STEEL RAILS HAVE REACHED SKEENA CROSSING BRIDGE

FIRST TRAIN PULLED UP TO BRIDGE THURSDAY NOON

Second Caisson Will be Sunk Saturday Night---Work Trains Start Ballasting the Road---Trains Rush Bridge Steel up---Getting Other Bridges Ready

The rails for the G.T.P. arrived at the Skeena Crossing bridge on Thursday at noon, March 14. The first train pulled up to the west abutment of the bridge amid the blowing of whistles and cheers from the hundreds of men employed at that point. General Superintendent Mehan, Divisional Superintendent McNicholl and Superintendent Sheppard of Foley, Welch & Stewart were present with Bridge Superintendent Halpin and witnessed the driving of the last spike and helped cheer the first train.

The work trains will commence work at once ballasting up the road that has been laid up from Kitselas to the bridge while other trains will rush the steel for the bridge up to that point ready for the men to throw across the stream. This part of the contract will require about two months to complete so that the trains can run across and on up the other side of the river. If the contractors have a continuation of their past good luck it will be done sooner.

The second and last caisson for the bridge will be sunk by tomorrow night and ready for the cement. In another week or two a large number of the men now working at that point will be moved further up the line on some of the other bridges.

Many teams have been hauling sand, gravel and cement to the site for the several smaller bridges and these will be ready for the steel as soon as the trains can be moved along so that there be no delay whatever, until the trains are running past New Hazelton.

ALEX. M. MANSON WAS THE CHOICE

Prince Rupert Liberals Put a Candidate in the Field against Wm. Manson

A special wire from Prince Rupert to the Herald yesterday announced that the Liberals of Prince Rupert had decided to put Alex. Manson in the field to contest the riding against Wm. Manson, the Conservative candidate and the representative in the last parliament.

Alex. Manson has had political aspirations for some time and although the party cannot hope to win, or even get a small percentage of the votes of the district, Alex. no doubt thinks that he will get his feet wet and know more about the game next time. Then the dignity of the party had to be upheld and some one must be the goat, and probably no one could be found in the Liberal ranks more capable of playing that role. Therefore there will be an election in the district on March 28th.

HIGHWAY OVER MOUNTAIN PEAKS

Two Hundred Thousand Dollar Scenic Drive from Banff to Windermere

(Special to the Herald)

Vancouver, March 14. — The Vancouver Progress Club is now laying plans for a big permanent exhibition of the products of the province. It is proposed to make it a huge affair and to interest every city and district in the province. Each city and district will be allotted a space at the exhibition.

At a recent meeting of the Progress Club, W. W. Foster, of the public works department intimated that a fine highway along the peaks of the mountains from Banff to Windermere was projected by the government. It is a distance of fifty-five miles and will cost it is estimated around $200,000.

Norman McLeod and Mrs. McLeod arrived in town on Tuesday night and spent a few days here.

PATHFINDERS WIN THEIR WAY

Arrive at the City of Mexico after Many Privations—Large Reception by Government Officials

Just two months to the day was required to Pathfind the Pacific Highway from Los Angeles to the City of Mexico as T. J. Beaudet representing the Los Angles Examiner and Pacific Highway Association arrived in the City of Mexico the last day of February and left Los Angeles on the stroke of 12 o'clock at midnight January 1st.

The Pathfinder was met by a large delegation of government officials and escorted to the Capitol building were Beaudet was presented to President Francisco Medero who took time enough from his arduous duties of state to greet the hardy American motorist who had done such remarkable pioneer work connecting the Capitol of the Republic of Mexico with the United States.

A great deal of credit is due the Los Angeles Examiner and Don Lee, owner of the Cadillac car for undertaking such a strenuous trip. Of course the hardship fell on Chester Lawrence and T. J. Beaudet, who actually made the trip. Undoubtedly no one can ever be made to realise the suffering and privation these two men underwent to accomplish what they started out for and to win the Pacific Highway Gold Wheel for having made the first trip.

The Pacific Highway has been covered by automobile practically the entire length of the North American Continent. The actual points north and south are Hazelton, British Columbia which is sixty miles of Alaska and the City of Mexico on the south. The total distance is 5700 miles. More than two-thirds of this is now open for comfortable automobile travel eight months out of the year.

Complete information can be secured concerning any part of this route from the International Headquarters of the Pacific Highway Association, located at Seattle by motorists who are thinking of touring this country.

ONE OF CHARLESON'S PACK TRAINS WHICH WILL TAKE SUPPLIES INTO THE GROUNDHOG AND COPPER RIVER COAL FIELDS

FIVE LIBERALS IN VANCOUVER

Plan a Vigorous Fight and Hope To Capture One or Two Seats

(Special to the Herald)

Vancouver, March 14. -- The Liberals have nominated five candidates for the city and will contest every seat. The nominees are: Ralph Smith, C. W. Enright, W. S. Cameron, Maxwell Smith and J. N. Ellis. A vigorous fight will be made and the party hopes to capture one or two seats. In Victoria the Liberals nominated H. H. Brewster and R. T. Elliott. In both cases the Conservatives are running the old ticket and with the old confidence of clearing the board.

Miners Still Out

(Special to the Herald)

London, March 14.—The coal miners have agreed to the suggested conference, but still the minium wage question cannot be discussed until the ballot of the miners has been taken. Some 376,000 miners are now idle and the monetary loss is over 2,000,000 pounds sterling, to date.

Cut Naval Estimates

(Special to the Herald)

London, March 14.—The Britnaval estimates provided for this year's expenditure amounts to $220,427,000, or a decrease from last year of $1,535,000. The new program includes four large armoured cruisers, eight light armoured cruisers, twenty destroyers and a number of submarines.

I. W. W's. Jailed

(Special to the Herald)

Vancouver, March 14.—Five I. W. W. agitators were given sentances here today by Judge McInnes from two months to six months.

Volcano on the Panama

Special to the Herald

New York, March 14.—It is reported here that a volcano which has been lying dormont for centuries now threatens the safety of the Panama Canal. Recently clouds of blue smoke and steam have been seen rising from the new turned earth.

Frank Jackson arrived in town on Thursday and since then he has been busy rustling dogs and toboggans to take his men up to the Groundhog country. Mr. Jackson has several men with him and he is anxious to get away and get the seasan's work under way.

Jas. Riley Home

Jas. A. Riley returned to the district on Monday last after spending the winter in the south where he did a great deal of effectual boosting for the Hazelton district. He reports that the local mines have at last awakened a great deal of interest in Vancouver, Victoria, Seattle, Portland, San Francisco, and other cities that he visited, and that there will be a great many mining men up here this season, as well as many who are looking for investments in stocks, land and town lots. All winter the greatest interest has been manifested in the operations on Rocher de Boule and the Harris mines, and the people are now anxious to learn the result of the work on the American Boy tunnel.

Jimmy will be located here for the future and he is a welcome citizen. When Riley is around there is always something doing both in business and in sports.

Sawmill Burned

Last Friday night fire broke out in the Interior Lumber Co.'s saw mill on Two Mile creek and the mill was a complete loss. It was discovered about midnight by Foreman McKay who gave the alarm and the men all turned out immediately. A big fight was put up against the flames but the building could not be saved. The men were successful however in confining the flames to the saw mill. Since the fire the mill has been closed down while new machinery could be secured and another mill be put up. The new plant was secured from Foley, Welch & Stewart at Sealey and the first of next week the plant will be running again. Fortunately a couple of hundred thousand feet of timber was cut ahead and the work on the big tunnel was not interrupted. The loss will amount to several thousand dollars.

Another Barn Fire

Last Friday night fire was discovered in the Hazelton Hotel barn and just in time to prevent a big and disastrous fire. A bale of hay sitting on the main floor was burning when Mr. Harvey arrived, and how it took fire is a mystery very similar to the origin of the other two barn fires. Fortunately no damage was done and the six horses that were in the stable were uninjured.

A daughter was born to Mr. and Mrs. Jas. McKay at the Hospital on Thursday morning. Both mother and child are doing fine. Jim is receiving the congratulations of his many friends.

Wm. Manson the Choice

Wm. Manson, of Prince Rupert, was chosen unanimously by the Conservatives of this district to again be their candidate at the provincial election on the 28th of this month. The Conservative party is united and even though another candidate is put in the field by the Liberals, Socialists, or anyone else, Mr. Manson will undoubted be elected by a very large majority. It would be only a fitting recognition of his faithful services to the district to allow him this election by acclamation.

Since Mr. Manson has been the representative from this district he has succeeded in bringing the northern interior to the attention of the government in a manner that it was never before. He is personally thoroughly acquainted with the immense resources of the district and with the conditions that the settlers are laboring under. He has succeeded in getting the appropriation for the construction of roads and bridges increased every year and this year something like $500,000 will be spent in the Skeena district. Hazelton will do well to join hands with the rest of the district and give Mr Manson a bumper majority in case there is a necessity for a vote being taken. The district is better off in Mr. Manson's care than in the care of anyone else.

Minister of Mines Report

The mining men of Hazelton, and no doubt all other parts of the province, regret that up to the present annual report of the Minister of Mines does not appear until July of the following year, and thus of very little use for that season's work. The department at Victoria have all their reports, maps and data in by the last of December each year and that should give lots of time to get the report compiled and printed and ready for distribution not later than April 1st of the following year. If the miners and prospectors could secure that report in the early spring they would be greatly benefited and every mining district in the province would be more systematically worked. For the benefit of the mining interests a greater effort might be made by the department of mines to get their report into circulation in the spring instead of the summer.

Late Captain Noel

The accident happened just after Captain Noel had completed the trial of his new launch, the Gretna II. He had taken a spin in her around Dodge Bay, where the snag scow is at present on the ways, and was leaning over the bow to pick up his moorings when somehow he overbalanced himself. He fell head first into twenty-five feet of water, and may have struck the mooring buoy in his fall, as he sank struggling and was unable to catch a grip on boat or buoy.

From the scow on the shore only two hundred yards away Mrs. Noel happened to glance out of the window at the very moment the captain fell into the water. She rushed out to give the alarm and get help, but help was too far away and the poor woman, frantic with trouble, could do nothing single handed. She ran to the wireless station and the boys there hastened to do what they could, but too late.

Meanwhile Gus Harrison, the engineer of the captain's launch, from on shore some distance away, had heard the cry for help from the scow. He managed to rush a boat into the water and row hard for the scene of the disaster, but there was no sign of the captain, who had sunk quickly. Harrison made efforts to recover the body in time to try to save life but failed.

News of the accident was telephoned to Prince Rupert from the wireless station and Chief Owen of the provincial police at once sent officers over to recover the body.

Captain Noel was a very well known old timer here. He had his home in Port Essington, but was known all along the coast and up river. Only a couple of weeks or so ago he had his new power boat launched at Port Essington and engined in Prince Rupert, little guessing that the Gretna II, in which he took such pride, was to be the means of his death.—Rupert News.

P.S.—He was brother to Walter Noel, of Noel & Rock, of this town.

Hazelton Hospital The Hazelton Hospital issues tickets for any period from one month upward at $1 per month in advance. This rate includes office consultations and medicines, as well as all costs while in the hospital. Tickets obtainable in Hazelton from E. C. Stephenson and Fred Field; in Aldermere, from Rev. F. L. Stephenson, or at the Hospital from the Medical Superintendent.

HAZELTON MINING DOPE

Rocher de Boule stock is now selling at 40c.

R. P. Trimble, of Portland, will return to this district in the near future and it is likely that he will take up another property.

Edgar Harris has returned for the spring and summer and has joined the force at the Harris Mines.

Frank Martin and Frank Jackson have returned and will be around the rest of the season. Mr. Jackson was sick for a few days in the Prince Rupert hospital. He will go on to Ground Hog as soon as he is fit.

Wm. B. Steele, deputy mining recorder for the Omineca gold district has made a deal on his property to W. J. Bowen and his associates in Seattle. Mr. Bowen and party will go in about the middle of June to look over their property.

Everything points to a big season in the Omineca with lots of big financial men getting interested. The French syndicate which took over the Kildare property last year are preparing to put $250,000 into the development alone and their men will also go in shortly.

Andy Wooller, of Vancouver, an old Klondyke boy and who has interests in Alberni, arrived in town on Monday and was accompanied by Mr. Thomson, a hotel man of Kamloops and Mr. Nation, son of the proprietor of the Winters hotel in Vancouver. They are here to see the country for themselves and to do some prospecting, and they will likely remain all summer.

The placer gold miners arrived in town last Saturday and spent the week preparing for their long tramp into the Manson Creek diggings. Geo. W. Otterson, of the Manson Gold Mining & Dredging Co., and party will start today with dog teams. In his party are Harry Walker, Capt. Docker, Phil Morris and C. L. Lowe. Their machinery and supplies were taken in last fall and they will put in a big season's work. A number of Indians will be employed as well. Chas. McKinnon leaves tomorrow for his diggings in the same locality.

Frank Martin Makes a Deal

It is reported on good authority that Frank Martin has made a deal for the free silver property discovered on Hudson Bay Mountain last fall. The parties interested are Messrs. Joseph and Arthur Trethewy, millionaire miners from Cobalt, and owners of the 30,000 acre ranch in the Chilcotin country from which point P. Burns & Co. secure their beef for the Hazelton district. These men first saw the rich Hudson Bay mountain ore in J. A. Riley's window in Vancouver and they at once became interested in it and had several experts examine it. Then they met Martin and after talking with him discovered that they knew him of old and this lead up to the deal. Messrs. Trethewy are coming up here shortly to look over the property and if it impresses them favorably they will complete the deal. This will mean a great deal to the Hudson Bay mountain district.

LAND NOTICE

IN BUYING BUSINESS LOTS
Be Sure you Buy in the Mercantile District. At New Hazelton that district is Section One---OUR Property

SECTION ONE = NEW HAZELTON

THE BUSINESS DISTRICT

The best business property in every town is always some distance away from the depot. This is the case in New Hazelton. Section One will be the Best Business Property.

The Hazelton people themselves have bought in Section One and all who have started business in New Hazelton are in Section One or just across the line. Those who have planned for early moving will be located in Section One.

The first Business District always remains a Business District. It is next to impossible to move the district from where it first started. It has started in Section One and that Section is being Rapidly Built Up. The business will stay in Section One and that is the place to buy.

The Northern Interior Land Company own Section One and Section Three. The prices of lots are now as low as they will ever be. They are liable to advance any day.

Buy your Business Lots in Section One NOW. In another year they will be more than doubled in price. This is your opportunity. You missed Winnipeg, Calgary, Edmonton, Vancouver, and other big western cities. Don't miss New Hazelton. It is and will continue to be the distributing point for the vast Northern Interior.

Prices of Lots Range from $100 to $1200 each

These Prices are only good for a short time.

Northern Interior Land Company

Hazelton will do well to join hands with the rest of the district and give Mr Manson a bumper majority in case there is a necessity for a vote being taken. The district is better off in Mr. Manson's care than in the care of anyone else.

Minister of Mines Report

The mining men of Hazelton, and no doubt all other parts of the province, regret that up to the present annual report of the Minister of Mines does not appear until July of the following year, and thus of very little use for that season's work. The department at Victoria have all their reports, maps and data in by the last of December each year and that should give lots of time to get the report compiled and printed and ready for distribution not later than April 1st of the following year. If the miners and prospectors could secure that report in the early spring they would be greatly benefited and every mining district in the province would be more systematically worked. For the benefit of the mining interests a greater effort might be made by the department of mines to get their report into circulation in the spring instead of the summer.

Late Captain Noel

The accident happened just after Captain Noel had completed the trial of his new launch, the Gretna II. He had taken a spin in her around Dodge Bay, where the snag scow is at present on the ways, and was leaning over the bow to pick up his moorings when somehow he overbalanced himself. He fell head first into twenty-five feet of water, and may have struck the mooring buoy in his fall, as he sank struggling and was unable to catch a grip on boat or buoy.

From the scow on the shore only two hundred yards away Mrs. Noel happened to glance out of the window at the very moment the captain fell into the water. She rushed out to give the alarm and get help, but help was too far away and the poor woman, frantic with trouble, could do nothing single handed. She ran to the wireless station and the boys there hastened to do what they could, but too late.

Meanwhile Gus Harrison, the engineer of the captain's launch, from on shore some distance away, had heard the cry for help from the scow. He managed to rush a boat into the water and row hard for the scene of the disaster, but there was no sign of the captain, who had sunk quickly. Harrison made efforts to recover the body in time to try to save life but failed.

News of the accident was telephoned to Prince Rupert from the wireless station and Chief Owen of the provincial police at once sent officers over to recover the body.

Captain Noel was a very well known old timer here. He had his home in Port Essington, but was known all along the coast and up river. Only a couple of weeks or so ago he had his new power boat launched at Port Essington and engined in Prince Rupert, little guessing that the Gretna II, in which he took such pride, was to be the means of his death.—Rupert News.

P.S.—He was brother to Walter Noel, of Noel & Rock, of this town.

Stephenson, or at the Hospital from the Medical Superintendent.

HAZELTON MINING DOPE

Rocher de Boule stock is now selling at 40c.

R. P. Trimble, of Portland, will return to this district in the near future and it is likely that he will take up another property.

Edgar Harris has returned for the spring and summer and has joined the force at the Harris Mines.

Frank Martin and Frank Jackson have returned and will be around the rest of the season. Mr. Jackson was sick for a few days in the Prince Rupert hospital. He will go on to Ground Hog as soon as he is fit.

Wm. B. Steele, deputy mining recorder for the Omineca gold district has made a deal on his property to W. J. Bowen and his associates in Seattle. Mr. Bowen and party will go in about the middle of June to look over their property.

Everything points to a big season in the Omineca with lots of big financial men getting interested. The French syndicate which took over the Kildare property last year are preparing to put $250,000 into the development alone and their men will also go in shortly.

Andy Wooller, of Vancouver, an old Klondyke boy and who has interests in Alberni, arrived in town on Monday and was accompanied by Mr. Thomson, a hotel man of Kamloops and Mr. Nation, son of the proprietor of the Winters hotel in Vancouver. They are here to see the country for themselves and to do some prospecting, and they will likely remain all summer.

The placer gold miners arrived in town last Saturday and spent the week preparing for their long tramp into the Manson Creek diggings. Geo. W. Otterson, of the Manson Gold Mining & Dredging Co., and party will start today with dog teams. In his party are Harry Walker, Capt. Docker, Phil Morris and C. L. Lowe. Their machinery and supplies were taken in last fall and they will put in a big season's work. A number of Indians will be employed as well. Chas. McKinnon leaves tomorrow for his diggings in the same locality.

Frank Martin Makes a Deal

It is reported on good authority that Frank Martin has made a deal for the free silver property discovered on Hudson Bay Mountain last fall. The parties interested are Messrs. Joseph and Arthur Trethewy, millionaire miners from Cobalt, and owners of the 30,000 acre ranch in the Chilcotin country from which point P. Burns & Co. secure their beef for the Hazelton district. These men first saw the rich Hudson Bay mountain ore in J. A. Riley's window in Vancouver and they at once became interested in it and had several experts examine it. Then they met Martin and after talking with him discovered that they knew him of old and this lead up to the deal. Messrs. Trethewy are coming up here shortly to look over the property and if it impresses them favorably they will complete the deal. This will mean a great deal to the Hudson Bay mountain district.

IN BUYING BUSINESS LOTS
Be Sure you Buy in the Mercantile District. At New Hazelton that district is Section One---OUR Property

SECTION ONE = NEW HAZELTON

THE BUSINESS DISTRICT

The best business property in every town is always some distance away from the depot. This is the case in New Hazelton. Section One will be the Best Business Property.

The Hazelton people themselves have bought in Section One and all who have started business in New Hazelton are in Section One or just across the line. Those who have planned for early moving will be located in Section One.

The first Business District always remains a Business District. It is next to impossible to move the district from where it first started. It has started in Section One and that Section is being Rapidly Built Up. The business will stay in Section One and that is the place to buy.

The Northern Interior Land Company own Section One and Section Three. The prices of lots are now as low as they will ever be. They are liable to advance any day.

Buy your Business Lots in Section One NOW. In another year they will be more than doubled in price. This is your opportunity. You missed Winnipeg, Calgary, Edmonton, Vancouver, and other big western cities. Don't miss New Hazelton. It is and will continue to be the distributing point for the vast Northern Interior.

Prices of Lots Range from $100 to $1200 each

These Prices are only good for a short time.

Northern Interior Land Company

NORTHERN BRITISH COLUMBIA TO BE OPENED UP SOON

Road Superintendent of Skeena District, Visiting Vancouver, Speaks on Improvements--Nearly $500,000 to be Spent this Year-- Construction of New Trails and Bridges

"Nearly half a million dollars will be spent this year opening up northern British Columbia," announces Mr. R. O. Jennings, road superintendent of the Skeena district, who is at the Hotel Vancouver. "People scarcely realise the great stretches of fine land that at present are almost inaccessible up in the Northern part of the province," Mr. Jennings said. "We intend this season to reach into such places as last summer we sent men over to make and report on."

"A great deal of money will be spent in making trails, many substantial wagon roads, and at least one first-class automobile road will be constructed, in addition to several bridges. The total amount to be spent on roads and trails is $351,000. In addition more than $90,000 will be expended on bridge construction."

The contemplated improvements will extend over a vast territory reaching along the coast from Bella Coola to Stewart; from Prince Rupert to Burn's Lake through the famous Bulkley valley and up the Skeena river for 400 miles.

One of the new wagon roads will extend from Kitsumkalum to Lakelse lake, 100 miles from Prince Rupert. This is a fine fruit and garden section and Mr. Jennings says it will become the garden for Prince Rupert and contiguous territory.

A wagon road will also open up to better travel the Salmon river mining district upon which just now popular attention among mining men is turned. It is also proposed to build a road up Bitter creek, in the Portland canal mining district, and thus make that valuable mining territory more easily accessible.

From Gitwangah on the Skeena river to Stewart, a distance of about 170 miles, a trail will be constructed. About 70 miles of this trail was made last year. Another trail from Kitsumkalum to the Naas river district, a distance of about 160 miles will be made.

The proposed automobile road will be from Copper City on the Skeena to Lakelse hot springs, a distance of about 18 miles. Mr. Jennings is authority for the statement these are the finest springs in the north and this summer will see a lot of tourists visit them. They are little known at present outside their immediate vicinity.—The Sun.

The Omineca Herald is the leading paper of the Northern Interior—Subscription $3 a year.

WATER NOTICE

NOTICE is hereby given that an application will be made under Part V. of the "Water Act, 1909," to obtain a licence in the Hazelton Division of Omineca District,

(a) The name of Company in full Hazelton Water Light and Power Co., Ltd. The head office Hazelton, B. C. The capital, how divided, showing amount paid up, 5,000 shares of $10.00 each.

(If for mining purposes) Free Miner's Certificate No.

(b) The name of the lake, stream or source (if unnamed, the description is, Mud Creek, Cassiar District.

(c) The point of diversion on Mud Creek, almost 4 miles from Bulkley River.

(d) The quantity of water applied for (in cubic feet per second) 10.

(e) The character of the proposed works, Dam and Pipe Line.

(f) The premises on which the water is to be used (describe same) Townsite of New Hazelton, Section Two.

(g) The purposes for which the water is to be used, Municipal.

(h) If for irrigation describe the land intended to be irrigated, giving acreage.

(i) If the water is to be used for power or mining purposes describe the place where the water is to be returned to some natural channel, and the difference in altitude between point of diversion and point of return.

(j) Area of Crown land intended to be occupied by the proposed works.

(k) This notice was posted on the 6th day of March, 1912, and application will be made to the Commissioner on the 5th day of April, 1912.

POULTRY DEPARTMENT

Winter Hatching

There are many people who want to start hatching during the late winter so that they will have early broilers and early maturing pullets. Some suggestions may be of profit to those thus desiring an early start.

You will probably hatch at this time of the year with incubators. If it is possible, secure a room where there is a fairly even temperature day and night. If you have a heater in your cellar it will be well to place the machine somewhere near it. Then you will not have to carry so high a flame on your lamp, with the result that you will burn less oil and hence save money.

If you have no furnace room then try a room upstairs or in the main part of the house where the temperature is likely to be even. This will be of importance with regard to the heat regulation, for there is a limit even to thermostats.

If you have the machine in a cool room or in a cold cellar you will have to be careful about cooling the eggs too much. The time taken in turning the eggs will be about all the time necessary for cooling. Towards the latter part of the hatch a little extra cooling may be necessary, but the long periods of cooling would be too much to give when the room where the machine is being operated is quite cold.

The chicks which are the results of the hatch should be cared for in the best possible manner. They should be kept in the house and near the stove for a day or two or until they have learned to eat and drink. Then they may safely be taken out of doors and put in a brooder coop wherein is a fireless brooder. Here with proper manipulation of the covers of both brooder and brooder coop they will thrive and do well. The fireless brooder has solved the winter-hatching problem without the usual trouble of overheated brooder coops and smoke-filled houses.

The feed for these chicks should be about the same as for spring hatches with the exception of a little heavier night foods. Cracked wheat and cracked corn make an excellent night food. They must have a good, substantial night meal for the long winter's night so that the bodily heat may be maintained.

Try out a hatch this year and you will be surprised and gratified by the results.

Testing Eggs for Fertility

If you are planning to do some early hatching, you better mate your pens some time in advance, and then after three weeks mark the eggs from each pen and put them in a machine and incubate them until you can get a test. This will tell you of the fertility of each pen. Now and then you will find a male that is not in condition. Possibly your feeding is not right and the eggs are not very fertile. If such conditions exist you should know it in time to remedy things. If you wait till it is time to begin hatching, you will be in a bad position. Make the test from the various pens so that you may know how conditions are.

Cure for Egg Eating

Perhaps some readers of your paper would like to know of a method I employed to cure a flock of hens of the egg-eating habit which had developed to such an extent in my flock that I had almost despaired of being able to cure them.

I took an egg and partly removed the contents by making a small hole in both ends of the shell and blowing out the white, sealed one hole with a little paste and broke the yolk still remaining in the shell. I then filled this with ammonia, shaking the egg thoroughly to get the two well incorporated. After sealing the remaining hole I took the "egg" to the hen house and laving it down on the litter cracked the shell in sight of the hens, thus inviting them to the "feast" I had provided. They eagerly accepted my invitation and after one mouthful as eagerly made way for the next. Please do not ask me to describe the result from that taste. Talk about a circus! Well, in conclusion, let me say that nothing happened except that although I invited them the next day to a "banquet" in exactly the same manner, but with an egg that was still warm from the nest, they one and all disdainfully refused the invitation and never as long as any of them lived did they eat another egg.-Farm Stock Journal.

Methods of using Alfalfa

Alfalfa cut in short lengths makes an excellent substitute for the green grass which the chickens are so fond of. It may be mixed with ground grains and fed in hoppers, or scalded and used as the base for a wet mash. By scalding or steaming the alfalfa the green particles will swell and become as fresh as when first cut. It is better not to mix up more of the wet mash than will be consumed at one feeding. It should not be left in the troughs to freeze during the cold weather and then have the hens picking at it. Feed what they will clean up quickly. The hens will eat the alfalfa if it is mixed with bran and fed in hoppers. This mixture may be kept before the birds all the time.

HAZELTON, B.C.

When you buy at Starting Prices in a New Town you want to get your lots located right in the Heart of the Business Section

We offer you lots at starting prices right in the centre of what must be the business section of the future city of Hazelton.

We have purchased from the Northern Interior Land Company **Over $400,000 Worth of Lots in Section 1,** in the original Townsite of

NEW HAZELTON

The Grand Trunk Pacific Railway have been ordered, by the Board of Railway Commissioners to build and maintain a station at New Hazelton, and it is our belief that we control the railroad townsite.

Here are a few of Our Reasons for believing that Hazelton will develop into a big city

Hazelton is the centre of a great mining district.

Hazelton has a large agricultural and fruit district surrounding it.

Hazelton will be the centre of branch railroads to the mining districts.

Hazelton has the only anthracite coal in Canada, equal in extent and quality to that of Pennsylvania.

Hazelton will be the first large point east of Prince Rupert on the Grand Trunk Pacific.

Hazelton has the raw materials for smelters, factories, and sawmills at its doors.

Hazelton is already an established point and has an established trade.

Hazelton has been fully described in the B. C. Bulletin Send to us for it. Read for yourself and be convinced.

NEW HAZELTON DOINGS

Contractors Rankin, Ross, Dan Stewart, and M. Sheady were in town this week.

Norman McLeod and Mrs. McLeod arrived in town on Tuesday night and spent a few days here.

Several fine new views of New Hazelton, Section One, showing the large number of business houses already located here, were taken last week and are now on sale.

D. McLeod this week received a handsome new saddle horse which he had purchased for his own use in the south. Mr. McLeod expects to do considerable riding the coming season.

There is great demand from station men for work on the new contracts awarded east of Aldermere. Duncan Ross has let all work out to station men and there are several more gangs around looking for stations. There will not likely be any scarcity of labor this year.

Dan Stewart reports that nearly all the new camps east of Aldermere are ready for the men. The most important thing will be transportation over that part of the country where the roads have not yet been built. It is a hard trip to Burns lake and the contractors are hoping that the snow lasts a short time longer.

Dr. Ferguson, who has been located at Sealey since last fall, has now been given full charge of the medical and hospital service on this contract. He will spend much of his time on the road. The Sealey hospital will be in charge of Dr. Fairborn, while Dr. McCallum will be at the Skeena Crossing.

Dr. Clendenning, Dominion Health Inspector, paid an official visit to the railway construction camps along the G.T.P. this past week. He was here for a couple of days and he stated that he found everything along the line in splendid shape and the men were all comfortable and well fed. The sanitation conditions were the best that could be provided and even better than might be expected.

Every available team in the country have been put into use by Foley, Welch & Stewart hauling supplies and material from the bridge out to the valley, and every day there is a string of four-horse teams pass through the town. Most of these teams stop here over night or for dinner and thus the local stables and rooming houses are enjoying the benefit.

P. Vibert, supervizer of Alberta branches for the Union Bank of Canada, paid an official visit to the branch here the latter part of last week and on Sunday went over to the old town to inspect the branch there. On Tuesday he left for Telkwa where he will look over the field and arrange things for the opening of another branch around that point in the very near future.

REPORT ON SKEENA MINING

Provincial Mineralogist on Coal Fields of Groundhog Basin, Which Extend Over a Larger Territory than Before Known

The preliminary report of William Fleet Robertson has the following devoted to the Skeena and Omineca mining divisions:

"The most important development of the year in the Skeena country was the determination of the fact that the coal measures of the Groundhog basin and vicinity extended over a much larger area of territory than had previously been known. A brief account of this coal region has already been given.

"Most of the localities in which silver-lead ores have been found in the Skeena country are in Omineca mining division.

"Commencing with the headwaters of the Telkwa and Morice rivers, mention might be made of diamond drilling in the coal measures of this part of the district. These operations were carried on by two companies—namely, the Prince Rupert Coal Fields, Ltd., and the Grand Trunk Pacific or one of its auxiliary organizations.

"In Dominion basin, work was done on mineral claims on which copper ore occurs, while at the head of the north fork of the Telkwa river some promising silver-lead ores were reported to have been found. On and about Hudson Bay mountain there was much activity, and some promising deposits of silver-lead ore were opened here. The finding of bornite deposits was reported from the Babine country. Then there was development work done on Rocher de Boule mountain, where some good looking copper and galena ores occur."

Ross' Long Tunnel

A month earlier than was expected the big tunnel, commonly known as Ross' Long Tunnel, was opened up from end to end. The heading was completed after a great race by the station men and now they are racing again to finish up the bench. It was on the 1st day or March that the shot was put off that let daylight pass through the 2100 feet of gumbo. In another couple of months, or less, the whole works will have been finished and the men gone. Even now Mr. Ross has some of his teams hauling supplies out to his new camp beyond the Bulkley Summit, and in a short time he intends putting on all his horses —ten four-horse teams—and get enough supplies on the ground to last until June when the roads will be in good shape again for wheels. His camp buildings are completed and the right of way will be cleaned up for those ten miles in good shape.

Mr. Ross expects to leave in a few weeks to spend a short time on his ranch on Vancouver Island and get things started there for the spring.

Contractor Dan Stewart is rustling around for a number of teams to haul freight out to his new camps at Burns Lake. He will have half a dozen or more fours at work this week.

The Hazelton Bakery Coffee House is now completed and as soon as the fixtures arrive it will be opened for business. This will make an important addition to Section One, as the place will be a high class refreshment stand.

SPORTING GOSSIP IN TOWN

Harris' Muckers Won

On Tuesday afternoon Barney Mulvany's Mushers went down to defeat before Al. Harris' Muckers in a warmly contested hockey match of two twenty minute periods. The score was 2 to 1 in favor of the Muckers. Barney himself with his clever stick handling was one of the leading feautures of the game. This art he learned from long practice with the mail trains on the Skeena. On the trip up Monday he nabbed Jimmy Riley and put him into the harness for the game, and Jimmy was there with salve too, but these two shining lights received poor support. For the Muckers Al Harris was the real sensation. His lightening passes were really spectacular. After the game tea was served in the blue room at the Ingenica.

Baseball Fever

With the arrival of J. A. Riley from his vacation in Vancouver, the baseball fever has broken out in small spots around town already. It will need only a little patch of dry ground to bring the boys away from the fire side. While in the south Jimmy said he had several conferences with Manager Brown of the Vancouver team and finally that baseball potentate consented to come to Hazelton for three games before the Vancouver season opens. The local boys to pay the expenses of the team and guarantee $1500 in cash, win or loose.

Rupert is Anxious

Prince Rupert has a bunch of baseball enthusiasts who are itching to get into the game. It begins to look now that they will secure a piece of ground on Acropolis Hill for ball grounds and they may be able to break into the game towards the end of the season. Rupert and Hazelton could have a good season's sport when it is possible to travel up and down by train.

Rifle Association

The annual meeting of the Hazelton Rifle Association was held on Monday night in the Presbyterian rooms. The boys decided to hold a smoker at an early date, possibly at Easter, and also to hold another big shoot about the same time. The following officers were then elected:

Capt. A. R. McLean
Vice-Capt.—H. H. Little
Executive Committee: C. Reid, W. H. Sharpe.
Sec.-Treas.—A. Skelhorne
Membership Committee:—D. R. McLean, A. C. Aldous and G. O. Graham.

Boxing Contest at Prince Rupert

The greatest fistic event ever staged in Northern B.C. will be put on at Prince Rupert on the evening of March 21st, when Joe Bayley of Victoria, champion light-weight of Canada, and Paddy Scott, the hard hitting boy who has been cleaning up the shifty lads around Seattle and Portland, face each other in the padded arena on that date.

The fight will be under the auspices of the Prince Rupert Athletic Association at the Kien Island Club. Queensbury rules will govern, weigh in at 3 p.m. the afternoon of the battle. Purse will be $500 and a side bet.

Joe Bayley is probably the best known all-round glove pusher ever turned out in B.C. He has a ten-toll kick in either mitt and can slip it over at any angle. He is a clean living boy and came out a year ago.

The last game of the season on the Hazelton rink tomorrow at 3 o'clock. The Windy Days and the Fire Alarms will perform for the benefit of the hospital. Let all ye faithful be there with big contributions.

More Telegraph Poles

Olof Hanson returned this week from Prince Rupert and is on his way to Chicken Lake to spend a few days on his ranch there. He has a couple of men at work clearing the land and getting it ready for the spring crop. He and his partner Jahnsen will have some twenty acres under cultivation this year. The propose to put in garden truck. timothy and some oats.

While in Prince Rupert Mr. Hanson signed a contract with the G.T.P. to get out the telegraph poles for the section east of Aldermere and he and Mr. Jahnsen will establish their camp near New Hazelton just as soon as they can get their car of supplies up to the bridge, and that will be in a few days now. They will have several men working for them all summer, and they will also put in a tie camp or two at Chicken Lake. Messrs. Hanson & Jahnsen have supplied all the telegraph poles between Prince Rupert and Aldermere and now they will get out the balance for the coast section.

R. S. SARGENT - GENERAL MERCHANT Hazelton

NEW HAZELTON

Section 2

Since the decision of the Board of Railway Commissioners making the future town at New Hazelton, the sale of lots, both here and in Vancouver, have been away beyond expectations.

Nearly all of the Business Houses in the Old Town of Hazelton have Secured Lots

And as the choice locations are being rapidly picked up by outside people, those who had the foresight to obtain the best locations can consider themselves fortunate as we predict that in a very few months some of these will be worth three times what has been paid for them.

To you who have not yet secured your lot let us say:---This is the opportunity we have all been waiting for---

--- A UNITED TOWN ---

Don't delay in securing your lots as they are being sold so rapidly that in a week from now it will be difficult to obtain a really good location without paying someone else a profit.

You Must Have a Lot if you intend to continue in Business in this district.

DON'T PAY SOMEONE ELSE A PROFIT. BUY NOW FOR YOURSELF AND SAVE MONEY

PERSONAL AND LOCAL

Chief of Police Wynn returned from his trip to the south on Saturday last and he is doing duty again at the old stand. Since the chieg went away the liquor act has been amended so that the life of the blind pigger will be made more miserable in future. As a result there is not likely to be much trouble in future from that class of citizens.

H. W. Kraus has taken over the Eighteen Mile House on the Aldermere Road and he is now ready to do business. This is one of the best stopping houses along the road to the Bulkley Valley and as Mr. Kraus is a first class restuarant and hotel man with many years experience the Eighteen Mile House will be easily the best place on the road. Meals will be served at all hours and the rooming accommodation is first class and there is also excellent stabling accommodation.

The Grand Trunk Pacific have a large force of men now working on their terminals in Prince Rupert and by the time the summer season opens the water front of that city will have been greatly altered. All that property formerly occupied by the G.T.P. Inn, the post office and the city hall will be brought down to grade and used for yards. The Inn is now being moved to the site formerly occupied by P. Burn's and Co's butcher shop.

Larry Maney was taken to the hospital on Monday evening suffering from pneumonia.

Mrs. D. McLeod, of New Hazelton, was a visitor in town on Monday.

Rev. D. R. McLean spent several days at his ranch down the Skeena this week.

On Sunday last a daughter was born to F. W. and Mrs. Graham in the Hazelton Hospital.

The new fire gong was erected this week opposite the Omineca Hotel. It is hoped that the new one will give better service than the old triangles.

Angus Stewart recently put through a deal in North Vancouver real estate. He purchased a tract of land for ten thousand dollars and in two weeks sold out for seventeen thousand. V. W. Smith, of New Hazelton, sold property on the corner of First Ave. and McBride St., Prince Rupert last week for $50,000. The new owners propose erecting a large hotel on the site as it is immediately adjacent to the government wharf and in the heart of what will within a few years be the main business section.

Birthday Social

The Presbyterian Ladies' Aid Society met at the home of Mrs. Anger last Monday night and decided to give a Birthday Social on the evening on April 1st.
