THE WORLD'S GREATEST VESSEL MET WITH DISASTER

SOME OF THE WORLD'S GREATEST PEOPLE WENT DOWN WITH THE TITANIC

OVER THIRTEEN HUNDRED PEOPLE MET WITH TERRIBLE DEATH IN MID-OCEAN

The Lost Include Millionares, Financial and Commercial Magnates, Philanthropists, Novelists==Canadian Mail and Many Millions in Diamonds, Bonds, Debentures Lost==Vessel a Total Wreck---Head of the Firm was Saved

(Special to the Herald)

Vancouver, April 18—The entire civilized world is still overcast with a black cloud of gloom and horror as a result of the terrible disaster of the world's greatest ship the "Titanic" of the White Star Line. It was the maiden trip of this immense and luxurious ship and her passenger list included, not only some of the social leaders, but top nochers in the financial, literary and philanthropic circles. The accident happened on Sunday night about half past ten, and although the boat was equipped with every modern convenience and all the latest inventions for safety to passengers and to the boat, the boat has sunk, a few were saved and the world is still crying out for information. The wireless system has been worked but there has been so much interference from amateur operators that the reports are very meagre. The "Carpatkia" is the only vessel to arrive in time and she is expected to arrive in New York on Friday morning with the survivers and with full details of the accident. In the meantime the world must sit and wait.

The latest news received from New York is as follows:—

"Steaming at eighteen knots an hour and bound for New York on her maiden trip the White Star Liner Titanic, with 1320 passengers, and 860 of a crew, crashed into an iceberg at half past ten on Sunday night, April 14, and sank within three hours. Immediately upon the first shock the wireless operator sent out messages for help. There were several vessels within a radius of a few hundred miles and they all rushed to assist the wrecked steamer, the Cunarder "Carpatkia" was the only one to arrive in time. She reports that she took aboard 868 passengers and is now steaming for New York with them. She is expected to arrive about 8 o'clock Friday morning.

It is now almost certain that 1312 of the passengers and crew were lost. Owing to hazy weather and the interfering of amateur operators, the wireless reports are very meagre.

One report says than the impact was so terrific that the decks were broken through from bow to mid-ships. The shock was with such force as to rear half of the boat out of the water tearing the bottom out of the boat from bow to mid-ships on the jagged ice.

The disaster occurred mid-way between Cable Island and Cape Race, five hundred miles from Halifax and seventy miles south of the Grand Banks. Latitude 41.46 north, longtitude 50.14 west.

The vast wealth that went down with the ship includes 176 sacks of Canadian mail; $5,000,000 worth of diamonds: many C.P.R. dividend certificates and various bonds and debentures.

Among the millionaires and famous passengers missing and probably drowned are; Col. John Jacob Astor reputed to be worth $150,000,000; H. J. Bornstrom, writer and novelist; Col. A. Grasie, mining millionaire; Victor Giglio, singer; E. Brandeis, philanthropist, of unlimited wealth; Geo. Brayton; Major Archibald Butt, military aide to Taft; T. D. M. Cardieza, wealthy Spanish-American; B. Guggenheim: Chas. M. Hays, president and general manager of the Grand Trunk; J. P. Loring, novelist; Dr. W. E. Minehan; W. A. Roebling, financial magnate; M. Rothchild; Isadore Straus, owner of departmental stores in New York. Emil Taussig; George D. Widener, Philadelphia Traction Co., whose family is reputed to be enormously wealthy; William T. Stead; Thomas McCaffery, Bank Manager, Vancouver; J. Hugo-Ross, Thos. Beatty, Winnipeg.

J. Bruce Ismay, the millionaire head of the White Star line is among those saved and he is today subjected to a great deal of criticism in New York.

The Titanic cost $10,000,000: tonnage 45,000; displacement tonnage 66,000; length 882 feet; breadth 92 ft.; height 105 feet; there were eleven steel decks; fifteen watertight bulk-heads; and she was the last word in size, and luxurious appointments and supposed to be unsinkable.

The Titanic left Southampton, under command of Capt. Smith, on April 10th for New York.

Flags at Half Mast

It has been accepted by the Grand Trunk people that the president, Chas. M. Hays, is among the lost. Vice-Pres. Chamberlin has ordered all the flags on Company building to be floated at half-mast.

Dr. Quinlan, Dentist

Dr. Quinlan, of Prince Rupert, is opening dental parlors opposite the Omineca Herald office. Will be ready to do all kinds of crown, bridge work, and all dental work, office open today.

Baseball Sunday

The Athletic Association met on Wednesday night and received the report of the committee on collections. That committee succeeded in securing $292 and this is expected to be sufficient to carry the club all season together with the receipts from the games. The officers were elected as follows: President, L. L. De Voin; Treas., G. O. Graham; Sec., J. A. Riley.

The first game with an outside team will be played next Sunday week when New Hazelton will travel to the old town. The grounds are in fine shape. A fence has been built and bleechers will be erected for the ladies. The club desires to express its thanks to R. S. Sargent who gave two teams and two men for a couple of days to put the grounds in shape.

Hugh McLean and Bert schooling arrived in town yesterday afternoon after having spent the winter trapping. They got a very good catch and the fur is all good. They will remain in town for a couple of weeks and then will take to the hills, most likely going into the Omineca.

Phil McDonald arrived in town Wednesday night from the Ground Hog country and leaves this morning for Prince Rupert where he will do some business and then return to the coal country where he will remain all summer prospecting. On his last trip he succeeded in getting in a lot of supplies and when he goes back he will take a couple of men in with him.

George McBean is erecting a garage for his automobile across the street from Ragstad's jewelry store. He is now using all his pull to get the machine up the river as far as the bridge from which point he will run up under his own power. When the machine gets here it will be used as a stage between here and New Hazelton and also for private parties.

Rev. R. W. Lee's recital last night was a real treat and he will have a large crowd the next time he announces such an entertainment. Owing to their being so many tickets sold Mr. Lee found it necessary to engage the town hall for the evening and it was well filled. The program through out was thoroughly enjoyed. The Ladies Aid of the Presbyterian church served refreshments afterwards.

ANOTHER NEW TUNNEL BOAT

Improved Model of the Famous Kit-ex-chen is Being Built at H. Johnson's Boat Yard

At Johnson's boat yard at Cameron Cove the keel and tunnel frames have just been laid for another of the highly successful varieties of power boats used in the shallow waters up river by LaRocque & O'Neill last summer. The boat is similar in design to the Kit-ex-chen, which, though a roomy passenger boat drew only ten inches of water, and did tremendously good business in the shallow reaches of the Skeena Ferry stretches during the low water spell last year. The new boat will have a round arched tunnel instead of a square arched form which the Kit-ex-chen has, and should be more efficient still. She is to be twenty-four feet long, to the former boat's 35 feet, and 5 ft. 6 in. beam, instead of 9 feet. She will draw 9 inches, and be propelled by a 10 h.p. engine.—P.R. News.

On the Harris Mines

Sinking at the rate of two feet a day is going ahead at the Harris Mines property, the ore continuing at the same width, about 18 inches. Of this, 8 inches on the foot wall is high grade ore, quite solid. There is another high grade streak on the hanging wall and enough grey copper through the quartz of the rest of the vein to bring the whole to ore of a good shipping grade. It has been decided to cut the first station at the 150 foot level and start drifting both ways on the ore. The shaft is now well past the 100 ft. mark and the 150 point will be reached early in May.

Home Rule Passes

(Special to the Herald)

London, April 18.—The Home Rule bill passed its first reading last night by a vote of 360 to 266 amid deafening cheers for Bonar Law. The Opposition demand an appeal to the country before the bill was voted upon.

Baseball Sunday

The Baseball season opens in Hazelton on Sunday afternoon when the regular team will go up against the would-bes. The ball grounds are now in good shape and there will be a bunch of sport.

Dr. Quinlan, of Prince Rupert, is in town and is opening a dental office. He arrived on Tuesday night after a very hard trip up from the bridge. He states that the roads from the bridge to New Hazelton are in very bad shape, although they are drying up a little.

RETURNED FROM THE GROUNDHOG

Amos Godfrey Saw the Development Work on B.C. Anthracite Coal Ltd. Property

Amos Godfrey arrived in town from the Ground Hog coal fields on Tuesday night after having visited the holdings of the B. C. Anthracite Coal Ltd., of Vancouver. He was away several weeks and although the weather has moderated considerably since he left he made the return journey all the way on the Skeena river to Kispiox where the ice began to get too thin. He reports the weather in the coal country to be very fine, in fact just a little bit better than anything he has yet experienced.

Speaking of the coal lands he said that he was thoroughly satisfied now that there would be an immense production and that his company is in the very centre of the best coal. Their holdings are on Trail creek and Telfer creek. The main camp is on Trail creek where three tunnels have been started and several showings faced up. The tunnel nearest the camp was in 100 feet when he left and they are making three feet a day. It was started on a three foot seam and has improved to five feet six inches and still leaving a coal roof. The tunnel is being pushed ahead to ascertain to what extent it will improve.

There was still considerable snow on the ground when he was there and he did not go over the property as thoroughly as he would have otherwise. He did not see the showings that Jackson faced up last year and upon which Engineer D. Evans reported on, when he examined 56 showings, the seams on which run from 3 ft. 4 in, to 16 ft.

Some new work has been started on Telfer creek. The men had been working a week when he left and they had uncovered several seams with one of excellent quality from floor to roof. It is Mr. Godfrey's opinion that the biggest mine will be on this creek.

While away Mr. Godfrey met a great many of the boys who are still up there staking, or who are on their way. The whole country will be staked this year and the boys will start coming out now any time. As to his own movements for the future he has not definitely decided. He will be around for a couple of weeks yet, and then he is not sure where he will go.

Sam Rossetti, of Stewart's Lake was in town a few days this week getting supplies. He has been prospecting and trapping all winter, and left on Wednesday for his old camp, going via. the Babines.

FRIDAY, APRIL 19, 1912

Hydro and Electric Commission

British Columbia today stands out as the brightest star, not only of the Dominion, but of the entire American continent. No other province or state is enjoying such prosperity or is being developed so rapidly. Neither is there any other province or state with such vast resources still undeveloped. The provincial government has been directing a lot of attention to the construction of new railways, and in this way doing much to open up the province. As a result the population is increasing by leaps and bounds and new towns and commercial centres are springing up in all directions. With these new centres is develowing a demand for power. At this time, and the prospects are that for several years, coal will be costly and scarce. To get coal means more railways and more delay. There is within the province, and at the door of many of the new towns, a power that exceeds all others—the rivers and streams. In the Hazelton district alone there is a water power or powers awaiting development, which will furnish unlimited energy for mining, manufacturing and transportation, as well as all domestic uses. In Ontario private companies were allowed to develop the water powers with the result that the companies and the people were always at war over the rates. A few years ago the Ontario government appointed the Hydro-Electric Commission which has since done wonders in the way of giving the people cheap electric power. Such a commission can do the same for British Columbia, and more for the reason that the private companies are not so firmly established. The time is ripe for the provincial government to not only "seriously consider" the appointment of a hydro-electric commission, but to act. Electric power is of equal importance to the development of the province as the construction of railways. The development of the Bulkley and Skeena rivers is a job for the commission. No private corporation should be allowed to enter upon this field. The power is too great and too valuable for the people to loose. At the same time the provincial government should not delay the appointment of the commission so long that the development of the district would be retarded. A Hydro-Electric Commission in British Columbia, along similar lines as the Ontario Commission would be a popular move, and the very best place for that commission to start operation is right in the Hazelton district where there is power and where there is a growing market.

Doing Good Work

The Borden government has been something more than a sucess as a popular administration so far. Not only has its good work won the applause and the pride of the Conservatives but it has even met with the approval of H. S. Gadsby, the special correspondent of the Toronto Star and the severest Liberal critic in the press gallery. Here is the way "Gads" reviews the session :

"Denied the major blessing of reciprocity, with what minor blessings did the Borden Government salve the farmer ? Well, several millions, exact number unspecified, are to be spent under the direction of Mr. C. C. James, in improving the condition of agriculture. When this bill was in the Commons the government promised verbally that the money would be distributed on the basis of population. The Liberal Senate puts that Conservative promise in black and white and no doubt the alteration will be accepted. Several more millions are to be spent on good roads. The short title of this bill is the Highway bill, and the disgruntled Grits, who hated to see all that money being spread to influence votes, spoke of the men who were putting it through as the highwaymen. The joke is rather vague because a highwayman takes money from people, he rarely hands it back to them. On the whole the Highway Act is a good one. It was good enough to get through the Senate without amendment, the government's word being taken that the money would be distributed fairly. The technical reason why the Grit Senate did not lay hands on the Highway bill, but did on the agricultural Aid act, was that Highways are a Provincial matter, but agriculture is a specially reserved subject for the Federal power.

The government also gave the farmer the Grain act, which amounts to this—an experiment with one, perhaps three, Government owned terminal elevators ; three sample markets for grain, Calgary, Edmonton and Winnipeg ; grain commissioners to regulate the car shortage. Certain straws show that the Government may also do something for the farmer in the line of reciprocity, but in another name. The straws are the alarmist secession speeches of R. B. Bennett, the prairie Demosthenes from Calgary.

The Government did not settle the Ne Temere question. It simply passed it on to the Supreme Court and to the Imperial Council saving a delay of two or three years. It will probably be found in the end that Judge Charbonneau's decision is the right one—that the civil law of marriages in Quebec is the same as it is in the other Provinces of Canada and that Church rules must not be allowed to color it.

In the Manitoba Boundaries Act both parties showed a disposition not to burn their fingers again with a Manitoba school question. Sir Wilfrid Laurier took a position which made him once more consistent with himself and with the issue on which he gained power in 1896. The seventeen Liberals who voted for Mondou's amendment to accord special priveleges to the Catholic minority in Keewatin were neither consistent with themselves nor with the record of the Liberal party when in power. It was a case of each man hunting his own hole. Sir Wilfrid put no commands or suggestions to them. They acted, some according to their own consciences, others according to the religious complexion of their constituences. The vote showed the Nationalist Cabinet Ministers bolted and barred to their jobs and telling their Nationalist supporters to go hang. Incidentally it rubbed Nationalism off the map in the House of Commons and punctured the Bourassa balloon in Quebec. On the whole Pelletier, Nantel, Monk, and Blondin were rather brave in snapping their fingers at King Breaker Bourassa. Bourassa is not really a King Breaker. He is a paste diamond brilliant, a grandiose theatrical startler, who has been taken too seriously. A little judicious ridicule and he would be laughed out of court.

"What is Bourassa?" said a Quebec member of parliament. A vain fellow who had a grudge against a big man—that big man Laurier. He has had his revenge. Laurier is knocked over. What does Bourassa do? He runs away to Europe. He does not even wait for the election in Quebec."

During the last two weeks of the session the Senate has shown a surprising gift for work. It has sat morning, afternoon and night, debating strongly, thinking clearly, acting promptly. Its amendments have been well advised and moderate. Though three to one Grit it has not revealed itself violently partizan. Make the Senate elective, give it more work, weed out the cripples and the dodderers, and it might still be a brisk factor in our constitution.

Rev. A. E. Green, of Vancouver, inspector of Indian schools for the province, arrived in town on Tuesday and paid an official visit to this dirstrict.

HAZELTON MINING DOPE

Thompson, Fowle & Co., Boston, say: "Copper shares have been the center of interest in the stock market during the past month, and with the metal selling at 15 3-4 cents, the leading copper shares have made rapid advances, current prices for Amalgamated showing a net gain of about 15 points for the month. At this writing advices on the copper situation generally continue of a very optimistic nature, recognized authorities being quoted as looking for a continued advance in the metal due to the distinctly strong statistical situation."

F. W. Stephenson & Co., Victoria say: "Copper issues on the local list are all strong and higher on account of the general strength in coppers due to the higher price and strong statistical situation of the red metal. Current prices for B.C. copper at $5 1-2 show a net gain for the month of a dollar per share, and with existing conditions the stock should do still better. Granby Consolidated is also up at $41 1-2, and with the extensive operations of the company in the way of improvements and the erection of a 2,000 ton smelter at Granby Bay, we believe the shares are a good buy at the market.

Portland Canal issues continue in the same old rut, with Portlands selling at 3 1-2 cents, Stewarts, after a little flurry which carried them as high as 85 cents during the month, having settled back into the 20 cent bid rut. The outlook for all these issues seems of a very blue description, and we would certainly take advantage of any little upturns to sell, as it looks to us like a case of a penny saved a penny earned.

With a continued improvement in the metal markets, both copper and silver, which is predicted by recognized authorities, we believe mining stocks of the better class will do much better the coming summer."

A. A. Templeman, of Los Angeles, who arrived here a short time ago, and who is interested in the Omineca district, left on Wednesday with Mr. McNutt, on a trip to the Babines and they will probably go as far as the Hudson Bay mountain. Both men are practical miners. Mr. Templeman has been greatly impressed with the district thus far and he is confident that it will be a big producing district.

SYNOPSIS OF COAL MINING REGULATIONS.

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

LAND NOTICE

Omineca Land District—District of Coast, Range V.

Take notice that I, Edgar J. Webber, of Telkwa, rancher, intend to apply for permission to purchase the following described lands:

Commencing at a post planted at the s.-e. corner of (ungazetted) Lot 2, Tp. 2a, Range 5, Coast District, and being about one mile distant in an eastly direction from the n-e corner of Lot 1197, Tp. 4, Range 5, Coast District, thence east 80 chains, north 40 chains, west 80 chains, south 40 chains to point of commencement, containing 320 acres more or less. Edgar J. Webber.
March 18, 1912

LOTS OF MINING MACHINERY FOR UP RIVER THIS SPRING

Two Companies to Operate Omineca Placer on Extensive Scale this Summer—Both to Have Large Hydraulic Plants and One Planning to Instal a Dredge

The large freightage on the railway will be largely increased this spring by the immense amount of mining machinery that will be required in the Hazelton and Omineca districts. Several of the former companies are talking of large hoisting and compressor plants in order to get out sufficient ore to make regular shipments as soon as the railway reaches them, while the old placer mines of Omineca are this summer to be worked on a great scale and by similar hydraulic methods as those put into successful operation by the Guggenheims in the Yukon.

There are two large companies in the Omineca who will operate on a large scale this summer, one of which is backed by Toronto capital and on which Mr. Beaudette, an expert mining engineer, formerly in the employ of the Dominion government, spent last summer and the summer before in the Omineca and when he left Rupert last fall reported that his company would operate on a large scale as soon as the frost was out of the ground this year. Mr. Beaudette is expected back in a few days to start these operations the principal holdings of the company being on Manson creek.

The other company, the Royal Standard of Vancouver, will be represented this season by R. D. Featherstonhaugh, who from 1906 to last year was the engineer and manager of the North Columbia Gold Mining Co., at Atlin. He has had large experience in operating hydraulic plants, and in addition to installing one on the property of the Standard on Germanson Creek, near its junction with the Omineca river, he will have with him an expert on dredging, the proposition being to work the gravels by steam dredges as is now being done so successfully in Yukon and also in California and Colorado.

Those two propositions alone mean the transportation of many carloads of machinery and supplies, and the employment of a large number of miners.

Mr. Featherstonhaugh is now in Vancouver, where he has assembled an expensive outfit of drilling machinery of the most modern type. He brings with him expert drillers and will get on the ground with this machinery at the earliest possible moment. He hopes to be putting down holes to thoroughly test the ten miles of known first class pay dirt in the first week of June, and if the pay should prove moderately even a large dredge, for which a provisional contract has been entered into, will be shipped in during August. This, it is projected, will be set up on the Omineca river, and work up Germanson Creek. Meantime, a large hydraulic plant, with an average capacity of 2500 cubic yards every 24 hours, will be installed as soon as the machinery can be gotten in and will be operated during the coming summer, Mr. Featherstonhaugh being of opinion that he will be able to have this plant steadily digging the latter part of July.—P. R. News.

LAND NOTICES

Omineca Land District—District of CASSIAR.

Take notice that J. W. Halliday of Hazelton, engineer, intends to apply for permission to purchase the following described lands;

Commencing at a post planted at the n.-e. corner of Lot 811, Cassiar; thence east 80 chains, south 80 chains, west 80 chains, north 80 chains to point of commencement, containing 640 acres more or less. J. W. Halliday

IN BUYING BUSINESS LOTS

Be Sure you Buy in the Mercantile District. At New Hazelton that district is Section One---OUR Property

SECTION ONE = NEW HAZELTON

THE BUSINESS DISTRICT

The best business property in every town is always some distance away from the depot. This is the case in New Hazelton. Section One will be the Best Business Property.

The Hazelton people themselves have bought in Section One and all who have started business in New Hazelton are in Section One or just across the line. Those who have planned for early moving will be located in Section One.

The first Business District always remains a Business District. It is next to impossible to move the district from where it first started. It has started in Section One and that Section is being Rapidly Built Up. The business will stay in Section One and that is the place to buy.

The Northern Interior Land Company own Section One and Section Three. The prices of lots are now as low as they will ever be. They are liable to advance any day.

Buy your Business Lots in Section One NOW. In another year they will be more than doubled in price. This is your opportunity. You missed Winnipeg, Calgary, Edmonton, Vancouver, and other big western cities. Don't miss New Hazelton. It is and will continue to be the distributing point for the vast Northern Interior.

Prices of Lots Range from $100 to $1200 each

These Prices are only good for a short time.

$400,000 FOR COMOX-ATLIN

List of Estimated Expenditures Secured by H. S. Clements for 1912-13

Nearly four hundred thousand dollars is the amount H. S. Clements, M.P., secured the past session of parliament for expenditure in Comox-Atlin. It is the biggest sum ever allotted to the district and includes public improvements of all descriptions and in every part of the district. The constituents of Mr. Clements cannot fail to appreciate that he is a live one and looking after his riding. Comox-Atlin had a cabinet minister representing them in the last parliament but no such expenditure as this was secured.

Below is a complete list of the estimated expenditures for the Public Works and Trade and Commerce departments in addition to this some $27,000 has been secured for mail subsidies.

Main Estimates 1912-13

Harbors and Rivers:	
Courtenay River Improv'ts	$1000
Hardy Bay Wharf "	1500
Lasquita Bay " "	3500

NEW HAZELTON DOINGS

The deal announced last week whereby Mr. Biggart, of Vancouver takes over the business and the property of R. J. Carson, on Thirteenth ave., was completed on Tuesday last. Mr. Biggart is now in full possession and he will very soon start the alterations.

The firm of Kennedy, Wilson & Co., real estate, farm and timber lands, and insurance agents, will open on Thirteenth Ave., the first part of the week. This firm will make a feature of Section one business and residental property.

S. A. Polley, a contractor on the C. N. R. arrived in town last week and spent a few days the guest of his two sons.

J. W. Stewart left on the 11th for the old country on a business and pleasure trip. Mr. Stewart has regained his health and is nearly completely well.

A couple of travellers from Prince Rupert were in town this week and one, Mr. Edwards, representing McMillan & Co., who was here on his first trip said that he was greatly surprised at the advance the town had made. It was several times larger than he had expected and he looked to see it increase very rapidly.

Walter Harper was in town this week for a few days and left on Tuesday to spend a week in the valley.

A number of the local people attended the Birthday Social in the old town last week and had a very pleasant time.

The mail stage met with an accident between Sealey and here on Monday last and was thus delayed for some time. The roads are, however in much better shape than they were and they are improving.

B. B. Kelligher, chief engineer for the G.T.P. is on his way to New Hazelton. He may also go father along the line on a trip of inspection.

Angus Stewart sent a wire to V. W. Smith this week stating that the samples of the ore taken from the Duke vein on Silver Cup had been assayed and returned the following results: silver 450 oz., lead 71 per cent; total value, $312.00 per ton. The Duke vein is now over two feet wide. The tunnel is in 120 odd feet and the ore is still improving.

Liberals Re-Organize

The Liberal Association of Hazelton met last Monday night and there was a big turnout. It was decided to reorganize the association and to continue the work of organizing the district for the next election when it comes on. The officers elected were:— President, J. Mason Adams; First Vice, L. L. DeVoin. Second Vice, F. C. McKinnon; Third Vice, R. W Lee; Sec. Treas. J. Waren.

BUSINESS DISTRICT BEING ENLARGED

J. H. Kugler Buys Six Blocks Adjoining Section One and Will Encourage Business Men to Locate There

It will be good news to those who own property in Section one and those who have established their business houses on that section to learn that J. H. Kugler had purchased all the unsold lots between Pugsley and Kelly sts. on Thirteenth Ave. These lots adjoin the present business section and the object is to put these on the market at once and thus enlarge the district. If these lots are picked up as rapidly as expected and built upon it will indeed be a very difficult matter to establish business houses in any other part of the townsite. The people in the old town who have not yet secured lots in section one will be given an opportunity to buy in this district which J. H. Kugler has purchased, and which is being handled here by Kennedy, Wilson & Co. Mr. Kugler also states that section one lots are selling rapidly to eastern investors.

OBITUARY

Late Alfred Parker

On Saturday night, April 13th, Alfred Parker passed away in the Hazelton hospital after a long illness, although he was only confined to his bed a short time previous to his death. He was well known in the community and previous to his serious illness which necessitated his giving up indoor work, he was a clever accountant. He was born in Campbell town, N.B. and started life early in the service of the Intercolonial Railway, and rose to the post of travelling auditor. This position he resigned to come west and he entered the service of the Hudson's Bay Co. at Vancouver, as accountant, and in 1908 he came to Hazelton in the same capacity and remained at his post here for some time until a prolonged illness forced him to give up. Upon his recovery he engaged in business for himself. The funeral was held on Tuesday afternoon from St. Peter's church where Rev. Mr. Field conducted the services. Interment took place in the Hazelton cemetery to which place the cortage was followed by a large number of Hazelton people.

Billiard Tournament

The second billiard Tournament at Slinger & Ayerde's brought forth a lot of new material and when the next event is framed up the handicap will be greatly changed. All the old time champions went down to defeat at the hands of new blood and there were many surprises sprung during the several games. W. J. Larkworthy, an old English billiard player won the first prize by defeating Aldous, a new aspirant to billiard honors. Larkworthy defeated DeVoin and Aldous defeated Harris. Aldous was awarded the second prize and the third is still to be played by Harris and De Voin.

PROVINCIAL ELECTIONS ACT

Skeena Electorial District

Take notice that I have received objections in writing to the retention of the following names on the Register of voters for the Skeena Electorial District on the grounds stated below.

And take notice that at a Court of Revision to be held on the 6th day of May 1912, at the Court House, Prince Rupert, B.C., at 10 o'clock in the forenoon, I shall hear and determine the said objections, and unless such named persons or some other Provincial voter on their behalf satisfies me that such objections are well founded, I shall strike such names off the register.

J. H. McMULLIN,
Registrar of Voters.

Dated this 9th day of April, 1912

The following persons are reported absent from the District:—

No.	Name	Place
1067	Grant, Donald.....	Bella Coola
1106	Haakenson, Christian	Bella Coola
2575	Rettie, Andrew	Bella Coola
3266	Young, David.....	Bella Coola

SETTLERS ARE DISCOURAGED

Prince Rupert Real Estate Men are Said to be Knocking the Interior and Boosting the South

The first part of this week Messrs. F. L. Wilson of Oregon, and Lane, of Washington, arrived in New Hrzelton where they spent a couple of days before continuing their journey into the agricultural lands of the Francois lake country. Both men are farmers of the real stuff. They have been in frontier countries before and they know their business. Their specialty is dairy farming and they are looking for land for that purpose.

When they arrived in Prinee Rupert they found quite a number of other men there waiting to get up the river to seek land for the purpose of settlement. But, to their surprise, and to the surprise of all who become acquainted with the facts, they found Prince Rupert real estate men pessimistic knockers who had not a good word to say about the country that is to make Rupert a city. They did have a greal deal of nice stuff to throw out about the valleys in the south that a few of them have the privilege of selling to help build up the cities of the south. Mr. Wilson informed these men that if he were looking for Nechaco valley or Kootenay lands he would not come so far north to buy. Thus the new arrivals were met with discouragements on every hand from the Prince Rupert wharf to New Hazelton. Many of those who got to Rupert came no further, but returned to the south. Mr. Wilson and Mr. Lane came on through. They are here to see the country, and if it is as they expect, and so far their impressions from observation have been quite up to the mark, they are not only going to take up land, but they are going to bring their families, live stock, machinery, and supplies for a year in with them this summer. They will get in as soon as they can make the trip and they will clear land this summer and fall and get several acres in shape for a crop next season. They have money and they are prepared to meet the conditions.

If these two men get land and are satisfied they will report to some fourteen or sixteen friends who are awaiting their return. These friends are also prepared to leave the United States and come into the Northern part of British Columbia. The influx of population is on. The people are coming and they know they are a year or two ahead of the completion of the railway, but that is what they want so they can get their land in shape for crops by the time the railway is running.

It is a hundred to one shot that, not only will Mr. Wilson and Mr. Lane settle in Francois lake country but that their friends will also, and they will make good not only for themselves, but also for the country. At the same time the knockers in Rupert and along the line will still be knocking and living in a two by twice sphere. It is men of courage, men of brains and men of brawn that British Columbia wants, and this class pays no attention to the picayune prattle of two penny real estate hucksters.
