Mining is the Backbone of Princeton: See it Grow.

SIMILKAMEEN STAR

More People are Soured by the Success of others than by their own Failures.

Railway Transportation and a Public Telephone, Two things Lacking in the Development of Princeton at Present—Board of Trade to Issue Literature Descriptive of Vast Resources of Princeton District—Population must Rapidly Increase—Investments never Better.

Vol. ix. No. 34. PRINCETON, B. C., WEDNESDAY, AUGUST 19, 1908. $2 a Year, in Advance

WHY NOT BUY HERE?

Survey Party Purchase Bulk of Supplies from Outside Storekeepers.

As an illustration of the business methods of the C P R. and the Great Northern it is only necessary to contrast their mode of procuring supplies for their survey parties. The G. N. bought all its supplies from Princeton storekeepers while the C P.R. does not buy a mouthful from them, preferring to ship in from outside points. By thus skimping 'Tim' Shaughnessy may save a fraction of a cent on bulk articles but he loses when people, who don't forget, want to travel In contradistinction, 'Jim' Hill bought all his survey supplies here and his engineers with their wives and families were encouraged to locate here. The C.P.R. is the spoilt child of Canada—bonus-stuffed, pap-fed, always ready to grab a slice of land or snatch a plum off the national tree. The V.,V. & E. is not a bonussed road, every foot of its right-of-way being honestly acquired and fairly paid for. Ranches and coal land owned by Great Northern people have been paid for to the entire satisfaction of all those selling; no attempt at squeezing land owners, storekeepers or anybody was made. Princeton is here to do business. If the C.P.R. does not want to trade with its citizens, there can be only one logicial policy for them to carry out.

TOWN AND DISTRICT.

Hugh Hunter, Mining Recorder, has gone to Kamloops on official business and will be absent about ten days.

Miss Turner of Vancouver is the guest of Mrs. Waterman for a few days, leaving tomorrow via Nicola stage.

Division Engineer Cartwright of the C.P.R., was in town Sunday, going out to Engineer Carry's camp on Christina Creek, thence overland to Summerland along the proposed line.

C Æ. Shaw, P.L.S., was in town last week on his way to Greenwood, where he had urgent business with the Yale Lumber Co. He will return this week and complete his work of surveying a big tract of land for American investors on the Skagit.

J. H. Kennedy, C. E., E. Kennedy and K. C. Hankinson, all connected with the V., V., & E., were registered at the Great Northern hotel on Sunday.

Word has been received from J. D. Lumsden, of the Howse Co., that he is seriously ill in a Vernon hospital. His numerous friends will be glad to hear of his speedy recovery.

Dr. Westwood, of Coleman, Alb., was an arrival in town last Thursday. He owns what is known as 'Macdonald's Flat," near the Indian reserve, which, it is said, he intends to cultivate and plant with fruit trees and make of it a sort of summer resort.

WHY AND WHEREFORE

Railway People Take Things Coolly Until Psychical Time Comes.

The 'Jimhillkameen Valley' Slumbering, Awaits Onward March of Navvies.

EDITOR STAR—Sir: If you had as much money as "Jim" Hill, and were as anxious to increase it as he is, would you build the railway into Princeton, and do it qnick? Well, yes.

There must, then, be some very good reason why the railway has been delayed so long. Has "Jim" been pinched in Wall Street? Maybe so, but the chances are that the last time he dipped in there he came out with both hands full of thousand-dollar bills, and a few extra ones stuck in his whiskers.

Does he think this district has not progressed enough to pay for a railway? He knows as well as we do that we can't progress much more till it comes.

On the other hand, there are acres of real estate, miles of farm laud and hundreds of mining claims that will more than double in value as soon as the trains are running. Now, if you had as much money as Jim, would you build the railway right away, or would you hold it back until you had got in on the ground floor of the best of these speculations?

If this is the true cause of delay it means that as soon as Mr. Hill and his friends are ready the railway will come with a rush. There will be millions spent in developing mines, and prosperity will settle down on the Jimhillkameen Valley to stay.

Hurry up and get in on the ground floor, friend Jim, and start the elevator. We don't mind getting in at the second storey if you'll take us up to the roof with you. Very truly,

Welldoo, Aug. 15. SKIDDOO.

PHILOSOPHIZING.

J. O. Coulthard deposited a fine Steinway piano in the Star building which he intends for his new residence. The Star man is well supplied with musical things now. A brood of sparrow hatchlings recently arrived, have their quarters just above the editor's think tank. When the ma bird comes home with a worm or a hoppergrass there is music, which tapers off into a few strenuous yells for more when the old gal steps off into space from under the eaves. Just like some people, these sparrows have no idea that they are so many nuisances. But we cannot do without birds, as they keep down pests, nor can we do without people, as they keep up the population.

THE MINING WORLD

Independence, Bear Creek, a Mine of Unusually Fine Prospect.

Mining Inactive in Princeton District With no Hope of Recovery Until Railway

The Nicola Valley Coal and Coke Co. have a specimen lump of their coal weighing 1½ tons on exhibition at Vancouver.

Albert Johnson and the men associated with him working on the Independence at Bear Creek are in town for a few days before doing assessment work on his mineral claims. Mr. Johnson and his men have been working quite steadily for the past two years and are now taking a little holiday.

W. C. McDougall was at Champion Creek last week where he has some gold-platinum mineral claims. A number of prospectors are at work. The bridge and trail will soon be completed. He expects to return to the Creek in a few days to mine.

TULAMEEN TUMTUM.

Fires Raging as Result of Extensive Drought in the Valley.

(From Our Special Correspondent.)

Tulameen, Aug. 17.—The directors of the Similkameen Mining and Smelting Co. intend visiting Bear Creek about the 1st September. The wagon road will be opened up by that time.

W. C. McDougall made an official visit to Coutney Mountain and Champion Creek this week.

The Dominion Geological survey party is camped at Tuiameen. They have started on the 16x18 mile map, which begins at the foot of Otter Lake.

The Independence mine has been shut down owing to the necessity for machinery in sinking, which cannot be brought in until a wagon road is built.

Dan Coutney has opened up 12 feet of good copper ore on Coutney Mountain.

The government railway survey party on the 20-mile belt is camped at Kelly Creek. Big bush fires are raging in that locality.

Princeton sent a banner crowd to Tulameen on the 9th.

Len Huston delivered a load of rustic to J. H. Jackson for finishing his store. It had to be hauled from Princeton.

J. O. Coulthard will erect a fine residence on the property recently purchased by him and which corners on Harold Ave. and Bridge Street. The estimated cost is $2000.

THAT PUBLIC TELEPHONE.

The telephone injustice still exists and Princeton asks in vain for the common decency and privilege accorded other towns. Nothing quite so blindly stupid as the treatment handed out to Princeton re a public telephone has occurred in the memory of man. Ignorant obstinacy is not likely to popularize the government telephone line or put it in shape for competition with the telegraph line of the V.,V. & E. A formal protest and ultimatum of the citizens sent to Premier Laurier would, no doubt, have the desired effect. But while this is being done business suffers, messages "too late" are received and public ill-feeling needlessly provoked.

ORE GOOD AND PLENTY.

The Independence Will Become a Permanent Producer.

Mining operations on the Independence group, Bear Creek, have been suspended for the present. It appears that enough work has been done without the aid of machinery to satisfy Mr. Williams, the Granby expert who visited the property last week. To further develop the Independenc powerful machinery will be installed. It will be necessary to build a good wagon road to the mine to enable the transportation of machinery to be made. It is understood that the big ore body shows no sign of pinching and to the eye presents as fine appearance as could well be desired by reasonable mining men. Mr. Williams's report will undoubtedly be of a favorable character, having expressed himself as highly pleased with his inspection. It can very safely be said that the Independence is a mine and having the Granby Co. as owners its energetic development and production is assured. If the C.P.R. or the V.,V. & E. want tonnage it is certain the Independence will produce when equipped as much as they can handle with ease. Meanwhile the railroad companies should be building that way.

The marriage was solemnized Monday at Hedley of Charles Henry McDiarmid and Amelia Angela Allison, Rev. J. Thurburn Conn officiating. Only immediate relatives and friends were present. The Star wishes the happy couple all joy.

The close season for willow grouse has been extended to the 1st October and for prairie chicken, one year, until the 1st September, 1909. Of which all are duly required to take heed.

Tink French had a painful accident last week by which a nail pierced his foot and laid him up for a few days. Thanks to kind nursing and the fine condition of his blood he can now work or do a Virginia reel as lithely as ever.

Born—On the 16th inst., at Princeton, the wife of W. J. Kirkpatrick, of a son.

SIMILKAMEEN DISTRICT.

[Continued from last week.]

Princeton and the district tributary to it may be described as a mountainous country with beautiful stretches of valley and plateau, the soil possessing all the properties requisite for agricultural and horticultural pursuits. Being in the dry belt irrigation is necessary for the greater portion of the land the remainder is self or sub-irrigating. Farmers raise all the different grains and hay and as much in yield as in other parts of the Dominion.

Mineral outcroppings and old placer diggings are in evidence at almost every turn of the eye. Coal is mined in the town and delivered at a cost of $4 per ton. It would be a blind man who could not tell this was essentially a mineral producing district. True, development has been slow, but the handicap of no rail transportation has clogged all progress and disheartened some persons from any further effort. With drawbacks and delays beyond the control of investor or residents it is often a source of surprise to visitors that so much has been accomplished. Several mining properties have been developed up to the point where rail transportation is absolutely necessary. Without big money to face all kinds of obstacles the ordinary mine owner must halt until the railway cheapens delivery.

Princeton is a town of less than a decade in growth, having been acquired by the present owners, the Vermilion Forks Mining & Development Co., by whom it was surveyed into the present townsite. It was some twenty years ago when the first store was opened in Princeton. Those were the halcyon days of the gold hunters. And they found it along the Tulameen and Similkameen rivers and Granite Creek. A lot of placer gold and platinum was taken out of ground that offered least resistance to pick and shovel. A few placermen still work on the creeks and rivers where water is handy for washing but the benches are practically untouched. Hydraulic and dredge mining are the usual means of extracting alluvial gold in difficult places and Princeton district affords unlimited scope for those classes of mining.

The location of Princeton is ideal from a distributing or scenic point of view. Situated at the forks of the Tulameen and Similkameen it commands water reaches finding their sources in the timbered areas stretching from near the Fraser River to the international boundary line. A more favorable location it would be hard to find for sawmilling purposes and the manufacture of building material and furniture. Logs could be driven to the mill from the most westerly confines of the district. Surplus lumber would find a ready market in the northwest provinces.

Up the Similkameen river about 8 miles is Ashnola, on the one side of it being the famed Copper Mountain and on the other Kennedy Mountain. Beyond is Friday Creek and Roche River camps, in both of which there is high grade mineral. The whole country from Princeton to the headwaters of the Similkameen, Pasayton and Roche Rivers is mineral bearing and in some parts proven to be highly mineralized. There is no question in the minds of thinking men that the whole of the Similkameen River watershed will be dotted with mining camps, of either ore, coal or placer.

The Tulameen valley has been so often described and is so well known that it seems like repetition to make any allusion to it. No one but an infidel in the mining faith, however, could refuse to acknowledge that it possessed all the earmarks of a great mining region. It does not require a scientist or an expert to demonstrate anything. The silver-lead of Summit, the copper-gold of Bear Creek, the gold-platinum of Champion Creek, the placers of Granite Creek and the Tulameen and the bituminous coking coal on the North Fork of Granite are all self-evident facts staring one in the face. No one could, with reason, doubt their existence, even if he had not seen them in their native place. But the incredulous, the croaker and all of the disgruntled horde, who never do things and acquire nothing, are in every camp and town. If the Similkameen or any other mining district had to depend on them, it is feared there would be little enterprise or development.

All the various sections touched upon, including One, Five-Mile and Wolf Creeks, are tributary to Princeton. A glance at any late map will show the roads and trails converging here. And it is an estabiished law of trade that it must follow the natural courses laid down by the Great Engineer. So, there can be no successful opposition to Princeton coming into its rightful possession and natural heritage—the mining and commercial centre of the Similkameen. Small burgs like Welldo and Allison on either side of it may take on a mushroom growth but Princeton goes on forever and becomes a stable city of this great Province and of the world.

Continued in next week's Star.

AMATEUR WORK FINISHED

ADDRESS - PRINCETON, BC.

NOTICE.

Notice is given that I intend to apply to the Chief Commissioner of Lands and Works for a license to prospect for coal on the following described lands:

Commencing at a post marked J. M. Smith's S.W. corner post placed at the S E. corner of lot 1822, Similkameen division of Yale district, thence east 80 chains, north 80 chains, west 80 chains following the Similkameen river, south 80 chains to point of commencement.

JNO. M. SMITH.

May 21st, 1908.

NOTICE.

Notice is hereby given that all persons having claims against the estate of Christopher Burkstead, deceased 28th April, 1908, are required to send to the undersigned trustees full particulars of their respective claims within 30 days of the publication of this notice, otherwise no notice will be taken of them.

CHAS. WILLARSON,
JOHN E. HEDLEY, Trustees.

Princeton, May 27th, 1908. 26

STALLION

"ROB ROY"

SEASON OF 1908.

Commencing on Wednesday, 13th inst., the above named Stallion will stand for mares in Princeton on the

WEDNESDAYS

Until about the 20th July.

ROB ROY, No. 2702, is a pedigreed Clyde stallion—Terms: $10, single leap; $15 for season, and $20 to insure with foal. LUKE GIBSON.

20-24

NOTICE.

IN THE MATTER OF THE RAILWAY ACT AND IN THE MATTER OF THE VANCOUVER, VICTORIA AND EASTERN RAILWAY AND NAVIGATION COMPANY

NOTICE IS HEREBY GIVEN that at the expiration of four weeks from the first publication of this notice, the Vancouver, Victoria & Eastern Railway and Navigation Company will apply to the Board of Railway Commissioners for Canada at Ottawa, under Section 222 of the Railway Act to authorize the construction of a branch line of railway to the Vermilion Forks Mining and Development Company's coal mine on lot 1822, Group 1, in accordance with the plan, profile and book of reference showing such branch line which has been deposited in the Land Registry Office in Kamloops on the 7th day of May A. D. 1908.

Dated this 8th day of May, A.D. 1908.

A. H. MACNEILL,
Solicitor for the Vancouver, Victoria and Eastern Railway and Navigation Company.

The first publication of this notice was in the issue of this paper of the 20th day of May, 1908.

NOTICE.

NOTICE is hereby given to whom it may concern that one red heifer (horn-less) branded as cut on left hip, and one ball-faced steer, without ear marks and no brand discernable, both about three years old the coming spring strayed on to the premises of the late Angus McLod, and unless they are redeemed within thirty days and expenses of keep paid they will be sold by public auction to recover same.

A. MURCHIE.
G. MURDOCH.
Trustees A. McLeod estate.

Certificate of Improvements.

Alpha, Bell fractional, Campbird fractional, Prohibition mineral claims, situate in the Similkameen Mining Division of Yale district. Where located: On Copper mountain.

Take notice that I, F. W. Groves, F. M. C. No. B3892, acting for self and as agent for Eric E. Jackson, F. M. C. No. B79969, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 12th day of May, A.D. 1908.

F. W. GROVES.

FOR SALE.

Lot 4, Block Four; Lots 8, 9 and 10, Block One. Price, $500 Cash.

Addddress: M. M. POWERS, Vancouver, B.C.

Transfer of License.

NOTICE is hereby given that I intend to apply to the Superintendent of Provincial Police, Victoria, for a transfer of the license held by me for the Ashnola Hotel, Ashnola, B.C., to A. Provost. HUGH CAMPBELL.

Princeton, B. C., July 8. 1908.

"Freddie B" and "Rambler" mineral claims, situate in the Similkameen mining division of Yale district. Where located: On Five-Mile creek.

Take notice that I, Luke Gibson, Free Miner's Certificate No. B9668, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 12th day of February, A.D. 1908. 8-16

LOCAL AND GENERAL

A petition to have a through service without layover at Oroville, from Keremeos to Spokane via V.,V. & E., was in circulation in Princeton and was largely signed. If the petition be granted it will make a difference of a day between Princeton and Spokane.

E. W. Vans of Hedley is holidaying at Princeton for a week or so the guest of Ralph and Marie Murdoch.

Len Huston and A. Sykes bought lot 22, block 11, for $150 and J. G. Macdonell bought lot 9, block 14 for the same sum. These lots are on Kenley Ave., which is now becoming a fine residential section.

Miss Lyall returned last Wednesday from a very pleasant visit to Nicola and to "Penstowe," the picturesque home of Miss Thynne, Otter Valley.

Summers & Wardle, with their usual enterprise, have imported the first wagon load of the celebrated early Keremeos assorted fruits. Peaches and cream, oh, my! How it tickles the boys and girls to even think of them. Sampling done by the 'devil'

It is nearly a month since any rain fell and the earth is as dry as fresh made ashes. Harvesting is now in progress and gives promise of a good yield of grain although the straw is shorter than usual.

J. Peck MacSwain, humorist, poet and traveller, saved himself from the fire at Fernie—it was about all he could save, as his friends well know. He telegraphs as follows: "Dear Tom: Escaped the holocaust. No alternative but work. Wire me $10 at once." The answer: "Greenwood, Aug. 3.—My Dear Peck: You'll get the holocaust later. Work. Forget the $10. (Collect.) T. Walsh."

John B. Taylor, of Idaho, arrived in town last week, going on to the Skagit country with guide Samson French. Mr. Taylor has large interests in timber and agricultural lands there and is only waiting for the railway to develop it.

A. E. Parker of Boston, Mass., is in town and will probably remain here in company with Messrs. Leavitt & Ryder as hunter and trapper.

The stork can scarcely be regarded as a rara avis in these parts, since it is such a frequent visitant—indeed it may be said to be indigenous. It perched on the flagstaff of the Tulameen hotel recently, Princeton being blessed thereby with an addition of a fine baby boy to its population.

The second automobile seen in Princeton arrived last Thursday from Hedley. It is a two seated touring machine owned and chaffeured by Mr. Bremner of Nelson. It is his intention to put this "bile" on the route between Keremeos and Princeton. It might not be bad business to extend the route to Welldo, Tulameen and Nicola thus connecting the termini of the C.P R. and the V.,V. & E.

STRAYED on my premises one bay horse branded **C** on left hip. Owner may have same by proving ownership and paying damages. If not claimed in 30 days will be sold ERNEST RICE.

Watchmaker and Jeweller.

Ladies and Gentlemen: Do not fail to send me your watch or jewellery for repairs. I can guarantee the work to be done right at low prices. If you are in need of a Watch or Jewellery let me know and I will deal with you according to the old saying: Honesty is the best policy.

Yours truly,
J. B. HADDAD,
Watchmaker and Jeweller.

Headquarters, Vancouver: Branch office at Nicola.

BOOZE HIS WEAK POINT.

An old Scotchman who was threatened with blindness consulted an oculist.

"Will you have a little stimulant?" inquired the doctor.

The old Scotchman smacked his lips in eager anticipation.

"Ou, aye, I'll tak' a drink o' anythin' you have handy," was the quick rejoinder.

"Ah, that's the trouble!" exclaimed the oculist. "You'll have to stop drinking or you'll lose your eyesight."

The old chap pondered a moment.

"A', weel, doctor, it doesna much matter; I hae seen everythin' that's worth seein', anyway."

A "DEAD" BEAT.

First Hobo—I told that woman I hap beat my way around de world.

Second Hobo—Was she interested?

First Hobo—Yes, she got out a rug and told me I could beat my way to the dinner table.

GIVE AND TAKE.

"See here!" exclaimed an angry man, "I wish you would muzzle that dog of yours at night. His barking keeps my baby awake."

"I was just going to request you to muzzle your baby, rejoined the neighbor. "His nightly howling annoys my dog."

THE SAFER WAY.

He—If we were not in a canoe I would kiss you.

She—Take me ashore instantly, sir!

Princeton, April 29, 1908.

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world.

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

PRICE: $5 in buckram with gilt top, or $7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?

WRITE NOW to the editor and publisher,

HORACE J. STEVENS,

550 SHELDEN BLDG., HOUGHTON MICH., U. S. A.

MINES AND MINING.

The Golden Zone on Nickel Plate Mountain, Camp Hedley, is proving to be a very rich mine. A five-stamp mill has been installed and the gold is plentiful. Capital is the one thing needful in the Similkameen to prove that there are other good mines.

The daily average of the smelter treatment of the B.C. Copper Co. is 2,097 tons or 59,821 tons for the month of July. The highest tonnage reached in 1907 was made in the same month but amounted only to 47,798 tons, or 12,023 tons less than this month.

The Wellington Colliery company of Victoria is ready to supply 7000 tons of coke from their ovens at Comox to the Boundary smelters in case of a shortage from Fernie as a result of the big fire,

The Sunset mineral claim near Rossland has been sold by O. J. Ingalls to W. H. Thompson, Spokane, for $10,000. The ledge is from 7 to 9 feet in width and is said to be high grade.

TWENTY-FIVE CENTS A MONTH or THREE MONTHS FOR FIFTY CENTS will bring the STAR to your Address every week. Why not subscribe and be in touch with this great mineral district. Every man in Princeton postal district should be a subscriber to his home paper, THE STAR.

FIRE ALARMS, &c.

Four sharp taps on the bell, with slight pause between each four, will indicate that the fire is in Ward 1. Two sharp taps, with pause between each two, will locate the fire in Ward 2.

Continuous moderate ringing of the bell will be used for meetings of any kind, for public demonstrations or for giving the correct time daily. Tolling for the dead will be one stroke of the bell with measured intervals of ten seconds. ad.
