PRINCE RUPERT CITY APPEALS TO VISITORS

PREPARING TO START ON LUMBER MILL SITE

Germany May Spare United States Merchant Vessels

Germany May Be Avoiding Sinking Of American Boats

London, Feb. 24.—The latest Berline newspapers received here state that henceforth American ships will not be sunk.

Washington Waiting.

Washington, Feb. 24.—Silence is being maintained by all government officials regarding the European situation. No reply has yet been received from Ambassador Penfield regarding Austria's attitude regarding the submarine campaign.

RUSSIANS WERE ABLE TO RECOVER LOST GROUND

Petrograd, Feb. 24.—The Germans, after strong artillery preparation, launched three attacks against the Russian positions east of Zlochoff and broke through the Russian lines. Counter attacks drove the invaders into their original positions.

NEW J. P. GRANTED BAIL IN THIS CASE

N. Bernstein Had Been Sent Up By Magistrate Shaw On A Six-Months' Term.

The question as to whether Mr. Andrew Blyth, J. P., President of the Liberal Progressive Club and a recently gazetted J. P., has authority to issue bail and grant the release of N. Bernstein, a prisoner serving six months' sentence at Okalla prison farm, has stirred up discussion in police circles and resulted in the matter being made the subject of correspondence with Victoria, it is said, says The Vancouver Province.

Bernstein was sentenced to six months' imprisonment recently on a charge of keeping a disorderly house and his counsel, Mr. I. I. Rubinowitz, claiming that Bernstein was made the victim of a miscarriage of justice, has since been active in trying to get Bernstein out on bail for the purpose of a new trial before a higher court.

In sentencing the man, Magistrate Shaw expressed himself very strongly at the alleged conduct of the accused

BRITISH MUST CUT FOOD SUPPLY SAYS PREMIER

London, Feb. 24.—Premier Lloyd George in a great speech in the House of Commons today admitted the gravity of the situation with regard to the nation's food supply through the operation of the German submarine warfare. Britain must be determined to curtail in the most drastic fashion her imports.

Luxuries of every description must be banned. Face to face with a life and death struggle, many things which had heretofore been considered as necessities, but were really not so, would have to be done without. All unessential staples must make way for the necessities of war. He said that the restrictive plans about to be put into operation will affect the very foundation of British life and will apply to the dining tables of practically every British citizen.

The Premier promised his audience that if this programme be carried out, Britain can face the enemy's worst. The whole success of the Allied cause depended upon the ability of the Government to solve the tonnage problem. This could be helped by the restriction of unnecessary imports and increased agricultural and ship-building activity.

SMALL ADVANCE MADE BY ALLIES ON WEST FRONT

London, Feb. 24.—A British raid was successfully carried out to the south of Souchez. Many prisoners were captured and dugouts were destroyed, and numbers of the enemy killed.

A French report states that several surprise attacks in Alsace and Lorraine regions were repulsed with great loss to the enemy in each instance.

Christian Science Society services are held every Sunday at 11 a. m. Sunday School at 12 noon. Wednesday evening meeting at 8 o'clock. Hays Building, 245 Second Avenue.

TRAIL SMELTER'S SULPHURIC PLANT

THIRTEEN TONS A DAY OF ACID IS BEING TURNED OUT

Interesting Adjunct To The Main Plant In Southern Interior.

Trail smelter's sulphuric acid plant has been operating steadily since July first last and is turning out its regular quota of the stuff which makes it possible to operate the several refineries in connection with the works—lead, copper, zinc and slimes. A. L. McCallum, the Superintendent, has been there about a year, the plant having been designed by him and erected under his supervision, says The Nelson News.

The acid plant itself is a substantial structure, with the walls being 180 feet long, 55 feet wide and about 40 feet in height. There are two chambers for holding the acid when made, each of which is 85 feet in length, 20 feet long and 20 feet high, and has a capacity of 150 tons. The lower two feet contain the condensed or chamber acid, being 61 per cent., which is used in the zinc plant, while the 80 per cent. acid is used in the copper refinery and in the treatment of the slimes, as well as in the manufacture of hydrofluosilicic acid—the

CUSTOMS TO FIX PRICE OF PAPER

DRASTIC ACTION HAS BEEN TAKEN BY GOVERNMENT TO CONTROL CHARGES

Manufacturers Will Have To Supply The Local Newspapers First.

Orders-in-Council governing the supply of news print paper to Canadian newspapers and passed by the Government since February 7 have been made public.

The first Order-in-Council provides that "To insure the publishers of Canadian newspapers an adequate supply of news print paper at reasonable prices, the exportation of news print paper in sheets or rolls shall be permitted only by license under regulation by the Minister of Customs."

The second Order-in-Council provides under the War Measures Act, as follows:

The Minister of Customs is hereby authorized and empowered to fix the quantity and price of news print paper in sheets or rolls to be furnished by the manufacturers to the publishers in Canada.

The Minister of Customs is further authorized and empowered to make such order or orders as he may deem necessary or advisable for the distribution and delivery of such news

(Continued on Page Two.)

Visitors Impressed With The Outlook For Prince Rupert

P. Duryee and D. A. Macdonald, who are here representing the Imperial Highway, have become quite impressed with the possibilities of this city. It is their first visit to the city and they are not a little surprised to find conditions so good. They had expected that there would be at every turn evidences of the depression that had marked all parts of the Province since the outbreak of the war. Instead, they say they find that the situation in this city is very encouraging.

They are firmly of the opinion that the city is coming into good things. Mr. Macdonald said yesterday that he realized that this city was destined to be a big centre, and he felt that it was coming into that position very quickly. He alluded to the immense importance of the fishing industry, which he sees at nothing like its normal condition, for the weather is such that comparatively few boats are getting in from the grounds. He feels, however, that the fishing must be a great money producer for the place.

Mr. Duryee has always been more or less interested in mining, and he is of the opinion that this is a wonderful country in the north in that line of business. His short stay in the city has thrown him into contact with a large number of mining men who are constantly coming and going, and he has learned enough to make him feel that this is to be a first-class centre in this regard.

So impressed have they become in the outlook here that they are seriously thinking of embarking upon some newer lines that might mean further development in the place.

Assist Returned Soldiers.

Anybody who knows of any Prince Rupert or Northern B. C. soldier who has lost his life, and which fact has not yet become generally known, will confer a favor by communicating with Clifford Brethour, Secretary of the Returned Soldiers' Association of Prince Rupert. tf.

Taking Steps To Get Approval Of Work On Mill Site

As a preliminary move to the starting up of work on the site of the sawmill that is to be constructed by the Emerson interests here, notice is being given so as to allow of the work being done legally. This is a formal matter, intended only to comply with the statute governing work done that might in any way interfere with navigable waters.

It is expected that Mr. Duby, the manager of the firm that is to have the mill, will be here Wednesday and begin active work in connection with the getting of the mill site in shape. There should be little delay now in the carrying out of the plans as everything, it is said, is in shape to proceed as soon as the legal aspect of the situation is complied with.

In order to get everything in good working order as soon as possible, this summer there will require to be no lost time and it is expected therefore that the work will be carried along without the least break once a start is made.

LADY MACKWORTH HAS TAKEN MANAGEMENT

The Holdings Of Lord Rhonnda Are Being Managed By His Daughter.

Word has been lately received at Peace River that the management of the entire holdings of the Lord Rhonnda (D. A. Thomas) interests has been assumed by Lady Mackworth, eldest daughter of Lord Rhonnda, whose time and services are now given entirely to the Imperial Government as a member of the Lloyd George Cabinet.

This announcement, which is given out by C. C. Sinclair, the northern manager of the above interests, is of great import, particularly to the northern portion of Alberta. A considerable sized fortune has already been expended in the development and prospecting of the natural resources of the Peace River country by Lord Rhonnda under the direction of Charles A. Law, his Canadian rep-

(Continued on Page Two.)

ALTERATIONS IN THE PRINCE JOHN

A NEW HATCH HAS BEEN PROVIDED FOR FREIGHT IN G. T. P. VESSEL

This Will Enable Her To Carry 350 Tons More Cargo.

Important structural alterations will be carried out aboard the G. T. P. steamer Prince John, now repairing after her stranding in Wrangell Narrows a short time ago.

Another hatch has been shipped into the vessel and this hatch, ten feet by nine, will enable the steamer to carry another 350 tons of cargo, giving her a capacity of 800 tons altogether.

The new hatch opens into the after hold and will be cased down through the cabins with joiner work to suit. Two new staterooms will be built aft of the present cabins and one mast will be taken out. The second mast will be shifted nearer the funnel and the cargo in the new hatch.

Other changes will be made in the interior of the vessel. The men's washroom has been changed and the entrance to the dining saloon will be moved forward. The bar has been abolished and a buffet service will be maintained from the steward's room. The steamer will be ready for service about the end of the month.

Notice To Mariners.

Mariners are hereby notified that the following charts are for sale at 15 cents each at the Marine Depot, Digby Island. Granby Bay: Cousins Inlet and Fisher Channel. Granby Bay and Entrance of Alice Arm to Hans Point.

THE FISHING INDUSTRY.

When the fishing industry is spoken of in connection with this port, it is sometimes, we fear, forgotten that there is belonging naturally to this centre not only the greater part of the deep sea fishing, but that this is the centre for a very great part of the salmon canning industry. Too often it is thought that there is practically no salmon industry in this part as compared with the southern part of the Province. This false notion is studiously cultivated by the resilents of the southern cities and towns and made to work to the advantage of that part as compared with this. With such an idea in view, southern interests have looked upon the proposition to have the chief inspectorate of fisheries located here as something that was a preposterous thing to think of. In support of that idea, it is represented that the south is the centre of the greater part of the salmon industry, which is incorrect.

The figures available as to the catch of salmon for the past season shows that about 995,000 cases were put up in the whole Province. No. 2 District, which has Prince Rupert for its centre, taking in the canneries on the Skeena on the Naas on Rivers Inlet and a few outlying ones, all of which are easily within the range of influence of this city, produced practically three-quarters of the total pack. It is true that one year in four, when the Fraser has its big run, the proposition set forth is liable to be upset to quite an extent, but this district must for a long time now lead all other parts of the Province combined in the production of salmon.

CUSTOMS TO FIX.

(Continued from Page One.)

print paper in sheets or rolls by the manufacturer to the publiser.

All orders and regulations made by the Minister under this authority shall be enforced by the sheriff of the county or district where the said news print paper is manufactured or by any officer of customs.

Any person who contravenes or fails to observe any of the provisions of this Order-in-Council or any regulation or order made thereunder shall be guilty of an indictable offense and liable upon indictment to a fine of not exceeding $5,000 or to imprisonment for any term not exceeding three years, or to both fine and imprisonment as specified; any director or officer of any company or corporation who assents to or acquiesces in contravention or non-observance by such company or corporation of any of the provisions of these regulations shall be guilty personally and cumulatively with his company or corporation and with his co-directors or associate officers.

LADY MACKWORTH HAS.

(Continued from Page One.)

resentative, and the coming season will see these developments pushed more vigorously than ever under the management of Lady Mackworth.

Lady Mackworth has for many years served her father as confidential secretary, and her long and intimate knowledge of his extensive business interests will doubtless have fitted her for her new responsibilities, which place her in the forefront in the financial world, so far as women managers are concerned.

Activities of the company last year included the building of the $100,000 boat, the D. A. Thomas, which is the largest inland river steamer in Canada, and the power launch, the Lady Mackworth. Headquarters are maintained by the company for the promoting of their various northland enterprises, including the oil-boring operations being extensively carried on at Vermilion Chutes, and potash research in the Slav River country.

SYNOPSIS OF COAL MINING REGULATIONS.

Coal mining right of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Teritory, the Northwest Territories and a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 per acre. Not more than 2,560 acres will be leased to one applicant.

Applications for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant.

Each application must be accompanied by a fee of $5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns, accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated such returns should be furnished at least once a year.

The lease will include the coal mining rights only; but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10 per acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

NAVIGABLE WATERS PROTECTION ACT.

Chapter 115.
REVISED STATUTES OF CANADA,

Hume B. Babington and Norman R. Brodhurst of the City of Prince Rupert, in the Province of British Columbia hereby give notice that they have under Section 7 of the said Act deposited with the Minister of Public Works at Ottawa and in the Office of the District Registrar of Titles at the Land Registry Office at the City of Prince Rupert aforesaid a description of the site and the plans of a wharf proposed to be built in Henslung Bay, Langara Island, in front of Lots 999 and 998, Queen Charlotte Island Land District, Province of British Columbia.

AND TAKE NOTICE that after the expiration of one month from the date of the first publication of this notice the said Hume B. Babington and Norman R. Brodhurst will under Section 7 of the said Act apply to the Minister of Public Works at his office in the City of Ottawa, Province of Ontario for approval of the said site and plans and for leave to construct the said wharf.

TRAIL SMELTER'S.

(Continued from Page One.)

latter being produced in an adjoining building.

Sulphur gas or sulphur dioxide is brought from the roasters in the electrio-chemical zinc plant, some pyrites from the Sullivan mine of the company also being used in the manufacture of sulphuric acid.

Originally designed for producing 10 tons of chamber acid per day, the plant is now doing better than that by turning out 30 per cent. more or some 13 tons every 24 hours. When the zinc plant was enlarged and the copper refinery built and then enlarged, the demand for acid was rather heavy—coming almost all at once, as it did, with the desire to fill the huge tanks and vats in the refineries in the shortest possible time, so as to be able to furnish refined metals to fill the insistent calls for the same. Consequently, some acid has been secured from the outside, but in time the local plant is expected to be able to fill all requirements, even though it has to be enlarged, which is not an improbability.

In a nearby building, also tile constructed, is the hydrofluosilicic acid plant—which is produced from a mixture of sulphuric acid, fluospar and silica. The sulphuric comes from Missouri and the company has all the silica required.

This part of the works has a capacity of about three-quarters of a ton a day, it being largely used as an electrolyte in the lead refinery, the lead being placed in solution in the hydrofluosilicic acid. This acid is much stronger than the sulphuric acid, and like the latter it rapidly corrodes whatever it comes in contact with—allowances for which must be made in the operation of both departments of the works.

Outside of Trail there are five other sulphuric acid plants in Canada, this being the only one, however, where the acid is produced from the sulphur fumes from zinc roasted ore.

NEW J. P. GRANTED.

(Continued from Page One.)

in accepting a share of the monies earned by a woman of the underwor'd ,and when the application was made before him for bail the magistrate is said to have taken the ground that under the section charged, Bernstein had no right to a new trial and refused to grant bail. Mr. Justice Clement could not find time to hear the application and His Honor Judge McInnes was not disposed to take action, and no formal application was made to him, it is stated.

In this dilema Mr. Andrew Blyth, J. P., is said to have been appealed to and having satisfied himself on the advice of senior counsel that he had authority to grant bail in these cases, signed the document which allowed Bernstein out on $1,000 surety. This move is said to have surprised the police authorities, who claim that as Bernstein was allegedly tried under a section which precludes him from an appeal to a higher court for a new trial, that they do not know what to do in the matter. They say that Bernstein passed through their hands and they are done with him and there is no machinery now for re-arresting him and trying him over again. The warden of the jail has the mandate of the J. P. for Bernstein's release, while both the police and the J. P. are fortified by ample authority that each of them is right in their view of the law.

Prisoners Of War Sale.

At a meeting of the Prisoners of War Committee it was decided to hold a jumble sale on the 17 March. Ladies will be at the Red Cross rooms three days before the sale to receive donations. Everyone has some article of furniture, clothing or bric-a-brac that they have no use for, but which might be useful to someone else. As far as possible the articles donated are asked to be in good condition.

It is hoped everyone will be able to contribute something, so that a good sum may be realized for the Canadian prisoners in Germany. Particulars of the sale will appear later. tf.

A Patriotic Concert, under the auspices of the I. O. D. E., will be held in the Westholme Theatre on Tuesday, March 6, at 8 p. m. A special feature will be the rendering of a cantata "The Lady of Shallott," by a choir of 40 girls. Tickets 50c, reserved seats, 75 cents.

NAVIGABLE WATERS PROTECTION ACT,

R. S. C., Chapter 115.

The Grand Trunk Pacific Railway Company hereby gives notice that it has, under Section 7 of the said Act, deposited with the Minister of Public Works at Ottawa and in the office of the District Registrar of the Land Registry Office, District of Prince Rupert, at Prince Rupert, a description of the site and plan of lumber mill and other works proposed to be built in the Prince Rupert Harbour at Prince Rupert, British Columbia, in front of Waterfront Block "1", according to registered plan of the townsite of the said City of Prince Rupert registered in the aforesaid land registry office as No. 923 Section 7.

AND TAKE NOTICE that after the expiration of one month from the date of the first publication of this notice The Grand Trunk Pacific Railway Company will, under Section 7 of the said Act, apply to the Minister of Public Works at his office in the City of Ottawa for approval of the said site and plan and for leave to construct the said works.

Dated at Winnipeg, Manitoba, this 21st day of February, A. D., 1917.

THE GRAND TRUNK PACIFIC RAILWAY COMPANY,
H. H. HANSARD,
f25-to-m31. Solicitor.

Production and Thrift

CANADA'S CALL
FOR SERVICE AT HOME

Produce More and Save More — The Empire needs food. If you are not in the fighting line you may be in the producing line. Labour is limited—all the more reason to do more than ever before. Grow food for the men who are fighting for you. The Allies need all the food that you can produce. Every little helps. You are responsible for your own work. If you cannot produce as much as you would like, produce all you can. Work with the right spirit. Put fighting energy into your effort and produce now when it counts. The more you produce the more you can save. Producing and saving are war-service.

Make Your Labour Efficient — In war-time do not waste time and energy on unimportant and unprofitable work. Economize labour. Put off unproductive work till after the war, and, if possible, help in producing something needed now. Let us not waste labour. Canada needs it all. If possible help to feed the Allies. Make your backyard a productive garden. Cultivate it with a will. Make your labour count for as much as possible.

Do Not Waste Materials — There should be no waste in war-time. Canada could pay the annual interest on her war expenditure out of what we waste on our farms, in our factories, in our homes. Every pound of food saved from waste is as good as a pound of increased production. The way for a nation to save is for every individual to save. France is strong to-day because of thrift in time of peace. The men and women of Great Britain are not only "doing" but are learning to "do without."

Spend Your Money Wisely — Practise economy in the home by eliminating luxuries. Wasting our dollars here weakens our strength at the Front. Your savings will help Canada to finance the war. Save your money for the next Dominion War issue. There can be no better investment.
