# THE PROSPECTOR.

VOL. 2, NO. 37 LILLOOET, B. C., FRIDAY, JULY 25, 1913. $2 PER YEAR

## PHONE IN ONE MONTH.

### Immediate Construction of Lytton-Lillooet Line.

### MATERIAL TO BE RUSHED IN.

### S. A. Macfarlane Due Here Next Week to Start Work.

Following on the suggestion made in the Prospector that construction of the Lillooet-Lytton telephone line should be undertaken at an early date, telegraphic advices have been received from Mr. S. A. Macfarlane that the work is to be commenced by the Dominion Government.

Mr. Macfarlane informs this journal that he will be in Lillooet next week for the purpose of starting the work, and that material will be rushed in with all possible expedition. Unless unforseen difficulties arise, the line should be in operation in about one month.

That this service will be of immense value to merchants and residents in each town, as well as to intervening ranchers, can be readily understood. For many years its need has been keenly felt, and efforts have been made to secure its establishment.

### Indian Catches Beaver in Net on Fraser River.

A unique capture of a beaver on the Lytton road on Friday morning was related to the Prospector by Arthur Martley. An Indian started from his home at the 30-mile, at 5 a. m., starting down the river, fishing for salmon with a hand-net. He quickly caught a couple of the fish, when he saw a beaver approaching. The little animal swam towards the net, its meshes arousing its curiosity. Standing perfectly still until the beaver was in the net, the Indian effected the capture. At 7 o'clock he was shoveling gravel for the government, on the Big Slide, at $3 a day.

### Big Track-Laying Machine Now Working Toward Lillooet.

Grading of the P. G. E. from Newport to Lillooet should be completed by January next, with the exception of two or three big cuts. Such is the opinion of contractors. The big track-laying machine is now in full swing, working out of Newport, several miles of steel being already laid from that end. Grading on Seaton and Anderson lakes is nearing completion. Between Seaton lake and Lillooet the work is in full swing, while north-east from town D. A. Rankin has seven camps established and is daily increasing his gangs.

Mark Eagleson left on Tuesday for a visit to the coast.

### Breaking Into Safe of Excelsior Hotel Robber Gets $122.

An unknown robber effected entrance to the office at the rear of the Excelsior Hotel bar, on Tuesday night, succeeded in breaking into a small safe, and stole $122. No clue has been discovered as to the identity of the thief, although the police are at work on the case. Indications point to the burglary having been committed by one well acquainted with the house. Entrance was gained from the rear of the building by way of the kitchen, and through the dining room. A pass key which turned the locks of the intervening doors was found on the rifled safe.

By some oversight the combination of the outer door of the safe had been left set. The lock of the inner door was turned by means of a duplicate key. Some silver, to the value of about $15, was left undisturbed.

### Splendid Crops Through Pemberton Meadows—Realty Activity.

Having leisurely walked through Pemberton Meadows, from Newport, L. M. B. Falconbridge and C. I. Neal arrived in Lillooet on Saturday. The two pedestrians report everything in perfect shape through the Meadows. Several realty deals at high figures have been put through this season, testifying to the value of the land, especially from an agricultural standpoint. Baker recently sold ten acres of his ranch at $500 an acre.

In all parts of the Meadows the crops are looking exceptionally fine and give promise of wonderful harvests. The wagon road is completed from Newport to the head of Anderson lake, and in fine shape for freighting, all railway supplies coming in that way.

### Third Game of Lillooet-Lytton Series to be Played Sunday.

Lillooet and Lytton will renew rivalry on the baseball diamond on Sunday. On the success of this game hinges a thousand dollar side bet between Arthur F. Neel of Lillooet, and J. J. Farrell of Lytton.

A keen game is expected. Each team has now one game to its credit in this year's series. Lytton won the first game, while Lillooet scored a decided victory last Sunday, the score standing 13-3.

### Engineer Manning Dies.

Cory Manning, an engineer on one of the P. Welch boats on the lakes, died of pneumonia and tuberculosis, July 21. Death took place at the company hospital on the Short Portage, where deceased had for some weeks been under the care of Dr. Taylor. Deceased is survived by a wife and four year old boy.

## FATAL ROCKSLIDE.

### Young Man Meets Death on P. G. E. Construction.

### ONLY IN COUNTRY SEVEN WEEKS.

### Brother Has Narrow Escape From Sharing Untimely Fate.

Struck by falling rock while at work on P. G. E. construction at Seaton lake, Joseph Howard, a young Englishman, was instantly killed on Tuesday afternoon. Deceased only arrived in Canada from Esson, England, seven weeks ago. He had been working on the railroad six weeks.

Standing by his side when the accident occurred, was his brother James Howard. At the inquiry held on Wednesday by Coroner Phair, the brother stated that about a ton of rock fell about thirty feet from the mountain side, striking Joseph on the head, shoulders, and other parts of the body, killing him instantaneously. After being struck the unfortunate man uttered no word or cry. No blame was attached to any person, the rock having given no warning of danger.

To mourn the loss of a son in a far off land is the father and mother of deceased, who are living in Yorkshire.

### Grade of One Per Cent. for the Pacific Great Eastern.

"I have been informed by the chief engineer of the P. G. E. that the engineers now finally locating that line south of Fort George, preparatory to grading work, have been instructed not to make any locations calling for a grade of over 1 per cent.," stated Mr. F. C. Gamble, chief inspector of railways, in Vancouver, a few days ago. He returned the other day from an inspection of the Pacific Great Eastern route between Anderson lake and Quesnel. It is to this section that his remark respecting a grade of 1 per cent. particularly applies. Mr. Gamble went over the route in company with Chief Engineer Callaghan of the P. G. E. He inspected the proposed line on behalf of the Provincial Government.

"Great activity on the P. G. E. is prevailing along Seaton and Anderson lakes, and I am told that there are 1300 laborers in the various grade construction camps in that section," the Provincial engineer said today. "The company has made a good start grading on the east bank of the Fraser river north of Lillooet. While the line has not yet been definitely located for the entire distance between Lillooet and Quesnel, that stretch is being rapidly covered by the surveying parties who are running the final lines."

## AROUND THE TOWN

Dr. Sanson and Geo. Ward, of Ashcroft, spent a few days in town this week.

A visitor from a distant mining camp this week was Alex. Dodds, or Porcupine.

A. Ferguson, of Vancouver, arrived in Lillooet this week and went on to the Pioneer.

Thos. Walker, one of the owners of the Marconi group, on Sucker creek, passed through town on his way to the mine. Mr. Walker came to Lillooet from Minneapolis. His residence is in Victoria.

Mr. and Mrs. Sanford S. Davis, of Vancouver, were in town this week.

Mrs. Stephen and daughter left for Calgary last Saturday.

Miss Doris Costerton returned to Vernon last Saturday after a short stay with her grandparents, Mr. and Mrs. Gibbs.

Fred Wycott, an old-timer of this district, is in town, coming in from Hazleton.

E. Williams, of Pemberton, took a trip to town over the week end.

James K. More, road superintendent, was in town Saturday. With him was A. Stewart, of Quesnel.

Bathing has been the chief pursuit in Lillooet during the past few days, the cool waters of Seaton lake affording welcome relief from the heat wave.

John Hendrickson, a Finland laborer, died of heart disease on Tuesday morning at one of D. A. Rankin's construction camps.

J. T. Farmer is on a two weeks' business and pleasure trip to Vancouver.

John Macnamara, known as "Australian Mac," is guilty of the theft of T. J. Trapp's automobile on the morning of Sept. 15, 1911. Such was the verdict of the jury at the Westminster assizes, Tuesday, before Mr. Justice Morrison.

### RIFLE ASSOCIATION.

For the purpose of re-organization, a meeting of the Civilian Rifle Association will be held in the lobby of the Excelsior Hotel on Saturday evening, 26th inst., at 8 o'clock.

## Water Notice.

### FOR A LICENCE TO TAKE AND USE WATER.

NOTICE is hereby given that Owen R. Evans, of Mohn, Lillooet District, B. C., will apply for a licence to take and use one cubic foot of water out of Four-mile creek, which flows in a westerly direction through Crown land and P. R. 1680, and empties into North Fork of Bridge river, near P. R. 1680. The water will be diverted at about one mile from mouth, and will be used for irrigation purposes on the land described as P. R. 1680.

This notice was posted on the ground on the 17th day of July, 1913. The application will be filed in the office of the Water Recorder at Clinton.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

OWEN R. EVANS.

## SHOULD BE SENT HOME

From time to time in various newspapers have appeared comments on the injustice and evil effects of the system of turning loose discharged prisoners without supplying them with necessary means to return to their homes.

A case which was heard a few days ago in the Kamloops police court illustrates clearly what has long been too obvious a defect in the treatment of prisoners, and also shows its local application. An Indian woman from Lillooet on her discharge from the provincial jail at Kamloops, instead of being sent back to her own reserve, appears to have been merely turned loose without help or counsel, to sink or swim. She has fallen quickly enough into the hands of the police again, and thus has sunk deeper into the mire of misfortune, and caused trouble to the city authorities, expense to the people, and general unpleasantness.

This unjust treatment of released prisoners has not only been a subject of newspaper and private comment, but grand juries in various parts of the province have expressed their views upon the present practice. At the last assizes held at Kamloops the grand jury presented this matter in very direct terms to His Lordship Chief Justice Hunter, who concurred absolutely in the condemnation passed and the need for remedy suggested.

Immediate reform is urgently needed. Under the present system, instead of having a remedial effect, a jail term too often becomes but an apprenticeship to crime, unless the prisoner is properly cared for on discharge.

### Chamber of Mines.

In a letter to the Prospector, Mr. F. S. Pilling, secretary of the Vancouver Chamber of Mines, writing of the work of that institution, says:

"At the present time the Lillooet district is very poorly represented, and in view of the visit of the International Geological Congress which is now assembling in the east, and is due in Vancouver on the 27th Aug., we wish to have as representative a collection of the minerals of the province as can be got together.

"What we would like to see done is that the Lillooet people should take a leaf out of the book of the Stewart folk. In that city the citizens banded themselves into an organization entitled Stewart Citizens' Association, and they collected from the various mines in the Portland Canal district representative ores, packed and shipped them to us entirely free of charge. This was made possible by the co-operation of the owners of the properties, the transfer companies who brought them into the city of Stewart and there packed them and delivered them to the steamship company, and the citizens who put up the necessary freight charges.

"The result is that the Chamber of Mines has reserved the whole of one big show case for the Portland Canal specimens, and a very fine collection they make. The case contains specimens from sixty-five different properties in that district.

"Now, if the Vancouver Chamber of Mines is prepared to provide exhibition cases free of charge (they cost us upwards of sixty dollars apiece), and is also prepared to pay a heavy rent for the exhibition rooms and provide the necessary organization to look after the exhibit and world-wide enquiries, it does not seem to me to be too much to ask of the mining community that they shall furnish representative specimens from each mining district and deliver them to us free of charge. For, the income of this organization is derived solely from membership dues of five dollars per annum, and from donations made by the people of Vancouver and district, and we simply cannot afford to bear the whole cost of a work which is being done solely in the interests of the mining industry of the province.

"As instances of the good work we are doing, we recently received a visit from Sir Richard McBride, Premier and Minister of Mines, who, after investigation of our work, expressed himself astonished and impressed with what we are doing. Another instance was that of the director of a large English firm of steel makers, who, whilst visiting the local branch of the house, covered a good deal of the province, and constantly found evidences of the good work we are doing; so much so, that he sent us a donation of $50.

"And I may add that, although we do nothing in the way of listing properties for sale, and do nothing of a brokerage nature, we have evidence that if preliminary investigations are supported, at least three big firms of manufacturers using some of the earths and mineral products of the province are likely to establish in British Columbia, local plants for the manufacture of their products, at an estimated aggregate cost of $2,600,000. If this and other schemes go through all right, as there is every indication of being the case, the credit will be solely due to the activities of the Chamber of Mines, and in particular to the persistence with which it was followed up, or dug out the necessary information for the parties making the enquiry, and provided them with all that they have asked for.

"It is now up to Lillooet to show us that they mean to do something."

### WATER NOTICE.

**For a Licence to Store or Pen Back Water.**

NOTICE is hereby given that Henry Murk of Lillooet, B. C., will apply for a licence to store or pen back 30 acre-feet of water per annum, of three small springs flowing in a northerly direction and emptying into the ground near Cayoosh Indian Reserve No. 1. The water will be stored in a reservoir of 30 acre-feet capacity, built or to be built at or near the S. E. corner of P.R. 1954, and will be used for irrigation and domestic purposes as authorized under a notice of application for a licence to take and use water, posted herewith, on the land described as P. R. 1954 in the Lillooet District, B. C.

This notice was posted on the ground on the 19th day of June, 1913. The application will be filed in the office of the Water Recorder at Clinton, B.C.

Objections may be filed with the said Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

HENRY MURK,
Applicant.

July 24, 1913.

### LAND ACT.

**Clinton Land District, Lillooet District.**

TAKE NOTICE that Joseph Zotique Lajoie, of Vancouver, occupation miner and promoter, intends to apply for permission to purchase the following described lands:

Commencing at a post planted at the Western, three hundred feet East of Post No. 1 of the Vancouver Mineral claim at the North end of Lajoie, B. C. Thence North-west 92 chains; thence East 66 chains; thence South-west 92 chains; thence West 22 chains to the point of commencement, and containing four hundred acres, more or less.

JOSEPH ZOTIQUE LAJOIE,
Applicant.

June 30, 1913.

### Land Registry Act.

**Re Lot 162, Group 1, Lillooet District**

NOTICE IS HEREBY GIVEN that I shall, at the expiration of one month from the date of the first publication hereof, issue a Certificate of Indefeasible Title in the name of "Lillooet Farm Lands Development Company, Ltd.," unless in the meantime valid objection is made to me in writing. The holder of the following documents of the said Lots, viz: CROWN GRANT DATED MARCH 2, 1891, to Archibald McDonald; DEED DATED NOVEMBER 28, 1891, Archibald McDonald to the Lillooet Hydraulic Mining Company (Limited Liability) is required to deliver the same to me forthwith.

Dated at the Land Registry Office, Kamloops, B. C, this 30th day of May, A. D. 1913.

P. H. DUNLAP,
District Registrar.

June 20.

## BUY B. C. PRODUCTS.

### Progress Club Initiates Important Project.

### ENCOURAGE HOME PRODUCTION.

### Have Too Long Favored Foreigners, Says Commissioner Rowe.

Vancouver Progress Club is initiating a campaign to promote and foster a "Buy B. C. Products Spirit." Speaking at a recent conference of the club, Dr. Elliot Rowe, commissioner of the club, said:

"What is needed is to encourage a sentiment in favor of British Columbia products, both natural and manufactured. This need not be looked on as narrow and parochial, for it is not. A farmer owning a farm who said 'I will not till my soil. I would rather buy my products from my neighbor,' would be considered a fit subject for an asylum, but this has been the attitude of the people of this province. The time has come for the people of this city to see the importance of earning some money. Up to date we have been making it more or less easily but not earning it. There will be no development in the province until we take the numerous raw materials here at hand and turn them into finished articles.

He went on to state that the city would never be built up if the only money that is staying in this city is the profit that wholesalers make from the sale of outside goods.

Owing to a number of causes, principally high freight rates, the manufacturers of Vancouver could not ship to the East, and consequently had to rely upon the home market, so that it behooved all to use their goods, he continued. As a last suggestion the speaker was emphatic in stating that the Canadian Manufacturers' Association was diametrically opposed to the British Columbia manufacturer, and the sooner that the latter cut away from the eastern organization the better it would be for manufacturing in the province.

## Dominion Government to Establish Additional Experimental Farms.

As announced by Hon. Martin Burrell, minister of agriculture, when he came to this province from Ottawa last fall, the Dominion Government will establish experimental farms at a point between Hazleton and Fort George and also in the Okanagan. To assist in the work of such establishment, Mr. J. H. Grisdale, director of Dominion Government experimental farms, has arrived here. This week he will visit Summerland, where the Okanagan farm will be located on from 100 to 150 acres of bench land. He will be accompanied by Mr. F. C. Elfred Smith. Mr. Grisdale has on this trip completed an inspection of the government farm at Sydney, Vancouver Island.

## Ashcroft Supports Lillooet's Request For Assisted Irrigation.

Following the appeal made by Lillooet to the Provincial Agricultural Commission for assisted irrigation of farming lands, evidence along similar lines was laid before the Commission at its sitting at Ashcroft last week.

The strongest point laid before the commission was that of adequate irrigation for the thousands of acres of arid land in the dry belt. It was entirely out of the scope of private farmers to cope with a difficulty of this magnitude. The government should take this in hand with a view to constructing ditches and supplying water to settlers at nominal cost.

Those who attended the meeting in an official way were: C. A. Semlin, Cache Creek; M. Macabee, Eight-mile creek; P. Parks, Cache creek; G. N. Barclay, Ashcroft; W. Hammond, Basque; G. A. Paull, Venables valley, and W. C. Adam, Ashcroft.

One point raised by Mr. Barclay was to the effect that nothing had ever been done by the government by way of experimental farming in the dry belt, and that conditions that obtain at Agassiz, where an experimental farm has been established, cannot possibly be made to apply through this district.

## Vancouver Adopts Novel Method of Financing Civic Works.

Vancouver City Council has given notice of a bylaw for the purpose of disposing of $100,000 worth of bonds at 90 cents on the dollar "over the counter." The bonds will be of $100 denomination each, and bear interest at the rate of 4 per cent. The object is, incidentally, of course, to get the money, but is also designed to give small investors a chance to buy. But the city has not gone far enough is the opinion of coast papers. In order to ensure success, it should, if possible, have made the denomination of these bonds very much smaller, say $10 each, so that anyone who has saved money could take them up. The experiment of selling bonds locally "over the counter" will be watched with a good deal of interest.

## Water Notice

FOR A LICENCE TO TAKE AND USE WATER.

NOTICE is hereby given that Henry Murk, of Lillooet, B. C., horticulturist, will apply for a licence to use 30 acre-feet per annum of water out of three small springs which flows in a northerly direction through P. R. 1954 and sink into the ground near Cayoosh Indian Reserve No. 1. The water will be diverted at its source, P. R. 1954, and will be used for irrigation and domestic purposes on the land described as P. R. 1954, Lillooet District, B. C.

This notice was posted on the ground on the 19th day of July, 1913. The application will be filed in the office of the Water Recorder at Clinton, B. C.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

HENRY MURK,
July 24. Applicant.

# WATER CONSERVATION

## Observations Being Taken for Dominion Commission

## OLD RECORDS PRESENT DIFFICULTY

### Arthur V. White in Charge of Several Field Parties.

The season's work in British Columbia of the Dominion Commission on Conservation has just been commenced. Mr. Arthur V. White, chief engineer, Toronto, who directs the various field parties engaged in investigating the provincial waterpower resources, is in Vancouver.

He announced that two engineering parties were despatched last week from Victoria to take measurements of the flow of the principal streams into the inlets along the mainland coast between Powell river and Prince Rupert. They are making the trip in a chartered launch which has been equipped for a three months' cruise. The other parties are at Hazleton, outfitting for similar work along the Skeena and Babine and Bulkeley rivers and tributary waters. An investigation of water power resources on Vancouver Island is also being carried on in co-operation with the water branch of the provincial department of lands. Hon. W. R. Ross the minister of that department, having contributed financial assistance.

These measurements were first started by the commission about three years ago. In the preparation of the report dealing with the water power resources of British Columbia a considerable amount of collateral information has to be secured. This not only will comprise an inventory of these waterpowers, but a recapitulation of the laws and regulations relating to rights and privileges already granted by the province for mining, irrigation and other purposes. The work is being done by Mr. White, who is regarded as an authority on hydro-electric subjects.

Respecting the legislative enactments of British Columbia relating to water powers, Mr. White stated that no other province of the Dominion has so complex water problems to cope with as this province; while it is true, he added, that no other province has made such rapid advances in regard to power development.

"It is providing legislation beneficially to administer its water power resources. It must be remembered that the use of waters under regulation in British Columbia antedates that of any other province. The early records granted for mining and irrigation purposes can not be superseded or adjusted without the careful consideration of the water branch of the department of lands. When it is remembered that there are 5000 water records in existence granted under various terms and conditions, some appreciation can be had of the complex water problems that the minister of lands has to deal with. These conditions demand consideration on the part of the public as the problems can not be solved at a moment's notice.

## Lillooet Scores Decisive Victory Over Lytton—Score 13--3.

As a result of a raid on Lytton made Sunday by the Lillooet baseball boys, a fine bunch of scalps was brought back to town. Thirteen to three was the score, the figures not fully telling the story of the game. From start to finish the visitors had it all over the home team, their hitting being the feature of the game. Sinclair, the Lytton pitcher, was slammed all over the field; only by good fielding on the part of his supporters was the score kept down. For Lillooet, Shea pitched a great game, having the Lytton boys in difficulty all through.

In the field, Miller did good work, catching five flys in good style. At centre Powers made a double play, catching a fly and bagging a man. For the home team Hinton fielded well at right, taking some nice flys.

Right from the opening of the game the Lillooet boys started out on their victorious course. Three runs were secured in the first, to which five more were added in the third. This number was increased by another trio in the fifth, after which the boys, with victory well in hand, slowed down, bringing up the total to 13 by a couple in the eighth. Lytton scored three singles in the third, fifth and seventh.

## Sustains Broken Arm.

Forestry Inspector W. C. Gladwin returned to Lillooet on Monday, from an inspection trip to Alexis creek and 150-mile. Mr. Gladwin reports everything in good shape and the general aspect of the country prosperous. Considerable rain has fallen from Ashcroft north to Fort George, and has resulted in fine hay crops which are now being harvested.

On Wednesday of last week forest ranger "Col." Manson sustained a broken arm from a kick by his horse. While riding from the Gang ranch to Beachers, the forward cinch broke, causing the horse to become excited and restive. While attempting to repair the damage the "Colonel" received a kick which broke the large bone of the arm. He rode on to the 150-Mile, a journey of one and a half days, where the bone was set.

## Goes Back to Jail.

Lizzie Abel (L9), an Indian woman from Lillooet, who had just been discharged from Kamloops jail, again appeared on a charge of drunkenness, in the Kamloops police court last week, and was sentenced to one month's imprisonment. For having supplied her with liquor, H. Brown was fined $100 or six months' imprisonment.
