Queen Charlotte Islander

A Weekly Newspaper Published in the interests of the Settlers, and to promote the development of the Queen Charlotte Islands.

VOL. 3, No. 3 QUEENSTOWN, MASSETT INLET, B.C. WEDNESDAY, OCTOBER 29, 1913 5 Cents per Copy

Prevailing Conditions on Graham Island

A large number of residents of Graham Island have been receiving letters of inquiry regarding the prospects for employment and the quality of the land. The writers are desirous of bettering themselves and seeking information from all sources, not only here, but in other portions of the Province. In answering correspondents, we are in a peculiar position, not knowing the circumstances of those who want to leave their present environment.

Our islands offer a home for many thousands of settlers of a certain class; but they must not expect to find pioneering any kind of child's play. We would prefer to have immigrants who are in a position to at once go on the land, build homes and be in a position to spend a year or two in making farms or truck gardens. There is land to clear and drain; hard work for all who want to come, but with the prospect of making a good living. We cannot call our island a prairie country; but the soil and climate are good.

The steamboat and telegraph service are becoming better and towns and settlements are springing up in all directions. There will be a market for poultry raisers and truck gardeners; cattle thrive and find food the year round, and the land can either be taken up by pre-emption or purchased from land companies at reasonable prices. At the same time it must be understood that there are difficulties to be encountered. Roads and trails are being built during the summer months, but there is the difficulty of reaching good land, over ground that has not been traversed, but which we expect to see opened up in the near future.

At the present time our waterways offer a means of conveyance for supplies to many of the settlers, which cannot be used by those living inland. If anyone expects to find a ready-made farm on the island they will be mistaken. There is land and plenty of it, but it has to be cleared and drained, and this means an expense of money and time. Poultry-raisers are the people who make the most money from their holdings at the present time, although the Delkatlah Market Gardens ship out quite a lot of garden truck to Prince Rupert, and next year will do much better.

At the south end of the island a number of people are making regular shipments of eggs and chickens to Prince Rupert, where there is a good market, at prices that mean profit. With eggs at fifty and sixty cents a dozen, there is a good thing in raising chickens. This is an industry that anyone with brains can engage in. Potatoes are now selling at two cents per pound, and this is a good potatoe-raising country; other vegetables are sold at good prices, and grow prolific. Small fruits, including currants, gooseberries, raspberries and strawberries, thrive here. If anyone will take the trouble to look over the list of prize winners at the recent fair held at Prince Rupert, they will find that Graham Island carried off the prizes for poultry and vegetables. In seeking to have the land settled up, it must be remembered that it is not a poor man's proposition by any means. With a small amount of money—enough to clear a few acres—a comfortable living can be obtained, and the more one can clear the sooner the owner can increase his bank roll. It is no place for men who cannot, or will not, give their time and attention to the upbuilding of a home. We want settlers; but do not want them to come under any misapprehension. During the winter months there is no work for those seeking employment. It is the time for those who propose to take up land to look over the ground in preparation for commencing work in the spring. Good accommodation can be found, and we have men prepared to locate settlers and show them where the best ground can be found. A letter to this office will be promptly answered. The class of settlers wanted are the rugged men and women who are not afraid to face work, and who have the means to build their homes and clear the land. This class will make no mistake in pre-empting land on Graham Island.

The Masquerade Dance on Friday night (Hallow'een) promises to be a very successful affair. There's sure to be lots of fun, so don't miss it.

W. N. Toop came down Tuesday from the camp of the Graham Island Coal & Timber Syndicate. "Bill" has company on his ranch at Mayer Lake this winter and it is rumoured around that the mice are less numerous out there this season.

Mrs. Campbell and Mrs. Roup of Woden visited their husbands over the week-end. Strangers were under the impression that a double wedding had taken place as both ladies were freely showered with rice soon after their arrival. There's a reason.

J. A. Thorne, construction engineer of the island telegraph line, was in Queenstown last week and stated that the line would be completed this week. The phone instruments are expected to arrive on tomorrow's steamer and will be installed at the various stations as soon as possible. Queenstown will have a combination line, and V. S. Dunn will be stationed here as operator. Telephones will be supplied to those desiring them, the rent being $3.00 per month. The telegraph message rate is 25 cents for ten words and two cents for each additional word.

The Early Bird

Readers Are Requested to Emulate His Example.

The Early Bird, as his name implies, does not need to be awakened by an alarm clock, but from natural temperament and characteristics is always on the spot—ready when the first material benefit offers itself. Just so with the early subscriber. He gets the big end of the stick by sending or bringing in his order at the beginning of a big offer.

We now submit a similar advantage to everyone within the zone of our possible circulation. We will give our paper, and "The Weekly Mail and Empire," from now till January 1st, 1915, for $3. To those who have already subscribed to The Islander during the past three months we will let them in on this offer by a payment of $1.00.

How do we do it at the price? Well, we have made special arrangements with the big Metropolitan Weekly, by which both of us hope to increase our circulation, even although attained at a sacrifice of regular rates.

We might inform our readers that The Weekly Mail and Empire will, right away, publish a new serial story, by Conan Doyle, "The Poison Belt," which is equal to the best from the pen of that gifted writer.

Send---or bring---all orders to The Islander Office.

Hazelton Bros. of Woden are building an 18-ft. power boat for Provincial Constable Condon.

Harry Scott, who has been foreman for Mr. Wright at the drill camp, and a very popular young man, leaves on tomorrow's boat for Vancouver.

Mr. E. M. Sandilands, Government Agent at Queen Charlotte City, arrived here Monday and made the Government selection of townsite lots at Queenstown. Mr. Sandilands returns to Queen Charlotte on tomorrow's steamer.

Mr. and Mrs. F. C. Wright returned Monday night from the camp of the Graham Island Coal & Timber Syndicate. Mr. Wright states that work has been suspended for the winter and that all the men have left the camp. Owing to the river being in flood considerable difficulty was experienced in navigating the stream, through jams and other obstructions, necessitating several portages of many miles.

District News Items

GRAHAM CENTRE

Contractor A. J. Richardson has completed his road contract on the townsite and general satisfaction is expressed at the thorough manner in which the work has been done.

Work is progressing favourably with the Church building and Messrs. Wormold and Shaw, the contractors, state that they expect to have the building completed this week. Rev. H. H. K. Greene visited the scene of operations last Thursday and expressed himself well satisfied with the work already executed.

Mr. Thos. E. O'Callaghan visited here Sunday to renew acquaintance with the residents. He also inspected his acreage property, which has been cleared, and stated that the potato crop was fully up to expectations. Mr. O'Callaghan has been identified with the Nash survey party all summer and states that he has seen some very fine agricultural land while surveying.

A good road has been built from the post office to the church and is continued from there to the junction of Third Street and Third Avenue, from which point it extends along Third Ave. to Kundis Bay narrows.

Postmaster C. M. Adam has received a communication from the Provincial Librarian at Victoria stating that a new library has been shipped to replace the one in service here last winter, which was much appreciated by the residents of Graham Centre.

The Graham Centre Debating Society held its first meeting last Monday night when officers were elected and a routine of work for the winter evenings was outlined, which points to a very successful programme of amusement for the winter months.

Rev. H. H. K. Green held service here last Sunday and announced that the church building would be ready for the opening service next Sunday at 11 a.m.

F. C. Wright and Felix Graham of the Graham Island Coal & Timber Syndicate, were in town Wednesday on business.

Francis Evans visited here Monday from Nadu, accompanied by Alex. Johnson and Roy Tingley, and were much impressed with the development since their last visit.

C. M. Adam, the Graham Centre real estate man, has received communications from Winnipeg, Regina, Vancouver, Prince Rupert, Chicago, Minnesota, and California regarding real estate on Graham Island, which shows that this island is coming to the front as the finest and largest body of agricultural land in the province, and the outside public are beginning to realize that Graham Island is going to become the oft predicted "Garden spot of B. C."

All over the civilized world, especially in the larger cities of the Pacific Coast, there is apparent another of the difficulties in the money market, which is attributed to many circumstances. The change of administration in the United States, with the lowering of the tariff wall, has something to do with the present depression. The Balkan war and the uncertainty of it bringing the other nations into difficulties, is another reason. Along the whole Pacific Coast people have invested in land, with rising prices, and payments to meet. Combines and strikes; immigration; moving the crop; the bursting of many bubbles; a thousand and one reasons are given for the tightness of money, while the rate of interest has been raised above all reason. In small communities, where there is always more or less a lack of ready money, the price of commodities has risen, and there is a reason for regret that at this time all of the surveying parties, except Mr. Nash's, have been called in. Road work for the year has been suspended, and a number of the mining camps have stopped work. Yet, there is no necessity for pessimism. During the past few years that immigration has trended towards our islands, a large number of settlers have taken up their permanent homes on the islands. They are the backbone of a country, producing wealth from the soil to fill their own needs and the needs of others. News from the North-west is of the brightest; a bumper crop has been garnered, which means millions of dollars to the farmers. The near approach of the completion of the transcontinental railway, with a terminus almost at our doors, will bring a reaction that will be felt in all directions. Our timber and fish wealth will be opened up before the close of another year and the mineral wealth of the islands is being looked into as never before. The future looks bright, although the present depression reaches out into the remotest sections. With the optimism inherent in the pioneers of our race, nothing will daunt those who "put their shoulder to the wheel" and have confidence in the land of their adoption.

———o———

He was no longer a boy, having just celebrated his fourteenth birthday, and he took his place in the witness box with assurance.

The presiding magistrate glanced over his gold-rimmed spectacles at the lad, whose intelligent face impressed him exceedingly.

"You are very young to give evidence," he said. "Do you understand the nature of an oath?"

"I should jolly well think so! You don't seem to know who you are talking ,,"

News Items of the Queen Charlotte Islands

A light has been placed off Rose Spit on the East coast of Graham Island.

Charles Harrison and Arthur Robertson, of Masset, were in town Monday afternoon on business.

A bazaar, in aid of the funds of the proposed Hospital at Masset, will be held early in December.

Indian Agent Deasy and Constable Hughes left Thursday for Skidegate on an official visit to the south end of the agency.

Joshua Collison and Peter Hill of the Masset Reserve mourn the loss of their youngest children, death having carried them off recently.

Dr. C. A. Graves left on the Prince Albert last Thursday en route to Victoria to pass an examination. He is expected to return early in November.

The range lights on the Massett Indian Reserve, at Entry Point, are now in operati n, throwing two lights 1200 feet apart out on the waters of Dixon Entrance. The two buildings in which the lights are located are well built and painted white. One is of steel and the other is a frame structure. Chief Harry Weah, one of the Massett Indians, has been appointed lightkeeper.

An important deal is on for a group of Moresby Island copper properties.

The new lighthouse to be constructed on Bonilla Island will not be in eperation this year. The lighthouse will be a similar structure to that on Langara Island.

Mr. L. Cullison, of the Marine and Fisheries Department, with the two mechanics who have been erecting the range lights at Entry Point, left last week on the Prince Albert.

An Indian woman was charged in the Massett court with stealing a pair of boots from the store of James Martin. Magistrate Harrison and Indian Agent T. Deasy heard the evidence and sentenced the woman to imprisonment for two months.

The Granby Consolidated Mining & Smelting Company have their engineers making an examination of the Ikeda mine, on Moresby Island, with a view to taking it up and securing a further supply of fluxing ore for their new smelter at Granby Bay.

Teacher Clayberg of the Massett Indian day school has resigned and left last week for San Francisco, where he will engage in the practice of law with his father, of the firm of Ross & Clayberg. Mr. Trainor of the Masset Leader has been appointed teacher in place of Mr. Clayberg.

MINERAL ACT.

Take notiee that L. F. Beecher, one of the Co-Owners of the undermentioned Mineral claims, having failed to contribute his proportion of the expenditure required by Section 48 of the Mineral Act, and the undersigned having performed the labor and incurred the expenditure, should the said L. F. Beecher, at the expiration of ninety days from the date of this Notice, fail to pay his proportion of the expenditures aforesaid, together with all costs of advertising, his interests in the said Claims will become vested in the undersigned, his Co-Owner, who has made the required expenditures, in compliance with the further provisions of the Mineral Act.

The Claims referred to are Emmerson, Leo, and Good Hope Fraction, at Lockeport, in the Mining Division of Queen Charlotte Islands, and recorded in the Mining Recorder's Office at Queen Charlotte City.

Dated this 27th day of September, 1913.
H. L. Beresford.

TO
The said L. F. Beecher
AND TO
J. H. McMullin, official administrator of the said Beecher.

Synopsis of Coal Mining Regulations

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territery the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORRY.
Deputy Minister of the Interior.

N. B.—Unauthorised publication of this advertisement will not be paid for.

LAND ACT.

Queen Charlotte Islands Land District.
District of Skeena.

Tassoo Harbor Mine Being Developed.

Tramway and Ore Bunkers Under Construction---Will Begin Shipping at an Early Date.

R. R. Hedley of Vancouver has sent a complete plant in for the equipment of the Tassoo mine which he and his associates have under bond. The plant includes rails, mine cars, tramway and supplies. It is expected to begin shipping to Tacoma smelter at an early date. The property includes twenty-two claims and fractions aggregating 350 acres, and the ore is so favorable for smelting that the Tacoma smelter has entered into a contract to treat it free of cost, so that there are only the mining and transportation charges to take care of. The site of the mine is on a land-locked harbor, with deep water to the shore line, so that ore can be deliverdd on shipboard at a minimun cost. There is ample timber, and water power is available within three miles. The ore is magnetite, carrying varying amounts of copper, but there is a width of 28 feet carrying 3 per cent. copper to furnish shipments for some time. As showing the extent of ore it may be stated that the tunnel, which is 300 feet long, cuts 130 feet of magnetite in that direction, the ore being in bands of from 10 feet to 35 feet in width. The portal of the tunnel is in ore, so that there is a still further width of ore not yet determined. The tunnel gives backs of from 120 to 160 feet, and surface trenching shows ore for a length of 3000 feet on the strike. R. W. Thompson of Vancouver is superintendent. Bunkers will be built on the shore to hold 1000 tons, so that shipments can be made direct from them to the ship. The present working tunnel is at an elevation of 1125 feet above the site of the bunkers. In addition to copper the ore carries about $1 per ton in gold and half an ounce of silver. It is estimated that when the mine is equipped and in full working order ore can be mined and delivered on shipboard at a cost not exceeding $1 per ton.

Henry Edenshaw's Power Sloop
