No stuffy or sooty pipes ; no gas from Princeton coal.

SIMILKAMEEN STAR

Lift, love and keep sweet : Motto for 1910.

Everything points to Princeton being a divisional and junction terminus of the V., V. & E.; it is the natural converging centre for rivers, roads and trails and its location is admittedly the choicest in the Similkameen Valley as a distributing point—Buy now.

Vol. XI. No. 3. PRINCETON, B. C., WEDNESDAY, JANUARY 12, 1910. $2 a Year in Advance

REVIEW OF MINING

Daily News Special Edition Shows Steady Progress in Province.

Princeton and District Favorably Compare in Development and Bright Prospects.

The Nelson Daily News, with characteristic energy and enterprise, has issued a special mining edition containing a mass of information regarding the mining industry generally throughout the province. The work of collaborating the material for this valuable edition devolved upon editor Jacobs, the well known mining authority, who has again shown his capacity for colossal work of this kind and laid the province under a debt of gratitude for his eminent services. The Similkameen occupies large space in the edition, a few extracts from which are given, as follows:

Push Railway Construction.

"Perhaps the most important information there is to chronicle concerning progress in the vicinity of Princeton is contained in the following communication kindly sent by James H. Kennedy, assistant chief engineer of the V.,V. & E. in response to a request for information. He says: 'We have the track laid to the coal mine of the Vermilion Forks Co. and they intend to place their coal on the market at once. The spur is 4000 feet in length. A spur is also under construction to the Hedley Gold Mines Co's mill at Hedley for the purpose of delivering to them coal from Princeton. We expect to push the work of construction up the Tulameen river in the near future.'"

V.F.M. Co's Coal Mine.

"After years of waiting residents in the interior of the big Similkameen district now have the intense satisfaction of seeing railway trains running into and out of their part of the province. The Vermilion Forks Co. foreseeing this some months ago engaged Charles Graham, an experienced coal mine manager aud for some time underground manager of the Western Fuel Co., Nanaimo. Mr. Graham has been good enough to contribute the following notes on the Princeton coal mine at the request of the writer of this review:

"The only property in the vicinity of Princeton in a position to ship coal is that owned by the Vermilion Forks Co. There are two seams of coal, the upper seam being about six feet in thickness. A prospect tunnel was driven into this seam several years ago. About 50 feet below the Similkameen river bridge the lower seam crops out in the bank and in the bed of the river. An adit level has been driven in this seam almost due east on its strike for a distance of 622 feet. Upon the bench above the river a slope pitching about 18 deg., has been put down through the overlying gravel and this struck the coal at 154 feet At 60 feet west and 150 feet south of the mouth of the slope a small shaft, 8x8 feet was sunk and connected to the slope and the adit level.

Good Domestic and Steam Coal.

"The coal is lignitic in character and various tests show it to be well suited for domestic and steaming purposes. The lower seam is divided into two benches. The top bench is about 8 feet thick and free from dirt or slate : below this there is from two to three feet of fireclay. Underlying the fireclay is about 13 feet of coal. This bottom bench has several small bands of clay varying from ½ in. to 2 inches in thickness, but it is free from bone. The company is erecting a tipple and putting in a plant to handle an output of 400 tons per day. The chief market for this coal will be in the Boundary country and south to Spokane. No great amount of development has yet been done in the mine but there is sufficient to give an output of about 100 tons per day to commence with."

Copper Mountain and Whipsaw.

On Copper mountain, and in other parts of the district around Princeton, there are numerous mineral claims, some of which have been prospected sufficiently to expose ore in considerable quantity, but no particulars of recent date are available for the purposes of this review. Two months ago a report was published in the press to the effect that negotiations were in progress for the sale of the United Empire group, on One-Mile creek, owned by W. C. McDougall and associates. Last summer the Similkameen Star published an account of the reported discovery of silver lead ore on the Whipsaw. Mr. Camsell, in his report, mentioned that the Reco mineral claim had been steadily worked for a year and a half; that the Gladstone, on Friday Creek, had been further prospected ; and that there were claims on Five-Mile and Roche river which the owners considered sufficiently promising to warrant the expenditure of a considerable amount of money in development.

Platinum and Other Metals.

The property at the head of Bear creek in the Tulameen district, known as the Independence group, that was prospected continuously for more than two years either by the Granby company or some of its prominent shareholders on their own account, is about the most prominent in this part of the country. Particulars have been received of a group of claims on Coutney mountain, nine miles west of Otter Flat, described as contain-

Continued on 3rd page.

LOCAL AND GENERAL

Beautiful Winter Weather with Good Sleighing and Fine Skating,

Buildings to be Erected and Business Prospects Brightening as Days are Lengthening.

Mr. and Mrs. Waterman left for Spokane yesterday on the 2:30 express.

Geo. H. Broughton, C.E., P.L.S., arsived in town Monday and is engaged surveying for Wm. Wilson. Mr. Broughton will receive orders for surveying in this section and may be consulted at the Great Northern hotel.

F. E. Groffman, of Vancouver, is a visitor to Princeton and may become a permanent resident. Inspector?

E. O. DeLong may now be classed with Halley's comet in the rapid movement he made last week. Leaving here at 2:30 on Jim Hill's flyer he made sharp connection at Keremeos for Penticton by team, returning on Saturday at 1 o'clock, covering about 150 miles in less than two days. In the old days it would take a man four days to make this trip.

C. L. Cummings went down to Keremeos yesterday on a business trip.

Installation of officers in Princeton Lodge No. 52, I O.O.F., was held last Thursday night, as follows : D. M. French, N G.; J. D. Lumsden, V.G.; P. E. Rowlands, R.S.; J. M. Wright, Treas.; J. R. Campbell, Warden ; J. F. Waddell, R.S. N.G ; T. Hughes, Con.; J. L. Huston, I.G.; P. Johnson, L.S N.G.; Geo. Graham, R.S.V G.; C. Saunders, L.S.V.G ; P. Y. Smith. Chap.

A smoker concert will be held soon under the auspices of L.O.L. No. 2102, at which some interesting features may be expected on the program.

The total amount of expenditure in connection with the citizen's masquerade ball, $255,63, will be fully met when a small balance due from subscribers is paid in to Treasurer Marlow. A statement in detail has been prepared and must prove highly satisfactory to all concerned.

Messrs. Avery & Avery have received instructions to sell by public auction on the 17th Feb. next, lot 7, block 11, Fenchurch Av , now occupied by Mr. Cheine. The property is now held by the bank of British North America in virtue of a mortgage, the original owner being Angus Stewart of the late firm of McDonald & Stewart, sawmillers.

Try Campbell's book and stationery department for good and cheap reading matter. See his ad. on 3rd page.

Huston Bros. have the contract for carrying the mail from the station to the postoffice.

A new building on Fenchurch Av. will shortly be erected by Contractor Irwin for Messrs, Avery, the lumber for which is now being delivered.

Mr. G. C. Tunstall the pioneer Government Agent of Kamloops was in town yesterday. Mr. Tunstall has lately been superannuated, although so far it has not been gazetted, and it is his intention of settling down in the Similkameen country at Granite Creek.—Ashcroft Journal.

Keremeos has now coal "to burn." The first carload from Princeton was distribvted on Monday by Messrs. Tweddle & Elmhirst, local agents for the Vermillion Forks Co. All who have tried the new article are delighted with it, and our hardware merchant has placed a large order for coal stoves, which are certain to supersede the old Queen heater.—Hedley Gazette.

Provincial Legislature meets Thursday, the 20th day of January.

A. Murchie writes that he will leave in a few days for Princeton. There are many others heading this way.

REVISITS HIS FIRST 'LOVE.'

Tom McAlpine, of Summerland, was in town last week renewing old acquaintances and sizing up the prospects for a big town. He was among the early arrivals in Princeton some 9 or 10 years ago, but got tired waiting for the railway and left, saying he would not return until he could ride into town on a pullman. He came in on the regular train the other day and was amazed at the progress and development observed. He has never lost faith in Princeton and will eventually make this place his home. Mr. McAlpine has prospered materially in the Okanagan having been concerned with irrigation schemes and his investments proved profitable, also in home life he is happy and blessed with a bunch of little ones. Summerland is incorporated. has an uptodate newspaper, is issuing $250,000 in debentures for light and waterworks, has sidewalks and streets macadamized with shale.

LIKES OUR CLIMATE.

George N. Gartrell, of Summerland, was a recent visitor to Princeton, having come to spy out the land for investment and other business. It is his first visit and he quickly saw the immense possibilities of a country so fertile in mineral and other resources. His people are among the oldest and most respected families in the Okanagan and grow great quantities of fruit. With the building of the Kettle Valley railway connection will be made between Princeton and Summerland, when the interchange of fruit and coal will begin, Mr. Gartrell is pleased with our climate and enjoyed sleigh riding.

'DISCREDITED.'

Since the elections Bruce of the 'Setting Sun' seems unable to get rid of, or forget, the awful throw down he and his party (himself and Sir Hibby Tupper received on that fateful November day. A pair of featherweights that nobody outside of a few befuddled tea drinking grannies in Vancouver give any heed to. Star said that the Sunset was discredited and there is no end of proof of that statement. The Sunset blew hot for Premier McBride and his railway policy in the earlier part of the campaign, then it blew cold, very cold and raw, against him; it said that the jawsmith of the Delta would sweep on to victory with his (Bruce's) railway policy. Well, it is hard to say it without smiling, poor old John of Delta didn't sweep worth a cent but got caught in the Sunset's suction renovator and was dumped in the dust bin a paralyzed and pulverized mass, unrecognized and forgotten even by the discredited 'Setting Sun.' Then the Sunset said that Hill would not build over the Hope mountains via Coquihalla Pass but would build down the Skagit. At this moment tenders are let for construction of the remaining portions of the V.,V. & E., and no one here doubts the intentions of President Hill to build. Only suspicious egotists who think they can see farther than ordinary mortals say that the V.,V. & E. will not be completed via Hope. Bruce said in his wild pre-election fabrications that the V.,V. and E. would be a sluice for trade with Spokane to the injury of Vancouver and the province generally. So far, since the road opened for traffic, a sluice full of coal has been pouring out of Princeton into Spokane and other Washington points. As return freight from Spokane a few pounds of Limburger cheese, German sausage and snuff have been received, which, in comparison with many carloads of merchandise from Vancouver, make Bruce and the Sunset discredited beyond redemption. The sluice racket was overworked in the Sunset's anxiety to make political capital for his party. The inexperienced Bruce never thought that time would expose all his wild and extravagant statements and dub him Mr. Facing-both-ways or all ways. Enough has been shown up to prove the Sunset a discredited and discreditable organ. It slanderously referred to the Star and Hedley Gazette, either of which has from principle, and not from mercenary or selfish motives, advocated a progressive railway policy which would benefit the whole country Can the Sunset say as truthfully that its tinpot railway over Hope mountains was advocated with as pure and unselfish motives? Star has no more space to devote to the Sunset. If it will accept advice, which is doubtful, owing to the prominence given the pronoun 'I' on its front page, Star would urge it never to make statements opposed to fact or that it cannot prove, then the word discredited will not apply to it.

NOTES AND COMMENTS.

If there is one thing more than another that enhances the value of a town as a place of residence it is the cleanliness and consequent healthfulness of the people. Last summer it was again emphasized that a thorough system of sanitation and pure water supply were necessary if the germs of fever or other disease are to be successfully combatted. To be forewarned should be forearmed; which, in plain terms is nothing more nor less than waterworks and sewerage systems. Having these the questions of hospital, fire protection and scavenging are simplified, if not solved. There ought to be something immediately done so that in the early summer the benefits of these systems might be realized in part, at least.

Britain will have pronounced for aristocracy or democracy in the next fortnight by the elections now coming on. The most important thing to be decided at the polls will be the constitutional reform of the house of lords. If one may judge the temper of the great mass of the people at this distance the Old Country is now ripe for a bloodless revolution. Equal rights and privileges to all; the burden of taxation laid upon all in fair proportion; free imported food and self-government for Ireland on the lines of our provincial governments, are some of the questions the Liberals propose to settle if returned to power. The Conservatives promise tariff reform and taxed imported food if they are returned, their leader preferring to 'prescribe when he is called in,' as he puts it, on other matters. Liberals throughout the Empire will wish success to the cause of the people in their struggle against oppression and wrong.

Between the Germans and the threatened alliance of the Irish with them John Bull is a badly scared man. Give the Irish two local legislatures, let the colonies build, own and control their fleets, a parliament of the United Empire, then German and all other war scares will vanish—the Anglo-Saxon race may then dictate peace to the world.

REVIEW OF MINING.

From First Page

ing large ore bodies in which copper, platinum and other metals occur, but it is not clear to what extent these have been developed.

Placer mining of the gold and platinum gravels of Tulameen river and Granite creek is carried on intermittently by both white men and Chinese but not with recent results of importance.

Concerning coal in the Tulameen country, Mr. Camsell reported: "A new discovery of Tertiary coal, of a fairly high grade, was made a couple of years ago on the north fork of Granite creek.

It may be stated here that last September reports of the recent sale of Granite creek coal property were printed in provincial newspapers.

Genuine sauerkraut for sale at Semerad's Bakery

Cook o' Peary? Go and hear the lecture tonight by A. E Vaughan, M. A. Cook is not to be found just now but there will be some interesting illustrations of him and prabably of the pole, too. Adults 50c., children, 25c.

If you want your hens to lay eggs now get egg producing powder at Semerad's Bakery. No pay unless the powder produces.

There was a riot in Phoenix on Thursday and some of the participants were bably injured. The account of the affray in the Spokesman-Review was of a sufficiently sensational character to justiry the lynching of the correspondent.—Grand Forks Sun.

Don't risk your life for the sake of 25c. but come to the "Owl Skating Rink." *

MORTGAGE SALE

Under and by virtue of the powers contained in a certain mortgage which will be produced at the time of sale, there will be offered for sale by PUBLIC AUCTION by Henry H. Avery, Auctioneer, at Avery & Avery's office, in the town of Princeton, British Columbia, on

Thursday, the 17th day of February, 1910,

At the hour of 2 o'clock in the afternoon, the following property:

PHILOSOPHY OF LIFE.

Never spend money before you have got it.

Some persons would have you think they know it all by merely looking wise, but they undeceive you when they begin to talk.

The noblest feel most keenly the need of the best that man has done.

Boost and bustle, let the queer people knock and kick and find fault.

Never buy what you do not want because it is cheap.

We never repent of having eaten too little.

Suspicion and envy are the backbiter's stock in trade.

The honest and truthful person always is dignified and therefore commands respect.

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper miuing shares.

PRICE: $5 in buokram with gilt top, or $7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?

MINES AND MINING.

Joe Boyle of Dawson has arived in Ottawa with $50,000 in gold for the royal mint. Heretofore Dawson gold has gone to San Francisco.

The Granby Consolidated Mining and Smelting Co. has an issued capital of $13,500,000 and has paid $3,778,630 in dividends to date.

The Lucky Jim mine, near Kaslo, has shipped 490 tons of ore, netting about $5,500, in 22 days mining, There are 20,000 tons of ore blocked out.

The present year, 1910, has a great mining revival in store for the whole of the Similkameen. The minerals are here and capital will prove it.
