A FERVID TRIBUTE.

Member for Rossland Gaining Popularity at the Coast.

Wm. Holden, a prominent Vancouver business man who is staying at the Allan hotel, speaking to a representative of the Rossland World said in answer to a query that Smith Curtis was one of the most popular men down at the Coast. Mr. Holden was over to Victoria last week and attended a meeting of the legislature. He says that matters are in a frightful turmoil, but that there appeared head and shoulders over the rest the member for Rossland.

Curtis is indefatigable in the interests of the constituency he represents, but his consistent attitude, his expose of the Dunsmuir government and his endeavor to introduce legislation which would be of benefit to the community, have made him so well liked at the Coast that he would have no trouble in securing a seat in either Vancouver or Victoria.

OUGHT TO BE TRUE.

Bellinger's New Process of Smelting One Per Cent Copper.

The statement is made that a new process of smelting ores has been perfected and satisfactorily tested that will revolutionize the business, says the Greenwood Times. The inventor of the new process is a South Carolina man whose identity is not disclosed, but Herman C. Bellinger, a well known metallurgist and smelter man, has just returned from Butte from an examination and test of the invention, and he declares that by it ores that contain but one per cent. copper can be smelted at a profit. The cost of smelting is about eight cents per pound of copper. By the new system the ore will be smelted with the heat contained within itself, and little or no fuel and very little water will be necessary. Mr. Bellinger, who was formerly chief metallurgist for F. Aug. Heinze, is now engaged in building a smelter plant of his own near Victoria on Vancouver Island, and will install the new process there.

A $100,000 HOTEL

Will be Erected at Summerland On Okanagan Lake.

Sir Thomas Shaughnessy, Sir William Van Horne, Mr. C. R. Hosmer, and other directors of the Canadian Pacific Railway, have become financially interested in the establishment of a fruit-growing colony on Okanagan Lake and $100,000 will immediately be spent in the erection of a first-class hotel at Summerland, 15 miles below Peachlands.

Mr. J. M. Robinson, who promoted the now successful colony at Peachlands, returned last week from Montreal, where he had been in consultation with C.P.R. officials, and went over to Victoria to consult Architect Rattenbury in regard to the plans.

The old Barclay ranch, on the shores of Okanagan Lake, which consists of 4000 acres of excellent land, has been purchased. It will be surveyed and cut into plots of five and ten acres, specially available for fruit-growing purposes. Surveyors will commence work at once. The construction of the hotel will be commenced just as soon as the plans have been prepared.

PRINCETON WILL CELEBRATE.

At a largely attended meeting held in the McIntosh Hall, Thursday evening last, it was decided that Princeton would hold a Dominion Coronation Celebration on July 1st and 2nd. This decision was arrived at after considerable discussion as the relative merits of the two dates. Messrs. McLean Sharp and Snowden favoring June 25th, while Messrs. Lewis, Cruickshanks and Aldous, were in favor of holding the celebration on July 1st. Messrs. Whillans, Hall and Barrow, thought it well to celebrate both Dominion and Coronation Days on July 1st, and 2nd, and this idea finally prevailed.

A committee was elected consisting of Messrs. Waterman, Lewis; Lawrence, McLean, Richter, Gibson and Winkler, of which Mr. Waterman was elected chairman and G. E. Winkler Sec-Treas.

This committee was given power to appoint collectors, arrange for advertising, prepare program of sports, &c.

Judging from the large number present and the enthusiasm manifested, Princeton's Dominion-Coronation Celebration should be the best in the history of the town.

SLATE CREEK PLACERS.

Mr. Alex. Swan, Manager for the Slate Creek Exploration Co., Lt'd, was in Princeton this week on a short visit. Mr. Swan states that he has three men employed in laying pipe and getting the flume in place. The company have over 300 acres of placer ground at the mouth of Slate Creek. Careful tests of this ground show it to carry from 6 to 12 cents per cubic yard.

It has taken over three years to get this ground in shape for rapid and economical working, and it will be a year yet before the company can hope to realize much on their outlay. The values in the ground are half platinum and half gold, the gold being fine as a rule.

About two years ago Mr. Swan found a very interesting nugget of platinum adhering to a piece of white quartz.

Mr. Swan is of the opinion that investors would be wise to investigate more fully the placer deposits of this section. He is satisfied that good ground yet remains, which, properly worked, would become a great source of wealth in the early future.

Mr. Swan was at one time a partner of Sam Montgomery, the 87 year old prospector who recently made the rich placer strike in Cariboo, that is attracting so much attention. Montgomery sank a shaft 100 feet entirely without assistance, and struck a paystreak from which he took $1,875.00 from 10 feet of ground.

HOME RULE, VANCOUVER AND LA REINE.

Messrs. Gibson and Snowden have been doing assessment work for the Vermilion Forks Mining & Development Company, on the Home Rule and Vancouver claims on Copper Mountain.

A tunnel was started near the river for the purpose of cutting a showing that crops some distance above. Before the work was finishmed this ore began to appear in the face of the tunnel.

The values are in copper and gold, the copper securing as pyrites and bornite.

Messrs. Gibson and Snowden are now working on the La Reine on Kennedy Mountain. This claim is situated near the Hamilton claim, in which platinum has been found to exist, and some of the ore from the La Reine resembles very much in appearance that of the Hamilton.

THE NAMER OF COLLINS GULCH

Mr. T. A. Collins, late of Victoria, B. C., is visiting this district with a view to securing land upon which to settle. Mr. Collins prospected for placers in this country about 16 years ago. He located a claim at the mouth of what is now known as Collins' Gulch (it having been named after him) and worked the ground until the pay dirt was exhausted. The claim was not considered very rich at that time, only yielding its discoverer about $5.00 per day.

Mr. Collins saw no evidence of the excellent coal which has since been discovered on the gulch to which he gave his name.

$1,000,000 FOR THE STEMWINDER.

It is stated on reliable authority that an English company has offered the New Fairview Corporation $1,000,000 for the Stemwinder, one of its properties.

LOCAL AND PERSONAL.

Mr. T. A. Rogers of Aspen Grove is in town.

Mr. R. L. Cawston of Keremeos, is back in Princeton again.

Grand celebration at Princeton July 1st and 2nd. Don't fail to come.

Judge Tunstall of Kamloops, came in on the Nicola stage last Saturday.

Mr. F. S. Findley, traveller for the Hudson's Bay Co., came up from Keremeos last Saturday and went out to Nicola Sunday morning on the stage.

Mr. A. Gallinger is down from Boulder Creek. He states that sinking on the Cousin Jack was hampered by water coming in, and that his men are now working on the tunnel again.

Messrs. Richter, Cornell and Conkling drove up from Keremeos on Monday last. Mr. Richter returned home on Thursday, Mrs. Chas. Richter of this place accompanying him.

Visitors from Princeton report an excellent time at Keremeos and Fairview on the 23rd and 24th. Our local athletes Messrs. Ryder and Revely, were successful in capturing a fair share of the honors.

Our old friend Mr. Robt. Stevenson returned from the coast last week. He states that people of the coast cities are beginning to manifest a great deal of interest in this section, especially in the coal and platinum resources of the district.

HOTEL ARRIVALS.

DRIARD HOTEL, NICOLA LAKE.

Louis Marks, Victoria; W. Chapman, Lacombe, Alberta; Dad Allen, Aspen Grove; T Cirnow, Leon Moran, Spence's Bridge; J F Williams, Ashcroft; Robt. Stevenson, Vancouver.

HOTEL TULAMEEN, PRINCETON.

H B Dibble, Keremeos; F W Groves, Ashnola; F P Cook, T McPhail, Granite Creek.

HOTEL PRINCETON.

H W Conkling, C H Cornell, R L Cawston, Jno Richter, Keremeos; R Stevenson, Vancouver; W A McLean, Ashnola.

HOTEL JACKSON.

Al Hitchcock, Copper Mt; J H Jackson, Tulameen; A L Smith, Nine Mile Creek; F S Findley, Vancouver; Alex Swan, Tulameen; Jno Andrews, Aspen Grove; Frank Riley, Fairview; Geo. Beaver, Molson, Wash.; Mr. Dalby, Allison; Hugh Campbell, Ashnola; A Gallinger, Boulder Creek; T A Rogers, Aspen Grove.

A MARKED CHANGE.

Recent reports from Victoria indicate that the government is preparing to make some important changes in its railway bill in regard to land grants. It has been found impossible to force the bill through the house in its original form on account of the united opposition of press and people against the prodigal waste of lands and money intended by the government.

Martin, by whose grace the government is allowed to exist, is the leader of a party that includes in its platform a plank declaring against the giving of land bonuses to railway companies. Under such conditions it was next to impossible for him to support the bill, containing as it did, in its worst form, the very principle his party professed to aim at destroying. The government could do nothing without Martin's support, hence the change. To the press is largely due the credit of the change in policy.

Many of the coast, and nearly all the interior papers strongly opposed the alienation of the public lands, and public opinion was so thoroughly aroused that even some of the corporation-owned dailies of the coast were compelled to fall in line in order to retain public confidence.

EXCHANGE COMMENTS.

The last act in the comedy at Victoria is now taking place. "Joe" will pull the string shortly and the curtain will drop over one of the greatest farces in the history of the province.—Kootenaian.

The Colonist says the government is in a peculiarly helpless position. It is. More than that, it occupies a peculiarly ignoble position. If it were not lost to all sense of decency it would resign.—Victoria Times.

A great cheap store in Toronto is having trouble because it will not pay its printers living wages. The papers of that city who bow to the dollar are keeping the thing dark, while in the west many union men still buy from the firm.—New Denver Ledge.

The Dunsmuir Government in reducing the estimates this year takes off an average of $1,000 each from the allowances for the constituencies of Government members and reduces the allowances for opposition districts by an average of $9000 per member. It doesn't pay to be opposition.—Kootenaian.

Where platinum or blue gravel is found miners should look for rough diamonds. Many a diamond has been thrown away from lack of knowledge upon the part of its finder.—Ex.

To feel much for others and little for ourselves, to restrain our selfish and to indulge our benevolent affections, constitute the perfection of human nature.—Dr. Adam Smith.

NOTICE.

A sitting of the Board of Licensing Commissioners for the Nicola District will be held at Princeton on Monday, June 16th, 1902, at one o'clock, p. m., to consider the following applications:—

Myles Silverthorne, for a transfer of the Hotel License held by John H. Jackson of the Hotel Jackson, Princeton.
Henry S. Cleasby, for Hotel License for Pioneer Hotel, Coutlee.
W. A. McLean, Hotel License for Ashnola Hotel, Ashnola.
Mrs. Alice James, renewal license for Granite Creek Hotel, Granite Creek.
George Aldous, renewal license for Hotel Tulameen, Princeton.
Charles Debarro, renewal license Otter Flat Hotel, Tulameen City.

HUGH HUNTER,
Chief License Inspector,
Nicola District.

Princeton, May 26, 1902.

THE SAFETY OF LEGITIMATE MINING

The Mining Industry Has Paid More in Dividends Compared With Other Industries In Last 30 Years Than Any Other Business.

A great deal has been written of the colossal fortunes made in mining and the money that had been lost in trying to make money out of mines. But the fact still remains that the percentage of loss, where a little business sense has been employed in the management and development of mines, is less than that of any other business under the sun, while at the same time the profits have been larger. The following is an extract from an article published by the New York Tribune:

"Despite its load of fraudulent claims and wildest schemes, the mining industry has paid more money in dividends, compared with other industries started in the last 30 years than any business known. Compare the profits in mining with the profits of the 156,000 odd miles of railroad, with the aggregate liabilities of nearly $10,000,000,000, then you will see which pays the most. Under the wing of mining there exists some of the safest and most profitable of all business. Take, for instance, the 12 great smelting companies, the mineral pawnbrokers. The smelting companies that do a strictly custom business show absolutely and unquestionably the largest profits of any industry in America. I know of instances where capital invested in smelting companies has been turned five times a year, and each time the margin of profit has been over 20 per cent. of the entire amount handled. They take no risk: simply buy the raw gold and silver in the ore at a reduced price, extract their cost of treatment and pay the miner the residue. It is a business where the principal is absolutely safe. All of these things should show the people the value of mining. Of late it has come about that if a mining man presents an enterprise to conservative capital he is looked upon with suspicion and no assistance is rendered him. The investor fails to realize that the very sinews of commerce come from the mines and that they are the root of half the successful industries of this country. Last year, notwithstanding the fact that capital gave very little assistance to the mining industry, there was a steady, healthy increase of prosperity. Of the many millions produced from the mines the amount was divided so that all avenues of industry profited. Over 10 per cent. went to railroad corporations, 37 per cent. went to mine owners, fully 15 per cent. to smelting works, while the residue, 38 per cent., was circulated among the laboring elements."

THAT WICKED COMPOSITOR.

Irreverent Joke Perpetrated on a German Band.

That irreverent joker, the typesetting machine, has been at it again. On Saturday afternoon it shocked the feelings of the community through the columns of The Evening Citizen, (Ottawa), by stating that:

"Considerable amusement was caused by a German band this morning taking a position in front of an O'Connor street saloon and playing Nearer By God to Thee."

We desire to express regret for the publication of the item in question and to retract, withdraw and apologize for the statement that the little German band was guilty of that particular atrocity. It has enough sins to bear.

According to the Kootenay Mail work has been continued on the property of the Laborers' Co-operative Mining Company at Sicamous all winter. The upper tunnel is in 116 feet and has developed a quartz vein 26 feet in width, carrying values of $8 to $25 in gold and 8 per cent. copper. Picked samples have assayed up to $63.58 in gold and copper values. A start will be made immediately in the low level tunnel, and if the ore body proves as good on the lower level as in the upper, the property is likely to prove a valuable mine.

The shipments from the Boundary mines for the past four months were as follows:—Granby mines, 109,697 tons; Mother Lode, 46,668; Jwel, 1,140; Golden Crown, 630; Winnipeg, 625; Snowshoe, 660; No. 7, 250; Sunset, 150. Total, 159,820.

IMMENSE PROFITS OF LOW-GRADE ORES.

By Economical Reduction—The Large Mines Handling Low Grade Deposits of Free Milling Ores Are Demonstrating this Fact.

In an article entitled "A Profitable Mining Business," the Black Hills Mining Review of Deadwood, S. D., draws attention to a matter concerning which much has been said, but about which too much cannot be written, inasmuch as it concerns mining in a large sense, and which means the econamical reduction of low-grade ores. This is what it says:

"It seems strange to the average reader to have any business connected with mining called 'manufacturing.' The fact in the case, however, will warrant this claim, as much so as the milling of wheat into flour. The large mines handling the low-grade deposits of free-milling ore are demonstrating this fact, and to the average mind it no doubt seems unreasonable. Facts, however, are stubbor things, and when we read the reports of the Alaska-Mexican and the Alaska-United Mining companies manufacturing gold by grinding the auriferous rocks of Douglas Island, and note the results obtained, we are forced to admit that the business of mining free-milling ore has actually resolved itself down to a manufacturing proposition. During the month of January the Alaska-Mexican mined and milled 20,015 tons of ore. The gross receipts for the month were $43,198, the ore averaging only $2.15, a profit of only 70 cents per ton, still their total profit for the month was $14,079.

"The Alaska-United comp ny mined and milled 19,710 tons of ore during the same month, giving a total value of $33,440, the ore averaging only $1.70 per ton, while the working expenses were $20,699, or $1.06 per ton, leaving a net profit of only 65 cents per ton, still their total profit for the month was $12,941.

"This demonstrates that the volume of business transacted has more to do with the profits than the mere value contained in the ore; the expense per ton is diminished by increasing the capacity, and hence the profits are increased proportionately; the extent and character of the deposit being the only requisite.

"The great Homestake mine produced in the year 1901 $3,539,232, and this was obtained from ore of no greater value than $5 per ton, yet from the proceeds secured this company pays in dividends 50 cents per share every month in the year."

CONTRARIES.

Oh, dollars are mysterious things,
Their habits oft appal.
You've either got a lot of them,
Or next to none at all.

And men, too, are mysterious things—
The most profound of all.
They've either got no sign of spunk—
Or mountain loads of gall.
