THE ALL RED ROUTE

Premiers of Overseas Dominions Will Make Investigations on the Ground.

Island Will Be Visited and the Proposed Route Looked Over by Leaders

(Special to The Journal)

LONDON, April 4.—Sir Wilfrid Laurier, General Botha, Sir Joseph Ward and Premier Fisher, of Australia, have arranged to visit Galway on the way through Ireland in connection with the All-Red Route.

The visit is looked upon as a most important one as it may affect the general scheme of inter-communication among the different parts of the empire in carrying out this vast scheme for mail and passenger travel.

PREPARING FOR SPRING

The Westholme Lumber Company, as may be seen by the advertising columns, is preparing for a busy season in the building line. In order to be ready for all demands the company has made arrangements for very complete lines of materials in all classes.

Five million feet of lumber is being brought from the south by this enterprising firm in all classes and grades. This is but the beginning of other heavy supplies that are to be brought in so that Prince Rupert builders may not require to buy outside of the city.

The company has a splendid cement storehouse on its waterfront, and is making arrangements for hadling sand and gravel in an economical way, so that reinforced work and brick building may be done economically.

No firm is in such a favorable position to handle the trade in the lines suggested and builders would consult their own interests by conferring with the Westholme Company before placing orders.

CITY WEIGH SCALES

Alderman Newton Brought up the Subject at Last Night's Council Meeting

Objections Made to the Introduction of the System in Prince Rupert at Present

The question of weigh scales for the city was brought before the council last evening. Ald. Newton brought the subject up and pressed for action.

Ald. Newton was in favor of public weigh scales. By having such the public would be assured of getting the correct weight in coal, etc. He simply brought this up in order to introduce a discussion.

Ald. Hilditch said last year's council went into this but it was deemed advisable not to force its introduction at this time. He thought with the streets in the shape they were it was not a proper time to introduce this system. Under the bylaw at present a citizen could insist upon a verification of the weight.

Ald. Clayton felt that this was a move in the right direction.

His Worship thought the streets committee or the city engineer might be empowered to look into the matter.

Ald. Newton moved to have this referred to the city engineer.

Ald. Hilditch said he would oppose this. If this were carried into effect it would mean that the coal would be raised about 50 cents a ton as teams would have to travel so much farther to have the weighing done.

Ald. Newton was agreeable to having the motion amended so that the place for weighing should be in a central position.

Ald. Morrissey, from what he knew of the coal weighing in the city, felt convinced that there was no attempt to be dishonest on the part of the dealers. The quantities sent out were very small and he did not think it would warrant an officer being elected.

The motion carried.

CITY NOW CONTROLS WHOLE WATERSHED

Negotiations Conducted by Mayor Manson When South Results in Acquisition of Prince Rupert Power & Light Company's Rights at Woodworth Lake---Price Asked Last Year by Controllers Has Been Cut in Half---No other Records Exist to Interfere With Plans for Municipality.

Following close upon the announcement of the city engineer's plans for supplying Prince Rupert with an adequate water supply for domestic purposes, comes the further important move made by the council for the acquisition of the remaining rights over the Woodworth and Shawatlans Lakes. With this latest acquisition the city's rights are ensured to the whole of the water of these lakes with the watershed reserved for her use. The water is now held not for domestic supply alone but is also capable of being used at any time for power purposes.

The council last evening, acting on the advice of the city engineer, decided to purchase the whole of the interests of C. M. Woodworth, of Vancouver, and his associates in the water at Woodworth Lake. The price to be paid is $15,000 and with it goes sufficient water to develop over 1,800 horsepower according to the estimate of the city engineer.

CENSUS COMMISSIONERS

(Special to The Joprnal)

OTTAWA, April 4.—The commissioners who will be in charge of the census in British Columbia in June next include:

Comox-Atlin—John Bruce, of Cumberland, and Frank Mobley, of Prince Rupert.

Yale-Cariboo—J. M. Yorston, of Cariboo, and W. R. Knowles, of Vernon.

The record so acquired from Mr. Woodworth is that held by the Prince Rupert Power and Light Company, which was incorporated in 1907. Rights were acquired by the company to about eight miles of the water in the lake.

Sought Rights

Last year, it will be remembered, when a permanent water supply for the city came up, the question of acquiring these rights was introduced. An option was secured upon the rights of the company at $30,000, which the council was advised to take in order to secure a source of supply.

The contention of Mr. Manson then was that the government reserve for city purposes there was good and should be acquired in the regular way. Application was made through Mr. Manson and the water secured from the government, although Mr. Woodworth and his friends put up a strenuous objection to it, claiming the full right over the waters.

On the city securing its supply from the government, which the engineer estimates is sufficient to provide for a domestic supply for 60,000 people, there yet remained the rights of the Prince Rupert Power and Light Company over the remaining water.

The proposition was made that the city should still acquire this water at $30,000, but the time expired before action could be taken.

Expropriation proceedings were suggested in order that the city might be ensured a full supply. A difficulty stood in the way of expropriation, namely, that it could be for domestic purposes alone and not for supplying power. With a supply for 60,000 people, expropriation did not seem to be absolutely called for and the matter dropped.

Negotiations Opened

While in Victoria this winter, Mr. Manson entered into negotiations with the representatives of the power company looking to the acquisition of the water rights held by that organization. After considerable negotiation during which Mayor Manson is reported to have refused to consider paying $30,000 for the rights, the company agreed upon $15,000 as a price for withdrawing absolutely from the field, but below that figure they would not go. Failing a settlement the company also stated they were prepared to start work on a scheme of developing the power there.

The city council after considering the proposition agreed that in the city's interests the water should be acquired as with its acquisition all rights outside of the city are extinguished in the waters of the lakes. Arbitration, especially if the work wkas commenced by the company, would be expensive, as the full outlay by the company with the percentage added would have to be paid. The acquisition by arbitration proceedings would ensure the water only for domestic purposes also, which was a decided disadvantage. Now, by purchase the rights for power purposes are ensured.

Advantages Gained

The report of the city engineer which was read last night in connection with the report showed that 1,884 horsepower could be developed by this water. This is of importance to the city and may be used either by the city directly if the policy of municipal ownership is adopted, or it may be a revenue producer if a working arrangement is made with an independent company to use the water which the city has acquired.

From the standpoint of domestic supply also the city is in a much better position than it was formerly as it ensures a plentiful supply for a population far beyond the 60,000 mark.

The engineer also looked upon the acquisition as valuable from the fact that he conduit for the city water supply can be best laid below the water line on a sandy beach for a distance of one and one-half miles alongside one of the lakes. By the acquisition of the water rights this can be carried out, the level of the lake being made to conform to this arrangement. The question of floating the debentures for water purposes was urged also by the engineer, as an inducement for the acwould more readily take the debenquisition of this water as financiers tures where the whole of the water was under the control of the city than would be the case were only one-ninth of the water.

Engineer's Report

The report which was presented last evening recommending the acquisition of the water rights read as follows:

Prince Rupert, April 3, 1911.

To the Mayor and Council.

Gentlemen:—

As the members of the council are aware, negotiations have been in progress for the last two months with a view to acquiring the water records held by the Prince Rupert Power and Light Company on Woodworth and Shawatlans Lakes and streams and we now beg to report that arrangements have been concluded between the Prince Rupert Power and Light Company and the City to purchase all their water rights and privileges for the sum of $15,000. The transfers and records are now lodged in the Canadian Bank of Commerce, Prince Rupert, awaiting the payment of the above amount. Messrs. Bodwell & Lawson, barristers, of Victoria and Vancouver, have investigated the condition of the company's records and have attended to the necessary transfers and assignments to the City. Your committee might state in this connection, that the City had the right of expropriating this water but for a domestic supply only and not for power purposes. According to the report of Col. Davis, city engineer, a copy of which is enclosed herewith, it is possible for the City to develop over 1,800 horsepower for power purposes which would be of very material importance to the City at the present time in connection with our electric light plant.

While the three hundred inches which the City acquired last year direct from the government would have been sufficient water to serve the City for many years to come, yet it is felt that it was far better to have all the rights of the Prince Rupert Power and Light Company extinguished in order that no conflict might arise in the future and ensure to the City an efficient supply of water for all time to come as well as during the early stages of the City, obtain the use of the water for power purposes. This company was about to proceed with their plans of development unless some action was taken by the City to buy them out. Had they proceeded to install a plant and expend money, if the City should afterwards proceed by expropriation we should undoubtedly have had to pay for the cost of such improvements as they might have made. In concluding the purchase of these water rights now, we are undoubtedly getting it at a cheaper price than it could be bought in the future when improvements might have been made.

If we had proceeded by expropriation it is altogether likely that arbitration proceedings would have resulted in the City paying more for the water than we are now having to pay and then we would only have had the use of the water for a "domestic supply," while by closing the matter out now by mutual consent we have the right to use the water not only for domestic supply but for power purposes as well.

For the information of the council we wish to state that the Provincial Government has made a reserve of the whole watershed of Woodworth and Shawatlans Lakes for the protection of the water supply of the City of Prince Rupert.

We beg to recommend that the mayor and city clerk be authorized to issue a cheque for the sum of $15,018.75, payable to the Canadian Bank of Commerce and take up the water records and transfer now lying in the bank in connection with this matter.

Respectfully submitted,
(Signed) V. W. SMITH,
Chairman, Fire and Water Committee.

Engineer's Report

The city engineer's report, made while in Victoria, was also read. It was as follows:

Victoria, B. C.,
21st February, 1911.

Wm. Manson, Esq., M. P. P.,
Mayor of Prince Rupert,
Victoria, B. C.

Sir:—

Re Woodworth Lake Water Supply.

Judging from surveys I have made and data I have obtained regarding rainfall and run-off, I am of opinion that the waters tributary to this drainage system can be so utilized as to produce a mean flow of 76.13 cubic feet per second. Of this 8.4 cubic feet per second is the property of the City of Prince Rupert, the remaining 67.73 cubic feet per second belong to a private company, which also controls the water flowing into Shawatlans Lake. With the head available at Shawatlans this flow will produce 1,884 horsepower.

(a) The 8.4 cubic feet per second would supply a population of 45,000. It is quite possible that in twenty years the population of Prince Rupert will exceed this number, and in that event the acquisition of any additional supply from this source would be at very great expense.

(b) The City of Prince Rupert should have absolute control of the drainage area from which the water for domestic purposes is drawn, if a private Company had the right to proceed in this watershed with development for power purposes works would be undertaken to increase the supply which would certainly imperil the purity of the water.

(c) About one and one-half miles of the water conduit leading from Woodworth Lake to the City can be more economically constructed on a sandy beach just below the surface of the water along the south shore of Shawatlans, then along the rocky mountai nside above, this location along the lake shore is only practicable when the surface of the lake is lowered. This could be effected by blasting out a channel in the rapids at the outlet of Shawatlans, 36 feet in length, but in order to use this location it is necessary to acquire the rights of the private company.

(d) The water debentures when placed on the market will certainly be more attractive to prospective purchasers, if it can be stated that the whole run-off of the drainage area belongs to the City, instead of one-ninth to the City and eight-ninths to a private company.

(e) The acquisition of these rights would place within our reach 1,800 horsepower and it is quite possible might obviate the necessity for further extension of our steam plant.

These rights may be obtained by expropriation or direct purchase from the company. If expropriation proceedings are taken the water may be used for municipal purposes only, this would absolutely preclude the use for power and defeat one of the chief objects for acquiring it.

I have also reason to believe that the company will now accept a less sum than they would be likely to obtain if expropriation proceedings were taken.

I am firmly of the opinion that the rights of this company are worth very much more to the City of Prince Rupert than the $15,000 claimed, and I may say I am sustained in this opinion by Mr. Drewry, the chief water commissioner of British Columbia.

Yours respectfully,
WM. MAHLON DAVIS,
City Engineer.

Ald. Hilditch moved in favor of the adoption of the report, which was carried unanimously.

KILLED BY TRAIN

(Special to The Journal)

NEW WESTMINSTER, April 4.—Cut to pieces by a passenger train, the remains of Richard Johnson, a section foreman on the Great Northern Railway, were brought to this city yesterday, tied up in a blanket. The mystery in connection with his death is not solved.

TENDERS FOR POLES

Offers Received by the City for Supply Needed for the Plant

Tenders for 200 telephone poles for the city were received at last night's council meeting. These were as follows:

Andrew Malvin & Co., 35-foot poles at 10 cents a foot; 40-foot poles at 12 cents; and 55-foot poles at 15 cents.

Oscar Andrew, at 7 cents, 8 cents and 9 cents, respectively.

Frank Engle, at 9 cents, 10 cents and 13 cents, respectively.

They were referred to the finance committee.

MUST DELIVER GOODS

Express Companies are Brought Under a Rule of the Rating Commsision

Starting June Must Collect and Distribute Within Municipal Boundaries

(Special to The Journal)

OTTAWA, April 4.—The railway commission has issued an order in regard to the much-complained of "delivery limits" of express companies.

The judgment makes the collection and delivery within municipal boundaries compulsory starting on June 1, but gives an opportunity for the companies to ask relief in special cases.

THOUSANDS COMING

Record Number of Emigrants are Leaving Britain for This Continent.

Twenty-Four Thousand Left on Saturday and More Are Booked

(Special to The Journal)

LONDON, April 4.—Twenty-four thousand emigrants left the Clyde on Saturday for Canada and America, making a record. Thousands more are booked and the outlook is for an unprecedented number this coming summer.

MINERS ALL OUT

Six Thousand Men are Idle Along the Crows Nest Line of Railway

Only One Mine in the Whole District Is Being Operated by the Miners

(Special to The Journal)

LETHBRIDGE, April 4.—The miners are all idle in district number 18, United Mine Workers of America, and six thousand men along the Crows Nest line are out of work. The only mine in the district that the operators' association is working is the McGillivray Creek Coal and Coke Company, at Carbondale, near Coleman.

The mine was idle all winter, but the men went to work under a special arrangement made, by which the company's whole output is contracted for in Spokane, so that it cannot supply any shortage of the other companies.

A SERIOUS CHARGE

John Mosca Arrested After Firing Shot at Angelo Gregoria

Wounded Man Is Doing Well—Preliminary Hearing Will Be Held Tomorrow

Awaiting preliminary hearing on a charge of shooting with intent to murder, John Mosca is under arrest at the city lockup. The shooting took place on Park avenue last evening. Angelo Gregoria was fired at by Mosca, the bullet entering the man's hip. The details of the quarrel, which is believed to have arisen in connection with a drinking spree, will be brought out at the trial.

Gregoria was at once taken to the hospital where he is doing well. Mosca was arrested at his house on Park avenue by Special Officer Morrison and will be brought up for hearing tomorrow before Magistrate Carss.

There are a number of witnesses in the case.

The revolver believed to have been used was found in the house. It had one empty chamber. The bullet, which entered the fleshy part of the hip, has not been removed and will not be probed for unless necessary.

BACK FROM ATLIN

Judge Young returned a few days ago after making an official trip to Atlin where he held court. The docket was quite an extensive one.

On the way in, the judge encountered very severe weather and had a trying trip. His return was made under much better conditions, however.

Speaking of conditions in the Atlin camp, Judge Young says there is quite an optimistic feeling. The remarkable richness of the ore taken out of the Engineer group has had its effect on the place.

As he came out representatives of large financiers were on the way in with power to purchase the Engineer group if conditions satisfied them.

The judge is now holding court here. He leaves shortly for Hazelton and again for Atlin within a short time.

SPORTS

HAL CHASE'S START

When "Hal" Chase began playing with the Los Angeles team on the village green, he was the only boy on the field. The others were men. This gives a hint as to his early ability. But this is the tale of his first entrance upon a real league diamond.

It was the opening day of the coast league baseball season in Los Angeles, Cal., in 1904. A big crowd was out—20,000 fans—for California is a great baseball state. The first game was with Oakland, then as potent a drawing card in Los Angeles as the Cubs are in New York. Frank Dillon was the first baseman of the Los Angeles team, and he was considered the best workman about the initial sack on the coast. He was the star of the team, the idol of the fans; in short, the hope of Los Angeles.

The Pacific Coast league had been an outlawed organization, but in 1904 it had returned to the ranks of organized baseball. The Brooklyn club of the National league promptly drafted Dillon, as was its right. Still, the fans hoped that by some hitch or technicality Dillon might be able to play in this most important opening game. The management hoped that he might be able to play for he had no desire to leave his native state, and the idol and worship for the precarious road which a big league recruit has to travel. He was old in the game. He had no higher ambitions than to be a star in the Pacific Coast league.

"Better be first in the Pacific Coast league, than second in Brooklyn," was Dillon's sentiment.

So the stage was set for the opening game. The customary parade of players passed without the official scorer crediting anyone with an error. The band played a medley of American airs. The management was 'standing them in aisles." Dillon played with the Los Angeles team in practice. The bell sounded three times as a signal that the season was on. The umpire dusted off the plate, the Los Angeles pitcher threw a few to his catcher, and the first Oakland batter knocked imaginary clay out of his spikes with his willow stick.

Suddenly a messenger boy brushed through the crowd out upon the field. He walked to the Los Angeles bench and handed a telegram to the manager. The manager walked out to the plate and held a conference with the umpires. The first batsman, curious, ceased knocking clap out of his cleats and walked up to the plate. The other manager joined them. Players gathered around. There was keen suspense in the large crowd, and each man asked his neighbor, "What's the matter?"

The answer was prompt. The Los Angeles manager signalled for Dillon to come in from first. The telegram was from the National commission. Another club in a league of a higher class had claimed Dillon. He could not play with Los Angeles. The supreme court of baseball had decreed it, and the decree must be obeyed. Dillon could not play in the opening game.

The populace groaned.

Out in left field was a stripling sitting on the edge of the bleachers, kicking his heels. Passively he watched the discussion at the home plate, thinking that it concerned him not a scintilla. Suddenly his manager raised a finger at him. He slipped off his seat, took the chewing gum from his cap and ran to the bench. In a minute he was out on first base. His two-piece suit, bearing the words "Santa Clara" did not match any better than a man's principles and his habits. The crowd groaned when they saw this misfit going out to the position. Some of the gamblers—for they bet on baseball on the Pacific coast—began to hedge.

The game started. The infielders were nervous with the big crowd of the first day. Their enthusiasm exceeded their accuracy when it came to throwing. The stripling at first bat seemed to be the coolest one of them all. With one hand he pulled down balls 'way over his head. He dug them up out of the dirt.

In the first inning the spectators said he was as "good as Dillon"; in the second he was "some player," and in the third they exclaimed, "He's a wonder!"

In the fifth inning the youngster broke up the game with a triple with two men on the bags. The crowd went crazy. The great California public is no exception to the rest of the great American populace. It is fickle. Dillon was forgotten. The new hero misfit suit and all, had dethroned him. It was a case of "The king is dead! Long live the king!"

The new man was "Hal" Chase.

In a week Dillon was forgotten. Now he is only remembered as the man who 'Hal" Chase displaced. The next day Chase had a regular's suit. But he had made good in the misfit, which only goes to prove that you can't judge a book by its binding.

Now they call him the best first baseman that the game has ever known. Fans who have seen this wonder in action on the field know him as the ball player.

ENGLISH FOOTBALL

The semi-final of the English Association Football cup was played recently, Newcastle United and Bradford City being successful contestants for the final to be played at Crystal Palace on April 22. Newcastle are again the favorites this season judging from the way they trimmed Chelsea before many thousands Saturday, but as they have to meet an aggregation of their own league they will have to fight hard for their honors. Following are the result:

Newcastle United, 3; Chelsea, 0.

Bradford City, 3; Blackburn Rovers, 0.

Following are the reults of the league games:

First Division

Notts Forest, 0; Manchester City, 0.

Bury-Preston, North End, postponed.

Woolwich Arsenal, 3; Bristol City, 0.

Aston Villa-Tottenham Hotspur, postponed.

Sheffield United-Middleborough. postponed.

Manchester United, 0; Oldham Athletic, 0.

Liverpool, 2; Notts County, 1.

Second Division

Barnsley, 7; Bradford, 0.

Blackpool, 1; Huddersfield Town, 0.

Clapton Orient, 2; Birmingham, 1.

Derby County, 3; Burnley, 0.

Glossop, 2; Lincoln City, 0.

Leeds City, 1; Bolton Wanderers, 0.

Leicester Fosse, 3; Fullam, 2.

Stockport County, 1; Gainsborough Trinity, 0.

Wolverhampton Wanderers, 0; Hull City, 0.

Southern League

Brentford, 0; New Brompton, 2.

Crystal Palace, 1; Millwall Athletic, 0.

Bristol Rovers, 0; Queen's Park Rangers, 4.

Swindon Town, 1; Westham United, 4.

Exeter City, 2; Luton, 2.

Brighton and Hove, 1; Portsmouth, 4.

Northmanton, 0; Norwich City, 1.

Watford, 1; Southend United, 2.

Plymouth Orgyle - Southampton, postponed.

APPEAL LIQUOR CASE

VICTORIA—The city will appeal the judgment of Mr. Justice Gregory, rendered recently in the case of the City vs. Levy, a judgment which held that the city bylaw prohibithing restaurants and hotels from selling liquor with meals after midnight was ultra vires. At a recent meeting of the council it was decided not to make an appeal, but last night the council adopted a motion to reconsider the matter and the decision to appeal was arrived at, the city solicitor stating that the city has a fighting chance to win.

NOTICE.

A book is kept in the City Clerk's Office in which to enter the names and addresses, etc. of citizens of Prince Rupert desiring employment on City work. All desiring employment should register at once.

ERNEST A. WOODS,
City Clerk.

NOTICE.

Tenders will be received by the undersigned up to the 22nd day of April, 1911, at 5 p. m., for the purchase of Block 27, Subdivision of Lot No. 541, Group 1, New Westminster District, situated in the City of Vancouver, and being the site of the old Provincial Court House. Each tender must be enclosed in a registered letter and must be addressed to the undersigned, and plainly marked "Tender for old Vancouver Court House Site," and must be accompanied by an accepted cheque for ten per cent of the first payment of the purchase money. Payment for the property will be accepted in instalments of one-quarter of the purchase money. The first of such instalments to be paid within thirty days after the acceptance of the tender, and the other three annually thereafter, with interest at the rate of 6% per annum. In the event of the person whose tender is accepted failing to complete the first instalment within thirty days of the notice of such acceptance the sale to him will be cancelled and his ten per cent deposit forfeited. The cheques of unsuccessful tenderers will be returned. The highest or any tender will not necessarily be accepted. No commissions of any kind will be allowed.

WM. R. MOSS,
Minister of Lands.
Department of Lands,
Victoria, B. C.
March 7th, 1911.

NOTICE

TENDERS for the installation at the Prince Rupert School of twelve (12) Red Cross Sanitary Closets, furnished by the Government, will be received by the undersigned up to noon on Wednesday, March 22nd, 1911, for transmission to the Public Works Department. The successful tenderer will be called upon to furnish a bond in two sureties in a sum equal to 50 per cent of the contract price. Specifications can be seen at the Government Agent's Office, Prince Rupert. The lowest or any tender not necessarily accepted.

J. H. McMULLIN,
Government Agent.

NOTICE TO CREDITORS

Notice is hereby given that, pursuant to the "Creditor's Trust Deeds Act, 1901," and all amending Acts thereto, Harry Koenigsberg Brin, carrying on business under the name of the Brin Furniture Company at the City of Prince Rupert, B. C., did on the 24th day of March, A. D. 1911, assign to me for the benefit of his Creditors all his personal property, real estate, credits and effects which may be seized and sold under execution.

A meeting of the Creditors of the said Harry Koenigsberg Brin will be held at the office of Gault Brothers, Limited, 361 Water Street, Vancouver, B. C., on Monday, the 10th day of April, 1911, at the hour of 3 o'clock P. M. to receive statement of affairs, to give directions with reference to the disposal of the estate and the general ordering thereof. You are hereby notified to attend either in person or by representative.

All claims must be filed with the undersigned, verified by Statutory Declaration, and to entitle any Creditor to vote, his claim must be filed on or before the date of the meeting.

And further take notice that on and after the 10th day of April, A. D. 1911, the said Assignee will proceed to distribute the assets of the insolvent among the parties entitled thereto, having regard only to the claims of which he shall then have received notice; and that he will not be responsible for the assets, or any part thereof, to any person or persons of whose claim notice shall not have been received by him at the time of such distribution.

Dated at Prince Rupert, B. C., this 28th day of March, A. D. 1911.

THE WATER SITUATION

The decision of the city council to confirm the action of Mayor Manson relative to the purchase of the remaining water rights at Lakes Woodworth and Shawatlans, is undoubtedly a wise policy. It secures for the city a vast water supply, free from all private companies. This acquisition of water rights for $15,000 ensures to the city a splendid domestic supply and also an excellent power proposition. There are no other records on the lakes so that the city will be able to do as it sees best in the matter.

Opinions may differ as to the advisability of the power propositions such as light and tram services being owned by the municipality or by private companies, but in any event the city acts wisely in securing the rights at the lakes. The city is ensured of a source of supply that in these days of cheap power cannot be overestimated.

Mayor Manson has shown that his time was not wasted while he was in the south as far as Prince Rupert is concerned. That he has been able to make a bargain with the Prince Rupert Power and Light Company for $15,000, which was held by that company at $30,000 last year, speaks well for his business ability in advancing the interests of the city.

With water rights capable at a comparatively light cost of developing well on to 2,000 horsepower, Prince Rupert is placed in an enviable position. It can either develop the power if deemed wise or make arrangements with some private company to use the water in a power proposition. In any event the city should be able to control the situation so that here will be an opportunity to furnish intending manufacturers cheap power.

In a day like this when competition among the different commercial cities is so great, this question of power means much. Added to her other vast advantages the city is to have within such easy reach as to be considered practically in the corporation, water power to serve to a very considerable extent the needs of the place for some time.

The offer was one that was not open to being considered for any length of time. It had to be acted upon quickly. The council could not afford to turn down such a proposition and the business men of the city will undoubtedly endorse the action.

ALL-RED ROUTE

It should always be gratifying to residents of Prince Rupert to hear that the scheme of the All-Red Route is attaining importance and nearing definite shape. In the carrying out of such a scheme this port, it has always been felt, would play an important part. The National Transcontinental and the Grand Trunk Pacific combined must constitute the best railway across the continent of America. In the formulating of the All-Red Route with all that that scheme means, it has always been felt that the Canadian Government would favor the G. T. P. for the land end of the scheme as far as Canada is concerned. This has been recognized by those in close touch with transportation affairs for years and other companies have shown a disposition to fear such a condition being created.

The premiers of the overseas dominions are reported to have in view, looking into the situation as it exists relative to this scheme in Ireland.

When the time arrives for the carrying out of such a project along the magnificent lines contemplated by those favoring it, the Grand Trunk Pacific will be able to take its part in the proposition. Prince Rupert will be a port with unrivalled advantages in the way of shipping and on the great through route among the seaports of the empire its advancement must be phenomenal.

H. Ward, of the Ward Electrical Works, has gone south.

DIAZ BORN RULER

Opinion Expressed by Dr. J. A. Macdonald Editor of the Toronto Globe.

The Government, He Says, Is Republican Only in Name—Is Military Despotism

Rev. J. A. Macdonald, editor of the Toronto Globe and one of the best known newspaper men in Canada while in Victoria has given his opinion of President Diaz, of Mexico.

With some twenty of the best known newspaper editors in Canada and the United States Dr. Macdonald was invited to visit Mexico last September as the guest of President Diaz, during the Centennial celebrations of Mexican independence. From that trip he is only just returning by slow stages, having spent some time in Southern California recuperating.

Dr. Macdonald, in the course of an interview expressed a high opini n of Mexico's veteran president. Diaz, he says, is a wonderful man and a born organizer and ruler. But he says that Mexico's government is republican only in name; Diaz's "regime" is rather that of a military despotism, which, all things considered, has been a benevolent and a beneficent despotism, and has certainly been the saving grace of Mexican independence.

But, added Dr. Macdonald in one of his characteristically pungent phrases, "a government should grow out of the nation, not be put on like Saul's armor—and left."

Mexico's Need

The cardinal weakness in his otherwise strong and sound administration is that President Diaz has not "brought on" any young men to take up the reins of government after death should call the great republican leader from office. Each of his counsellors is a political Polonius. They are wise men, but old; old men who give good advice as a consolation for being unable to give good example. Dr. Macdonald spoke highly of Henry Clay Creel—who wears his nationality on his name—and of Finance Minister Limantour, "both able men, and dead straight."

President Diaz, says Dr. Macdonald, has failed to keep in touch with younger men. The consequence is that there is no one to succeed him, and carry on his work.

WHERE "CATGUT" IS MADE

Probably but a small percentage of the fishermen who use flies strung with fine translucent "catgut" are aware that the almost unbreakable substance that holds the hooks against the fiercest struglges of the struck fish, comes from silkworms.

The principal centre for the manufacture of this kind of catgut is the Island of Procida, in the Bay of Naples, but most of the silk worms employed are raised near Torre Annunziata, at the foot of Vesuvius. The caterpillars are killed just as they are about to begin the spinning of cocoons, the silk glands are removed and subjected to a process of pickling, which is the secret of the trade, and afterwards the threads are carefully drawn out by skilled workers, mostly women. The length of the thread varies from a foot to nearly twenty inches,

F. S. LONG, Manager.

The Fire Fighter

We cheered when they hoisted her onto the wharf,
With her beautiful varnished paint.
We saw that she wasn't no kind o' dwarf,
And she might need a bit of restraint.

When they swings the handle and starts her up,
"Let her go," says Bill to me,
"If I ain't mistaken, she'll buck a bit,
"Keep your eyes skinned, 'Sport,'—you'll see."

When he let in the clutch—this fancy bloke,
As they'd brought up from Vic. to drive her,
She just give a lep like a piston stroke,
Then stopped like a winded diver.

Well, he used some words as it ain t my place
To repeat in a yarn like this.
Then he ups with the Bonnett and shoves his face
In the works of that chrysalis.

He touched the fan and he felt the coil,
And tightened the nuts up better,
He cleaned the Magneto, and changed a plug,
And he tickled the Carburetor.

When she DID start off she was smoking some,
And the roar of her'd deafen an adder.
But never mind, boys, the engine's come
With her Babcock and hose and a ladder.

She won't go into the Fire Hall—
But that's the fault of the Builder.
Somehow the derned place seems too small,
But we'll wait till the night air's chilled her.

She stood in the streets or down in the shed
Of Prince Rupert's Construction Co.;
When her water pipes burst, they put her to rights,
Inside of a month or so.

When the fire broke out on Sixth and Third
And threatened the business quarter,
The firemen fought the raging flames,
Led on by McInnis and Porter.

But where was the Engine, Sir?—you say—
Why, she'd slipped into the muskeg
In front of the Bank and there she lay
Like a sat-upon-broken-bust egg.

She'd skidde daround from Fulton street
And crashed into Wallace's store,
She pitched the driver out of his seat,
Then backed with a rattle and roar.

She'd broken her gear loose and axle bar,
Her crankshaft was bent and twisted,
A caricature of the nine-thou. car
In the company's catalog listed.

Yes, sir; nine thousand's the price they paid
Of the citizens' hard-earned money.
She ain't worth a nickle, I'm much afraid,
But maybe they think it's funny!

When the fire was out—the boys fixed that—
There was some was for making a row,
"Let byegones be bygones," said Bill to me,
"We'll call her the Muskeg Plough."

PROTECTING SEALS

The conference between Great Britain and Japan, Russia and the United States for the negotiation of an international agreement for the protection and preservation of the fauna of the Pacific Ocean, will be held in Washington in May, according to the official announcement.

First consideration will be given the fur seals threatened with extinction unless international restrictive measures are adopted. The conference will take up the question of the adoption of the international game laws to protect sea otter and other mammals of the sea and also plumage birds and their breeding grounds.

Local News

The Ladies' Auxiliary of the Prince Rupert General Hospital, is preparing for a ball to be given upon the close of the Lenten season.

W. Luberich, charged with using obscene language on the streets, was brought before the magistrate today. He was remanded until tomorrow.

A sale of work will be held by the Ladies' Aid of the Methodist Church on Thursday, April 13. There will be a sale of aprons, home cooking and candies.

At last evening's meeting of the city council A. Johnson offered to do the roadway on Seventh avenue for 2½ cents a square foot and 4 cents a foot for hand railing. This was referred to the streets committee.

The property owners on Eleventh avenue petitioned the council last evening for a 16-foot roadway on that way, from Conrad street to McBride street. It was referred to the streets committee for report.

Last night shortly after midnight the fire department was called to the home of Mr. Bodie on First avenue, where a fire had broken out. The flames had got strong headway before the department arrived and while the building, which was only recently put up, was not was not entirely destroyed, little was left. Few of the contents were saved. The fire is supposed to have started in the kitchen. The loss was about $500.

DOES CANADA WANT THEM?

Bahama Island Residents Are Largely Blacks—Situation for Country to Consider

Members of the legislature of the Bahamas have voted by 26 to 6 in favor of political union with the Dominion of Canada. This is a compliment to Canada, but it is a case of where the gift horse must be looked in the mouth. The bulk of the population is black. The blacks have very limited political rights, and the legislature is based upon a restricted franchise, very different from anything in this country. The The admission of the islands to confederation would introduce political and social problems to which Canadians are now strangers. and and to which they will probably prefer to remain strangers. They see what the race problem means across the line, and they will be chary of importing it even to the slighest degree, no matter what the commercial compensation may be. The white people of the Bahamas would probably not agree to any extension of the political privileges of the colored population. Does Canada want a new province without representative government in the full sense? The offer of the Bahamas must be very strictly examined.

VANCOUVER WATER

A letter was read from the consulting engineer at the meeting of the Vancouver water committee in regard to the expenditure involved in the proposed new water supply from the Seymour Creek, and the installation of the new thirty-four-inch pipe. The total cost of the extension will be $563,062,50. The main items are: New Seymour intake, $10,000; supply main, north side of Burrard Inlet, $287,500; submerged mains and shore connections, $83,000; steel pipe, $107,000; engineering and superintending, $20,000. There is $200 000 on hand now, and it was moved by Alderman Stevens that tenders be called for steel pipe, tenders to be in by the first of May.

THE SAHARA DESERT

Scheme is Now on Foot to Make it a Great Inland Sea.

Revival of the Proposition so Often Put Forward by Scientists

Great interest has been aroused in Europe by the renewal of the project to change the Sahara Desert into a sea.

The author of this project is Professor Edmond Etchegoyen, one of the most distinguished engineers and scientists in France. He is in many ways comparable to Ferdinand de Lesseps, the projector of the Panama Canal.

The project is receiving great support from Mademoisele Etchgoyen, the beautiful and accomplished daughter of the professor. She is supporting the scheme with much energy and enthusiasm and through her efforts there is a serious prospect that it may be carried out.

In favor of the scheme it is said that it will restore a vast territory to civilization. Against it is urged the startling fact that it may upset the balance of the world.

The Sahara Desert is an immense depression many hundred thousands of miles in extent, lying generally from one hundred to a thousand feet below sea level.

It is for the most part useless, a menace to life and a hindrance to commerce. Its climate is absolutely unendurable, because it lies on and about the equator, below the sea level, and is shut off from the cooling winds from the north by the Atlas Mountains.

On behalf of the plan to flood the Sahara, it is claimed:

1. That it would render the territory surrounding the great inland lake habitable.

2. That it would furnish a safe and healty way of communication through Central Africa.

3. That it would give a comparatively moderate climate to this region, as moderate probably, as the north shore of Africa, lying on the Mediterranean Sea.

The lake could easily be formed, acording to the proprietors, by cutting a small fifty-mile canal from the Mediterranean to the Sahara through a certain part of the French African possessions. France is the country chiefly affected by the change, since the Sahara lies almost entirely within French territory.

The change might also be effected letting the waters of the Atlantic into the Sahara from the west coast of Africa.

Against the formation of the new sea the chief reason urged is that it would cause a dangerous change in the climate of Europe, the consequences of which no one can foresee. It is quite remarkable how many eminent scientists hold that this would be a grave danger.

Some go so far as to assert that the sudden shifting of so vast a body of water might shift the position of the earth's axis, thereby entailing a disturbance which might cause the destruction of all life on our globe.

The change would mean the shifting of countless million tons of water in the direction of the South Pole.

This, it is calculated might have the effect of shifting the South Pole away from the southern end of Africa toward South America, and the North Pole in a corersponding manner away from North America toward Europe.

That, apparently, would have the effect of changing Arctic Canada into a moderate climate and Europe into an Arctic land.

There seems to be no question that the creation of a new sea in Africa would seriously modify the climate of Europe. Every continent is dependent on conditions in the others. Scientists have recently come to the conclusion that the extraordinary floods and frosts from which Europe has lately suffered are due to the deforestation of America. France and England have both suffered abnormally from floods. Professor Camille Flamarion of Paris, is one of those who support this view, and another is Professor Bruckner, of Vienna.

"The flooding of the Sahara," says the distinguished Professor Mollendorff, of Munich, "would make the climate of France and Germany subarctic, while England, Belgium and Denmark would be almost uninhabitable. Some of the greatest capitals of the world would soon be quite deserted. Polar bears would prowl amid the icebergs and snows of what are now the splendid cities of London, Edinburgh and Brussels.

"The British Islands would be practically blotted from the map, since their people would become a savage people, clad in skins and drinking oil and eating blubber like the Eskimo. The picture is a strange one, yet there is something else that is stranger still. Serious-minded men of science have predicted something even worse, as a possibility, than a mere change of climate.

Suppose the channels were cut down through the hills and plains of Morocco to the verge of the vast, mysterious desert which lies beyond.

"There would come the moment for the cutting to be made on the edge of the Mediterranean—the moment when a tremendous explosion of dynamite would shatter the last barrier and allow the waters of the world's oceans to go thundering and roaring down the steep incline. The bursting of a reservoir, the breaking of a great dam is a fearful thing to contemplate; yet how trivial would it be compared with this great cataclysm, which would drain two million cubic miles of water from the seas and hurl them in one tremendous avalanche into the heart of a continent!

"Might not this sudden shifting of so immense a mass actually destroy the equipoise of the earth, the nice balance which keeps it adjusted on its axis?

"That is what the scientists have seriously asked themselves; and the question gives us an almost shuddering insight into the power of the human brain. It has seamed and scarred the world with lines of steel; it has linked river to river and sea to sea; it has levelled mountains and tunnelled under the river beds and even the channels of the ocean; and now it has within its power not merely to convert summer lands into Arctic wastes, but conceivably it might even destroy the earth itself and send us all whirling into scattered fragments through the infinite and awful reaches of everlasting space."

Not only the scientists are opposed to the project. The Moors, Kabyles, Riffs and other wild tribes of the desert and threatening to rise in arms against it.

The new sea will either flood them out of their dwelling places, or, at best deprive them of the opportunity to flee into the trackless wilderness when pursued

These wild children of the desert, who are quick to learn nowadays what is happening in the civilized world, have already heard of the Etchegoyen project. The first step to carry into effect will be a signal for a raid by them on the civilized settlements of the Mediterranean shore. They have already proved that they are dangerous antagonists in their wars with the French and Spanish, and a combined movement by them would be indeed a terrible danger.

It can be easily seen that consequences of great magnitude, which no one can foresee, are involved in this scheme. Professor Mollendorff argues that the more conservative and scientific method of dealing with the Sahara would be to reclaim it by irrigation. The tendency of civilization is to reclaim land from the sea rather than to abandon it to that element.

There is evidence to show that the Sahara was once more fertile and habitable than it is now. The oases, in many cases, appear to be relics of extensive countries. The great desert is believed to have been produced by the gradual spread of the sand beds and dunes, burying and destroying all life in their path.

If the oases were protected and extended, and irrigation practiced wherever possible, it is said that many thousands of miles of land might be rendered fit for cultivation. In an age when the sources of the world's food supply are being strained to the utmost this is an important consideration.

Agriculture has been made possible by irrigation over a vast area of the United States no better supplied with water than the Sahara. The great obstacle to be faced in the African desert is the shifting character of the sand, which moves in billows and other fantastic forms.

It would be necessary to construct sand shields on an enormous scale in order to make cultivation safe and permanent on the irrigated lands.

Experts, however, say that it would be possible to hold the sand in check, and the land thus reclaimed would be the best in the world for producing tropical fruits.

"Conquer this great land for civilization and humanity," they say, "rather than change it into a vast torrid sea, with malarial shores, which would alter the climate of Europe, upset economic conditions on the continent, and perhaps imperil the safety of the world."

WATER NOTICE.

NOTICE is hereby given that an application will be made under Part V. of the "Water Act, 1909," to obtain a licence in the Queen Charlotte Islands Division of Skeena District.

(a) The name, address and occupation of the applicant—Merton A. Merrill, Masset, Q. C. I., B. C., Prospector.

(If for mining purposes) Free Miner's Certificate No. .....

(b) The name of the lake, stream, or source (if unnamed, the description is)—I-in-tsua Lake, Tsu-Skundale Lake and Ain River.

(c) The point of diversion—At or near the outlet of Tsu-Skundale Lake into Ain River.

(d) The quantity of water applied for (in cubic feet per second) —1,000.

(e) The character of the proposed works—Power Plant, Dam, Flumes, etc.

(f) The premises on which the water is to be used (describe same) —At or near the mouth of the Ain River.

(g) The purposes for which the water is to be used—Generating power.

(h) If for irrigation, describe the land intended to be irrigated, giving acreage.....

(i) If the water is to be used for power or mining purposes, describe the place where the water is to be returned to some natural channel, and the difference in altitude between point of diversion and point of return—At or near the mouth of the Ain River, about 100 feet below point of diversion.

(j) Area of Crown land intended to be occupied by the proposed works—10 acres more or less.

(k) This notice was posted on the 28th day of November, 1910, and application will be made to the Commissioner on the 1st day of June, 1911.

(l) Give the names and addresses of any riparian proprietors or licensees who or whose lands are likely to be affected by the proposed works, either above or below the outlet—Don't know of any.

(Signature)
MERTON A. MERRILL,
(P. O. Address) Masset, B. C.

NOTE.—One cubic foot per second is equivalent to 35.71 miner's inches.

NOTICE TO CREDITORS

Notice is hereby given that pursuant to the "Creditor's Trust Deeds Act, 1901," and all Amending Act thereto, John Emmett Larkin, carrying on busines as a Retail Shoe Merchant at the city of Prince Rupert, B. C., did on the 28th day of February, A. D. 1911, assign to me for the benefit of his creditors all his personal property, real estate, credits and effects which may be seized and sold under execution.

A meeting of the Creditors of the said John Emmett Larkin will be held at the office of Lewis W. Patmore, Solicitor, Exchange Building, Prince Rupert, B. C., on Saturday, the 18th day of March, A. D. 1911, at the hour of 3 o'clock p. m., to receive statement of affairs, to give directions with reference to the disposal of the estate and the general ordering thereof. You are hereby notified to attend either in person or by representative.

All claims must be filed with the undersigned, verified by Statutory Declaration, and to entitle any creditor to vote his claim must be filed on or before the dateof the meeting.

And further take notice that on and after the 18th day of March, A. D. 1911, the said Assignee will proceed to distribute the assets of the insolvent among the parties entitled thereto, having regard only to the claims of which he shall then have received notice; and that he will not be responsible for the assets or any part thereof to any person or persons of whose claim notice shall not have been received by him at the time of such distribution.

Dated at Prince Rupert, B. C., this 4th day of March, A. D. 1911.

CHARLES B. LOCKHART,
Assignee.

LLOYD'S RISKS MANY

How the Company Operates its Business —Will Ensure Almost Anything.

Freak Insurance Has Kept the Name of the Organization Before the Public

The announcement that the pearl necklace, diamonds and jewellery of Mrs. Baldwin Drummond, valuend at $130,000, stolen from her stateroom on the Hamburg Amerika, were insured by Lloyds of London, which will be about $100,000 in case the missing gems do not turn up, recalls the chances that this organization takes on all manner of insurance.

Lloyds is not an insurance company as the term is known here. It is an association of individuals who are prepared to accept practically any risk, the various members, or groups of members, taking the chances, each according to his own views and the association itself not in any way assuming responsibilities for the individual risks.

Originally the organization undertook only marine insurance. In the days of the Georges the owner of a vessel would go to Lloyds' coffee house in Alchurch lane and his fellow merchants would sign their names under the policy and opposite the amount which each was prepared to pay in case of shipwreck. Hence the term "underwriters."

"Any Old Risk" at a Price

Gradually the underwriting custom began to be applied to risks other than marine, and the speculative habit was developed. Today, like the old underwriters, the various members are willing to consider "any old risk" and will accept almost any at a price.

The various forms of freak insurance that Lloyds have indulged in has kept its name in the public eye as much as anything. England, of course, has long been accustomed to it, but it was such insurance as policies against Black Hand outrages, taken out two years ago, and the losses resulting from the possible election of William Jennings Bryan, that drew the special attention of Americans to this practice of Lloyds, that one can be insured against anything from twins down through rainy weather to a cold in the head.

One hundred years ago or so the predecessors of the present Lloyds gambled on the fate of Napoleon. The policy was for one month at three per cent. This would be an ordinary risk today for policies on the lives of threatened monarchs are almost as common as policies upon delayed ships. Everybody remembers how in 1902 Lloyds took a big chance as to whether Edward VII would live long enough to be crowned King of Great Britain and Ireland and Emperor of India. Many men in Britain carry insurance all the year round on the life of the King. Some Wall street speculators, it is said, make it a practice to carry insurance on the life of the President because of the probable market upheaval that would follow the sudden death of the head of the nation.

Wars and the lives of crowned heads have always been the greatest source of Lloyds' policies outside of its legitimate business of marine insurance. Durin gthe period of continual disturbance in Europe between 1775 and 1815 not a cargo went to sea that was not insured against capture and during the more recent Japanese-Russian conflict the shipments of contraband to both parties were inevitably insured at Lloyds.

Elephant Insurance

Policies on the safety of valuable animals are common, elephant insurance especially being quite usual. One of the largest animal policies was on the life of the great Jumbo when he was brought to New York on a steamship.

Horses, too, are often insured at Lloyds. Nearly every stallion of importance on the Kentucky breeding farms is insured, and still a few years ago many race horses in training were insured, but a succession of losses caused an advance of premiums to virtually a prohibitive figure. The final blow came when James R. Keene's Highball broke his leg in a race and had to be destroyed. He was insurend for a very large amount.

Bank deposits are often insured, and the Prince fo Wale's jubilee stamps were insurend at Lloyds, a prominent firm of underwriters guaranteeing that the issue would be successful. It was. An odder risk was the insurance of a glass bed packed in twenty cases and shipped to an eastern ruler. One case was damaged and the undenrwriter had to pay in part. Gate money for cricket and football matches have also been insured, and a lot of money is made out of the vagaries of the weather. Lloyds bets large sums right along that it is not going to rain on a certain day. At the time of King Edward s coronation Lloyds insurend stand owners, decorators and florists, and lost, it is estimated, at least a million dollars by the postponement of the ceremony. On the other hand, the undenrwriters insured Queen Victoria's jubilee and her diamond jubilee, and as both took place according to schedule they made money on the outcome.

Paderewski on his concert tours takes out half a dozen different kinds of insurance, accident and health, and a separate policy on his fingers. Kubelik, the violinist, also keeps his fingers insured and Caruso and other grand opera stars carry insurance against colds and other maladies.

NEW DISEASE IN CANADA

"One of the worst effects of the chlorine treatment of Toronto's water supply is an epidemic of imaginitis." says Dr. Hastings, M. H. O.

Then he proceeded to hand out a few figures to prove it.

"There are 480 drops in every ounce of water. A pint holds 20 ounces. A gallon, therefore, would hold 76,800 drops.

The proportion of chlorine is one drop in 3,000,000 drops, and when you figure it out that means a single drop of chlorine to about 40 gallons of water, and it is very rarely that chlorine reaches the consumer. It is almost always taken up by the organic matter in the water before it reaches the tap."

Therefore, argues the M. H. O. don't worry about the chlorine in the water injuring your hair, your interior, or your plants.

NOTICE.

Tenders will be received by the undersigned up till 5 o'clock p. m., April 10th, for the supplying of material and labor necessary to number each and every building in the City. Material to be Aluminum. Tenders to give lump sum and must be made on form to be obtained from the City Clerk and must also be accompanied by a certified cheque for two per cent of the amount tendered. The lowest or any tender not necessarily accepted.

ERNEST A. WOODS,
City Clerk.

Oliver Typewriter

—FOR—

Seventeen Cents a Day

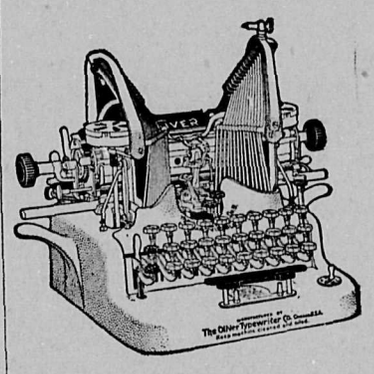
Please read the headline over again. Then its tremendous significance will dawn upon you.

An Oliver Typewriter—the standard visible writer—the most highly perfected typewriter on the market—yours for 17 cents a day!

The typewriter whose conquest of the commercial world is a matter of business history—yours for 17 cents a day!

The typewriter that is equipped with scores of such conveniences as "The Balance Shift"—"The Ruling Device"—"The Double Release"—"The Locomotive Base"—"The Automatic Spacer"—"The Automatic Tabulator"—"The Disappearing Indicator"—"The Adjustable Paper Fingers"—"The Scientific Condensed Keyboard"—all

Yours For 17 Cents a Day



We announced this new sales plan recently, just to feel the pulse of the people. Simply a small cash payment—then 17 cents a day. That is the plan in a nutshell.

The result has been such a deluge of applications for machines that we are simply astounded.

The demand comes from people of all classes, all ages, all occupations.

The majority of inquiries has come from people of known financial standing who were attracted by the novelty of the proposition. An impressive demonstration of the immense popularity of the Oliver Typewriter.

A startling confirmation of our belief that the Era of Universal Typewriting is at hand.

A Quarter of a Million People are Making Money With

The OLIVER Typewriter

The Standard Visible Writer

The Oliver Typewriter is a moneymaker, right from the word "go!" So easy to run that beginners soon get in the "expert" class. Earn as you learn. Let the machine pay the 17 cents a day—and all above that is yours.

Wherever you are, there's work to be done and money to be made by using the Oliver. The business world is calling for Oliver operators. There are not enough to supply the demand. Their salaries are considerably above those of many classes of workers.

"An Oliver Typewriter in Every Home!"

That is our battle cry today. We have made the Oliver supreme in usefulness and absolutely indispensable in business. Now comes the conquest of the home.

The simplicity and strength of the Oliver fit it for family use. It is becoming an important factor in the home training of young people. An educator as well as a money maker.

Our new selling plan puts the Oliver on the threshold of every home in America. Will you close the door of your home or office on this remarkable Oliver opportunity?

Write for further details of our easy offer and a free copy of the new Oliver catalogue. Address:

PEACE RIVER VALLEY

Arthur Stringer Writes on the Possibilities of This Great Farming Area.

That Country, He Prophesies Will Open up with Wonderful Rapidity from Now on

"The Peace River Valley is made up of sixty-five million acres of first class agricultural land, with a wheat growing capacity of what has been approximately estimated at 500,000,000 bushels a year,' says Arthur Stringer in Hampton's Magazine. "Not only can these northern plains and valleys grow wheat but they can grow wheat of the finest and hardest variety. They have done it; they are doing it now. They will continue to do it more and more, as those man-hungry acres are more and more invaded.

"That they are destined to be invaded is no longer problematical. For certain new truths have been evolved, not only as to the nature of the North but as to the nature of the cereals which it can grow. The farther north that wheat is matured for instance, the harder the berry, the whiter the flour, and the better the general milling quality. 'Number One Northern' has become a name to conjure with; it stands the aristocrat of the grain family. The same holds true of barley, oats and rye. The nearer the Aactic circle they can be grown, the longer and heavier the ear and the better the quality of the grain itself.

"For in this country you find a clear twenty hour day of undiluted sunlight, and what that sunlight can do to the softer, 'bleach'-demanding, lower grade wheat of the south was exemplified when, twelve years ago, soft wheat from southern Kansas was sent north to Fort Vermillion, a Hudson Bay Post on the Peace river, between 55 and 60 degrees north latitude. Here it was planted and replanted, season by season. A year ago this same Kansas wheat was returned to its native state where, after expert examination, it was put under the grading 'No. One Hard Spring Wheat.' Ten years of subarctic sunlight had toughened it into a berry of the finest and hardest quality.

"This subarctic north, in fact, needed only to be known to loose a great deal of its terrors. Over five hundred and fifty miles north of Canada's most northerly railway point, at Fort Providence on the Mackenzie river, on the fifteenth day of last July, Canada's superintendent of forestry, found wheat already 'in the milk,' potatoes in flour, garden peas fit to use, and tomatoes, turnips, rhubarb, beets, cabbage, onions and other vegtables in abundance.

"For years now horses and cattle have been kept at Salt River, at 61 degrees 30 minutes north latitude, more poleward than Chilkat village itself. For twenty-five years cattle raising has been carried on at Fort Good Hope, which actually stands within the Arctic circle. For over thirty years the practice of herding out horses has been an acknowledged success in the Peace River country, and about Lesser Slave range for years.

"Three years ago Mr. Conroy, of the department of Indian affairs, reported to a Canadian parliamentary committee th t he had found excellent farms in the latitude of 62 degrees 3 minutes—which is almost as far north as Iceland, farther north than the southern end of Greenland and some 800 miles north of the northern boundary of Minnesota—where he saw heavy crops of wheat, oats, barley and peas. Before he started south, on July 28, barley cutting was already under way. He reported all kinds of wild fruits in the country, with the exception of apples, which cannot be grown north of Edmonton. But even as far north as Fort Providence he picked with his own hands fine strawberries, raspberries blueberries and cranberries. And this is the territory which General Shermanonce contemptously designated as 'the frozen north.'

"This frozen belt holds more than grain and the posibilities of bewildering grain harvestings. Timber suitable for commercial purposes, grows right to the Arctic sea, with larch and balsam, tamarack and white poplar, birch and black and white spruce flourishing as far north as Fort Macpherson. Besides its itmber it has immense water powers going to waste, and natural gas fields simply waiting for the driller. It has copper and silver and gypsum, and galena and outcroppings of gold, the value of which cannot as yet even be gussed at. It has salt and fish in abundance. In sight even now it has tar and tar sand sufficient to manufacture enough asphalt to pave every street in every town in the Dominion of Canada. Its coal deposits are inestimable.

"The Dominion superintendent of forestry ,in testifying recently before the House of Commons agriculture committee, stated that on Slave river, near Fort Norman, he had discovered a bank of burning coal, some 20 miles in length, which the great Mackenzie himself had reported as being on fire in 1789!

"But this is only the outskirt, the remoter fringe, of the country in which the United States of America is at present so actively interested. The territory which has been swallowing up a half million of western American immigrants is that which lies closer to the international line and is made up of the provinces of Alberta, Saskatchewan and Manitoba."

COUNCIL PROCEDURE

Mayor Manson Introduces a Bylaw to Govern the Conduct of Business

Mayor Manson lost evening introduced a bylaw to amend the council procedure bylaw.

To introduce the bylaw he asked that Ald. Kirkpatrick take the chair.

On the second reading, His Worship explained some of the features of the new measure.

It proposed that the first meeting for the year should be in the evening instead of at noon as provided for in the old bylaw. It was also made to conform to the municipal clauses act in that the mayor was at liberty to vote on any question and not confine himself to the casting vote. There were other features intended to bring the council procedure more in line with the municipal clauses act. The basis for the bylaw was the one in force in Victoria where tnere has been a long experience under the general act.

The bylaw passed its second reading.

TO PRINT REPORTS

Tenders Received by Council for Printing the Financial Statement

The city council received tenders for printing the financial report of the last year, at the meeting last evening. These were referred to the finance committee for report. They were as follows: Journal, $58; Prince Rupert Publishing Company, $3.45 a page, the whole not to exceed $95; Empire, $3.50 a page, or $4.50 a page according to the style of publication.

The board of directors of the Prince Rupert General Hospital will meet at the Hospital at 4 o'clock tomorrow afternoon.

You Can Avoid This

by sending your Clothes to the PIONEER STEAM LAUNDRY

There are Many Reasons Why

IT IS TO YOUR INTEREST

We do first-class work and are careful with your Garments. We can do your work and return it within 48 hours if necessary. We call for your Laundry and return it to you. Should anything be lost or misplaced we will make it satisfactory. When your Laundry goes to the Chinks there are many drawbacks. When you send it to us your money helps pay WHITE LABOR.
