FROM FAIRVIEW CAMP.

New Fairview Corporation General Meeting---General News Notes.

[Special to the STAR.]

Fairview, Sept. 30.—Angus Stewart is now Superintending the dismantling of the Joe Dandy mill machinery, for the New Fairview Corporation.

Miss Killians, the school mistress is leaving this week to take charge of the school at Camp McKinney.

John Love has gone to Stanton, Ont., on a visit to the old folks. He will take in the big show at Buffalo before returning.

Mr. T. D. Pickard has moved into Mr. Love's residence on Fairview Avenue.

Word was received the end of last week from Vernon, that Dr. White has taken a decided turn for the better. C. A. C. Steward of 15-Mile, unfortunately, is not progressing so well. R. H. Parkinson is once again on the streets.

Mrs. A. E. Godenrath, after visiting at the Fairview Hotel for the past two months, has returned to her home at Greenwood, greatly improved in health.

The first ordinary general meeting of the shareholders of the New Fairview Corporation, Limited, will be held at the local office here on Friday, October 18th, for the purpose of receiving the reports of the directors, the election of a new board for the ensuing year, and all other business that may be necessary. Notices have also been issued to shareholders advising that the final assessment on the capital stock of 1½ cents per share is due and payable at the head office on or before the 19th day of October, on receipt of which fully paid certificates will be issued.

E Rammelmeyer, M. E., the newly appointed superintendent of the mine and mill arrived last week from Nelson. For the past four years he has been engaged in a similar capacity, at the Emily Edith mine in the Silvery Slocan, and is a thoroughly capable engineer. It is expected that the new mill of 26-stamp capacity will be in operation by the end of October.

Fairview, Oct. 11.—Shareholders in the New Fairview Corporation, are responding promptly to the call for the second and final assessment of 1½ cent per share. Managing Director Richard Russell reports that each mail brings from $1,500 to $1,700.

E. Rammelmyer, the new superintendent, is rapidly getting things into shape. At the big mill, the erection of which is in charge of Mr. Ostenberg, nearly all the machinery has been set up, and by the 20th, if certain supplies have been received, crushing should be started. The mill—a 26-stamp—will have a capacity of 75 tons per day. At the outset, until stopes are opened, the ore now on the Stemwinder dump will be milled. Mr. Rammelmyer has his work cut out to make the enterprise a profit paying one, when it is understood that the grade of the ore will run between $3.00 and $5.00 per ton. Should he be successful with 26 stamps, the mill capacity will at once be doubled or trebled, and the machinery at the mine augmented to handle the increased tonnage.

The success of the treatment of the Stemwinder ore means much for the future prosperity of the camp, as just so soon as it is demonstrated that the low grade milling ores can be treated at a profit, there will be an active revival in the development of several other properties now closed down.

The Postal department is coming in for a large share of criticism. It seems to be the object of this particular department to hinder, instead of encourage the growth and prosperity of this particular section. For a long time a thrice-a-week mail service has been in force between here and Camp McKinney. The first of the month the route was discontinued, and to get a letter to McKinney or Midway, it takes from five to seven days, instead of one and two. The mail route south to Oro and American points has also been discontinued, and all mail for Okanogan and Ferry counties, in the State of Washington, has to come and go via the Coast. The long promised direct route to be established between here and Princeton via Keremeos and the Similkameen valley has apparently been laid on the shelf. The whole mail system is rotten in the extreme, and as for Mr. Galliher, M. P., who is presumed to look into our wants especially in this respect, his usefulness is apparently a thing of bygone days. His pre-election promises are noticeable for their un-fulfilment.

L. C. Barnes, a well known livery stable keeper has opened out here. He has rented the barn opposite the Fairview Hotel, and is preparing to take care of all business coming his way. He will also have a full line of rigs and horses, and intends keeping his eye on the Similkameen valley trade.

KEREMEOS NOTES.

[Special to the STAR.]

Keremeos, Oct. 11.—The public school is again open with a full attendance of children. Miss C. McDonald, of Victoria, is teacher. Miss McDonald is an accomplished singer, and is soon to be heard here at a concert.

Ed. Richter, who has been down with typhoid fever is now on the road to a speedy recovery.

Dick Cuniston is making several additions to his ranche in the shape of substantial buildings.

CAMP McKINNEY NOTES.

[Special to the STAR.]

Camp McKinney, Oct. 10.—Hughie Cameron, mine host of the Hotel Camp McKinney, has returned home from a four months' visit to his old home in Cape Breton. He also took in the Pan-American.

The old reliable Cariboo is working a full force, and the mill maintains a steady average of 50 tons per day.

The Dayton claim, situated between the forks of Rock Creek, is under option to Mr. Davidson. He purposes starting work at an early date, and will form a acquire same.

Word comes from Spokane that the Waterloo Mining and Milling Co. has been successfully reorganized on an assessable basis. It is expected that as soon as the first assessment is paid, and the old debts liquidated, that development will be resumed. The property has always been regarded as a good one, and at the time it was closed down, there was a nice body of quartz opened by a 60-foot winze sunk from about the centre of the first level.

HEDLEY CITY NOTES.

[Special to the STAR.]

Hedley City, Oct. 11.—Pete Scott has gone to California to spend the winter.

Assayer Oliver, with a companion, has gone to the head of the Ashnola, for a two weeks' hunt after the big horn.

F. M. Wells, who has a bond on the Kingston, is putting up a number of mine buildings, preparatory to starting operations.

There is a rumor that a big block is to built during the winter.

Travellers through town—and traffic is daily picking up—do not appreciate the roughness of the road. Since the government wagon road was graded to each side of the townsite, the Townsite Company should be enterprising enough to fix up the streets.

C. P. R. MOVING.

The changes in the political horizon of the past few weeks has had the effect of causing the officials of this corporation to bestir themselves.

A force of engineers has been going over the location line made by them last year from Spence's Bridge to Midway, making an estimate of cuts and fills to arrive at cost of construction. They reached the mouth of One Mile Creek, Thursday last, on their way down the Similkameen.

It is also reported that quantities of road building material are arriving daily at Spence's Bridge.

LOCAL AND PERSONAL.

A. E. Howse arrived from Nicola Lake, Thursday.

Judge Murphy was a visitor in town this week.

Thos. Hunter of Nicola Lake, was in town this week.

C. W. Veeder of Greenwood, left for twenty Mile Tuesday.

John Anderson, late of the Summit mine is back in town.

The sittings of the County Court was held here Friday. Judge Spink presiding.

Mr. and Mrs. Emil Voight, of Copper Mountain, are stopping at the Hotel Jackson.

W. C. McLain of Nelson, arrived in town Thursday in company with D. R. Young of that place.

R. J. Brown, president of the Sunset Copper Mining Co. arrived in town from Grand Forks.

H. C. Hannington, barrister, of Grand Forks, was in town to attend the County Court sittings.

Ike Laughead, is back to his old haunts. He has been on the Grand Forks police force all summer.

His honor Judge Spinks, arrived in town Thursday, to preside at the semi-annual sittings of the county Court here.

C. O. French is back in town again. He left his family at Greenwood to which point he had accompained them.

The construction of the store of Chas. Barber is progsessing expeditiously under the vigorous superintendance of contractor Johnson.

The painting of the Government Building has been completed, and we now possess one of the most ornate buildings of its class in the Province.

Jas. Hislop has been seriously ill of dysentery. We are glad to be able to state that he is now convalescing under the careful attention of Dr. Whillans.

Thanksgiving day is to be held on the last Thursday in November, not the last Thursday of October, as stated. It will therefore take place this year on Thursday, November 28.

Mr. D. Young drove to Penticton this week to meet Mrs. Young, who had just arrived there from Minneapolis. They are stopping at the Hotel Jackson for a few days. It is their intention to reside at Allison.

J. E. Hardman, M. E., registered at the Hotel Jackson. He came in from Granite yesterday, where he had been for a few days, looking after the interests of Alexander Lumsden, M. P., of Ottawa, who is deeply interested in the Granite Creek Hydraulic Co.

ASHCROFT TO DAWSON.

Telegraphic Communication Now Possible Between These Points.

Vancouver, B. C. Sept. 24.—The civilized world is connected with Klondike by telepraph. The all Canadian Government telegraph line from British Columbia to Dawson was completed at 4 30 today. The first despatch to go through was a message of congratulation from Governor Ross, of Klondike, now at Vancouver, to his private secretary at Dawson at 5 p. m. Messages have been coming through ever since.

The line is 2,200 miles long, and part of the route is that taken by the abandoned line originally projected for the Collins overland route in 1865, that was to have connected America with Europe, when the successful projection of Atlantic cable stooped the enterprise. The line goes from Ashcroft to Quesnell, Hazelton, Telegraph Creek, White Horse, Dawson, and connects at the Alaskan boundary with the projected United States Government line from St. Michael. A branch line taps Fort Simpson.

ROSS AND McLEOD OUTDONE.

One of the most exciting features of the recent interstate fair at Spokane was the rock-drilling contests on the 24th and 25th inst. The first go was won by C. M. Ross of Phoenix and G. S. McLeod of Sandon, who formed the Canadian team, their record being 51 inches in hard granite. This was a world-beating record, but they were not to enjoy this proud distinction many hours, for Bradshaw and Freethy, a couple of stalwart miners from Montana, beat this record.

This aroused Ross and McLeod to issue a challenge to the Butte team to participate in a drilling match for $1,000 a side, which was accepted. In this contest the Butte team again beat the Canadian team, the former's record being 52 inches, and the latter 51¼, the Butte boys winning by only ¾ of an inch.—Grand Forks News.

KILLED BY A BEAR.

Fate of a Kaslo Prospector and Hunter—Badly Mangled.

Dan Rice, a prospector and hunter of this place met his death on Friday of last week, in an encounter with a bear. He went up Milford Creek on that day with Gus Adams on a bear-hunting trip. After the pair had been out some time they became separated, and Adams not finding him at camp when he returned, became alarmed and returned to Kaslo on Saturday. He formed a party of ten men, who left that night, and on Sunday they formed a search which was rewarded by finding Rice's body in a badly mangled condition. From appearance he had stepped over a log on top of a large silver-tip, which had attacked him, breaking his arm. It had also struck him on the head, tearing away his entire face and forehead, and tearing the skull back so as to expose the brain. His left arm was also chewed badly. Death must have been instantaneous. Rice had not even time to fire his gun, which was found beside him. The body was brought to Kaslo and buried.

THE NEW MEMBER.

The new member for New Westminster, Mr. Thomas Gifford, is a native of Lockerby in Scotland, but has been long identified with the city of New Westminster. He is a jeweler by trade and one of the most respected citizens of the town. Outside of it his two sons are probably more famous than he has been hitherto, as they are well known players of the champion lacrosse team of Canada. Mr. Gifford has the record of never having been defeated in any contest and has done good service as an alderman and trustee. He has been repeatedly asked to run as mayor of the city and is recognized as an invaluable man of business on committees and in the council. As regards the interests of the constituency the people of the city are all satisfied that a wise choice has been made. Socially Mr. Gifford is intencely popular. Of all social gatherings in connection with the Presbyterian church of which he is an active member and other organizations, he is the very life and soul. In manner he is direct and unassuming. New Westminster has picked good timber to make a popular and useful member of the legislature whose qualities of character will be widely recognized.

EDITORIAL COMMENTS.

There is probably no man in British Columbian official life today who could bring more harmony out of the discordant elements of government at Victoria than Hon. Smith Curtis, should the mantle of leadership fall upon his shoulders. —Crand Forks News.

When government ownership of railways comes into effect the people will have some idea where the goverument is. Hitherto it has been doubtless whether the C. P. R. or the authorities at Ottawa have had control of the affairs of Canada. The general opinion is that the C. P. P. has been boss.—Kootenay News.

Our equitable climate has placed before us a glorious season for foot-ball, and preparations should be at once made to fit our local aggregation for the return match with the Stalwarts of Keremeos. Some systematic practice would soon put the material at our command in a condition to wrest the championship honors from our opponents.

The winter should open up a vista of a swift and powerful aggregation of basket ball players to represent our town. We have several old standbys of this popular game, and it would greatly tend to while away the long winter evenings, if such an organization would be formed.

Certificate of Improvements.

NOTICE.

PRINCESS MAUDE MINERAL CLAIM.

Situate in the Similkameen Mining Division of Yale District.

Where located:—On Copper Mountain, adjoining the Red Eagle and Vancouver Mineral claims

TAKE notice that I, Jas. Hislop, P.L.S., acting as agent for Robert Stinson Free Miners' Certificate No. B 56393, intend sixty days from the date hereof, to apply to the Mining Recorder for a certificate of improvements for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action under section 37, must be commenced before the issuance of such certificate of improvements.

Dated this 7th day of October 1901.

JAS. HISLOP, P.L.S.

Coal Location Notices.

NOTICE.

THIRTY days from date I intend to apply to the Chief Commissioner of Lands and Works for a license to prospect for coal on the following described lands:—Commencing at a post marked South West Corner, running 80 chains north along the west side of the Lawrence coal claim, thence east 40 chains along the south side of the DeWolf claim, thence continuing east 40 chains along the south side of the Fitzsimmons claim to a post marked North East Corner, thence south 80 chains along the north side of the F. M. Holland claim to the place of commencement, containing in all 640 acres.

PROSPECTING BY ELECTRICITY.

An invention has turned up which is designed to put prospectors out of business. It is an electrical device, and has been patented. Interest is being taken in the proposition by western mining men who consider it feasible and based on scientific principles. The claims for the device are set forth in the following language by E. D. Owen, a Chicago attorney, who is promoting it in the west:

"Our invention is an electrical apparatus for locating mineral in the earth, and for indicating the quantity of the metal and its depth below the surface.

"It is impossible to give a description of the principle in a few words, but putting it in as short form as possible, it is this: A streak of metal in the earth has more contactivity than the earth on each side, and we have a system by which we can measure the contactivity as compared to the earth.

"We drive rods into the earth at any given distance apart, which may be 100 or several thousand feet, and connect these by wire on the surface. The electric current is sent over this wire from one terminal to the other. As is well known to electricians this circuit will make a circuit through the ground so as to get back to the point from which it started. This principle is used in telegraphy and by telephone companies. In making this circuit the current will seek out the path of least resistance; and if there is a conductor in its path in making this ground circuit, or near enough to influence it, it will seize upon such conductor.

"A metallic streak or body in the earth would form this conductor, and we have delicate electrical appliances for measuring this resistance or contactivity. We move these terminals driven into the ground to greater number of different points over the area proposed to be surveyed, and by a method of comparison we ascertain where the metallic streak is to be found.

"The principles involved are not new, but it is the method of their appliance that is the invention. Both this method and the apparatus are covered by a number of patents.

"It is my opinion that it will not be long before we will revolutionize prospecting and make what has heretofore been a guess to a scientific certainty.

"It should not be confused with magnetic appliances operating by attraction or repulsion. It is on an entirely different principle.

"We do not pretend to tell the character of the metal, as all metals are better conductors than the earth, and it is upon this principle that we operate. Commercially, however, they will usually be known."

HOPE PASS IS EASY.

Ex-Governor Dewdney Returns From Exploratory Tour.

Hon. Edgar Dewdney passed through the city to-day on his way to Victoria to take part in the ducal reception. He declined to give any details regarding the work he has been doing, but said that he had gone through to the Similkameen country, and had found the proposed route through the Hope mountains much easier than ever he had anticipated. He will return to the upper country next week, and will continue work until driven out by the snow.—Vancouver World.

Dunsmuir's California Partners.

A. D. Shepard, who has just resigned his position as general freight agent for the Southern Pacific at San Francisco, is coming to Victoria for the Pacific Improvement Company, the name under which the directors of the Southern Pacific, who hold the minority interest in part of the Dunsmuir properties, are known. They have 49 per cent. of the stock in the Union colliery, the E. & N. railway, and the E. & N. railway land grant, and it is their interests which Shepard will safeguard. He is expected about the end of the month. He has been 27 years with the Southern Pacific and is regarded as one of the smartest railway men in the west. He will not be salaried by the companies in British Columbia, but by the Pacific Improvement Company of California.

The Brantford Trades and Labor Congress has decided to ask the Dominion government to levy a per capita tax of $500 on all Chinamen entering Canada. Apparently public interest is at last being aroused on this momentous subject in B. C. even in Ontario.

NOTICE.

NOTICE is hereby given, that after the expiration of 60 days, I shall apply to the Chief Commissioner of Lands and Works, for permission to purchase 320 acres, more or less, in the Osoyoos district, commencing at a post marked "Initial Post, N. W. Corner," running east 40 chains along the southern boundary of the Nicket Plate Townsite; thence south 80 chains; thence west 40 chains; thence north 80 chains to connect with Initial Post.

JOHN MEIKLEJOHN.

Greenwood, B. C., 31st August, 1901.

Notice of Forfeiture.

To L. GOLDBERG, or to any person or persons, to whom he may have transferred his interest in the "Bonnie" mineral claim, situated on Kennedy Mountain, in the Similkameen Mining Division of Yale:

Are hereby notified that I have expended $12.50 as your proportion of the expense necessary, in order to hold the said mineral claim under the provisions of the Mineral Act, and if within ninety days from the date of this notice, you fail, or refuse to contribute the above mentioned sum, which is now due, with all costs of advertising, your interest in the said mineral claim will become the property of the subscriber under section four of an Act entitled "An Act to amend the Mineral Act, 1900."

T. C. REVELY.

Dated at Princeton, B. C., this 9th day of July, 1900.

Notice of Forfeiture.

To W. A. Ring and John Smiley, and to any person or persons to whom they may have transferred their interest in the "Monarch" mineral claim, situated on the east side of Keremeos creek, and about three miles east of Olalla creek.

You are hereby notified that I have expended sixty-one dollars sixty-six cents ($61.66) as your proportion of the expense necessary in order to hold the said mineral claim under the provisions of the Mineral Act, and if within ninety days from the first publication of this notice you fail or refuse to contribute the above mentioned sum, which is now due, with all costs of advertising, your interest in the said mineral claim will become the property of me, the subscriber, under section four of an Act entitled the "Mineral Act Amendment Act 1900."

Dated at Fairview, B. C., this 7th day of August, 1901. GEORGE PRICE.

NOTICE.

To JAMES WATTS,
Late of Keremeos, Similkameen.

You are hereby notified that unless you remove the mule left with me for pasturage for two years, and pay all expenses for feed, etc., I will after 30 days from the date of this notice, sell the same to defray expenses.

WILLIAM COHEN,
Keremeos, September 14th, 1901.

NOTICE.

A SITTING of the County Court of Yale will be held at Princeton on Friday, October 11th 1901.

HUGH HUNTER,
Registrar County Court.

Princeton, Aug. 31st, 1901.
