A HUNTER'S PARADISE.

The Best Hunting Ground on Earth—Lacks But Two Members of the Great Game Family, Buffalo and Wild Pigeons—How Wolves Increased—A Costly Experiment—Wolf as a Hero

At the recent convention of the North American Fish and Game Protective Association at Ottawa, Colonel Turner, the United States Consul at the capital, declared that the Dominion is the greatest country in the world for game. This is a statement which may surprise non-sporting citizens, but which, nevertheless, is quite true.

World's Best Hunting Ground.

Americans come over here by thousands at different seasons of the year for a few days' sport with gun and rod. New Brunswick boasts the most aristocratic fishing clubs in the world, the membership fee of one of which amounts to several thousand dollars. Most of the lakes in all the eastern provinces swarm with bass, said to be the gamest fish in the world, with the exception of the salmon trout. Quail is found in the Western peninsula, and partridge is common in nearly every county in the country. The range of the red deer and the black bear is equally wide, while moose, thanks to a long, close season. elk and cariboo are reported plentiful at the outposts of civilization. With Manitoba and the Territories the home of the prairie chicken, geese, ducks, and sandhill crane, with grizzly and silver tip, mountain sheep, and the grey wolf in the Rockies and the foothills, with sea salmon in British Columbia, besides otter, mink, beaver, and other animals valued for their pelts alone, Canada may assuredly claim to be considered the happy hunting grounds of this world.

Buffalo and Pigeons.

The great game family lacks two members—the lordly buffalo and the wild pigeon. Forty years ago the buffalo roamed the Western prairies by the tens of thousands, while the flights of blue rocks literally darkened the sun. To-day there is not a specimen of either in the country outside of a zoo—except, as to buffalo, the herd at Banff. They have been wiped from the face of the earth. No word but "crime" can be applied to the extermination of the buffalo by white "sportsmen." At the same time, though nothing can compensate for their loss, the wholesale destruction of one great species has served as the most powerful argument for the preservation of others. This is the precedent cited when a close season is desired for any bird or beast. Some years ago it was found imperative to more rigorously protect the beer in Canada. The shooting of moose was prohibited altogether for a time, and the open season for cariboo, elk, and red deer was limited to a very few days. The desired end was achieved and the deer increased in a most gratifying manner.

TREES IN BRITAIN.

Much Waste Land on Which Woods Could Be Planted.

The Departmental Committee on British Forestry has issued its report. It remarks on the fact that there are some twenty-one million acres of waste land, a large proportion of which might profitably be afforested. It recommends that two areas for practical demonstration, of not under two and not over ten thousand acres, should be acquired by the State; that lecturers on forestry be appointed in connection with the universities; and that the agricultural colleges make the subject part of their course. The proposal to set apart experimental areas is interesting, and we are rather of opinion that such an experiment would not make Alice Holt—one of the areas suggested—much less profitable than it is to-day. Some, indeed we may say all, the other recommendations strike us as pious and quite proper. Unhappily we doubt gravely whether this entirely well-meaning report will result in any considerable planting and replanting operations on the part of the owner of land. The fall in the value of timber and underwood has been great during the last quarter of a century. Oak, for instance, to-day is hardly worth the stripping, though the price of the wood itself has been lower in the past. Larch is one of the few timber trees which the landowner finds he can plant on poor land with something like assured profit. The clause in the report referring to the estate duties may remind us of the undoubted fact that Sir William Harcourt's Finance Act must be held responsible for the fall of a great deal of timber in English woods which is not likely to be replaced in the near future. Too often it must be the only way to pay off the duties.—Saturday Review.

Sketch by J. Swift McNeill.

Events reproduces the following description of Mr. Joseph Chamberlain from a sketch by J. Swift McNeill, an Irish Nationalist M. P.: "He is of medium size, somewhat slightly built, with legs too short in proportion to his frame. It is said by physiologists that the face of every human being when closely scrutinized resembles some animal, and, applying this test to Mr. Chamberlain, I think his face bears a by no means far-fetched likeness to the face of a fox. This resemblance is very striking when one looks at his profile. He has a high forehead, a Roman nose, well-chiselled features, a mouth expressive of great determination and large, dark blue, luminous and somewhat cruel eyes. His face, which seems pallid in its color at a distance, has, when one looks at it closely, an unhealthy yellow hue which perhaps is made more strikingly apparent by the coal-black color of his thick and luxuriant hair. As one looks at Mr. Chamberlain casually, one would guess his age to be about five and fifty, but as a matter of fact in 1576 Mr. Chamberlain was a man of the mature age of forty years, who had already enjoyed a civic career of great distinction, and had made a large fortune in trade."

RESERVE.

RIGHT OF WAY FOR RAILWAYS, ETC.

Notice is hereby given that all Crown lands along the located lines of any railway, power or tramway company, incorporated under authority of the Legislature of this Province, and having a width of fifty [50] feet on each side of said lines, are reserved for right of way purposes for such railway, power or tramway company.

W. S. GORE,
Deputy Commissioner of Lands & Works.
Lands and Works Department,
Victoria, B. C., 3rd October, 1905.

RAILROAD NEWS.

Lillooet is to be on the MAIN LINE OF G. T. P.

There are startling indications that North Vancouver, not Kaien Island, is to be the real terminus. Members of the Ottawa Government, and Cabinet Ministers have been investing large sums in real estate in Vancouver.

They are the fellows that sit up and take a bird's eye view of the situation.

The new Transcontinental appears to be surveying the gaps in the Canadian Northern, so as to buy the various patches of that road, finish it and get into B. C. a couple of years sooner.

The Provincial Governm't has a notice in this issue to reserve 100 ft right of way, for located lines of railway.

Three lines were surveyed by different parties from the Yellowhead Pass to Waddington Harbor on Bute Inlet, a distance of under 500 miles, and from there to Esquimault is a little over 200. One of these old surveys strikes the North Thompson and extends along it as far as the Clearwater, thence westerly.

B. C. GAZETTE.

6th November, at 10 a m at Lillooet Court House, C. Phair will hold a Court of Revision to hear and determine objections to any name on the Register of Voters for Lillooet Electoral Dist.

The following lands have been surveyed, and plans filed at Victoria, and at the office of Ass't Comm'r F. Soues, Clinton.

Lot 797 A S Watson, pre-emption Ap 21, '05
798 M Watson, ap purchase June 3, '05
799 W Hooley do
800 E Watson do

Herbert Charles Rayson, Esq, of Bonaparte, to be License commissioner for East Lillooet in place of Wm. Boyd, deceased.

Hip Tuck Lung, Wong Jhow, Wong Soon Ping, Wong Shim, and Quong Tuck Wing have dissolved partnership.

The Sudbury Nickel Mines.

Fifteen years ago the world's supply of nickel was chiefly drawn from the mines of New Caledonia, supplemented by the Qap Mine in Pennsylvania, and a few isolated workings in Sweden and Norway; to-day about one-half is derived from the Sudbury district in Northern Ontario, where mining operations began in 1886. Some years ago experts employed by the United States Navy Department examined the Sudbury deposits of nickel-bearing one (a pyrrhotite containing from 1 1-3 to 3½ per cent. of nickel, and from 2 to 4 per cent. of copper, which does not, therefore, deserve the name of "kupfer nickel" or "goblin-copper") and reported that there were 650,000,000 tons of ore in sight, and since then other important discoveries, some of which are already being developed, have been made within an area of about 2,000 square miles. In 1900 the Sudbury district produced 7,080,000 pounds of nickel in "matte," which averages about 25 per cent. copper and 18 per cent. nickel, and there can be no doubt that its product will eventually monopolize the world's markets, and that Sudbury is destined to occupy much the same position in regard to nickel-mining that Kimberley holds in regard to the production of diamonds. Wherever strength, malleability, the capability of taking a fine polish, and freedom from rusting are required—as in the construction of cannon, small arms, armor-plate, boilers and machinery—nickel steel is in request, and the fact that the price of nickel has risen considerably in the last two or three years would appear to show that the supply has not increased pari passu with the demand.—London Morning Post.

BY C. W. ARMSTRONG

CLINTON.

The Grand Jury presented the following address to Mr. Justice Aulay Morrison ;—

We, the members of the Grand Jury assembled at Clinton, beg most respectfully to welcome you to our district, and we trust that you will find the bracing atmosphere of the Upper Country agreeable and beneficial to you.

We are satisfied, that with the exception of one case of serious character, the docket is a proof to you, of the law-abiding character of the inhabitants of this large District.

We are also pleased to see that the representations of the Grand Jury in reference to the better accommodation of the Petit Jury have been considered and acceded to.

King against Prentice, no bill.

James Grinder, for horse stealing, is to be tried again at Vernon, as two petit juries failed to agree. Grinder has already been 11 months in jail. The evidence against him is not very conclusive.

King vs Patrick Callaghan. The prisoner pleaded guilty of stealing jewelry and nuggets from A. Beaton's house at Slough Ck and was sent to gaol for 3 years.

Oleson tried for killing a man at Spence's Bridge, was acquitted on the grounds of self defence shown by the evidence. Hopcroft insulted Mrs. Olsen, a respectable Swedish woman and followed her to her tent, where he attacked Olsen with a rock, and got the best of him. Oleson retreated into the tent for his gun, and Hopcroft attacked the woman, but was shot dead, receiving a charge of No. 4 shot in the head.

COURT AT CLINTON.

The Knight of the Ashcroft Journal was on the jury lists,—and is so pleased with Clinton, he went home and composed a racy article, which he set standing, out of his head.

He says from 100-mile down, and east and west as far as you like, there is a feeling that the Constitution depends on Court being held at Clinton. Why ?

"First there is Mr. F. Soues, Government Agent and Registrar of the court. For 25 years he has attended to the business of the Government. As Registrar he has acted with 12 Judges and paid juror's fees innumerable.

"Then again the clean, comfortable, convenient quarters for conducting the court's business. —Where would you find the like if the court were held anywhere else ? Tell me that.

"Some of the jurors want upholstered seats, but they'll never get them. Mr. Soues is too intelligent a man to place temptation in the way of a juror. We do think, however he might arrange for a supply of matches.—It's very disconcerting to have 12 men demanding a match from you all at once.

"Then there is another reason why Court continues at Clinton and it cannot be lightly passed over, and that is the ability of Clinton hotel keepers to accommodate the mob."

DROWNED AT PEMBERTON

Wm. Greer, formerly a Vancouver man, but lately a resident of the Lillooet country, was drowned in the Lillooet river last week, news of the sad event having been brought to the city by Mr. Punch. Greer lived on a ranch on the Lillooet river near Pemberton Meadows, and in going from a neighbor's place to his own, he fell out of his canoe in some unaccountable way, and was drowned. The canoe was found next day farther down the river, but the body has not been recovered. John Greer, a brother of deceased, leaves Vancouver on Saturday to look for the body. The ranch is about 70 miles from Squamish. [WORLD.

THEM. CHINKS.

Bell-Irving referred before the Tariff Commission to the very large and rapidly growing sentiment in favor of reducing the head tax on immigrant Chinamen, and asked for favorable action by the commission. It was advocated to make it $100.00 once more. In 1903 the province made $438.019.00, and only $5522 next year on the raised rate. Half of this must be deducted for Dominion Government. So this province lost two hundreds of thousands. Bell-Irving declared that at the canneries salmon were refused from Canadians because of lack of Orientals inside to take care of the fish. Chinamen he claims are most useful instruments in developing a country. They have been asking advanced wages ever since the increase in taxes.

Ethical reasons cannot be mentioned to a tariff commission. They don't Go.

The real reason for bringing over these foreigners is —It is a sin to leave them crawling over one another in misery and degradation, and plenty of room for them on this side.

NOTICE

Notice is hereby given that 60 days from date I shall apply to the Chief Commissioner of Lands and Works to purchase 80 acres of pasture land in Lillooet District, situated as follows:—

Commencing at the south-west corner of B. H. O'Halloran's application, thence south 40 chains, thence east 20 chains, thence north 40 chains, thence west 20 chains to point of commencement.

NOTICE.

Notice is hereby given that 60 days after date I shall apply to the Chief Commissioner of Lands and Works to purchase 120 acres of pasture land situated in Lillooet District, as follows :—

Commencing at the south-west corner of Lot 654, Group 1, thence south 20 chains, thence east 60 chains, thence north 20 chains, thence west 60 chains, to point of commencement. A. M. BUSHNELL.
Clinton. B. C., Sept. 12, 1905.

NOTICE.

I hereby give notice that sixty days after date I intend to apply to the Honourable, the Chief Commissioner of Lands and Works, for permission to purchase forty acres of pasture land, more or less, starting from the southwest corner post of Lot 800; Lillooet District ,— thence west 20 chains, thence north 20 chains, thence east 20 chains, thence south 20 chains to point of commencement.

ALAN S. WATSON,
Lac La Hache, Sept. 24th, '05.

hATCHERY.

Mr. Babcock has inaugurated a scheme which will assist to a great extent in relieving congestion in the hatching troughs. He intends shortly to fence in with woven wire netting of close texture, some 1200 feet along the length of the stream, and in that enclosure, safe from trout and other predatory fish, he will put the salmon ova, some time prior to the actual initial rupture of the eggs through the gradual development of the fry. In this enclosure the fry will have plenty of room in the running water for the development they should attain before they are allowed to run to sea. The fry are usually from three to three and one half inches long when they are allow- to start for the sea and forage for themselves. PROVINCE.

Forty Million Eggs now under treatment at Lillooet Hatchery.

The first salmon school entering the Fraser always goes the furthest up stream. Why, you say, of course. But how do they know which turn to make at the many forks and tributaries.

The first batch of wigglers will probably be out about Hallowe-eve.

The General Manager of the B. C. Packers, who was up last week says we have the most complete and up-to-date hatchery he has visited.

HERE AND THERE

Arthur Phair and Paul Santini got back with some game birds from the vicinity of the 70-mile House, having gone up there on serving their terms as jurymen at Clinton.

A. Richey has been undergoing an operation for the removal of one eye, which it is to be hoped will prove beneficial.

The Episcopalian church was very becomingly decorated for a service of thanksgiving Sunday morning, conducted by Rev. Mr. Pugh. It is remarkable how the fruits and flowers can be combined with the more substantial blessings of the harvest, to form a harmonious and attractive display.

Rev. A. K. Sharp preached a lively sermon from the story of Naaman the leper, taking that dreadful disease as a type of sin.

R. Hoey, Sr. has been seriously ill at the coast.

Stephen Retasket shot a wild goat, back of one of the mountains that overhang the town.

Fred Carson and Walter Brown secured five wild geese in a short time, one day last week.

Mr. Uren has purchased 540 sheep for his ranch.

The infant child of James Antoine was buried at the Lillooet rancherie.

Tyee Jimmy has been enjoying a visit to the Big Show.

The Government has been making some improvements on our front back-street. A substantial half-bridge has been constructed to enable teams to pass along the back of the lots from Mr. S. Gibbs' to Dr. Sanson's.

A. C. Minty returned from a short excursion to the Fair, and coast cities, including Seattle,—which he says cannot compare with Vancouver for prosperity.

5000 TELEGRAPHERS NEEDED!

Annually, to fill the new positions created by Railroad and Telegraph companies. We want YOUNG MEN and LADIES of good habits, to **Learn Telegraphy** AND R. R. ACCOUNTING.

We furnish 75 per cent of the operators and Station Agents in America. Our six schools are the largest exclusive Telegraph Schools in THE WORLD. Established 20 years and endorsed by all leading Railway Officials.
