THE LILLOOET PROSPECTOR

Vol. 1 No. 22 FRIDAY, APRIL 12, 1912 $2.00 Per Year

GOOD WEEK IN LILLOOET REALITY

A marked increase in the demand for Lillooet reality was shown this week. This rate of activity started early and throughout the week the autos have been doing double shifts bringing in land holders and prospective investors. The hotels have been bordering on capacity business and in the lobbies the general topic of conversation is land, land values, water rights, etc. Several deals were closed up, and there were several more started that should swell next weeks' list of sales. There was the usual heavy demand for ranches, and a decided increase in the number of inquiries for town property.

The most important transfer of the week was the closing up of the deal for the Joe Copeland ranch, about two miles down the river from town. This place is comprised of about 80 acres and is located on one of the best benches on the Fraser. The names of the purchasers has not been made public in Lillooet, but it was understood that the consideration was in the neighborhood of $10,000. In town, Artie Phair purchased the lots directly behind the C. A. Phair store property from Sing Lung. E. S. Peters sold to Dr. Clarke a 20 foot strip on the east side of the old butcher shop for $30 a foot or $600. Dr. Clarke will start the construction of a store building at once and when completed will open up in the drug business. J. N. Cran has practically closed a deal for the sale of the Dave Coughlan property in the west end of town. This property Mr. Cran but recently acquired and is now said to be turning it over at a very good profit.

SS. BRITTANIA CHANGES HANDS

Walter Cox and Alex Phair this week purchased the SS. Brittania and hereafter will be known locally as "chief" and "captain." It is said that the price paid was in the neighborhood of $2000. The new owners will put extensive repairs on the boat and have her in condition for the heavy traffic that is expected to go over the lakes into the Pemberton country this year, and for the rush into the Bridge River mining section. F. H. Kinder, former owner, will now devote his time developing his mining interests in this section.

WORK STARTS ON BRIDGE RIVER ROAD

Road Superintendent J. S. Bell with a crew of men left last Monday to start the season's work on the Bridge River road. There are at present about 20 men in the crew and they will be employed in cleaning out the finished part of the road, but as soon as possible will be put on to rush to completion unfinished stretch to the mines. This crew is under the foremanship of Alex McLeod and will be increased in number as rapidly as possible. The crew now under Foreman Jones, now working on the Ashcroft road, will also be moved to the Bridge River road in the near future.

Mr. J. Vivian is registered at the Victoria from Lytton. He is a sign painter by occupation and has come to Lillooet to open up in this business. He has now in course of preparation several neat and attractive signs for local business firms.

WILL SURVEY PIONEER WORK STARTS AT LORNE

E. H. Leslie, representing P. H. Booth, the Vancouver engineer, with a party of surveyors are registered at the Victoria. They will leave on Monday for the Bridge River section where they will be employed for some time surveying several mineral claims, including the Pioneer group, one of the well known properties on Cadwalladar Creek. Mr. Booth is expected to arrive in Lillooet some time next week to size up the situation with the view of opening a permanent office here.

WORKING ON SETON LAKE

W. Haylmore is employed these days doing development work on the Seton Lake mineral claims belonging to J. Dunlop. Considerable work has already been done on this property, one tunnel having been driven 380 feet. Assays prove the ore to be of importance and with its location near the proposed railway line it is one of the good base ore propositions that are to be found in this district.

Carpenters are busy remodeling the blacksmith shop. The shop will be moved into the basement and the upper part will be converted into a garage for the accommodation of the numerous automobiles that are now running into Lillooet.

Messrs. Ledgerwood and Arthur of the Seton Lake Hatchery left this week for Bridge River to start operations at the new trout hatchery on Fish Lake.

S. D. Trethewey of Chilliwack was a Lillooet visitor this week.

Dan Hurley will leave early next week for the Lorne mine to make all arrangements for the season's run at that property. Already the advance guard of the crew have gone in and as soon as Mr. Hurley returns from this trip more men will be sent to the mine for it is the intention of the owners to make this one of the largest years in output in the history of the property. The Lorne is generally conceded to be one of the most promising properties on Cadwallader Creek and several experts have pronounced it one of the best propositions in the province. Last year from a short mill run nearly $8000 was taken from the plates and experiments with the concentrates by means of a blanket showed assays running high, so in consequence, the company will install concentrating machinery as soon as the wagon road is completed to the mine.

PAVILION PARAGRAPHS

R. H. Carson arrived on Monday and left on Tuesday for Empire Valley and upcountry parts.

D. J. Stewart is expected home this week.

Arthur Harmon, an old-timer of Pavilion, has purchased a 60-horse power auto which he will put on the Cariboo road.

J. B. Bryson is seeding on the Grange and the Carson ranch are ready to start next week.

The snow has disappeared and we had a few days rain. The grass is showing on the hill sides.

Gus Minch, foreman on the Stewart ranch, is minus a few teeth as a result of being hit with a logging chain while drawing sawlogs.

THE PROSPECTOR

Permanently camped at Lil ooet, C

Sending out samples every Frid afternoon to be assayed by t e public at large.

Yearly, $2.00 in advance. Single copies, five cents.

FRIDAY, APRIL 12, 1912

A Good Move

The movement now on foot in Vancouver to organize a mining men's club is an excellent idea and is something that has long been needed to place Vancouver where she belongs as the center of mining development in British Columbia The club will become a clearing house for the interchange of opinions and information and perhaps for the financing of worthy undertakings that would otherwise go undeveloped for the lack of a few dollars and a little interest. The social advantages of such an organization are not to be over looked. It is intended if the proposal meets with favor to engage quarters large and commodious so that mining men of the province will be able to make the club their headquarters while in that town.

TRI-WEEKLY SERVICE

Notices were posted in Lil looet this week calling for tenders for the mail contract between Lytton and Lillooet. Two separate tenders were called for; one for the present semi-weekly service between the two places, and the other for a tri-weekly schedule to arrive in Lillooet on Tuesday, Thursday and Saturday of each week. This place is growing more and more in need of a more frequent mail service and the tri-weekly delivery will be a great convenience.

BUSY WEEK

This week proved a busy one for the autos on the road between Lytton and Lillooet as there was a noticeable increase in the passenger traffic between the two places. The majority of the new arrivals were parties coming in to look over the possibilities here or those already interested in mines or lands in this section.

NIGHT LETTERGRAMS

Mr. S. A. Mcfarlane, local operator for the government telegraph service, has been notified that starting the first of this month a night lettergram service was placed at the disposal of the public which will enable patrons to send a 50-word message by this night service at the cost of a 10-word day telegram, with a rate of 1-5 of the day charges for every additional ten words above the 50. These night lettergrams can be handed in at any time during the day, but must be in the operators hands in ample time to permit their being sent the same day they are handed in. In a place like Lillooet where there is no night operator and where there is some uncertainty of making immediate connections lettergrams should be handed into the office at an early hour as is possible; if the message is received too late it may not be possible to get it through before closing time at eight o'clock. A night lettergram will be delivered to the party it is addressed to on the following morning.

NORTH FORK MAIL SERVICE

J. Birch, the new postmaster at North Fork or Moha, as it is now known, came in last Tuesday and returned on Wednesday. This was the first trip on the new monthly mail service which was recently granted to this progressive farming and mining settlement. The schedule calls for mail delivery on the second Wednesday of every month.

EARLY SEASON

Lillooet, after an exceedingly mild winter, is now enjoying an early spring and already the apricot trees and other early fruits are out in blossom. The hills have started to take on a decidedly green hue and the trees are leafing out rapidly. Reports from over the district are to the same effect and it is stated that on Bridge River the grass has already reached considerable height.

"Billy" Durban's new 30 foot launch is nearing completion and will soon be ready for her plung into Seton lake where she will ply this year.

NEW REAL ESTATE FIRM

Phair & Keary, that's the name that Lillooet's new real estate firm will be known by and H. L. Phair and H. J, Keary are the partners in this new business venture. They will construct an office building on the lot next the postoffice and lumber was hauled in this week for that purpose. Construction will start on Monday and they expect to beopenfor business early the week following. Both Bert and Harry are well and favorably known throughout this part of the country and their numerous friends wish them every success in their venture. They have listed some of the most desirable properties in this locality and are adding daily to their offerings, so should be able to start off with a first-class showing. They earnestly solicite your patronage.

Tommy Hurley, who has been attending school at the coast, came home last Sunday. He expects to leave for the Lorne mine tomorrow.

Water Notice

For a License to Take and Use Water

NOTICE is hereby given that John B. Arthur of Lillooet, fish culturist will apply for a licence to take and use 1.4 cubic feet per second of water out of a spring which is situated on pre-emption No. 1419, The water will be diverted where it springs from the ground and will be used for irrigation and domestic purposes on the land described as pre-emption No. 1419.

This notice was posted on the ground on the 8th day of April, 1912. The application will be filed in the office of the Water Recorder at Clinton on May 9th, 1912.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

JOHN B. ARTHUR, Applicant

Water Notice

For a Licence to Take and Use Water

NOTICE is hereby given that H. J. Keary of Lillooet, farmer, will apply for a licence to take and use 1 cubic foot of water out of a spring in the mountain behind Lot 2424. The water will be diverted at the spring and will be used for irrigation and domistic purposes on the land described as Lot 2424.

This notice was posted on the ground on the 28th day of March 1912. The application will be filed in the office of the Water Recorder at Clinton on the 6th day of May, 1912.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights Parliament Buildings, Victoria, B. C.

PLENTY OF ROOM FOR PROSPECTORS

There is plenty of room in Lillooet district for prospectors. Though mining has been one of the chief occupations in this section for years the operations have been confined to limited areas and there are miles of unprospected territory awating the ring of the prospectors pick. Lillooet district embraces 10,300,000 acres and in this vast area there is scarcely a stream from which colors cannot be panned or a locality that does not indicate metalliferous deposits of some character. The widely separated locations of the different propositions now being developed is proof of the extensive area included in the mineral bearing zone. Between Lytton and Lillooet there are promising claims of base ores and a large unprospected field. On Cayoosh Creek near the town of Lillooet are placer propositions that are making good. On north side of Seton lake a contact can be seen extending for some miles between a coarse grained granite above and a dark colored, fine grained eruptive rock below. Along this line of contact a fine grained, massive sulphide ore is found and some claims have been located. One tunnel has been driven some 380 feet and assay returns prove the ore of great importance, carrying gold and a small proportion of silver. McGillivray creek on Anderson Lake has some promising properties and has been well prospected in the immediate locality. One of the properties on this creek has been quite extensively developed and has a 10-stamp mill. The Blackwater district in the Pemberton country has large deposits of copper-gold and has bright prospects. North Fork, a tributary of Bridge River, also has excellent base ore propositions and there are numerous placer claims on this creek. On Watson Bar Creek, 45 miles from Lillooet up the Fraser, a promising strike was made last fall. Bridge River, now the center of attraction among mining men, has been prospected for several years but every year some new find is recorded so there are still opportunities with this free-milling belt for prospectors to operate.

But the mecca in Lillooet district for incoming prospectors is the vaststretches that lay between these widely separated scenes of operations. Hunters and others who have had occasion to penatrate these isolated places bring back reports of mineralized indications in manyportions and it is stated that in many instances contacts can be traced for many miles.

When the railroad is completed through the district there will be not be the old drawback of "lack of transportation" to contend with and to the prospector who makes a strike and opens up his property in a conscientious manner there should be a ready sale as investors are already taking a lively interest in Lillooet's mining opportunities.

BACK TO THE HILLS

Joe Shuster, Tommy Alford and Pearl Mays were passengers on Monday's boat bound for Bridge River. The two former were Lillooet visitors for several weeks transacting business and return to the Gun Creek ranch to make preparations to accommodate this season's rush into the mining section at that popular stopping place. Tommy Alford will return to Lillooet next week and from here will start on an extended trip through the northern country. Joe has made arrangements to furthe mines and road camps with beef this season and will be down about the first of May to drive in a bunch of beef cattle which he purchased during his recent visit Pearl announced his intention of playing the role of mighty hunter for some time before he settles down to the season's work. His quest is a big grizzly that has been reported about that section for some time.

Mark Eagleson, boniface of Lillooet has been in the city for the last few days and is returning to his home in the gold-cattle country short ly. He says business is good in Lillooet and predicts a great boom for the Bridge river section during the next twelve months.—Vancouver Sun.

J. Chism left for the Coronation on last Monday's boat.

Water Notice

NOTICE is hereby given that an application will be made under Part V. of the "Water Act, 1909" to obtain a licence in the Lillooet Division of Lillooet District,

a. The name, address and occupation of the applicant, Mable Phair, Victoria, spinster.

[If for mining purposes] Free Miner's Certificate No.

b The name of the lake, stream or source [If unnamed the description is] a stream running into Seaton Lako near western corner Lot 1121.

c The point of diversion near the southwest corner of Lot 1121.

d. The quantity of water applied for [in cubic feet per second] 2.8

e. The character of the proposed works, Ditch and Flume.

f. The premises on which the water is to be used [describe same] Lot 1121 on Seton Lake.

g. The purposes for which the water is to be used Irrigation.

h. If for irrigation describe the land intended to be irrigated giving acreage Lot 1121, 80 acres.

i. If the water is to be used for power or mining purposes describe the place where the water is to be returned to some natural channel, and the difference in altitude between point of diversion and point of return.

j. Area of Crown land intended to be occupied by proposed works ditch.

k, This notice was posted on the 11th day of March, 1912, and application will be made to the Commissioner on the eleventh day of April, 1912.

l. Give the names and addresses of any riparian proprietors or licensees who or whose lands are likely to be affected by the proposed works, either above or below the outlet, none.

Signature—MABLE PHAIR
A. W. A. Phair, Agent
P. O. Address—Lillooet

Water Notice
FOR A LICENCE TO TAKE AND USE WATER

NOTICE is hereby given that William Lee Dickey of Pachelqua farmer, will apply for a licence to take and use one hundred miners' inches of water out of Island Bar Creek which flows in an easterly direction through crown land and empties into the Fraser river near Lot 328. The water will be diverted at half a mile from its entrance into the Fraser River and will be used for irrigation purposes on the land described as pre-emption 1695 Kamloops district.

This notice was posted on the ground on the 2nd day of April, 1912. The application will be filed in the offce of the Water Recorder at Clinton on the 14th of May, 1912.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights Parliament Building, Victoria, B. C.

WILLIAM LEE DICKEY
Applicant

f you want the Lillooet news get The Prospector

Lillooet District

Now that Lillooet is forging into the limelight a few lines regarding its past should not be out of place.

The town of Lillooet as most of our local readers are aware, is one of the oldest settlements on the mainland of British Columbia. In saying this of course, we do not refer to the Hudson Bay forts. These forts were not settlements in the proper sense of the term, but were merely trading posts for the purpose of bartering supplies with the Indians for furs. The Hudson Bay company did not encourage settlement. In fact it was not its policy to do so, as settlement tended to diminish the supply of furs. In 1858 in consequence of the discovery of gold on the Fraser, a large rush of miners took place. In a short time a large camp sprang up at Lillooet, there being fully 5000 inhabitants here and in its companion camp on the opposite side of the Fraser, called Parsonville In the course of a couple of years a large quantity of gold was washed from the gravel in the numerous benches round Lillooet. Then came the discovery of the rich diggings in Cariboo. An exodus of white miners took place; Parsonville was completely deserted and Lillooet probably would also have ceased to exist but for the fact that that the route from the coast to Cariboo passed through it. The route then was via Harrison lake, up the Lillooet river, over Anderson and Seton lakes to Lillooet and thence by the road over Pavilion mountain to the Cariboo gold fields. Lillooet's chief importance then was a stopping place on the road to Cariboo. This route however was not popular in consequence of the many changes from wagon to boat and vice versa, and in the early sixties a wagon road was made from Yale, the head of steamboat navigation on the Fraser, up the Fraser and Thompson rivers which road crossed the Thompson at Spences Bridge The town of Ashcroft did not come into existence until the opening of the Canadian Pacific railway in 1889 and was of no importance until by the construction of a bridge across the Thompson it become the gateway to the Cariboo.

After the construction of the Yale-Cariboo road Lillooet was very dull and there were scarcely any residents except a few storekeepers and some Chinese miners who continued to wash the ground that the white men had abandoned. Previous to the construction of the Canadian Pacific no attention was paid to quartz mining in the province. After the road went throughnumerous prospectors found their way into this section and strikes of more or lessimportance were frequently recorded until '98 when a rich strike created a small sized boom. About the time this excitement was dying out Bridge River started to show up good and since that time has enjoyed a substantial steady era of development which has served to prove the section's real worth. This development, it is true, was not pushed on an elaborate scaleas inadequate transportation facilities prevented capitalists from investing heavily. However, this work done by local parties served to prove the section's resourses and last year saw several properties change hands and extensive development work start. With these capitalists commencing to take an interest in the camp and with the advent of prospectors and mining men in our midst with strong mining companies behind them capable and willing to develop properties we are not unreasonable in looking forward to a bright future for Bridge River.

Don't judge a man's grey matter by the amount of red stuff he consumes.

CLINTON NEWS BRIEFLY TOLD

Mr. and Mrs. Ike Hunt arrived from Owen Sound a week ago, and are now visiting Mrs. Sam Boyd, Mrs. Hunt's sister. Mr. Hunt was formerly manager of Dr Jones' ranch, Lillooet.

Miss Sharp who has charge of the school here, left on Friday to attend the teachers convention at Kamloops.

Mr. D. A. Stoddard and children went up to the 83-mile house to spend the Easter holidays.

Mrs, Henderson has resigned her position as housekeeper at the Clinton Hotel where she has been for the last year.

Miss May McDonald is spending Easter week with Mrs Cunningham at the 74-mile house.

Mrs. J. P. Murphy and daughter spent a day in Clinton this week on their way to the coast.

CARIBOO PIONEER VISITS LILLOOET

Mr. and Mrs. William Adams of Soda Creek are registered at the Victoria and will remain in town for several days visiting old time acquaintances and taking in the attractions that Lillooet has to offer. Mr. Adams is a pioneer of the Cariboo section, having gone in with the first rush to that camp. He has mined in nearly every part of that section and during later years has been engaged in ranching in the vicinity of Soda Creek. Both he and his wife are widely and favorably known throughout the upper country.

Water Notice

I, B. S. Swanson, of Anderson Lake, by occupation farmer, give notice that I intend on the 25th day of April at eleven o'clock in the forenoon, to apply to the Water Commissioner at his office at Clinton, B. C., for a licence to take and use 2 cubic feet of water per second from 3-mile Creek on Anderson Lake, to be diverted at a point about 1500 feet up the creek.

The water to be used on Lot No. 2662 for irrigation purposes.

Signature—BRORE S. SWANSON
Agent for John Sundquivst
