SIMILKAMEEN STAR

Published in the Interest of Princeton and Similkameen District.

VOL. II. NO. 45. PRINCETON, FEB. 15th, 1902. $2. PER YEAR

LOCAL AND PERSONAL.

Mrs. Hagerman is expected to return to Princeton next week.

Charlie Stirling arrived from Spence's Bridge with a load of freight last Thursday.

Old timers predict early ice jams in the rivers if this warm weather keeps up a few days longer.

Mr. and Mrs. Loudon of Loomis, Wash., are in town visiting their daughter, Mrs. Chas. Richter.

No doubt today's mail will bring us interesting news regarding the railroad and political situations.

Joe Wigmore contemplates organizing a minstrel troup to tour the lower Similkameen and Boundary Creek country.

The weather during the past week has had every appearance of spring. If it keeps up the snow will soon disappear.

Preparatory to the building boom in the spring, the McAlpine Bros. are centreing all their lumber available at Allison.

Owing to the late date in the week on which the Masquerade Ball was held, we are unable to give a detailed account of it until next.

French & Day have just completed a wagon road from the Similkameen bridge to the mouth of the tunnel on the V. F. M. & D. Co's coal property.

The McAlpine Bros. have a contract for the erection of a large general store at Allison. The late railroad news is making quite a stir at that place.

Jack Budd, Ike Laughead and W. A. Davis, left for Aspen Grove Camp last Thursday morning, where they intend to do considerable work on the Joe Dandy group of claims, which are owned by Messrs. Budd, Aldons, and Roberts.

Mr. Chas. Allison drove up from Keremeos Thursday, bringing with him Messrs. Peterson and Barns of the Nickel Plate mine, and Mr. Barrow, who is sizing up the situation with a view to putting on a steam wagon between this place and Penticton. Mr. Barrow is likely to stay in town for a week or so. The party are stopping at the Hotel Princeton.

China New Year was most enthusiastically celebrated during the past week by all classes and clans of Chinese in this district. Flashing red cards and fragments of spent fire-crackers indicated their abode, and many of our citizens was thereby attracted to call and pay their respects to "John." Last Wednesday evening a number of them called on us and left their cards, among whom were Jim Wa, Yee Geo, Alt Jack, Tee Uck, Ahp Unk, and many others.

MINING CAMPS TRIBUTARY TO PRINCETON

THEIR LEADING CHARACTERISTICS.

Copper Mountain, Kennedy Mountain, Boulder Creek, Aspen Grove, Summit, Roche River, Friday Creek, Sterling and Five Mile Creeks.

COPPER, GOLD, SILVER, LEAD, COAL, IRON.

The news that the C. P. R. has filed plans with the government for the building of a line from Spence's Bridge to Midway and that construction will commence in March, should be instrumental in calling the attention of the mining world to the resources of the district which this road will open up. Princeton is the centre of the Similkameen Division and the above named camps are all tributary to it. Here are located the stores, hotels, and government offices, and any activity in the camps in this vicinity will immediately redound to the advantage and upbuilding of the town.

COPPER AND KENNEDY MOUNTAINS

are the two camps near Princeton that have thus far attracted the most attention. They are situated on the Similkameen river, about twelve miles from Princeton in a southerly direction.

Copper Mountain appears to be one great dyke of diorite whose width and length has not yet been accurately determined, but from all indications is about five miles long by three wide. Large croppings of copper ore are found in this diorite, and a great number of claims have been staked. Among the most notable of these might be mentioned the Sunset, Princess May, Triangle, Ada B., Sunrise, and Copper Cliff. The Sunrise has been developed to a greater extent than any other claim on the mountain. A shaft has been sunk 200 feet on it and about 80 feet of cross-cutting has been done, all of which is said to be in ore of a working grade. Gooderham & Blackstock of Toronto, now hold a controlling interest in this valuable property, and it is reported that they are preparing to spend considerable money on it in order to further prove the continuance of the ore body. The Sunset ore is copper pyrities and bornite with small values in gold. The Princess May has been developed by a series of open cuts which have exposed a big body of good grade ore. This is unlike the Sunset in that little or no bornite is found. It is admitted on all sides to be one of the most promising claims in the camp. A 50 foot shaft has been sunk on the Sunrise with good results.

There are many other equally good showings in this camp, on some of which considerable work has been done, but lack of space will not permit the mention of more than a few.

KENNEDY MOUNTAIN

lies directly west of Copper Mountain with the Similkameen River separating them. The ore bodies of Kennedy Mountain seem to be a continuance of the Copper Mountain leads, the ore possessing much the same characteristics.

The Red Buck is one of the best known claims on this mountain, and several flattering offers for it have been refused by the fortunate owners.

The claim is developed by a short tunnel and a number of open cuts. The ore is a massive copper sulphide carrying extremely good gold values.

Other promising claims on this hill are the Brooklyn, Magnetic, Ingersoll Belle, Fraser, Lorraine and Mogul, all of which have decidedly good showings.

About three miles south of Kennedy Mountain

FRIDAY CREEK

flows into the Similkameen river. Very high grade bodies of bornite ore have been located on this creek, the Gladstone being the best developed. Fifteen miles from Friday Creek the Roche and Pasayton rivers come together and form the Similkameen.

A claim called the Pasayton on which is a small lead of white quartz carrying high values in gold, has been staked near the junction of the two rivers. Assays of $1000 and over have been obtained from this lead.

Higher up the Roche River is the Red Star claim, on which a tunnel 43 feet in length has been driven on a lead of copper-gold ore of high grade. The vein filling is a whitish-grey talc, very soft and easy to work.

Provincial Mineralogist Robertson reports some good territory on this river which is yet unprospected.

East of Princeton on

FIVE MILE CREEK

a number of claims have been staked, the Shamrock belonging to Gibson & Morrison, having a 100 foot tunnel driven on it. The ore encountered carries fair gold and copper values, and should be an easy smelting ore on account of the large quantities of iron and lime in it.

STERLING CREEK

flows into the Similkameen 15 miles east from Princeton. The leads in this camp are mostly gold bearing, with small values in silver and copper. On the Lion's Head a shaft has been sunk 48 feet on a grey quartz carrying good gold values.

To be Continued.

WILL BE SENT FREE.

By instructions of the Hon. Minister of Agriculture another distribution will be made this season of samples of the most productive sorts of grain to Canadian farmers for the improvement of seed. The stock for distribution is of the very best and has been secured by the director of the experimental farm from the record breaking crops recently had in the Canadian Northwest. It will be worth while for farmers generally to renew their seed of oats when varieties which have produced more than 100 bushels per acre can be had. The distribution this spring will consist of samples of oats, spring wheat, barley, field pease, Indian corn and potatoes. Every farmer may apply, but only one sample can be sent to each applicant, hence if an individual receives a sample of oats he cannot also receive one of wheat, barley or potatoes, and applications for more than one sample for one household cannot be entertained. These samples will be sent free of charge through the mail.

Applications should be addressed to the Director of Experimental Farms, Ottawa, and may be sent in at any time before the 15th of March, after which the lists will be closed, so that all the samples asked for may be sent out in good time for sowing. Parties writing should mention the sort or variety they would prefer, and should the available stock of the kind asked for be exhausted, some other good sort will be sent in its place.

COPPER'S BRIGHT OUTLOOK.

The year 1902 certainly looks good from a business standpoint, and there is every reason to look for a large copper output, says the Western Mining World. The present price of copper need not worry us, for it is at its low point now, and for a short temporary period at that. The influences that have caused it are rapidly being changed, and almost any bright morning we may awake to find that copper has risen above fifteen cents, to remain permanently there. The business forces demand it, and it would have been there all along had it not been for a few shortsighted interests who, figuratively speaking, killed the goose that laid the golden egg. The pocketbooks of the Michigan stockholders are doing the work of education necessary to bring the management to its senses, and there is a howl going up that cannot be long silenced.

The large ore crusher for the Mother Lode mine, Deadwood camp, has arrived and preparations for getting it in running order are being pushed so as to make it available for crushing a larger output.

POLITICAL CHAOS.

It is little wonder that outsiders find it extremely difficult to understand B. C. politics. Even the close observer living in the Province finds great difficulty in following the kaleidoscopic changes that take place in the personnel of the different factions, cliques, and parties. The old saying that "politics makes strange bed-fellows," was never better exemplified than in the politics of this unfortunate province.

Some see a solution of our troubles in the drawing of party lines: some in the triumph of this or that particular faction.

Party lines might aid in clearing the atmosphere to some extent, but it is not the panacea for all the ills of the body politic that its advocates would have us believe.

What we want and must have, are men with administrative ability and clean records; men who will legislate in the interests of the whole province with no regard for any particular section; and we conspicuously lack such men, or if we possess them they have as yet failed to prove their right and title to our confidence.

But perhaps our people are not worthy of better leaders! Are we sure we could recognize one if he did appear on our political horizon? The apathy that will allow of the present distribution of seats in the legislature is reprehensible in the extreme.

That one section of the province will submit to this injustice so tamely, and that another section will insist on perpetuating it, argues a grave lack of the elementary virtues essential to the procuring of good government.

Then again the spectacle of two railway corporations fighting each other for the ownership of the legislature, while the people look on with indifference or mildly speculate on the chances of the contestants, is anything but edifying.

A radical change is required both in men and methods if the almost hopeless tangle into which our politics have drifted is ever to be straightened out, and the sovereign people must bring about the change.

The renewed activity in railway circles which the approach of spring brings with it, induces a feeling of hopefulness among the people of this section who have patiently worked and waited for the advent of a railroad to make possible the development and progress of as rich a mining district as the boundaries of British Columbia inclose.

Messrs. F. E. Young and W. W. Clark, two live and energetic business men have assumed control of the Kamloops Standard, and with their combined talents will no doubt make it one of the best publications in the interior.

NOTICE.

THIRTY days from date I intend to apply to the Chief Commissioner of Lands and Works for a license to prospect for coal on the following described lands:—

Situate near head of Collins Gulch, about two miles south of Tulameen townsite, commencing at post marking Blakemore Coal Claim, thence running 80 chains south, 80 chains east, 80 chains north, 80 chains west, to place of commencement, in all 640 acres.

A RAILROAD AT LAST.

Will Begin at Spence's Bridge and Run Through Similkameen and West Fork Country.

Arrangements are being perfected by the Canadian Pacific Railway Company for the construction of a line of railway connecting Spence's Bridge, on the main line, and Midway, the present terminus of the Columbia & Western. Plans were recently filed showing the route of this new railway. After leaving Spence's Bridge it will take a southerly direction, passing through Nicola and Aspen Grove to Princeton.

The railway will then take an easterly route towards Penticton, at the foot of Okanagan Lake, and from there will climb the divide separating the Okanagan river from the west fork of Kettle river. It will follow the valley of the west fork to Rock creek and thence to Midway.

While the contemplated railway will not make the most direct route from the coast to Kootenay, the company contends that it will afford as quick and easy means of communication between the coast and Kootenay as can be secured by any competitive route. The railway will pass through districts that have been only awaiting transportation facilities to ensure rapid development. The Similkameen is rich in copper deposits and coal measures; the country to the north, Nicola, offers many inducements to the cattle man and agriculturist, and the country tributary to the west fork of the Kettle river is rapidly coming to the front because of the richness of its mineral resources.

In this connection, it may be stated that there is an unconfirmed rumor that the Canadian Pacific Railway Company will secure the Midway & Vernon charter and build this line in order that the west fork country may be more fully opened up.

The C. P. R. Company evidently had the building of this road in view for some time. During the past summer a big barge was built on Okanagon lake. It was not needed for ordinary traffic on the lake, and the supposition is that Penticton will be made a base for supplies and the barge used in conveying freight from the terminus of the Shuswap & Okanagon railway at the head of the lake to Penticton.

The report comes from Montreal that the Canadian Paint company are considering the advisability of establishing a factory for the manufacture of white and red lead and lithorage from lead mined in British Columbia. The Canadian Pacific railway has decided to establish a lead refinery and this has suggested the proposal named.

CLARKS STAGE LINE

Leaves Kamloops for Quilchena and Nicola Lake every Monday. Leaves Nicola Lake for Kamloops every Friday at 6 a. m. SMITH CURTIS' INTERVIEW

In the Montreal Gazette—A Popular Delusion Explained—The War Eagle Example.

Smith Curtis was in Montreal lately, and an interview at length from him appears in the Gazette.

Speaking on the alleged loss of $30,000,000 by easterners in western mining stocks, the Gazette's report says:

"Mr. Curtis having been informed that Montreal had lost a good deal in several western mining deals, made the following statement:"

"The people in the east have confused mining with share speculation. The newspapers, instead of showing discrimination in criticism, have exaggerated the losses in share speculation, and at the same time attributed them to mining. One of our leading citizens the other day quoted an article appearing in a city paper here last spring, asserted the losses of Montreal people to be $2,000,000 in the mining craze. This is a popular delusion.

"The journal in question arrived at the conclusion that over $30,000,000 had been lost in the share buying of some twenty-two mining companies, mostly British Columbian, by taking the difference between the highest and the lowest price at which various shares have been quoted; for instance, the 1,750,000 shares of War Eagle were credited with the loss of the difference between $3.88 the highest market price, and 14c. the lowest (then) price, or a total loss of $6,545,000.

"Let me tell you how wrong this conclusion is. Gooderham and Blackstock, the proprietors, have always kept a majority, probably 1,000,000 of the shares; the public got about 750,000 shares, not at $3.88 a share, but at prices ranging from 80c. up. The number of shares actually sold at $3.88 probably never exceeded 5000. There has been no real loss to Gooderham and Blackstock on the shares they have kept, as doubtless the shares they did sell to the public, recouped them for any money advanced. The average loss per share to the public does not exceed $2.00 per share on the 750,000 shares, or a total loss of $1,500,000, and I venture to say that not one-third of that loss has been borne by Montreal people. So I could go on through the whole list."

During the last week the price of copper has stiffened appreciably and still higher quotations are anticipated in the near future.

NOTICE.

Thirty days after date I intend to apply to the Chief Commissioner of Lands and Works for a license to prospect for coal on the following described land:—

Commencing at N. E. corner post, running west 80 chains along south end line of C. O. French's claim, thence south 80 chains along the east line of W. J. Waterman's location, thence east 80 chains, north 80 chains, to point of commencement, containing 640 acres.

M. K. FRENCH, Locator.
D. O. DAY, Agent.
Located Dec. 12, 1901.

NOTICE.

THIRTY days from date I intend to apply to the Chief Commissioner of Lands and Works for permission to purchase 160 acres of Crown Lands as follows:—Commencing from a post at the S. W. corner of Lot 1968, on the north bank of the Similkameen River, thence north 80 chains along said boundary line of Lot 1968, thence west 40 chains, thence north 20 chains thence west 40 chains to the Similkameen River, thence down the Similkameen River to point of commencement, and containing 160 acres more or less.

FRANK BAILEY, Applicant.
Dated November 5, 1901, Princeton, B. C.

NOTICE.

NOTICE is hereby given that an application will be made to the Parliament of Canada at its next session for an Act to incorporate a company to be known as "The Canada Central Railway Company," to construct and operate a line of railway commencing from a point at or near the mouth of the French River on the North Coast of Lake Huron, northwesterly to some point at or near Whanipatae Lake; thence northerly to some point at or near the headwaters of the Montreal River in the District of Nipissing; thence northwesterly to some point on the Albany River in the Province of Ontario; thence in a northwesterly direction through the District of Keewatin and the Province of Manitoba to some point at or near Lake Winnipeg; thence northerly and westerly by way of Prince Albert in the District of Saskatchewan and Edmonton in the District of Alberta to Tete Jaune Cache in the Province of British Columbia; thence southerly in the vicinity of the North Thompson River by way of Kamloops to a point at or near Princeton; thence westerly to New Westminster; thence northerly to Vancouver with power to construct and operate a line of railway from some point on the south or east coast of Vancouver Island to Victoria; with further power to construct and operate an extension line of said railway from some point on the railway first above mentioned at or near Tete Jaune Cache westerly to Port Essington or Port Simpson on the Pacific Coast; with further power to construct and operate a branch line southerly from the said line of railway in the Province of Ontario to the towns of Port Arthur and Fort William on Lake Superior; with further power to construct and operate a branch line from some point on the said line of railway between Kamloops and Princeton southeasterly by way of Penticton to Grand Forks; with further power to construct and operate a branch line from some point on the said line of railway at or near the North Thompson River to Asheroft and Anderson Lake; with further power to construct and operate telegraph and telephone lines for the purpose of its business and for the public; and with further power to own and operate water power convenient to the road for their railway and other purposes; with further power to own and operate steamships, ferries and shipping and build and erect the necessary wharves and elevators; and with such other power and privileges as are usually given to railway companies.

THOS. H. JOHNSON,
Solicitor for the Applicants.
Dated at Winnipeg this 21st day of December, A.D. 1901.
