THE PROSPECTOR

VOL. 5, NO. 24 LILLOOET, B. C., FRIDAY, APRIL 9, 1915. $2 PER YEAR

General News of Lillooet District

There will be no evening service in the Methodist church on Sunday, April 11.

A number of prospectors left town yesterday for the hills--good luck boys.

Mr. A. F. Noel arrived in town yesterday morning to look after his interests here.

J. K. More, govt. road supt., and W. Bell, engineer, are in town this week.

Mr. Fournier, school teacher at Seton lake, left for the coast last Friday for a short vacation.

Mr. and Mrs. C. Burton of Kamloops, are visitors in town for a few days.

Deer and Big horn were seen on the side hill just above town, last Sunday.

Four card parties took place on Wednesday evening, all the participants had a real good time.

Fruit trees are heavy with blossom these days, in fact, some of them have been in blossom for the past two weeks.

Some fine trout, even for here, have been caught and brought into town, during the past few days.

A telephone has been installed in Frank Durban's store at the head of Seton lake; it is known as the 'Short Portage.'

Miss Beloud, of the 17-mile Ashcroft - Lillooet road, arrived in town this week and is spending a few days here, the guest of Mesdames Wm. Manson and Geo. Prosser.

A pleasant evening was spent at the Methodist church last Sunday evening. Mr. W. T. Bridge conducted the service. Mrs. Asselstine very ably sang a beautiful solo. Mrs. Anderson presided at the organ.

Under the able management of Messer Hurley and Tom Brett the town flagstaff, which had taknn a list to the northeast, was straightened, also about six feet at the butt which had become somewhat decayed, was cut off.

For nursery advt see page 2.

Among the many visitors to town this week are:—Judge McInnes, J. Callaghan, M. Ludke, A. Whiteside, F. Wallbridge, H. Timlick, Dr. McRae, C. F. Weir, H. Paynter, F. Blake, J. Matthews, G. Marshall, and E. Kent.

John Tom, Indian, had the misfortune to receive a nasty smash in the forehead with a base ball bat, last Sunday. The bat slipped out of the striker's hand and struck John. It took four stiches to draw the wound together. Tom is getting along amazingly under the able care of Dr. Asselstine and Nurse Whitehead.

A party of fishermen and sightseers arrived in town last Friday evening on the Pacific Great Eastern railway excursion train from Vancouver. They were agreeably surprised with our climate and local conditions generally. Some fine specimens, both of fish and local views, were obtained and carried away by them to their respective homes at the coast.

Constable Breaks Leg

A regrettable accident occurred yesterday when Constable Wm. Mathews, in attempting to recapture his prisoner, broke his leg.

Mathews was escorting a prisoner named Arthur Smitz, German, to the coast goal, he having been convicted and sentenced to five months, for supplying liquor to an Indian. They were travelling on the Pacific Great Eastern railway and when about six miles from Squamish, Smitz jumped from the train and took to the hills, Mathews jumped after him, but, missing his footing, fell and broke his leg, Word was flashed to the Squamish police who are out after Smitz, who, up to our going to press, is still at large.

War Gleanings

London—British forces in occupying Warmbad, German South west Africa, as officially announced, have taken what is considered the southern capital and the terminous of the railway system.

The French have begun their great push and are taking the offensive.

Pope Benedict is reported to warned Francis Joseph that his first duty is to prevent disintegration of Empire.

Rome—The Tribuna publishes a Vienna despatch stating that, according to the latest Austrian news, the Austro-German armies in the Carpathians are in full retreat.

Havre--Fresh attacks by German forces against the Belgian Congo have been repulsed, according to a report made by the deputy governor-general of Kalanaga to the Belgian minister for the colonies. An assult made on Mount Hebu, north of Lake Kivu, was driven back with heavy losses to the Germans, who were pursued into their territory (German East Africa).

Toronto, April 6.—While crossing the Channel on Saturday the British hospital ship Navassa, with several hundred wounded soldiers, including some thirty Canadians aboard, was chased for 45 minutes by a German submarine. When the pirate was sighted the Navassa fled, developing a speed of 20 knots and escaped. Wounded men tell the story, which is vouched for by the officers who talked with the crew.

Geneva—A great victory for Russian arms in the Carpathians over a monster force of Austro-Germrns, was reported in despatches received here. The battle was declared to have been one of the bloodiest of the war. It started Saturday and extended over a front beginning at Dukla Pass and ending at Experies, in Hungary.

The despatches says that the Teutons lost 15,000 men alone in Sunday's fighting.

London— The German Baltic fleet have been cut off from its base by its own mine field, which broke adrift in a storm, according to a Copenhagen despatch to the Mail. A large number of mines have floated into neutral waters.

Church Services

Church of England—Morning 8 a.m. ; 11 a.m. Evening at 7.30 p.m.

Notice is hereby given that the Annual Vestry meeting of St. Mary's Church, Lillooet, B.C. will be held in the Court House on Monday next, April 12, 1915, at 10 o'clock a.m.

R. S. SLOCOMBE,
A. W. A. PHAIR,
WARDENS.

Points on Transplanting

Work the land deep and thoroughly before planting.

Trees do best on well drained land.

Apples should be planted 30 feet apart, making 50 trees to the acre. Pears or peaches can be planted in between.

Pears, cherries, plums, and peaches, should be planted about 18 feet apart making 134 to the acre.

Grapes 8 feet apart making 681 to the acre.

Strawberries 1 x 4 feet.

Remove all broken roots, prune the tops of apple trees, cutting off all branches except the upper three or four, these cut back to spurs about six inches in length.

German Measles

Recruiting Sergeant H. Chapman of East Kent Buffs, stationed at Canterbury, Kent, England, sends to his brother in Buffalo, Chris Bhapman the following "cure for German measles."

"Mix some Woolwich powders with tincture of iron or essence of lead, and administer in pills (or shells). Have ready a little British army (a little goes a long way), some Brussells sprouts and French mustard. Add a little Canadian cheese, some Australian lambs, and season with Indian curry. Set it on a Kitchener and keep stiring until quite hot, if this does not make the patient perspire freely, rub the best Russian bear's grease on his chest, and wrap in Berlin wool. Dr. Cannon's prescription.

P.S.—The patient must on no account take any "peace soup" until the swelling in the head has quite disappeared.

CHAMPIONSHIP FIGHT

Jess Willard is now heavyweight champion of the world he having knocked out Jack Johnson in the 26th round.

NOTICE

To Martin Crane or to any person or persons to whom he may have transferred his interests in the Virginia, Owl, Raven, Stirling, Ruby, Copper Wonder, Eagle, and Black Jack mineral claims on Owl creek in Lillooet Mining Division of Lillooet District.

You are hereby notified that we have expended the sum of $2490.00 for labour and improvements upon the above mentioned mineral claims in order to hold said mineral claims under the provision of the mineral act, and if within ninty days from the date of this notice you fail or refuse to contribute your share of such expenditure, together with all cost of advertising, your interest in said claims will become the property of the subscribers under Section 28 of the Mineral Act Revised Statute 1897.

Dated this 8th day of April 1915.

HUGH ROSS GEO. MOORE

Process--Amalgamator

An old idea has recently been applied in exploiting a new gold separator called the "Wyoming Amalgamator." The inventors or promotors claim for this apparatus much higher recoveries than can be procured by the old plate amalgamation, The new device was on exhibition at the Northwest Mining Convention recently held at Spokane, Washington. There the exhibitors stated that it had not yet been installed in actual permanent practice at any working property, but that in experiment with certain Oregan ores the extraction amounted to about 95 per cent, of the total gold content.

The main principal is the utilization of the worm principal for feeding the pulp under the volume of mercury in the form of a thin ribbon. Thence it must rise to the top, and during this action the claim is that all the free clean gold must come into contact with the mercury while any rusty or greasy gold on account of the heavier specific gravity remains in or falls to the bottom of the bottom of the mercury. The tailings are then carried away from the top of the mercury bed by means of water under 20 lb. presure forced downward upon the same by means of a circular ring of vertical pipes. From the launder the mixture of water and tailings is run through a series of riffles, where it is stated that all "flour mercury or black sand is recovered." As is apparent there is an elimination of unnecessary agitation or vibration during the process of feeding and in the mercury bed.

The idea appears to be a good one at first glance, although practical demonstration under different conditions may expose weaknesses. But, perhaps, if such be encountered the may be gradually eliminated by simple variations in the details of construction and operation. Doubtless the trouble due to fouling of the mercury pertains to this as to every other method.

The machine is compact, and one of the weight of 400 pounds is said to be capable of treating 25 tons daily of crushed pulp, or of a larger quantity of placer bar. The parts are easy of transportation over pack trail and they can be readily assembled.

To quote the pamphlet issued by the promotors the advantages are:

1st. Its superior ability in pan or pot amalgamation over plates; 2nd, The principle of retaining rusty or greasy gold by taking advantage of its specific gravity over all other matter that could not possibly be caught in plate amalgamation; 3rd. The cost of operation; no high-salaried man to operate; just install and run like a clock with other machinery, as it works automatically; 4th. No danger of over-head grease or oil, as the contact is made under the mercury surface grease must stay on top; no eating through of verdigris from copper in plates; 5th. Complete control at all times of tailings with ability to deliver same in any manner on or to concentrate tables; 6th. The most dominant and absolute, positively no slimes on sliming; 7th. With the Wyoming Amalgamator the loss of mercury is practically eliminated.—Mine, Quarry & Derrick

Water Notice

Diversion and Use

Take notice that Alfred Ernest Simms whose address is Big Bar will apply for a licence to take and use thirty inches of water out of Big Bar creek which flows to south west and drains into the Fraser river about six miles from southwest corner of P. R. 1759. The water will be diverted at a point about 60 chains N.E. of S.W. corner of P.R 1759, and will be used for irrigation purposes upon the land described as pre-emption record 2233, Lillooet District.

This notice was posted on the ground on the lst day of February, 1915.

A copy of this notice and an application pursuant thereto and to the requirements of the "Water Act" will be filed in the office of the Water Recorder at Clinton, B.C.

Objections may be filed with the said water Recorder or with the Comptroller of water rights, Parliament Buildings, Victoria, B.C.

Britain Not War Mad

A Representative Englishman's Point of View.

Benjamin Harris, recording clerk in the New York County Clerk's office, received from his uncle, Professor I. H. Hirsch, lecturer on physics and mathematics in King's College, London a letter giving the representative Englishman's point of view and attitude toward the Germans after six months of war. The letter, dated at Hillel House, Cambridge, England, says in part:

You ask me to give my impression of present conditions. To my mind the most striking feature of the situation is still the the general absence of vindictiveness or even contempt for the German people. Englishmen are joining the colors by the hundred thousand, but not in the "jingo" spirit. You will perhaps remember the type of man one meets so frequently in Lancashire and Yorkshire—the old Puritan type—the man who goes to his work with the sense of duty dominan, doing his work thoroughly, not necessarily because he likes it, but because the job is to be done. But few or none like the job, but the job is there to be done.

It appears to be beyond the mental powers of a German to understand this. To him, apparently, war is part of his religion or it is nothing. He cannot understand that a nation should go to war because it is part of its religion to destroy the worshipers of Mars, the war god. It is fortunate for Germany that England is not war mad, for if ever the fighting blood of the country were really stricken with the lust for German blood, then God help the Germans. Personally, I am praying that the Germans will have sense enough not to repeat such escapades as the attack on Scarborough.

Behind this grim struggle Englishmen have not lost the feeling that German flesh and blood are still human, and, therefore, they do no wish to inflict more suffering on German women and children than is necessary. For years the Germans have been mistaking English patience for weakness and decadence. Now they must be compelled to listen.

If you hear that England is determined to crush Germany beyond redemption treat the report with contempt. We cannot crush seventy millions of people except at an enormous cost, nor would it pay. The enemy is not Germany, but autocracy.
