., May 3.—The wealthy summer residents of Newport are likely to have a labor strike to contend with. The gardeners' helpers employed on the places here have been holding meetings recently and have organized for the purpose of securing a raise of 10 per cent.

Their pay at present averages $45 a month. The gardeners say that many laborers of other classes will join them in a strike if their demands are not granted.

BRITAIN WAS FAVORED.

Japanese Tariff Framers Sought to Protect Their Interests.

London, May 3.—The Tokio correspondent af The Times says that the Japanese tariff framers took the utmost care to consider British interests.

Reductions were made in some of the schedules, but none were conspicuously increased.

Bank Men Return East.

Winnipeg, May 3.—President Somers, Vice President George and General Manager Broughall, of the Sterling Bank of Canada, who have been in the city for several days completing arrangements for the erection of a new building on the property recently acquired by the bank on Portage avenue, returned to Toronto tonight.

Election Is Annulled.

London, May 3.—The return of Sir Christopher Furness at the general election as member of parliament for Hartlepool an industrial center in the North of England, has been annulled. Sir Christopher's majority was 777.

Winnipeg Postal Returns Increase.

Winnipeg, May 3.—The business of the Winnipeg post office for the month of April shows an increase of twenty per cent. over that of the month of April, 1909.

POSTMASTER KENNEDY TENDERS RESIGNATION

Finds Duties too Arduous and Will Retire From Office on June 1.

George Kennedy, postmaster of the local office, yesterday forwarded his resignation from office to the postmaster general, the same to take effect on the first of June. It is customary to give one month's notice of leaving, and in order to be assured the department would be notified on time Mr. Kennedy telegraphed that his written resignation was on its way.

Mr. Kennedy has been contemplating leaving the postal service for some time, but his decision was hastened by reason of the insufficient strength of staff with which the office has been manned since it went under the semi-staff basis, the department having two clerks less on the pay roll than was the case during the time Mr. Kennedy had a free hand.

Chief Post Office Superintendent Ross, of Toronto, who supervises the offices on a semi-staff basis all over Canada, has made the recommendation to the government which resulted in reducing the staff, in spite of the fact that Mr. Kennedy, and Assistant Post Office Inspector Murray, of Vancouver, both sent strong letters of protest to the department against any lessening in the number of clerks employed.

This decrease, coming at a time when the department schrdl shrdlu u when the local office is overburdened with work, has thrown a great deal more labor on the postmaster. Mr. Kennedy does not consider it just to be called upon to do this extra work, and prefers to resign, believing that by his action the department will see the force of his former demands and appoint the extra clerks needed, thereby making conditions more favorable for his successor.

When Mr. Kennedy steps out of his private office on the first of next month, he will have spent exactly ten years of his life as postmaster of New Westminster, having succeeded J. C. Brown, now warden of the British Columbia penitentiary, to office on June 1, 1900. He had a previous experience in postal work, having acted as postmaster for six months about twenty years ago, when Mr. Brown was away on a trip to Europe.

Previous to entering the civil service, Mr. Kennedy was editor of the Columbian newspaper, then owned by Kennedy Brothers. He intends supplementing the three-months' rest he enjoyed during the time that elapsed between the cessation of his newspaper work and the taking up of his post office duties by a longer period of relaxation, commencing in four weeks' time. His plans for the future are unformed.

SECURED OLD CURRENCY FOR USE IN CANADA

Time Worn Cash Said to Have Been Circulated in Connection With A. & G. W. Deal.

Winnipeg, May 3.—That W. R. Clarke, president of the Alberta & Great Waterways Railway company, obtained from the Capitol National Bank of St. Paul a large sum of money in old currency sometime last fall to take with him to Canada was the interesting evidence which was dragged out of W. A. Faulkner, one of the original members of the Athabasca syndicate, before the investigating commission this morning.

Mr. Faulkner, in addition, said that his partner, R. Newton, who arranged the transaction with the bank, told him that he (Newton) assumed Clarke wanted old currency so that it could not be traced.

This information was obtained by R. B. Bennett, counsel for the witness, at the close of a long and gruelling examination. It is likely the commission will try to secure the attendance of Newton.

Indian's Fate in Canada.

London, May 3.—The Church Missionary society at its annual meeting today expressed sympathy with the lonely missionaries in Canada, who see the Indians with their old occupations gone, decimated by disease, tempted by drink and pushed aside by whites.

Mark Twain's Will Probated.

Redding, Conn., May 3.—The will of Samuel L. Clemens (Mark Twain) was filed for probate here today. It leaves the entire estate to the surviving daughter. Clara Langhorn Clemens, wife of Ossip Gabrielowitch. The amount of the estate is not given.

Indians for Crown Colonies.

London, May 3.—The colonial office departmental committee on Indian immigration to the crown colonies opposes any indenture system preventing Indians remaining as soldiers or getting land. West Indian negro and half-breed witnesses urged that further Indians were unnecessary, local labor sufficing.

MAY DAY DETAILS ARE ALL SETTLED

Friday Will Be Gala Day For Kiddies—Masked Lancers at Evening Ball.

Between two and three thousand children, mostly girls, are expected to take part in the May Day festivities on Friday, this being the estimated juvenile population of this city. An child absent from Queen's park on Friday afternoon will either be ill in bed or locked up in the coal cellar.

The last committee meeting prior to the big event took place yesterday evening and was largely attended. Most of the session was occupied in discussing a feasible procession route to the park, the consensus of opinion being that Columbia street should be included, if at all possible. It was decided that Mayor Lee, who is up at Harrison, should be telegraphed to and asked to authorize the putting into temporary condition a number of dangerous places on the south side of Columbia street. The safety of the children, however, will be the first consideration, and if the committee in charge decides Columbia street offers too many pitfalls for the kiddies, the procession will travel from the Russell hotel to the park along other streets.

Included in the procession will be a number of automobiles, five trolleys, the Vancouver Boy Scouts, 120 strong; the Westminster Boys' Brigade, 40 strong; several ponies, ridden and driven, and a number of floats.

An innovation to be introduced this year is the appearance of the ex-master of ceremonies with the master of ceremonies, both in the parade and at the grounds. After the sports are concluded, the officials, accompanied by the Royal party, will pay the annual visit to the hospitals and to the asylum.

The last dances of the evening in which the children take part will be led off by a number of big masques, specially imported from Vancouver. This feature is sure to please the children if it does not unduly frighten them.

A request to all merchants and to caretakers of all public buildings, to hoist flags on the eventful day was voiced by the committee. The display of bunting, it is considered, will greatly add to the joyous appearance of the occasion.

Four thousand bags of candy and about two thousand yards of ribbon will be distributed to the children at the grounds.

As previously decided upon, five Maypoles will be in use this year, four of these being set at the angles of a forty-foot square, in the centre of which the May Queen's party will twine the Royal Maypole.

FISH KILLS BULL.

Bovine's Queer Taste at Cornell Has Fatal Ending.

Ithica, N. Y., May 3.—Pickled fish killed one of Cornell's prize bulls today. He was a valued Guernsey attached to the college of agriculture. Wandering into a department where students had been experimenting with fish preserved in formaldehyde the bull partook freely and died.

Bjornstjerne Bjornson Buried.

Christiana, May 3.—The funeral of the late Bjornstjerne Bjornson was held today with imposing ceremonies. It was attended by the king and queen, the members of the legations and high officials. Great crowds listened to the addresses, the principal one of which was delivered by Dr. Fritjof Nansen.

BIG SUM AWARDED FOR LOSS OF A LEG

New York, May 3.—Thirteen thousand seven hundred and fifty dollars for the loss of a leg was awarded to Harold Shafter, the fifteen-year-old son of a policeman, by the appelate division of the supreme court today, affirming a decision of the lower court. It is the largest verdict ever upheld here for such injury.

Big Lumber Firm Assigns.

St. John, N. B., May 3.—The big lumber firm of A. Cushing & Co., owning mills here and doing business of a very extensive scale, have assigned. The liabilities are very heavy but the amount is not stated. The Union Bank of Haliafx is a large creditor.

Earthquakes in Spain.

Madrid, May 3.—Violent earthquake shocks were felt at 6:35 a. m. yesterday in the provinces of Olivenza and Badajoz near the Portuguese frontier. The damage is reported slight.

The Reason Why.

Boston, May 3.—Marked increase in the world's gold supply and extravagance and waste in public and private life, are the principal reasons given for the high cost of living by a special state commission which has been investigating the subject for eight weeks.

Real Estate vs. Mortgages

Some of our shrewd clients are beginning to feel that outside property is now nearly as high as it is worth. They say that the old stock exchange axiom is good which says "Sell when everyone wants them; buy when no one wants them." They have figured out that they have done pretty well by real estate and are now buying mortgages. They say that seven to eight per cent. is good for such high class, gilt edged security—in fact there is no security better than a mortgage on improved real estate which has withstood all the scrutiny given morgages which passes through our hands. They feel that with such mortgages they can sleep pretty comfortably—no anxiety as to a possible drop in value.

If real estate has done well for you, or if you are for any reason looking for the greatest security in investment, it will pay you to see us and talk over the matter. Our knowledge is at your disposal without charge. Years of experience and study of financial matters of all kinds fit us to speak with some degree of authority.

Says Kitchener, Grim and Implacable, Would Not do as Governor-General

(From The Toronto Star Weekly.)

For three months it has been pretty well understood that Earl Carrington would succeed Earl Grey as Governor-General of Canada, but something happened, and Carrington is not coming. One day the London papers announced that he was clearing up his work at Whitehall in readiness for his successor and next day the Chronicle, which is in pretty close touch with the Asquith administration, came out with the news that Lord Carrington will not be appointed to Canada. Something had happened, and it would be interesting to know just what led to this change of program.

Several weeks ago ,when The Montreal Star was busily promoting the idea of having the Duke of Connaught as successor to Earl Grey and when cables were appearing in The London Times representing the people of Canada as unanimously afire with enthusiasm to see King Edward's brother in Rideau Hall, The Chronicle definitely announced that Earl Carrington had been selected for the post in Canada. "There is no truth in the statement," that journal now says, "He is not going to Canada. For one thing, his work at the board of agriculture is of far too valuable a character to permit of his being spared just now." That's right. If Lord Carrington is a valuable man, send somebody else.

From a different and distant quarter another nomination is put forward for the eminent, but unimportant post of governor-general. Lord Minto's term in India is closing, and somebody made, what the editor of Public Opinion calls "the pernicious suggestion" that Lord Kitchener should be sent to India as Viceroy. On hearing this The Englishman of Calcutta spoke up: "Lord Kitchener is a good man, but he has hardly been trained to fill the post of Indian Viceroy under the new conditions." Not content with that, the Calcutta paper proceeds: "It might be better for the state if he were sent to relieve Earl Grey in Canada, and if Earl Grey, following the excellent precedent afforded by Lords Dufferin and Lansdowne, and by the present Viceroy, were to come to the overseeing of the Eastern Empire."

It appears, then, that England refuses us Carrington because he proves to be a useful man at a desk in Whitehall, while India offers us Kitchener because India does not want him. If this kind of thing goes on, the people of Canada will feel like adopting Presbyterian procedure, and, when the "pulpit" falls vacant, will ask the King to moderate in a "call" to some acceptable person at home or abroad.

Lord Kitchener seems to be a man who is greatly admired—across the width of an ocean. He performed fine tasks in Egypt, in South Africa, and, perhaps, in India. But it was only too evident from the English newspapers a few months ago that he is regarded as a good deal of an elephant on his country's hands. He is too important a man to set aside yet an impossible man to get along with, owing to his years spent in war, a law unto himself and everyone else. He seems to be a Roosevelt without humor, desire for applause, or any belief in mankind. No doubt his grateful country would be thankful to any Dominion, Commonwealth, or colony which would step up with a persuasive request for his services. But, in the words of the Calcutta editor, we fear that Lord Kitchener, the grim, implacable soldier, "has hardly been trained to fill the post" of Governor-General of Canada, "under the new conditions," which have prevailed since the war of 1812.

ASTRONOMERS WILL PROBE COMET TAILS

Captivating Questions to Be Discussed By International Association for Solar Research.

Los Angeles, May 3.—Why do comets have tails? This is one of the captivating problems to be discussed by astronomers who will gather here next August for a session of the International Association for Solar Research. These scientists will represent nearly all nations, and it will be their first meeting since the assembly at Meudon, France, in 1901.

The session of the association will be held at the Carnegie observatory on Mount Wilson, and the astronomers may remain there for several months.

Comet tails are said to be produced by a force of repulsion inherent in the sun. That is the starting point in the problem. But the scientists want to satisfy themselves whether these brilliant appendages are the result of the pressure of the sun's light, or whether they are of electric origin, or produced by cathodic or other rays.

Another of the fascinating problems is to measure the degree of variation of the amount of heat and light energy the sun pours into the earth daily. Astronomers no longer regard the sun as a "solar constant," and one of the purposes of the forthcoming meeting is to ascertain as nearly as possible the relations of sun spots to the variability of sun energy.

Among the scientists who are expected to come are Professor Hartmann, director of the observatory at Gottingen, Germany; Professor Kayser, of Bonn, and Sir David Gill, former chief of the observatory at Cape of Good Hope.

APPENDICITIS FAST-CURED.

Montana Man Cures Illness by Going Without Food.

Sponkane, May 3.—Walter A. Scott, of Boseman, Mont., who is visiting in Spokane, claims to have cured appendicitis by fasting ten days. He broke his fast by drinking a glass of milk the afternoon of April 26. He shows no signs of having abstained from food for 240 hours. His cheeks are ruddy and his skin remarkably clear.

GOVERNMENT MAY STOP SLAUGHTER OF SEALS

Secretary Nagel, of Department of Commerce and Labor, Considering Conservation of Alaska Herds.

Washington, May 3.—Conservation of the Alaskan seal herds is a matter to which Secretary Nagel of the department of commerce and labor is giving close attention.

Congress has given the secretary discretionary authority and it will rest with him whether a certain number of the animals are to be slaughtered yearly or whether sealing shall be stopped altogether for a time.

The lease of the North American Commercial company, which for twenty years has enjoyed the exclusive privilege of taking the seals, expired yesterday.

To this government the sealing industry has been an important one financially, the calculation being that no less than $10,000,000 has been derived from the tax on the skins. At times the yearly receipts have been large, but recently these have dwindled because of the gradual depletion of the herds from pelagic sealing. In 1885 the number of seals estimated on the Pribilof Islands was 2,000,000. Now 140,000 is believed to be a liberal calculation.

Experts believe that by the enforcement of a closer season for one or more years by material restrictions in the number authorized to be legally killed, the herds may be replenished.

From 1835 to 1850 the seal islands were closed to sealing operations, the suspension resulting in greatly increasing the herds.

The North American Commercial company has a big plant on the seal islands. It is not improbable the government may acquire the islands. The care of the people, whose mainstay has been the sealing industry, is one of the problems to be met.

WESTERN CANADIANS PRIDE OF THE WORLD

During Coming Half Century People of Dominion Will Physically Progress.

Western Canada will be the home of the finest race of men and women in the world for perhaps the next fifty years, in the opinion of Emerson Hough, the well known writer, expressed, in an article, entitled, "The Man Question—the Genus Homo in Foreign Parts," in the last issue of the Saturday Evening Post. Mr. Hough discusses the European man first, showing how he is slowly but surely diminishing in stature, and how the same holds true to a lesser extent of the man in the eastern cities of this continent.

He draws fine distinctions between the physical characteristics of the English, German, Austrian, French and Italian soldiers, alleging that the Austrian officers are resorting to corsets to give them a more manly appearance. He goes on to show that the men of the greatest physical and mental strength drift to the newer countries, and it is for that reason that he says the largest men today are found on the Pacific coast, Alaska and in Western Canada, and, calling attention to the fact that Canada is destined to become the scene of the greatest frontier activity for the next fifty years, he says it is likewise bound to be inhabited by the largest and most daring body of men in the world. He says in part:

"As professor Shaler of Harvard was fond of pointing out, the North American continent surpasses all others in its favorableness for physical life. Practically all species, whether animals or men, have improved distinctly by translating from Europe to America, and this improvement is frequently noticeable even in the first generation.

"Of late years some of our best physical specimens have gravitated to the enterprises found in our larger cities. The first or second generation cityman is apt to be a good deal of a fellow, just as was the first or second generation frontiersman in a different day—and for the same reasons; he had the health and courage and confidence to take a chance. I don't think the street crowds of New York men measure up favorably with those of Chicago. It has been said that in the blocks around the Grand Pacific and the Board of Trade, what is called the Chicago Rialto, the average physique of the men who frequent that section is better than in almost any other business locality of that city, and better than that of any other city of America. One would doubt that today and would rather seek that highest average in the cities of the Pacific slope, the Puget Sound country, or Alaska. There, even in these commercial railroad days, one can see something of the old American life under which the boldest went into the newest of the lands and won them through sheer physical stamina and the zeal that comes out of physical hardihood. I always admired the Seattle crowd, the Tacoma or Portland crowd; to less extent the San Francisco crowd.

Western Canada the Best.

"In Europe all hope for an improving physical average is past and gone, unless we shall except the vast and undiscovered country of Russia, where some of the world's problems are yet to be worked out. Somewhere in the remote and mysterious cast the Aryans, the Cimbri and the Celts started in their great west-bound movements. The Atlantic stopped them, and there the human currents have mixed and eddied and circled and turned. At the first the best of these broke across the Atlantic. All these, mingling, will for the time halt at the Pacific; and meantime, before the sea of mankind moves on west to Russia and Asia again, we shall have in this splendid North American environment the United States and Western Canada, for a time yet at least, the finest specimens of manhood the world can produce. Perhaps Western Canada, with its large influx of splendid western American outdoor men, and its general appeal to the strong and hardy either side of the sea, will for the next fifty years have the best physical average to be found on the earth's surface, because it is the last yet the most accessible, of this continent's frontiers, and the frontiers have ever called men. Environment still has opportunity to remain environment, is not wholly grown artificial, still offers something of light and air and good and ground to stand on, still ecourages that stature of soul which goes with stature of body. Really, we should feel disposed to counsel Alicia that, according to all the doctrines of chance, she ought to look about her at home and not go abroad in her quest for some man to support, aid and comfort."

GRADUATES OF VIENNA TO VISIT UNITED STATES

New York, May 3.—Three hundred graduates of the University of Vienna, who are to leave their alma mater within a few months, will, this summer, make a tour of the United States. One of their professors is now in New York making arrangements for their reception here. The 300 graduates will arrive in New York in August and will stay here a week or ten days. After that they will visit Boston, Philadelphia, Chicago and other cities, making a study of American life.

The tour, if it proves a success, is to be made an annual feature. In this connection, according to the Vienna professor, an effort will be made for an interchange of lectures between the University of Vienna and such institutions as Yale, Harvard, Columbia and Chicago.

A GARDEN CITY.

What with the gambols of ownerless, vagrant dogs and the ravages of mischievous urchins it seems to be a matter of some difficulty to maintain a garden in decent order in this city just now. The question of responsibility of preventing the pranks and proceedings of the latter class of offenders was brought to the notice of the council at their meeting on Monday night by Mr. F. J. Hart, who wrote with regard to the destruction of his boulevard, and urged that the onus of affording protection against the destroyers was upon the city.

The trouble is not new, but it seems to be growing more extensive and more acute. Many of those who have striven to improve the surroundings of their homes and thereby contribute to the beautifying of the city generally have had to contend with the forces of mischief and destruction for some time past. It is time something was done to put a stop to this nuisance.

In calling attention to this matter on previous occasions we have contended that it is the duty of the council to protect the citizens against both mischievous boys and the depredations of stray dogs. Now that a prominent citizen has brought the matter forward and again reminded the council of its duty we hope some steps will be taken in the desired direction. But also there is a responsibility upon the parents of children who perpetrate these mischievous acts. There is, we regret to say, a sad want of control on the part of many parents over their children, who are allowed to wander where they will and at such times as they please, with the very natural result that they get into mischief, and commit these acts of wanton damage to boulevards and gardens. The abuse requires to be dealt with firmly, and one or two of these hobbledoys and hoodlums brought before the magistrate and well punished. Then perhaps neglectful parents will begin to recognize that it is time they exercised proper control over their offspring.

The prevalence of this spirit of wanton damage serves to dissuade people from devoting effort and expense to the beautifying of the external surrounding of their homes. Instead of this we need every encouragement to be given for the pursuit of gardening in this city. There is room for a good deal of improvement in this respect and if only the residents generally can be induced to improve their plots then the aspect of New Westminster will be greatly improved and the city become much more attractive in its character.

PUBLICITY WORK.

The appointment of a publicity commissioner made by the council is by no means satisfactory. We do not wish to cast the slightest reflection upon the gentleman who has been appointed, who is perhaps excellently fitted for the post. But we believe he already has his hands full with work as secretary of the Board of Trade, and that being so we fail to see how he is to give the attention that is necessary to the publicity work of the city. If the council desired to appoint Mr. Wade to the post of Publicity Commissioner then he should have been paid an adequate salary and relieved of the work attaching to the secretaryship of the Board of Trade. Or in the alternative a qualified assistant should have been appointed.

At no time in the history of the city has it been more important than now that this publicity work should be done in a thorough manner. As we have urged time and again, this city needs a body of live intelligent business men to form a publicity bureau or commission and direct the work of promoting its interests abroad. We consider that the council has by its act altogether thrown away a splendid opportunity of doing really good work for the city.

Australia to Face Deficit.

London, May 3.—The Australian deficit is expected to reach $4,000,000.

Shackleton to Be Welcomed.

Winnipeg, May 3.—Arrangements are being made to extend a rousing welcome to Sir Ernest Shackelton, who will arrive in the city May 26.

Hendry to Visit Brussels.

London, May 3.—John Hendry, president of the Canadian Manufacturers' association, is going on Saturday to the continent to visit the Brussels exhibition. He afterwards intends to tour the British manufacturing centres.

JOHN HENDRY SPEAKS ON PREFERENCE OF WHEAT

B. C. Man Tells Englishmen Canada Is Not Anxious to Profit at Expense of Britain.

London, May 3.—Asked if the progress in the northwest of Canada is being retarded by the lack of preference to Canadian wheat in the English market, John Hendry, of Vancouver, president of the Canadian Manufacturers' association, said: "No, I do not think it is. Of course, Canadian farmers would like to make more money by their produce, but I am sure they will not wish to receive an increased price at the expense of the people of this country."

Mr. Hendry said further: "You people must settle this matter for yourselves. I can assure you that whatever decision you arrive at, we in Canada will not quarrel with it."

RETURN OF FARM CROPS.

Interesting Bulletin Issued by the Census Office at Ottawa.

Ottawa, May 3.—A bulletin of the census and statistics office issued today shows that at the end of March the quantity of wheat in the farmers' hands in the whole of Canada was about 18.28 per cent of the crop of last year. This is 30,484,000 out of 166,744,000 bushels, as compared with 20.23 per cent, or 22,747,000 bushels out of the harvest of 112,434,000 bushels in 1908. Of oats there was 40.03 per cent, or 141,499,000 out of 353,466,000 bushels, as against 43.62 per cent, or 109,222,000 out of 250,377,000 bushels last year. Of barley, there was 29.81 per cent, or 16,517,000 out of 55,398,000 bushels, as against 33.56 per cent, or 15,692,000 out of 46,762,000 bushels last year. Of potatoes there was 43,289,000 out of 99,087,200 bushels, or 43.68 per cent, as against 44.10 per cent, or 32,542,111 bushels out of a crop of 73,790,000 bushels last year. Of hay and clover there was 23.51 per cent, being 2,973,000 out of 11,877,100 tons, as against 34.51 per cent, or 3,952,000 tons out of 11,450,000 tons of the crop of 1908.

It is estimated that 95.87 per cent of the wheat crop of the Dominion in 1909, equivalent to 159,868,000 bushels, was of merchantable quality; of oats, 90.86 per cent, being 321,190,000 bushels; of barley, 92.87 per cent, being 51,449,000 bushels; of corn, 81.04 per cent, being 15,606,000 bushels, of potatoes, 79.86 per cent, being 79,140,000 bushels; of turnips, 86.17 per cent, being 92,833,000 bushels, of the total yield. Three of the crops were over 90 per cent in quality, four ranged from 80 to 90 and only one was under 80 per cent.

In the provinces of Manitoba, Saskatchewan and Alberta the quantity of wheat on farms on the 31st of March was 18.90 per cent, being 26,682,000 bushels out of a total product of 147,482,000 bushels, as against 17,391,000, or 18.93 per cent out of 91,853,000 bushels last year.

The report of the department of trade and commerce shows that there had been inspected at Winnipeg and points west for the seven months ending March 31, 69,514 cars, or 74,032,410 bushels of wheat; 12,154 cars, or 23,092,600 bushels of oats, and 3,118 cars, or 3,741,600 bushels of barley. At the same date last year the figures were 61,098 cars, or 64,152,900 bushels of wheat; 9,152 cars, or 16,473,600 bushels of oats, and 2,576 cars, or 3,091,200 bushels of barley.

Of the total production of wheat in the Northwest provinces last year, 96.48 per cent. was merchantable, of oats 95.13 per cent and of barley 95.44 per cent.

In Ontario there was at the end of March 3,017,000 bushels of wheat, as against 4,550,000 bushels last year; of oats 37,780,000, as against 44,715,000 bushels; of barley 4,920,000, as against 7,144,000 bushels; of potatoes 13,224,000, as against 10,026,000 bushels; of turnips and other roots 11,658,000, as against 32,757,000 bushels in 1909.

The percentage of products of the farm in 1910 which was of merchantable quality ranks high for all the crops in all the provinces, the only exception being potatoes in the Maritime provinces, where correspondents report heavy losses to this crop through rotting.

The condition of live stock in the Dominion at the end of March was uniformly high for all classes of farm animals.

Correspondents report an early opening of spring in all parts of Canada, and in Manitoba, Saskatchewan and Alberta, as well as in the counties of Ontario along Lake Erie and Lake Ontario, about one-half of the seeding was finished at the end of March.

A very favorable account of the condition of fall wheat is given for Ontario at the same period, but in Alberta the crop suffered to some extent from drouth at the seeding season, and later from winter exposure.

$5,000 IN LIQUOR AND TOBACCO DESTROYED

Montreal, May 3.—Topers will mourn and temperance societies rejoice that a $5,000 worth of liquor and tobacco have been destroyed. The bottles and casks were conveyed to a convenient dump and the spirituous contents poured away. For obvious reasons the chosen dump was not advertised. The tobacco was burned, but not in pipe or cigarette form.

The liquor and tobacco were not sold at the annual customs house sale of unclaimed goods, and according to government regulation had to be destroyed. Practically all other catalogued offerings were disposed of, but bids for the wines and weeds fell short of the minimum price set by the government in order to cover the expense of duty, storage and sale. The report of the auctioneers to the customs department will show that two lots of liquor, aggregating in value $2,500 and $200 could not be sold, and the same fate befell $1,500 worth of prime tobacco.

ABOLISH HOBBLES.

Gradual Disuse Is Decided Upon by American Horsemen.

Chicacgo, May 3.—The ultimate abolition of hobbles was determined upon today at the biennial meeting of the American Trotting association. W. F. James, of Terre Haute, Ind., was re-elected president of the association, and W. H. Knight, of Chicago, secretary. The retiring directors were all re-elected. Seventy-five delegates, representing 700 members, were present and by a vote of five to one decided that there shall be no hobbles upon two-year-olds this seanson, none of three-year-olds next season, none on three-year-olds next and that in 1914 the use of hobbles shall be barred altogether.

GOVERNMENT TO STUDY WAYS OF STORED EGG

New York, May 3.—The wholesale egg dealers and owners of storage warehouses in New York and vicinity were visited today by an agent of the department of agriculture, which has directed the collection of specimens of eggs from various sections of the country. The eggs are to be sent to Washington, where they will be kept through the summer in order to determine, under the eye of government experts, just what change takes place under various conditions.

Some of the eggs will be kept in coolers similar to those of storage warehouses, others will be packed and preserved according to the various methods known to the trade.

THE

Vancouver Daily Province

New Westminster Agency

The New Westminster Agency of the Daily Province will in future be under the management of C. A. Sutherland, late of staff of the Daily Columbian, New Westminster. Temporary offices have been secured in the quarters occupied by the National Finance Company in the Curtis Block, 657 Columbia Street.

All business of the Vancouver Daily Province, Subscriptions, Advertising, and News, or of a general nature, will be handled by Mr. Sutherland, A. W. McLeod, finding that his other affairs require his undivided attention, and withdrawing May 1, 1910.

MILES OF NEWSPAPER DOPE ON JEFFRIES-JOHNSON BOUT

Frenzied Mathematician Figures That One Hundred and Five Miles of Type Is Used Weekly.

If James J. Jeffries, Esq., and Mister Jack Johnson, were to read everything that is printed about them in the papers every morning, they would not have much time to devote to preparations for knocking the everlasting tar out of one another. A careful and conservative estimate places the amount of fight dope printed in the newspapers of the United States and Canada each day at 1,250 columns, and at least four times that amount on Sundays. There are something over 2500 daily newspapers in the U. S. and Canada so that this estimate only counts on half a column in each on the average during the week and about half a page in the big week-end sporting supplements. Altogether this aggregates 12,500 columns a week, and as an ordinary newspaper column contains 215 lines, two and a half inches long, it follows—work it out for yourself—that if placed in one line the weekly contribution made to Anglo-Saxon literature by sporting writers on this all absorbing topic would stretch for a little over 105 miles.

The fight and the fighters have been written about on almost as liberal a scale for several months past, and it is no exaggeration to say that at least 2,760 miles of print, or sufficient to reach from Fort Churchill to Liverpool, accompanied by several acres of pictures of the men, their former victims, their sparring partners, trainers, rubbers, wives, sweethearts, automobiles, etc., have already been published and not only published but read as well. The fight is still nine weeks off, and with a small army of scribes quartered in each of the rival training camps, some for individual papers and others for syndicates and press associations, it is only to be expected that the volume of printers' ink that will flow in this terrific contest will increase as the fourth of July draws nearer. It is therefore only reasonable to suppose that by the time the story of the battle itself has been told to the world, with what the winner and the loser, and their trainers, and the referee, and Corbett and Sullivan and Tommy Burns and Vic McLaglen and Kid Ashe have to say about it, another 2,760 miles or enough to reach from Liverpool to Montreal, will have been added. If the people didn't read it the papers wouldn't print it—that's one thing sure.

FIRST LEAGUE GAME TAKES PLACE ON SATURDAY

The first City league baseball game of the season will be played on Saturday afternoon, when the Alerts and Maple Leafs will meet at Moody Square. The Alerts is a new team in the league and have not showed up particularly strong in the practice games they have had. The Maple Leafs are the dark horses of the league. They have played no games this season and have not been advertising their practices, but are understood to be pretty strong. At their last practice a few nights ago they had twenty-two men on the field trying out for the different positions. At that rate they should have a cinch on the City league.

Junior Lacrosse Tommrow

The first junior lacrosse game of the season will be played tomorrow evening at Queen's park between the West End and and Sapperton teams, when the Westenders will line up as follows: Goal, Feeney; point, Mortison; cover, Gregory; defence field, Cooper, Battson, Sibley; centre, Burr, home field, L. Sangster, Wilkie, P. Sangster, Murray, Johns.

BISLEY TEAM CHOSEN.

Coast Men Among Those Who Will Shoot for Canada.

Ottawa, May 3.—The executive of the Dominion Rifle association met last evening and dealt with the selection of the team which is to represent Canada at this year's Bisley meeting. Acceptances were reported from every eligible member of the first twenty.

The team will, as before, consist of Sergt. C. W. Russell, G. G. F. G.; Capt. W. H. Forrest, Sixth D. C. O. R.; Sergt. McInnes, Nineteenth A. M. R.; Pte. W. J. Clifford. Tenth Royal Grenadiers; Corp. H. Whitehorn, Tenth Royal Grenadiers; Capt. C. R. Crowe, Thirtieth Regiment; Pte. W. L. Latimer, Tenth Royal Grenadiers; Pte. F. Bibby, Seventy-seventh Regiment; Sergt. F. A. Steck, Seventy-seventh Regiment; Capt. W. Hart-McHarg, Sixth D. C. O. R.; Sergt. F. H. Morris, Firty-sixth Regiment; Staff-Sergt. T. Mitchell, Thirteenth Regiment; H. Green, Second Q. O. R.; Segt. E. R. Eastwood, Thirtieth Regiment; Gunner C. W. Sharp, Second C. A.; Lieut. G. J. Rowe, Forty-sixth Regiment; Lieut. W. Drysdale, Eleventh Regiment; Pte. J. A. Steele, Thirtieth Regiment; Color-Sergt. J. Freeborn, Thirteenth Regiment; Pte. D. McKie, Thirtieth Regiment.

COLLEGE WINS.

The College baseball team defeated the Alerts yesterday evening in a four-inning game by a score of 4 to 2, the class of ball put up being an improvement on earlier games. Poupore and Brown formed the battery for the collegians. The Alerts were represented by the following: McPhail, Peck and Jamieson (battery), Yuill, Mathers. Tom Peck, Kenny, Wilkie, Rielly, Fletcher.

C. Stein umpired in fear and trembling.

AUSTRALIA SUPPLIES BRITAIN WITH BEEF

Arrangements Are Being Made to Give Antipodes Monopoly of Market.

Australia chilled beef is now selling in London markets for nine and a half cents a pound for the best hind quarters. The problem of getting this beef to England in a salable condition has been solved by building one ship, after many previous experiments had failed, and now a fleet of similar ships is to be built, to have Australia monopolize English markets for beef. This will shut out the United States and Argentina, hitherto sole sources of English supply, which countries had charged prices very much higher than nine and a half cents a pound above referred to.

In the course of one or two years, this Australian beef supply for England will be under full headway, and then the United States, being deprived of one of its best foreign customers for beef, will have a larger supply for home consumption. What is of equal importance, the same ships that take this chilled beef from Australia to England also can bring it to the United States, where it will enter into competition with domestic product, provided home prices continue to soar. Altogether, therefore, the outlook is regarded by experts in this city as favorable for cheaper meat in this country.

Not Same as Frozen Beef.

Chilled beef is not the same as frozen beef, and sells for 2 cents a pound more in London than the frozen article. It is not only chilled, but it is sterilized in shipment by the Linley process, which thus far is a secret process, and hung up in large chambers specially designed for that purpose.

Australian beef is now being sold at moderate prices in New York City, and those prices are to go lower still, it is believed, as soon as the supply can be increased by building of ships.

For sixteen years, experiments were made in the shipment of chilled beef from Australia to England, but not until last year were they pronounced thoroughly successful. The first experiment came in 1894, and there were others in 1895 and 1896—all failures. Similar shipments from New Zealand in 1895 and 1896 were likewise failures. But last September, the Marathon, a vessel fitted up with a special chilled beef chamber, sailed from Brisbane, via the cape, with 1,350 quarters aboard, arriving in London in November, with her cargo in excellent condition. The prices at which the meat was sold, much below the standard prices of that time, yielded a good profit, whereat the English people began to sit up and take notice. Nine and a half cents a pound was a great change from twenty and twenty-five cents. The whole of England and parts of Scotland became interested, for this nine and a half cent rate extended as far north as Glasgow. The Marathon, now the only ship of its type afloat, is to be followed by a fleet of the same kind, and all of them are to engage in the beef trade from Australia, stopping at New York.

British Economists Joyful.

English economists view this opening with undisguised joy. They not only see a cheaper meat supply than formerly, but that supply coming from another part of the British empire, and not from foreign lands. It is estimated that England will take 200,000 quarters of chilled beef from Australia the first year the improved service is in operation. Australia meanwhile is preparing itself for this new business. Queensland showed 4,321,000 head of cattle in 1908 as compared with but 2,543,471 in 1902, and the other colonies of Australia are showing a like increase.

This shipment of beef by the wholesale from Australia to England will affect the entire civilized world, for the beef question is a world question. In the United States it seems likely to bring about a reduction in price of meats, even if present agitation of high cost of living should bring about no tangible results. If the American beef barons are cut off from England, and have their increased supply still further increased by beef from Australia, the prevailing high prices must of necessity take a tumble.

The Dolly—in the "Gingerbread Man."

IT PAYS TO ADVERTISE —IN— THE DAILY NEWS

THE GINGERBREAD MAN.

Comedy of Coming Production Not of Hackneyed Style.

"The Gingerbread Man," that delightful little fairyesque and fantastic comic opera by Frederick G. Rankin and A. Baldwin Sloane will be presented here with a wealth of detail and scenic magnificence, as well as costumic embellishments that will immediately commend itself to the patrons of high class music.

First of all "The Gingerbread Man" is a good entertainer, written on lines of distinction with brilliant music and excellent comedy of a class not hackneyed, it offers a distinct novelty from the so called musical comedies from the fact that it depends not on a series of numbers strung together, but on a story consistently told and funnily rendered. It is full of bright sayings and amusing situations and each character creates for itself an unusual interest for the reason that they were built by artisans of talent and experience. Messrs. Ranken and Sloane had many successful works to their credit: "Coming Through the Rye," "Lady Teazle," "Sergeant Kitty," "The Mocking Bird," and many others were the result of their pens, and they have made fortunes in royalties with their clever productions.

The present management has secured a cast that have made the piece a classic, such artists as Wally Helted, Ross Snow, Garrick Major, William Cameron, Rose Murray, Inez Girard, Helen Keers, and Jane Ayres, render the piece in superb style and the many pretty numbers clever dialogues and the brilliant comedy receive perfect rendition at their hands. The ensemble work is particularly brilliant and all that can be desired and the event of the coming of "The Gingerbread Man" will be looked forward to by all who are interested in high class theatricals.

"The Gingerbread Man" will appear here on May 11 at the Opera house, for one performance.

Premier Murray Improving.

Halifax, May 3.—Premier Murray continues to improve, but it is certain that part of his leg will have to be amputated as the circulation of the blood is stopped.

EMPLOYERS' LIABILITY
Why You Should Insure Against Lawsuits

WORKMEN can sue you without cost to themselves, and they have EVERYTHING to gain and small chance to lose by so doing.

PROTECT YOU

PERSONS other than employees accidentally injured about the premises invariably sue for damages.
REGARDLESS of their own responsibility for the accident, or the existence of negligence on the part of others.
ON the slightest pretext employees may sue you, even for accidents caused by the negligence of a fellow-workman, and
THE suit may be brought against you long after the occurrence of the accident by which he was injured.
EMPLOYERS and business men can ill afford to assume the risk of this ever-increasing and uncertain liability.
CREDIT of otherwise responsible manufacturers and business firms is sometimes seriously impaired by such damage suits.
TO go to law means lass of time, money, endless annoyance and worry.

YOUR profits may be seriously curtailed as a result of accident unless you are insured.
ONLY insurance against such risks will enable you to fix and reduce your expenses to a minimum.
UNDER the protection of a Liability Policy in the Railway Passengers' Assurance Company you will save money and time and be relieved from all such annoyances.

WEDNESDAY, MAY 4, 1910.

A GARDEN CITY.

What with the gambols of ownerless, vagrant dogs and the ravages of mischievous urchins it seems to be a matter of some difficulty to maintain a garden in decent order in this city just now. The question of responsibility of preventing the pranks and proceedings of the latter class of offenders was brought to the notice of the council at their meeting on Monday night by Mr. F. J. Hart, who wrote with regard to the destruction of his boulevard, and urged that the onus of affording protection against the destroyers was upon the city.

The trouble is not new, but it seems to be growing more extensive and more acute. Many of those who have striven to improve the surroundings of their homes and thereby contribute to the beautifying of the city generally have had to contend with the forces of mischief and destruction for some time past. It is time something was done to put a stop to this nuisance.

In calling attention to this matter on previous occasions we have contended that it is the duty of the council to protect the citizens against both mischievous boys and the depredations of stray dogs. Now that a prominent citizen has brought the matter forward and again reminded the council of its duty we hope some steps will be taken in the desired direction. But also there is a responsibility upon the parents of children who perpetrate these mischievous acts. There is, we regret to say, a sad want of control on the part of many parents over their children, who are allowed to wander where they will and at such times as they please, with the very natural result that they get into mischief, and commit these acts of wanton damage to boulevards and gardens. The abuse requires to be dealt with firmly, and one or two of these hobbledoys and hoodlums brought before the magistrate and well punished. Then perhaps neglectful parents will begin to recognize that it is time they exercised proper control over their offspring.

The prevalence of this spirit of wanton damage serves to dissuade people from devoting effort and expense to the beautifying of the external surrounding of their homes. Instead of this we need every encouragement to be given for the pursuit of gardening in this city. There is room for a good deal of improvement in this respect and if only the residents generally can be induced to improve their plots then the aspect of New Westminster will be greatly improved and the city become much more attractive in its character.

PUBLICITY WORK.

The appointment of a publicity commissioner made by the council is by no means satisfactory. We do not wish to cast the slightest reflection upon the gentleman who has been appointed, who is perhaps excellently fitted for the post. But we believe he already has his hands full with work as secretary of the Board of Trade, and that being so we fail to see how he is to give the attention that is necessary to the publicity work of the city. If the council desired to appoint Mr. Wade to the post of Publicity Commissioner then he should have been paid an adequate salary and relieved of the work attaching to the secretaryship of the Board of Trade. Or in the alternative a qualified assistant should have been appointed.

At no time in the history of the city has it been more important than now that this publicity work should be done in a thorough manner. As we have urged time and again, this city needs a body of live intelligent business men to form a publicity bureau or commission and direct the work of promoting its interests abroad. We consider that the council has by its act altogether thrown away a splendid opportunity of doing really good work for the city.

Australia to Face Deficit.

London, May 3.—The Australian deficit is expected to reach $4,000,000.

Shackleton to Be Welcomed.

Winnipeg, May 3.—Arrangements are being made to extend a rousing welcome to Sir Ernest Shackelton, who will arrive in the city May 26.

Hendry to Visit Brussels.

London, May 3.—John Hendry, president of the Canadian Manufacturers' association, is going on Saturday to the continent to visit the Brussels exhibition. He afterwards intends to tour the British manufacturing centres.

JOHN HENDRY SPEAKS ON PREFERENCE OF WHEAT

B. C. Man Tells Englishmen Canada Is Not Anxious to Profit at Expense of Britain.

London, May 3.—Asked if the progress in the northwest of Canada is being retarded by the lack of preference to Canadian wheat in the English market, John Hendry, of Vancouver, president of the Canadian Manufacturers' association, said: "No, I do not think it is. Of course, Canadian farmers would like to make more money by their produce, but I am sure they will not wish to receive an increased price at the expense of the people of this country."

Mr. Hendry said further: "You people must settle this matter for yourselves. I can assure you that whatever decision you arrive at, we in Canada will not quarrel with it."

RETURN OF FARM CROPS.

Interesting Bulletin Issued by the Census Office at Ottawa.

Ottawa, May 3.—A bulletin of the census and statistics office issued today shows that at the end of March the quantity of wheat in the farmers' hands in the whole of Canada was about 18.28 per cent of the crop of last year. This is 30,484,000 out of 166,744,000 bushels, as compared with 20.23 per cent, or 22,747,000 bushels out of the harvest of 112,434,000 bushels in 1908. Of oats there was 40.03 per cent, or 141,499,000 out of 353,466,000 bushels, as against 43.62 per cent, or 109,222,000 out of 250,377,000 bushels last year. Of barley, there was 29.81 per cent, or 16,517,000 out of 55,398,000 bushels, as against 33.56 per cent, or 15,692,000 out of 46,762,000 bushels last year. Of potatoes there was 43,289,000 out of 99,087,200 bushels, or 43.68 per cent, as against 44.10 per cent, or 32,542,111 bushels out of a crop of 73,790,000 bushels last year. Of hay and clover there was 23.51 per cent, being 2,973,000 out of 11,877,100 tons, as against 34.51 per cent, or 3,952,000 tons out of 11,450,000 tons of the crop of 1908.

It is estimated that 95.87 per cent of the wheat crop of the Dominion in 1909, equivalent to 159,868,000 bushels, was of merchantable quality; of oats, 90.86 per cent, being 321,190,000 bushels; of barley, 92.87 per cent, being 51,449,000 bushels; of corn, 81.04 per cent, being 15,606,000 bushels, of potatoes, 79.86 per cent, being 79,140,000 bushels; of turnips, 86.17 per cent, being 92,833,000 bushels, of the total yield. Three of the crops were over 90 per cent in quality, four ranged from 80 to 90 and only one was under 80 per cent.

In the provinces of Manitoba, Saskatchewan and Alberta the quantity of wheat on farms on the 31st of March was 18.90 per cent, being 26,682,000 bushels out of a total product of 147,482,000 bushels, as against 17,391,000, or 18.93 per cent out of 91,853,000 bushels last year.

The report of the department of trade and commerce shows that there had been inspected at Winnipeg and points west for the seven months ending March 31, 69,514 cars, or 74,032,410 bushels of wheat; 12,154 cars, or 23,092,600 bushels of oats, and 3,118 cars, or 3,741,600 bushels of barley. At the same date last year the figures were 61,098 cars, or 64,152,900 bushels of wheat; 9,152 cars, or 16,473,600 bushels of oats, and 2,576 cars, or 3,091,200 bushels of barley.

Of the total production of wheat in the Northwest provinces last year, 96.48 per cent. was merchantable, of oats 95.13 per cent and of barley 95.44 per cent.

In Ontario there was at the end of March 3,017,000 bushels of wheat, as against 4,550,000 bushels last year; of oats 37,780,000, as against 44,715,000 bushels; of barley 4,920,000, as against 7,144,000 bushels; of potatoes 13,224,000, as against 10,026,000 bushels; of turnips and other roots 11,658,000, as against 32,757,000 bushels in 1909.

The percentage of products of the farm in 1910 which was of merchantable quality ranks high for all the crops in all the provinces, the only exception being potatoes in the Maritime provinces, where correspondents report heavy losses to this crop through rotting.

The condition of live stock in the Dominion at the end of March was uniformly high for all classes of farm animals.

Correspondents report an early opening of spring in all parts of Canada, and in Manitoba, Saskatchewan and Alberta, as well as in the counties of Ontario along Lake Erie and Lake Ontario, about one-half of the seeding was finished at the end of March.

A very favorable account of the condition of fall wheat is given for Ontario at the same period, but in Alberta the crop suffered to some extent from drouth at the seeding season, and later from winter exposure.

$5,000 IN LIQUOR AND TOBACCO DESTROYED

Montreal, May 3.—Topers will mourn and temperance societies rejoice that a $5,000 worth of liquor and tobacco have been destroyed. The bottles and casks were conveyed to a convenient dump and the spirituous contents poured away. For obvious reasons the chosen dump was not advertised. The tobacco was burned, but not in pipe or cigarette form.

The liquor and tobacco were not sold at the annual customs house sale of unclaimed goods, and according to government regulation had to be destroyed. Practically all other catalogued offerings were disposed of, but bids for the wines and weeds fell short of the minimum price set by the government in order to cover the expense of duty, storage and sale. The report of the auctioneers to the customs department will show that two lots of liquor, aggregating in value $2,500 and $200 could not be sold, and the same fate befell $1,500 worth of prime tobacco.

ABOLISH HOBBLES.

Gradual Disuse Is Decided Upon by American Horsemen.

Chicago, May 3.—The ultimate abolition of hobbles was determined upon today at the biennial meeting of the American Trotting association. W. F. James, of Terre Haute, Ind., was re-elected president of the association, and W. H. Knight, of Chicago, secretary. The retiring directors were all re-elected. Seventy-five delegates, representing 700 members, were present and by a vote of five to one decided that there shall be no hobbles upon two-year-olds this seanson, none of three-year-olds next season, none on three-year-olds next and that in 1914 the use of hobbles shall be barred altogether.

GOVERNMENT TO STUDY WAYS OF STORED EGG

New York, May 3.—The wholesale egg dealers and owners of storage warehouses in New York and vicinity were visited today by an agent of the department of agriculture, which has directed the collection of specimens of eggs from various sections of the country. The eggs are to be sent to Washington, where they will be kept through the summer in order to determine, under the eye of government experts, just what change takes place under various conditions.

Some of the eggs will be kept in coolers similar to those of storage warehouses, others will be packed and preserved according to the various methods known to the trade.

THE

Vancouver Daily Province

New Westminster Agency

The New Westminster Agency of the Daily Province will in future be under the management of C. A. Sutherland, late of staff of the Daily Columbian, New Westminster. Temporary offices have been secured in the quarters occupied by the National Finance Company in the Curtis Block, 657 Columbia Street.

All business of the Vancouver Daily Province, Subscriptions, Advertising, and News, or of a general nature, will be handled by Mr. Sutherland, A. W. McLeod, finding that his other affairs require his undivided attention, and withdrawing May 1, 1910.

MILES OF NEWSPAPER DOPE ON JEFFRIES-JOHNSON BOUT

Frenzied Mathematician Figures That One Hundred and Five Miles of Type Is Used Weekly.

If James J. Jeffries, Esq., and Mister Jack Johnson, were to read everything that is printed about them in the papers every morning, they would not have much time to devote to preparations for knocking the everlasting tar out of one another. A careful and conservative estimate places the amount of fight dope printed in the newspapers of the United States and Canada each day at 1,250 columns, and at least four times that amount on Sundays. There are something over 2500 daily newspapers in the U. S. and Canada so that this estimate only counts on half a column in each on the average during the week and about half a page in the big week-end sporting supplements. Altogether this aggregates 12,500 columns a week, and as an ordinary newspaper column contains 215 lines, two and a half inches long, it follows—work it out for yourself—that if placed in one line the weekly contribution made to Anglo-Saxon literature by sporting writers on this all absorbing topic would stretch for a little over 105 miles.

The fight and the fighters have been written about on almost as liberal a scale for several months past, and it is no exaggeration to say that at least 2,760 miles of print, or sufficient to reach from Fort Churchill to Liverpool, accompanied by several acres of pictures of the men, their former victims, their sparring partners, trainers, rubbers, wives, sweethearts, automobiles, etc., have already been published and not only published but read as well. The fight is still nine weeks off, and with a small army of scribes quartered in each of the rival training camps, some for individual papers and others for syndicates and press associations, it is only to be expected that the volume of printers' ink that will flow in this terrific contest will increase as the fourth of July draws nearer. It is therefore only reasonable to suppose that by the time the story of the battle itself has been told to the world, with what the winner and the loser, and their trainers, and the referee, and Corbett and Sullivan and Tommy Burns and Vic McLaglen and Kid Ashe have to say about it, another 2,760 miles or enough to reach from Liverpool to Montreal, will have been added. If the people didn't read it the papers wouldn't print it—that's one thing sure.

FIRST LEAGUE GAME TAKES PLACE ON SATURDAY

The first City league baseball game of the season will be played on Saturday afternoon, when the Alerts and Maple Leafs will meet at Moody Square. The Alerts is a new team in the league and have not showed up particularly strong in the practice games they have had. The Maple Leafs are the dark horses of the league. They have played no games this season and have not been advertising their practices, but are understood to be pretty strong. At their last practice a few nights ago they had twenty-two men on the field trying out for the different positions. At that rate they should have a cinch on the City league.

Junior Lacrosse Tommrow

The first junior lacrosse game of the season will be played tomorrow evening at Queen's park between the West End and and Sapperton teams, when the Westenders will line up as follows: Goal, Feeney; point, Morrison; cover, Gregory; defence field, Cooper, Battson, Sibley; centre, Burr, home field, L. Sangster, Wilkie, P. Sangster, Murray, Johns.

BISLEY TEAM CHOSEN.

Coast Men Among Those Who Will Shoot for Canada.

Ottawa, May 3.—The executive of the Dominion Rifle association met last evening and dealt with the selection of the team which is to represent Canada at this year's Bisley meeting. Acceptances were reported from every eligible member of the first twenty.

The team will, as before, consist of Sergt. C. W. Russell, G. G. F. G.; Capt. W. H. Forrest, Sixth D. C. O. R.; Sergt. McInnes, Nineteenth A. M. R.; Pte. W. J. Clifford, Tenth Royal Grenadiers; Corp. H. Whitehorn, Tenth Royal Grenadiers; Capt. C. R. Crowe, Thirtieth Regiment; Pte. W. L. Latimer, Tenth Royal Grenadiers; Pte. F. Bibby, Seventy-seventh Regiment; Sergt. F. A. Steck, Seventy-seventh Regiment; Capt. W. Hart-McHarg, Sixth D. C. O. R.; Sergt. F. H. Morris, Firty-sixth Regiment; Staff-Sergt. T. Mitchell, Thirteenth Regiment; H. Green, Second Q. O. R.; Segt. E. R. Eastwood, Thirtieth Regiment; Gunner C. W. Sharp, Second C. A.; Lieut. G. J. Rowe, Forty-sixth Regiment; Lieut. W. Drysdale, Eleventh Regiment; Pte. J. A. Steele, Thirtieth Regiment; Color-Sergt. J. Freeborn, Thirteenth Regiment; Pte. D. McKie, Thirtieth Regiment.

COLLEGE WINS.

The College baseball team defeated the Alerts yesterday evening in a four-inning game by a score of 4 to 2, the class of ball put up being an improvement on earlier games. Poupore and Brown formed the battery for the collegians. The Alerts were represented by the following: McPhail, Peck and Jamieson (battery), Yuill, Mathers, Tom Peck, Kenny, Wilkie, Rielly, Fletcher.

C. Stein umpired in fear and trembling.

AUSTRALIA SUPPLIES BRITAIN WITH BEEF

Arrangements Are Being Made to Give Antipodes Monopoly of Market.

Australia chilled beef is now selling in London markets for nine and a half cents a pound for the best hind quarters. The problem of getting this beef to England in a salable condition has been solved by building one ship, after many previous experiments had failed, and now a fleet of similar ships is to be built, to have Australia monopolize English markets for beef. This will shut out the United States and Argentina, hitherto sole sources of English supply, which countries had charged prices very much higher than nine and a half cents a pound above referred to.

In the course of one or two years, this Australian beef supply for England will be under full headway, and then the United States, being deprived of one of its best foreign customers for beef, will have a larger supply for home consumption. What is of equal importance, the same ships that take this chilled beef from Australia to England also can bring it to the United States, where it will enter into competition with domestic product, provided home prices continue to soar. Altogether, therefore, the outlook is regarded by experts in this city as favorable for cheaper meat in this country.

Not Same as Frozen Beef.

Chilled beef is not the same as frozen beef, and sells for 2 cents a pound more in London than the frozen article. It is not only chilled, but it is sterilized in shipment by the Linley process, which thus far is a secret process, and hung up in large chambers specially designed for that purpose.

Australian beef is now being sold at moderate prices in New York City, and those prices are to go lower still, it is believed, as soon as the supply can be increased by building of ships.

For sixteen years, experiments were made in the shipment of chilled beef from Australia to England, but not until last year were they pronounced thoroughly successful. The first experiment came in 1894, and there were others in 1895 and 1896—all failures. Similar shipments from New Zealand in 1895 and 1896 were likewise failures. But last September, the Marathon, a vessel fitted up with a special chilled beef chamber, sailed from Brisbane, via the cape, with 1,350 quarters aboard, arriving in London in November, with her cargo in excellent condition. The prices at which the meat was sold, much below the standard prices of that time, yielded a good profit, whereat the English people began to sit up and take notice. Nine and a half cents a pound was a great change from twenty and twenty-five cents. The whole of England and parts of Scotland became interested, for this nine and a half cent rate extended as far north as Glasgow. The Marathon, now the only ship of its type afloat, is to be followed by a fleet of the same kind, and all of them are to engage in the beef trade from Australia, stopping at New York.

British Economists Joyful.

English economists view this opening with undisguised joy. They not only see a cheaper meat supply than formerly, but that supply coming from another part of the British empire, and not from foreign lands. It is estimated that England will take 200,000 quarters of chilled beef from Australia the first year the improved service is in operation. Australia meanwhile is preparing itself for this new business. Queensland showed 4,321,000 head of cattle in 1908 as compared with but 2,543,471 in 1902, and the other colonies of Australia are showing a like increase.

This shipment of beef by the wholesale from Australia to England will affect the entire civilized world, for the beef question is a world question. In the United States it seems likely to bring about a reduction in price of meats, even if present agitation of high cost of living should bring about no tangible results. If the American beef barons are cut off from England, and have their increased supply still further increased by beef from Australia, the prevailing high prices must of necessity take a tumble.

The Dolly—in the "Gingerbread Man."

THE GINGERBREAD MAN.

Comedy of Coming Production Not of Hackneyed Style.

"The Gingerbread Man," that delightful little fairyesque and fantastic comic opera by Frederick G. Rankin and A. Baldwin Sloane will be presented here with a wealth of detail and scenic magnificence, as well as costumic embellishments that will immediately commend itself to the patrons of high class music.

First of all "The Gingerbread Man" is a good entertainer, written on lines of distinction with brilliant music and excellent comedy of a class not hackneyed, it offers a distinct novelty from the so called musical comedies from the fact that it depends not on a series of numbers strung together, but on a story consistently told and funnily rendered. It is full of bright sayings and amusing situations and each character creates for itself an unusual interest for the reason that they were built by artisans of talent and experience. Messrs. Ranken and Sloane had many successful works to their credit: "Coming Through the Rye," "Lady Teazle," "Sergeant Kitty," "The Mocking Bird," and many others were the result of their pens, and they have made fortunes in royalties with their clever productions.

The present management has secured a cast that have made the piece a classic, such artists as Wally Helted, Ross Snow, Garrick Major, William Cameron, Rose Murray, Inez Girard, Helen Keers, and Jane Ayres, render the piece in superb style and the many pretty numbers clever dialogues and the brilliant comedy receive perfect rendition at their hands. The ensemble work is particularly brilliant and all that can be desired and the event of the coming of "The Gingerbread Man" will be looked forward to by all who are interested in high class theatricals.

"The Gingerbread Man" will appear here on May 11 at the Opera house, for one performance.

Premier Murray Improving.

Halifax, May 3.—Premier Murray continues to improve, but it is certain that part of his leg will have to be amputated as the circulation of the blood is stopped.

EMPLOYERS' LIABILITY
Why You Should Insure Against Lawsuits

WORKMEN can sue you without cost to themselves, and they have EVERYTHING to gain and small chance to lose by so doing.

PERSONS other than employees accidentally injured about the premises invariably sue for damages.
REGARDLESS of their own responsibility for the accident, or the existence of negligence on the part of others.
ON the slightest pretext employees may sue you, even for accidents caused by the negligence of a fellow-workman, and
THE suit may be brought against you long after the occurrence of the accident by which he was injured.
EMPLOYERS and business men can ill afford to assume the risk of this ever-increasing and uncertain liability.
CREDIT of otherwise responsible manufacturers and business firms is sometimes seriously impaired by such damage suits.
TO go to law means lass of time, money, endless annoyance and worry.

YOUR profits may be seriously curtailed as a result of accident unless you are insured.
ONLY insurance against such risks will enable you to fix and reduce your expenses to a minimum.
UNDER the protection of a Liability Policy in the Railway Passengers' Assurance Company you will save money and time and be relieved from all such annoyances.

April 23, 1910. C.M.C.

CANADA'S EXPORT TRADE WITH STATES

Thirty-nine Million Dollars Increase in Nine Months—Twenty Millions for March

Washington, D.C., May 2.—Canada's export trade with the United States passed in the month of March the twenty million dollar mark. In the corresponding month one year ago it reached only $14,400,000, while in March of this year it amounted to $20,172,673. This is a heavy gain. The increase in the total of trade for the nine months ended with March is from $113,000,000 in 1909, to $152,000,000, in round figures, for present year.

The value of imports from the United States in March of this year was $7,643,000, as against $5,752,000 during the same month of 1909. No other country shows so marked an increase as does the Dominion of Canada.

March was a prosperous time in the United States, if the imports of diamonds may be taken as the barometer of prosperity. The increase of importations in March, 1909, was more than half a million dollars, that for this year being $3,300,000 and for the month of March a year ago $2,700,000. In the nine months ended with March, compared with the same period the previous year, the importations have almost doubled in value, reaching this year $32,000,000.

Art works continue to show a jump, due to the removal of the duty in the last tariff act. Taking the nine months' period and comparing it with the same length of time a year ago, they have jumped in value from $3,400,000 to $19,400,000.

Champagne, with the duty increased, continues to show a heavy advance in importation, and automobiles reflect the fact that American cars are taking the market from their foreign competitors. Rails for railroads have almost doubled for the nine months' period. Bacon has dropped materially, and locomotives are far below last year's trade.

AMERICAN GREEKS RAISE MONEY FOR BATTLESHIP

Manchester, N.H., May 3.—Fired by Greek verse recited by the poet Spiros Matsoukas, 2,000 members of the Greek colony in this city yesterday subscribed $20,000 toward an American fund for a Greek battleship to be christened "The New Generation," and to be presented to the mother country.

The subscription was made at a mass meeting in Mechanics' hall in the interest of the Greek national defense.

AMERICAN WILL SEARCH FOR HIDDEN TREASURES

Aztec Codex Reveals Hiding Place of Wealth of Montezumas Near Texcoco.

San Antonio, Texas, May 2.—T. A. Kenyon, an American, has applied to the Mexican government, for permission to hunt for the treasures of the Aztec emperors, the whereabouts of which he says he has discovered through an Aztec codex in his possession.

In this document, which is said to deal exclusively with the hidden wealth, there is reference to pots of pure gold, solid gold chains, the diadems of the Montezumas and a fabulously rich necklace of gold and precious chalchiuhuites—the rarest of gems. According to Mr. Kenyon their hiding place is also indicated, being one of the many caves in the vicinity of Texcoco.

So far the Mexican government has taken no action in the matter. Senor Sierra, secretary of public instruction, has advised Leopoldo Batres, inspector of archaeological affairs, to take the case under consideration. The latter and Mr. Kenyon had a conference at San Juan Teotihuacan, the results of which have not been published. In the meantime the Aztec codex in question has been placed in the strongest vault in the city of Mexico.

In order to reach the cave in which the treasury is said to be hidden it will be necessary to drive a long tunnel in a mountain. Mr. Kenyon has offered to the Mexican government all finds of archaeological value that may be made, being content with the pots of gold and the gold chains as his share.

As several capitalists are behind the venture it is surmised that the quantity of gold stored in the mountains must be very large. The treasure hunters have been extremely reticent on this point. The only statement they have made regarding the codex is that it is written on papyrus made from the maguey plant.

There is a great deal of historical data regarding this treasure. The Aztecs were expert gold miners and smiths and made jewelry of great beauty. The palaces of the Montezumas had many chambers, the walls and ceilings of which were sheathed with gold, and even common cooking utensils in the kitchens are said to have been made of that material.

After the taking of the city by the Spanish, Cortez caused many shiploads of gold, silver and precious stones to be sent to Spain, although most of the treasure had even then disappeared. When the Aztec empire had fallen into the hands of the conquistadores they took up the hunt for the treasure with the lust for riches that characterized them and their conquests, but failed to locate it for the reason that the few who knew its whereabouts had either perished in the seige of the city or could not be rendered communicative. Those suspected of this intelligence were subjected to the most cruel tortures, but from them no information was extracted.

It is now generally believed that the hundreds of men it must have taken to transport the gold were killed after they had finished their task, and that the few officials of the Aztec government who knew of the hiding place kept their secret in spite of all the tortures they suffered at the hands of the Spaniards.

LOBSTERS MAY GROW IN ALASKA WATERS

Washington, D. C., May 3.—Senator Nelson, a friend of Fish Commissioner George M. Bowers, believes that lobsters can be successfully propagated in Alaska. He is advocating the establishment of a marine biological and propagating station in the northern territory, with a view to bettering the fishing industry.

"Not only should there be such a station on the Pacific coast of the states, but there should be one in Alaska, as well," said the commissioner today. "Nowhere on the Pacific have we any propagating plant for salt water fish; neither has the State of Washington.

"The fishing resources of Alaska are but little known, despite the great annual output. In fact, they have been only scratched. Salmon fisheries have been developed to some extent, but there are many other marketable fish that would be profitable to catch. Cod fishing in Alaska is but in its infancy. I know no reason why lobsters could not be propagated there successfully."

WAECHTER SEEKS TO FEDERATE NATIONS

Vienna, May 3.—The most ambitious man in Europe is Sir Max Waechter. He seeks to federate all Europe.

Sir Max is a native of Stettin, in Germany, but his successful career as a shipowner has run its course in England. Last year he believed he had a conference fixed in Rome, but it fell through, so he is touring Europe seeking converts enough to enable him to make sure of it next time.

The center of his idea is that the federation should first of all be on an economic basis. That is to say, he would form a roliverein or customs union of the nations, and after that "everything else would follow naturally."

He has interviewed the Kaiser, the kings of Italy, Sweden, Denmark and Norway, and his latest public announcement is that he has roped in Prince Nicholas of Montenegro. After that accession of strength, who can say what many happen?

More Settlers Coming.

Toronto, May 3.—Over 300 settlers left the Union station this afternoon for Western Canada, all of them coming from Ontario farms.

Ten Thousand Dollars to loan on high grade city property. Forty per cent of value advanced.

MAKE PREPARATIONS FOR BIG CAMPAIGN

Y.M.C.A. Committee Proposes to Raise a Half Million Dollars in Winnipeg.

Winnipeg, May 3.—The campaign in Winnipeg to raise a quarter of a million by popular subscription for the Y.M.C.A. will open on Thursday, May 25 and will close on Saturday night, June 4. During this period the executive committee will meet daily at luncheon, when conferences on the progress of the work will take place. One of the storerooms in the Y.M.C.A. building will be secured as the headquarters of the committee. As an opening event, a dinner will be given and the attendance of as many of the leading citizens as possible will be secured.

This sum is required in Winnipeg owing to the fact that a very much larger central building is needed, and also as it is proposed to erect a structure in North Winnipeg. Secretary Patton states that provision must be made for a membership of 3,000 young men, and for 800 junior members. To do this, it will be necessary to erect a structure of some size and the plans which have been prepared show a seven story edifice

C. K. Calhoun, international secretary for Canada, is devoting his entire time to the completion of the arrangements for the campaign. The members of the executive committee so far as arranged are Edward Brown, A. L. Crossin, G. R. Crowe, and D. J. Dyson. Other names will be added to this list and as soon as the committee is complete the members will meet and elect a chairman. A booklet will be issued during the month of May, prior to the opening of the campaign and will show what the position of the Y.M.C.A. is and exactly what is needed to put the institution in the best possible position for future work.

Mr. Calhoun stated yesterday that the effort to secure $600,000 in Toronto for Y.M.C.A. purposes was the greatest ever made on the continent. Boston business men had gone out on one occasion for half a million which was the record. The large amount mentioned was needed in Toronto since four buildings were to be erected there. On the new central building on College avenue $300,000 would be expended, on a west end building on College avenue $150,000 would be expended and on a students' building at the University and on an east end building $75,000 would be spent. The amounts subscribed in Winnipeg for the local undertakings would be payable in installments covering two years. The sum asked for would cover all the expenses of the undertaking, land, buildings and furnishings. The new buildings will be devoted wholly to the purposes of the association, no rooms being rented for commercial purposes other than to young men as bed rooms. All the modern conveniences of Y.M.C.A. buildings will be provided.

LEAGUE PROTESTS.

Because Officers Not Allowed in Winnipeg Immigration Building.

Toronto, May 3.—"Having heard regretfully of the unwarrantable interference and obstruction by the Dominion government officials at Winnipeg with President W. T. Rogers and officers of the British Welcome league, recently organized there in the discharge of their duties for the benefit of newly arrived immigrants by refusing them admission to the immigration hall, we desire to express our indignation at and condemnation of such arbitrary action and request all British subjects throughout the Dominion to call upon the government to rectify the same." The foregoing resolution, moved by Robert Amos, was passed unanimously at a meeting of the British Welcome league tonight. About six hundred were present.

LANDLORDS TO COMBINE TO MITIGATE WOES

Chicago, May 3.—Harassed by restless lease-breakers, threatened by "baby farms," "dogs in the family" and other pests and confronted by legal red tape that drives to despair, 5,000 house and flat owners saw means of relief in the new Landlords' Bureau of Chicago, incorporated at Springfield.

Every house owner in Chicago will be asked to join the association and become a union landlord, and a property directory will be issued, listing tenants so that delinquents who have proved troublesome will have difficulty in getting rooms to live in.

B. Z. Sampson, of the old Landlord's Protective association, is president of the new concern, with Jacob Sampson and Isaac Landsberg as co-incorporators. Branch offices will be opened on North avenue and Blue Island avenue. The central office will be at 1642 West Division street.

CHILDREN BUILD BONFIRE WITH STICK DYNAMITE

Pittsburg, May 3.—Eight small children made a bonfire of stick dynamite in Brookline, a suburb, last night and were dancing about it, shouting gleefully at the pretty blue flames, while residents in the vicinity stood helpless from fear. Only after a passing stranger had retreated to a safe distance and called out that policemen were coming, did the youngsters run from the dangerous blaze.

The children had found the dynamite in an old shanty. When a policeman arrived on the scene one little lad, barely six years old, walked up to him and showed him a stick of dynamite. He had more in his pockets. Another lad had a box of dynamite caps. The policeman gingerly canfiscated them.

YOUNG MEN MUST BE ARCHITECTS OF FORTUNE

J. Pierpont Morgan Extends Advice to Those Who Would Succeed.

New York, May 3.—"Do I think that the young of today have as many opportunities as those of the previous generation?"

J. P. Morgan, jr., slowly repeated after the visitor who sought to interview him today. "Why, of course I do, but it all depends on the young man. By studying his employer's interests he is only furthering his own. Time servers and sluggards have no place in the world today.

"Wall street is full of such young men, and you and I will live to see them succeed to a business of their own. It is the same old story the world over. Hard and intelligent work and integrity will land any young man at the top of the heap."

EACH SEVENTY-FIVE ON DAY OF WEDDING

Brockton, Mass., May 3.—Born on the same day, May 5, 1835, and classmates in the little old red school-house in Weymouth in 1845, Fred Hanson, formerly representative, a well-known granite dealer, and Mrs. Emily J. Cole, of Braintree, will be married on their seventy-fifth birthday at the Cole home in Braintree.

The marriage will be Mr. Hanson's fourth. He is a widower. It will be Mrs. Cole's third marriage. She is a widow. Mr. Hanson is a veteran of the Civil war and a member of the G. A. R. By a coincidence Mrs. Cole's former husbands were war veterans and G. A. R. man.

In speaking of his marriage plans Mr. Hanson said:

"There are some men who can live alone, but if I had to live any longer the way I have for the last year and a half I would hang myself. There are men who can get their meals in a hash house and go to a single room and be contented, but I can't, and am not going to. I've got to have a home."

FARMER ICES TREES TO SAVE APPLE CROP

Minnesota Man Retards Blossoming Until Danger From Early Frosts Passes.

Little Canada, Minn., May 3.—Lee Brings, a farmer, who lives about a mile north of this place, near the shore of Gervais lake, has ideas of his own about growing apples. He has lived in Minnesota all his life, and did not have much confidence in the "early spring" prediction. Therefore, early in March, he began hauling ice from Lake Gervais and piling it around his seventy-five crabapple trees. The result was to stop the progress of the budding, and while all the other apple and fruit trees on neighboring farms were blossoming joyfully a week or two ago, Brings' had not even started. Then came a killing frost, damaging all the trees in the state. But the Little Canada farmer's crop is all right, for his apple trees hadn't started to grow. Now the last of the ice surrounding the trees has disappeared and Brings is jubilant, for his trees will not blossom for a week. In the meantime neighboring farmers are bemoaning their entire crop.

"There are some folks who know all about crabapple trees," Brings said. "I don't pretend to know it all, but I thought that I would follow the plans of nature as closely as possible and keep the ground from thawing out close to the roots. My trees are fine now, and I'm sure I'll raise a better crop of apples this year than ever before."

The crop last year netted Brings a goodly sum. He also saved thousands of strawberry plants by covering them with straw a foot deep, while other growers merely placed a thin covering over their plants. As a consequence, Brings' strawberries are growing nicely, although thousands of plants in the neighborhood were killed by the frost. Brings' scheme has attracted considerable attention, and it is probable that it will be copied very generally throughout the Northwest next spring.

HEARST WINS.

New York, May 3.—W. R. Hearst won a legal victory over the city of New York in the supreme court today, when Justice Greenbaum dismissed a test case to compel Mr. Hearst to pay damages obtained against the municipality for deaths and injuries of persons in the explosion of fireworks near Madison Square Garden in 1902, when Hearst was celebrating his election to congress.

Judgments aggregating $1,727,260 have already been obtained against the city and there are many suits yet to be tried.

The total damages asked for are nearly $3,000,000.

CHILDREN'S WEEK

AT THIS STORE

---May Day This Week---

Not a child in town but knows that May Day is to be celebrated. In this store we have planned for this week by providing special values in Children's Clothing. Larger assortments, better values than ever are here in Ready-to-Wear Hats and Bonnets, Dresses, Suits, Aprons, Blouses, Ties, Belts, Gloves, Hosiery, Parasols, etc. Watch our advertisement.

White and Colored Dresses and Aprons 50c Each

An unusually large assortment of Girls' Dresses and Aprons, sizes 3 to 10 years, in White Lawn, Colored Batiste, plain and fancy; Prints and Ginghams; well made and nicely trimmed with Insertions, Laces and Frills. Our special sale this week, 50c each.

Small Girls Dress Aprons 25c Each

White Aprons for the small girls; material is Lawn, made up with yoke trimmed with Insertion and Lace; flounce at bottom. A price such as this is less than cost of material. Special this week, 35c each.

Better Dresses in Immense Variety

The two foregoing lines are but an indication of a few of the special values offered at very low prices. The better dresses and aprons show better quality, nicer styles, newer colorings, and this week's showing embraces all grades in White and Colored Aprons, Dresses, Suits, Blouses, etc., ranging in price from 75c to $5.50 each.

W. S. COLLISTER & CO.

THE STORE FOR WOMEN'S WEAR.

NOT LIBERAL ORGANIZER.

A. M. Parken Was Calgary Organizer for R. B. Bennett.

Calgary, May 3.—The identity of the mysterious "Mr. Parken from Calgary," whose name is appearing prominently in the proceedings of the royal commission at Winnipeg has been learned here. Far from being the "Liberal organizer for Alberta," this man is A. M. Parken, who acted for R. B. Bennett in the last provincial elections as organizer in ward two and four in this city. He is also the same man who was convicted of passing worthless cheques here some months ago.

Parken is a member of the Salvation Army and the local officers wired the Winnipeg corps to locate him. Word has come back that although he attended a number of meetings he has not been seen for some days and the police have also been unable to locate him. He is still being looked for. Parken is well-known in Calgary, but has never been connected with politics other than as an organizer for Mr. Bennett, the Conservative member for Calgary.

FAKE MATRIMONIAL BUREAU IS RAIDED

Jefferson City, Mo., May 3.—J. A. Campbell, a wealthy farmer of Morgan county, and his daughter, Mrs. Mabel Addison, were held to the federal grand jury here today under $1,000 bonds to answer a charge of conducting a fraudulent matrimonial scheme.

A search of Mrs. Addison's rooms by postoffice inspectors brought to light more than 400 letters from men in all parts of the country. Several of the letters had contained sums of money running from $5 to $50 for a wedding outfit.

Campbell confessed today, but said he inserted the advertisement "just for fun," and that the replies came so fast he was unable to return the money as fast as it came in.

FRANK STRIKE STILL ON.

Did Not Affect Nova Scotia Situation, Declare Officials.

Fernie, May 3.—Officials of district 18, United Mine Workers of America, have no intimation that the strike in Nova Scotia was called off because funds were needed to finance the strike at Frank, Alta. They declare that the Frank situation does not materially affect the case, as only between 200 and 300 men are out.

The men have now been idle since March 31. Sheriff Van Wart, of Calgary has been appointed chairman of the board of conciliation appointed under the Lemieux act to enquire into the trouble. Colin Macleod will represent the company, and Clements Stubbs, vice-president of district 18, will represent the men. No date is appointed yet for the board to sit.

TENDERS WANTED.

Tenders will be received by the undersigned up to May 9, 1910, at 5 p. m., for supplying Uniforms for the Fire Department. Specifications can be obtained at the City Clerk's office.

The lowest or any tender not necessarily accepted.

W. A. DUNCAN, City Clerk.

City Hall, April 30, 1910.

CITY OF NEW WESTMINSTER.

Applications will be received by the undersigned up to May 16, at 5 p. m., for the position of City Treasurer.

W. A. DUNCAN, City Clerk.

City Hall, April 26, 1910.

ASSISTANT JANITOR WANTED.

Wanted—Assistant janitor for the Central schools, New Westminster. Applications received until Saturday, May 7.

R. LENNIE,

Secretary New Westminster Board of School Trustees.

New Westminster, April 28, 1910.

NOTE OF THANKS.

Mrs. E. M. Dominy, proprietress of the old established Arrow Press, wishes to take this opportunity to thank her many friends for their kind patronage in her old place of business and hopes to still have the pleasure of supplying their wants in the job printing line in her new premises, near The Daily News Co., 609 Victoria street. Phone 695.
