MOTHER'S NEGLIGENCE LED TO HER CHILDREN'S DEATH

Left Two Children of Six and Seven Years in House Alone and Went to Picture Show--Fire Occurs and Children are Found Dead in Cupboard.

(Special to the Optimist)

Montreal, Feb. 4.—The dangerous practice of leaving young children alone in a house has often been exemplified but surely never with greater force than it was in this city yesterday, when two little children's lives were destroyed by fire. The police are endeavoring to have the mother charged with criminal negligence.

The mother of the dead children is Mrs. George Marlow. She and her family occupied a flat on Chatham street. Yesterday afternoon she dressed and went out to enjoy the luxuries of the moving picture show, leaving the two little ones who were only six and seven years old respectively, behind to watch the house.

How the fire started no one can tell. Some small boys playing in the yard noticed peculiar wreaths of smoke emerging from the house and dreading that something was wrong they raised the alarm. The firemen were on the spot in a very few minutes and a few splashes of water sufficed to extinguish the flames. The rooms of the house were filled with nauseous smoke however. Not finding the children in bed or in the passages the firemen ran to the cupboard, and as he opened the door the lifeless bodies of the kiddies fell at his feet. They had taken refuge from the flames in the cupboard, unmindful of the smoke.

The tragedy raised a storm of indignation among the public. It is well known that the practice of leaving helpless children alone in the house is not a new one. There is too much of it going on and the police are anxious to institute criminal proceedings against the mother in the hope that such action will militate against the continuance of the practice.

SHIPPING REPORTS

From Dominion Govt. Wireless Stations

(At 1 P. M. Today)

Triangle—Overcast, south west, strong squalls. Bar. 29.29, ther. 34. Heavy swell.

Cape Lazo—Cloudy, south east. strong gale. Bar. 29.53, ther. 36. Sea smooth. Spoke Prince George at 9.20 off Cape Lazo southbound.

Point Grey—Cloudy, south east, thick weather. Bar. 29.62, ther. 39.

CENSURE ON JAPAN'S GOVT. IS RULED OUT OF ORDER

Hawthornthwaite Resolution Refers to Execution of Socialists as Unspeakable Barbarism--Speaker Calls it Reflection on all Monarchies of Friendly Nations.

(Special to the Optimist)

Victoria, Feb. 4.—A mild scene was caused in the House of Commons yesterday afternoon when Mr. Hawthornthwaite brought forward his resolution condemning the government of Japan for the execution of the Socialists. The resolution was framed in the strongest possible terms and was ruled out of order by Mr. Speaker Eberts.

In taking this course the speaker gave as his reason that the term "unspeakable barbarity" which occurred in the resolution in reference to the action of the Japanese government, was a reflection on the monarchies of the friendly nations, and could not therefore be allowed to stand.

The voice of the B. C. government was then heard tthrough the mouth of Mr. Hayward who brought in the resolution protesting against the recent reciprocity arrangements made by Canada and the United States. Speaking to the resolution he declared that the free fruit from the United States would be a death blow to the fruit industry of the Province which they had been trying for so long to build up.

A discussion on the Coal Mines Amendment Act followed and Mr. Parker Williams attacked the officials of the mining department for their lack of effort, and said that even the Premier himself seemed to be indifferent to the condition under which the miners of the Province were called upon to live.

The speaker called him to order for his reference to the Premier after which Premier McBride replied that if the member for Newcastle had any charges to make against his department he would be glad to hear them.

A GREAT HIT FOR RECIPROCITY

AMERICAN COMPANY IN CANADA SAYS NO INTERFERENCE

As Proof of Their Sincerity Announce Their Intention of Extending Their Operations in Canada by Erecting New Buildings and Plant.

(Special to the Optimist)

Hamilton, Feb. 4.—A telling reply has been given to those who deprecate the reciprocity treaty between Canada and the United States in this district The Oliver Chilled Plow company are the people who are responsible for the staggering blow. They first of all announced, when the treaty was made known, that it would not in any way interfere detrimentally with its plant here. They followed up that statement with the proof of its sincerity. They have officially announced their intention of building an assembly building in connection with their plant which will cost $200,000. The erection of this building will be started upon at once and will be followed by the building of a foundry measuring 576 feet long and 130 feet wide. The official announcement made a great impression on the public mind. This American concern has large interests in Hamilton and their desertion of the city might mean a considerable loss. Their bold statement is regarded as an important point in favor of the Reciprocity Treaty.

LOOKING TOWARD B. C.

Shipping Magnate Admires Mining Prospects of Province

Montreal, Feb. 4.—(Special)—C. J. Leyland, of England, who is identified with vast shipping interests throughout the world is a visitor here and is looking into some important mining enterprises along the line of the Grand Trunk Pacific in Western Canada.

Mr. Alfred Carss returned by the Prince George after a trip to Victoria and Vancouver.

WILL ENTER THE ALASKA TRADE

NORTHERN STEAMSHIP CO. PREPARES FOR NEW DEPARTURE

A New Petriana Will Now Arrive—S.S. British Empire is on Its Way Across—Service to Commence Early in April.

Vancouver, Feb. 3.—With the arrvial on this coast of the Northern Steamship Company's steamer Petriana, which will leave the Clyde next week westward bound, that company will seek for the first time a share of the traffic business This vessel has a capacity of about 1200 tons and has been especially constructed for carrying ore, and will operate between Vancouver, Prince Rupert, Queen Charlotte, Portland Canal, Ketchikan and Skagway. It is expected that she will be ready to begin active service about the first of April The old Petriana, which was purchased some time ago by the Canadian North Pacific Fisheries company, will be given a new name

The first new arrival of this company will be the steamer British Empire, a steamer of 800 tons capacity, which left the Clyde some time ago, and is now well on her way to this port. She is expected to arrive about the middle of March The British Empire will work in conjunction with the Cetriana, each boat leaving here for Prince Rupert fortnightly, giving this company a regular weekly service every Tuesday night Neither of the new boats will carry passengers, the Petriana being especially adapted for ore; and the British Empire for general cargo

The Camosun In

The Camosun got into Prince Rupert from the south at an early hour this morning and left again about noon for the north. She reported rough weather all the way up. Wind and snow was the order of the day. They had many trying passages to negotiate but emerged successfully.

BREAKS RECORD FOR WHALING

NEW COMPANY WILL HAVE FIVE NEW STEAMERS

This is in Addition to Five Boats Used Last Year—Look for the Largest Catch on Record This Year.

Preparations are already being made by the Canadian North Pacific Fisheries company for the coming season Ten vessels will be operated this year, five of which were in use last year; the Orion, St Lawrence, Sebastian, Germania and William Grant Five are now on the way from Norway; the Red, the Green, the Black, the Yellow and the White The William Grant and the Sebastian are now receiving their annual overhauling and when they are launched the other three of the old fleet will be hauled out, scraped, cleaned and painted After this work is completed, the steamers will be assigned to their different stations

By the time the season opens four stations will be ready to prepare the captured whales for shipment; the Sechart, the Kyuquot, the Rose Harbor and the new Naden Harbor station, now in course of construction

ANOTHER BOAT GOES ASHORE

TITANIA FOULS GEAR AND RUNS ON TURN POINT

Was Floated Again at High Tide but Developed Such a List That Cargo Will be Taken From Her in Barges.

(Special to the Optimist)

Vancouver, Feb. 4.—Bound from Comox with a cargo of coal for Acapulco the steamer blessed with the fairy name of Titania, under Captain Froeger, went ashore near Turn Point off Stuart Island early this morning. It was not the storm that drove her ashore. She fouled her steering gear and was washed in. When high water came along she floated again, but it was then recognised that she had been badly damaged by the accident. Her hold was full of water and she developed a bad list. The situation looked so dangerous that at last reports efforts were being made to have the cargo taken from her in barges.

AVIATOR FLIES WITH FIVE

WENT THIRTEEN MILES WITH LOAD OF 1000 POUNDS

Sommer Makes a Weight Carrying Record for Aviation—Flight Made in a Farman Bi-plane. A Wonderful Joy Ride.

Paris, Feb 1—A world's record for passenger carrying was set here today by Aviator Sommer, when he flew with five passengers from Deuzy to Remilly and return, a distance of 13 miles The combined wieght of his passengers and the petrol tank was 1000 pounds The flight was made in a Farman bi-plane Two of the passengers rode astride of the skids The other three rode on specially constructed seats behind the aviator

Letters to the Editor

A Woman's Plea for a Single Moral Code

Dear Sir,—Kindly give me space for a few words. Can the parlor houses be put out of business? Most men when they marry insist on marrying virtue. Let all good women, married and single, demand as much virtue in men as men demand in women and prostitution will die a natural death.

A MARRIED WOMAN

Forty-five Cent Wage Rate

At 2 p.m. today the Special Committee appointed to meet the delegation from the Prince Rupert Industrial Assoniation met the workers delegation in the City Hall and a discussion of the 45c wage rate was engaged in.

TIMBER RETURNS

Crown Lands for January Show Revenue of $223.302

Victoria, Feb. 4.—(Special)—The returns for the timber branch of the Crown Lands department for the month of January show a total revenue of $223,302, including coal licenses.

DRY DOCKS TO BE BUILT SOON

CONSTRUCTION WORK AT ESQUIMALT ABOUT TO START

Five Boats Contemplated for Canadian Service—Two Cruisers and Three Destroyers—Vessels Will be Built on Pacific.

(Special to the Optimist)

Victoria, Feb. 4.—Work will be started at once on the construction of the large dry dock at Esquimalt, suitable for the requirements of the Canadian Navy. This pleasant announcement was made by Messrs. Bullens, B. C., the Marine Railway company, who have been in Ottawa in connection with their application for the Dominion government subsidy for the dry dock. The principal members of the firm returned last night and announced that the work was to start immediately. Hereafter vessels destined for the Pacific will be built on the coast, and not brought from afar. This will mean a great influx of wealth and labor, which is bound to be beneficial to the whole of the Province At the present time there are five boats contemplated for Pacific service. Two fast scout cruisers of the Bristol class and three destroyers of the river class. Others will follow in their wake on the ways.

Claremont Rooms Purchased

Today it is announced that J. H. Kugler of the Co-Operative Realty Co., this city, has purchased the Claremont Rooms in the Buckley Block. These rooms, nineteen in number, have only just been furnished by G. Tite at a cost of over $2000. It is the intention of their present purchaser to close them for the time being awaiting another purchaser.

Important Committee Now

The Fire and Water, Light and Phone Committee meet tonight. It is now pretty certain that light will be available about the middle of the month. Delay has again been caused by the non delivery of material.

We have received Two Carloads of Canned Fruits and Vegetables. They are of the highest grade and quality, every can 1910 pack. They were bought at a price which cannot be duplicated this year.

. . . CANNED VEGETABLES . . .

Corn, Peas and Beans	2 cans 25c
Tomatoes, 2 lb. cans	2 cans 25c
Tomatoes, 3 lb. cans	15c
Spinnage	15c
Corn on Cob	gallons 60c

DEVOTED PRINCIPALLY TO THE INTERESTS OF WOMEN

This is a little section of the paper, which from day to day will be devoted to subjects of special interest to women. Any and all of the ladies of Prince Rupert are invited to contribute to its columns, and to take part in its discussions. Suggestions and criticisms are invited by the editor. The hope is expressed that "The Cosy Corner" will fill a social need.

G. B. S. on Music

When Mr. G. B. Shaw was a young man and a musical critic he suffered extremely by having to attend meetings of the Musical Association wher he listened to old gentlemen who were put up to tell interminable reminiscences of old-time musicians He nourished a dream of revenge in his heart. It was that if he ever became an elderly man he would indulge in reminiscences before the same society.

The time came a few days ago. Yet after all he was baulked of his revenge; for the audience roared with laughter over what Dr. Cummings the chairman called "a comic history of music" and enjoyed themselves vastly.

His best story was about a man who sat next to him at a chamber concert of classical music. After listening for some time the man turned to him and said: "Are these the Christy Minstrels?" "No" said Bernard Shaw. "They're down stairs this is he 9th symphony." "Oh Heavens!" said the man and went down stairs.

G. B. S. gave some of his early recollections. "As a boy in Dublin" he said "I belonged not to the nineteenth century but to the tim of Samuel Pepys and the eighteenth century. I heard Beethoven played on a piano with a wooden frame which is a very different thing from Beethoven on an iron-framed piano. . . . My father was a musical genius in his way. He could play on a trombone interminably. In fact he could play any kind of instrument, and I remember him picking up a flute and playing 'Home Sweet Home' so well that the maid-servant came up, thinking it was a man in the street, to order him away."

The Unusually Bright Child

The child that is exceptionally bright can in a short time become a nervous, irritable wreck. The process is short, and produces the undesirable results before caretakers or mothers realize what mischief is being done. Now and then an unthinking friend remarks in his presence that the child is very bright He is bright:—he listens and understands. An ambition stirs within him to live up to the reputation he has unwittingly won.

Remembering what he saw and heard has been a subconscious process. He now puts forth effort to remember more than he had previously done; of course he succeeds. He has always loved stories. If read to him, he listened with eyes on the page. If told to him, the intent eyes were on the face with a breathless interest.

The absorbing interest now becomes a conscious process. He pleads for more with pleasure, and queer situations pass in a train through his mind. Play is neglected. He gtes restless in sleep. The afternoon nap becomes a period devoted to make believe situation, and the process is complete. This type of child needs a story now and then, but he needs and must have outdoor riotous play sandwiched in between, and he must take his story with the same keen pleasure and abandon that he takes his play, with no nerve-racking strain left over as a reminder. If the child is bright, it is folly to show him off; that will take care of itself.

"The Women

"That vigorous-looking woman of some fifty winters, with the pleasant face, is Clara Zetkin. She is a human volcano, and is always in eruption. It was at the Brussels Congress, I believe, that, working herself up to a pitch of fury, she broke a blood vessel, quietly retired behind a screen, and, having got rid of the blood, came out again and finished her speech. She told me in an interview that the woman's paper of which she is editress, The Glucheit, has a circulation of nearly one hundred thousand a week. She, like Singer and Vandervelde is a member of the International Bureau—the executive which controls the movement.

"The dainty little creature near her is Rosa Luxemburg, the famous revolutionist. She is exceedingly capable, impassioned in her eloquence, and holds a cunning little brain under those masses of dark hair.

"That tall, handsome woman, dressed in a tight-fitting blue serge costume, slashed with scarlet, is Sorgue, the most dramatic as she is perhaps the most dangerous woman in the Congress. She holds considerable power in France, where she has the 'direct actionists' at her back. She is a great advocate of the 'general strike' and militant methods.

"Another woman of great influence in the Finnish movement is Hilja Parssinen, the poetess, whose pale, refined face, crowned with a mass of straw-colored hair, and steel blue eyes, enmesh such an extraordinary lyrical genuis. Her last poems, 'The Girl in the Street,' and 'The Factory Worker' have caused a sensation far beyond the borders of Finland. She is a school teacher, and said to me, 'I have a family of 500 girls. I have no time for my poetry. The girls first."

Don't Neglect Hands

A perfectly formed hand is one of the rarest attractions that a girl can possess. Occasionally one sees a hand of so much personality and magnetism that it holds the gaze as if by fascination, and, charmed by it, one wonders how any girl ever allows gerself to neglect her hands. Whether they are by nature beautiful or not, she can add immensely to their attractiveness by care and attention.

Even the ravages of house-cleaning, or scrubbing, and of sweeping may be mitigated by reasonable care, and hands that must do this sort of work may still be soft, white, and pleasing to the eye and touch.

Curing Chapped Hands

Nothing is more annoying than chapped hands. A liberal application of rose water and glycerine is the best cure for them. And if they are very badly chapped and one's skin will stand glycerine then it should be applied in its pure state after the hands have been washed in warm water and only half-dried. This is a heroic remedy as pure glycerine smarts the skin but it effects a rapid cure.

How to Keep Oysters

It is a great mistake to allow oysters to freeze in order to keep them for by doing so their delicate flavor is injured. Place them in a glass or a stone jar and stand inside the refrigerator if it contains ice. If not cover with a cloth and stand in a cool place where they will keep cool without freezing. If they are to be served fried it will not harm them to put small pieces of ice in the jar with them but do not do so till ready to bring them to be served au natural.

W G.T.P. BOAT IS COMING HERE

TAKE OVER PRINCE ALBERT'S RUN AMONG ISLANDS

ert Too Expensive a Boat for the un—Will be Devoted to Relieving oast Flyers—Looking for Substitute.

ancouver, Feb. 1.—The rumor published some days ago to the effect that Grand Trunk Pacific Company ld soon require an additional steamer this coast, is being substantiated numerous circumstances, although officials of the company still decline give positive confirmation to the story s quite plain, however, that preparans are being made for the advent the new boat. Representatives of company are now in England lookover the field that will be suitable replace the Prince Albert on her sent run among the northern islands has long been recognized that the bert is too expensive a boat to be voted to the development of such route, and that a much smaller and ore economical vessel would answer e purpose as well, while the Albert ould be just the steamer to operate a freight carrier in conjunction with e Prince Rupert and Prince George tween Vancouver and the north coast orts.

There is no doubt of the need of e Prince Albert on this run to reeve the two flyers, as they are frequently hampered by the amount of eight they are called upon to handle, hich in the summer makes it very ifficult for them to run on schedule me as passenger boats.

APTAIN MOORE FALLS INTO BAY

ROKE TWO RIBS AGAINST GUNWALE OF BOAT

as Coming Ashore When He Slipped Backward—As He Fell He Collided with the Restless—Picked Up Unconscious.

(From Thursday's Daily.)

An unfortunate slip that might easily ve ended in death betrayed the old aptain Moore of the government ship estless about noon today. He was tempting to leave the ship for the harf when he took a false step which nded him in the water after he had llided violently with the gunwale his boat. His cries quickly brought sistance and with the aid of a grappling ok he was safely brought aboard the ip again.

It was a near go. His concussion with e gunwale broke two of his ribs and e sudden shock of the extremely cold ater rendered him unconscious. But r the fact that he had emitted a cry mediately his balance deserted him might easily have perished in the ater unknown to any of his crew.

Owing to his precarious condition rig which was near the foot of Centre reet was requisitioned. Wrapping e old captain up in warm rugs and ats he was taken up town to the Savoy otel which has frequently of late sumed the role of emergency hospital w and again through the kindly urtesy of the proprietor. Mr. Prudomme. From there Dr. Tremayne as phoned for to attend the patient ho soon afterwards regained consciouess. Dr. Tremayne discovered that o ribs were broken.

Captain Moore is over sixty years age, and though light and spry as a oungster on occasion, is liable to suffer everely. It will be some time before e will be able to get about again.

At the time of the accident the Restess was moored at the wharf just pposite the office of the steamship gent of the G. T. P. The captain had lready ascended the ladder and was bout to place his foot on terra firma hen the accident occurred.

BIG FIRE ON THIRD AVENUE

BOARDING HOUSE OF MRS. HAUDENSCHILD GOES UP IN SMOKE BEFORE EIGHT O'CLOCK THIS MORNING

BOARDER MADE A LEAP FOR LIFE

Fire Brigade Got Smartly to the Scene, but Owing to the Lack of Water Pressure Was of No Service--Absence of Breeze Fortunately Prevented Flames from Spreading to the Electric Light Plant.

(From Monday's Daily.)

What is without doubt the biggest and most dangerous fire that has visited Prince Rupert since incorporation broke out this morning and completely destroyed a two storeyed house belonging to Mr. Haudenschild on Third avenue about two blocks east of McBride street and within about thirty feet of the new electric light plant. The building which was a wooden structure succumbed to the flames like matchwood and the residents had to make an expeditious exit. One of the boarders roused from his bed just in time, took a life and death chance by leaping from the second storey through the dense smoke on to the slush and snow below. Fortunately he was uninjured. Through the smart work of Miss Haudenschild, one of the daughters of the house, a considerable portion of the furniture located on the basement floor was saved.

Began at the Top

The fire stared in the top floor, and from all accounts it had its beginning in the room occupied by a negro lodger. Rising about seven o'clock he lit the fire to cook himself a meal. After he had eaten and gone to his work the fire began to emit sparks, and it is believed one of these first ignited some paper in the room, and that in turn set the woodwork in flame. Certain it is at any rate that the fire began in that room. All unconscious of the danger the other residents of the house slumbered on. The flames got a hold of the pannelling and ate their way to the roof. A small blaze very soon served to indicate to outsiders that the house was on fire.

The Alarm and Rescue

Young Kelly who chanced to be on the spot noticed the flame and understood its purport. He at once raised the alarm and then phoned to the fire brigade. In a few minutes the house was in uproar. There were eight people in the house at the time, Mrs. Haudenschild her son and daughter, and five boarders. The daughter Sophie rose hurriedly, and arrayed in deshabile began to carry out the valuables and place them outside in safety. With the assistance of her brother and one or two of the other men she managed to save the piano and a large quantity of the other furniture on the basement floor.

In the desperate hurry they had not time to take them far, so the pieces were left at various distances decorating the undulating snow field.

A Leap for Life

One tall Frenchman who slept in the house did not hear the first alarm and one of his mates rushed up stairs through the volumes of smoke and spits of flame to rouse him. By that time the tall one was awake, and in a terrible state of exceitment. Through the dense clouds of smoke it was impossible to see anything and he came to the conclusion that the fire was working up instead of down. His only escape seemed to be by the window. He was a big man, in every respect. He threw the window open. Realizing that his only hope lay in a leap in the dark he gathered his courage about him, got on the outside of the casement, and threw himself trustingly to the earth. His luck was in. He alighted in the snow and sustained very little hurt.

Thought He Was Dead

Seen later by an Optimist reporter about his daring escapade, he smiled, and in his broken but pleasant way explained that it was his only chance of escaping from the burning house. He said he thought he was surely dead when he fell. In spite of that he is very much alive, though the fire means a loss to him of at least a hundred dollars which he had in clothes and cash.

A Cherished Trophy

Another of the men who succeeded in saving his skin and little more, was seen fondling a small book as if he cherished it more than all the world, which in a sense he probably did. He submitted the book to the examination of the inquisitive reporter who discovered that it was neither in his own nor in the owner's language. The owner modestly admitted his acquaintance with several tongues. To his mind English was easy, and he spoke it with considerable facility of expression to prove it; French was also easy but the Oriental languages he admitted were hard. He was a worker who had lost practically his all in the blaze, but it seemed to disturb his "lettered heart" less than the saving of the book.

Fire Apparatus Arrives

The house belonged to Mr. Haudenschild who with his family took up residence there early in the summer of last year. At the present time he is out of town and knows nothing of his loss. To the energy and thoughtfulness of his wife he owes what little there may be left of the family possessions.

The fire brigade though early on the scene was not able to do anything to save the building.

Two Feet Pressure

In the first place the men could not get to the seat of operations on account of the street being up in that particular vicinity. By taking a roundabout route they got within a hundred yards of the fire. From there they unwound their hose but when they turned it on the fire the water only squirted about two feet from the nozzle. The sight was pitiable to behold. The attempt was useless. In any case it is questionable whether any amount of water would have saved the house by that time. If there ever was a chance however that settled it. In a very short time the wooden walls of the house fell inwards with a crash.

Electric Plant Danger

It was a most fortunate thing that the morning broke calm and windless. The new electric power plant was only thirty feet away from the burning house and a breeze might have meant its utter ruin. The man in charge of the plant awoke with a start when the fire was at its highest, and in his own words did not breathe for quite a few minutes with anxiety. He dived into his clothes with a speed that put any protean artist to shame, and rushed out to gauge the chances of contagion. And it was with a sense of personal, almost of bodily relief, that he calculated upon the safety of the station.

Building Insured

Miss Sophie Haudenschild stated that the house and gear was insured. The exact damage is impossible to estimate, but it will cover several thousand dollars.

Had a History

The house burned down this morning was one of the oldest in the Vickersville district. It has known several tenants and was the scene of the first fatal blasting accident on the townsite when the little boy Nehring lost his life when a rock came through the roof.

Killed by Fall

Toronto, Feb. 1.—(Special)—A. C. Gibson, barrister, died to-day as the result of falling from a street car and alighting on his head last night. He was 49 years of age.

CITY MUST BUILD RETAINING WALLS

METHOD ADOPTED WILL NOT BE VERY COSTLY

Cost Will Be Ab ut $8,000 for Streets Now Being Graded but Walls Will Not Have Very Finished Appearance.

(From Wednesday's Daily.)

Evidently none of the property owners onstreets now being graded are going to undertake the building of retaining walls in front of their own lots. This plan it was thought would be generally adopted. Some property owners did go to the length of having plans and specifications prepared, but they went no farther, adn it is up to the city now to look after the job as a whole. The matter came up at the last ouncil.

Colonel Davis, the city engineer, in a full report explained five methods of constructing retaining walls. The one he recommended most would cost $229,000 and would be substantially constructed masonry of good appearance. The less expensive intermediate methods were described, and the last method which could be done without the employment of masons would cost $8,000. This method would give a retaining wall substantial enough, but lacking in appearance compared with the first method.

On this question Aldeman Hilditch was condemnatory. He could not favor the motion to adopt the report because he thought there was not money enough for the first rate scheme, and he didn't think the other methods worth undertaking. He blamed the situation on last council. Alderman Pattullo was surprised that Alderman Hilditch should take up this attitude in regard to the old council. If the responsibility for the present difficulty was on the old council how much of it rested on Alderman Hilditch himself? he asked. Alderman Hilditch was a member of the streets, works and property committee of last council Alderman Pattullo went on to say that while he favored the $229,000 scheme for retaining walls he did not think the city could stand it now, and he also did not think it fair to the owners west of the junction to make them pay for improvements over the whole section. The $8,000 scheme was not perfect but it would give a fairly substantial wall, and he did not think the city could afford a better scheme.

In Alderman Morrisey's opinion the whole matter could safely be left with the city engineer. The city had a good engineer, and the question might well be left in his hands. This view was supported by Alderman Clayton.

The matter to Alderman Newton seemed rather big to tackle all at once. He thought it would be better to leave it over until next week.

It was moved that the report be adopted and the fourth method recemmended with retaining walls be the one gone on with. The motion was carried, Alderman Hilditch dissenting.

A HABITATION AND A NAME

FIFTEEN STATIONS ON G. T. P. LINE ARE NAMED

The List Traverses a Hundred Miles so That Average Interval Is Short—Names of Prominent Officials Immortalized.

(From Wednesday's Daily.)

Fifteen of the new stations on the main line of the Grand Trunk Pacific have received their official baptism, and their titles now fixed for all time, have gained the approval of the G. T. P. dignitaries at Winnipeg and Montreal. The process of naming is much the same all over the world, whether the subject be a man or a thing. In no instance can they protest. In naming the stations one or two of the more prominent men connected with the G. T. P. organization in various branches have been immortalized. Among those whose names stand out conspicuously from the list are those of Phelan and Salvus. As most people know, Phelan is the name of the genial superintendent of the Dominion government telegraph department. Mr. Salvus is a prominent G. T. P. contractor.

The names of the stations are as follows: Sockeye 16.61, Tyee 21.28, Essington 26.49, Skeena 32.36, Phelan 37 61, Quintsa 46 41, Kosiks 52.62, Salvus 57.99, Hubert 62.14, Exstews 69.54, Shamos 75.31, Lakelse 82.30, Kitsum 88.36, Eddy 94.32, Copper River 100.29.

CULVERTS MUST BE CONSTRUCTED

IS EXPENSE TO BE BORNE BY GENERAL FUND

City Council Is Considering Matter Which Remains Unsettled—Alderman Newton Wants to Consult the People on the Subject.

(From Wednesday's Daily.)

About 130 men are at present employed on works for the city by the city engineering department. A considerable part of their operations consists in the building of culverts to deal with the drainage from wide areas in the central sections the natural outlet for which is being crossed by the new street grades. At the last city council the question of payment for these works came up. Is it to be done out of general fund or local improvement?

That it is chargeable to general fund is the opinion of Alderman Pattullo, but Alderman Hilditch favors local improvement. He told the council he believed that in paying more than $15,000 on this work out of general fund the city was breaking the municipal clauses act.

Alderman Pattullo thought it hardly fair that Section One owners should pay for work which is rendered necessary by the drainage water from higher areas.

Alderman Newton advocated that the people should be consulted before money was spent on any improvements of this sort.

The matter is still unsettled Acting Mayor Smith having suggested that the aldermen consider it further between now and next council meeting.

IS ANXIOUS TO FIGHT JOHNSON

ANOTHER "WHITE MAN'S HOPE" MAKES HIS APPEARANCE

Carl Morris, a Young Oklahoma Engineer With a Serious of Knockouts to His Credir is on the Warpath.

Another "white man's hope" has been unearthed in the person of Carl Morris, a young giant in Oklahoma, who has got a record of knockouts in his fights so far His backers are trying to arrange a fight for him with some of the big heavyweightism His ambition is to put L'il Arthur John Johnson to sleep

From what can be learned of the personal history of Morris, he was born in Kentucky on August 3, 1886 He worked on his father's farm until 1904 when he came to Sapulpa and applied for a position as helper in the roundhouse He soon became fireman on the road, and was promoted to the position of engineer

His First Fight

He served in that capacity faithfully until a little occurrence one day at Okmulgee, when a negro, who had some trouble with a brakeman on Morris' train, attempted to strike him Morris stepped down from the engine, and interfered, with the result that for a time it looked as if the brunette gentleman was going to need a glass carriage with black plumes Occurrences of this kind caused people who knew him to spread his reputation as a rough and tumble fighter

Carl began to think of taking up pugilism as a profession, and as soon as he learned that Jeffries had been defeated by Johnson, he asked for and received a year's leave of absence without losing his standing in the line of promotion by the Brotherhood of Locomotive Engineers, of which he is a member When he began training every railroad man working out of Sapupla became a Morris booster, so that the giant was soon heard of throughout the state

A Huge Fellow

It is probable that Morris has physical advantages over every other heavyweight in the world He is 6 feet 4 inches tall, has a reach of 80 1-2 inches, and he has trained down to 235 pounds. He weighed 200 last June He has never indulged in liquor or tobacco in any form and is a stickler for health rules He is married and owns a home in Sapulpa Ever since he disposed of Hart with two broken ribs, a fractured nose, and other injuries, Morris has been discussed all over the United States

In spite of his size and weight, Morris is said to be extremely fast and active It is rather interesting to compare such of his measurements as are known with those of Jack Johnson The two shape up as follows:

Age—Johnson 33 years; Morris 25 years

Weight—Johnson 205 pounds; Morris 235 pounds

Height—Johnson 6 feet, 1 inch; Morris 6 feet 4 inches

Chest—Johnson 40 inches; Morris 49 inches

Reach—Johnson 72 inches; Morris 81 inches

This gives Morris the advantage of 30 pounds in weight, 3 inches in height, and 9 inches in reach over the champion His normal chest measure is 9 inches greater than Johnson's and within 2 inches of what Jeffries' chest measures expanded

Morris has been in six battles, the longest four rounds

The following are the names of the fighters he has faced and finished:

Tim Hurley, knockout, third round
Ed Anderson, knockout, third round
Battling Britt, knockout, 1 minute 10 seconds
Jim Harper, knockout, third round
Marvin Hart, won, fourth round
Spike Kennedy, knockout, second round

After his argument with the fighting engineer, Hart is reported to have said:

"Morris is the best man I have ever met, and he will certainly whip many a good man inside of the next year"

How The Treaty Will Help Prince Rupert

After the appeals to ignorance by the corporation politicians in the Legislature who have pictured blue ruin for us all if the Federal Government succeeds in its efforts to rebate $7,000,000 taxes on the people's food, some pertinent facts about what the treaty will do to build up Prince Rupert are made necessary. These facts ought to have been expounded by the member for Skeena to his constituents and to the House, but instead that gentleman has gone to Victoria to join the corporation line-up to prevent the treaty being ratified. The facts are of paramount importance, because they concern the fishing industry, the most important of all our coast industries, and the one which shows most promise of development.

Last year the British Columbia salmon pack was 738,485 cases; 593,000 of the cases were of sockeye and the finer kinds of fish: the balance were of humpback and dog salmon. Our salmon pack looks very large until we line it up with the Alaska pack which last year totalled 2,391,000 cases. This indicates the possibilities of the market.

Although the British Columbia salmon is of a higher grade than the Alaskan salmon, the latter has been getting higher prices. For the finer kinds it secured $1 a case, and for the cheaper kinds 75 cents a case more than the B. C. salmon on the average. This was because the Alaskan salmon was "protected" by the U. S. Government by a duty of a cent a pound. That cent a pound, usually with a little more tacked on, was paid by the ignorant and oft-times poor consumer. Had he only known it, it was the hatefullest kind of tax. Usually he thought it patriotic, or believed that in some mysterious way the government paid it for him.

Under the proposed reciprocity treaty, that cent a pound is to be taken off the fish by the United States government, with the result that British Columbian salmon may be sold in the United States markets without being taxed. If present prices prevail, it will mean an added profit of 75c to $1 a case to the B. C. canners on all the salmon they sell across the line. What is more likely, the canner and the consumer will divide the price between them, to the advantage of both.

The ratifying of the treaty means that a new market for 2,391,000 cases of salmon is to be opened to the B. C. canners. Already John Wallace of Work Island near Swanson Bay is arranging to instal a 50,000 case plant if the treaty goes through; Mr. Goss of Knight's Inlet with a 20,000 pack last year, is arranging to instal a 50,000 case plant, while Desbrisay, the Prince of Wales Island canner, who had to close down his plant when the Island was ceded to Canada under the Alaskan award, is awaiting in Ottawa the ratification of the treaty in order to go ahead with a 35,000 case plant on the Island near Port Simpson. All along the coast, the canners are awaiting news that the tax on food is cast off in order to increase their plants, while those interests who profit most by keeping the people's food supply down, are moving heaven and earth—and legislatures—to prevent the treaty from passing.

The good effects of the treaty on our trade would not stop here. At present the cheaper kinds of salmon are not profitable to pack. Some canneries only pack them because it is the cheapest way of disposing of them. But there is a market abroad for cheap salmon, and if the treaty passes, the millions of humpbacks which now fill our creeks and bays each spring to the fisherman's disgust, will become the means of producing profits and revenue.

With free trade in fish, the Seattle fleet, will no longer have to take a six days' trip away from the banks to land their catch in Seattle free of duty. It will be more profitable for them to put into Prince Rupert, and tranship their cargos to the flyers, and return to the banks. The fishing and shipping industries of the coast on which so much of Prince Rupert's hope of prosperity is built will get a big fillip if the treaty carries.

The member for Skeena will have a lot to answer for on his return if he casts his vote along with the railway corporation interests at Victoria against free food and the upbuilding of the fishing industry.

It Is a Cruel Slander

Now that it has been admitted by the organ of the City Council that it is the deliberate intention of the authorities to perpetuate vice in the city by affording protection to those immoral houses whose proprietors have votes, the Moral and Social Reform Council of Prince Rupert would do well to take some action in the way of expressing their views of that policy. If they do not, their action in passing a vote of hearty appreciation to the authorities will be taken as evidence to support the claim that they are parties to the present arrangement of retaining the parlor houses.

While we have no communication from either of the reverend gentlemen mentioned whose names are quoted in such a manner as to lead the unthinking to believe that they coincided with the instructions to the Chief of Police, knowing that those instructions were intended to protect the parlor houses, the Optimist prefers to believe that the statement is a deliberate slander. Certainly to quote the incidental remarks of a local minister as justification for the policy of segregation is as cruel as it is unfair.

A Crest-Fallen Editor

For his action in insisting that the City Council cut $40 off a bill for advertising sent in by a member of the Council at last meeting, Alderman Pattullo is worthy of public praise. Had it not been for his watchfulness and courage, the bill would have been passed and would have formed a precedent for passing other overcharged accounts for advertising.

In this case the editor-alderman in addition to inserting the ordered advertising, printed over each a large and imposing looking crest. In some cases the crest occupied more space than the advertisement. For the space so occupied payment at the rate of $1.20 an inch was charged. The alderman's excuse when called upon for an explanation was that he thought it was customary to print a crest over city advertising.

Curiously enough last Saturday's edition of the Vancouver Sunset in printing a list of the newspapers which are alleged to have got government "pap" through advertising last year, had the Prince Rupert Evening Empire down for $647.50, and the Optimist for $166.40.

It looks as if those crests did good work last year with the Provincial Government.

Application For Hotel Liquor License For the Savoy Hotel

I, Alexander James Prudhomme of the City of Prince Rupert, in the Province of B. C., Hotelkeeper, hereby apply to the Board of License Commissioners for the said City of Prince Rupert for a hotel liquor license to sell intoxicating liquors under the provisions of the statutes in that behalf and the by-laws of the city of Prince Rupert and any amendments thereto, for the premises known and described as the "Savoy Hotel," situate on lots 13 and 14, block 33, section 1, in the city of Prince Rupert, to commence on the 8th day of March, 1911.

And I hereby agree that in case a license be granted pursuant to this application, that no Asiatic shall be employed or be permitted to be upon said premises other than in the capacity of a guest or customer, nor shall Asiatics be employed off said premises to do any work to be used in or in any way connected with said premises.

And I hereby agree that I shall accept said license subject to this agreement, and that any breach of this agreement shall render me liable to the penalties provided for in the Prince Rupert Liquor License By-law.

My post office address is Prince Rupert, B. C.

The names and addresses of the owners of the premises proposed to be licinsed are Alexander James Prudhomme, Prince Rupert, B.C., and A. V. Fisher, Prince Rupert, B.C.

Dated at Prince Rupert this 3rd day of February, 1911.

Each in His Own Tongue

A fire, a mist, and a planet,
A crystal and a cell,
A jellyfish and a saurian,
And a cave where the cave-men dwell.
Then a sense of law and beauty
And a face turned from the clod,
Some call it Evolution,
Others call it God.

A mist on the far horizon,
The tender, infinite sky,
The rich, ripe tint of the cornfields,
And the wild geese sailing by;
And all over the iowland and upland
The charm of the golden rod,
Some of us call it Autumn,
Others call it God.

Like waves on a crescent sea beach
When the moon is new and thin,
Into our souls great yearnings come,
Welling and surging in;
Come from the mystic ocean
Whose rim no foot hath trod,
Some of us call it longing,
Others call it God.

A picket frozen on duty,
A mother starved for her brood,
Socrates drinking the hemlock,
And Jesus on the rood;
And thousands who, humble and nameless,
The straight, hard pathway trod,
Some call it consecration,
And others call it God.

William Herbert Caruth

Penalised for Her Sex

Paris, Feb. 1.—Madame Marie Curie, who with her husband, the late Porfessor Pirrie Curie, discovered radium, was defeated today in her candidacy for membership in the Academy of Sciences, receiving but twenty-eight votes against thirty for Edouard Branly.

The candidature of Madame Curie for the seat in the Academy of Sciences once occupied by her husband, and after his death by the late M Gernez, has attracted international attention as the only obstacle to her election was the fact that she was a women.

Her brilliant work in scientific research is everywhere recognized as placing her in the front rank of scientists. In the discovery of radium she is genrally admitted to have had a greater part than Prof. Curie.

Honey Cakes

When making honey cakes for dessert bring one and one-half cupfuls of honey to the boiling point. Skim if necessary. Add one-fourth cupful of butter and cool. Add two cupfuls of pastry flour stirring it in carefully. Let this mixture stand overnight. When ready to bake stir in the yellow grated rind of one lemon two tablespoonfuls of lemon juice one-half cupful of chopped almonds. Add one-half teaspoonful of sugar dissolved in a little lukewarm water and bake in small round tins Ice when cool.

IN PRAISE OF WESTERN MEN

A WOMAN'S GENEROUS TRIBUTE TO THE MEN OF THE LAST BEST WEST---THE FLOWER OF THEM ALL

I am sure there is no other place in the world where a woman could undertake a journey alone—a journey of hundreds of miles—coming into contact with scores of men, and perhaps not one other woman, and meet with nothing but overwhelming kindness every mile of the way. I know women who have been obliged to travel alone as far north as the long trail stretches, and to this and that remote part of British Columbia—I have been to a good many out-of-the-way places myself—and I have yet to hear anything but praise for the men who follow the trails of the west and north. Fine manly fellows, all of them, every bit of conceit knocked out of them, gentlem n through and through. Beside hem what a silly, vain puppet the super-civilized Frenchman appears, likewise the insular Englishman trembling with the terror of being "cotched." The man of the northerly west will go to any amount of trouble for a woman and think it a pleasure. As for tipping a man who does one a service no matter how strenuous, I should as soon think of offering a tip to Earl Grey. The man who does many things to make your journey comfortable may be a millionaire mine owner, a bartender, a government agent, a stage-driver, a trapper, a medical missionary, or a prospector—there's very little diffe ence in the outward make-up, and most of the time you haven't any idea who he is. Whatever he does you must never forget that a man's a man for a' that! A tip! Heaven forgive you, for he will not. When you say good-bye you shake hands, whether he's the night watchman, the stage-driver or the government agent, and thank him as decently as you know how, showing as much civility as your mother ever taught you. In a certain district in British Columbia the men still laugh when the name of a very fashionable Englishwoman is mentioned—a peer's wife—who came to this country on a hunting trip with her husband. She blundered fearfully in he matter of tips, and patronized the wrong people (with the best intentions in the world) till the district nearly split its sides with laughter. It is too long a story to tell here, but she always pops into my mind when I think of tips in a mining country. The western man is the friend of all except those who abuse little children and animals (and they reecive short shrift). He can hold his own against any other men in the world because of his rugged strength and honesty, his youthful enthusiasm and generosity, and the wonderful kindness of his heart. Yes, the western man is the flower of them all.

STORY OF DR. BEATTIE NESBITT

Fugitive President of Farmers Bank Has Had an Exciting and Varied Career

The city of Toronto has had her due share of outstanding citizens and meteoric careers but it is very doubtful whether the last quarter of a century can show a stranger combination of force power versatility and organizing capacity than Dr. William Beattie Nesbitt sometime member of the Provincial Legislature candidate for local mayoralty honors president of the defunct Farmers Bank and at present absent under a cloud. He was never a man for the quiet uneventful life of the average medical practitioner. Indeed Toronto's lively political arena failed to afford sufficient zest to gratify his insatiable thirst for excitement as the citizens of Stratford Bracebridge and several other surrounding cities are quite ready to admit. The explosive doctor always managed to have half a dozen irons in the fire at one and the same time and the fact that his fingers—as well as those of an unsuspecting public—were frequently singed does not appear to have mattered greatly. He simply had to "do things."

Natural Brilliance

William Beattie Nesbitt B. A. M. D. was born on a peaceful little farm up in Oxford county some 45 years ago. At the age of 19 after completing a preparatory education at Pickering College he came to Toronto and enrolled as an Arts student in the University of Toronto taking up his quarters in the old University College residence. The man's natural brilliancy indomitable energy and erratic thirst for stir and excitement made him one of the features of the institution and his old classmates tell some remarkable tales of his own original ideas of entertainment. Even as a youth his strength was enormous and many of the muscular accomplishments attributed to his student days would be little short of incredible were it not for a few more recent examples.

Prodigious Spirits

He was proud of his great strength and delighted in showing it off. He could lift a man or what is probably something lighter a college undergraduate with each hand. He could do the Indian club exercises with a pair of heavy arm chairs. He liked to break things that others couldn't break. There was more tear than wear on the furniture in the old Residence and "breakage" was a heavy item in the monthly bills. In this matter of inevitable destruction Billy Nesbitt's battle—that's the highly appropriate college name for it—led all the rest. Chairs doors tables—these were only the small change of his prowess

Strong Man Stunts

Not long ago while up in the north country he entered a store in which a number of men were standing along a counter. In an excess of jovialty the doctor went right along the line picked each man up and set him on the the counter. There were some good sized men in the crowd but when he was through Dr. Nesbitt was ready o go back down the line and lift them down again.

Once while staying in Ottawa he declared his ability to throw an upright piano out of the window. His friends were doubtful. Dr. Nesbitt picked up he piano and carried it to the window ledge. His friends were willing to take the rest for granted.

Enters Politics

During the early nineties Dr. Nesbitt's political aspirations commenced to assume definite form. He formed a Conservative Association whose rooms on King street became a great rallying ground for the younger element of the party. During his first session in Parliament as representative for North Toronto which was coincident with the retiring term of Sir George Ross regime he was as usual very aggressive and his fiery speeches following the election of Sir James Whitney's Government indicated beyond question that he felt that he was entitled to a portfolio in the new Cabinet. This of course is modern history and as everyone knows the Premier found a way out of the uncomfortable situation by appointing Dr. Nesbitt to the vacant registrarship of West Toronto.

Sworn as R. C

An amusing anecdote went the round at the time of the doctor's taking office. Peter Ryan registrar in the adjoining constituency as thorough a Roman Catholic as Dr. Nesbitt was an Orangeman contrived to have the doctor sworn in on a Douay Bible. This fact coming to light afterwards naturally aroused Nesbitt's ho. Orange blood.

In High Finance

But mere politics did not suffice to keep the doctor busy During all these years he had been dipping into a variety of business ventures in the majority of which he as well as his friends came out losers. As a promoter and organizer he was without a peer in the city but his effectiveness ended. When it came to the actual operation of any manufacturing plant which his genius had organized his usefulness was at an end. Once the business was under way the speculative excitement and uncertainty waned and the "man behind" urned his attention to other more promising directions.

A Dynamic Force

It is common talk that he cleared $30 000 on a single mining deal in Cobalt and his connection with the now notorious Keeley Mine is said to have netted him considerably more. At any rate he has always been able to enjoy the little luxuries which his unique nature demanded and to keep a fine home in the city and a splendidly appointed "cottage" in Muskoka.

Another ambitious scheme which likewise went to the wall was the establishment of a linen mill—the first of its kind in Canada—in the little town of Bracebrdige.

Most of Beattie Nesbitt's troubles have come about because he couldn't sit still. Even at ten thousand a year he couldn't do it but cried out that he was getting too much money and too little work.

COAL NOTICE

CANADIAN BOOKS FOR 1910

A Review of the Past Year's Literary Output

A survey of Canadian literature for 1910 is somewhat disappointing to one looking for outstanding works of imagination. It is perhaps too much to expect epic poetry along with leaping trade and immigration returns, or novels of world-circling interest along with universal trading in town lots and mining shares. The fact is, the imagination of Canadians is wrapt up in nation-building, in bridging rivers, in threading mountain passes, in furnishing new communities with the necessities of existence. In spite of this spirit of materialism there is a comforting quality about the books of the year. We miss many of the great names of the past. Where are the poets of yesteryear? Roberts is writing animal stories a la Thompson-Seton; Campbell is diving into history and recently gave us an engaging book on the great lakes; D. C. Scott is silent, Stringer is writing detective stories, Frederick George Scott and Bliss Carman are still producing, though in essened quantity, and Carman has long been since an exile. Scott recently issued his collected poems, which by their dignity and beauty of poetic feeling assure him a permanent place in the Canadian chair. Carman's "The Rough Rider," published early in this year, suggested the maturity of thought that naturally comes with advancing years, with no fear of the old spontaneity and imaginative fervor. In place of the names of the older writers we have a new school of poets, who, though not publishing books, are familiar to us in the best periodicals on both sides of the line. Miss Pickthall and Mrs. MacKay are writing verse which, though different in character worthily succeeds the work of the nature-poets of a few years ago.

The fiction for the year furnished no sensations nor especially brilliant "dark horses." Miss Montgomery's "Kilmeny of the Orchard" buttressed her already high standing. Mrs. McClung's "Second Chance" was a marked improvement on the craftsmanship of "Danny." Robert E. Knowles in "The Handicap" struck a pace in writing of Ontario pioneer life that notably enhanced his reputation. At the close of the year Robert W. Service, the most popular poet Canada has had, bounded into the arena of fiction with 'The Trail of Ninety-eight," a gruesome, nasty account of the first gold rush to Dawson, but withal powerful and compelling. A little earlier H. A. Cody gave in "The Frontiersman" an account of pioneering in the Yukon along lines made familiar by Ralph Connor's earlier works. Norman Duncan continued his successufl description of Newfoundland fishing life for boys in "Billy Topsail & Co," while Arthur McFarlane, a new writer for boys, made a promising debut in "Rodney McGaw," a story of circus life. Marion Keith's new novel, "Lizabeth of the Dale," is another careful if not brilliant, interpretation of rural life in central Ontario.

The most marked advance was made in the less travelled fields of literature. Stephen Leacock burst into full flowe as a humorist in "Literary Lapses," the best we have had since Judge Haliburton, Andrew Macphail won international recognition for his brilliance in "Essays in Fallacy." A new western writer, Mrs. Arthur Murphy, was no less successful in a series of racy sketches entitled "Janey Canuck in the West." Prof. W. F. Osborne gave practically the only contribution to theology in "The Faith of a Layman." Considering the first-hand sources of information at their disposal, our politicians do little writing for public enlightenment. The exception this year was C. A. Magrath, who wrote a thoughtful volume on "Canada's Growth and Some Problems Affecting It."

Of history there was little and of biography still less. Dr. Arthur Wentworth Eaton's "History of King's County" was one of the few literary productions of the Maritime Provinces. A. F. Hunter's "History of Simcoe County" was a painstaking record of a romantic portion of Ontario. Of anthologies Mr. L. J. Burpee gave us several in tabloid form useful as far as they went, and Mrs. C. M. White-Edgar's "A Wreath of Canadian Song" is valuable especially for its record of the earliest Canadian verse. Frank Yeigh's volume of travel and description, "Through the Heart of Canada," is an accurate and well-written picture of this country, more especially intended for those who know comparatively little of it.

Last in and many respects most important of the year, is Goldwin Smith's "Reminiscences," edited by Arnold Haultain. Goldwin Smith had been for years our greatest stylist, and the facts here related in entertaining vein will be a storehouse for the historian for years to come.

SECOND TO NONE IN COAL LANDS

PREMIER M'BRIDE GIVES B. C. A REAL BOOST

Made His Claim Upon Reports He Had Received From All Parts of the Province—Coal Mine Amendment Bill Passed.

(Special to the Optimist)

Victoria, Feb. 2.—In the House last evening Premier McBride moved the second reading of the bill to amend the Coal Mines Regulation Act. He reviewed the coal mining situation in the province and stated that from the reports he had received from various quarters he had no hesitation in claiming that the Province of British Columbia possessed the largest coal measures in the entire world.

Prospectors returning from the northern parts of the Province had reported large discoveries of coal areas in the Peace River and other districts. The fame of the Crow's Nest was known the world over and he did not think it unreasonable to think that many other measures when fully developed would not be less famous.

He claimed that the bill before the House was modelled upon the English Act, intimating, however, that it was not the intention of the government to accept the suggestion of the member for Newcastle to allow miners to elect their own prospectors. That idea had been put into practice in Pennsylvania and it had not worked satisfactorily.

WILL HAVE SEVEN BOATS ON PRINCE RUPERT RUN

C. P. R. Orders a Duplicate of the Princess Adelaide for the Northern Run---C. N. R. Will Also Put Two Steamers on a Weekly Service

(From Monday's Daily.)

There is every probability that during next summer Prince Rupert, the seat of the great last west will have a daily steamship service with Vancouver and the south. This almost startling development is made possible by the announcement that the Canadian Pacific company has duplicated its order for another Princess Adelaide to ply between Vancouver, Prince Rupert and Stewart.

The Adelaide

The Adelaide was built by the Fairfield Shipbuilding & Engineering company and on her trials she made an average speed of 18.25 knots. She sailed from the Clyde on October 4, and arrived at Victoria on December 16. Captain Lindgren, formerly skipper of the Mexican liner Lonsdale, brought her out. She is 290 feet long, 46 feet boom and 17 feet deep. She is constructed of steel throughout, with cellular double bottom, two watertight flats and is practically unsinkable.

Perfect Replica

The order for the duplication was wired to the builders almost immediately the Princess Adelaide was seen in Pacific waters. Her style was so much above reproach and her utility so obvious that the company felt they could not do better than have her replica operating in the waters of Northern British Cloumbia for them.

Bi-Weekly Service

Of course it is possible that she may replace the Beatrice on the run just as the Adelaide has replaced the Charmer on the trip to Victoria, but it is regarded in shipping circles both in Prince Rupert and Vancouver that during the summer months at any rate when the trade of the coast is booming with the influx of settlers and the consequent output of material, that both the steamers will be run and will form a bi-weekly service in the same way as the Prince George and Prince Rupert of the G. T. P. are expected to do.

A Steamer Per Day

In this way the possibility of a daily service with the south looms promisingly upon the horizon. With the fleets of the G. T. P. the Canadian Pacific, the Canadian Northern, and the Union steamship vessel, the Camosun, there will be seven regular ships making this port with passengers and freight every week.

Conditions Improving

Of course by the time the promises of today are realized many changes may have taken place in the personnel of the coasting boats of the north Pacific but it is not at all likely that whatever alterations may be made they will be any diminution in the sevice. The forecast is based upon the present conditions, and although the ships may come and go it is not to be believed that the circumstances of trade and commerce will deteriorate, the reverse order of things being much the more probable eventuation.

Will Make Trade

The very fact that these great shipping organizations have seen fit to undertake the task of developing the trade of the coast of British Columbia by putting on a service which will be more than adequate for the present demands, is not only a huge advertisement for the Province, it is a stimulant that will inevitably bring about its own reward by facilitating the trade relations of the north and the south, and thereby developing the great and inherent resources of the country.

WILL BUILD NEW SCHOOL AT WEST END OF TOWN

School Board is Looking Ahead---Estimates for 1911 Provide for Three New Teachers, and Equipment of a Gymnasium at the School

(From Wednesday's Daily.)

The School Board of Prince Rupert is not letting the grass grow under its feet. They are looking ahead and endeavouring to make provision for the conditions that will be here within a very short time. At the last meeting of the Board estimates for $15,000 were submitted and passed upon.

The estimates provide for three more teachers, two in the public and one in the high school which it is proposed to inaugurate after the summer holidays. One of the other teachers will have to be engaged at Easter and the other in September.

In regard to the high school it is estimated that by September there will be from twelve to twenty pupils qualified for the work of the high school. For the first year it will be necessary to carry on the work of the high school in the new school, and with this idea in view the Board has provided in the estimates for three more rooms being furnished.

As an earnest of their intention to look after the physical as well as the educational side of their charges they have set aside $1,500 for the installation of a gymnasium and the proper fixing up of a playground at the new school.

The secretary of the School Board has been asked to write to Mr. Wm. Manson as M. P. P. for Skeena, to have one or two government lots at the back of Lynch's store placed on reserve for school purposes, as it is contemplated in the near future to erect a new school on that property if possible to accommodate the needs of the children of the west end.

A BEAUTIFUL HALF-BREED IS ARRESTED FOR MURDER

Town of Juneau Is All Excited---Believed That a Love Story is at the Bottom of the Death of the Mother of Selina Dowling

(Special to the Optimist)

Juneau, Feb. 3.—The town is all exceitement over an alleged murder. Selina Dowling, reputed to be the most beautiful half breed maiden in Alaska, was arrested today following an investigation into the cause of the death of her mother. The old woman died in terrible agony after eating three candle fish brought to her by John Harris, the Indian suitor for the beautiful Selina's hand.

While partaking of the fish the old mother gave a small portion of the alleged dainty to the dog. The effect upon the animal was instantaneous. It threw itself into paroxysms of agony, yelped and died in a few minutes. Startled by the sight the old woman became alarmed for herself but before she could do anything the poison gripped her. With terrifying grimaces and physical contortions she passed out of existence.

Selina has been arrested because it is believed that the murder, crude as it was, was a frame up between her and her lover to get rid of the old woman who would not hear of them coming together. Harris will also be arrested in all probability.

ADELAIDE IS HIGH AND DRY

RUNS ASHORE AT APPLE TREE POINT IN STORM

Wireless Message Is Reassuring—Only Resting on the Sticky Bottom—Hoping to Float Her at High Tide.

(Special to the Optimist)

Vancouver, Feb. 2.—The new C. P. R. steamer Princess Adelaide which arrived on this coast only recently, ran ashore at Apple Tree Point last night in a blinding snow strom. She grounded at ten minutes past ten. Immediately she struck all was confusion on board.

The weather had been so fierce that excitement. A few minutes of anxiety was all they had to suffer, however, for it very soon became evident that the vessel had sustained little damage. She was stuck high and dry on the Point. Apple Tree Point is about half way between Seattle and Port Townsend.

A wireless report received later says that the Adelaide is not damaged but is resting firmly on the sticky bottom. The officials are hoping to be able to float her at high tide.

FARMERS APPROVE

Saskatchewan Agriculturists View Treaty With Favor

Regina, Feb. 3.—(Special)—A crowded meeting of the Saskatchewan agricultural societies unanimously passed a resolution viewing with favor the reciprocal arrangements made by Canada with the United States.

MONTREAL WIND SWEPT

Worst Storm in Ten Years—Business Demoralised

Montreal, Feb. 3.—(Special)—The worst storm that has been experienced here during the last ten years is now raging. It set in at whirlwind pace about three o'clock in the morning and continued in unabated fashion all day long. The temperature is below zero and the wind is blowing at thirty miles an hour. Business all over the city is demoralised. People will not leave their homes for work. Everything is at a standstill.

William Garson Dead

Calgery, Feb 3 —(Special)—The death occurred here from pneumonia of William Garson, ex-City Controller of Winnipeg At one time deceased was a member of the Ontario governement.

BRIGHT OUTLOOK FOR CANNERIES

A MILLION AND A HALF SPENT ON EQUIPMENT

The Tin Plate, Solder, Etc., for Cans, Will Arrive from the Old Country in March—Greatest Preparations Ever.

(From Wednesday's Daily.)

British Columbia salmon canners in preparation for the canning season this year, which is expected to equal in results that of 1910, have spent over $1,500,000 for equipment and supplies. Tin plate, solder and lead for the salmon cans, boxes, nets and gear are all included in this amount which is about the largest ever put out by the canners of the province for their business in an "off" season. The tin plate for the greater part is coming from the old country on the steamers of the Holt and Weir lines, and will arrive early in March.

Although some of the canners had more equipment remaining at the close of the season last year than was anticipated, on the whole the year's results were regarded as very satisfactory. This year in the north a heavy catch is anticipated, although it will be one of the light seasons for the Fraser River canneries are now undergoing overhauling. By the advent of the fishing season in June they will all be in readiness for operations. Cannery hands will be sent north early in April to prepare the boats, nets and so forth. Although a good catch is expected, none of the companies are preparing to make additions as they had more equipment and room last year than they actually needed.

It was stated yesterday that the British Columbia Packers' Association had purchased about 35 per cent of the entire amount of supplies and equipment secured by the entire industry for the coming year.

A GREAT PACK OF SALMON

NEARLY TWO AND HALF MILLION CASES FOR 1910

The Largest Output Since 1902—Despite Enormous Output the Price Is Better Today Than It Has Been for Years.

The U.S. department announces the Alaska salmon pack for 1910 was 2,391,000 cases, the largest since 1902. Notwithstanding the enormous pack the price of salmon is better today than for years, particularly the price of the poorer grades of salmon, due a great deal to the literature issued by the government urging the use of salmon as cheap foodstuff.

STORM RECORD FOR FERNIE

ALL PREVIOUS ONES HAVE BEEN ECLIPSED

More Snow in the Pass Than Ever Before—Temperature Zero. Trains Running Very Late and Freight Tied Up.

(Special to the Optimist)

Fernie, Feb. 2.—All the previous storm records have been eclipsed here today. The storm fiend has been raging all day long and already a foot has been added to the snowfall which is the deepest that has ever been seen in the Pass. The wind is causing it to drift into high banks. The temperature has again fallen to zero. The freight traffic is tied up completely and in consequence the passenger trains are running from twenty-four to forty-eight hours late.

BOARD OF TRADE WILL BOOST CITY

ADVERTISING COMMITTEE APPOINTED, PLANS PROPOSED

Enquiries ' ill Be Met by Printed Facts Telli_g All About Prince Rupert. An Improved Postal Service Is Wanted.

(From Wednesday's Daily.)

Hundreds of enquiries from all parts of Canada, the United States and Europe come in to M. M. Stephens, the secretary of the Board of Trade of Prince Rupert. People contemplating settling here write asking about prospects People thinking about going into the rich interior territory write asking if they can purchase supplies, etc., in Prince Rupert reasonably. The whole correspondence suggests prosperity for the city and its merchants

Since the task of replying to these letters is getting beyond the power of the secretary of the board of trade, a meeting of the board was held last night in his offices to discuss plans for issuing the facts so often sought regarding Rupert in pamphlet form.

A campaign of advertising for Prince Rupert will be opened to extend even farther the range of enquiries, and a pamphlet covering the field of enquiry fully, will be prepared. The claims of the interior territory will be advantageously set forth, and the city itself will be fully dealt with. Facts, facts, facts—is the cry. Not pictures or fairy tales—just the things people want to know—the many things we have to be proud of about our city.

An advertising committee composed of the following members was appointed last night: W. P. Lynch, W. M. Law, J. G. Scott, R. A. White and G. W. Nickerson.

Other business dealt with last night involved some criticism of th. post office. The need for premises nearer the business section was emphasized. It was thought that a temporary post office should be put up soon, as the prospect of a permanent one seems remote. It was agreed that the postmaster is laboring under considerable difficulty and no criticism whatever was directed against him. But the delay in delivering mail to callers at the wickets, the difficulty of getting stamps or money orders while mail is being sorted, the charges for box rent, and the need for uptown mailing places were all mentioned as requiring attention.

It was suggested that the department at Ottawa be notified of the need for expansion in the present post office to meet the needs of the growing city, and meantime a committee was appointed to interview the postmaster and go into the whole matter. The members are J. G. Scott, R. A. White, G. F. Brandt and M. M. Stephens.

The Finance Committee for the year was appointed as follows: A. E. McMaster, J. H. Thomson and H. P. Wilson; also the By-law Committee, viz., F. Stork, W. Lynch, D. H. Morrison, W. Law and F. Mobley.

J. J. Sloan applied for membership and was admitted.

The Secretary is to take up the matter of a waiting room on the wharf and to try to get something done towards meeting this need. He will also look into the matter of local express rates which are thought by the Board of Trade to be exorbitant, and representations will be made to the various express companies.

A suggestion by A. E. McMaster tha a show case of grains, etc., the product of the interior lands, should be displayed on the wharf met with approval, and will probably take shape as the improvements on the wharf proceed.

CHIPS FROM THE HUMORISTS

"You say the elopement was sort of forced upon you?"

"Yes; after she came down the rope ladder her dad pulled it up"

"Well, I've had to fire the star who took the part of Eliza," said the manager of the Uncle Tom's Cabin company

"Why?"

"She insisted on wearing a hobble skirt and there was danger of the dogs catching and eating her up"

"Oh, nonsense; what is there hard about roller skating?"

"The floor"

"Are these socks all wool, young man?" queried the old gentleman.

"I—er—don't think so, sir," replied the new clerk "They are marked 'half hose' on the box"

Bub—Father, who was Shylock?

Father—Shame on you, Bub! Go study your bible!

Charles Frohman was praising a new French playwright

"He is a genius," Mr Frohman said "It is too bad that he writes such sordid and unpleasant plays

"A young girl was discussing one of his plays—her father and mother had gone to see it in Paris

"'Father,' she said, 'understood as much of it as he could, and mother as much as she chose.'"

Senator Elihu Root was talking about a tactless political move.

"It lost them the election," he said, "and it deserved to on account of its tactlessness.

"In fact, in this regard, it reminded me of the rich man who, in a wedding breakfast speech, where the bride and groom would be very poor, concluded with the words.

"And now, dear friends, one last remark. Don't throw any rice or old shoes at them. Send all your rice and old shoes to them after they get settled."

Sentence Sermons

Freedom is the right to choose the right.

Anaemia is often temporarily mistaken for virtue.

Revenge is better than a greedy kind of gratitude.

The more the tongue flows the less the head knows.

An ingrowing conscience drives many a man into sin.

They who talk much of dying are usually dead already.

Most of those who wan to go to heaven back out from dying.

No man ever followed a great ideal without getting a hard job on his hands.

When the pulpit gets into the poetic cloud it misses the man on the pavement.

Some folks never feel saintly until they have a chance to syndicate their sorrows.

—Henry F. Cope

MAXIMS OF MARK TWAIN

Truth is stranger than fiction—to some people, but I am measurably familiar with it.

Truth is stranger than fiction, but it is because fiction is obliged to stick to possibilities; truth isn't.

We can secure other people's approval if we do right and try hard; but our own is worth a hundred of it, and no way has been found out of securing that.

There are those who scoff at the schoolboy, calling him frivolous and shallow. Yet it is the schoboy who said: "Faith is believing what you know ain't so."

We should be careful to get out of an experience only the wisdom that is in it—and stop there; lest we be like the cat that sits down on a hot stove lid. She will never sit down on a hot stove lid again—and that is well; but also she will never sit down on a cold one any more.

Everything human is pathetic. The secret source of humor itself is not joy, but sorrow. There is no humor in heaven.

DON'T FORGET THE EAGLES' GRAND

MASQUERADE BALL

MONDAY - FEBRUARY - 6th.

AT THE KAIEN ISLAND CLUB ROOMS

If it's news, you will find it in The Optimist

SOCIAL NOTES

Mr. and Mrs. McCaffery returned by the Prince George on Wednesday from a trip to Southern California.

Mr. J. B. L. MacDonald of the Foley, Welch & Stewart company left on Thursday for an extended trip to Scotland.

The Queen Mary Chapter, Daughters of the Empire will hold a special meeting on Saturday, February 11, in St. Andrews Hall, when the reports of the various committees from the recent reception will be presented.

The Ladies of the Athletic Committee of the Kaien Island Club entertained the club members at a most enjoyable Five Hundred party on Thursday evening. The rooms were beautifully decorated and twelve tables of cards were arranged. Miss Barbeau won the ladies' first prize and the ladies' booby went to Mrs. Tite. The gentlemen's first was won by Mr. Wallace and the booby by Mr. C. Rogers. Shortly after eleven o'clock supper was served and then dancing was indulged in for several hours. Those present were: Mr. and Mrs. McCaffery, Mr. and Mrs. Sweet, Mr. and Mrs. Tite, Mr. and Mrs. Dawson, Mr. and Mrs. Anderson, Mrand Mrs. Frizzell, Mr. and Mrs. Arnold, Mr. and Mrs. Miller, Mrs. Wark, Mr W. Wark, the Misses Barbeau, Miss Lockhart, Miss Keeley, Miss Gleason, Mr. and Mrs. Stork, Miss McPhail, the Messrs. Rogers, Keeley, Orme, Helgerson, Wallace, C. Rogers, Nickerson, Harrup, George, Godsen, Boden and many others.

Mr. D. M. Moore has returned to the city after an extended trip to Eastern Canada.

Mr. J. Hartney of Vancouver spent the past week in the city.

Mrs. A. J. Morris entertained informally on Wednesday evening for Miss Mason.

Mrs. R. L. McIntosh gave a most enjoyable Bridge party on Thursday evening at her residence on Fourth avenue in honor of Miss Mason of Vancouver. Five tables were arranged for, and the ladies first prize was won by Mrs. Clements, while Miss Mason captured the ladies' booby. Mr. Tooker got the gentlemen's first and Mr. Cambie the gentlemen's booby. Among those present were: Mr. and Mrs. Clement, Mrs. J. Fred Ritchie, Mrs. Roberson, Miss Ellot, Miss Drummond, Miss Mason, Miss DuVernet, Miss Edmonds and the Misses Rochester, the Messrs. Agnew, Pitcairn, Hannington, Tooker, Wilson, Munro, Cambie, Clancy and Flewin.

Miss Rochester entertained at a small party Bridge on Tuesday afternoon. The first prize was won by Mrs. J. C. McLennan while Mrs. R. L. McIntosh got the second. Those present were: Mrs. A. J. Morris, Mrs. S. B. Johnson, Mrs. V. W. Smith, Mrs. D. McLeod, Mrs. Spain, Mrs. McIntosh, Mrs. McLennan, Mrs. Gilmore and Mrs. Clements.

There was a very pleasant dance given on Friday night in the McIntyre Hall. Among those present were: Mr. and Mrs. V. W. Smith, Mr. and Mrs. Pillsbury, Rev. and Mrs. James, Dr. and Mrs. Cade, Captain and Mrs. Johnson, Mr. and Mrs. Ward, Mr. and Mrs. Hugh Dunn, Mr. and Mrs. McMaster, Mr. and Mrs. A. J. Morris, Mrs. Tremayne, Mrs. Lamont, Miss Martin, Miss Milligan, Miss Kergin, Miss Mason, Miss McMaster, Miss Pinder, the Misses Dunn, Miss McNaughton, Miss Thompson, the Misses Rochester, the Messrs. Cambie, Hannington, Foster, Wilson, Ferguson, Ritchel, Titus, Browne, Crewe, Harrison, Tooker, McKnight, Newcombe, Hartney (Vancouver,, Mawer, Pitcairn, Crippen and Oakley.

COAL NOTICE

Queen Charlotte Islands Land District—District of Skeena

Take notice that I, John McLeod of Vancouver, B. C., occupation broker, intend to apply for permission to prospect for coal and petroleum on the following described lands:

1.—Commencing at a post planted at the northwest corner Lot 171 being the northwest corner marked J. McL. N. W. Corner, thence east 80 chains, thence south 80 chains, thence west 80 chains, thence north 80 chains to point of commencement.

Dated Dec. 23, 1910. JOHN M'LEOD

Advance Shipment of

Prints and Ducks

We are now showing about thirty designs in the new spring PRINTS---mostly in the lighter patterns, and also several designs in blue and white ducks. We sell the prints at 15c a yard and the ducks at 20c.

This is merely an advance shipment of a portion of our spring order for these goods and we are daily expecting to receive the balance containing the dark prints, etc.

In a few days we shall be through with our stock taking and we shall then have something to tell you about certain things that we are going to put on a Bargain table which will contain some prizes for those who see it first.
