First Sod for the Haguelgate High Level Bridge Turned This Morning

OPENING OF PARLIAMENT BOTH LEADERS ARE WELL

New Senators Appointed==Burnham Asks For New Marriage Law== Speech from the Throne Now Ready==Yukon Makes Many Demands on the Government

Ottawa, Nov. 21 — The final draft of the speech from the throne, to be delivered at the opening of parliament, will be ready today. Six new senators were appointed from the western provinces and six from Nova Scotia. The first question on the order paper is one from Burnham of West Peterborough asking for a marriage law for the whole of Canada, the same as prevails in the Yukon federal district.

The Yukon, throught their member, Mr. Thompson, is making great demands upon the government. They ask for a Minister of mines, grant of reindeer herds, wireless communication, and a Grand Trunk road from Whitehorse to Dawson city.

Hon. Geo. E. Foster is on his way home from England to take part in the debate on the government's naval policy.

The session is expected to be a most important one and a long one. Both the premier, Hon. R. L. Borden, and the leader of the opposition, Sir Wilfrid Laurier, are in excellent physical condition for the severe strain. Sir Wilfrid celebrated his seventy-first birthday this week and he received congratulations from all parts of the Dominion.

Constable McInnes of the Provincial force is leaving town in a short time for Telkwa, to which place he has been transferred. McInnes has been a good officer here and he will be missed by many friends.

GUILTY OF MURDER

Celebrated Rosenthal Case Now Being Brought to a Climax

New York, Nov. 20—Gyp the Blood, Lefty Louie, Whitey Lewis and Dago Frank, the men who were charged with the murder of Rosenthal, were found guilty of murder in the first degree and will be sentenced to death later.

Lots of Freignt

The local merchants are receiving lots of freight now. They have to haul every pound of it from Sealey and that adds very materially to the cost. The railway company has no excuse whatever now for delaying the service any longer as the road is completed and the head office has been notified. There is more freight coming to this town than to any point on the whole system east of Prince Rupert.

Construction Machinery

Three more steam shovels, six dinkey engines and one hundred cars are being made ready now to ship to Burns Lake and for the big contracts this side of the lake. The shovels are for Paget and for Rankin. The contractors are now anxious for the snow to come so that they may transport this machinery.

Camps Filling Fast

On Wednesday night one hundred and ten men arrived on the train for Foley, Welch & Stewart. They were looked after in town, and on Thursday morning were started off up the line for the various contractors. There are now over 2500 men on the line and more coming in fast. The contractors will all have lots of men this winter.

Chas. Hastings, Glentanna, was in town on business this week.

LET THE "DIPS" DO IT

Armistice in Balkan Trouble Pending Result of Arbitration

London, Nov. 20—The Balkan war has shifted from the field to the diplomatic chambers, where representatives from the Balkans and from Turkey have opened a discussion as to terms of peace. The armistice declared a day or so ago continues, pending the result of the discussion.

A Catholic Church

Rev. Father Godfrey, who is in charge of the Haguelgate reserve in the interests of the Roman Catholic Church, has been in town several times lately figuring on the advisability of establishing a church in New Hazelton. The Catholic population is increasing in town and there is every likelihood that in the near future a church will be erected.

Another Store Coming

W. J. Larkworthy was in town on Wednesday looking for a location to which he can move his Sealey stock. Mr. Larkworthy will have only temporary quarters for this winter and in the spring he will put up a permanent place. He will carry hardware, men's clothing, boots and shoes, etc. He will be welcomed to the new town.

Sent Wrong Steel

The steel for the next bridge to be erected on the railway east of New Hazelton which was reported to be for Mud Creek turns out to be for Porphery Creek, a bridge further on. The Mud Creek bridge has still to come.

Cy. Annett was struck on the head on Tuesday while working around the derrick at the siding. The pin holding the block became loose, and the block made rather a nasty cut.

WILL RUSH WORK OF CONSTRUCTION

The first sod for the high level bridge over the Bulkley, connecting New Hazelton with the Kispiox valley and the mines, was turned this morning by V. W. Smith. Those in the party were: Engineer Hunter, Rev. Father Godfrey and the editor of the Omineca Herald. At the same time a team was hauling over the tools for work on the foundation. The actual work was commenced immediately after Mr. Smith gave up the shovel. McMillan, an old prospector in these parts, has been made foreman, and from now on work will be rushed.

Fireman Killed

Prince Rupert, Nov. 21—Flash.—The big auto fire truck, while being driven at a high speed, jumped the plank roadway to-day, resulting in the death of Alfred Thompson, while Chief McDonald and another fireman were severely injured. The fire truck was badly wrecked in the fall.

NEW HAZELTON GETS TIN SHOP

Mr. Rodda, of Stewart, Will Open Up Here About First of January —Preparing Now

Mr. Rodda, of Stewart, was in town all week looking over the place as to a location. He was very much impressed with the size of the town and the amount of business done here. He saw there was a good opening here for a tinsmith, which is his business, and has decided to close up his shop in Stewart and move the whole stock and plant to New Hazelton. On Thursday he left for Granby Bay to complete a contract and will then go to Stewart. Mr. Rodda will be here and ready to do business about the first of the year. He is a first-class mechanic, and thoroughly understands making air pipe and all kinds of tin and sheet iron work.

Shot in the Leg

Last Saturday while examining a gun a Slav stopping in one of tne foreign rooming houses in town accidently shot himself in the leg. At first the wound was not considered serious but on Monday the man was removed to the hospital where he is receiving attention. He will recover rapidly unless blood poisoning sets in.

Small Cave In

This week a small cave-in occurred in Ross' tunnel. Some of the timbers slid in from the bottom. The damage is not serious and will soon be repaired.

NEW HAZELTON CITIZENS' ASSOCIATION ORGANIZED

Will Undertake Work of Local Improvement Until a Municipal Council is Elected----Good Active Officers Chosen and Have Started Work

On Monday night last the New Hazelton Citizens' Association was organized and started off in a most promising manner. The object of the association is to get started all the local improvements which are really necessary before the town is large enough to apply for incorporation. This association will act as a council. There are many improvements which must be undertaken before the town gets much bigger and there are some things which the people here now require. These will all be handled by the association and a big effort will be put forth to accomplish the end.

The chair on Monday night was taken by W. J. McKenzie and he was later elected president of the association. E. B. Tatchell was elected secretary-treasurer and the following were appointed on the committee: M. P. Moran, Jas. Richmond, G. C. Hartley, C. H. Sawle, and M. B. Zackson.

The finances for the association will be raised by membership fees until such times as a larger amount is required and then other means will be adopted.

The executative committee was instructed to wire President Chamberlain of the G.T.P. asking for an extension of the passenger and freight service to New Hazelton. This has already been done.

The committee is also preparing a program for the years work and they will report at the next meeting.

WORK HAS STARTED ON HIGH LEVEL BRIDGE AT HAGUELGATE

Engineer Hunter Arrived Last Week==Excavation Work Underway== Timber Coming From Coast==Will Finish In Time ==Mines Will Soon Use New Road

There is no longer any doubt in the minds of even the most pessimistic about the construction of the high level bridge over the Bulkley river at Haguelgate. R. W. M. Hunter, Vancouver, engineer for Geo. Cradock & Son, the bridge contractors, arrived in town last Saturday and has since been making arrangements for starting the actual work. Mr. Hunter has secured premises on Twelfth Ave. for his office and he already has his plans out and everything is in readiness. The first work is the excavation for the foundations and this will be done by local rock men. The timber for the towers is now on the way from Vancouver. It is the finest fir that Vancouver Island can produce. The other timber is being gotten out by the Georgetown Saw Mill. The steel part is practically completed now and will soon be on its way out from England.

Speaking of the bridge Mr. Hunter stated that it is the finest site he has ever seen and he has been building bridges for a good many years. The only thing he han worried about was to get good foundations but since he has seen the site he says that nature has provided the very best of foundations, At the beginning he will have only a few men working but as soon as the timber starts coming the force will be increased to at least twenty and then towards the end when the steel arrives as many more men will be put on. He says that he will have the bridge ready for use this winter. The work will be rushed, and the contract time will not have to be extended.

With the high level bridge completed and a snow road cut through it is only a matter of a very short time until the mines on the other side of the river will be making regular shipments to the smelter via New Hazelton. Thus the business of the town will be greatly increased.

Fined Ten Dollars

On Tuesday morning Constable McInnes picked up a man on the streets for using very impolite language. He took him before Judge Smith who imposed a fine of ten dollars and costs. New Hazelton must also be a clean city along with its other many advantages.

Made a Good Job

Messrs. Richards & Knight have just completed the Omineca Herald building and from all the flattering remarks made by visitors, including builders, they have made an excellent job. They used the best material that could be secured on the coast, and the best fixtures. They employed good machanics and they rushed the construction work in fine shape. Richards & Knight are doing a great deal of building in New Hazelton.

D. G. Allen arrived from Vancouver on Wednesday night and will be connected with the Union Bank staff. This is another indication of the growth of New Hazelton.

FRIDAY, NOVEMBER 22, 1912

With the organization of the New Hazelton Citizens' Association, the people of this town have shown a spirit of progress that is bound to bring forth good results. Even though notice of the meeting was short, every business in town was represented, and there were private citizens also. The object of the association is to conduct the affairs of the town until such time as New Hazelton is incorporated, when the affairs will be handed over to the council. In the meantime the association will endeavor to get streets graded, sidewalks built, a waterworks system and other improvements made. The first thing, however, is an application to the president and general manager of the G.T.P. to extend the freight and passenger service to this town immediately.

The Citizens' Association

The New Hazelton Citizens' Association will have the same effect as a board of trade or municipal council, so far as voicing the opinions of the people are concerned. The meeting was unanimous, and it was thoroughly representative. The start was all that could be desired, and the New Hazelton people are united and working together for the good of the town. In this way a great deal will be accomplished. Good officers were elected, and a strong committee, which has already started to work, was chosen. May every success attend the efforts of the association.

✦ ✦ ✦ ✦ ✦ ✦

A word of encouragement is always timely, no matter how mature and succeeful one is. Even those who have pushed their way well to the front, and have learned to be self-reliant, are glad to hear a friend say a kindly word of approval, and it sometimes happens that some unusually difficult obstacle looms large and throws its forbidding shadow across the path. A crisis confronts us, of which we cannot well speak, even to our friends and associates. If at such a time some one speaks appreciatively and cheeringly of what we have done in the past, it gives us just the needed encouragement to meet the present difficulty or problem.

Say the Encouraging Word

And while this is true of the man who has succeeded in accomplishing great tasks, it is esespecially applicable to younger people who are yet uncertain as to their own powers. Many a boy or girl has been strengthened for a heavy task by a word of encouragement, while others have been depressed and disheartened by some one's thoughtless comment or criticism.

Some parents understand the philosophy of this matter as applicable to their children, and they are always ready to encourage and stimulate every dawning desire and ambition, even when their riper experience shows its fancifulness. When some unusual task presents itself, they say: "Well, my boy, you are equal to it, and I am sure you will succeed!" And under such encouragement the boy's eyes brighten, his shoulders straighten, his mind becomes alert, his muscles tense, and he starts in with the battle half won before it begins, because of the confidence which has been aroused by his father's encouraging words.

The man or boy that wins is the one who believes he can win, and his friends can often help him to such a belief. On the contrary, when any one says: "I don't know about it. I am afraid the job is too big for me, so it will be better to wait awhile!" he is doomed to failure.

Youth is the time for visions and ambitions, and our boys and girls dream dream of success, and happy are they whose fathers and mothers keep their hearts young long enough to sympathize with the longings and aspirations of their children. And sad indeed is the case of the child whose parents turn coldly away from the enthusiasm they manifest. These young people aim high, higher than they are likely to go, without doubt, but if they are laughed at for their visions of climbing to the top of the ladder, they are quite likely to settle back in despair, and to make no further effort to rise.

It is a serious thing to break down all the hopes and longings of youth by telling them that these are but impractical day dreams, and never can be fiulfilled.

The pessimist and the hopeless man not only make failures of their own lives, but they drag down many others with them. But there are those whose very presence incites hope, and whose voice always brings encouragement and good cheer. These are the men who believe in themselves and also in their fellows. Old people come to them gladly to gather a few additional rays of sunshine to brighten their lives, and the young people instinctively turn to them for words of encouragement that will strengthen their purposes for good and wing their feet to climb rapidly and safely to their desired goal.

Let us set our faces resolutely to the task of looking on the bright side of things, and of saying an encouraging word, and of lending a helping hand to those who are trying to reach life's topmost height.

"Dad, Here's to You!"

We happened in a home the other night, and over the parlor door saw the legend worked in letters of red—"What is Home without a Mother?" Across the room was another brief, "God Bless our Home."

Now, what's the matter with "God Bless our Dad?" He gets up early, lights the fire, boils an egg, and wipes off the dew of the lawn with his boots while many a mother is sleeping. He makes the weekly hand-out for the butcher, the grocer, the milkman, and the baker, and his little pile is badly worn before he has been home an hour.

If there is a noise in the night, Dad is kicked in the back and made to go down stairs and find the burglar and kill him. Mother darns the socks, but dad bought the socks in the first place, and the needles and the yarn afterwards. Mother does up the fruit; well, dad bought it all, and jars and sugar cost like the mischief.

Dad buys the chickens for Sunday dinner, serves them himself, and draws the neck from the ruins after every one else is served. "What is Home without a Mother?" Yes, that's all right. But "What is Home without a Father?" Ten chances to one it's a boarding house. Father is under the slab, and the landlady is the widow. Dad, here's to you. You've got your faults—you may have lots of 'em, but you're all right, and we'll miss you when you're gone.

Opening Announcement

HAVING disposed of my drug business at Hazelton, I take this opportunity to thank those who supported me so liberally during the time I was in business at Hazelton. In future I shall devote my entire attention to the Telkwa store, and shall be more than pleased to greet old friends at all times.

J. Mason Adams, Telkwa

OVERHEARD AROUND NEW HAZELTON

Miss Sawle has been the guest of Mrs. D. R. McLean during the past week while the moving season was on.

Mrs. Warner and daughter arrived from Prince Rupert on Wednesday night and will reside on Eleventh Ave.

Mrs. Conkey left on Thursday for Seattle where she will spend the winter returning to New Hazelton in the spring.

There was a big bunch of passengers for New Hazelton on Wednesday night. Everything was filled up and lots of people were looking for rooms.

Several travellers from Prince and Vancouver were in town this week and they all got big orders. The commercial men are a good judge of how business in a town is and they have all expressed very pleasant surprise at the amount of goods required here.

J. B. L. Macdonald has sent word from Montreal that he i now on his way from that city to New Hazelton, accompanied by Mrs. Macdonald. His friends will be glad to welcome him along the line of the railway, and they will also be glad to learn that he is not coming alone.

Overcoats at cost. McArthur's Emporium, Hazelton.

C.P.R. steamer Princess Beatrice sails from Prince Rupert for Vancouver at 8 p.m, on the following dates:—November 24th, December 8th and 22nd, or every alternate Sunday. Through connection made on these days with train from Hazelton.

Dr. McLean, of the hospital staff, was in town on Wednesday night, having just returned from a trip of a couple of months on Vancouver Island. Most of his time was spent on the west coast and he had some great hunting. He was storm-bound on the coast for ten days.

Two Spaniards mixed it up a little on Pugsley street, near the corner of Eleventh, on Wednesday afternoon. They were real mad and flashed knives. One man's arm was slashed and required six stitches. He was taken in charge by the police, while the other man made his getaway and his opponent would not tell who he was.

Overcoats at cost. McArthur's Emporium, Hazelton.

A number of the old town people were over this week and all expressed great surprise that New Hazelton was booming so, as the old town is more quiet than any of them can remember. There is no reason for the surprise whatever. New Hazelton is the natural business centre, and, of course, this is the natural place for business to be done. Business is better this week than last, and it will be still better next week.

Spokane Visitor

Mr. Ryer, Ryer Investment Co., Spokane, spent the past week in the town and district and he was one of the first visitors at the Omineca Herald's new offices. He has been a subscriber of the Herald for some time and he says that he has become greatly interested in the district through its columns and this year decided to pay the district a visit. He has been around considerably and he says that he is more than pleased with the outlook, that when he goes back he will be able to talk Hazelton district in a more convincing manner. The district is much better than he had expected and he feels satisfied of its future.

INDIANS GAVE THEIR CONSENT

For New Road Through Reserve To New Hazelton—Government Also Granted Permission

It was learned last week that permission had been received both from the Indians and from the Indian department at Ottawa that permission had been granted to the New Hazelton people to run a road through the Huguelgate reserve to connect the new high level bridge with New Hazelton. Thus every obstacle has been removed and as soon as the material is on the ground there is nothing to stop the progress of the bridge.

Fine New Store

McArthur's Emporium is now located in their new premises at Telkwa and they are in fine shape for the big business coming their way. The building is one of the best in that town and it is a credit to the owner. As soon as the snow comes it is the intention of Mr. McArthur to move all his stock from old Hazelton to the valley where he will be permanently located.

Some Excitement

There was something doing on the streets last Monday morning. Barney Mulvaney's pack of dogs hit town and started something the minute they blew in. It took only about half an hour to clean up all the dogs in town, but during that half hour business was suspended and everyone was on the street.

Overcoats for Winter at Cost

We have a quantity of Overcoats of the very best quality and material, made by Coppley, Noyes & Pandall, of Hamilton, Ontario. Preparatory to our removal to Telkwa we will sell at invoice price—McArthur's Emporium, Hazelton.

Fort Fraser

On another page in this issue will be found the first of a series of announcements regarding Fort Fraser, the new town in the Fraser Lake district. Mention has several times been made in these columns of Fort Fraser. It is a busy little place and it is growing. It is the hub of a large agricultural district. It is on the railway and they have got a station granted. Look up the adv. you will be interested.

Overcoats at cost. McArthur's Emporium, Hazelton.

Several Telkwa people who were in town the past week report business very good. Considerable building is going on and the people are all enjoying prosperity.

The Harris boys were in town a couple of days this week preparing to get busy on the winter's work at the mine. All the boys will put the winter in on the property and that means that an immense amount of work will be done.

POULTRY DEPARTMENT

Housing for Winter

There is such a thing as overdoing the matter of trying to protect the fowls during an especially cold time in the winter. All our domestic fowls are warm blooded, and are protected by a heavy coat of feathers against almost any amount of cold, and if they are so sheltered as to be kept from a storm, and from the draughts coming through cracks and crevices, they will not suffer. So that usually, in a well built hen house, it is not necessary to close up everything tight. In fact poultrymen are now swinging to the other extreme and using an open front in some form or other, provision being made in case of very severe weather to cover the front openings with some very thin muslin that will keep out the wind and storm, and yet allow plenty of ventilation. Under all ordinary circumstances this will be sufficient; but even in such a case, as soon as the storm is over, or the weather abates, everything in front should be opened up during the warm part of the day so as to admit plenty of fresh, dry air from the outside, and thus drive out the dampness which is such a serious menace to the health of the fowls. For several hours of all days that are not stormy, throw the front wide open, even if the weather is cold, for fowls will stand any amount of dry, cold weather, but will quickly be harmed by dampness. Keep the fowls scratching in the litter for what hard grain is fed, and, with plenty of fresh, dry air, they will keep warm and well. In case the ground in the coops or houses becomes damp, siftings from coal ashes and air slaked lime will help to neutralize it.

Thorough Culling

That fowls will transmit weakness and disease to their offspring is without question or doubt. This means that only strong, healthy, vigorous birds should be used in the breeding pens. Now is the time to weed out some of the birds that have not shown up well in these respects. If you find some that are sluggish, and do not seem to care to work and scratch for their food, make some disposition of them. They may be sold to the marketman at this time of year for a fair price, and you will do well to sell them just as soon as they get through laying.

You Have the Market

The enterprising poultryman should have no difficulty in disposing of all he has to sell. If he has broilers, there are the hotels and markets, to say nothing of a private trade in them. The eggs may be sold in the same way, while fowls are in demand at all seasons of the year. There are times when storekeepers will not take butter, even in trade, but it is seldom that they refuse eggs. You can go into the poultry business with the assurance that you will find a ready market for all that you can produce.

Getting a Good Start

In all athletic contests a great deal depends upon getting a good start, and to acquire facility in this particular much practice is required, and the importance of thus getting started quickly cannot be overestimated, especially if the struggle is only for a few seconds. But when the contest is to stretch out for an hour, or six days, then it is necessary that there should be good staying powers that will keep one up to standard until the last minute of the struggle.

Both of these fundamentals are applicable to the poultry business. The man who in raising poultry gets a good start has a great advantage over those who are slow and behind time. If he gets his chicks hatched early and keeps them growing every minute, and never neglects them; if he gives them plenty to eat and keeps them supplied with fresh water; sees to it that the coops are always clean, and that there are no lice nor mites about the fowls or premises, he is well on the way to success.

But he must keep everlastingly at it, seven days in the week and during all seasons of the year. He will find it to his advantage to take a lantern and see just how matters are before going to bed, acting on the motto that prevention is better than cure.

There is no business where these things are more necessary than that of poultry keeping, and none where the returns for such thorough work are greater or more certain.

Life Germ of An Egg

Many questions are asked as to the position and appearance of of the germ from which, when fertilized, the chick develops. The following, taken from an exchange, clears the matter:—"The germ of an embryonic cell shows a little round whitish spot embedded in the circumference of the yoke, and always floating uppermost. This spot is present whether the egg is fertile or not. It is possible to detect the difference between a fertile and infertile germ cell. The egg must be broken and a magnifying glass used. The unfertilized egg cell appears whitish all over except for small clear spots very irregularly distributed over the surface. In the fertilized egg an outer ring or margin is whitish, while in the center is a small clear circle in which are very small white spots. The central clear space is the germ from which the chick will be developed.

Start With Good Stock

It will pay you to purchase good stock when making a start with poultry keeping. Poor stock only becomes a source of annoyance to you later on, and you wonder why you did not get some good birds at the start. This waiting to see if you can make it go is all right, but don't try out the mongrels and then expect to get as good returns as though you had thoroughbreds. The sale of a few fine, full-blooded cockerels at good prices will put the enthusiasm into you and make you feel that well-bred poultry is the only kind to keep.

Fort Fraser

B. C.

We positively state that Fort Fraser will be the largest City on the line of the Grand Trunk Pacific Transcontinental between Edmonton and Prince Rupert, and that a **DEPOT OF THE G.T.P.** will be built at Fort Fraser just as soon as the rails of this second great Canadian transcontinental reaches the townsite.

The Question of this depot has already been settled

and there are no "ifs," "ands," or "buts" about it.

We are the financial backers of FORT FRASER and stand ready to guarantee this statement.

Have you studied Fort Fraser's situation? It should convince you of the possibilities of the future. Here are a few of its NATURAL ADVANTAGES:

It is the centre of the now famous rich Nechaco agricultural district.

It has a lake fifteen miles in length of the finest sparkling fresh water on the continent.

A REGULAR HEALTH RESORT—Its climate is the best in Canada.

It has one thousand miles of inland navigable waters, with steamer service assured.

Hydro-Electric Power at its very door.

Two lines of railway are already assured, and a third contemplated, this great COMING CITY.

Western Canadian cities have increased phenomenally in the past 10 years, and fortunes have been made by small investors, for instance: Winnipeg, Vancouver, Victoria, Calgary, Edmonton, Saskatoon, and many others. - - - - - - WRITE FOR INFORMATION AND BOOKLET

Sep. 21, 1912 20

SYNOPSIS OF COAL MINING REGULATIONS.

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior

Oct. 4, 1912 James McDonald, agent

Good printing does not mean expensive printing; cheap printing is expensive in the end. If you want good work at a fair price you must see the Herald.

Notes on Prince Rupert Doings

By way of reminding Prince Rupert optimists of the old pioneer days the weather man has been handing out a daily allotment of disagreeable precipitation and an occasional vicious wind, The first arrivals, like Pillsbury and Lucas, say there has been nothing like it before in its persistency. The optimists, however, predict a charming winter as a recompense

---

While the city voters' list is only in preparation yet, it is announced that there are only about thirty citizens eligible for city honors in the council next year. This peculiar situation came about by the cancelling of the special qualifications allowed in the city charter whereby agreements of sale were accepted as equity for the period of two years. Now only free-holders who had property registered before the 12th of July last can legally qualify. This cuts out a few ambitious ones.

The Liberal meeting here this week when Ralph Smith, the Liberal leader in the Province, and Duncan Ross were the chief speakers, is causing local politicans to speculate on the war talk during times of peace. Some of the guessers think that Mr. Ross is doing the missionary work with the ultimate object of becoming provincial Liberal leader or at least a cabinet minister when Sir Richard gives up the fort. Certainly the Liberal camp offers a bright future for a live one who has patience and is not above drudgery for a few years. Duncan certainly has a lot of friends who would like to see him make it.

After several conferences under the white flag, the political factions in the city have decided to encamp together beneath the olive branch, and furthermore to conspire between them to overthrow the present civic administration and put in a business council. The first gun from the allied forces was fired this week, when the local papers announced T. D. Pattullo in the field for the mayoralty, publishing in connection therewith a long list of names to a petition requesting his candidature. The list includes most of the business men of the city. Certainly the present administration is not very popular with them. A high tax rate and the hard times about town has killed the chances of the Newton party for a second term—if they ever had any chance.

This year's council has shown little business acumen or political sagacity to date. They have played up to the labor gallery, but that is a treacherous political factor, and quite an expensive entertainment for the city. Complaint is made that a great deal of the time for which the city pays the mayor $2,000 and the councillors $400 each has been spent discussing the whereabouts of a lost deer, the personal charms of the young lady applicants for the job of telephone operator, or some other question of equal importance, while items involving real money are handled like a girl plays baseball. Prince Rupert's municipal government is a million dollar job, and the business men intimate that it is now in the hands of two-bit managers.

PETITION FOR A PUBLIC SCHOOL

New Hazelton People Asking the Provincial Government to Establish a School Here at Earliest Possible Date

Another feature in the rapid growth of New Hazelton is the necessity for a school. A large number of families have already moved into town and the child population is on the increase. A large number of those with children now living in the old town are coming here during the winter or in the early spring and it is particularly desirable that a school shall be ready for them. On the outside there is also evidence of quite an influx into this town in the spring. The people of New Hazelton have circulated a petition among the families of the town and the immediate vicinity which will be benefitted asking the provincial government to establish a school here at the earliest possible date. This petition has already been forwarded to the authorities and it is expected that in a short time word will be received that the request has been granted.
