WILLIAM MANSON, M.P.P., BACK FROM THE INTERIOR

He Travelled Over The Districts From Hazelton Into the Ootsa Country, Studying The Needs Of The Settlers---Development Noticeable

William Manson, M. P. P., returned last evening from the interior where he has been looking into the conditions prevailing from Hazelton into the Ootsa Lake country with all the intervening territory. He took occasion to study the needs that are most pressing there, having in view, that a session of the Legislature will be called in the course of a few months, and it is necessary that he should be in touch with the whole of the district that he represents. This is a practise that he has made of keeping in touch with the whole district, and so he has been able to grapple with all matters that may affect any section of the territory.

On the present trip the member drove in from Burns Lake, taking in the settlements at North Francois, at South Francois, at Ootsa Willowvale at the west end of Francois Lake and back to Houston. The distance covered in that inspection was 114 miles. He also stopped at Telkwa, Smithers and Hazelton, where he was pleased to see that following the railway there was development taking place which promised well for the future of the district.

Mr. Manson, when seen last evening, after his return, spoke in the highest terms of the country that had been visited by him. The Francois and Ootsa country, he says, is showing more and more that it is to become a valuable asset to the northern farming country. There is a tremendous territory that is open to settlement there. Considerable progress has been made in the direction of the settlement, but there is an immense extent that awaits the pre-emptor.

He points out that the unwarranted and extravagant statements so often made by the opponents of the Government as to the lands of the district being all in the hands of speculators is very wide of the mark. In the territory between Ootsa and the Francois Lakes there are 140,000 acres of lands all surveyed and reserved for pre-emptors. In comparison with that, there has been sold in the same territory, 80,000 acres of lands and of the amount 50,000 has been paid for and Crown granted. Of the remainder, of the 30,000 there remains a balance to be paid.

This condition of affairs refutes the statements that are made too often by the opponents of the Government that the land has all been sold and is lying there without paying taxes. That part, upon which the Crown grant has been taken out, is all open to taxation. In addition, there is a part of the remainder that is open to taxing.

In the Bulkley Valley the farmers are engaging in cattle raising as never before. The plentiful crop of hay this year made it necessary for the farmers to turn their attention in the direction of getting the best out of the hay on hand. While quite a quantity is being shipped out of the country, there is a very large amount being fed on the ground. To accomplish this it was necessary to import young stock from the Alberta country. There has been over 300 head of young cattle brought in of feeding purposes, which is going to have a most beneficial effect upon the stock branch of the industry. It is expected that this will result in a very good profit to the farmers who will make far more out of their hay by feeding it than would be made by selling the hay itself.

In that part of the country there is a splendid prospect that stock raising will become a great industry. It is only a matter of time, Mr. Manson feels, until there will be attention devoted to the dairy end of the industry, and creameries are talked of already in some sections. This, he feels, will be a very rich dairy section and farmers will draw rich returns from the lands held there.

In the different ports of the country Mr. Manson says the ill effect of the war is being felt as it is here. The settlers are taking a philosopic view of the matter and are ready with other parts of the Empire to make the necessary sacrifices, in view of the struggle that the nation is called upon to make.

MORE FISH CONTINUES TO ARRIVE IN PORT

Quite A Quantity Was Disposed Of In This Place Yesterday—Tyee Sold To Atlin Fisheries.

There are boats continuing to arrive here with halibut for the markets of the continent. Yesterday there arrived here several vessels of small size with catches of fish. The Liberty was the largest one of those. It brought in 17,000 pounds. The Lister and the North Cape brought respectively 10,000 and 7,000 pounds.

The Tyee which brought in 50,000 pounds the day previous sold to the Atlin Fisheries yesterday morning.

Sale For Red Cross.

The sale of home cooking for the Red Cross Society yesterday was as usual a decided success. The sale was under the charge of Mrs. Peter Black and Mrs. W. Millar. Assisting these ladies were Mrs. Birnie, Mrs. Wm. Keith and Miss James. The sale was held in the store of Miss James on Third Avenue. The proceeds were $40. The amount might have been increased to a considerable extent had there been a greater supply of cooking for the sale. There were a number of drawings which brought in a good amount. The cake donated by Mrs. Black was won by Mrs. Keith. It brought $7.95 cents in tickets. The cake offered by Miss James brought in $6.60. Mrs. Birnie who did splendid work sold 76 recipes as advertised for the benefit of the society.

Thanks For Proceeds.

The Red Cross Society begs to acknowledge, with thanks, the receipts of $37.50, being the proceeds of a Bridge party held at the residence of Mr. and Mrs. L. W. Patmore.

Took Equitation Course.

Major L. Bullock-Webster, of this city, who is serving with the 54th Battalion at Vernon has passed his examination in equitation.

To Redue Guards.

It is announced that the guards at Prince Rupert, as elsewhere in the province, are to be reduced so as to facilitate recruiting for overseas.

LIBERALS HOLD A POLITICAL MEETING

T. D. PATTULLO DEALT AT SOME LENGTH ON THE PLATFORM

H. S. Harris Of Bella Coola Complained Of Situation.

The Liberals of this city held a meeting last evening for the purpose of keeping the machine in running order. It was held in the vacant store in the Stork Block, and was presided over by Alex M. Manson the Prince Rupert nominee for the interior riding. T. D. Pattullo, the Liberal candidate for Prince Rupert in the local elections, and H. L. Harris, of Bella Coola, were the speakers. The attendance was very good and the electorate present were treated to an explanation of the Liberal platform in part by Mr. Pattullo, and to a series of abuses that Mr. Harris contends have crept into the administration of affairs in the southern valley.

Mr. Manson in his introductory remarks referred to the war and to conditions generally.

He contended that the Government had been condemned by the Socialists, the clergy and by Conservatives like Sir Hibbert Tupper and C. M. Woodworth. This was in spite of the fact that the times were such that other things outside of the affairs of this small state were of greater moment.

The Liberals had shook their heads when it had been proposed to run a Liberal here, but this had changed, he said, and the head shaking was on the other side now.

T. D. Pattullo opened by a reference to the war and the duty that existed to see that war carried vigorously forward. The individuals had a responsibility in casting their votes very soon. Every man who cast his vote for crookedness was just as responsible as the man elected. The Government at Victoria had become callous. All the Government was afraid of was of being found out in rascality. The action of the Prime Minister of this Province in buying two submarines was a slap at the British Admiralty and a usurping of the duty of the Dominion Government.

Mr. Pattullo said that on his travels through the district he found many who said they had lost faith in the Conservative Government, but they were afraid the Liberals might be worse—that all parties were rotten, (a voice "right".)

Mr. Pattullo lamented the fact that there were those who had lost faith. He contended that the McBride Government had had the effect of making men disgusted with the weather, even when it was good.

The speaker felt that the Liberals would give better government than the present one, because it could not give worse. He, moreover, felt that in coming in without any record it should be better.

There would have to be a financial house-cleaning by the Liberals if they came into power. He blamed the Government for people having to leave a country so rich in resources as this.

Mr. Pattullo attacked the timber policy of the Government. A policy of community settlement should be introduced with roads and rural mail deliveries, so as to develop the agricultural resources. The hardy miner was complimented by the speaker. There should be adequate encouragement to that industry. The fisheries should be relieved from unjust regulations.

With the resources there were here, and the railway facilities, they should get some manufacturers here. This would be an uphill fight, but he thought they should get it.

The Liberal platform provided for all these things, he said, and for much more. The coal lands should not have been alienated as they were.

Mr. Pattullo lamented the fact that the Government was not going fast enough with respect to a workmen's compensation. He longed for the Liberals to get into power and immediately bring in such an act. There were other planks in favor of the workingmen, he said.

A non-party public service also was to be introduced. The Liberals, if put into power, would carry out the plank in the platform by which a man when liberated from jail would be provided with sufficient money to take him to his home. He thought this would benefit some Conservatives.

Dealing with the public ownership plank, the speaker said that when he was mayor he had submitted two projects relative to a water power for this city. He presented both propositions and did not show a partizan feeling towards either one. Whatever his stand was on that proposition, however, Mr. Pattullo contended that Mr. Manson had supported a Government which was giving away the natural resources around Prince Rupert and made public ownership impossible.

As Liberal candidate he was being given credit for better work being done on the roads this year.

Harris believed the Conservative machine had been overworked and would become a derelict. They were a proud people in Bella Coola and they felt they had a record maker in the road superintendent.

(Continued on Page Four.)

NEW VARIETY OF COD OFF HERE

THE FISH HAS BEEN NAMED AFTER J. P. BABCOCK

A Red Cod That Is Abundant Has Been Discovered In These Waters.

According to the last report of the Fishery Commissioner for British Columbia there is a new variety of fish that has been found in the waters off here. It is a species of red cod and it has been named by F. Thompson, of Stanford University, and is called "Sebastodes Babcocki." It is named for J. P. Babcock, the esteemed assistant to the Commissioner of Fisheries at Victoria.

Mr. Thompson, in this year's report of the Fisheries Department, goes into a detailed description of the new species. It is of the rock-cod family. Rock-cod are called "Sebastodes" by scientists. It is new to science although it has frequently been caught by halibut fishermen and promptly destroyed.

The specimen Mr. Thompson describes was caught off Middleton Island, Alaska, in from 80 to 100 fathoms of water, in a trawl line, on September 2, 1914, by the local halibut schooner, James Carruthers, of the Canadian Fish & Cold Storage Company. From its picture it looks just like an ordinary rock cod with prominent eyes. It is a chunky fish. In color it is faint red or pink, with four broad crossbars. Some of the rays of the fish are deeper red than the body, but the pectoral and other fins are pink. A faint reddish streak runs downward and backward from the eyes.

This species promises to be one of the most important of the red rock cod. It is abundant. The failure to obtain it for scientific purposes is remarkable. It is found in some banks more often than the black cod, which is the only species consistently marketed.

The Indians catch this new species by the hundreds off Shag River, off the north coast of Graham Island. They use a jigger. If caught in the afternoon and cooked next morning it is delicious. Longer delay impairs the toothsomeness.

Notice to Working Men

The Granby Consolidated Mining, Smelting and Power Co. of Anyox, B.C.

WISH TO NOTIFY THE WORKING MEN OF PRINCE RUPERT AND DISTRICT THAT THERE ARE MORE MEN IN ANYOX LOOKING FOR WORK THAN THE COMPANY CAN EMPLOY AND MEN ARE HEREBY ADVISED NOT TO MAKE THE TRIP TO ANYOX WITH THE EXPECTATION OF BEING EMPLOYED.

OIL SHIPMENTS ARE BEING MADE TO THE EAST

Special Train Left Here With Supplies For Imperial Oil Tanks At Edmonton---Regular Train Loads Will Go Forward From Now On

This place is becoming every day more and more important as a shipping point. In addition to the shipments of fish that are sent out from time to time there are now coming to its trade special trains of oil cars.

This week has seen the commencement of the shipping of oil to Edmonton by the Imperial Oil Company. A train of twenty-seven cars went out this week for the Albertan city with supplies for the tanks of the company there. From that city distribution will be made to various parts of the prairies. These shipments will be of regular occurrence from now on.

In the past it has been the practice of the company to draw its supply from the east for Edmonton centre. This is now altered and from Prince Rupert will go the oil that is used there. In addition to that supply the shipments that are made to the G. T. P. tanks along the line of the railway, for the use of the engines used by the company, represents a very large quantity of fuel.

ARMAMENT OF BULGAR ARMY

RUSSIAN INFORMATION AS TO EQUIPMENT OF THE NEW FOE

The Bulgarian Army Has 1,035 Cannon Already In Use.

Russian information is that the rifles used by the Bulgarian army are made after the Mannlucher and Mauser systems, the patterns of the latter having been captured from the Turks. The Bulgarians thus are able to utilize both Austrian and Turkish cartridges, thus having thousands of rounds on hand for each rifle.

Further information is that the Bulgarians have 750 light field guns, including 300 seventy-five millimetre Schneider cannon and 150 rapid firers of the same calibre taken from the Turks, besides 250 Krupp guns of 87 millimetres and 150 Krupps of 75 millimetres; forty rapid fire 120 millimetre Schneider howitzers, 40 Krupps of the same calibre, twenty-five 150 millimetre Krupps, thirty rapid fire 75 millimetre mountain guns, and fifty rapid fire Krupps of like calibre.

It is estimated that Bulgaria, Austria and Germany were able to place immediately half a million bayonets in service against Serbia.

Has Passed Examination.

Lieut. E. L. Fullerton, formerly of the 11th Irish Fusiliers, now of the 68th Regiment, has passed his examination and has been confirmed in his rank of Lieut.

KAMSCHATKA HAD BIG SALMON SEASON

RUSSIAN TERRITORY PUT UP LARGE PACK THIS YEAR

Cod-fish Were Canned There As Well As The Ordinary Kinds.

Kamschatka salmon canneries have this season put up 150,000 cases of fish, of which output humpbacks accounted for 120,000 cases. Red salmon were few in number, the total pack of these fish amounting to 30,000 cases. Russia has proven a gold mine of a market for the pack, and humpback salmon bought at two kopeks or once cent each have been delivered to the Russian War Department for a lump price of $6 a case.

Oscar B. Knorring, an American cannery expert, returned to Seattle after a year's work on the Kamschatka coast, and in speaking of the season's fishing on the northeast coast of Asia, said on the whole the season has been a profitable one for cannerymen and salt fish packers

"I went out to put in a canning plant for a Russian company," he said, "and while we were handicapped for help, we put up 30,000 cases

TALK OF MACHINES.

The talk of the Liberals, of this city, about a Tory machine is laughable. Under the Grit machine nominations for the whole district, including three candidates for the Legislature and one for the House of Commons, are all made to order in the city of Prince Rupert.

VALUES THE PRESS.

Henry Ford who has made himself so abnoxious to many Britishers by his utterances upon the war, has had experience as an advertiser and has learned to recognize the value of the press. Without intending to advertise advertising, Mr. Ford gave expression a few day ago to the sentiment that he could stop the war in two weeks if he could speak to the people of the warring countries through their press.

It is perfectly clear that Mr. Ford values the press as a medium for reaching the public. Are you using the press in your business?

JUGGLING WITH FIGURES.

From the speech of Mr. Harris, of Bella Coola, delivered at the Liberal gathering last evening, there is a tremendous scandal in his district in connection with the time of the road foreman, Mr. McFarlane. The public accounts for the year 1914 show that this official received pay for more than 365 days service. Mr. Harris persists in making it appear that he believes that there has been a paying twice over of this official. If the accounts for the two years, that of 13 and 14 are both looked into, it will be found that this official received pay for the two years, for less than the full number of days. Evidently there were services rendered in 1913 for which the vouchers were not put through until the following year.

Notice! The Latest!

By persistent experimenting I have now evolved a system of heating two rooms in a residence with your kitchen range, besides supplying hot water for domestic uses, regardless of the position of the range boiler. By the turning of one valve you turn your stove into a house heating system. I am now trying to improvise a thermostic automatic valve which will do away with the handling of any valves.

Now in use and on exhibition at my shop, 139 Second Avenue.

NAVIGABLE WATERS' PROTECTION ACT.

R. S. C. Chapter 115.

Richard B. McGinnis hereby gives notice that he has, under section 7 of the said Act, deposited with the Minister of Public Works, at Ottawa, and in the office of the District Register of Titles at Prince Rupert, B. C., a description of the site and of the plans for a wharf proposed to be built in Alice Arm, Observatory Inlet, British Columbia, at a point situate about ¾ miles south of the south east corner of Lot 1,074, Range 5, Coast District, B. C.

AND TAKE NOTICE that after the expiration of one month from the date of the first publication of this notice, Richard B. McGinnis, will under Section 7 of the said Act, apply to the Minister of Public Works at his office in the City of Ottawa, for approval of the said site and plans, and for leave to construct the said wharf.

Dated at Prince Rupert, B. C., this 22nd day of October, A. D. 1915.

APPLY TO

GEORGE BRODERIUS

SYNOPSIS OF COAL MINING REGULATIONS.

Coal mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories and a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 per acre. Not more than 2,560 acres will be leased to one applicant.

Applications for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only; but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10 per acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior

A. E. WRIGHT

Provincial and Dominion Land Surveyor—Surveying and Engineering. Between Second and Third Avenues P. O. Box 10.

LIBERALS HOLD.

(Continued from Page One.)

The speaker said that he could not understand the public accounts report. He said that J. W. McFarlane, who had been road superintendent according to the different items, had drawn pay for 451 days. The speaker complained of road foremen and others being members of the Conservative Club, and R. O. Jenito the Cotsa Lake country with all tacks.

Mr. Harris said that he had had the active sympathy of Alex. M. Manson, who had told him "my boy you have my sympathy, but I cannot help you."

The speaker said that a foreman had drawn pay for Government work and had also, at the same time, drawn pay for work on the hospital grounds. Mr. McFarlane had approved of the payments.

Mr. Harris found fault with the dismissal of Chris Carlson, the Provincial Police officer, who received a salary of $50 a month. In his place several other officers had been appointed to fill the place this one man filled.

KAMSCHATKA.

(Continued from page one)

of humpbacks and 5,000 cases of red salmon.

"Most of the sea fishing is done by Japanese fishermen, who were granted the privilege of fishing in Kamschatka waters after the Russian-Japan war. They are not permitted to fish in the rivers, and there is where the Russians chiefly operate. This is the first season the Japanese have operated their canneries without foreign assistance, and they managed them very successfully.

"These canneries put up codfish in tins as well as salmon trout, and all varieties of salmon found there.

"The run of humpbacks was very heavy this year, although there were but few red salmon to what was anticipated. The Japanese also salted about 50,000 tons of salmon for the Japanese market.

"The people of the village where our plant is located all made money this season, the average profit of the men being 800 roubles, and the women 400 roubles. They are, however, a hard lot to deal with, being chiefly of the Russian criminal class. Since the stopping of the sale of vodka, aJpanese have taken advantage of the 'booze' shortage. Small Japanese vessels bring alcohol all along the coast, and this finds ready sale among the Russianss, who have been deprived of their accustomed vodka."

Skeena Land District—District of Queen Charlotte Islands, Graham Island.
