Princeton coal excellent for house and steam use.

SIMILKAMEEN STAR

By deeds, not words, are we proven: Doing, not saying, counts.

Rails now laid to Princeton on V.V., & E. and regular train service expected within sixty days—C.P.R. announced to tap Princeton via One-Mile next year—Coal and ore mining, smelting and allied industries—Completion of railway to coast urgent—Watch town grow.

Vol. X. No. 45. PRINCETON, B. C., WEDNESDAY, NOVEMBER 3, 1909. $2 a Year in Advance

WHIPSAW WHISPERS

Wagon Road Required to Assist in Development of Camp.

Ore is Valuable for Fluxing and Easy of Treatment—Tunnel will be Run.

Knight & Day recently came down from Whipsaw, having packed in their winter's supplies for the work they have planned. All outside work has been done, driving the tunnel is the next thing to be done. Considerable interest centers in their operations, for the main ore body is expected to underlie the carbonates which first gave a clue to it. At what depth the solid and continuous ore may be met is a matter of conjecture now. This work will demonstrate the possibilities of Whipsaw to a great extent and prove what is generally believed to be a great silver-lead mine.

T. D. Pickard, mining expert, sometime associated with M. K. Rodgers, was recently at Whipsaw examining the silver-lead propositions.

A large petition for a wagon road has been forwarded to Mr. Shatford, who has consented to use his influence in securing an appropriation to be expended next spring and thus give Whipsaw wagon communication with the railway at Princeton.

The silver-lead ore of Whipsow will be valuable to a smelter in treating the refractory ores found throughout the Similkameen mineral district. It is one of the difficulties of smelting to obtain right fluxing ores, but Whipsaw seems to offer a solution of all those troubles.

W. S. Wilson will shortly begin work on the Virginia group, Whipsaw Creek. This is a free milling gold proposition resembling Nickel Plate ore. Mr. Wilson refused a bond offer of $25,000 for this property two years ago. Assays from the Virginia would warrant hauling the ore by wagon to Princeton for shipment to the Hedley Gold Mines Co's mill.

POLITICAL POT POURRI.

Granite Creek, Tulameen and Ashnola are practically unanimous for Shatford. Reports from every part of the Similkameen riding indicate the worse than folly of either a Liberal or Socialist candidate opposing him. The money required to pay for an election would serve a much better purpose in building roads and trails.

Most Liberals concede that any Opposition candidate, be he Socialist or Liberal, will lose his deposit of $200.

A close estimate of the number of Liberals in opposition to Mr. Shatford in this division reveals four solid and one wavering, or a total of 5.

L. W. Shatford was in town last week, looking fit for the fray and receiving the congratulations of many on the successful outcome of his medical treatment in the east.

Price Ellison, a farmer, has been made Minister of Lands in place of J.F. Fulton, lawyer. Sensible change, isn't it?

L. W. would do all right as finance minister.

BIG MINING AND LAND DEAL GOING THROUGH.

It is common report that the United Empire, owned by W. C. McDougall and associates, is about to change hands, the deal being handled by F. P. Galliac who represents Spokane capital. The price is said to be considerably over $100,000. Principals in the deal will arrive this week. In the event of this transaction going through a smelter, lime, cement and fire brick works will be established. The intending purchasers of the U.E. are also negotiating for the Allison ranch, which carries with it coal rights. Other properties may be included, the evident intention being to secure as much water rights as possible, and land for isolation of smelter. It is the largest deal yet promoted in this section and is of vast importance to Princeton.

GUY FAWKES' DAY AND GUNPOWDER PLOT.

Excelsior L.O.L. No. 2102 of Princeton will celebrate Guy Fawkes' Day, Friday next, Nov. 5, by a social entertainment in the I.O.O.F. hall, consisting of social games, address, vocal and instrumental music and supper. The address by Rev. Mr. Conn will be relative to and in commemoration of the Day honored by Orangemen the world over and will be given in his usual impressive and instructive manner.

INDEPENDENT THINKERS ARE COUNTRY'S SAFEGUARD.

Some eccentric persons pride themselves on the fact that they do not change their opinions on political questions, remaining always the same, as their father and grandfathers were. Persons blinded with ignorant conceit are apt to think that a change of views indicates weakness, when, in fact, it is only the strong and courageous who dare to break away from error and sever ties of party. It is no sign of intelligence for a man to boast that he never changes his political views, for, if one be doggedly stupid enough he will never change in politics or anything else. Without change there is decay. That is a natural law, and the man who cannot change his political opinions must be stagnant, non-progressive and classed with the mossbacks or mugwumps.

INITIAL COAL MINING

V. F. M. Co. Active in Preparations for Production of Coal.

Spur is Big Job and will Delay Shipping Coal—Pleases H.G.M. Co. for Steaming.

A wagon train of coal miners' household effects arrived on Monday from Merritt. This is the beginning of a large influx which may be expected as the V.F.M. Co. begin to ship over the completed railway.

Grading proceeds day and night on the coal mine spur. It will take some three or four weeks before the track is laid, Meanwhile some urgent shipments are hauled by wagon to the main line and reloaded into cars.

It is learned that the Hedley Gold Mines Co. are pleased with the trial shipment of coal from the V.F.M. Co. As a steam and domestic coal the Princeton article has been given some very favorable unsolicited testimonials.

Uhler & Cox have had experts Parsons, of Olalla and Levy of Rossland examining their properties on Five-Mile. There is no doubt these prospectors have a group which possess high values in copper and gold as well as extent. They are deserving of a big reward for having proven they own a mine.

Cottages for miners are being constructed by the V.F.M. Co. on Riverside Av. Bert Irwin is in charge of the carpenter work.

Mining machinery for Princeton colliery is at Keremeos awaiting completion of the spur.

Powder magazine and storehouse are finished; the tipple is making good progress and excavation for weigh scales is done. The coal company are well advanced with their work above and below ground, delay being probable for want of spur trackage.

HARRISON HOT SPRINGS IN JEOPARDY.

J. O. Coulthard and Dr. Hall of New Westminster are partners in the Harrison Hot Springs, the mineral properties of which they now own, having located a gold mineral claim which includes the celebrated hot springs. The owners have had some good offers for their rights but they are not inclined to talk unless six substantial figures are in the consideration price. The original claimants, the Hot Springs Co. owning the hotel, refused half a million dollars from a railway company last year for their rights. No doubt they would take much less now. Probably the hotel owners are wishing that the discoverer of gold was away down where the hot springs obtain the heat to make them boil. It shows that a man never knows where gold may be found in this country. Further, it pays a man to go out in the woods as 'Ossie' did and sit down and think and then act.

TOWN AND DISTRICT.

The Liberal:Conservative party will convene at Keremeos on Thursday.

A. Sullivan, school inspector, was in town Saturday to Monday and examined the public school. He was principal of Nelson public school for six years, making many friends during that period, and earning deserved promotion to the inspectorship. He met a number of old Nelsonites here.

Dr. and Mrs. Whillans of Hedley were visitors here Sunday.

Geo. Murray, government agent at Nicola, has been retired on superannuation and will be succeeded by Mr. Rolfe.

The sale of Lot 10, block 17, by T. C. Revely to Mrs. Gorsulowsky has been recorded. The sale was effected by Avery & Avery, the price being $275.

E. Tingley of Otter Valley is in town and reports building activity at Tulameen.

Messrs. Hickling and Waterman of the V.F.M. Co., expect to leave tomorrow via Nicola, for Vancouver.

F. A. Ross, late manager of the Daly Reduction Co., Hedley, B. C., has gone to Hostitopaquillo, Jalisco, Mexico, in the interests of the estate of Marcus Daly, which has the well known Cinco Minas group under option.

There are a number of minor real estate transactions concluded and in progress in and around Princeton, the latest being the sale of lott 22, block 20, Ashnola, for $175, to J. P. McConnell of the Saturday Sunset.

J. R. Campbell, druggist, leaves for the coast tomorrow on a business and 'social' trip.

Wild geese are southbound in large flocks now, some of them falling to the deadshots in the camp.

Dr. Lazier goes out by Nicola stage tomorrow to the coast. He will consult the government regarding the hospital.

Hugh Cowan is improving in Portland sanitarium.

Hallowe'en pranks with the fire bell is dangerous fun. The town of Ymir had a big fire, caused by similar folly.

Geo. McCoskery is very ill, with slight hope of his recovery.

Divine service on Sunday at 7.30. Mrs. Waterman will sing. Oh my Soul!

The V.V., & E. survey party will finish at Otter Flat in two weeks. No sign of construction west of Princeton.

The Similkameen Star.

J. M. Wright,

SOME REASONS FOR SLUMP IN LIBERAL ALLEGIANCE.

Touching those matters which more particularly concern the Liberal party it is a most lamentable fact that from being a respected and united political organization in the days when Hewitt Bostock (now Senator) represented Yale-Cariboo, it is now the laughing stock of the Dominion, torn, bedraggled, decimated and sadly lacking in those physical and intellectual powers which were once the pride of the party. The healthy tone and unity which the Senator imparted to it were completely dissipated by the late member for Yale–Cariboo. The utter rout and ruin of the party culminated in the knockout blow received last November. In the four years of the late member's representation, double dealing, broken promises, false pretences and traitorous treatment of those who were responsible for his election in 1904, marked every hour of the time from that date to November 12, 1908. As a mark of their disapproval of the manner in which public affairs were conducted the Liberals of Princeton and Yale-Cariboo in general emphatically repudiated the Liberal candidate and sent him forever into exile, a warning to all who emulate him.

The aftermath of the crushing defeat of Nov. 12, 1908, is now being felt in the elections to be held on the 25th inst. With a tattered organization, like so many sheep without a shepherd, the Liberals of the Similkameen are powerless to offer combat without still further bringing discredit upon the party and adding annihilation to decay and certain defeat. No man having regard for his reputation would care to blast any future running chance he might have by becoming a Liberal candidate in the present contest in this constituency. In fact no name, so far as is known in this office, has been mentioned seriously as candidate. Certainly no man could save his deposit in opposing the sitting member.

Until the return of sanity in the headquarters of Liberals the condition alluded to may be expected to continue and become yet more aggravated. The removal of the Star from the 'index expurgatorius' at Ottawa, placed there by the late member; carrying out reforms promised but not fulfilled; reeognizing the efforts of those upon whom the heat and burden of battle fell and acting upon the suggestions of local organizations on all matters within their purview: not until these conditions are effected can any hope be held out for united progress. The work of reclaiming a thousand dissident Liberals who voted against the late member for Yale-Cariboo and who now enter the provincial contest determined to obliterate his baneful influence and that of his servile followers, requires the skill of a diplomat along with careful reorganization.

This paper is not so craven that it will meekly submit to injury without strong resentment. Not until every reasonable public and personal grievance shall have been remedied will there be any cessation of effort to right them. In company with a large proportion of the intelligent and independent electorate this paper condemned the singular tactics adopted during the recent four years of Liberal representation. How well grounded those complaints were found unmistakable expression in the verdict that spelt disaster to the Liberal party in Yale-Cariboo. Admitting that the Liberal candidate was simply outclassed in comparison with the Conservative nominee there was no political reason why he should not have retained his seat. For, be it remembered in the light of a years' retrospect, no issue weighed with the electors—they voted with crushing emphasis for the best man and the one in whom they had confidence. For the same reason most Liberals here and throughout the Similkameen will support Mr. Shatford in the event of an election.

FENCE OUT COYOTES.

One of the most encouraging signs of a tendency towards more diversified methods in the agriculture of the middle west, and more particularly in those sections where noxious weeds are becoming a serious menace to successful cereal growing, is the awakening interest in sheep breeding.

Reasons for this are easily seen. Unlike some other branches of live stock husbandry, there has for many years been little fluctuation in the prevailing high market values for mutton sheep. A flock of sheep call for practically no increase of labor on the farm—a most important factor in these days. Sheep may be marketed at almost any season of the year, at good prices, in small numbers. There

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world.

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

PRICE: $5 in buckram with gilt top, or $7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?

FENCE OUT THE COYOTE.

From 4th page.

is a good local demand for mutton in every town. Sheep and lambs can be killed and utilized on the farmer's own table more conveniently than any other class of fresh meat.

As farm scavengers, sheep surpass all other kinds of stock and can be profitably utilized in cleaning dirty, weed infested land, as they will eat with avidity almost every species of noxious weed with which our prairie lands are becoming cursed.

The one thing that prevents hundreds of farmers from immediately establishing small breeding flocks, is the coyote.

How can sheep be protected from the ravages of this pestiferous sneak thief of the prairies is the deterring question.

Enquiry has recently been instituted by George H. Greig, western reptesentative of the Live Stock Commissioner for the Dominion government, as to how best such protection may be provided at reasonable expense.

Nearly all experienced sheep men agree that any of the ordinary woven wire fences now on the market, if properly erected, will keep sheep in and coyotes out.

The most satisfactory fence, when cost is considered, is a strip of the regular sheep fencing about 30 inches high, placed close to the ground on posts from 16½ to 25 feet apart, with one or two strands of barbed wire stretched above, at intervals of 6, 8 or 10 inches. Horses or cattle are seldom or ever injured by barbed wire when used as described, as long as it is tight.
