Okanagan Centre

Dear Jim:-

I have at last glued myself down to a bench and decided to write you. I received Ett's letter of the 13th and see by it that you have at last settled down to the simple life. I have been going to write you a score of times but every letter I received from home stated that you were in a different place so I was beginning to give up the task as hopeless. I am now thoroughly into this business and future prospects look hopefull. We are now on our third tank and have so far made a little money but we have to turn nearly all of our profits back into the business to buy outfit etc.

I suppose Ett has given you some idea of where I am and what I am doing. Dave leaves in a few days for home and I am afraid I will miss him as our (Copeland-Chatterson loose leaf system of book keeping) has not yet been perfectly. It is principally <u>loose</u> but we are able to

RAILROAD & BRIDGE CONTRACTORS

to find a few accounts etc,

We expect to break camp here in a few days and we will then move outfit East.

Ett was saying that you were in on a new prospect. if you intend to part with your fruit land resume and let me know as I would like to buy some. I have the cash and I think it would be a good investment resume and write and let me know if you could interest in some good property for me. I am going to try and get out there this winter. I have about $2500 that I would like to place and this won't drain me too much as I do not intend to invest very much in this business. I will write you later as to how we are coming out.

Well will have to close if you have any snap shots send them along.

Your brother

Cat.

P.S

Pretty good dividend wasn't it?
