DAMAGING FLOODS NEAR KANSAS CITY

CYCLONE DOES GREAT DAMAGE ON THE PRAIRIE

Other News by Telegraph

Kansas City, July 8,—Twenty persons were drowned and hundreds injured by floods in Davies and Grundy counties. Pattonsburg, Mo., with a population of 1500 is under ten feet of water with the flood still rising. It came with such suddenness that there was no possibility of inhabitants escaping to higher ground and they were forced to seek safety on the house tops. Fifty row boats hove been sent from here by a special train and rescue work is progressing. Fire broke out in a lumber yard at Pattonsburg and big piles of burning lumber toppled into the water and floating down the river set fire to two residences which burned to the water line.

Farmers have been compelled to wade in water up to their necks, women and children seek safety in trees, trusting to be found by rescuers before the water reaches them. Six railway men who were sent to keep drift away from a bridge were drowned.

Gainsboro, Sask., July 9;— A cyclone, accompanied by hail wrecked eleven homes. Three people were killed and eleven injured. Buildings were scattered over the prairie and battered into kindling wood, Threshing outfits and farm implements were carried half a mile and broken up. Hail stones were the size of hen eggs. Crops within the affected district are ruined.

Cobalt, Ont., July 8:— Half a mile of buildings on the main business street of the city were destroyed by fire. Three thousand are homeless. Two foreigners perished and four children are missing. Appeals have been made to the government for aid. Soup kitchens have been opened to feed the homeless. During and immediately after the fire looting became general and no efforts were made to stop it. The thieves carried away everything in sight.

Paris, July 7,—A large area of France has been shaken by an earthquake. No deaths are reported but the property loss is heavy.

London, July 7:— England is greatly excited over the murder of Sir Curzon Wyllie, prominent official in India, and Doctor Lalca a prominent physician of Shanghai, by an Indian student named Dhingari, at a reception for Indian students held in the Imperial Institute. Two documents were found on Dningari; one was a confession of a desire to take the life of a high official because he was dissatisfied with British rule over India; the other was a sort of political creed, referring to Englishmen as tyrants and suggesting a reward in heaven for anyone getting rid of prominent Brittishers.

New Westminster, July 9:--The Calgary team challenges for the Minto cup. The challenge will probably be accepted and tne games played during expositiot week.

San Francisco, July 4:—Ketchell was given the decision over Papke in a twenty round 'bout. The fight was fast, furious and bloody, at the finish the floor was covered with blood and both men were bleeding profusely. Ketchell broke his right hand in the eighth round and later dislocated his left thumb.

New York, July 6,— The casualties resulting from the celebration of the fourth of July were unusually large. Hospitals are overcrowded with patients injured by explosions of giant fire-crackers. The death list will probably reach a hundred. There were scores of fires resulting from bombs, crackers and fireworks.

Rome, July 7,—Massina was the scene of another severe earthquake. Old walls and temporary structures recently erected were raized. Fire then broke out and is spreading rapidly.

Vancouver, B.C. July 9:—Free placer gold yielding two hundred dollars to the ton has been discovered on Seymour creek. A syndicate has already staked out claims and begun operations.

Seattle, July 9,—In the international yacht races for the Dunsmuir cup, the Yacht "Alexandria" of Vancouver took the first race and "Spirit II" of Seattle, took the second. Captain Deane of the Alexandria refused to sail the third race and protested against the measurments of the Spirit, The comittee sustained the measurments of the Spirit which boat sailed over the course alone and claimed the cup,

Quebec, July 8,—Senator Landry fell down stairs and seriously injured his knee. A surgical operation is necessary.

Galce Bay, N. S., July 8,--One thousand miners engaged in a fight because of the interjection of American labor troubles into Canada. A dozen of the leaders have been arrested. The general manager of the Dominion company was severely beaten.

Everett, Wash., Jnly 9,—A lone bandit held up assistant cashier Olson of the Bank of Commerce and made his escape on a bicycle with a few hundred dollars. Cashier Lyon ran out the back way and grappled with the robber as he came out the front. The robber fired three shots, one of which passed through Lyon's chin and neck. LOCAL AND DISTRICT NEWS.

J.C.K. Sealy is at his ranch in Bulkley valley.

Delicious fresh marshmallows at C. V. Smith's.

Gramophone needles sold by R. Cunningham & Son, Ltd.

The hospital now has 22 patients, the largest number since it was built.

Fresh onions and cheese just arrived at C. V. Smith's.

Latta Bros. on Friday took out to their ranch the first self binder to be brought to the district.

James Cronin is in Hazelton after a trip to his mining property in the Babine mountains, where work has been commenced.

Arthur Lake has gone to the Coast to meet the first party of colonists which the syndicate he represents is bringing to the Northern Interior.

A. S. Gray and Alex Chisholm of Meanskinisht were in Hazelton Thursday. They report the mineral claims looking well and Mr. Gray says the ranch is the best on the river.

J. L. Hampton and Fred Carlson who were injured by a powder explosion, in Pleasant Valley, six weeks ago, are so far recovered as to be out of doors. Hampton has good use of one eye but Carlson is blind for life.

Chas. F. Law and John Campbell the foreman, with a gang of ten miners. left Hazelton Tuesday morning for the Babines to start development on the silver lead properties purchased by Mr. Law from W.P.D. Pemberton of Victoria.

The yard around the Hudson's Bay store is piled high with farm machinery brought up the river this year and waiting the convenience of owners for transportation to the farms. Mowers, plows, rakes, harrows ets. are arriving by every steamer.

Three drives of cattle amounting in all to about 300 head, destined for the meat supply of the Northern Interior for the next year, were brought into Bulkley velley in the last week, Chas. Barrett of Barrett & Co. had with him about 165 steers; Lem Broughton of Broughton & McNeil, Aldermere, had about 65 head and N. D. McMillan a bunch of about 50. The cattle were all purchased in the Chilcotin country 400 miles south. There are not enough cattle in this northern country to supply the market but in a few years at the present rate of progress Bulkley valley will be raising beef for the local market and have cattle to ship to the Coast.

BIG STRIKE ON MANSON CREEK

H. M. Beach, manager of the Kildare Mining Co., announces a big strike of placer gold on the company's property. To use his own words they have "struck it rich, forty feet wide and plastered yellow."

This company is well deserving of the success that has at last crowned its efforts. It has worked a gang of men each year for the last four years and has an up to date hydraulic plant for handling gravel, including electric light plant for night work, and saw mill. Mr. Beach passed through Hazelton with a gang of eighteen men last April on his way to the property to commence operations for the summer.

The news is confirmed by the packers who brought out the letter and who saw the showing.

Manson creek was first discovered in 1870, in the second year of the gold excitement on the Omineca river. Pat Hickey, chief engineer of the steamer Hazelton, is one of the old timers who was there at that time. The Cassiar excitement following close on the discoveries on the Omineca, most of the miners left for the scene of the new diggings and since then placer mining has been carried on continuously, with flurries of excitement following some strike of more than ordinary importance. The district has been a steady producer of the yellow metal but the gravel was never of snch a grade that fortunes could be dug out of the ground in a season as in the palmy days of the Klondyke. There are great areas of placer ground in that section of the country but of such a grade that, while they would pay handsomely were it possible to place heavy machinery on the claims, they are of too low a grade to be worked by individual methods and must wait, like all things in the Northern Interior, for the construction of the Grand Trunk Pacific.

NEWS FROM BABINE LAKE.

J. H. Brownlee, P. L. S., returned from Babine lake Tuesday. He states that the mineral outlook about the lake is very promising. W. W. Leach, of the Dominion geological survey is examining the coal deposits discovered by Chas. Newman, the well known prospector, and in all liklihood Mr. Leach will examine the copper-gold ores of the east side of the lake before he returns to Hazelton.

C. S. Anderson is well satisfied with his strike on Fifteen-mile creek, The ore is silver-lead.

The great need of the south end of the lake, where the best land is located, is some kind of a feasible outlet. With this end in view Mr. Williscroft will examine the proposed route from Burns lake and south Bulkley to Babine lake. Brownlee & Nash's survey party will blaze a good trail from Babine, just north of Fifteen mile, westerly toward Burns lake.

Quite a few settlers are examining the land surveyed last year on the Babine-Stuart lake portage and a number of pre-emptions have been filed at Fort St. James.

C. H. Chapman, superintendent for James Cronin, has just returned from Babine lake after examining the several possible outlets for Dibble group ore by way of the lake. He will now continue the investigation from this end. It has been M. Cronin's idea for some time that the ore from the Dibble group would find its most feasible route by way of the lake whenever ore shipments should commence.

Telkwa Coal Lands Look Promising

Samuel Barker, M. P., of Hamilton, and C. G. Burnett, of Toronto, representatives and part owners of the Cassiar Coal Co., owning 20,000 acres of coal land on the west side of the Bulkley river at the mouth of the Telkwa, recently made a trip to the property on a general tour of inspection and returned Monday to the coast on their way home. Mr. Barker expressed himself as delighted with what they had seen, not only of their own property but of the country in general.

At one place on the bank of Goat creek a few miles from the mouth of Telkwa river three openings have been made on as many different seams of coal, one above another, and the total thickness of coal in the three seams, vertical measurment, is over forty feet. It is a great desire of the Cassiar Company to find on their property a coal that will make coke. Future requirements of a great smelting industry will demand large quantities of coke and it is the hope of the company to be able to supply that demand and make the forks of the Bulkley and Telkwa rivers the centre to which all the ores of the northern interior will be brought for treatment.

From present knowledge the presence of a coking coal seems assured but owing to the fact that surface croppings have in many places been burned out, more work will be necessary to determine the nature and exact thickness of the various seams and their probable extent, although the latter is believed to be equal to the total area of their holdings. Diamond drilling done some years ago failed to find coal on one corner of their property but it is believed that it was so only on account of the hole not being deep enough; being only 130 feet,

CHURCH OF ENGLAND

Rev. J. Field,

Sunday services—Morning service 11 a.m. Sunday School 2-15 p.m. Native Service 3-30 p.m.

Amos Godfrey who has been inspecting the coal holdings of a Vancouver syndicate and which are located in the Copper river valley, arrived in Hazelton Sunday last and took steamer for the Coast to confer with his principals. Mr. Godfrey said he was very well pleased with what he had seen and that he would return as soon as transportation service will permit, to commence active development work on the property, the nature and extent of which will be determined during his visit. Their great need at present is a trail from the mouth of Copper river to the claims. Mr. Godfrey was within thirty miles of the property when at Copper City but had to travel 150 miles by way of Hazelton and Bulkley to reach them.

SATURDAY, JULY 10, 1909.

The first step seemingly necessary to the settlement of the local Indian agitation is to promptly and firmly disabuse the minds of the natives as to their imaginary wrongs and also on the point of their hopes for further additions to their reserves. This of necessity must devolve upon the officials entrusted with the administration of Indian affairs within the district.

It will be necessary to give the Indians clearly to understand in what relation they stand with the government, as wards of that government, and also that in establishing a department of Indian affairs the government was acting with a view wholly to the Indians' best interests. It will be necessary to impress upon them that their ancient tribal laws and customs cannot be permitted to interfere in any way with the laws of the land and that they must look exclusively to the proper authorities for all advice in matters pertaining to their lands, and to obey without question the rulings of such authorities; that the white people obey the laws asd Indians must d, the same.

Logically the next step necessary will be to extend the present system of education to include farming in its various branches and to aid the Indians in making such use of the land already in their possession that they may derive the full benefit of it. When they have thus been taught how to properly cultivate this land they will then be able to understand that they have been well provided for by a parental government, with an assured source of livelihood that will be sufficient to keep them and their decendents in increasing comfort year by year.

With this issue The Herald commences its second year of publication. During the past year it has been accorded a very gratifying support from the people of the district, both morally and financially, for which our thanks are extended. For the future, with an increased plant now on the way and better facilities for conducting the business, it will be the aim of The Herald to deserve that support which has been so freely extended in the past.

Coal Prospects look Favorable.

That coal was to be found on Copper river has been known for a number of years and in fact some claims were staked in that district some two or three years since. Nothing was attempted by the first holders toward developing the property and the claims were allowed to lapse. However, the properties have been located by a strong syndicate headed by prominent people of Vancouver who propose to take hold of this field and, whatever else may be done, settle the coke question for the Northern Interior.

The expense connected with holding a coal claim in British Columbia is almost a sufficient guarantee that no claims will be held that have no coal. The large area of this syndicate's holdings, one hundred and eight square miles, shows conclusively that there is an area of coal bearing lands on Copper river that will supply all demands likely to be made upon it for generations to come.

While there are no smelters in the territory of the G. T. P. in British Columbia and no likelihood of any until rails are laid into the mining sections of the country, nevertheless the hills are full of ore of a better grade than is worked profitably in other portions of the province. These ore bodies are being opened up on a small scale now and a great stimulating influence to this end would be an assurance of plenty of cheap coke of a good quality for smelting purposes.

G. Lloyd Faulkner, the agent who staked the claims for the Vancouver syndicate, is the authority for the statement that the croppings would average five feet nine inches in width wherever exposed and the quality, as shown by the analysis given below, is specially adapted for smelting requirements.

Volatile hydrocarbon	41.90	per c.
Fixed Carbon	51.16	"
Ash	3.22	"
Moisture	3.72	"

The above corresponds to a first class Bituminous coal, good for smelting purposes.

The Mineral Wealth of Omineca

The Omineca mining district will be opened up by the G. T. P. railroad within the next three years and a dozen or more camps already known will then be developed on an extensive scale and present prospects turned into mines. So far there is no mountain or range of mountains that has been prospected to an extent to justify any man in saying that ore in paying quantities does not exist, and in the camps that are already established and have magnificent showings of ore on the surface, nothing like thorough prospecting has been done. There is room in the district for several hundred prospectors to work for the next five years without exhausting the possibilities of the country.

The stretch of country drained by the Copper, Skeena and Bulkley rivers, including the watersheds of the Telkwa and Morice rivers, is a copper district that in the opinion of some of the most prominent mining men of B. C., will in a short time after the railroad is built to afford transportation for heavy machinery and cheapen the present heavy cost of supplies will draw the attention of the mining world and become one of the great producers of the red metal. The formation is right, ore discovered is of more than average high grade for copper ores and some prospects show startling values. Within this district are the already known camps of Kitselas Canyon and its bornide ores of high grade. The great district lying between Telkwa and Copper rivers and extending south to the Morice river: Hudson bay mountain with some small high grade propositions and some large low grade veins, and the country lying back of Meanskinischt "The Holy City" about half way between Hazelton and Kitselas, where copper discoveries have been made within the last year; all these are known places where copper veins have been found that from every standpoint of the mining man offer special inducements to capital. The presence of coal in nearly every valley of the Northern Interior, will solve the problems of cheap treatment.

Lead ores carrying silver and gold, occur in places of the copper district, notably Hudson Bay mountain and the Morice river. The ores have been pronounced by mining engineers to be magnificent. Less than ten miles from Hazelton, and on a hill that has been passed by every man that has ever traveled the district, are silver lead ores in connection with more or less antimony, having been found within the past year. At the foot of the same mountain and only five miles from Hazelton, prospects are being opened up that must be satisfactory to the owners as they are continuing development. Farther south, in the Babine range, are the properties now being worked by James Cronin, one of the best known mining men in the Northwest, the claims recently taken over by Charles F. Law, of Vancouver, and other rich claims still in the hands of the locators. While this district east of the Bulkley river is principally known as a silver lead country, copper ores occur in the neighborhood of the galena the same as the galena ores occur on the other side, not as isolated claims but as small districts in themselves with the formmations peculiar to their charactor of ore.

Babine lake is coming to the front with both silver-lead and gold-copper ores, Tacla lake is known to be rich in mineral and is probably the only place in Omineca district where free milling gold is likely to be found.

The only trouble with the Northern Interior is there is too much mineral; were it not so common greater value would be placed upon the deposits now known.
