J. S. Emerson Hopes To Build Large Sawmill Here With All Kinds Of Accessories In Way Of Kilns And Other Related Works

There arrived in the city yesterday morning from the south J. S. Emerson, who plans the erection of a large sawmill in this city, with all the accessories which go with such an undertaking in the way of planing mill, kilns, shingle mill, box factories, etc. He is here to look over the ground and decide upon a site with the G. T. P. If satisfactory arrangements are made along this line he will go ahead with the work.

Accompanying him is E. F. Duby, of the Brunette Sawmills on the Fraser. He has come as an expert in the line of mill location and will remain some little time to go fully into the matter with the G. T. P. officials. Mr. Emerson expects to leave about Friday.

G. A. McNicholl, of the G. T. P., returned also from the south yesterday, after holding conferences with Mr. Emerson. Mr.. Hinton is expected from Winnipeg today to continue the negotiations looking to the arranging of this.

While nothing definite is announced with regard to the negotiations, it is said that the plans that Mr. Emerson seeks to carry out as to his site will interfere with the general comprehensive plan designed for the whole harbor, which was prepared by Virgil Bogue the eminent engineer. The railway officials are said to be showing a disposition to facilitate in every way the carrying into effect of the scheme, which will bring a large industry to the city.

Mr. Emerson says his plans call for a mill capable of sawing up 75,000 feet a day to start with. If the supply of logs is not available from those in that line of business he will utilize holdings which he has himself in this part.

In addition to this work the intention is to have dry kilns for seasoning the lumber and planing mills. Mr. Duby looks upon this as the fish centre of the coast and the mill will give special attention to taking care of that industry in the way of boxes, etc. It is the intention to have a shingle mill operated with the plant, and to deal in every 'ine where there is a demand.

The world, Mr. Emerson says, would be his market, although it is reasonable to suppose that the prairies would absorb a very considerable quantity of the output for some time. In this way the G. T. P. would have its benefits from the locating of the industry here. He thinks that on the start from $150,000 to $200,000 a year would be spent with the G. T. P. in freight rates. This would be very radically increased as time went on.

The design is to carry, in addition to the lumber cut here, all classes of supplies for building. In Portland, Mr. Emerson has a large hardwood mill from which would be drawn supplies in that line to serve all the needs here. Spruce, cedar and hemlock would naturally be the main varieties to be used in the mill here, but the mill would drawn from farther south in getting the supply of logs and include fir in the cut.

Such a mill, it is pointed out, would produce a vast quantity of mill wood for use in the city. Mr. Duby, the expert along with Mr. Emerson, is very strongly in favor of electricity for power and Mr. Emerson, as soon as the plans are a little advanced, will seek from the city quotations as to the rate on power to meet the demands.

There is another feature of the business that Mr. Emerson mentioned in an interview last evening. This is with respect to the small mills on Queen Charlotte Islands. These mills, he says, have now to ship to Vancouver to get a market for their production. This business really belongs to Prince Rupert and the G. T. P. and he would be prepared to take the output of these smaller mills as rough lumber and utilize it at his works in this city. This would be a decided saving for these mills and bring the trade in a direction to which it belongs.

If his plans come to maturity he expects to have at the works everything that anyone wants in the way of building. If anyone wants to build a boat all the material will be available at the plant there. Mr. Emerson points out that such an enterprise in the city will have the tendency to create other related industries, suggesting barrel making as one of these.

The mill, with the hands employed in the woods in getting the logging done is conservatively placed by him at about 300 men. This will mean population and business to Prince Rupert and is a decided advantage to the city.

On the evening of November 14 a grand concert will be put on in the Westholme Theatre by the school children. The proceeds are to go to the Belgian orphans. The concert is being put on at the request of the authorities in common with a series in all other places. It is at the request of the Lieutenant-Governor, acquiesced in by the Superintendent of Education.

TOWN PLANNING.

We have recently heard a great deal about town planning. It will remain a question to many whether there can be any great satisfaction along such a line. What appears today as the very best plan for a city may in a very short time be open to all kinds of criticism. There would appear to be no finality in this matter of town planning.

* * *

The City of Prince Rupert affords a striking example of this. Prince Rupert was at great expense platted by eminent landscape gardeners and a model plan agreed upon. ..Yet only a few weeks ago another expert in town planning comes along and finds many faults with the general scheme and shows wherein improvements could be made. .If his plans were carried out there would, in fact, be a complete alteration of the planning of the city.

* * *

Another instance is afforded in connection with the waterfront. At very heavy expense the G. T. P. had V. Bogue, who had a continent-wide reputation, plan the waterfront so as to obtain the very best results. His plans were accepted and the wisdom of the G. T. P. lauded for securing such a scheme to work to. Now these self-same plans are giving trouble, inasmuch as it is contended that they do not lend themselves to the best advantage in the placing of a sawmill in the city.

* * * *

The result of such a mix-up is rather serious. It is not an easy matter for the company to throw away the plans adopted. On the other hand it is equally unreasonable to expect industries to be turned away because a plan does not work in with their schemes. The situation is one that will require careful consideration, and it is to be hoped that a satisfacory solution may be found by those concerned.

Production and Thrift

"CANADA from her abundance can help supply the Empire's needs, and this must be a comforting thought for those upon whom the heavy burden of directing the Empire's affairs has been laid. Gain or no gain the course before the farmers of Canada is as clear as it was last year—they must produce abundantly in order to meet the demands that may be made, and I believe this to be especially true in regard to live stock, the world's supply of which must be particularly affected in this vast struggle. Stress and strain may yet be in store for us all before this tragic conflict is over, but not one of us doubts the issue, and Canadians will do their duty in the highest sense of that great word."—*HON. MARTIN BURRELL, Minister of Agriculture.*

"MODERN war is made by resources, by money, by foodstuffs, as well as by men and by munitions. While war is our first business, it is the imperative duty of every man in Canada to produce all that he can, to work doubly hard while our soldiers are in the trenches, in order that the resources of the country may not only be conserved, but increased, for the great struggle that lies before us. *'Work and Save'* is a good motto for War-time."—*SIR THOMAS WHITE, Minister of Finance.*

THE CALL OF EMPIRE COMES AGAIN IN 1916

TO CANADIAN FARMERS, DAIRYMEN, FRUIT GROWERS, GARDENERS

WHAT IS NEEDED? THESE IN PARTICULAR—

WHEAT, OATS, HAY,
BEEF, PORK, BACON,
CHEESE, EGGS, BUTTER, POULTRY,
CANNED FRUITS, FRUIT JAMS,
SUGAR, HONEY, WOOL, FLAX FIBRE,
BEANS, PEAS, DRIED VEGETABLES

We must feed ourselves, feed our soldiers, and help feed the Allies. The need is greater in 1916 than it was in 1915. The difficulties are greater, the task is heavier, the need is more urgent, the call to patriotism is louder—therefore be thrifty and produce to the limit.

"THE AGRICULTURAL WAR BOOK FOR 1916" is now in the press. To be had from The Publications Branch, Department of Agriculture, Ottawa.
