## TRAINS START SATURDAY

The Railway Commission has accepted that stretch of road from VanArsdol to the Skeena crossing bridge, and the railway company have been granted permission to run regular trains over it. The first train will leave Prince Rupert at one o'clock Saturday with both freight and passengers, and there is no doubt but that a big bunch of passengers will arrive. This is what everyone has been waiting for all season. Since the transportation question has been solved to a large extent, our only trouble now is the townsite. After the commissioners give their decision everything will be clear sailing.

## SIX HUNDRED MILES ON FOOT

### How the Prospectors Break Trail and Open up this New Country—Had a Great Trip

Frank Martin and Billy Sargent two of the greatest mushers that ever wore mossasins, returned on Wednesday afternoon after a six hundred mile trip through a part of the Northern Interior. After having spent the winter in Vancouver and other places they returned to Hazelton some time ago and then the wilds called to them, and the prospector's fever attacked them. It was a bad case and they could not resist. The great trouble was where to go. In previous years they had scoured the entire country immediately adjacent and they must find a new field. They got their heads together, and decided to hit for the north and east. They started out with Jimmy Latham who accompanied them to Kisgagas and then returned. The other two went on through to Sick and Dying pass and up to the Ground Hog country, although they crossed back to the Skeena just this side of Ground Hog. They passed through an immense and wonderful country. It was new to them and they were surprised to find the land and mineral possibilities existing to such a degree.

The creeks, streams and rivers were all at the high water mark when the boys went through and it was impossible to cover as much of the country as they would have liked, but they traversed enough so that they are satisfied to go back in a few weeks and do some prospecting.

Crossing over to the Skeena the boys started for home and in order to get here as soon as possible they constructed a raft and started down the river. The Skeena river is never like a mill pond, and especially at high water and navigation on a raft is about as thrilling an occupation as one could wish for. They had many interesting experiences coming through canyons and rapids and their Indian was badly scared several times, but they got down a good many miles before they took the trail again.

The distance covered in the whole trip was a good six hundred miles and they took just about a month to do it in. It was not the best time of the year for a pleasure trip as they travelled exclusively on snow shoes for twelve days. The weather was cold and the nights were colder. At first they had blankets to sleep in but those became too heavy and were thrown away and the balance of the trip the boys slept under the canopy of heaven with dew drops and snow flakes as a covering. Those were only some of the little pleasantries connected with the trip. There were many others that have not been related yet, and may not be for a some time. It is enough that the boys are going back in a few weeks as soon as the snow is all gone and the creeks are down.

### On The Roads

Work has been commened on the Rocher de Boule wagon road. At first there are only three men employed, but as soon as the stock of provisions can be increased the road gang will also be increased.

Thos. Brewer is in charge of a small gang which is putting the Nine mile wagon road in some kind of passable shape. The heavy traffic over the road from saw mill down to Two Mile left that piece of the road in a terrible condition and it requires a lot of repairing. From the saw mill on there is only a trail, but this will be widened out to a wagon road twelve feet wide, and it is expected that the money will not run out until they get very close to the Harris property. This road will not be suitable for hauling ore until crushed rock is put on. It will be possible to get some ore down in dry weather and that will answer for this season.

Another gang of road men have established a camp at the Bulkley bridge and they will repair the road to New Hazelton. The hill going down to the bridge on this side is still in an awful condition and the work when completed will be appreciated.

Ed. Mullen started his gang out to work on the new trail to the Ground Hog this week.

### New Railway Pass

As a result of their trip to the Ground Hog country during the past month Messrs. Martin and Sargent have discovered a new route that is ideal for a railway or wagon road. The route they travelled was by way of Kisgagas to Sick and Dying pass and through to Glangeese near Blackwater. Mr. Martin says that if the trail was cut out that they would be able to cut the time of travel down several days. The route is through a level country with only one peak to cross. For a railway a short tunnel would overcome that difficulty. In their opinion this route is the ideal one for the Grand Trunk Pacific to take from their main line. There is a big country that way and Mr. Martin says that he was surprised to see that vegetation was so far advanced as it is. It is practically as early as the country around here. It is possible to take horses that way a month earlier than by the old way and he says that it will not be long before most of the travel to Ground Hog will be by way of Kisgagas, the Sick and Dying pass and Glangeese.

## HIGH GRADE ORE FROM BABINES

### C. S. Anderson Brought In Fifty Pounds of Samples From the Silver Fox—An Ideal Country For Mining

The Babines have long been recognized a profitable ground for prospectors to work in, but the lack of transportation has kept the men out, or at least most of them and as a result very little is known of the country or of the rock and minerals. C. S. Anderson is one of the few prospectors who went in and stuck with it. About three years ago he staked the Silver Fox group and has been working on it ever since. In the past he has brought in small samples, and although they were very high grade and the assays were very good, a great deal of attention was not paid to the property or the district by local mining men. Now that transportation is a physical possibility, and the prospects are bright for roads from the railway much more attention is being paid to the country.

Mr. Anderson arrived in town last week on his semi-annual trip for supplies and he brought in fifty pounds of samples and left them at the Omineca Herald office where they can be seen at all times. Already a great many have examined the ore and they all pronounce it fine stuff.

The Silver Fox ore is different to that found around this district. It is fine, and carries much more gold than has ever been found locally. Some assays made last year gave 362 oz. in silver and $6.60 in gold. There is also a small per centage of lead and copper.

Silver Fox claim is on Fifteen Mile Creek which empties itself into Babine Lake some ten miles from the portage. They are about fifteen miles in from Burns and Decker Lake along which the railway runs. The country lying between is for the most part good agricultural land and it has mostly been staked. From Burns Lake to the Silver Fox there is practically no grade and the country is ideal for a wagon or railroad, and the same road will also open up a large tract of farm lands and then continue on a few miles and serve Jas. Cronin's property, as well as open up a great country for prospectors. As it is there are several claims staked in the vicinity and the owners are waiting for transportation before they do any work.

Mr. Anderson has done considerable development work and he states that he can now ship ore any time that the road is built.

There are six leads on the Silver Fox and they are all high grade, carrying gold, silver, lead and copper. The veins vary in width, on the surface, from six inches to 20 feet with the main lead about five feet in width. A canyon on the creek cuts this lead for a depth of about 100 feet and the best ore is at water level. On the surface the lead shows up for 500 feet and then crops out again on the next claim. The pay streak varies on the different leads from one inch to two feet. The best lead is a cross lead. It is nearly all ore and about two feet wide.

Working on the five foot lead from the canyon Mr. Anderson has started a tunnel which is in about twelve feet and the lead is nearly all ore (gold and silver bearing sulphides, which also carry a small percentage of copper and lead.)

Fifteen Mile creek is a great body of water and will furnish a big amount of electric power for mine work and for electric railway or for town purposes. At the back of the creek are twenty miles of lakes and creeks, and there is a good flow of water the year round. The waters in the district are also alive with the finest kind of fish. The country is an ideal one for mining and there is no doubt but that large quantities of ore will be shipped out of there in the not distant future.

Already several mining men have been looking at the samples brought in and some of them are going out to see the property with a view to purchasing.

### Home from Ground Hog

F. B. Chettleburg arrived in town on Wednesday afternoon after spending several months in the Ground Hog country prospecting the eighty claims owned by Canadian Mining Operators and associates. In speaking of the country he says that in his opinion Campbell-Johnston's report was a very conservative one. He says the country is an immense one, and that the coal deposit is marvelous. The only drawback is the lack of transportation, roads and trails. The country is so large and so important to the whole Dominion that the transportation companies and the provincial goverment would be justified in devoting much more attention to it than has been done. It is impossible to get any heavy stuff in now, and the cost of getting in even food, and the lighter supplies is excessive. Until there is a good road there will not be a great deal of real development work undertaken, and even then the development will be on a small scale until there is signs of a railway reaching the coal district.

As for the property he was directly interested in Mr. Chettleburg said that he found coal on all the groups. Messrs. Jackson and Godfrey are expected to arrive here next week with a couple of experts who will examine the properties those gentlemen are interested in for the purpose of reporting to the companies. When they go in they will take a pack train of about 30 horses and about four tons of supplies. Mr. Chettleburg was accompanied home by Roy Mosely

## BIG CAPITAL IS REPRESENTED

### Visit of Dr. J. Morgan Clement is in the Interests of New York and Chicago People—Is here with C. B. Clarke

C. B. Clarke, of Montana, arrived on the Inlander on Tuesday morning with Dr. J. Morgan Clement, of New York, one of the great mining engineers of the day, and one who has a world wide reputation. They left on the stage that morning for Mr. Clarke's property on Telkwa mountain. Dr. Clement is representing people in New York and Chicago who have unlimited capital behind them. He will examine this property and also take a look around the district for the purpose of reporting to his people upon his return.

Mr. Clarke will spend some time on the property, at least two weeks, and probably all summer. In speaking of the property he said that he could not say very much until he had been there. He had received word from Tom Carr, who has been working on it all winter, stating that he had cross cut the vein and found it to be twenty-five feet wide. He has every confidence in the property turning out well, and he is also very enthusiastic over the whole district. He heard glowing reports of the development work done by the different companies working in this district during the winter, and since he started up the river he had talked with several mining men who have visited some of the properties this spring and who are in a position to know. They all give very flattering accounts of the properties. Mr. Clarke looks for a great boom in here if the day ever comes when they can get transportation and get to a place within a couple of weeks of the time set.

Mrs. Jas. McKay and daughter will leave the first of the week for Calgary where they will visit Mrs. McKay's aunt for several aunt for several months.

Bert Glassey, for several years with R. Cunningham & Son, has severed his connection with that firm. He expects to leave shortly for the Ground Hog.

## AWAITING COMMISSIONERS DECISION

To the time of going to press there had been very little news received from Ottawa in connection with the hearing of the townsite dispute. The case was started on Tuesday and continued Wednesday and Thursday. There is a swarm of lawyers present and if they are allowed all the time they want it is doubtful if the case will be finished before Thanksgiving Day. The Railway Commission is a very busy body and the legal lights have most likely been requested to be brief. It was also reported that two of the commissioners have been in the Maritime Provinces and that the evidence will be submitted to them upon their return. Until then there will be no decision. That may be a week and it may be longer.

### Argument on Thursday

The last message received from Ottawa, up to the time of going to press is as follows:

Ottawa, June 5th.

"The evidence is all in. Argument tomorrow, Thursday, June 6th."

Signed, V. W. Smith.

# WILL SPECIALIZE WITH ONIONS

### J. V. Preston Will Put Several Acres in the Strong Smellers—Big Profit to be Made

People are constantly writing and asking for news as to the possibilities of this country. Such a thing is impossible to give in a letter or in one publication. The possibilities are so numerous and so varied that it requires many people with all the different ideas and abilities common to humanity to develop the possibilities. One general rule will, however, apply, viz., anyone who will work, use some brains, and a little money, will make good. There are openings in mines agrilcuture, horticulture, poultry, dairying, ordinary commercial business, or any other line common to every locality and a lot of things peculiar to the Hazelton district alone. It onlyrequires men with muscle and energy.

Mr. J. V. Preston has a piece of land down the river from which he will make a fortune. He will specialize on onions. He has several acres formerly an old beaver dam. This he has drained, and is still draining, and he has found it to be ideal land for onions. He has already met with success in his experiments and he is now going at it in earnest. This season he will have several acres in onions and there is no reason why he should not make from $500 up per acre clear. In every district there are golden opportunities for the specialist. Mr. Preston will make good, and then it will be a big advertisement for the country.

# FORESTS AND WATER

### Benefits of Manitoba Forests Reserves to Surrounding Country

The water supply of a district is always considerably influenced by the forests at or near the head-waters of its streams. This is one of the reasons why large districts have been set aside by the Government of the Dominion of Canada and many other governments, to be kept permanenty as forests.

The soil within the forest, largely composed as it is of decaying and decayed leaves, twigs and other vegetable matter, acts much like a sponge in soaking up the moisture that falls. On the other hand, the absence of high winds within the forest does much to prevent or lessen evaporation.

The Riding Mountain and Turtle mountain forest reserves in Manitoba are good examples of this fact. In the Riding Mountain reserve are the head-waters of the Minnedosa (Little Saskatchewan or Rapid river,) one of the important tributaries of the Assiniboine from which, by the way, the town of Minnedosa is now deriving power. On the the other side of the reserve issue many rivers, among which are the Vermilion, Valley and Ochre rivers and Edwards Creek. The last named is a source of water supply for the town of Dauphin.

In the Turtle Mountain forest reserve are to be found the sources of the Pemina and White-mud rivers, as well as many other smaller streams some of them lose themselves in the prairie.

Cutting away the forest from the head-waters of the streams would mean that in spring the melted snow would rush down these water courses in a torrent and be wasted, not to speak of doing considerable damage in its course, while in summer the stream beds would be almost dried up.

Thus not only would the streams be deprived of any possible value in producing power, but their value to the soils of the farming districts in keeping up a steady supply of moisture would be much lessened, if not altogether destroyed.

# THIRTY ACRES ALREADY SEEDED

### New Settlers in the Kispiox Got Down to Business Early—Bringing in Stumping Machinery—Clear a Large Tract

Two or three weeks ago mention was made in these colums of the undertaking started by Messrs. Burgunder and Jackson, two new arrivals, who came here to start an experimental farm and to populate the Kispiox valley. At first there was not much stock taken in their plans, but those two men started in to do just what they said they would. Mr. Burgunder was in town last Friday and he reported that they had leased thirty acres so far and would have it all in crop this season. They have most of their seeding done already. Much of this land has been freshly broken by them and in one patch of new ground they have over eighteen hundred pounds of potatoes planted. They are going at it in a systematic way and they will take big crops off this fall. They have also provided a market for their produce already, and as fast as it is ready to harvest it will be shipped to Prince Rupert.

Besides the land under cultivation now they have a five year lease on 160 acres which they will start in to clear at an early date, They each have a pre-emption of 160 acres which they will also clear. They now have a stumping machine on the way here so that as soon as it arrives they will start it to work and the clearing will be kept up all winter. It is the intention to more than double the acreage under cultivation for next year.

Messrs. Burgunder and Jackson will specialize on fruits. They will plant apple trees first and these trees are to be imported direct from Russia. Pears and plums will also be planted. In the meantime, while the trees are growing small fruits will be planted on the ground, and in this way a revenue will be produced from the first. Mr. Burgunder is confident that the three fruits mentioned will grow to perfection in the Kispiox valley.

**Hazelton Hospital** The Hazelton Hospital issues tickets for any period from one month upward at $1 per month in advance. This rate includes office consultations and medicines, as well as all costs while in the hospital. Tickets obtainable in Hazelton from E. C. Stephenson and Fred Field; in Aldermere, from Rev. F. L. Stephenson, or at the Hospital from the Medical Superintendent.

## LAND NOTICES.

Omineca Land District—District of Coast, Range V.

Take notice that Herbert A. Deny, of Seattle, Wash., engineer, intends to apply for permission to purchase the following described lands:

Commencing at a post planted 1 1-2 miles south and 8 miles west from the s-w corner of L 356, thence north eighty chains, west eighty chains, south eighty chains, east eighty chains, to point of commencement, containing 640 acres, more or less. Herbert A. Deny
March 21, 1912 J. W. Hart, agent

Omineca Land District—District of Coast, Range V.

Take notice that Fred Suskey, of Seattle, Wash., bookkeeper, intends to apply for permission to purchase the following described lands:

Commencing at a post planted 1 1-2 mile south and 3 miles west from s-w corner of L 356, thence north 80 chains, west 40 chains, south 40 chains, west 40 chains, south 40 chains, east 80 chains to point of commencement, containing 480 acres, more or less Fred Suskey
March 8, 1912 Frank Treanor, agent

Omineca Land District—District of Coast, Range V.

Take notice that I, Edgar J. Webber, of Telkwa, rancher, intend to apply for permission to purchase the following described lands:

Commencing at a post planted at the s.-e. corner of (ungazetted) Lot 2, Tp. 2a, Range 5, Coast District, and being about one mile distant in an eastly direction from the n-e corner of Lot 1197, Tp. 4, Range 5, Coast District, thence east 80 chains, north 40 chains, west 80 chains, south 40 chains to point of commencement, containing 320 acres more or less. Edgar J. Webber.
March 18, 1912

Omineca Land District—District of Cassiar.

Take notice that Charles Clay, of Hazelton, prospector, intends to apply for permission to lease the following described lands:

Commencing at a post planted about two miles east of the Naas river and on small creek which flows to the Naas river and about 20 miles north from Cranberry creek, Cassiar District, thence east 40 chains, north 40 chains, west 40 chains, south 40 chains, to point of commencement, containing 160 acres more or less. Charles Clay
Dec. 22, 1911 f-2

Omineca Land District—District of Coast, Range V.

Take notice that William S. Smith, of Vancouver, teamster, intends to apply for permission to purchase the following described lands:

Commencing at a post planted 1 1-2 miles south and 6 miles west from s-w corner of L. 356, thence south 80 chains, west 80 chains, north 80 chains, east 80 chains to point of commencement, containing 640 acres, more or less.
March 10, 1912 William S. Smith
apl5 Frank Treanor, agent

Omineca Land District—District of Coast, Range V.

Take notice that Oliver Purdy, of Seattle, farmer, intends to apply for permission to purchase the following described lands:

Commencing at a post planted 1 1-2 miles south and 1 mile west from s-w corner of lot 356, thence north 80 chains, west 80 chains, south 80 chains, east 80 chains to point of commencement, containing 640 acres, more or less.
March 7, 1912 Oliver Purdy
apl5 Frank Treanor, agent

Omineca Land District—District of Coast, Range V.

Take notice that Carl G. Yllander, of Vancouver, hotel clerk, intends to apply for permission to purchase the following described lands:

Commencing at a post planted 1 1-2 miles south and 5 miles west from s-w corner of L. 356, thence south 80 chains, west 80 chains, north 80 chains, east 80 chains, to point of commencement, containing 640 acres, more or less.
March 9, 1912 Carl G. Yllander
apl5 Frank Treanor, agent

Omineca Land District—District of Coast, Range V.

Take notice that James Ainslie Wylie, of Vanconver, bartender, intends to apply for permission to purchase the following described lands:

Commencing at a post planted 1 1-2 miles south and 6 miles west from s-w corner of L.356, thence north 80 chains, west 80 chains, south 80 chains, east 80 chains to point of commencement, containing 640 acres, more or less.
March 10, 1910 James Ainslie Wylie
apl5 Frank Treanor, agent

Omineca Land District—District of Coast, Range V.

Take notice that James C. Nation, of Vancouver, clerk, intends to apply for permission to purchase the following described lands:

Commencing at a post planted 1 1-2 miles south and 1 mile west from s-w corner of L. 356, thence south 80 chains, west 80 chains, north 80 chains, east 80 chains to point of commencement, containing 640 acres, more of less.
March 7, 1912 James C. Nation
apl5 Frank Treanor, agent

Steady work on the Harris mines is proving the property to be better every day. The class of ore being taken out is excellent The vein is widening out all the time, and it is rapidly taking on the appearance of a shipping mine. They will be able to ship as soon as there is any way to get the ore out of the country.

**DEPARTMENT OF WORKS.**

SKEENA DISTRICT

FERRY, DECKER AND BURNS LAKES.

In accordance with chapter 85, R.S. B.C., 1911, "Ferries Act," the Government of British Columbia invite applications for a charter for a ferry to ply on Decker and Burns Lakes.

Application will be received by the Hon. the Minister of Public Works up to 12 o'clock noon on Thursday, 20th day of June, 1912.

The charter will cover a period expiring on the 31st March 1914.

The ferry shall be operated whenever required between 7 a.m. and 7 p.m. every day excepting Sundays.

Applicants shall give a description of the scow or boat it is proposed to use, which must conform in all respects to the requirements of the "Canada Shipping Act, 1906," and amending Act.

Applicants shall state the tolls it is proposed to ask for—

Each adult passenger.
,, child (not in arms) under 13 years.
,, head of cattle, horse, mule, or donkey.
,, calf, sheep, goat, or swine.
,, vehicle with one horse and driver
,, cart or wagon with one horse and driver, loaded.
,, vehicle with two horses and driver.
,, vehicle with two horses and driver, loaded.
,, parcel of 25 lb. and under.
Freight, per 100 lb. and under, non-perisable goods.

The Government of British Columbia is not necessarily bound to accept any application submitted.

J. E. GRIFFITH,
Public Works Engineer.
Department of Public Works,
Victoria, B. C., 29th May, 1912.

## MINING DOPE

Some of the boys went out to Silver Standard last week and brought in some samples from the shaft at the 125 ft. level. The vein at that dept is three and a half wide and the ore is the best yet. One of the experts in the country now in the interests of capital stated that Silver Standard was a cracker-jack property.

Mr. Brudvik and party, representing the Royal Standard Investment Co., of Vancouver, left for the Omineca district on this week. They had intended leaving on Friday but were disappointed by the Indians who were to furnish the pack horses. Another outfit had to be secured. The first men to go in will prepare the way for the big outfit which will go in as soon as transportation is such that the men, horses, plant and supplies can be brought up from Prince Rupert where most of them now are. It will require three trips of the pack train to get the outfit all on the ground.

The drift on the upper vein on Rocher de Boule is now in over 120 feet and they are making progress at the rate of four feet a day. The class of the ore remains the same. At about the 100 foot point they are making a raise to the surface for ventilation, and in the Pemberton tunnel, which is about 300 feet from the shaft, and where the vein is six feet wide a gang has been started sinking a winz. In this way the immense ore body is being opened up very rapidly and when the interests in control from Salt Lake City and New York arrive they will find that they have got a bonanza. It is understood that these men will arrive before long as they are particularly anxious to see the property. The mine management are putting forth every effort to get as much of the property opened as possible before the capitalists arrive.

**Lumber! Lumber!**

**William H. Holland**

Agent for the

**GLEN VOWELL SAWMILL**

All kinds of Lumber for sale at right prices.
Lumber stored both at Halelton

Three pool tables, practically new, and two tub bath outfit. Apply Box 6, Herald office. tf

# POULTRY DEPARTMENT

### Getting Little Chicks on the Ground

The little chick should not be kept too long on a hard board floor. After a time it will develop leg weakness which will seriously interfere with its growth. As soon as possible get the little fellows down in the dirt where they can work and scratch in the soft moist soil. The small brooder coops with a floor in one end and dirt in the other are excellent for this purpose. They can run from one side to the other and have the benefit of both litter and dirt in which to work. If small grains are scattered in the soil they will work for hours searching for them. This will give them the exercise they need and at the same time give them a chance to get the good wholesome grains and but a little at a time.

### Sprouted Oats

Some people seem afraid of overfeeding sprouted oats, but there is little danger of tnis, if they are fed at the proper stage. It is not best to leave them in a solid mass so that the roots mat together and get tough, for then there is danger that the crop will be clogged. After soaking in warm water for ten or twelve hours, they should be emptied into a box with drainage, and thoroughly stirred every day, with a small amount of water supplied. In three or four days sprouts will begin to appear from both ends of the kernels, and then it is time to begin feeding, giving the fowls all they will eat once or twice a day.

Another way to feed moistened oats is to soak them over night as for sprouting and then let them simmer gently during the day. They will then be in good condition for easy digestion, and the fowls will relish them. By either of these processes all the good qualities are retained, and the hulls are softened so that there is no danger from their use. Oats are an excellent food for hens, and when prepared properly, are always wholesome, and hens may eat their fill with no bad results.

### Successful Chicken Raising

Of a hundred chickens hatched, how many do you expect to raise? Your answer to that question will largely determine your failure or success with poultry. If you are expected to raise but half of them, and are satisfied with that, defeat is not far ahead, for no one can make a success of chicken raising who does not do better than that. Now and untoward circumstances may sweep off a half of some particular flock, but on the whole one must do better than that. Seventy-five per cent. is as few as can be profitably raised, and at least ninety per cent. is necessary, if the business is to be a pronounced success.

But to secure such results, one must have good stock, well nourished and vigorous, the eggs must be well cared for during incubation, the chicks must be kept under the best sanitary conditions, they must have intelligent care, and be properly fed. They must never be neglected, and the care-taker must be on hand, "in season and out of season." But the results will more than repay all the outlay of time and labor. Aim high, and never be satisfied with meager success.

### Keep pour Chicks Growing

Keep your chicks growing! That note of warning has been sounded many times, and it cannot be impressed too strongly upon the amatuer. For the first few weeks they are so cute and interesting that they are not apt to lack attention. But after they get large enough to look out somewhat for themselves, they are sometimes neglected, either in not being provided with proper food in sufficient quantity, or being left out during a shower or rain storm, or in not being properly cared for some cold night, with the result that they suffer from hunger, or become chilled; and then comes a derangement of the organs of digestion, followed by a general weakness and loss of appetite, and the little fellows seem to dwindle away, many of them dying while those that pull through are never the same as before, and they always suffer from the set back.

A chick that is to be raised for breeding purposes can only reach its best development by a quick and steady growth from birth to maturity, and no pains must be spared to see that every chance for development is furnished.

Hazelton - British Columbia

DO YOU KNOW?

**Do You Know** That the greatest wave of progress and prosperity on earth today is in British Columbia. The point that seems to be the centre and the one to have the most sensational values established in a short time is New Hazelton.

**Do You Know** That British Columbia money, Canadian money, United States money and money from all directions is pouring into New Hazelton District for investment and development and everyone feels confident that sensational profits will be sure.

**Do You Know** That the Grand Trunk Pacific rails are now laid to Skeena Crossing and will have steel laid into New Hazelton early in July.

**Do You Know** That New Hazelton is a good substantial town now. That the merchants (about 60 in number) are located around the corner of Thirteenth Avenue and Pugsley Street.

**Do You Know** That 12 mining companies are working within 9 miles of New Hazelton, and will be shipping ore from New Hazelton in July or August.

**Do You Know** That the business done in the Hazelton district this summer will be transacted mostly at New Hazelton.

**Do You Know** That the B.C. Government are spending $2000.00 on street improvement in the vicinity of Pugsley Street and Thirteenth Avenue.

DO YOU KNOW?

**Do You Know** That the owners of New Hazelton are spending a vast amount of money on improvements in New Hazelton.

**Do You Know** That thousands of people are coming to New Hazelton this summer.

**Do You Know** New Hazelton will have 3000 to 5000 people in 1912 having about 2000 people altogether in the Hazelton District now.

**Do You Know** That lots in the merchantile section New Hazelton will soon be selling for thousands of dollars for each lot. They are now selling for a few hundred.

**Do You Know** That thousands of men will soon be working in the mines in New Hazelton district, producing millions in value for the fortunate owners.

**Do You Know** That thousands of farmers will develop the vast area of agricultural land in the Skeena, Kispiox and Bulkley Valleys and that they all will be rich in a few years.

**Do You Know** That New Hazelton will have thousands of visitors this year. Some will locate, and others will invest, all will boost—can't help it.

**Do You Know** That New Hazelton minerals, coal, timber, together with rail and water transportation guarantees big smelters, big industries of all kinds, all of which will make a City of world wide importance.

**Do You Know** That you should not wait until the many big things are announced and the prices of lots go soaring.

**Do You Know** Get in now at the starting prices and on easy terms.

**Do You Know** That you should get in now.

## NEW HAZELTON DOINGS

Dr. Ewing was a visitor in town on Tuesday and returned to the south again on Wednesday.

Dr. Wallace, of Telkwa, was a visitor in town this week and he reports everything booming in the valley.

The prospectors are getting busy. Nearly every day one or more parties are leaving with supplies for several weeks stay.

Duncan Ross passed through town on Tuesday on his way to Prince Rupert to meet Mrs. Ross and family and bring them up for the summer.

Mr. and Mrs. G. C. Hartley and child have arrived in town where they will make their future home. Mr. Hartley is proprietor of the New Hazelton hotel and Mrs. Hartley has been in Spokane for some time.

The general tone around town this week was that business was very much better than usual and the business men are feeling fine as a result. From now on, or at least as soon as the transportation question is solved the town will be a very prosperous place.

The Steamer Omineca went on McIntosh's bar the forepart of the week and has been stuck there ever since. The water has been falling so rapidly that by Tuesday she was high and dry. About the only chance to get her off is to dig a channel or to wait for the water to rise again.

One half of Ross' tunnel was completed this week and the stationmen have received their final settlement of some thirty-five thousand dollars. Their part of the contract was a little over 1600 feet. The other end of the tunnel will be finished about the first of July. Practically all the timber for the work is now on the ground and the final loads will be hauled in this week.

### New Arrivals

The Inlander arrived in port about half-past five on Tuesday morning from Van Arsdol and brought in the following list of passengers many of whom had been waiting in Prince Rupert and at various points along the road for some time: A. E. Player, Steve Slinger, J. W. Calvery, Mr. Scott, McB. Smith, G. C. Brownlee, G. W. Spring, H. W. DuBois, R. McCullough, Dr. Ewing, W. Harper, Douglas Potts, Jas. Brown, Mrs. (Dr.) Ardagh, Miss B. Hyde, Mrs. and Miss Blaney, Mrs. Ed. Lambert and two children, Wm. and Mrs. Lynch and child, Mrs. A. B. Miller, Mrs. Dale, Mrs. Gladwyn, Mrs. G. Hartley and child, C. B. Clarke, Dr. J. Morganx Clement, J. R. Martin, Mr. Featherstonehaugh, C. Olsen, J. Caffield, Fred Renwick, J. W. Cornett, Mrs. Kerr.

## PERSONAL AND LOCAL

Several picnic parties went up the river on Monday to celebrate the King's Birthday.

Mrs. A. B. Miller arrived on the Inlander on Tuesday morning and will be a guest of her son, R. O. Miller for the summer.

Two immense safes arrived on the Inlander for the Union Bank. One is for New Hazelton and one for Telkwa. They were unloaded at Sealey.

All this week Road Supt. Williscroft has been sending out men and supplies to the different sections where work will be done on the roads and trails.

The first of the wild roses are in bloom. Last Sunday several people found them in the woods and within a couple of weeks the whole country will be a mass of beautiful roses.

Wm. Kennedy reports having gathered several ripe strawberries on the upper bench last Sunday while out walking. The possibilities of the country are without limit.

The Harris boys have received word that their father and mother are preparing to come to Hazelton to spend the summer with them. They are expected to arrive here any time after the trains start running.

Wm. Lynch, who has been connected with R. S. Sargent's store since last fall, returned to town on Tuesday accompanied by Mrs. Lynch and child. They will take up their residence here, and Mr. Lynch will resume his duties at Mr. Sargent's.

Hazelton and immediate vicinity was treated to rain, hail and snow on Monday. Fortunately the snow did not last only while it fell. There was a heavy frost that night, but the damage done will not amount to much if anything.

Mr. J. Newick has become connected with the Hudson'sBay staff here. He will have charge of the dry goods and men's furnishing department. Mr. Newick arrived a couple of weeks ago with his wife and family from Tynemouth, Eng. Mrs. Newick is staying with her sister, Mrs. (Rev.) Lee, Kispiox.

Walter Harper, of Prince Rupert, was in town on Tuesday on his way to Aldermere where he will take a position with Broughton & McNeil for the summer at least' He will also work a side line of samples. Walter is a first class man in the store and on the road and there is no doubt but that he will make good. He will have the best wishes of a host of friends.

### Ralph Connor Coming

Word has been received that Ralph Connor, (Rev. Dr. Gordon) is on his way to visit the Hazelton district. He will it is expected, arrive here today. He will go to Telkwa and then on through to Fort George.

## SYNOPSIS OF COAL MINING REGULATIONS.

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

N. B. — Unauthorized publication of this advertisement will not be paid for.

## PERSONAL AND LOCAL

The King's Birthday was duly observed in town on Monday last. Many spent the day in the woods or along the river.

Messrs. Hunt and Alex. McDonald left this week for the Babines where they will prospect for at least a month.

Indian Constable Sam Calkins, who assumed his new duties on Saturday last, left this week for a short trip down the river as far as Prince Rupert.

E. G. Prior & Co. have a few of the latest Massey Harris Mowers and Horse Rakes also Bain Wagons, and a lot of other agricultural Implements at the Hudson's Bay Co.'s store Call and get reduced rates.

W. H. Holland spent several days last week at the Glen Vowell saw mills on business. Mr. Holland is now agent for that mill as will be seen by his advertisement on another page. Lumber will be delivered in town, at the new town, or can be had at the mills.

The first half of the bridge at Skeena Crossing is nearly completed. Of the eight sections to be put in five are already in place and securely rivited and ready for use. The contractors state that they will have the entire structure completed bythe first of August. This means that everything will be done that the contract calls for.

### Vestry Meeting

The Vestry ot St. Peter's Anglican Church was held in the church school house on Tuesday evening last with Rev. J. Field in the chair. After the minutes of the last meeting were read and adopted the chairman read the names of those who were entitled to vote on the various questions to come up.

Miss Soul, who represented the church at the Diocesan Synod at Prince Rupert last summer read her report which was most interesting and instructive. This was followed by Rector's Warden R. S. Sargent reading the financial statement for the past year ending Dec. 31. The rector made some remarks upon the satisfactory statement and he also explained the Mission Fund of the Diocese which is for the upkeep of the new missions started throughout the district.

Mr. Sargent resigned his position as rector's warden and general regret was expressed by those present.

The election of the people's warden and sidesmen was as follows: People's Warden, E. H. Hicks-Beach; Sidesmen, A. C. Aldous, E. Price, G. O. Graham, and Chas. Hicks-Beach. Miss Soul was unanimously elected representative to the Diocesan Synod.

### For Sale

About one dozen Angora goats imported from Oregon a short time ago, they are fine for clearing brushy land, will sell reasonable, will deliver to Hazelton.

Frank Joyce, Lorne Creek.

### To Work Pack Train

The Interior Forwarding and Express Co., of which Ed. Charleson is manager, sent the mail out to Aldermere and Telkwa on Tuesday for the last time on his contract. He has been packing the mail over that route for the last two years but in future he will turn all his animals into a pack train. He is going out of the freighting and stage business. When he gets all his animals in which he will have this week, he will have a pack train of some 59 mules as well as a number of saddle horses and these he will work all summer. The new mail contract was awarded to Wm. Kerr, and it is reported that he has turned it over to Sargent and Taylor who will take the mail out Friday morning on the first trip.

### For Sale

One highly bred Buff Orpington cock. Good for breeding or show purposes. Apply Box 2, Herald office. tf
