THE CITY PRINTING

Alderman Newton Raises a Discussion on the Question at Council Meeting.

Figures Submitted Showed He Got the Largest Share of the Work

At the Wednesday evening meeting of the city council a discussion as to placing of printing was introduced by Ald. Newton, who wanted information as to where the advertising of certain bylaws should be placed. He said there was an effort to direct business in a certain direction in the city and he objected to this.

Ald. Hilditch explained that the council this year and last year had placed the advertising of the bylaws with the Journal, which was a semi-weekly, because by that means a saving was effected over advertising every day. The question was one of economy for the city, pure and simple.

Ald. Newton then put forth the contention that if the council desired to effect a saving, the advertising could be done in the weekly editions of the dailies. He argued that there was a concerted attempt being made to throw business in certain directions. He moved to call for tenders to be let to the lowest tenderer.
to be let to the lowest tenderer on the bylaw it was then proposed to have advertised.

Ald. Douglas seconded the motion.

Ald. Hilditch pointed out that Ald. Newton never pointed this out when it was proposed to advertise the water bylaw and the G. T. P. agreement. Had he been so anxious to save money for the city, he could have made a saving of several hundred dollars to the city. The city was no charitable institution, and he for one was going to see that the money was not wasted.

Ald. Newton, keeping up his contention along the same line, charged Ald. Hilditch with throwing business in a direction which he thought would serve him.

The mayor said he was having a return prepared showing the distribution of the city business. He had asked for it some time ago but there was a lot of work in connection with it and it was not yet complete. The city clerk was asked, however to give the figures relating to printing.

A short recess was taken, after which the figures were produced, showing that there had been paid out to the different printing firms as follows:

Empire	$682.60
News	375.30
Journal	632.80
Premier Press	116.25

These figures, Mr. Woods pointed out, included work let by contract, which formed a large part of the work.

Ald. Newton thereupon argued that the figures showed that the distribution was not fair and that the News at least was not getting its proper share. His complaints did not apply to printing alone. The patronage was being parcelled out, as far as he could make out, to particular ones. A complaint was made that the grocery bills of the city were being placed with a few, and this not with the "favored bunch" from the view of the majority of the council.

The purchasing agent had admitted that the orders were being placed outside of him in large part. The only way to do the work was by open competition if this continued.

Ald. Hilditch was surprised at the figures as shown. The Empire, whether by tender or not by tender, got the largest share. It was a delicate question. As a limited liability company, Ald. Newton was able to do business with the city, while other members of the council were debarred from it. He was surprised that Ald. Newton brought this up in view of the circumstances. With respect to the placing of orders other than by the purchasing agent, he explained that this was done only where it was necessary in order to avoid a large waste of time by keeping men idle while supplies were got in the ordinary course. He was opposed to the principle of carrying on propositions by keeping men lying out of work waiting for orders.

Ald. Newton wanted to put the question to the members of the council or the employees as to whether he ever sought work from the city since he took a seat at this council.

Ald. Hilditch called Ald. Newton's attention to the time when the advertising of the bylaws, the hydro-electric and the G. T. P., came up. Ald. Newton had taken a course, which, if it was not soliciting the patronage, it came so near to it that it was difficult to distinguish. In order to save money in the advertising of these bylaws the council had proposed to have them published in the Journal, which appeared twice a week. Rather than lose his chance to get these, Ald. Newton had pulled down the price. That was coming very near to soliciting. If Ald. Newton had been so anxious to save money for the city, he could have saved several hundred dollars there.

Ald. Clayton said that he would be frank. He was not losing any sleep over the advertising of the News.

Ald. Hilditch said Ald. Newton was fighting for patronage, and he did not like to see an alderman fighting for patronage.

Ald. Newton said he was not fighting for patronage; he was fighting for satisfaction.

A little further discussion followed, during which Ald. Newton pointed out that a large part of his work was got by tender and also that this included a bill from last year.

While it was not pointed out on behalf of any other paper, not being represented at the board the same applied to the Journal.

Ald. Hilditch was perfectly satisfied to pass the motion to call for tenders and award to the lowest provided the legal requirements would be met with by publication in the weekly editions of the dailies.

The motion carried on being amended by Ald. Hilditch to this effect.

---o---

F. V. Clarke Acquitted

F. V. Clarke of this city, accused of forgery, has been acquitted at the Vancouver assizes. The accused, it was alleged, had forged the name of his roommate at the post office and thereby obtained money remitted from the Old Country. Mr. Clarke denied all knowledge of the forgery and has been acquitted.

LOOKING INTO NEEDS

H. S. Clements, M.P. is Visiting Different Parts of His Constituency.

He Is Now at Bella Bella Acquainting Himself With Conditions There

H. S. Clements, M. P. for Comox-Atlin, reached the city on Wednesday evening and left the following morning for Bella Coola. He is accompanied by on his trip by William Manson. The object of the Conservative member is to ascertain on the ground the exact needs of that part of his constituency so that he may be the better able to serve them in the House of Commons at Ottawa.

He will return to Prince Rupert spend a few days here, going into matters relative to this part of the constituency before leaving for the south again. He has to visit Alberni and Comox districts also before the House meets next month.

Mr. Clements is showing himself to be what was expected of him—an energetic and painstaking member. He is gathering the fullest information with respect to the riding and will be well qualified to see that Comox-Atlin is properly kept before the departments at Ottawa.

Accompanying him on this trip is Mr. Sproule of Vancouver, a brother of Dr. Sproule, M.P. of East Grey who is well known for his defence of Conservative principles.

Under the auspices of the Conservative Club of this city a smoker will be tendered Mr. Clements a week from tonight.

---o---

Superintendent of Police

Colin Campbell of the provincial police force has been given the position of superintendent of the force in succession to F. S. Hussey, who died a few weeks ago. Mr. Campbell has been with the provincial force for many years and has an excellent record. He has entered upon his duties at Victoria.

MADE RECORD TRIP

First Auto to Reach Hazelton Was a Flanders Driven by P. C. Sands of Seattle.

A Trying Route Was Covered but Machines Arrived in Good Shape at Northern Point

Last Thursday evening there arrived in the city, P. E. Sands and his Flanders "20" auto car, in which he made the first auto trip from Seattle to Hazelton. In doing this he won the gold medal offered by Challoner & Mitchell of Victoria. Accompanying Mr. Sands were W. F. Curtis of the Seattle times, who acted as photographer, and D. F. Batcheller, the machinist.

The trip was a trying one in parts, but Mr. Sands and other members of the party are loud in their praise of the country through which thel passed. They predict a great future for it and were very much taken with Prince Rupert. They left for Seattle by the Prince Rupert this morning.

Mr. Sands left Seattle on August 28, bearing a message from Mayor Dilling of Seattle to Government Agent Allison at Hazelton, and completed his trip in thirty-seven days, winning the gold Challoner & Mitchell trophy and the plaudits of the motor world. He reports that the only road along the route that is suitable for automobile traffic is the government road through the Cariboo district. Along the rest of the route the roads require much improvement, while the 110 miles between Fraser Lake and the end of the Bulkley road is impracticable, and he found it necessary to turn his party of four into a road gang, besides engaaing a couple of extra axemen to clear a trail for the car.

The Flanders used is a 20 horsepower, 4-cylinder machine, manufactured by the Studebaker corporation, for which Mr. Sands is the Seattle manager. Leaving Ashcroft the car, which weighs only 1,800 opunds, carried a load of 1,250 pounds, and although this weight was reduced in the course of the trip, the load carried by the machine speaks well for its performance.

On his arrival at Hazelton Mr. Sands received messages of congratulation from the Pacific Highway Association and from his firm. He presented Mayor Dilling's message to Mr. Allison, who warmly congratulated him on the successful ending of his notable journey, in the presence of a large crowd, which greeted the motorist and his party with hearty cheers.

At the Hazelton Hotel, on Thursday evening, the Business Men's Association tendered Mr. Sands and his party an banquet, at which was served the products of the district only. Sixty of the profession and business men of the town were present, and after discussing a repast which convinced the sceptical of the productiveness of this district, a long programme of toasts, speeches and songs was carried out, to the enjoyment of all.

Dr. H. C. Wrinch was chairman and Charles O'Neill toastmaster, with E. H. Hicks-Beach and L. L. DeVoin as vice chairmen.

MAY GO INTO GALLERY

Hon. George Graham Threatens That He May Take Seat in Press Room

"I shall re-enter public life and go back to the House," said Hon. George Graham in Toronto. "Friends have been very kind, and apparently want me to go back. I have been offered three seats in the West, two in Ontario and several in Quebec. On the other hand, I have received flattering offers to go into business and leave politics alone. I should never have thought of retiring, because we have to be in opposition now; but having been beaten makes a difference. Perhaps I will compromise by spending the first short session in the press gallery. Don't be very much surprised if you find me there among the boys."

Death of King's Printer

Col, Richard Wolfenden, I.S.O., V.D., who has been the King's Printer in the province since 1863, died in Victoria a week ago yesterday.

ENJOY BANQUET

Baptist Brotherhood Celebrate First Year's History in Enjoyable Way.

Popular Organization in the City Entertains Its Friends in McIntyre Hall

Last Tuesday evening the Baptist Brotherhood of this city gave its first anniversary banquet in McIntyre Hall. The event was a grand success. Under the guiding hand of Rev. W. H. McLeod, the pastor of the church, there has been an excellent club built up. It numbers now about one hundred members. The organization is carried on in a very democratic way, the members having the whole say in the management of it. While the social side is well looked after, the club has also given a great deal of attention to the athletic field. It was therefore a very capable body of young men who sat down to the banquetting tables on Tuesday evening. A few guests had been invited, including Mayor Manson, members of the press, C. W. Peck, W. J. Alder and others.

After a most satisfying repast, at which a number of the ladies of the church acted as waitresses, a toast list was carried through, with the president of the Brotherhood, H. W. Rogers, as toastmaster. He expressed the satisfaction which the members had in having present with them the guests who had responded to the invitation.

Throughout the evening good speeches were delivered in which the part that the brotherhood was doing in the advancement of the city was constantly referred to by the different speakers.

"The King" was proposed by H. W. Rogers and honored in the usual manner.

"Our Guests" was proposed by L. Hanson and responded to by Mayor Manson. "The Press" was introduced by Clyde Roger, who, on behalf of the brotherhood, thanked the local press for what it had done for them. The toast was responded to by S. M. Newton, J. S. Cowper and O. H. Nelson.

"The Ladies," proposed by George Johnstone, were well looked after in a response by F. A. Ellis. "Canada and Prince Rupert" was proposed by W. Mackay and responded to by W. J. Alder and C. W. Peck.

"The Baptist Brotherhood," proposed by N. McIntosh, was responded to by F. Cowles and Rev. W. H. McLeod.

During the evening Alex. Clapperton, J. E. Davey and H. Fletcher contributed musical numbers. Mr. McLeod also gave a recitation in which he introduced a splendid exhibition of impersonation. Alex. Gray presided at the piano.

The banquet was brought to a close by the singing of "Auld Lang Syne."

---o---

TRADE INCREASING

C. P. R. Will Maintain Summer Service on Its Line During the Winter

That traffic on the Pacific Coast is going forward at a rapid rate is evidenced by the fact that the C.P.R., owing to the extraordinary increases in the passenger traffic, will maintain throughout the coming winter practically the same service in effect during the summer months, and will also add two additional trains to take care of the local business between Winnipeg and Calgary, etc.

The Imperial Limited trains will make practically the same time during the winter months, arriving in Vancouver in time to connect with the boat for Victoria and Seattle. Eastbound train No. 2 will leave Vancouver at the same time as at present, 7:30 p. m., after the arrival of the steamers from Seattle and Victoria.

The Toronto express and Vancouver express train between Toronto and Winnipeg, which were established in June of this year, will be maintained throughout the winter months with practically very little change, leaving Vancouver at 9 o'clock.

This increase in service cannot fail to have its effect upon Prince Rupert, which promises to have the most active winter season this year that it has ever had.

DEATH OF MRS. STOVER

Wife of Well Known Resident of Northern British Columbia Passes Away Suddenly

In the death of Mrs. Catherine Stover, who passed away on Tuesday at the hospital, her friends in the city received a very severe shock. With her husband, E. L. Stover, she arrived from Hazelton several weeks ago and took up her residence here again, after an absence of some time.

About a week before her death, she was taken ill and removed to the hospital, suffering from an affection of the brain which quickly terminated in her death.

Mrs. Stover was only 26 years of age, and is survived by her husband and three small children. Coming from New Westminster, Mr. and Mrs. Stover were very early residents of Prince Rupert. Mr. Stover had interests on the Skeena and for some time has been a resident of Hazelton, returning to Prince Rupert, as stated, a few weeks ago.

Her mother and sister were sent for to New Westminster when hope for her recovery was despaired of. They arrived on the Prince Rupert Wednesday, the day following her death.

The body was taken south for interment this morning after services held in the Roman Catholic Church. Hayner Bros. had charge of the funeral arrangements.

Mr. Stover will return to Prince Rupert and reside here.

---o---

PORT SIMPSON WEDDING

Bella Bella Young People Are United in Wedlock by the Rev. G. D. Raley

A very pretty wedding was celebrated in the Methodist Church at Port Simpson Thursday evening, October 5, at 6:30 p. m., when Mr. Frank West and Miss Eva Campbell, both of Bella Bella, were joined in holy wedlock Rev. G. H. Raley officiated.

The marriage supper was served at the Mission House. The time honored toasts were proposed by Mr. Raley and Chiefs Dudoward and Wallace of Port Simpson and Mr. Kelly of Bella Bella.

---o---

MAYOR WILL RETIRE

William Manson Announces That he Will Vacate Office at End of Year.

Interviewed as to Intentions His Worship Says He Will Not Be a Candidate

Some attention is being attracted at present to the question of the city council for next year. There have been rumors for some time that Mayor Manson had no intention of seeking the office again next year and accordingly the Journal, two days ago, sought an answer as to whether there was any truth in the rumors that he would retire from the post of mayor.

Mr. Manson, in reply to the question, stated that his plans for next year would prevent him from continuing in office after the close of the present civic year and it was not his intention to be a candidate for the office of mayor next January.

This announcement by His Worship will be received with general regret in the city. He has made a good administrator and the city has profited by his experience and good business ability in the office he has filled. Mr. Manson seems to have made up his mind decisively and it would seem that he will not be induced to accept the office next year. A new mayor will have to be sought to serve the public next term.

---o---

Experienced Firemen

The fire and light committee of the city council recommended on Wednesday night that an experienced fireman should be added to the staff of the fire hall at a sayary not exceeding $90 a month. Ald. Newton expressed the hope that in making a choice a local man should be chosen. Aldermen Clayton and Kerr expressed their readiness to take a local man if a qualified one could be got, but they wanted efficiency in any event. A fireman will be advertised for.

CLEAR LAKE SHORES

Tenders are to be Called for Different Stations of the Work in Small Sections.

Good Timber for Use of the City Not Be Destroyed but Will Be Used in Sawmill

The city council has decided to make an early start on the waterworks system for the city. Colonel Davis, the engineer, on Wednesday evening, had a report ready showing ing the plans for the clearing about the lake. It showed that about 120 acres would have to be cleared on the shores of the lake in order to remove timber that would otherwise have a tendency to impair the water in the lake. He recommended that the council wait until the report of two cruisers that he had sent to examine the area reported upon the amount of timber that would be of service in the work.

Ald. Hilditch concurred with the report with the exception of the delay in the work. Colonel Davis was probably correct to a certain extent in advocating the delay. In view of the fact, however that the work would be much cheaper to do before the snow fell, he advocated starting at once. The Colonel wished to delay the work so that the timber that would be of use could be passed upon. It could be specified, Ald. Hilditch thought, that no trees should be cut that would be of use in the pipe line or other works.

Ald. Clayton agreed with the report in the main. He favored clearing all the land, cutting the yellow cedar and leaving it ready to be put to use.

This met with the approval of the council and it was decided to advertise the work. Some discussion followed as to station work in this kind of operation. The city engineer thought it would be difficult to carry clearing out as station work.

Ald. Douglas favored day labor.

The system of station work found favor, however, but it became a debatable question as to how many men should be allowed in a station gang.

Ald. Kerr argued that station work was really not comeptitive work. If it was put up to competition it became contract work.

It was suggested that the station men should be given the privilege of hiring additional men.

His Worship, however, explained that his understanding of the station system would be that all who were to work on any section would be jointly responsible for carrying it out. All were parties to the undertaking, and there was no hiring of men.

After fuller discussion, in which the advantages of the station system and the contract work was set forth, Ald. Hilditch moved to call for tenders on the five divisions of the work with ten men to a station, and also tenders for the work by contract.

The motion carried.

On the matter of advertising, His Worship suggested that as the fullest publicity was desired, the advertisements should be inserted twice in each paper in the city.

A motion was accordingly carried.

F. W. BOHLER WEDS

Well Known Fruit Rancher of Kitsumkalum Married at Central Hotel Thursday

F. W. Bohler, one of the best known ranchers of the Skeena River valley, was married yesterday at the Central Hotel. The ceremony was performed by Rev. F. W. Kerr of the Presbyterian Church.

The bride was Mrs. Jane Lever of Washeto, Ont. She arrived by the Prince Rupert on Wednesday, accompanied by her three children by a former marriage.

Only a few friends witnessed the ceremony in the parlors of the hotel. Mr. and Mrs. Bohler will reside on the fine ranch which Mr. Bohler has cleared for himself in the Kitsumkalum Valley and which produces some of the best strawberries that find their way to Prince Rupert.

Dated August 28, 1911.

WATER NOTICE

THE AIN RIVER DEVELOPMENT CO., LTD. of Prince Rupert, a Corporation, gives notice that it intends, on the 27th day of November next, at eleven o'clock in the forenoon, to apply to the Water Commissioner at his office at Prince Rupert for a licence to take and use 700 cubic feet of water per second from Ain River, a tributary of Masset Inlet, to be diverted at a point 2¼ miles above the outlet into Masset Inlet.

The water will be used at on near the mouth of Ain River for generating power for sale purposes.

It intends to apply at the same time for permission to store 75,000 acre-feet of the said water in a reservoir at I-in-tsua Lake.

The copy of such parts of the Memorandum of Association as authorize the proposed application and works are:—

(j) The construction or operation of works for the supply or utilisation of water under the "Water Act, 1909."

(k) To apply for and obtain, under the provisions of the "Water Act, 1909,' or to purchase or otherwise acquire, water records, or water licences.

(o) To construction operate and maintain electric works, power-works, generating plant, and such other conveniences as may be necessary for generating electricity.

(p) Producing power in any manner and of any kind.

(s) For rendering water and water-power available for use, application and distribution by erecting dams, increasing the head of water in any existing body of water, or extending the area thereof, diverting the waters of any stream, pond or lake into any other channel or channels, laying or erecting any line of flume, pipe or wire, constructing any raceway, reservoir, aqueduct, weir, wheel, building or other erection or work which may be required in connection with the improvement and use of the said water and water-power, or by altering, renewing, extending, improving, repairing, or maintaining any such works or any part thereof.

TAKE NOTICE that Harry Martin, of Vancouver, B. C., occupation artist, intends to apply for permission to purchase the following described lands:—Commencing at a post planted two and one-half miles north of the northeast corner of Lot 993; thence east 80 chains; thence north 80 chains; thence west 80 chains; thence south 80 chains, to the point of commencement; containing 640 acres, more or less.

HARRY MARTIN.
George S. Mayer, Agent.
Dated July 31, 1911.

Skeena Land District — District of Coast, Range 5

TAKE NOTICE that I, George M. Wilson, of Mountair, New Mexico, occupation farmer, intends to apply for permission to purchase the following described lands:—Commencing at a post planted at the northwest corner of Lot 698; thence south 70 chains, more or less, to Hell's Gate Slough; thence westerly along slough following edge of island around to point of commencement; containing 220 acres, more or less.

GEORGE M. WILSON.
A. Wilson, Agent.
Dated August 25, 1911. 9-26

Queen Charlotte Islands Land District—District of Skeena

TAKE NOTICE that Aimee Merrill, of Massett, B. C., occupation housewife, intends to apply for permission to prospect for coal and petroleum over the following described area:—Commencing at a post planted on the west shore of Kundis Island, Massett Inlet, five miles south of the most northerly point of said Kundis Island; thence east 80 chains; thence south 80 chains; thence west 80 chains; thence north 80 chains, to point of commencement; containing 640 acres, more or less.

AIMEE MERRILL.
Orland P. Merrill, Agent.
Dated August 28, 1911.

Queen Charlotte Islands Land District—District of Skeena

TAKE NOTICE that Margaret A. Merrill, of Chicago, Illinois, occupation housewife, intends to apply for permission to prospect for coal and petroleum over the following described area:—Commencing at a post planted on the west shore of Kundis Island, Massett Inlet, five miles south of the most northerly point of said Kundis Island; thence east 80 chains; thence north 80 chains; thence west 80 chains; thence south 80 chains, to point of commencement; containing 640 acres, more or less.

MARGARET A. MERRILL.
Orland P. Merrill, Agent.
Dated August 28, 1911.

Skeena Land District — District of Queen Charlotte Islands

TAKE NOTICE that Allan Orr, of Masset, B. C., occupation carpenter, intends to apply for permission to purchase the following described lands:—Commencing at a post planted three and one-half miles north and one mile west from the northwest corner of Lot 992; thence west 80 chains; thence north 80 chains; thence east 80 chains; thence south 80 chains, to point of commencement; containing 640 acres.

ALLAN ORR.
George S. Mayer, Agent.
Dated July 31, 1911.

Skeena Land District—District of Coast, Range 5

TAKE NOTICE that Thomas Stewart, of Prince Rupert, occupation accountant, intends to apply for permission to purchase the following described lands:—Commencing at a post planted 40 chains south from the southwest corner of Lot 1733; thence west 40 chains; thence south 40 chains; thence east 40 chains; thence north 40 chains to point of commencement; containing 160 acres more or less.

THOMAS STEWART.
John Kirkaldy, Agent.
Dated September 22, 1911. s26

Skeena Land District — District of Queen Charlotte Islands

TAKE NOTICE that Burton Vivian Brewer, of Vancouver, occupation clerk, intends to apply for permission to purchase the following described lands:—Commencing at a post planted about two miles north from the northeast corner of Lot 993; thence west 80 chains; thence south 80 chains; thence east 80 chains; thence north 80 chains, to point of commencement; containing 640 acres.

BURTON VIVIAN BREWER.
George S. Mayer, Agent.
Dated July 31, 1911.

Skeena Land District — District of Queen Charlotte Islands

TAKE NOTICE that Edgar J. Young, of Vancouver B. C., occupation painter, intends to apply for permission to purchase the following described lands:—Commencing at a post planted two and one-half miles north of the northeast corner of Lot 993; thence west 80 chains; thence north 80 chains; thence east 80 chains; thence south 80 chains; containing 640 acres.

EDGAR J. YOUNG.
George S. Mayer, Agent.
Dated July 31, 1911.

Skeena Land District — District of Queen Charlotte Islands

TAKE NOTICE that Margaret Merrill, of Chicago, Illinois, U.S.A., occupation housewife, intends to apply for permission to purchase the following described lands:—Commencing at a post planted about three miles west, and one-half mile north from the southwest corner of Lot 991; thence west 40 chains; thence south 60 chains; thence east 40 chains; thence north 60 chains, to point of commencement; containing 240 acres, more or less.

MARGARET MERRILL.
George S. Mayer, Agent.
Dated August 7, 1911.

Skeena Land District — District of Queen Charlotte Islands

TAKE NOTICE that Arthur W. Nelson, of Chicago, Illinois, U.S.A., occupation clerk, intends to apply for permission to purchase the following described lands:—Commencing at a post planted about 3 miles west and one-half mile north from the southwest corner of Lot 991; thence east 80 chains; thence south 60 chains; thence west 80 chains; thence north 60 chains, to point of commencement; containing 480 acres, more or less. ARTHUR W. NELSON.

George S. Mayer, Agent.
Dated August 7, 1911.

Skeena Land District — District of Queen Charlotte Islands

TAKE NOTICE that Frank Gray, of Blair, Nebrasaka, U.S.A., occupation farmer, intends to apply for permission to purchase the following described lands:—Commencing at a post planted about 2 miles west and ½ mile north from the southwest corner of Lot 991; thence east 80 chains; thence north 80 chains; thence west 80 chains; thence south 80 chains, to point of commencement; containing 640 acres.

FRANK GRAY.
George S. Mayer, Agent.
Dated July 29, 1911.

MAYOR'S RETIREMENT

Mayor Manson announces that he will retire from municipal politics at the close of his present term. During the year Mr. Manson has shown himself as competent as it was predicted by his friends he would be in the office of mayor. His influence has been felt in the general policy of the city to the advantage of the place. Through his efforts several questions of marked importance have been dealt with in a satisfactory way. If Mr. Manson could have seen his way clear to remain at the head of the city there is no doubt he would have received a very hearty endorsation.

His decision to retire, however, makes it imperative that another be found to take this important office. No rash choice should be made. It is necessary that a man well qualified for the office and one who will work in harmony with a representative council should be selected. There is still considerable time to decide the matter and a wise selection can be made.

CLEARING THE LISTS

As will be seen by reference to another page of this edition, there is an evident intention of cleaning up the provincial voters' lists by the striking off of all who have left the district or who have died.

That this is necessary was shown at the last election, where many absentees had their names on the list and caused confusion.

With no election in sight for a little time at least it is a good move to clean up the lists as is being done. Probably mistakes will be made and some whom it is proposed to strike off may be found to be living in the district. If they are they have the opportunity afforded of having their names retained.

DEATH OF COL. WOLFENDEN

The death of the King's Printer in this province, Col. Wolfenden, I.S.O., V.D., removes a civil servant that has retained the confidence of the succeeding legislatures for nearly fifty years. He has been associated with a department of the government which he has brought up to a high stage of efficiency. In the printing office of the legislative buildings there stands the old Washington press that first did service for the province. Starting in the most simple way, the printing office is now equipped for all kinds of press work and binding, the reports and books issued by the order of the legislature or the government being all completed in the building. In this connection it is a matter of the greatest satisfaction to residents of the province that the publications of the government printing office are admired wherever they circulate. In no small measure this is due to the example set by Col. Wolfenden.

The late official was a member of that distinguished company of the Royal Engineers that came out from England to this country by sailing ships and did such noble work in laying the foundations of the colony here. As all the engineers had to learn trades Col. Wolfenden had mastered the printing art. It was but natural that he should as the time passed be given the position he held since 1863.

He has been a faithful servant and during the whole of that time there has never been a suspicion of any kind that all was not being done in the interests of the province and without any attempt at graft.

Succeeding governments found in the King's Printer more than a civil servant. He was a personal friend of every member of the different governments and of the members of the legislatures. It was with an absolutely impartial hand that he dealt with all that had business with the office and his death will be felt throughout the whole province.

His death leaves but a very few of the original members of the Royal Engineers that came to British Columbia and laid the foundations of the province.

As a mark of respect to the late official the British Columbia Gazette issued an extra edition containing the announcement of his death.

THE FLAG

Attention has been called to the fact that on several public buildings where it is required that the national flag shall float the careless practice prevails of allowing the symbol of authority to remain flying all night. The practice may save trouble on the part of the employees, but it should never be allowed to continue. The time honored practice of hauling down the Union Jack at sundown should be followed wherever it is required that the flag shall fly.

CANADIAN MANUFACTURES

Growth of Establishments and Output Reported

One of the best evidences of Canada's growth is shown by the progress made in connection with her manufacturing establishments, says the Shareholder. As a matter of fact, Canada has grown in every way during the past quarter of a century. Her population has increased, the products of her farms, forests, mines, etc., have made wonderful advances, her bank clearings have gained, and her shipping has increased. An interesting comparison is shown by the growth in connection with our manufacturing establishments. In the year 1881 there was invested in manufacturing industries $165,302,623. In 1896, when the last manufacturing census was taken, this investment had grown to $846,585,000. Today it is estimated at $1,500,000,000. Thus in the period in which we doubled our population we increased our manufacturing investments by eightfold.

In 1891 the value of the output of the factories amounted to $309,676,068. This grew to $706,446,000 in 1905, and is estimated at over $1,000,000,000 today. In 1905 it had increased to $162,155,000, and today it is estimated at $234,000,000.

Taking individual industries into consideration, we find that a few of these, such as the steel, cotton, woollen and cement, have made wonderful strides in the past few years. About thirty-five years ago our annual production of steel amounted to $1,000,000. Twenty-five years later it was $52,000,000, while this year it is estimated at $70,000,00. In 195 the production of cement amounted to $2,271,000, of which 59 per cent was Canadian, and 41 per cent imported. In 1910 it increased to $6,414,000, or an increase in five years af about 200 per cent. Of this amount 93 per cent was Canadian made and only 7 per cent imported. A quarter of a century ago Canada had sixteen spinning wheel factories; today we have woollen mills and textile mills whose output is reckoned in the millions of dollars. In 1880 pulp was manufactured in Canada to the value of $63 303; today we have over fifty mills, using over 600,000 cords of wood and producing pulp to the value of $9,230,000. Other industries show a like growth, indicating that Canada is forging to the front as an industrial centre. However, the Canadian manufacturers do not begin to supply all the requirements of the Canadian people. Last year manufactured goods to the value of nearly $72,000,000 were imported into this country. Notwithstanding this importation of manufactured goods Canadians are becoming more and more self-sufficient in regard to manufactured articles. A large number of American and British firms are investing money in plants in Canada, there being at least $230,000,000 of American money invested in Canadian and British factories. This showing made by our manufacturers is a creditable one. They have advanced and grown with the country and today make a very creditable showing, not only in the volume of goods manufactured, but also in the quality of the material turned out.

WASTE LAND

Million Acres of Land Surrounding Portland Said to Be Worthless

Taking Portland, the centre of a district 120 miles square, going sixty miles to the north, south, east and west of the city, there is an area of at least 1,000,000 acres of cut-over brush land now practically useless, says the Portland Oregonian. That is an estimate so low as to be very far below the mark, for the entire area contains 14 400 square miles, or 9,216,000 acres. Taking out one-half for the mountains, rivers, hillsides and the marshes, there are left over 4,500,000 acres, and surely is below the actual amount to say 1,000,000 acres of this are unused, being either cut-over or grown up to brush and small and useless trees.

Practically all of this is as good land as can be found in the country. It contains in well balanced proportions all the elements going to make it as productive as any farm land in the country. And to insure its productivity it has an abundant rainfall, mild weather, the best of winters for late fall and the early spring plawing and an absence of severe winds, while cyclones and blizzards are unknown. In short, it is in every respect idea. farm land. But in addition to this it has a network of transportation lines, is traversed by several navigable streams, and above all, has one of the best markets in the west right at hand.

How is it that the great area of splendid land is lying used at Portland's very doors? The answer to this question is not difficult. It is the result of an adherence to antiquated methods of getting rid of stumps and brush and putting it into condition to plow and seed. If you will go to almost any man in the district mentioned and undertake to buy any of this land, you will find the price ranging from $25 to $150 per acre, according to the distance from town, from river or rail, or its accessibility by wagon roads. But when you try to ascertain the cost of clearing this land to plow depth you will find that no one can give you any information of a reliable character.

You will find many acres cleared where the cost has been as much as $250 per acre. You will be pointed to cases where the removing of a single stump has cost as much as $15. But you will find no man who will undertake to clear you five, ten, twenty or more acres at anything like the price you can afford to pay. Here, then, at Portland's very theshold lie 50,000 twenty-acre farm, each one capable of supporting in comfort, and finally enrichin, a family of at least half a dozen folk, and all because we are like the folk who followed, blindly, "the trail of the calf."

Much of this clearing will be undertaken at prices as low as $50 per acre, perhaps even less, and very little of it will run as high as $100 an acre. But remember, that heretofore there have been no organizations, no individuals ready to do this work except by day's labor—at an unknown expense.

As to what the clearing of these lands, and their consequent peopling, means to Port'and, we leave to conjecture. The reader can sum it up as well as we can. But when one considers that right at our doors we have the making of homes for 300,000 or 400,000 people, homes on as fine land as the sun ever shone upon, and that most of these lands will soon be on the market at reasonable prices, then we can begin to build prophecies and predictions on the Portland of the future.

MRS. RAMSAY MACDONALD

Death of Wife of Well Known Labor Leader in England Deeply Regretted

The death of Mrs. Ramsay Macdonald—wife of the noted labor leader—has occasioned wid spread sorrow and it is said that her husband feels his loss most deeply, says the Colonist.

Mrs. Macdonald was an able woman who worked with all her might for the good of the working women of Great Britain. At the same time she was a devoted, helpful wife and a loving mother. Mrs. Macdonald was related both to Hon. W. E. Gladstone and Lord Kelvin. She had just reached the prime of life and had been fifteen years married.

Mrs. Macdonald and her husband have been great travellers, having visited together every quarter of the Globe. In 1906 she was in Victoria and, with her husband, addressed the Trades and Labor Congress. She was entertained by the Woman's Council at the Driard and her clever speech and charming personality are remembered by those who met her. Even in those days, Mrs. Macdonald believed it to be the duty of women to take part in politics and advocated the extension of the franchise to them. But she was not one of those who waited for the possession of the ballot to bring about reforms which could be affected without it. The Montreal Witness gives the following account of the activities of this woman, who was not content to live at ease amid the want and misery around her.

She was a devoted wife and homemaker, and was the mother of six children, but she also found time to work in the interests of women and children outside her home. She made a special study of the conditions of sweated home workers, and she was an active organizer of the Sweated Industries Exhibition. She was at the same time a member of three committee of the National Union of Women Workers, and in connection with both these societies she did an ing investigations into the conditions of sho passistants, of laundry workers, the Truck Acts, and Street Trading. She gave evidence—the result of personal house-to-house visiting—before the departmental committee on Sweated Industries, and was thus indirectly instrumental in establishing wages boards, which have done away with the worst abuses in one or two industries. The undertook inquiry into the work of married women as wage-earners, and she devoted much of her time to the improvement of technical education, helping to establish the first trades schools for women. She also took an active part in the establishing of workrooms for unemployed women. She helped to form the committee on wage-earning children; and she worked on the national organization of girls' clubs.

While the conditions of women's labor were the subject of her special attention, Mrs. Macdonald worked with her colleagues of the National Union of Women Suffrage Societies for the enfranchisement of women.

Yet Mrs. Macdonald found time to make many friends, to whom her home was always open. Her place will be very hard to fill.

INTERESTED IN COAL

English Capital Has Purchased From Arthur Gowing on Graham Island

Arthur Gowing, a pioneer prospector on the Queen Charlottes, who located the well known Tasso Harbor copper proerty, has been in the city this week after a visit to Graham Island. Mr. Gowing, kho has large interests in several concerns now operating on the Queen Charlotte islands, has concluded a deal whereby an English syndicate secured thirteen coal claims lying near Slate Chuck. This property was controlled by Mr. Gowing, Captain Nash, T. R. Morrow and Wilson Gowing.

BORNITE ON DRIFTWOOD

Good Showing Is Reported Sixty Miles East of Hazelton

A big surface showing of bornite is reported to have been found at the head of Driftwood Creek, sixty miles east of Hazelton and fifteen miles from the railway. A group of fourteen claims has been staked by H. Gilmour, Angus Chisholm and T. Herlihy. Four of the claims are on the main lead, which is said to show a width of eight feet where stripped, and to carry peacock copper assaying over 100 a ton. Speciments of the ore were brought in during the week.

GOOD COAL PROSPECTS

Groundhog Mountain Measures Near Hazelton Give Excellent Promise After Season's Work

All reports from Groundhog Mountain coal fields indicate good ore and abundance of it. The statements as to the quality and extent made by J. McEvoy of Toronto to the Journal a few days ago are borne out by others who have visited the camp this summer and carried on operations.

Frank Jackson, locator of the Groundhog coal claims owned by the B. C. Anthracite Coal Company, and superintendent for that corporation, returned on Thursdays evening last from a hurried trip to the coalfield, whither he went to bring out the survey party which has been running the lines of his company's claims says the Omineca Miner. He also brought out three of his own crew, leaving a couple of men to work during the winter, getting out timber for the tunnels it is intended to run on several of the seams which have been prospected this season. Additional accommodation will be provided, in view of the increased number of men which will be engaged next spring. Mr. Jackson intends to leave for Vancouver within a few days, to perfect the plans for next season's work. He intends to go in over the snow in March, taking a large crew of miners and the necessary outfit and supplies, including two coal drills.

A. F. Kobes has returned from Groundhog Mountain, where he succeeded in securing valuable coal claims, having discovered and located an important extension on the west of the field. Those who have seen the showings on the ground say the exposures indicate large seams of good coal. Angus Beaton, who spent a part of the season in the district with Mr. Kobes, came out three weeks earlier. He is most enthusiastic in his opinion of the coal prospects.

Fred Hasler, who has spent a month in the Groundhog district, returned to town on Thursday. He prospected in the eastern extension of the coal field, and found the surface croppings of seams carrying the same character of coal as that on the properties of the large companies which are developing claims in the older portion of the district.

THE INGENIKA

Messrs. Jensen Back From the Gold Country After a Long Season

The gold rush in the Ingenica country some four years ago was recalled to mind when Messrs. Peter and Chris Jensen arrived in Hazelton after spending the spring and summer out there prospecting, says the Omineca Herald. These two old pioneers and prospectors went into the Ingeninica country last March with two Indians and four dog teams loaded with supplies. They remained there all alone and worked hard. They did not see a living soul all the season until they came out and Peter said it was the most lonely time he ever put in and he had been in the Klondike and Alaska as far north as any white man. Messrs. Jensen spent most of their time and did most of their work on the Ingeneca and McConnell Creeks and went over them pretty thoroughly. They say that there is a big gold body in there some place, but as yet they have not located it. They got enough this summer to pay them well but they have not located the big property.

The Ingenica country is very rough and mountainous and difficult to get through; consequently there are very few going in, and especially since the rush of four years ago. Then it is some 250 miles from Hazelton and the trip is pretty hard. On the way out Messrs. Jensen were told that last fall a white man passed through Babine and proceeded to Edmonton. He had with him some good good coarse gold. This spring he returned and was accompanied by two or three men, who were staying around Graham. They went up north to a country known as yet only to themselves. Whether they have located the main ore body is not known, as they would give no information. Messrs. Jensen will spend the winter in Hazelton and most likely they will return to their old stamping ground next spring again.

THE SILVER STANDARD

Sinking on the Shaft Reveals Excellent Ore in the Property

Sinking continues in the Silver Standard shaft and satisfactory progress is being made, a depth of over eighty feet having already been gained, says the Omineca Miner of Hazelton. The ore continues to improve in grade, that now showing in the bottom of the shaft running well up in the bonanza class. Early in the week specimens were brought into town and placed on exhibition, attracting a great deal of attention. Assays showed a total value of $798 a ton. The ore, of which there is reported to be a 30-inch streak in the shaft, is of the most attractive appearance, being composed mainly of gray copper, with some galena and a little zinc. The increasing values obtained as depth is gained make the property look like a money maker.

The Silver Standard is owned largely by a local syndicate, with Angus Stewart at the head of it.

—o—

C. W. Calhoun of Hazelton, who walked up from the end of steel, states the grade is in excelent condition for use as a road, and suggests the advisability of establishing a stage service between Newton and Hazelton.

—o—

Bitter experience is a wonderful teacher. No doubt the young lady had often been told that she ought to wear glasses, but had neglected or refused to do so. There was a most determined look in her eye, however, as she marched into the optician's shop.

"I want a pair of glasses immediately," she said. "Good, strong ones. I won't be without them another day."

"Good, strong ones?"

"Yes, please. I was out in the country yesterday and I made a very painful blunder which I have no wish to repeat."

"Indeed! Mistook an entire stranger for an old friend, perhaps?"

"No, nothing of the sort. I mistook a bumblebee for a blackberry."

MARINE NEWS

WINTER SCHEDULE IN NORTH

Beginning on or about November 1 the time-stained custom of operating daily trains over the White Pass Railroad will be relegated to the shades of the past for the winter months and until the pussy willows bloom again, is the way the White Horse Star describes the change of schedule in the north. It continues: So long as Old Bory shakes his hoary mane and the wintry winds bellow and moan o'er Yukon's ice congealed bosom, there will be but three trains weekly between the Rapids City and Skagway-by-the-Sea.

According to the new schedule, trains will leave both terminals Mondays, Wednesdays and Fridays. On Tuesdays, Thursdays and Saturdays the train crews may sew buttons on their clothes and commune with Nature.

But laying jokes and clothes aside the winter schedule is a sensible one and will serve the people very satisfactorily. We wil alter our milk schedule to conform to that of the railroad, draw our chairs nearer our airtight heaters and cultivate the acquaintance of our wives and children for the next six months. The only hardship that will be worked by the new schedule will be on the railroad crews, all of whom have their homes in Skagway, and as they will be working at reduced wages for the winter and away from home half the time, they may not be expected to contribute very largely to our foreign mission fund.

Those London and Chicago offices of the railroad company are institutions that must be fostered and cherished and Whitehorse proposes doing her share toward their maintenance, even if she has to carry her winter milk from Skagway afoot.

"As the wretch looks o'er Siberia's shore,
When winter-bound the wave is."

FRENCH COMMERCE

Unsatisfactory Showing Is Reported for the First Eight Months of the Year

The result of French commerce for the first eight months of the year 1911 up to the end of August, the the official returns for which period are just published in The Journal Officiel, are not very satisfactory. It shows that imports have increased no less than 965,250,000 francs, while the exports have decreased by 109,690,000 francs.

The bad harvest of last year is said to be partly responsible for this result and as a consequence France has been obliged this year to purchase 670,000,000 francs of foodstuffs more than she did in 1910, while her sales of the same class of products have been 127,000,000 less than last.

The official returns of the cereal harvest which are now to hand for 1911, in consequence of the special action of the government, will restore confidence somewhat and a change may be expected in the near future, for the report shows that the cereal crops have produced this year year 110,772500 hectolitres as against 90,801,300 of last year.

This will practically supply the entire needs of France and put a stop to further importations, which, since the beginning of the present year, have amounted to as much as 30,000,000 hectolitres of corn alone.

The figures relating to agriculture are somewhat special this year, but it must be noted also that those relating to ordinary foreign commerce are somewhat disappointing, for they show similar results—increase in the amount of importations and a large decrease in exports.

Several reasons are given to account for this state of things. It is considered among others that the recent railway strike in England caused an immense loss to French business, also that the great rise in the price of foodstuffs throughout the country and the disturbances following thereon have had the effect of greatly limiting the general commercial output.

—o—

Bridget and Pat were reading an article on "The Law of Compensation."

"Just fancy!" exclaimed Bridged, "according to this, whin a mon loses wan av his sinses another gits more diviloped. For instance, a bloind mon gits more sinse of 'earing and touch, an'—"

"Shure, an' it's quite thrue," answered Pat. "O'ive noticed it meself. When a mon has wan leg shorter than the other, begorra the other's always longer."

THE CANADIAN BANK OF COMMERCE

WATER NOTICE

TAKE NOTICE that I, Charles M. Wilson, of Prince Rupert, B. C., occupation broker, give notice that on the 25th day of October, 1911, I intend to apply to the Water Commissioner at his office in Prince Rupert, for a licence to take and use 3 cubic feet of water per second from hot springs on the border of Lake Lakelse in the Skeena Land Division of Coast District. The water is to be taken directly from the springs and is to be used for sanitarium purposes on the following described land:—Commencing at a post planted at the northeast corner of Lot 684; thence west 30 chains, more or less, to the east line of Pete Deboers suveyed pre-emption; thence north 40 chains, more or less, along said Deboer east line; thence west 40 chains, more or less to the shore of Lake Lakelse; thence following the lake shore north 20 chains; thence east 70 chains; thence south 70 chains, more or less, to place of beginning.

CHARLES M. WILSON.
Dated September 25, 1911.

Sale of Mineral Claims for Unpaid Taxes in the Prince Rupert Assessment District, Province of British Columbia.

I HEREBY GIVE NOTICE that on Monday, the 6th day of November, A.D. 1911, at the hour of 10 o'clock in the forenoon at the Court House at Prince Rupert, B. C., I shall sell at public auction the mineral claims in the list hereinafter set out, of the persons in the said list hereinafter set out, for taxes remaining unpaid by the said persons on the 30th day of June, 1911, and for the costs and expenses of said sale, if the total amount due is not sooner paid.

Provincial Elections Act

Skeena Electoral District

TAKE NOTICE that I have received objection in writing to the retention of the following names on the Register of Voters for the Skeena Electoral District, on the grounds stated below:

AND TAKE NOTICE that at a Court of Revision to be held at the Court House, Prince Rupert, B. C., on the 6th day of November, 1911, at ten o'clock in the forenoon, I shall hear and determine said objections, and unless such named persons or some other Provincial Voter on their behalf satisfies me that such objections are not well founded, I shall strike such names off the said Register.

J. H. McMULLIN,
Registrar of Voters.

Dated this 11th day of October, 1911.

The following persons are reported absent from the District:

UNITED STATES EXPORTS

What are the principal articles forming the large increase in exports of manufactures, the largest ever recorded in the history of the export trade of the United States? The figures of the bureau of statis, tics, department of commerce and labor, show that manufactures ready for consumption increased $101,500,000 in the export trade of 1911, and the manufactures for further use in manufacturing increased $41,500,000 with consumption $601,000,000 over the preceding year. This increase is larger in both classes than that of an earlier year, making the total exports of manufactures ready for consumption $601,0000,000 and manufactures for further use in manufacturing $309,000,000, or a total of $910,000,000, against a total of $767,000,000 in 1910 and $671,000,000 in 1909.

Machinery in the various forms to which this term may properly be applied supplies a larger share of this total of increasing exports of manufactures than any other single great class of products to the factory. The group of articles which the bureau of statistics classes as "machinery" under the general head of iron and steel manufactures shows a growth of $80,000,000 in 1910 to $105,000,000 in 1911; but to this could properly be added automobiles and parts of which alone show a growth of $4,500,000; agricultural implements, a growth of nearly $8,000,000, and scientific instruments, including telephone and telegraph instruments, a growth of $2,500,000. To be sure no single one of the numerous classes of articles designated under the general head of "manufactures" shows as large an increase as pig copper, classed as a manufacture for further use in manufacturing, which shows a gain of $15,000,000, or approximately 20 per cent over the exports of the preciding year; while that class of lumber designated as "boards, deals and planks," shows an increase of about $7,000,000, or 20 per cent over 1910. Glazed kid, another article for use in manufacturing sows an increase of over $6,000,000, a gain of more than 50 per cent over 1910; but this is probably more apparent that real, in view of the fact that considerable quantities of kid leather exported in former years went out of the country under the general title of "leather," but is not, as a result of insistence by the bureau of statistics upon greater care in classification, being properly described by the exporters.

Glazed kid alone shows a total exportation in 1911 of $17,000,000, as against $11,000,000 in 1910 and less than $4,000,000 in 1909.

Of the finished manufactures ready for consumption exported, automobiles and parts of, show a growth from $11,000,000 in 1910 to $15,500,0000 in 1911; cotton goods, from $33,330,000 to practically $41,000,000; buidrers' hardware and tools, from $14,000,000 to $17,000,000; boots and shoes of leather, from $12,500,0000 to $13,750,000; lubricating oils, from $20,750,000 to $22,000,000; napthas, from $6,333,0000 to $9,500,000; photographic goods, composed largely of motion picture films, from $4,750,000 to over $7,000,000; typewriters, from $8,250,000 to $9,750,000; sewing machines, from $7,500,000 to over $9,000,000; structural iron and steel, from less than $6,000,000 to $8,500,000; scientific instruments, from $10,000,000 to $12,500,000; cars and carriages, from $3,750,000 to $8,750,000; agricultural implements, from $28,000,000 to practically $36,000,000; metal working machinery, from $6,000,000 to $9,500,000; wire, from $8,333,000 to $3,500,0000; books, maps, etc., from $7,0000,000 to $8,750,000 while in numerous other articles of less values corresponding increases occur.

All parts of the world shared in the increased taking of American manufactures. In agricultural implements, for example, the exports to Russia in Europe grew from less than $5,250,000 in 1910 to $7,500,000 in 1911; those to Canada, from $3,333,000 to$4,750,000; Argentina, from $6,250,000 to $7,500,000; Aushralia and New Zealand, from $1,000,000 to $1,750,000, and Africa, from a little over $1,000,0000 to $1,500,000. Of copper, Europe is, of course, the chief consumer. To France, the exports increased from $12,250,0000 in 1910 to $16,500,000 in 1911; to Germany, from $18,750,000 to $24,000,000; Netherlands, from $24,000,000 to $30,000,000, while to the United Kingdom the exports of this article fell from over $17,500,000 to less than $14,000,000.

CULTURE FOR RURAL WORKERS

Ambitious Scheme of Education in the Villages

An energetic campaign is to beundertaken this autumn by the Workers' Educational Association in order to extend its endeavors in the way of providing cheap and practical education for woring people of the rural districts. During the eight years of its existence the association has confined its enterprise chiefly to workers in the towns, among whom it now has over 6,000 members in its various branches, besides many thousands more in the trade unions, co-operative societies, and other organizations which are affiliated bodies. The first step in the new campaign is to be the establishment of winter residential schools on somewhat the same plan as that which has done so much to raise the status of the agricultural laborer in Denmark .

The first experiment station will be near London, easily accessible from the universities of Cambridge and Oxford, and the instruction will be conducted at first on the week-end basis and oral teaching, lectures and a method involving actual experiments. A system of residential colleges is projected to follow gradually, but centres of operation will be started throughout the country, where a more informal programme of instruction will be offered. The subjects to be taken include the history of rural life in England, the history of local government, the growth of democracy, the history of English land and there are to be popular courses on literature. If these various schemes meet with success they will be followed by the establishment of an agricultural college, as in Denmark, the institutions which deal in practical matters and those which aim to develop the imagination will be kept strictly apart. The agricultural college will teach the use of land pure and simple. The association starts its campaign with over 1,400 organizations behind it, including 500 trade unions, 200 co-operative committees, 30 local education althorities, and a lengthy list of teachers' associations educational and literary societies, universities, adult schools, and working men's clubs of all descritions.

Skeena Land District—District of Cassiar

TAKE NOTICE that Marion McDiarmid, of London, Ontario, occupation nurse, intends to apply for permission to purchase the following described land:—Situated on the Kitwancool River; commencing at a post planted at the northwest corner and about 5 1-4 miles distant in a northwesterly direction from the north end of Kitwancool Lake; thence south 80 chains; thence east 80 chains; thence north 80 chains; thence west 80 chains to point of commencement, and adjoining Lot 1878 to the north; and containing 640 acres, more or less.

MARION McDIARMID.
Daniel McDonald, Agent.

CANCELLATION OF RESERVE

NOTICE is hereby given that the reserve existing over Crown lands on the Morrice River, Range 5, Coast District, notice of which bearing date of May 5th, 1910, was published in the British Columbia Gazette of May 5th, 1910, is cancelled in so far as it relates to the lands surveyed as Lots 3881, 3882, 3883, 3884, 3885, 3886, 3887, 3888, 3889, 3890, 3891, 3892, 3893, 3894, 3895, 3896, 3897, 3898, 3899, 3900, 3901, 3902, 3903, 3904, 3905, 3906, 3907, 3908,, 3909, and 3910.

ROBERT A. RENWICK,
Deputy Minister of Lands.
Department of Lands, Victoria, B. C.
September 12, 1911. s22-d22

"PUBLIC INQUIRIES ACT"

HIS HONOR the Lieutenant-Governor in Council has been pleased to appoint the Honourable Albert Edward McPhillips, K. C., President of the Executive Council; the Honourable Price Ellison, Minister of Finance; Charles Henry Lugrin, of the City of Victoria, Esquire; and William Harold Malkin, of the City of Vancouver, Esquire, to be Commissioners under the "Public Inquiries Act" for the purpose of enquiring into and reporting upon the operation of the "Assessment Act, 1903," with respect to its practical bearings on the financial requirements of the Province.

The said Commissioners will hold their meetings on the dates and at the places mentioned hereunder, namely:—

Victoria at the Executive Council Chamber, Parliament Buildings, Monday and Tuesday, 25th and 26th September at 10 a. m. At the Courthouse or the Government Office at the following places:—

Nanaimo, Wednesday and Thursday, 27th and 28th September.
Vancouver, Friday and Saturday, 29th and 30th September.
New Westminster, Monday, 2nd October.
Revelstoke, Wednesday, 4th Oct.
Golden, Thursday, 5th October.
Cranbrook, Saturday, 7th October.
Fernie, Monday, 9th October.
Nelson, Wednesday, 11th October.
Rossland, Thursday, 12th October.
Grand Forks, Friday, 13th October.
Princeton, Saturday, 14th October.
Merritt, Monday, 16th October.
Kamloops, Tuesday, 17th October.
Summerland, Thursday ,19th Oct.
Penticton, Friday, 20th October.
Kelowna, Saturday, 21st October.
Vernon, Monday, 23rd October.

It is requested that all persons who are interested in the matter aforesaid, and who desire to be heard, will not fail to be present at the meetings of the Commisioners.

PRICE ELLISON,
Chairman.
Treasury Department, Victoria, B. C.
September 13, 1911. s22-o23

CANCELLATION OF RESERVE.

NOTICE is hereby given that the reserve of a parcel of land situated on Graham Island, notice of which appeared in the British Columbia Gazette on the 25th of February, 1909, being dated 23rd February, 1909, is cancelled to permit of the lands being acquired by pre-emption only and for no other purpose

ROBT. A. RENWICK,
Deputy Minister of Lands.
Department of Lands,
Victoria, B. C., April 5th, 1911.
4-14—7-5

PUBLIC HIGHWAYS

Province of British Columbia

NOTICE is hereby given that all Public Highways in unorganized Districts, and all Main Trunk Roads in organized Districts are sixty-six feet wide, and have a width of thirty-three feet on each side of the mean straight centre line of the travelled road.

THOMAS TAYLOR,
Minister of Public Works.
Department of Public Works, Victoria, B. C., July 7, 1911. jy18-o18

CANCELLATION OF RESERVE.

Notice is hereby given the the reserve existing by reason of the notice published in the British Columbia Gazette of the 27th December, 1907, over lands on Graham Island, formerly covered by Timber Licences Nos. Nos. 37055, 37056 and 37057, which expired on the 6th day of November, 1909, and the lands embraced within Timber Licence No. 37059, which expired on the 25th day of January, 1909, is cancelled, and that the said lands will be open for pre-emption only under the provisions of Section 7 of the "Land Act" after midnight on June 16th, 1911.

ROBERT A. RENWICK,
Deputy Minister of Lands.
Lands Department,
Victoria, B. C.,
9th March, 1911.

LIQUOR ACT, 1910
(Section 42)

NOTICE is hereby given that, on the first day of December next, application will be made to the Superintendent of Provincial Police for renewal of the hotel licence to sell liquor by retail in the hotel known as the Big Canyon Hotel, situate at Kitselas, in the Province of British Columbia.

J. W. PATERSON,
Applicant.

IRON ORE IS FOUND

Northern Part of British Seems to Have Abundance of Hematite at Various Points.

Proposition for Smelter for Steel Works May Soon Be a Necessity Here

There are good reasons for expecting that the country within the zone of influence of Prince Rupert will become a rich ion producer. Several years ago, before the city attained the importance it has today, capital was interested in the iron properties within close reach of the city with the object in view of establishing a smelter. The idea has never been abandoned altogether and with the revealing constantly of new fields of iron ore in the north it is quite probable that this may be soon accomplished.

At the Queen Charlotte Islands hematite deposits are at the present time being investigated to prove their extent and while the locators are keeping the matter quiet until they have made fuller investigation they are satisfied that they have discovered a rich bed.

From Hazelton comes the news also that on the Babine trail another promising deposit of hematite has been located. The Omineca Miner, referring to it, says:

"An interesting showing of mineral is that on the Babine Trail group, where Hans Bergquist and Drysdale Ogilvie have uncovered the first specular hematite in this district. This is an important iron ore, and when found in sufficient quantity and of good grade is very valuable. As the showing on the claims is of considerable size and the assays procured show it to be of high grade, it is probable that this group may prove to be one of the money-makers of the district.

"There are eight claims in the group, which is located on the Babine trail, a short distance this side of the summit. The local people who are associated with Bergquist and Ogilvie in the ownership of the group are R. J. McDonell, S. Martin, Jack Halley, Thomas Carpenter, Arthur Leverette and V. Brown."

Bird Protection

Bjornson, the Norwegion poet, in a lecture on "Animals, Education and Religion," said: "At home, in Norway we do not murder any of our song birds. Our children have for years banded themselves together in clubs to protect the birds' nests. But what we gain by this for our fields, gardens and woods is as nothing in comparison with what we gain for the education of our children in weaning them from cruelty and making them the protectors of the little birds. It teaches them to control their feelings, and awakens enthusiasm for worthy causes. Their love of destruction we change to magnanimity. We teach them to respect the economy of Nature as well as the life and property of others, thus giving their minds a direction which will one day promote the solidarity of nations."

G. T. P. BUYS COAL

Andrew Laidlaw of Spokane, president of the Jasper Park Collieries, Ltd., in which are interested M. H. Alworth of Duluth, Minn., H. B. Round, J. L. Cote and H. N. Smith of Edmonton, Alta., and H. N. Galer of Spokane, managing director of the Royal Collieries at Lethbridge, Alta., announced in Spokane that he has closed a contract for the sale of 100,000 tons of coal to the Grand Trunk Pacific Railway Company. The coal is to be delivered as rapidly as it is mined.

The mine, which is under the management of R. H. Morris, formerly with the Tennessee Coal and Iron Company, the Republic Iron and Steel Company, contains bituminous coal, running from 68 to 72 per cent fixed carbon and less than 7 per cent ash. The first car of coal was shipped on June 15, since which time the Grand Trunk Pacific has taken the output.

Development work was started in April, 1910, two months after Mr. Laidlaw had acquired a two-thirds interest in the property. The main work to date consists of a tunnel, now 3,000 feet located 272 feet above the main line of the Grand Trunk Pacific Railroad, and 375 feet from the tracks. This working shows a face of coal 12 feet and 4 inches thick. A second and lower tunnel now is being driven. Eventually it will be the main working tunnel.

The property is located 205 miles west of Edmonton, Alberta, and 35 miles east of the Yellowhead Pass. It is situated on both sides of the Athabasca River, south of which it is traversed by the Grand Trunk Pacific Railroad, now in operation for some distance farther west, and on the north by the Canadian Northern Railroad, which will reach the property early next spring. It consists of 10,240 acres of land, covering six seams of coal, varying in widths of from 4 to 14 feet, which traverse the company's holdings in a north and south direction for eihgt miles.

"The Jasper Park colliery now is in a position to maintain a daily output of 300 tons, which by January 1 1912, wkill be increased to not less than 500 tons and will be again doubled before next summer," said Mr. Laidlaw. "Considering that the property was entirely without railroad facilities when development was begun, in April, 1910, and remained so until last June, I think that a new record has been made in opening it up and putting it on a large producing basis in such a short time."

DEATH OF INDIAN CHIEF

William Kelly Was Buried at Port Simpson Last Week

The funeral of the late William Kelly, one of the chiefs of the Tsimpsean people, took place on October 5 at Port Simpson. A largely attended funeral service was held in the Methodist Church, the pastor, Rev. G. H. Raley officiating.

Deceased was one of the most highly esteemed men in the community and the bereavement is felt by all his people. He leaves a widow and family, with whom the deepest sympathy of the entire community is felt.

NEW FIRE HALL

Cost Will Be Kept Down to About $5,000 to Comply With Estimate

The new fire hall to be erected by the city will be kept within the $5,000 limit in response to the increasing demands of the chairman of the finance committee, Ald. Kirkpatrick, who is against any expenditure outside of the limit set by the estimates.

In order to do this it is proposed to leave a part of the interior unfinished for the present.

The hall will be located between the present temporary buildings. It will be set well back from Fulton Street, while a basement opening onto Fifth Street will be used as a storage place for the street equipment.

TELEPHONE TO LAKES

City Council Decides to Make Connection With the Civic Plant

The city will take steps to extend the telephone line from Seal Cove to Shawatlans and Woodworth Lakes. This couse was decided upon at a meeting of the council on Wednesday night, when it was shown on report that the cost of making the connection with the city system would be $369.95 instead of $192.40 if connection was made only between the two lakes. It was pointed out that there would be need of this telephone lines from the very start. It would effect a great saving during the days of construction in transmitting information to and from the engineer's department to the works.

Ald. Hilditch favored making the connection with the city rather than the system between the lakes only.

Ald. Kirkpatrick, with a watchful eye on the finances as chairman of that committee, suggested that the work should be a charge upon the waterworks.

It was decided to go on with the work.

Sneezing Perilous

Sneezing is one of the greatest perils that confront aeronauts, declares Harry Atwood, the American aviator. "On my flight over Cleveland, Ohio," says Mr. Atwood. "a small insect flew into my nose. I felt the sneezing convulsion coming on and fought against it. Realizing that a sneeze was inevitable, I braced myself so that I would not lose possession of my sense even for an instant. It was the first time I ever had to sneeze while in the air, and it immediately dawned on me that more than one aviator probably owed his death to a sneeze—the spasmodic jerking of the head the brief loss of sense direction, and probably a perk of a lever which made recovery of balance impossible. Believe me, I never again want to sneeze while flying. It is one of the most serious perils of aviation."

VALUABLE TIMBER

Cypress of the North is Held in High Esteem for its Good Qualities.

Mill Owner Has Been Offered High Price for Lumber From Yellow Cedar

That Northern British Columbia has in its cypress wood a most valuable asset, is borne out by the statement of Mr. Corlett of the mill at Queen Charlotte City. He has been offered $100 a thousand for lumber cut from the cypress, or what is better known locally as yellow cedar.

The timber is one of the most valuable on the Coast, being admirably adapted for furniture, for ship building and many other uses. Its lasting qualities are great and make it most valuable when this necessity is important.

Mr. Corlett expects to close his mill at Queen Charlotte City about the end of the month for some little time. Later on in the winter he will probably do some custom work, but steady cutting will not be continued until the spring.

That Queen Charlotte lumber is a very valuable asset to this part of the country is shown by the demand for the output from the mill. He has large orders from the New England States for the spruce of the island, the wood dealers finding that this wook takes a finish that is very satisfactory and makes the lumber much sought after.

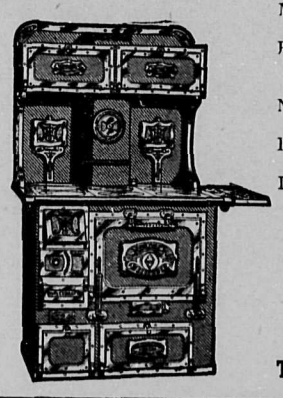
Mr. Corlett thinks that the hemlock of the north has been discriminated against unjustly. It is a lumber that, he thinks, if it were used more freely, would become very much more sought after by builders. A prejudice seems to exist against it owing to the fact that hemlock in other parts of the continent is not a satisfactory wood. He thinks that this northern hemlock is much superior to the general hemlock.

THE BUBONIC PLAGUE

The Disease Never Leaves Certain Districts of the World—There Is Always Danger From It

We are only now beginning to discern the truth about the plague, says the London Times. Medical science ignored its existence, and in the day of trial found it hardly remembered how to treat it, if it ever knew. But the fact is that plague has always existed in certain spots. It has never left India, for instance. Investigation has shown that there were continual outbreaks last century in the highlands of Kumaon, under the shadows of the Himalayas. It is at least possible that Bombay was infected in 1896 from the Himalayas rather than from Hongkong. Plague has been continuously present in the mountains of Assyria, in Western Arabia, south of Mecca. It has never really left Mesopotamia, or the Chinese province of Yunnan. There is an endemic centre of long standing in Uganda. Why at the close of the nineteenth centuy plague should suddenly have flared forth again with widespread intensity is one of those mysteries which no one can pretend to fathom. The cause is probably quite unconnected, in the main, with the development of intercommunication between nations. The sinister feature of the present pandemic is that it is accompanied by a serious prevalence of the disease among the lower animals, who are liable to communicate it to man. That is not a new condition, but much of the data concerning it is new. In England we have the disquieting rat epidemic in East Anglia. The province of Transbailkalia, which is in suspicious proximity to Kharbin, finds that plague is endemic within its borders among a species of marmot, which is extensively hunted. Marmots in the Caucasus and in Tibet are also found to be apparently permanently infected. In the United States west of the Rocky Mountains, a new and disturbing endemic centre of plague infection appears to have been set up within the last six years among the "ground squirrels" of California. The rat is not the only culprit, and these centres of infection among rodents, constitute a far more insidious danger for the world than occasional human epidemics. Modern research into plague is still only in its infancy, but already it has suggested the lesson that we must awake from the dream that the new civilization is necessarily exempt from the graver forms of pestilence. If we continue to cherish that delusion we may have a rude awakening.

Monarch MALLEABLE The "Stay Satisfactory" Range



Good, Sound Reasons for MONARCH Economy

Monarch Ranges are built so that they can never have "air leaks"—
For around every opening into the body there is a Malleable Iron frame to which the steel is riveted.
No putty is needed in such joints. They are air tight when new and stay air tight.
If these other ranges were built in this way they might be economical too.
Investigate this matter of rivet construction versus stove bolts and stove putty. It's important to every one using or buying a range.

WATER NOTICE

I, Henry Newton Boss, of Victoria, B. C., occupation broker, give notice that on the fourteenth day of November, 1911, I intend to apply to the Water Commissioner at his office in Prince Rupert, B. C., for a licence to take and use three cubic feet of water per second from the Lakelse Hot Springs situated on the east side of Lakelse Lake in the Coast District, Range Five. The water is to be taken directly from the said springs and is to be used on Lot 684 for industrial purposes.

o13-n14 HENRY NEWTON BOSS.
