Princeton 'Black Diamonds,' best general fuel in use

SIMILKAMEEN STAR

If you can't be clever you can be clean.

Having a remarkably healthy climate, beautiful location, sportsman's elysium, vast mineral resources, and soon through railway connection within 5 hours of coast; Princeton enjoys brighter prospects than any town in B.C —It will be divisional and distributing point—Invest now.

Vol. XI. No. 23. PRINCETON, B. C., WEDNESDAY, JUNE 1, 1910. $2 a Year in Advance

TULAMEEN PLATINUM

Source of It Still Hidden but Nature will Yield Secret to Science.

Sooner or Later Platinum in Place will be Discovered and then Profitably Mined.

[Continued from last week.[

A possible source of some of the gold and platinum of the district is certain old beds of sandstone and conglomerate, which have been determined as Oligocene in age, and which outcrop on Collins gulch, Blair creek and the northern face of Jackass mountain. In the Kamloops district to the north, Dr Dawson cites three localities in which he found Oligocene conglomerates containing traces of gold (Geol survey of Canada, Vol. VII, page 314 B); hence, on this evidence, there is no reason why both gold and platinum should not be found in the Oligocene conglomerates of the Tulameen. It is not known, however, whether any tests have ever been made of these beds. At the same time, because these conglomerates are some of the youngest rocks in the district, they have been undoubtedly derived from the same rocks which have formed the present stream deposits; and because these stream deposits are productive both in gold and platinum, it is to be expected that the Oligocene conglomerates will also carry a certain quantity of these metals. Whether that quantity shall have been sufficiently concentrated to form payable deposits is not known, but a test to ascertain this point might well be worth while.

Platinum in Placers.

The ultimate source of the platinum, either in the older or the younger placers must of necessity have been the solid rocks which underlie and are adjacent to them. The constituents of placers have been produced by long processes of erosion, and the concentration of the metals therein is the result of the transportation and working over of the constituents by the streams. As placers are usually thin and unconsolidated deposits, and are easily removed by erosive action, only the most recent usually now remain, and these are found in the beds of the present streams. The shape and size of the mineral in the placers are important factors in the process of concentration. The finer the mineral the more easily it is transported, so that the larger nuggets are found near the original source. The shape of the nuggets is also an indication of the distance they have travelled; thus angular and unworn nuggets imply the

REBEKAH LODGE FORMED.

The institution of a lodge of Rebekahs by Miss Frauces Bacon, of Nelson, Grand Organizer, was held in the I.O.O.F. hall, Tuesday night. The Rebekahs are a branch of Oddfellows admitting both sexes and are under Grand Lodge jurisdiction. The first lodge was instituted in 1852 by Schuyler Colfax and the number is increasing rapidly. The following are first officers of Princeton Rebekah Lodge: Mrs. C. Graham, N.G.; Mrs. L. Huston, V.G.; Bert Irwin, R.S.; H. Cowan, Fin, Sec.; Mrs. J. F. Waddell, Treas; C. Willarson, R.S.N.G.; Miss N. Lyall, L.S.N.G.; Miss E. Lyall, R S.V.G; Mrs. R. Gourlay, L.S.V.G.; R. Gourlay, I.G.; J. F. Waddell, O.G.

THE MUSICAL ECKHARDTS.

One of the cleanest, eleverest, interesting and instructive entertainments ever offered to a Princeton audience will be presented by the Musical Eckhardt's and Swiss Bell Ringers on Saturday evening next, June 4th. The press of the province speak in terms of unstinted praise regarding their performances. Their aptitude for music is almost phenomenal, and whether it be with instrument or voice they give their hearers unalloyed pleasure. Don't fail to hear them, in the I.O.O.F. Hall. Admission 50c., 75c. and $1. Reserved seats at A. E. Howse Co's store. Read the large posters.

PRINCETON VS. HEDLEY.

Eye witnesses of the baseball match last Sunday declare that it was a most interesting game, the pesky mosquitoes adding their quota to said interest by causing considerable bloodshed. Hedley played at considerable disadvantage in having a new, fluffy ground to work on, whereas their home grounds are firm and have a tough sod. The visitors put up a plucky game, parts of which showed good execution and genuine skill. But it was evident Princeton would win from the turnloose and nothing but a cataclysm of bad luck could snatch victory from them. It is not necessary to publish the score until the end of the season, if even then, according to regulations. Dell Young acted as umpire and rendered his decisions promptly and without fear or favor.

Avery & Avery report the sale of lots 6 and 7, block 14, H. A. Whillans to W. Delmont Young, consideration $225 each. Also, H. A. Whillans to John A. Carlson, Lot 5, block 14, consideration $200.

Contractor Irwin will begin in a few days a building 22x40, store and office for the Similkameen Lumber Co., and has just completed a large shed for this Co., 26x100.

To insure insertion in the current issue of the Star advertisements should reach this office not later than Tuesday noon.

COAL LANDS BOUGHT

Princeton Coal Attracts Capital and Big Company is Organized.

Coal is High Grade, with 69,000.000 Tons in Sight—Will Equip and Develop.

Star contained recently first published news of a big coal deal in this section and has now fuller particulars from the Spokane Review, as follows: Andrew Laidlaw has just completed the purchase of another large coal area and is now incorporating a company to acquire and work it. The company will be known as the Princeton Collieries, Limited, and will have on its first board of directors, A A. Jones, president; Jas. Whitcomb, secretary of the Canadian Development Co., Vancouver; G. E. McDonald, of the McDonald-Marpole Co., Vancouver; R. Kelly, of the Kelly Douglas Co, Vancouver; W. K. Shissler and A. H. Featherstone, attorneys, of Wallace, Idaho, and Mr. Laidlaw himself.

Other large shareholders in the Company are: Dr. McGee of Spokane; C. O French and J. B. Wood of Princeton, B. C.; and a number of prominent Montreal capitalists

The property consists of 12,294 acres of coal lands adjoining and almost surrounding the town of Princeton. The lands are traversed by the line of the V.,V. & E. now under construction by the Great Northern to Vancouver, B.C. and include practically all the coal measures of the Princeton basin, except those owned and now operated by the Vermilion Forks Co.

Market is Assured.

On completion of the V.,V. & E. railroad next year Princeton will be within 150 miles of Vancouver, and also convenient to the Spokane market, being about the same distance from this city as the principal competing districts of Alberta. The completion of the road now under construction from Oroville to Wenatchee will give it the shortest line to the Big Bend and Columbia river districts enjoyed by any coal producing country in the Inland Empire.

R. H. Morris, M.E., one of the foremost coal experts in the United States, whose experience as mine manager covers Pennsylvania, Ohio, Colorado and Alberta, estimates the tonnage practically in sight on the property of the Princeton Collieries Co. at 69,000,000 tons, eliminating altogether one seam 10 feet thick, because of its being so closely associated with another seam as to possibly render its extraction difficult and expensive. The other three seams have widths of 20, 4 and 8 feet, respectively.

Unexcelled Domestic Fuel.

The coal of the Princeton basin is a high grade lignite, equal in quality for domestic use to the best product of Alberta and Wyoming. Analysis of the coal shows 85.66 per cent. combustible matter, of which 47.30 per cent. is fixed carbon, with low moisture and little ash or sulphur. This ranks it as a coal of high heating value with little tendency to clinker.

The company acquired the following properties: From the Canadian Development Co. 6,000 acres; W. K Shissler and A. H. Featherstone 3,500 acres; C. O. French and J. B. Woods 2,500 acres.

The capital stock of the company will be $2,500,000 in dollar shares, of which 1 000,000 will be placed in the company's treasury to finance the development and equipment of the property.

LOCAL AND GENERAL.

Board of Trade meets next Monday night at 8 o'clock in the courthouse.

E. P. Wheeler, of Conconully, Wash., is in town on mining business.

D. M. French is building an annex to his tin and carpenter shop.

A skull of prehistoric man was dug up by navvies on the railway line. As a thinktank it is remarkable for size.

W. Arthur Battye, piano tuner, will shortly visit Princeton.

H. A. Turner, road superintendent, was in town recently and is energetically pushing work in all sections.

The marriage of Nigel Ewart to Miss Lowe of Keremeos was solemnized yesterday, the happy couple taking a honeymoon trip over the Hope mountains on horseback.

E. Waterman returned yesterday from a business trip to Fairview.

Friday is the King's birthday and a statutory holiday. It will not be a fete day owing to mourning.

D. G. McCurdy, of Keremeos, is in charge of a fruit and vegetable store opened in the Silverson block by O. H. Carle.

Al Johnson is back from Merritt and is now sawyer for the Similkameen Lumber Co.

Divine service (Presbyterian) in the courthouse on Sunday at 11 a.m. and 7.30 p.m. Will parents kindly note that Sunday School will meet during the summer months at 10 a.m. instead of 2.30 p.m. Childrens' monthly services Sunday first at 11 a.m. Communicanis class (Presbyterian) will meet on Wednesday first in the courthouse at 8 p.m.

G. M. Hoinekey leaves today for the coast. During his residence here he made many friends.

A lot of local matter is left over from this issue of Star to next.

The Similkameen Star.
J. M. Wright,

NOTES AND COMMENTS.

The dry season is here, Halley's comet is going, and the danger of cremation is over. Meantime look out for any infringement of the Bush Fires Act. The fire wardens have strict instructions to enforce this Act and they will carry out their duties without fear or favor. Every good citizen will assist in mitigating the dangers of fire by example and precept.

The question of universal free trade should be the next great step to be taken by the civilized nations of the world. It is of such vast importance that it is a wonder so little has been done to bring it into effect. Closely allied with universai free trade is universal peace and disarmament of the nations. Of course the Millenium cannot be expected to follow as a result of this free trade but it may pave the way for it. Now then, who will start the first Universal Free Trade Society and thus systematically begin the agitation. If some of those newspapers that honored Star by publishing excerpts from its article of a month ago on this subject would only print their own original ideas of it some headway could be made. Dare they do it? Are they afraid of the party whip?

Many preachers and church journals are bewailing the fact that the religious services of the r denominations fail to attract the people. And empty seats are very much in evidence notwithstanding the entertainment offered in choir selections, oratory (?), the latest millinery and the ever fashionable collection. Not even a pressing invitation or a personal visit will budge the multitude. The churches do not attract, draw men and women to them, for the reason that they have nothing attractive to offer. A humdrum sermon is not sufficient. There must be the vitalizing power, healing the sin-scarred soul, curing disease and casting out the demons of envy, jealousy, pride, intemperance, bitterness, hatred, &c. There was no lack of auditors in the days of the Saviour and his apostles, for they demonstrated, proved what they taught. The world is honeycombed with sin and disease. Any person of sound mind wants the cure for both and until preachers and teachers of religion can demonstrate and prove by their own lives the power of the living Word to save and heal there will be empty seats and empty fruitless sermonizing. People are matteroffact these days and they are ripe and ready for a gospel that 'shows' them and can produce tangible, incontrovertible proofs of power to cure and save. This gospel Jesus and his disciples preached and practised. But a religion that conforms to worldly opinion, resorts to earthy methods instead of spiritual will be torn with rows, schisms and 'damnable heresies.' The empty seat and the empty form of religion are as evident as cause and effect can be.

NOTICE

YALE LAND DISTRICT.
DISTRICT OF YALE.

Notice is hereby given that Lewis Hind, of Victoria, B.C. intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen, river:—Commencing at a post planted about 2 miles from and south of the junction of the South Fork and the Tulameen rivers and marked Lewis Hind, S.W. corner, thence north 80 chains, east 80 chains, south 80 chains, west 80 chains to point of commencement, and containing 640 acres. LEWIS HIND,
April 7, 1910. P. Y. Smith, agent.

Notice is hereby given that John Henry Jackson, of Tulameen, B.C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the South Fork of the Tulameen river:—Commencing at a post planted about 2 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked J. H Jackson, S.E. corner, thence north 80 chains, west 80 chains, south 80 chains, east 80 chains to point of commencement and containing 640 acres. J. H JACKSON,
April 7, 1910. P. Y. Smith, agent

Notice is h reby given that Edith Mary Hind, of Victoria, B. C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 2 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked E. M. Hind, N. E. corner, thence south 80 chains, west 80 chains, north 80 chains, east 80 chains to point of commencement and containing 640 acres. EDITH M HIND,
April 7, 1910. P. Y. Smith, agent.

Notice is hereby given that Rowland Fennings Taylor, of Victoria, B C, intends to apply to the chie commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river.—Commencing at a post planted about 2 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked R. F. Taylor, N W. corner, thence south 80 chains, east 80 chains, north 80 chains, west 80 chains to point of commencement and containing 640 acres. R. F TAYLOR,
April 7, 1910 P Y. Smith, agent

Notice is hereby given that John Willis Ambery of Victoria, B C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river.—Commencing at a post planted about 4 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked J. W. Ambery, S.W, corner, thence north 80 chains, east 80 chains south 80 chains, west 80 chains to point of commencement, and containing 640 acres J. W. AMBERY,
April 7 1910. P. Y. Smith, agent.

Notice is hereby given that Charles Willarson, of Princeton, B.C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 2 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked C. Willarson, SE corner, thence north 80 chains, west 80 chains, south 80 chains east 80 chains to point of commencement a d containing 640 acres. C. WILLARSON,
April 7. 1910, P. Y. Smith, agent.

Notice is hereby given that Peter Johnson, of Princeton, B.C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 4 miles from and south of the junction of the South Fork and the Tulameen rivers and marked P. Johnson, NE corner, thence south 80 chains west 80 chains, north 80 chains, east 80 chains to point of commencement, and containing 640 acres. PETER JOHNSON.
April 7, 1910.

Notice is hereby given that Mary Hewat, of Princeton, B. C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river —Commencing at a post planted about 4 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked M. Hewat, NW corner, thence south 80 chains, east 80 chains, north 80 chains west 80 chains to point of commencement, and containing 640 acres. M HEWAT,
April 7 1910. P. Y Smith, agent.

Notice is hereby given that Emilie A. I, Martin, of Victoria, B.C., intends to apply to the chief commissioner for a license to prospect for coal and petroleum on the following described lands situatt on the south fork of the Tulameen river:—Commencing at a post planted about 6 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked E. A. I. Martin, SW corner, thence north 80 chains, east 80 chains, south 80 chains, west 80 chains to point of commencement, and containing 640 acres. E. A. I. MARTIN,
April 7, 1910. P. Y. Smith, agent.

Notice is hereby given that Philip Y. Smith, of Princeton. B C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 6 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked P. Y. Smith, SE corner, thence north 80 chains west 80 chains south 80 chains east 80 chains to point of commencement, and containing 640 acres. P. Y. SMITH.
April 7, 1910.

Notice is hereby given that Jessie Renton Hunter, of Princeton, B.C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 6 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked J R Hunter, NE corner, thence south 80 chains, west 80 chains, north 80 chains, east 80 chains to point of commencement, and containing 640 acres. J. R. HUNTER
April 7, 1910. P. Y. Smith, agent.

Notice is hereby given that Alexis Martin, of Victoria, B C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about o miles from and south of the junction of the South Fork and Tulameen rivers and marked A. Martin, NW corner, thence south 80 chains, east 80 chains, north 80 chains, west 80 chains to point of commencement, and containing 640 acres. A MARTIN,
April 7, 1910. P. Y. Smith, agent.

Notice is hereby given that Francis J. O'Reilly, of Victoria, BC intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen River:—Commencing at a post planted about 8 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked F J. O'Reilly, SW corner, thence north 80 chains, east 80 chains south 80 chains, west 80 chains to point of commencement, and containing 640 acres. F. J. O'REILLY,
April 7 1910 P Y Smith, agert.

Notice is heseby given that Harriet E Olding, of Grand Forks, BC, intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 8 miles from and south of the junction of the south South Fork and Tulameen rivers and marked H. E. Olding, SE corner, thence north 80 chains, west 80 chains, south 80 chains, east 80 chains to point of commencement, and containing 640 acres. H E. OLDING,
April 7, 1910 P Y Smith, agent.

Notice is hereby given that Elizabeth Olding, of vancouver, B C. intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 8 miles from and south of the junction of the South Fork and the Tulameen rivers and marked E. Olding, NE corner, thence south 80 chains, west 80 chains, north 80 chains east 80 chains to point of commencement, and containing 640 acres. E. OLDING.
April 7, 1910. P Y Smith, agent.

Notice is hereby given that William P. Walker, of Victoria, BC, intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen River:—Commencing at a post planted about 8 miles from and south of the junction of the South Fork and Tulameen rivers, and marked W P Walker, NW corner, thence south 80 chains, east 80 chains, north 80 chains, west 80 chains to point of commencement, and containing 640 acres. W. P. WALKER,
April 7 1910. P Y Smith, agent

Notice is hereby given that Robert Joseph Harlow, of Victoria, B C, intends to apply to the chief commissioner of lands for a licens to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about ten miles from and south of the junction of the South Fork and Tulameen rivers and marked R. J Harlow, S W corner, thence north 80 chains, east 80 chains, south 80 chains to point of commencement and containing 640 acres. R. J HARLOW,
April 7, 1910. P Y Smith, agent

Notice is hereby given that Henry Thoresby Hughes, of Kingston, Ont. intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following deserbed lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 10 miles from and south of the junction of the South Fork and Tu ameen rivers and marked H T. Hughes, SE corner thence north 80 chains west 80 chains, south 80 chains east 80 chains to point of commencement, and containing 640 acres H. T. HUGHES,
April 7, 1910 P Y Smith, agent

Notice is hereby given that Casimir S. Czowski of Vancouver, B.C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about ten miles from and south of the junction of the South Fork and Tulameen rivers and marked C. S. Czowski, N E corner, thence south 80 chains, west 80 chains, north 80 chains, east 80 chains to point of commencement, and containing 640 acres. C. S. CZOWSKI,
April 7, 1910 P Y Smith, agent

Notice is hereby given that Charles C. Bennett, of Victoria, B C, intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following deserbed lands situate on the south fork of the Tulameen river:—Commencing at a post planted about ten miles from and south of the junction of the South Fork and Tulameen rivers, marked C C Bennett, N W corner, thence south 80 chains, east 80 chains, north 80 chains, west 80 chains to point of commencement, and containing 640 acres. C. C. BENNETT
April 7, 1910 P Y Smith, agent

NOTICE.

Take notice that I, George L. Fraser, of Granite Creek, B.C., intend to apply for permission to purchase the following described lands:

Commencing at a post situated at the S.E. corner of Lot 181, Yale division, Yale district, B.C., thence west 62 chains more or less to the N.E. corner of Lot 3044, thence south 80 chains to the N.E. corner of Lot 293, thence east 80 chains to the N.E. corner of Lot 294, thence north 80 chains more or less, thence west 18 chains more or less to the point of commencement, containing about 640 acres more or less.

GEORGE L. FRASER.

TULAMEEN PLATINUM.

From First Page.

proximity of the original source.

Determining Its Source.

It was ascertained by the miners that no platinum was obtained in the gravels of the Tulameen river above the mouth of Champion creek; but thence to the mouth of Slate creek and in Slate creek itself were found the richest diggings. As the distance increased downstream from Slate creek the platinum gradually decreased in quantity, the grains became finer and had a much more water worn appearance. The platinum bearing tributaries of the Tulameen river, besides Slate creek were Cedar, Eagle and Bear creeks, with Granite creek and its western branches. These latter, however, contained a diminished quantity of platinum, while too, the grain of the metal was finer. All these streams, with the exception of Cedar creek, have their origin in or else cut through a belt of very basic rock, which run from the head of Newton creek at Lodestone mountain northward across the Tulameen river to the first west branch of Bear creek. This belt of basic rocks is peridotite, having a flanking border of pyroxenite. From a careful study of the geology of the platinum made in 1901, Prof. J. F. Kemp (Bull. U.S. Geol. survey, No 193, page 38), concluded that the origiual source of the platinum was in both the peridotite and the pyroxenite and that the placers were derived from these by the ordinary process of decomposition, erosion and stream concentration. His conclusions were based both on the distribution of the placers, and on the occurrence of olivine, chromite and pyroxene—all constituents of either the peridotite or pyroxenite—with the platinum in the nuggets. From knowledge, moreover, of the relation of platinum to rocks of this character in other parts of the world, no other source than that ascribed would seem possible. Prof. Kemp's findings in this respect were corroborated by the writer in a geological survey of the district in 1909. The fact that Cedar creek, while carrying platinum, does not cut either peridotite or pyroxenite does not invalidate the conclusion as to source, for the platinum here might have been derived from Tulameen river gravels washed thither at an earlier period; or again its derivation might have been the Oligocene conglomerates through which it flows.

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world.

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper miuing shares.

PRICE: $5 in buokram with gilt top, or $7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?
